§ V.—1. The use of the books published by the Commissioners is not compulsory; but the titles of all other books which the patrons or managers of schools intend for the ordinary school business, are to be notified to the Commissioners; and none are to be used to which they object. The approval of any such books is to extend only to the particular edition which has been submitted to the Commissioners.

2. If any books other than the Holy Scriptures, or the *standard* books of the Church to which the children using them belong, be employed in communicating religious instruction, the title of each is to be made known to the Commissioners whenever they deem it necessary.

3. The Commissioners do not insist on the "Scripture Lessons" or book of "Sacred Poetry" being read in any of the National schools, nor do they allow them to be read as part of the ordinary school business (during which all children, of whatever denomination they may be, are required to attend) in any school attended by children whose parents or guardians object to their being read by their children.

In such cases the Commissioners prohibit the use of these books, except at times set apart for the purpose, either before or after such ordinary school business, and under the following conditions:—

First—That no child, whose parent or guardian objects, shall be required, directly or indirectly, to be present at such reading.

Second—That in order that any children, whose parents or guardians object, may be at liberty to absent themselves, or to withdraw, at the time set apart for the reading of the books above specified, public notification of the time set apart for such reading shall be inserted in large letters in the time-table of the school—that there shall be a sufficient interval between the conclusion of such ordinary school business and the commencement of such reading; and that the teacher shall, immediately before its commencement, announce distinctly to the pupils that any child whose parent or guardian so desires may then retire.

Third—That in every such case there shall be, exclusive of the time set apart for such reading, sufficient time devoted each day to the ordinary school business, in order that those children who do not join in the reading of these books may enjoy ample means of literary instruction in the school-room.

4. When using the Scripture lessons, the teachers are prohibited, except at the times set apart for religious instruction, from putting to the children any other questions than those appended to the end of each lesson.

5. The Commissioners require that the principles of the following lesson, or of a lesson of a similar import (to be approved of by the Commissioners), shall be strictly inculcated, during the hours of united instruction, in all schools received into connexion with the Board, and that a copy of the lesson itself be hung up in each school.

Christians should endeavour, as the apostle Paul commands them, to live peaceably with all men (Rom. ch. xii. v. 18), even with those of a different religious persuasion.

Our Saviour, Christ, commanded his disciples to love one another. He taught them to love even their enemies, to bless those that cursed them, and to pray for those who persecuted them. He himself prayed for his murderers.

Many men hold erroneous doctrines, but we ought not to hate or persecute them. We ought to hold fast what we are convinced is the truth; but not to treat harshly those who are in error. Jesus Christ did not intend his religion to be forced on men by violent means. He would not allow his disciples to fight for him.

If any persons treat us unkindly, we must not do the same to them; for Christ and his apostles have taught us not to return evil

* *Note.*— The term "SCHOOL HOURS" is always to be understood to mean the entire time, in each day, from the opening of the school to the closing of the same, for the dismissal of the pupils.

† Such expression of desire may at any time be revoked by the parents or guardians, and shall thereupon become inoperative.

for evil. If we would obey Christ, we must do to others, not as they do to us, but as we would wish them to do to us.

Quarrelling with our neighbours and abusing them, is not the way to convince them that we are in the right and they in the wrong. It is more likely to convince them that we have not a Christian spirit. We ought, by behaving gently and kindly to every one, to show ourselves followers of Christ, who, when he was reviled, reviled not again (1 Pet. c. 2, v. 23).

6. The use of the tablet furnished by the Commissioners, containing the Ten Commandments, is not compulsory.

7. The rules as to religious instruction do not apply, except in the way hereinbefore stated, to the Scripture lessons, and the Book of Sacred Poetry, or to the matter contained in the common school-books, or in any other book, the use of which the Commissioners may at any time sanction for the purpose of united instruction.

§ VI.—12. The local patrons (or managers) of schools have the right of appointing the teachers, subject to the approval of the Board as to character and general qualifications; the local patrons (or managers) have also the power of removing the teachers of their own authority.

§ VIII.—1. The public generally must have free access to every National school (whether vested or non-vested) during the hours devoted to secular instruction,—not to take part in the ordinary business, or to interrupt it, but as visitors, to observe how it is conducted.

2. Visitors of all denominations are to be received courteously by all teachers of National schools, and are to have free access to the school-rooms, and full liberty to examine the Register, Daily Report Books, and Class Rolls; to observe what books are in the hands of the children, or upon the desks, what tablets are hung up on the walls, and what is the method of teaching; but they are not authorized to interrupt the business of the school, by asking questions of the children, examining classes, calling for papers or documents of any kind, except those specified, or in any other way diverting the attention of either teachers or scholars from their usual business.

5. The Commissioners require that a copy of PART I., with selections from other parts of these, their rules, on a form furnished by them, shall be suspended in every National school-room.

PART IV.

§ I.—2. No clergyman of any denomination, or member of any religious order, can be recognised as the teacher of a National school. This does not apply to the teachers of convent schools, nor to those of any monastery schools which have been at any time previously in connexion with the Board.

5. Should the Commissioners consider any teacher in a vested school unfit for his office, or otherwise objectionable, they will require that he be dismissed and another provided: in non-vested schools the grant of salary will be withheld until a suitable teacher be procured. Teachers are also liable to be fined, depressed, or suspended, at all times, when the Commissioners shall deem it necessary, on sufficient cause being shown.

Office of National Education, 186 } Secretaries.

APPENDIX No. IV.

CODE OF INSTRUCTIONS FOR DISTRICT AND SUB-INSPECTORS.

[See Question 1105, page 45—Mr. Keenan's Evidence.]

I. The year is to be divided into three terms, during each of which fourteen weeks *at least* must be given, irrespective of all other work, and of vacations, &c., to the *effective inspection of schools*, and in each week the first five days are to be so employed. The terms are to commence, respectively, on the 1st of January, 1st of May, and 1st of September.

II. From four to five hours, at least, exclusive of the time occupied in going to and returning home from the schools, are to be spent, on the average, each day in the *actual inspection* of schools; but when two schools are inspected on the same day, the time spent in passing from one to the other will be accepted as accounting for part of the above *minimum*.

III. Each Inspector will be required to visit and report on all the schools in his district once in each term.

IV. When, however, from unavoidable causes—*and such must be clearly accounted for*—the Inspector shall not be able to complete his inspection of all the schools within the term, he is, in the succeeding term, to visit those *first* which may have been so left in arrear. *Any departure from this rule will be regarded as a serious neglect of duty.*

V. The Inspector is not to visit schools during the ordinary vacations, or on any specified holidays. In connexion with this, the Inspector is required to make himself particularly acquainted, in the case of every school in his charge, with the days alluded to, and to see that they are specified in the Time Table. The *names* of the holidays need not be entered, their *dates* alone will suffice.

He is also to direct that when schools shall be closed, from any cause whatever, at times other than those specified on the Time Table, he shall have such previous notice of the same given him by the teacher as may prevent him from misemploying his time in visiting the school.

VI. Should it, however, happen that a school is unexpectedly closed at the time of the Inspector's visit, he is required to give an answer to all such queries as can be answered under the circumstances; *and he is also expected*, if another school be within a reasonable distance, to visit and report upon it in the usual way.

VII. The forms of report are henceforth to be distinguished into primary and secondary. On the first form, the primary, each school is to be reported on *once* in each year; and on the second, the two remaining reports are to be made. In the case of new schools, the *first* report on them, after becoming National, should be made on the primary form.

VIII. The reports upon one-third of the schools in each term are to be made on the primary form, and the remaining two-thirds on the secondary.

IX. When intending to report on a school on the primary form—and such should never be used except the school is found in operation—the Inspector is to give due previous notice of the time of his visit; but in other cases he is not to give such previous notice, and the practice of notifying the day of inspection throughout the entire of the middle term of the year is to be given up.

X. With the exception of the case above stated, the Inspector is to take care to visit schools as unexpectedly as possible; and with this view he should so arrange his course of inspection as not to remain, when from home, too long in the same locality, or to repeat his visits to schools in the same neighbourhood or group in too immediate succession.

XI. As many abuses may be prevented or corrected by incidental visits to schools, the Inspectors are required to make as many such as possible, and in every case, after having ascertained whether former suggestions have been attended to, and evils previously pointed out corrected, to leave an entry of such visit in the Report Book, and record it under the head, *incidental visit*, in his weekly diary, accompanied, *if necessary*, by a special letter, in case of anything of pressing importance having come under his notice.

XII. When two schools are in the same house, or immediately contiguous, the Inspector should not defer visiting the second until he have completed his examination of the first, but should pass rapidly from the one to the other, remaining in, or returning afterwards to the one he means first to examine.

XIII. When called upon to report on applicant schools the Inspector is not to give *previous* notice of the time of his inspection; but in every case, *after making such inspection*, he is to seek an interview with the manager or applicant; and in no instance is he to forward his reports upon such schools until he shall have allowed sufficient time to the local clergy

APPENDIX, No. 4.

and others concerned to reply to his communications regarding the propriety or non-propriety of the Board's entertaining the application.

XIV. In the case of applicant schools already in operation, the Inspector is to carefully examine the teacher, and chiefly by written exercises, especially in arithmetic, geography, and parsing; and these exercises together with, in every case, one in writing from dictation, he should carefully preserve for after reference.

Such schools, to be entitled to favourable consideration, the Inspector is ever to remember, should, among other things be found—

1st. Well disposed as to site.

2nd. To have premises clean and neat.

3rd. To have house well and substantially built; the walls plastered inside; the floor even, and free from damp; a suitable fire-place and funnel; the windows sufficient in number, of proper size and structure, and fitted to secure thorough ventilation.

4th. To have the furniture suitable and adequate, including desks and forms for pupils; book-press; black board, a desk with seat for teacher; rails or lesson posts for suspension of reading and other tablets, &c.; and be prepared to purchase a clock, and at least one large map, that of the world, and a supply of books, stationery, and other school requisites, for sale to pupils at reduced prices.

5th. To afford satisfactory evidence of the promise of sufficient average attendance, and that without trenching on or interfering with the attendance on other National schools in the neighbourhood already established, and in successful operation.

XV.—Teachers to be eligible for admission into the service of the Board should, if males, have *completed* their seventeenth year; and if females, their sixteenth. They should be persons of Christian sentiment, and of unexceptional moral character, and free from such physical or other defects as would in any way interfere with their usefulness.

XVI. On entering a National school with a view to its inspection, and after having introduced himself to the teacher, if a stranger, or otherwise suitably addressed him, if known—*which should be his first duty*—the Inspector ought immediately to direct himself to observe whether the fundamental regulations of the Board are complied with, as regards—

A. 1st. The use of the movable "tablet" intended to notify the species of instruction at any time being given, whether religious or secular.

2nd. The Commissioners' rules, whether a copy is suspended in school-room for the perusal of visitors.

3rd. The Time Table, whether the religious instruction, if any, given in the school, is properly specified therein, both as to its time and *general* nature, and if the practice of the school is actually conformable to such notification. By general nature of religious instruction is simply meant, whether it is catechetical, or scriptural, or both, &c., &c. If the religious instruction happens to be going on at time of Inspector's visit, he is *in no way* to interfere with, or take part in it; but merely to observe that no other business, literary or industrial, is carried on concurrently with it; and he may employ himself usefully meanwhile also, in examining the school accounts, &c.

4th. The use of books, whether they are in all cases, where intended for secular instruction, such as are authorized by the Board, and whether those for religious instruction are used by the children at the proper times only.

5th. Whether the *General Lesson*, or a lesson of *similar import*, is used and its principles inculcated at the time of combined ordinary instruction.

B. 1st. He is to observe whether the business which is going on when he enters corresponds with that assigned to that particular hour on the Time Table; and generally, with regard to this last document, which is meant to embody the law of the school, he ought to see whether the course of instruction set forth therein is judiciously arranged, and, above all, whether the arrangements which it indicates are really carried out in practice.

2nd. The Inspector should then proceed to examine the school accounts, namely, the Class Rolls, Report Book, and Register, beginning with the first, and comparing the entries of these respective records one with the other; and in any case where he has reason to suspect unfaithfulness or incorrectness, he is to adopt the most effective means in his power compatible with the delicacy due to the teacher, and his position in relation to the children, to ascertain the nature and amount of the irregularity, and afterwards record the particulars in his report, taking care, however, to distinguish mere informality, want of punctuality, omission, or neglect, from deliberate or designed falsification.

3rd. The Inspector is next to obtain the information required for the more purely statistical part of his report, as the number of pupils present in each class, or learning each subject; their ages; the supply of books and other requisites; the state of the free stock; the amount and sources of the incomes of the teachers, assistants, &c.; the state of repair of the house and school offices; the condition of the premises, &c., &c. No school can be regarded as well supplied with books and requisites except one whose pupils are provided with the books of their respective classes, and where, in addition, there is a sufficient *sale stock* on hands to meet the current wants consequent on admission of new pupils or changes of classification.

4th. When all business of this preliminary nature shall have been completed, the Inspector will then enter on the more important part of his duty, which is the examination of the school as to its educational condition.

XVII. In examining the pupils, and afterwards when recording his opinions and remarks in the Observation Book, the Inspector is to have constant reference and regard to the *School Programme* as to the branches to be taught, and the degree of proficiency to be attained in the respective classes, and in connexion with the several reading lesson books.

XVIII. In whatever order he may choose to examine the classes of the school, whether beginning with the lower and proceeding upwards to the higher, or the reverse—and either of these courses may be adopted with propriety according to circumstances and the different objects in view—the Inspector should be careful never to close his inspection without inquiring into the state and proficiency of the junior pupils.

XIX. In regard to some subjects, as grammar, geography, arithmetic, writing from dictation, geometry, mensuration, algebra, &c., the Inspector may usefully examine, collectedly, all the pupils learning such branches, beginning with the first principles and simpler elements, and proceeding upwards to the higher, setting aside the younger and less proficient pupils as he advances from stage to stage, and retaining the more forward for further examination.

XX. In forming a final judgment on the state of a school, the Inspector, at each inspection, should, besides other points which may occur to him, have principally regard to—

1st. The material state and general keeping of the entire establishment.

2nd. The *moral* character of the school.

3rd. The course of instruction given in it and the methods and processes of teaching employed.

4th. Whether the pupils are suitably classed according to their ages and capacities, and are taught such things, and have attained such proficiency, as in their circumstances they ought to be taught and to have attained.

5th. Whether the teachers are competent, efficient, and influential; faithful in the observance of all suggestions left for their guidance, prompt in the correction of abuses, and eager for improvement; duly impressed with the importance of their office, and earnest and content in the discharge of its duties.

6th. Whether the whole air and aspect of the school, and the tone and spirit pervading it be satisfactory or the reverse; and whether the bearing, language, and manners of the teacher, his command over his pupils,

and their deportment towards him, be such as ought to be observed.

7th. Whether admission to the combined general instruction given in the school, and upon which *alone*, consistently with the rules of the Board, attendance may be *required*, is open to all children whatever, without any conditions as to their attendance on the religious instruction given in it; in other words, whether the combined general instruction is so open to all, that access to it is in no way made dependent on the observance of any rule whatsoever not obviously and legitimately providing for the proper carrying out of such combined general instruction and the ordinary discipline of the school.

XXI. In addition to the Time Table, which is intended merely to indicate the general arrangements of the school, and the great divisions of its teaching, the Inspector should see that the teachers are provided with a programme of study for each class, drawn up by themselves, and indicating the exercises for each week and day; and he should further see that the time given in such programme to each subject or branch of instruction, is sufficient and proportioned to its relative importance, and that the teacher in all the exercises specified for each class, conforms to the rules set down by him in his programme.

XXII. It should be the duty also of the teachers to prepare beforehand *notes or heads of lessons* on the lessons or subjects to be taught by them each day; and where this practice is not observed, the Inspector should recommend its introduction, and if necessary, furnish the teachers with instructions how to carry it out.

XXIII. In the case of infant schools, the Inspector should see that the instruction is given with the necessary prudence and sobriety of mind, being suitably proportioned to the tender faculties of infancy, and accompanied at proper intervals with physical exercises and song; and, generally speaking, that the course is limited to the first and most simple elements of reading and writing, to the knowledge of forms and colours, with easy exercises on the arithmeticon, and some notions, but of an entirely obvious and popular kind, of geography and natural history, and the more common trades and arts of life. The teachers of such schools should be directed by the Inspector to look carefully after the kind of food the children may bring with them for their refreshment, to provide them with pure drinking water, and look particularly to the cleanliness of their clothes and persons.

XXIV. Inspectors are expected to keep themselves at all times fully provided with the gratuitous requisites or official forms for schools, as Class Rolls, Time Tables, General Lessons, &c., and to supply them readily and at once wherever they may see them wanted.

XXV. In every instance where, in the case of an ordinary National school, the Inspector observes any violation of rule, or existing defect, he is to suggest to the manager or teacher the necessity of its correction, and state in his report that he has done so, explaining further in what manner and with what spirit his suggestions have been received.

XXVI. Whatever observations or suggestions the Inspector may think it his duty to make in the Observation Book he should read over at the close of his inspection to the teacher, and so explain as to make them fully understood.

XXVII. On entering a district, and during the course of his first tour of inspection, the Inspector is to seek to make himself acquainted with the managers or correspondents, and on all subsequent occasions to call upon them regarding any matters of importance that may come under his notice in their schools.

When managers are not at home, the Inspector should leave his *card* to intimate the fact of his visit.

XXVIII. In cases where a dismissed teacher still holds possession of a school, the Inspector is not to examine the children or enter into the minute details of a full inspection, but merely to report upon its general state, the condition of the free stock and other public property in possession.

XXIX. When inquiring into the state of the supply of books, &c., the Inspector should be careful in examining the lists of stock obtained at reduced prices, to see that no abuses are committed by local parties obtaining unduly requisites intended for the school and its pupils only.

XXX. The Inspector is not to make any entry in the Report Book, except the date of his visit, the time occupied by him in inspection, stating the hour at which it commenced and that at which it closed, with the number of pupils present. Should there appear any observations in the Report Book worthy of notice, by whomsoever made, he is to transcribe them into his Note Book and forward them in his report to the office.

XXXI. The Inspector is not to omit visiting any school on his district book in consequence of hearing reports that it has been closed, or withdrawn from its connexion with the Board, but must *go to* the place and make inquiry into the circumstances, that he may afterwards report them correctly for the information of the Commissioners.

XXXII. He is to bear in mind that he is not an administrator or authoritative director of the National system of education, but simply and essentially an Inspector of its schools; and that as such, his chief duty in reference thereto is to place before the Commissioners in clear, faithful, and comprehensive reports, the means by which *they* may interfere usefully and efficiently for the improvement of the schools placed in connexion with them. He is not, therefore, to give direct *orders* as on the part of the Board, respecting any necessary regulations, much less is he to alter on his own authority any regulations already in existence, but make such suggestions to the patrons and teachers as he may think proper for the correction of observed abuses, the supply of existing wants, or for the improvement of the organization and management of the schools.

XXXIII. When the Inspector visits with a view to his primary report, he should himself examine *all* the classes in the several subjects taught them, in order to make an accurate and a full return of their several stages of proficiency; but on the remaining visits, it is desirable, to enable him to judge fully of the teacher's merits as a schoolkeeper and instructor of youth, that he should forego the personal examination of *all* the classes, but rather instead, call upon the teacher himself to examine the pupils of some classes, and in a few subjects, and put the school through its usual routine order of business in his presence.

XXXIV. In all his intercourse with the teachers, the Inspector is to treat them with the most perfect kindness and respect, counselling them privately on whatever he may see defective or faulty, but by no means addressing them authoritatively, or animadverting on their conduct in the hearing of their pupils; to whom also, in their turn he is to exhibit a considerate and affectionate manner, and who are always to be addressed by him in language of the truest courtesy and propriety. He should surely take care to preserve himself from such peevishness, harshness, or abruptness, in his communications with the children, as if observed by him in the teacher it would be his duty not only to notice, but as a serious fault to deprecate and correct.

XXXV. The Inspector, without seeming officiousness, unbecoming intermeddling, or too much curiousness, should as far as possible inform himself of the *general* character borne by the teachers in his district, the estimation in which they are held by the people of their locality, their social position, and their conduct as members of society.

XXXVI. The Inspector is to receive a quarterly report from the teacher of each National school in his district, and is also himself to make one annually to the Commissioners. Forms for both these reports can be had by applying to the office, and from their perusal the nature of their returns and information required, will be at once seen.

XXXVII. The Inspector will be required, at the close of each term, to forward to the office, on the required printed form, a return of the public duty of all kinds performed by him within the term.

APPENDIX, No. 4.

XXXVIII. A book, known as the District Book, and which is substituted for the old "Road Book," is to be kept by the Inspector, who is required to record therein from time to time as he proceeds with his inspection, all matters of importance regarding each school in his charge.

XXXIX. The Inspector is likewise to keep a "Note Book" of the form supplied by the Board, and in which he is to enter at each separate visit to a school all the details of his inspection; and this he is to do in so full a manner that such notings may be afterwards taken as a faithful record of the report subsequently forwarded by him to the office.

XL. A "Guard Book," is also required to be kept by the Inspector for the preservation of all official letters, Boards' orders, and other communications relating to his public duties.

XLI. As it is the desire of the Commissioners that the Head Inspectors in their tours of inspection through the circuits of districts placed in their charge, should examine the documents referred to in paragraphs XXXVII., XXXVIII., XXXIX., and XL., and if necessary report to the Board upon the manner in which they are kept, it will be the duty of the District Inspectors to have them always in readiness for examination, and in a state fully reflecting the work done by them each week up to the time they may be called for.

XLII. The Commissioners require that, except in the case of sickness or some other unavoidable calamity the Inspector shall have forwarded to the office, so as to reach it not later than each successive Monday morning, his diary for the previous week, together with the reports on the National schools visited by him during the same period. He is also expected to observe the same punctuality in his general correspondence with the office, excepting only those cases where the interests of the public service may demand some further delay.

XLIII. When Inspectors remain away on duty from their allotted centres for more than one or two days, they should leave instruction behind to have their official letters duly forwarded to them. An Inspector is not to leave his district, except when called upon to do so on business of the Board, or without having previously obtained permission from the office.

XLIV. 1st. The Commissioners direct that Inspectors shall on no account summon teachers already classed for further promotion, whose schools are not *in every respect satisfactory*, but more particularly as regards the nature and amount of the instruction imparted in them and the proficiency of their pupils, their average attendance, and their general character for the observance of neatness and cleanliness, and for order in all the arrangements of their schools, and who are not themselves, moreover, distinguished by the thoughtfulness, earnestness, and zeal with which they devote themselves to their duty.

2nd. Teachers whom the Inspector intends to recommend for the training class in Dublin should have notice given them, at least six months previously, of such his intention, in order that they may have full opportunity to prepare themselves for passing the entrance examination in a manner at once creditable to themselves and satisfactory to the professors. The course required for entrance is that prescribed in the official programme for third class teachers, with the addition, in the case of male teachers, of the elements of geometry; and on this course it is expected the Inspector shall carefully examine each of the teachers whom he may purpose to recommend before making the usual return to the office; for he is to remember, that should any of those whose names he may send in be found, on examination by the professors, inadequately prepared on the above entrance or preparatory course, they will be refused admittance into the training class, and be obliged to return to their schools.

3rd. None are to be selected who have been previously trained, or who are labouring under any physical defect, or who are not in the full enjoyment of sound health, or incapable of walking with ease to and from Glasnevin. Those under thirty years of age should have the preference.

XLV. The Inspector is expected to make inquiries respecting the general state of education in the neighbourhoods he visits, the disposition of the people to receive instruction, and the merits or defects of that given in such schools within their reach as may not be in connexion with the Board.

XLVI. 1st. Each Inspector is required to make himself thoroughly acquainted with the fundamental principles of the National System of Education, the rules of the Board, and the general history and progress of its administration from its origin to the present time.

2nd. It is also expected of him that he should not only study to strengthen and enlarge his knowledge of the different branches of literature, philosophy, and science connected with or bearing on the duties of his office, but that he should likewise make himself familiar with the state of popular education at home and in other countries, and also seek to acquire, and, as opportunity offers, keep up and improve, acquaintance with the opinions and writings of the eminent educationists of the time.

XLVII. The Commissioners make no rule against the Inspectors walking to the schools, but they think it more becoming and more economical of the public time that they should drive to and from the schools (except for very short distances), and with this view they *require* that each Inspector shall provide, and keep himself provided, with a horse.

XLVIII. The Inspector is to avoid all polemical discussions of a religious or political nature; and, in his public capacity, at the same time that he is to discharge his duty impartially and conscientiously, and irrespective of all local interests or party influences of whatever kind, he is to exhibit a courteous and conciliatory demeanour towards all persons with whom he is called upon to communicate, and in his intercourse with the schools to pursue such a line of conduct as will tend to uphold the just authority of both managers and teachers; while in his private life, and in all social relations as a member of the community in which he moves, he is required to support in a modest but becoming manner, the bearing, character, and standing of a gentleman, and scrupulously to avoid everything calculated in any degree to lessen the respectability of his position, or detract from the influence of his office.

XLIX. 1st. In all his correspondence with the office, whether employed in drawing up his ordinary reports, or making out returns of whatever kind, even those seemingly of the most routine and common-place sort, the Inspector is to study to express himself with clearness, propriety, and precision, and to habituate himself to a style of penmanship at once neat, well-defined, and entirely legible.

2nd. Except in the case of schools not found in operation, *every* question in the report sheet, whether on applicant or National schools, should, as a general rule, have set down opposite to it, with whatever brevity expressed, a distinct, categorical reply, and all slovenly and inelegant abbreviations, bracketings, and dashes, should be carefully avoided. For, by leaving a question without an answer not *clearly* implied in a previous one, the examiner of the report may be often in doubt as to the fact referred to in the question, or whether the omission of a reply is owing to a simple oversight on the part of the reporter or to his supposing the answer inferable from a previous one, and that when perhaps it is not, or at least not clearly so.

3rd. Inspectors are expected to treat as confidential the letters addressed to them from the office, particularly those relating to cases of special inquiry, to the conduct of managers and patrons, or to the admonition or depression of teachers; nor are they, in any case, to give publicity to the contents of such communications, any further than their nature and purport obviously demand.

L. The Inspectors are further required to comply with the following directions, in their correspondence with the office :—

1st. All communications for which printed forms are not supplied are to be made on paper of foolscap size.

2nd. Should the communication relate to a school, the name of such school, with that of the county in which it is situated, to be stated at the head of the letter, as also the name and address of the manager, and the name of the teacher.

3rd. If the communication does not relate to any particular school, the subject of it, whatever it may be, should be set forth briefly, if practicable, at the head of the letter.

4th. Different subjects are not to be entered upon in the same communication, but each is to have a separate letter.

5th. The rank (whether "Sub" or "District Inspector") is to be added after the writer's signature, and also the number of the district of which he is in charge, or to which he may be attached.

6th. The word "INSPECTION" to be written, in large letters, in the left hand corner at bottom of the outside cover of all communications to the office.

7th. All communications, not too bulky for such mode of conveyance, to be transmitted through the regular channel of the Post Office, and properly enclosed in suitable envelopes.

8th. All communications to be addressed to the Secretaries.

9th. Inspectors are, as much as possible, except in the regular way of reporting, to avoid making themselves the channel of communication between managers of schools or others and the public.

10th. Whatever applications for aid or notices of changes of managers or teachers are addressed to Inspectors, they are to acquaint the writers that such communications must be addressed to the "Secretaries."

INSTRUCTIONS TO INSPECTORS IN CHARGE OF DISTRICT MODEL SCHOOLS.

LI. Where a district model school is placed in charge of an Inspector, he is expected, besides his stated and ordinary visits to pay as many occasional or incidental calls as in his power, and such at all times of the day, as well during the ordinary school hours, as both before and after, in order that he may see not only that the principal teachers and their several assistants are observant of the rules of the institution as regards the employment of their time and the prosecution of their studies, but how also the domestic arrangements are carried out.

LII. Instead of a weekly inspection of these institutions, as at present, three inspections in the term—each, however, to be separately reported on the form prescribed—will in future suffice; but, these inspections, it is to be distinctly understood, are to be of a serious and searching character; and with the view of making them truly such, the Inspector, instead of examining in detail all departments at each of those visits, should take them in succession, without, however, at any visit, neglecting to inquire into, and report on the attendance and classification of pupils in the others, and the *general* state of the whole establishment.

The teachers will still be required to furnish weekly returns of the attendance, &c., of the pupils, and these the Inspector, who will attend each Saturday at the model school to receive them, after having checked and countersigned, will forward to the office.

LIII. In recommending the appointment of pupil-teachers and monitors, *who in every case should, before their selection*, have been carefully examined by the Head or District Inspector, or by both, the Christian and surname, age, and religious denomination of each candidate, and also of the party causing the vacancy, are to be stated in full. The recommendation to be made on the printed form provided for the purpose, and signed by the Head and District Inspectors. A return showing the denomination, &c., of the pupil-teachers or monitors already in the school, is to accompany each recommendation.

LIV. The periods for appointments are to be so regulated, as that there shall always be in the school a sufficient number well acquainted with its discipline and the nature of the duties to be discharged.

LV. All appointments are to date from the first of the month; to secure the strict observance of this rule, the Inspectors should be careful to forward their recommendations a sufficient time beforehand to allow of the Board's sanction being duly obtained, and in no case are they to admit the persons recommended by them into these institutions without having first obtained the authority of the Board.

An allowance, temporarily sanctioned, at the rate of £20 per annum, is made to the head master for the board and washing of each pupil-teacher, and for the assistant master when boarded by the Commissioners.

Where there is an agricultural department in connexion with the district model schools, the Commissioners make a similar allowance to the head master for each free agricultural boarding pupil, and for the agriculturist when boarded by the Commissioners. Paying agricultural pupils are required to pay the head master, quarterly, and in advance, at the rate of £8 per annum towards their board and washing, the Commissioners likewise paying at the rate of £12.

A monthly return is to be made out by the head master of the number of days each pupil-teacher and agricultural pupil has been boarded in the school; the return is to be signed by the master and Inspector, and forwarded within one week after the end of the month.

The Inspector is not to permit the name of any pupil-teacher, or agricultural pupil, to be included in the return, the approval of whose appointment by the Commissioners has not been notified to him from this office.

LVI. The parties selected for the office of pupil-teacher should, in no case, be under sixteen, nor above twenty years of age, and each should be provided with the following outfit:—

2 Suits of Clothes.	6 Pocket-handkerchiefs.
2 Night Shirts.	2 Pair of Shoes.
6 Day Shirts.	1 Pair of Slippers.
6 Pair of Socks or Stockings.	Haircomb, Hairbrush, and Toothbrush.
4 Neckties.	

LVII. Candidates for the office of paid monitor in model schools should not be under fourteen, nor over sixteen years of age.

LVIII. Both pupil-teachers and paid monitors should be of a sound and healthy constitution, and free from any physical defect likely to impair their efficiency as teachers.

LIX. Candidates for the office of paid monitor are to be examined, before appointment, on the course prescribed for the monitors of the ordinary National school.

LX. Candidates for the office of pupil-teacher should be required—

1. To read with ease and expression, and to have some knowledge of the principles of elocution, as explained in the first part of the Introduction to the Art of Reading.

2. To write out with correct spelling and punctuation, the substance of a short lesson selected from any of our lesson books, and read slowly to them twice over.

3. To write a good current hand, and be competent to superintend the writing of the junior classes.

4. To parse and analyze any passage selected from the National lesson books.

5. To know the general geography of the great divisions of the globe, and be familiar with the principles of mathematical and physical geography.

6. To exhibit readiness in mental calculation; to solve questions in compound proportion, fractions, and commercial arithmetic, and be familiar with the principles involved in the rules and processes employed by them. The girls will not be examined beyond interest.

7. To be acquainted with the prefixes and affixes of our own language, and the principal Greek and Latin roots.

8. To be able to examine, with a fair degree of effi-

APPENDIX, No. 4.

ciency, on any reading lesson selected, children of the third class, and competent to teach the rudiments of arithmetic to the junior pupils.

9. To know the first four sets contained in the Board's Treatise on Book-keeping.

10. To know the First and Second Books of Geometry with the exercises thereon, as given in Thompson's edition of Euclid.

11. To be acquainted with the elementary rules of Algebra, and able to solve questions in simple equations.

12. To know the rules for the measurement of plane surfaces and the principles on which these rules depend.

13. The girls to be able to teach plain needlework, and to exhibit a fair degree of skill in the finer kinds of knitting and netting.

14. To be prepared for examination on the subjects treated of in—

Spelling Book Superseded;
Geography Generalized, first eight chapters;
Lessons on Money Matters;
*Lessons on Reasoning, 1st part;
National Lesson Books to the 4th inclusive;
Fifth Lesson Book, 3rd, *4th, and *5th inclusive;
*Agricultural Class Book.
The girls are not to be examined on the subjects marked with an asterisk (*).

LXI. At the end of the first half-year of their course of training, the pupil-teachers should be again examined on all prescribed for candidates at entrance; and at the end of the second half-year, or completion of their first year of training, on the following in addition, viz.:

Descriptive Geography, as contained in the Introduction to Geography;
The remaining chapters in the Geography Generalized on Mathematical and Physical Geography, together with those on the Method of Teaching.
Lessons on Reasoning, 2nd Part;
The Second Section of the Fifth Book of Lessons;
The Third and Fourth Books of Euclid with the exercises thereon, as given in Thompson;
The Fourth and Sixth Sections of the Treatise on Mensuration;
Involution and Evolution;
Sullivan's Grammar;
Dawes' Hints to Teachers;
The Introductions contained in the Book of Poetry.

At the end of the second half-year they should also be expected to have acquired a pleasing and tasteful elocution, and become thorough masters of a good style of penmanship.

LXII. The Inspector should examine both monitors and pupil-teachers as frequently as due attention to his other duties will permit, and in every case record and preserve full and accurate notes of the results of his examination.

LXIII. The quarterly account of school fees is to terminate with the last Saturday of the months of March, June, September, and December, respectively.

LXIV. The Commissioners' portion of the school fees is to be paid over to the Inspector by the teachers weekly, and remitted to this office at the end of each quarter, without any deduction whatever, and by a letter of credit in favour of the Secretaries if possible —otherwise by a post office order; and the charge for remitting in either case is to be included in the account of expenses.

LXV. The account of the fees received in the quarter is to accompany the remittance, signed by the master and mistresses, and certified by the Inspector.

LXVI. The Inspector will be furnished with a sum sufficient to meet the ordinary petty expenses for three months of the district model school under his superintendence.

LXVII. The Inspector is to transmit to the office the account, in duplicate, including all such expenses, certified by himself, within one week after the expiration of each quarter. The quarters to terminate with the last day of the months of March, June, September, and December, respectively. When the account has been examined in the office, a remittance will be made to the Inspector for the exact amount, thus leaving the original advance as a permanent imprest against him.

LXVIII. The account is in all cases to be signed by the Inspector and by the master of the school, and by the mistresses of the female and infant schools, when expenditure is included relating to their respective departments.

LXIX. Expenditure amounting to the sum of £2 or upwards is not to be incurred, without special authority previously obtained from the office, except for ordinary school expenses.

LXX. Rates and taxes not being chargeable upon public institutions used solely for educational purposes, the Inspector is to require that the description of the premises upon which a tax is levied be particularized in the notice left by the collector, as well as the date when the rate was made, the valuation, and rate per pound. The notice, when examined with the Applotment Book, or, should it not be available, the Collector's Rate Book, and found to be correctly charged upon the holding of the Commissioners, is to be certified accordingly, and forwarded with the receipt in support of the charge in the quarterly account.*

LXXI. When a charge is made for printing "school notices" or "circulars," &c., relating to the district model school, a copy of the notice or circular is to be attached to the printer's receipt and forwarded in support of the charge in the account.

LXXII. The sums paid weekly for "washing schools" should appear in the account as a monthly total, as also other charges of a very small amount, so as to avoid unnecessary petty detail.

LXXIII. Vouchers written and receipted in *ink* are to be forwarded in support of every item of expenditure, properly signed, and numbered consecutively to correspond with the entry of the sums in the account.

LXXIV. Payments of £2 and upwards are to be supported by a stamped receipt, which is to be paid for by the party receiving payment.

LXXV. In cases where the party paid is unable to sign his name to the receipt, his mark must be witnessed by a third person, whose signature is to appear upon the voucher.

LXXVI. Receipt forms to serve as vouchers for small payments may be obtained from the office on application, but these forms are not to be used in cases where various articles are purchased, for which "shop bills" in detail, properly receipted, are to be procured.

LXXVII. The following is the scale of salaries sanctioned for monitors in district model schools:—

Males.		Females.	
1st Year, . .	£6	1st Year, . .	£6
2nd ,, . .	8	2nd ,, . .	8
3rd ,, . .	10	3rd ,, . .	10
4th ,, . .	12	4th ,, . .	12

LXXVIII. The Inspector is to transmit to the office within one week after the end of each month a return of the monitors employed in the male, female, and infant schools. When male and female monitors are recognised, one return is to be used for both, which is to be signed by the master and mistresses, and by the Inspector.

LXXIX. The return is not to include the name of any monitor the approval of whose appointment by the Commissioners has not been notified to the Inspector from the office.

LXXX. Should a monitor be unavoidably absent through illness, a substitute may be appointed at a salary of a monitor of the first year, but the Inspector is not to continue to return the name of such substitute-monitor for payment for a longer period than two months without the previous sanction of the Commissioners.

* When residence is granted to a teacher in addition to his salary, that portion of the district model school occupied by the teacher is chargeable with rates. Dormitories and rooms for pupil-teachers and agricultural pupils are not rateable. School premises are liable for one-half poors' rate, which is recoverable from the landlord.

LXXXI. The terms of service for—

Pupil-Teachers and Free Agricultural Pupils,	1 year.
Paying Agricultural Pupils,	2 year.
Male and Female Monitors,	4 „

The Inspector is not to allow the name of any party to be included in a return beyond the prescribed term, without having first obtained the sanction of the Commissioners.

LXXXII. Assistant masters, assistant mistresses, pupil-teachers, and agricultural pupils, in district model schools, are granted an allowance for travelling on first joining the school, and for going to and returning from their homes at the midsummer vacation. Pupil-teachers and agricultural pupils are also granted travelling allowance on leaving the school at the expiration of their term.

No allowance is granted for any distance less than ten miles.

The Inspector is to forward to the office the account of such expenses, receipted by the teachers and pupils, and certified by himself.

LXXXIII. The Inspector is to transmit to the office upon the 30th June, and 31st December, in each year, a return setting forth the additions made to the furniture, &c., during the preceeding six months, made out on the form supplied for the purpose. The return is to be a copy of the register of the additions in the inventory kept at the school, which are to be carefully noted as they occur. Should no changes have occurred, a *Nil* return is to be forwarded, signed by the Inspector. Appendix, No. 4.

LXXXIV. As the imprest in the hands of the Inspector is only intended for petty expenses, a requisition is to be forwarded with each quarterly account, stating in detail the articles (hardware, furniture, house-linen, &c.) required; particularizing those required to replace what have been worn out from what have not previously been in the school.

LXXXV. The following forms will be supplied to Inspectors, on application being made to the office. All accounts and returns, &c., to be furnished upon the office forms:—

Forms for Quarterly Accounts, originals and duplicates.
„ Monthly Boarding Accounts.
„ „ Accounts—Monitors' Salaries.
„ Allowances for Travelling
„ Recommending Appointments.
„ Requisitions.
„ Inventory of Furniture.
„ Vouchers.

Appendix No. V.

Appendix, No. 5.

Memorandum as to Inconveniences arising out of the Use of Different Editions of the Same Book in the Same Class.

[See question 1485, p. 63—Mr. Keenan's Evidence.]

Immediate.

Education Office, 20th March, 1868.

Sir,—You are requested to report with the least possible delay, the number of cases in which you found pupils of the same draft using different editions of the lesson-book of their class.

In each case you are to state the number of pupils in the draft, the dates and numbers of the several editions in use by the pupils, the extent of the inconvenience of the arrangement to pupils and teachers, and the cause of such arrangement.

We are, Sir, your obedient servants,

(Signed.) James Kelly, William H. Newell, } Secretaries.

Abstract of Replies to Lesson-Book Circular.

Inspector.	Inspection District.	Number of cases where Pupils of the same draft used different Editions.	Extent of inconvenience caused thereby.
1. J. Barrett,	Letterkenny,	Not noted,	Not great.
2. C. W. Dugan,	Londonderry,	Noted for 21 schools; 253 cases,	Serious.
3. W. Bole,	Coleraine,	Not noted,	Ditto.
4. D. M. Wilson,	Ballymena,	Ditto,	Very great.
5. J. Kealy,	Donegal,	Ditto,	Not great.
6. R. Nesbitt,	Strabane,	Ditto,	Ditto.
7. R. Irwine,	Maghera,	Ditto,	Ditto.
8. T. M'Ilroy,	Belfast, North,	Not up,	—
9. J. Molloy,	Belfast, South,	Not noted,	Not serious.
10. J. Macdonnell,	Newtownards,	Ditto,	Trifling.
11. D. J. Roantree, Acting Inspector,	Lurgan,	Not up,	—
12. R. Robinson,	Sligo,	Not noted,	Very slight.
13. W. Healy,	Enniskillen,	Ditto,	Considerable.
14. S. Adair,	Omagh,	Ditto,	Not great.
15. J. Morell,	Dungannon,	Ditto,	—
16. A. T. Osborne,	Armagh,	Ditto,	Not great.
17. W. Kennedy,	Downpatrick,	Ditto,	Ditto.
18. F. Eardly,	Monaghan,	Noted for 71 schools; 2,051 cases,	Ditto.
19. D. C. Porter,	Newry,	Not noted,	Serious.
20. J. E. Wood,	Ballina,	Ditto,	Considerable.
21. W. A. Donovan,	Swineford,	Ditto,	Not great.
22. J. W. Rodgers,	Boyle,	Ditto,	Ditto.
23. H. M. Rodgers,	Cavan,	Ditto,	Serious.
24. A. J. Simpson,	Bailieboro',	Ditto,	Not great.
25. E. MacCreanor,	Drogheda,	Ditto,	Ditto.
26. W. Nicholls,	Westport,	Ditto,	Ditto.
27. J. M'Sweeny,	Roscommon,	Ditto,	Very little.
28. J. Bradford,	Longford,	Ditto,	Great.
29. E. A. Conwell,	Trim,	Ditto,	Ditto.
30. E. Sheehy,	Dublin, North,	Ditto,	Not great.
31. M. Molony,	Ballinamore,	Ditto,	Ditto.
32. A. Cowley,	Tuam,	Ditto,	Ditto.
33. H. L. D'Arcy,	Mullingar,	Ditto,	

APPENDIX, No. 5.

ABSTRACT of REPLIES to LESSON-BOOK CIRCULAR—*continued.*

Inspector.	Inspection District.	Number of cases where Pupils of the same draft used different Editions.	Extent of inconvenience caused thereby.
34. J. Gordon,	Galway,	Not noted,	Not great.
35. G. T. O'Neill,	Ballinasloe,	Ditto,	Ditto.
36. S. Brown,	Parsonstown,	Ditto,	Serious.
37. G. R. O'Galligan,	Naas,	Noted for 11 schools,	Considerable.
38. F. F. O'Carroll,	Dublin, South,	Not noted,	Not great.
39. M. Coyle,	Carlow,	Ditto,	Very great.
40. B. MacSheehy,	Wicklow,	Ditto,	Considerable.
41. C. Graham,	Portarlington,	Ditto,	Not great.
42. W. Stapleton,	Gort,	Ditto,	Very great.
43. M. Lawler,	Thurles,	Ditto,	No inconvenience.
44. W. Molloy,	Athy,	Ditto,	Not great.
45. D. O'Driscoll,	Ennis,	Ditto,	Ditto.
46. J. Browne,	Tipperary,	Ditto,	Ditto.
47. L. Harkin,	Kilkenny,	Ditto,	Very little.
48. C. Mahony,	Youghal,	Ditto,	A positive advantage.
49. Vacant,	—	—	—
50. J. G. Fitzgerald,	Enniscorthy,	Not noted,	Not great.
51. R. Potterton,	Limerick,	Ditto,	Ditto.
52. J. Hanlon,	Newcastle, West,	Ditto,	Serious.
53. J. O'Hara,	Clonmel,	Ditto,	Considerable.
54. J. C. Lane,	Tralee,	Ditto,	Not much.
55. T. K. Strong,	Macroom,	Ditto,	Ditto.
56. C. W. Bateman,	Mallow,	Ditto,	Ditto.
57. T. Macnamara,	Killarney,	Ditto,	Considerable.
58. M. Seymour,	Bantry,	Noted for 10 schools—116 cases,	Not great.
59. P. Connellan,	Dunmanway,	Not noted,	Ditto.
60. J. Gillic,	Cork,	Ditto,	Ditto.

Of the fifty-six replies received, only *three* show that any notes were taken by the Inspectors; but the cases observed have in all districts been *numerous.*

NOTE.

In the letters received from the District Inspectors, the chief evils resulting from the use of various editions are given thus—

1. No regular system of home lessons can be carried out.
2. There is difficulty in conducting collective class lessons.
3. The examination of the children in classes, on the lesson-books, is impeded.
4. The preparation of teachers for their examination is made more troublesome.
5. The lessons which are not common to all the editions will frequently be omitted altogether.
6. Verbal alterations (often very needless) in the same lesson prevent the teacher observing whether reading is accurate.
7. Apprehensions of further alterations in last edition often prevents purchases.

The difficulties according to most of the Inspectors appear to be rapidly passing away.

Mr. Graham, District 41, says, "The teachers cheerfully submit to the inconvenience."

Mr. Mahoney, District 48, considers that it is an advantage to have different editions of the same book in use in the same school.

APPENDIX, No. 6.

APPENDIX No. VI.

CIRCULAR LETTER explanatory of the NATURE of SCHOOL ORGANIZATION, and the DUTIES of the ORGANIZERS and INSPECTORS in relation to it.

[See question 1647, page 72—Mr. KEENAN's evidence.]

1. The objects which the Commissioners of National Education have had in view, in establishing the staff of organizers, are two-fold, viz. :—

A. To bring National schools into a state of efficiency.

B. To diffuse amongst the teachers of the country a knowledge of schoolmastership in all its practical bearings, and also of the leading principles of the science of education.

2. To carry out the first great object (1. A) the organizers will devote themselves, during their stay in a school, to the following, as the main part of their duties :

3. To secure a regular and proper ventilation of the school-room.

4. To improve the lighting of the school-room, if necessary.

5. To make suitable arrangements as to the playground and out-offices.

6. To make every available use of the walls ; to provide tablet rails, &c.

7. To arrange maps, charts, and tablets, and show how they can be most profitably used.

8. To provide black boards, easels, pointers, arithmeticons, &c., and instruct the teachers as to their use.

9. To see that a sufficient number of desks is provided ; that they are properly arranged and fixed on the floor ; that provision is made for holding the slates ; and that the business legitimate to the desks is regularly carried on.

10. To secure sufficient space for the drafts ; to denote them by suitable marks on the floor ; and to arrange the business proper to the drafts.

11. To classify the pupils, and divide them into convenient divisions and drafts.

12. To make out a time-table suitable to the circumstances of the school, and to test its judiciousness, by experiment, for a number of days before recommending its adoption to the manager.

13. To see that the pupils, as well as the teacher, understand the arrangements indicated in the time-table.

14. To establish a sound system of monitorial instruction ; to see that the members of the monitor class are judiciously selected ; that they are sufficiently mature and intelligent for their duties ; *that their employment as monitors does not interfere with their business as pupils ;* that they be required to teach those subjects only which they are competent to teach ; that they receive special instruction from the teachers in lieu of the time spent by them in teaching ; that the business arranged for their special instruction is regularly conducted ; that they are instructed in the art of teaching ; that they are taught to prepare notes of the lessons which they may be called upon to teach ; that they know their duties prospectively ; that they teach the same set of children from day to day for an assigned

time; that their teaching is effective; that the pupils have sufficient respect for them, and confidence in their abilities; that such arrangements are made as to satisfy the parents of pupils and monitors with the monitorial system, and that the teacher is duly prepared to control and prepare the monitors for their duties.

15. Whilst monitorial instruction, *judiciously* and *moderately* employed, is encouraged, the organizers are to see that all the *essentials* of the education of a child are looked after and cared for by the teacher himself, and that the latter is to be almost constantly employed in the actual teaching of class after class, at the same time that he exercises an active superintendence over all the simultaneous operations of his school.

16. To establish a system of home lessons; to make arrangements for their regular announcement day after day; to see that they are properly heard; that the answering of the pupils is in some form noted; and that the general order of such lessons be kept in correspondence with the ordinary teaching pursued in the school.

17. To arrange for the regular recapitulation or repetition of the home and other lessons.

18. To make arrangements that the parents may be occasionally informed as to the attention of the children to the home lessons and general business of the school.

19. To exemplify before the teacher the different methods of teaching, and to cause him in turn to practise the same.

20. To see that he prepares "notes of lessons" in proper form, on the different subjects taught in the school, and that he teaches the various lessons in conformity with the notes so prepared.

21. To effect as much improvement as possible in the teaching of reading, writing, arithmetic, dictation, geography, drawing, &c., *and particularly in the teaching of the First Book.*

22. To see that the teacher gives clear evidence that he prepares himself beforehand *for the work of each day*, not only in the notes of the lessons which he is to teach, but also in the general business, including the simplest mechanical details of his school.

23. To drill the children, put them through the simple marching exercises, establish order and discipline, and train the teacher to continue the same course of drill and discipline so established.

24. To see that the business of the school is conducted with the least noise possible.

25. To establish a system of punishment for badly conducted children, and to introduce a system of emulation or reward, to promote good conduct.

26. To improve the manners of the children, and to see that there is a daily inspection as to cleanliness, &c.

27. To see that the children are provided with the necessary books for home study, and that a sufficient sale stock, and an ample supply of school materials and requisites are furnished.

28. To arrange as to the calling of the rolls with all possible despatch; to provide a report slate; to correct and show the teacher how to keep the school accounts, and to cause scroll or rolls to be kept.

29. To adopt measures towards improving the attendance of the children, particularly with reference to punctuality in the morning.

30. Finally, the organizer is to lead the teacher into a strict observance of the rules of the Board, but especially the practical rules for teachers.

31. The Commissioners of National Education have decided that no National school can be organized until the manager express his desire to avail himself of the services of an organizer; and even after so expressing himself, and permitting the organizer to commence operations in his school, it is to be distinctly understood that he is not bound to carry out the plans or to effect the alterations suggested by the organizer.

32. The Inspectors should therefore select those schools only for organization the managers of which are likely to exhibit a kind and co-operative spirit to the organizers.

33. Before a school can be organized, the manager must provide a sufficient sale-stock for the use of the children attending it. As already announced to the Inspectors, the Commissioners, on the recommendation of the Head or District Inspector or the organizer, will make a small grant of charts, black-boards, easels, pointers, &c., proportioned according to the wants and attendance of the school, not exceeding, however, except in special cases, the value of £5.

34. When an organizer enters a school he is carefully to observe the methods of teaching pursued by teachers and monitors, the order, discipline, arrangements, and general organization of the school; and he is afterwards to report, on a form prepared for the purpose, the exact state in which he finds the school in all these respects. This report is called the *Preliminary Report*, somewhat altered from the preliminary report accompanying this.

35. When an organizer has completed the organization of a school, he is to make a report of the order, discipline, system, &c., established by him; to detail the exact state in which he leaves the school; and to record the general results of the organization. This report is called the *Final Report*, somewhat altered from the final report accompanying this.

36. The organizer is then to forward the two reports just referred to to the Inspector of the district in which the school is situated.

37. After a period of not less than three weeks, and not more than six weeks, from the completion of the organization of the school, the Inspector of the district is to inspect the school, with a special view of ascertaining the effectiveness of the organization, and of examining and checking in detail all the points and statements contained in the organizer's final report.

38. The District Inspector is then to forward this report, along with the organizer's preliminary and final reports, to the Head Inspector of the district, who will afterwards transmit them to this office.

39. During the time that a school is under organization the Inspector is not to make a formal inspection of it, nor sooner after the organization is completed than the time mentioned in paragraph 37; and it is the express wish of the Commissioners that the employment of an organizer in a district *may interfere as little as possible with the usual and regular business of inspection.*

40. It is, however, exceedingly desirable that the Inspector should make as many *incidental* visits as possible to a school under organization, to see that the work is proceeding with regularity and vigour; to confer with the managers, and stimulate them to a hearty co-operation with the organizers; to assist in removing local difficulties or impediments, and to extend, as much as lies in his power, the advantages accruing to the National system from the operations of the organizers.

41. No organizer should for the present be sent to any place where there are not, *at least*, four National schools within a circuit of three miles from it, the managers of which are desirous that their schools may receive the advantages of organization.

42. No less than four, or more than eight, schools are for the present to be organized by the same organizer in any particular locality.

43. As a general rule, the time spent in the organization of a school is not to exceed a fortnight; but the organizer is to return for a day or two, if necessary, before he leaves the locality in which the school is situated, to observe the results of the organization, and give such further instruction to teachers and monitors as the state of the school may at the time suggest as necessary and important.

44. The two weeks which may be spent by an organizer in a school are not to be consecutive; a week, in all cases, is to elapse between the first and second parts of the organization. For instance, where four schools, A, B, C, D, are to be organized, the following may be the order of organization:—

First week,	A	Next week,	C
Next week,	B	Next week,	D
Next week,	A	Next week,	C
Next week,	B	Next week,	D

APPENDIX, No. 6.

45. The second great object which the Commissioners of National Education have had in view in establishing the staff of organizers, as already stated in paragraph 1 B, is "to diffuse a knowledge of schoolmastership in all its practical bearings, and also of the leading principles of the science of education amongst "the teachers of the country."

46. To carry out this great object each organizer will deliver a course of lectures to the teachers who live in the neighbourhood of the school in which he is engaged, upon method, order, discipline, school accounts, employment of monitors, construction of timetables, arrangement of school furniture, use of charts, tablets, and apparatus, industrial education, and upon organization generally.

47. These lectures will take place on Saturdays, at whatever hour may be most convenient to the organizers and the teachers.

48. The District Inspector is to invite all teachers living within a reasonable walking distance—four or five miles—to those lectures; and whilst attendance is, under no circumstances, to be considered as compulsory, it is to be understood that the Commissioners will regard with satisfaction the conduct of those teachers who attend the instructions.

49. None but schoolmasters and monitors in their fourth year, are to attend the lectures of male organizers, and none are to attend the instructions of the female organizers but schoolmistresses and monitresses in their fourth year.

50. Teachers, whether trained or not, are eligible for admission into the organizer's classes; for it is hoped that both the trained and the untrained will derive such advantage from the instructions as to qualify them the better for a skilful and efficient discharge of their duties.

51. The organizers will keep a roll of the attendance of the teachers, and submit it at the end of the course of instruction to the District Inspector.

52. The organizers will require the teachers who may attend to take such notes during each lecture as will enable them to write out an abstract of it before the day for the following lecture; those abstracts and whatever other written exercises the organizers may require the teachers to prepare for them are to be examined and noted by the organizer, and submitted from time to time to the District or Head Inspector, to be afterwards, however, in the corrected state, returned to the teacher.

53. A statement will be made at the end of each course of lectures by the organizers, for the information of the Inspectors and Commissioners, of the attention paid by each of the teachers to their instructions, and of the proficiency which each of them shall have made.

54. As the duties of an organizer, when organizing a school, will be such as to prevent him from doing much more in reference to methods of teaching, than exemplifying and carrying into practical effect the instructions contained in his lectures, no school can be organized, the teacher of which does not attend, or shall not have attended, a course of lectures either from him or some other organizer.

55. The Commissioners desire that the Inspectors should devote as much attention as possible to the arrangement and superintendence of those weekly meetings; and they also desire that the Inspectors should sustain and encourage the organizers on those occasions, uphold their authority, give weight to their position, and contribute by every means in their power to their success.

56. Before an organizer commences operations in a locality, the Inspector should have all necessary arrangements with managers and teachers completed, as to the schools to be organized and the teachers who are to form the Saturday class for practical instruction.

57. Whenever a District Inspector feels that the services of an organizer are required for any particular group of his schools, all the conditions already announced being either fully complied with, or in a fair way of being so, he is to communicate with this office, giving information on the following points:—

(*a*) As to the centre which he proposes for the residence of the organizer, selecting, of course, no place in which a suitable lodging cannot be procured for him and his family.

(*b*) As to the schools which he recommends for organization and the distance of each from the proposed residence of the organizer.

(*c*) As to the number of teachers who would likely attend the lectures of the organizer upon Saturdays.

58. Each District Inspector is requested to inform this office, within a week after the receipt of this circular letter, upon the points enumerated in the previous paragraph.

59. The office, on receipt of those communications, will advise them to the Head Inspector, whose duty it will be to select the schools proposed to be organized, to instruct the organizers as to the schools assigned them, and the time of the commencement of the organization, and immediately to advise the office as to the steps thus taken.

60. In order to place the object and details of the system of organization, and the machinery by which it is worked, as fully and clearly as possible before the Inspectors, the Commissioners append printed copies of the reports referred to in paragraphs 34 and 35. These reports, printed verbatim from the copies furnished by the organizer, are selected principally because the school to which they refer, from being one of the worst town schools in connexion with the Board, has become, since its organization, distinguished for the neatness and completeness of its arrangements, and the general excellence of the order, discipline, and methods of teaching pursued in it. The Inspectors should peruse these reports carefully, inasmuch as they exhibit, with considerable precision, the chief points and details in the organization of a school.

61. The District Inspectors are requested to circulate, as extensively as possible, amongst managers, teachers, and the public generally, information as to the object, scope, and leading features of organization; to let managers understand that the presence of an organizer in their schools neither affects their privileges, nor interferes with their functions; to inform teachers that organization is intended to diminish in no way their authority in their schools, or to degrade them in the estimation of their pupils or the parents; to acquaint all classes interested in the education of the people, that an organizer has nothing whatever to say or do in relation to the arrangements for religious instruction; that, on the contrary, it is the aim of the Commissioners, in the measures now taken by them for the improvement of their schools, to uphold the rights of managers, to strengthen the power of the teachers, by rendering them more skilful servants of the public, and to realize what the Board have long desired to attain, a scheme of organization which, by combining all that educationists approve in the matter of instruction and commend in school keeping, will give a distinctive stamp and uniform character to the schools conducted on the National system.

NOTE I.—At Cork, Belfast, Limerick, and Kilkenny Model Schools the literary and agricultural departments are carried on in the same establishment, so that many items of expenditure cannot be properly divided, and these are charged to the agricultural branch, which would account for a portion of the excess in expenditure over the estimate for that service.

NOTE II.—This sum includes Her Majesty's Stationery Office accounts; amount, £2,742 12s. 10d.

APPENDIX, No. 9.

APPENDIX No. IX.

EXTRACTS from REPORTS of INSPECTORS, for year 1866, on the state of the NATIONAL SCHOOL-HOUSES, in their respective Districts.

[See Question 10861, p. 439—Mr. Kavanagh's Evidence.]

Mr. *Connellan*, Letterkenny District, states that:—"During the winter months, nearly all the schools in the district are over-crowded."

Mr. *Brown*, Ballymena District, states that:—"In about one-fourth of the schools the accommodation is indifferent and inadequate."

Mr. *Wood*, says that—"Of 70 non-vested schools in the Donegal District, 12 are very bad."

Mr. *Molony*, Sligo District, states that—"Of 100 schools in his charge, 30 are bad, as regards space and other essential particulars."

Mr. *Healy*, writing of the Enniskillen District, says—"Viewed as a whole, the school-houses in the district afford rather indifferent accommodation, at least 30 per cent. of them are so unsuitable, that if a reasonable prospect existed that better could be provided, they should not be allowed to enjoy Board's grants. Unfortunately, the landed proprietors, as a body, are opposed to our schools, hence, in many cases, poor cabins are the only resource, unless the people are left without the means of education."

Mr. *Eardley*, Monaghan District, states—"In a few instances the school-houses are mere cabins, badly lighted and ventilated, not originally intended for school purposes, and unsuitable in every respect."

Mr. *O'Hara*, Ballina District, states—"In more than one-half of all the schools, the accommodation is still of an inferior description."

Mr. *J. W. Rodgers*, Boyle District, states—"Many of the school-rooms are defective as to draft—space, light, and ventilation."

Mr. *H. W. M. Rodgers*, Cavan District, states—"That in a few of the schools the accommodation is decidedly unsatisfactory."

Mr. *MacCreanor* states, of the schools in the Drogheda District, that "four of the rooms are very ill suited for school purposes, and four others stand greatly in need of alteration."

Mr. *Seymour*, Westport District, in which 42 per cent. of its 88 schools are vested in the Commissioners, says "that 15 of the 88 are either indifferent or wholly bad, *some* of them are necessarily tolerated from their unfavourable circumstances, and the remainder are partially inoperative, owing to the suspension of the grants, to which they are frequently liable."

Mr. *M'Sweeny*, Roscommon District, states, the accommodation afforded by 43 of his 112 school apartments "is inadequate at all seasons of the year. There are a great many schools in which the furniture is poor and old, and few ready to repair, except the teachers, whose means are heavily taxed by their own personal wants."

Mr. *Bradford*, Longford District, states—"Many of the school-houses are thatched cabins with clay floors, and windows not sufficiently high for proper ventilation or light; the rooms too small for the attendance several months in the year, the furniture not of a proper description, and the desks such as to delay the children's progress in learning to write."

Mr. *Currie*, Ballinamore District, states—"The chief defects in the school buildings throughout this district appear to me to be exactly those that characterize the dwellings of the humbler classes generally, seeing they are defective in breathing space, and in the arrangements for the proper ventilation, lighting, and heating of the apartment."

Mr. *Gordon*, Tuam District, states—"The accommodation in many of the non-vested schools, both in the town and in the rural sections, is very fair. The houses, many of them, have been altered from dwelling-houses, and are very unlike what roomy, well lighted, and well ventilated school-rooms ought to be. In winter, when the attendance, especially at the rural schools, is at a maximum, many of the schools are so much overcrowded, that it would seem to be almost impossible for much effectual work to be done in them. Most of the non-vested schools are quite too small and ill adapted to school purposes, both from deficient light in winter, and the want of suitable accommodation either in floor or in desks."

Mr. *O'Neill*, Ballinasloe District, states—"In eight or ten cases the floor space is insufficient for the average attendance. In three or four cases the houses are not suitable, being thatched cabins of the ordinary type, and originally built without any special adaptation to the purposes which they now serve."

Mr. *O'Carroll*, South Dublin District, states—"In many cases the accommodation is very bad, viz., the James's-street male school and infant schools are held in the rooms of an old private house, totally unsuitable to school purposes, very deficient in ventilation and in fitting up, and altogether too small for the attendance. The John-street female and infant schools are not calculated to accommodate one-half of the children who assemble there. The side walls are only about five feet high—about 100 in a room not fit for fifty. Dolphin's-barn school is held in a house also most unhealthy and unsuitable, all full of draughts. The two former teachers, young women, died, as I am informed, while in charge of it, and I fear the unhealthy house contributed to their untimely death. Rathfarnham National School is a ruin. The St. Michael and John's female schools are held in an old ruinous store, over a lard and bacon factory, beside unwholesome yards, and the majority of the National schools of the city have no playgrounds."

Mr. *Coyle*, Carlow District, states—"The playgrounds, where there are any at all, are generally unsatisfactory, and in many cases there are none, the house being beside a yard or lane."

Mr. *MacSheehy*, Bray District, states—"In the mountainous parts of the district, and in some localities of county Wexford that are not mountainous, very indifferent school-houses are to be met with as before, and the want of residences for the teachers is still too general."

Mr. *Cowley* states, of the Gort District, that "in some few of the non-vested schools, the accommodation is inadequate."

Mr. *Lawler* says—"That at some periods of the year, in the Thurles District, a few of the school-rooms are too small for the attendance."

Mr. *W. R. Molloy*, of the Athy District, states "that five of the non-vested schools are defective, as regards the nature and amount of accommodation."

Mr. *Barret*, describing the school-houses in the Ennis District, says—"The majority of them are thatched and of an inferior description; and in much the greater number of the school-houses the accommodation is sadly insufficient for the number of pupils who attend."

Mr. *Brown* says that in the Tipperary District—"In a few cases, the houses are neither adequate to the attendance, nor otherwise suitable; four of these are miserable cabins, deficient in desk and class space, as well as in the means of light and ventilation."

Mr. *Dugan* says that, in the Enniscorthy District, "a large number of the schools have neither play-grounds nor privies attached. I consider this latter a great want indeed, and wherever it exists that it should render the school ineligible for aid from the Board."

Mr. *Potterton*, writing of the Limerick District, states that—"In far too frequent instances, houses of an inferior character, and very indifferently, not to say badly, furnished, are to be met with."

Mr. *Hanlon*, of the Newcastle, West, District, repeats that—"There are sixteen schools in the district in which the accommodation is of an inferior description or altogether insufficient for the usual attendance."

Mr. *Macnamara* complains of many of the vested schools in the Killarney District, and of the tardiness of the Board of Works in repairing them.

Mr. *Kealy* says that "in seven non-vested schools in the Bantry District the accommodation is bad, and in seven more it is very bad."

Mr. *O'Connell* states "that in eleven schools in the Dunmanway District the accommodation is insufficient."

APPENDIX No. X.

REPORT on OLDCASTLE ENDOWED SCHOOLS, by JAMES W. KAVANAGH, Esq. (formerly) Head Inspector of Irish National Schools, December 13th, 1853.

[See Question 10941, p. 444—Mr. Kavanagh's evidence.]

Education Office, December 13th, 1853.

GENTLEMEN,—Application having been made by one of your members (on behalf of the trustees) to the Commissioners of National Education that one of their Inspectors should examine the Oldcastle Endowed Schools, I was instructed to undertake this duty; and I have now the honour to submit my report of an examination of the boys' and girls' schools, held by me and by my assistant, Mr. O'Sullivan (Sub-Inspector), on Thursday, Friday, and Saturday, the 20th, 21st, and 22nd October.

It afforded me great pleasure to have had the advantage of the presence of Mr. Naper and the Rev. Mr. Durden, on two, and of the Rev. Mr. Leonard on one of the days of examination; and at the request of some of the trustees I beg to include in my report on the present state of the schools some few suggestions towards their improvement, with a view to render this excellent charity more efficient in promoting the elevation of the youth of the town and vicinity.

I. STATISTICS AND ACCOUNT BOOKS.

The accounts of the numbers in attendance, and of the individual history and proficiency of the boys, although better attended to lately, are in a most unsatisfactory state. The school-rolls are ill kept, and are not preserved; the register has scarcely any reference to a school, and referring only to questions pertaining to the distribution of clothes, &c., would equally apply to *any* institution where such are given; and the report book of the numbers in *daily* attendance bears no date for years, and entries in it were rarely made.

Year.				
1842,	Number present marked for 63 days only.			
1843,	,,	,,	45	,,
1844, 1845,	,,	,,	76	,,
1846, 1847, 1848, 1849, 1850,	,,	,,	78	,,
1851,	,,	,,	79	,,

Total for 10 years' attendance marked on 341 days.

It appears, therefore, that on an average of ten years the number of boys in attendance was recorded only 34 days in each year, or rather less than three times in each month. Improvement has taken place lately in this respect, the entries for 1852 including 174 days, and in the first nine months of 1853 124 days' attendance. The entries in the girls' school are fuller, and the accounts kept with much more care and neatness; they show 208 school-days for 1852, including 42 Saturdays, whilst for the same period the master's book shows 174 school-days, including 16 Saturdays.

The average *daily* attendance during the year 1852 was (excluding that on Saturdays):

Boys,	133
Girls,	145
Total,	278

Now, supposing that the number of pupils who are on the roll, and who occasionally attend, to be double the number in average daily attendance, about 560 children receive instruction in the school, each year. Looking to the census of 1851, we find the population of

Oldcastle Parish,	3,008
Loughcrew,	905
Moylough,	2,769
Total,	5,682

and within these, there are only two small National schools, Loughcrew and Baltrasna, and in addition to this population the children from several townlands in Castleraghen, should attend Oldcastle school. Taking all local circumstances into account, *at least* 1,000 children should attend these schools during the year.

II. EXAMINATION OF PUPILS.

BOYS' SCHOOL.

On the 20th October, there were present 131 boys, classed, thus, by the teacher:

READING	1st Book,	60 boys.
,,	2nd ,,	29 ,,
,,	Sequel,	7 ,,
,,	3rd Book,	12 ,,
,,	4th ,,	10 ,,
,,	5th ,,	13 ,,

Of these 131 boys, there were:

9	able to read	4th Book,	fairly.
8	,,	3rd ,,	tolerably.
8	,,	3rd ,,	poorly.
3	,,	2nd ,,	pretty well.

GRAMMAR—Elements, 29
,, Parsing, 13

Of these 42 boys, 5 parse with tolerable accuracy, and 14 know the parts of speech pretty well.

DICTATION, 13

Of these 13 boys, 3 wrote an easy sentence with tolerable accuracy, and 3 with ease and correctness.

GEOGRAPHY, 71

In geography the answering of the senior class was tolerable, except in mathematical geography.

DERIVATION, 13. Answering very poor.

ARITHMETIC:	Simple Rules,	30
,,	Compound,	24
,,	Proportion, &c.,	12

Answering of the 5th class, very bad—

Of 13,	only 3	right in	Notation,
,,	,, 9	,,	Subtraction,
,,	,, 6	,,	Compound Multiplication,
,, 12	,, 6	,,	Proportion,
,, 5	,, 1	,,	Practice.

MENTAL ARITHMETIC, 8 boys.—In this no proficiency made.

WRITING—on slates, A few of the senior boys write a good hand, and on the whole, the style of penmanship is good.
,, paper,

GEOMETRY, 9.—No proficiency made in this branch.

AGRICULTURAL CHEMISTRY. No proficiency made—mere ROTE learning.

SCRIPTURE EXTRACTS. General answering VERY GOOD.

The summary of the examination is this: the style of reading is bad, and the fraction of children able to read a simple narrative intelligently, is, altogether, below what we find in the average of all the National schools in Ireland; the knowledge of the subject-matter of the earlier lesson-books is tolerable; only 1 in 26 of the boys can parse an easy sentence with fair accuracy, but 1 in 9 (in addition to these) can distinguish the parts of speech; the answering in writing from dictation, evinced great deficiency in correct spelling, and the oral examination in the several classes, showed a similar result; a very fair knowledge of local geography was elicited from the senior class, but mathematical geography has yet to receive more attention, and the junior classes are altogether ignorant of any knowledge of the rude outline of geography. In the important branch of arithmetic, the answering was extremely bad:

Of 37 boys, only 4 entered correctly "5,005,050" from dictation.

,,	,,	17	worked a sum, correctly, in subtraction.
,,	,,	11	,, in Multiplication of Money.
,, 23	,,	6	,, Simple Proportion.
,, 5	,,	1	,, Practice.
,, 5	,,	3	,, Simple Interest.

In mental culculations no proficiency has been made; the 9 boys who have commenced geometry, have, as yet, made no progress; the Scripture Extracts (some numbers), and the outlines of Scripture History, are tolerably well known, but their chronology requires further attention; Professor Johnston's catechism of agricultural chemistry, is committed to memory, by the senior class, but, on examination, I could not elicit any *real* knowledge of its subject.

APPENDIX, No. 10.

The pupils are altogether over-classed, or placed beyond their attainments, and on their return after long absence from school, they do not appear to be examined or classed *de novo;* the proportion of pupils in the lower classes is too large, nearly half of them being in words of one syllable, and 100 of the 130, failed to read correctly an advanced lesson in the Second Book; the school exhibits few traces of skilful organization; the order and discipline are very inferior; insufficient attention is bestowed on securing personal cleanliness in the children; several of the monitors are wholly unfit for their duty, and they receive quite insufficient special instruction to qualify them for the business they are to discharge; the teaching staff is large, but inefficient and unqualified, and the amount of *effective* school-time, is extremely limited.

Under the present management, the year appears to be thus divided:—

	Days.
Sundays,	52
Roman Catholic Holidays 10, but 3 fall in Vacation,	7
Mondays, as Religious Instruction,	52
Saturdays, half-day,	26
Vacations: Christmas, 3 weeks of 12 days, Easter, 1½ weeks of six days, Harvest, 4 weeks of 16 days,	34
Full school days,	194
Total,	365 days.

Now this would give nearly $3\frac{3}{4}$ school-days in each week, this, however, is an over estimate, as during 1852, there were in the

Boys' school, 158 days, and 16 Saturdays, as halves, 166 days.
Girls' „ 166 „ 42 „ 187 „

or $3\frac{1}{5}$ days per week in the boys', and $3\frac{6}{10}$ days in the girls' school. The effective value of this very small school-time is reduced to one-half, by the fact, that the pupils attend not fully half their time, and it has to undergo a still further reduction, from the laxity of discipline in the school, which permits the pupils to come in at any hour, up to, and as I was witness, beyond 11 o'clock in the morning. This is an evil of the most serious character, and to remedy which, calls for immediate and stringent measures.

GIRLS' SCHOOL.

There were 147 girls present at the examination, and these were classed as follows:—

READING 1st Book,	49 girls.
„ 2nd „	24 „
„ Sequel,	20 „
„ 3rd Book,	29 „
„ 4th „	17 „
„ 5th „	8 „

Of these 147 girls, 8 read 4th Book very well,
17 „ 3rd „ satisfactorily,
10 „ — „ pretty fairly,
18 „ 2nd „ with ease and intelligence.

GRAMMAR, 98, of whom 25 parse well, and 12 know parts of speech.

DICTATION, 25, of whom 12 wrote with fair, and 7 with tolerable accuracy.

GEOGRAPHY, 98: Senior classes answered remarkably well on maps of Europe and Ireland, and on mathematical geography.

DERIVATION, 54: Some progress in prefixes, affixes, and roots.

ARITHMETIC: Simple rules answered extremely bad.

Compound, Proportion, and Mental, 25:	Notation not properly taught. Proficiency yet very limited.
Simple subtraction,	4 of 7 right.
Compound Multiplication,	2 of 7 right.
Proportion,	2 of 7 right.
Practice,	2 of 5 right.

WRITING on paper, 37: copies extremely good; subject well taught.

On the whole, the style of reading is altogether higher in the girls' than in the boys' school; greater ease; greater fluency; a pronunciation freer from provincialisms, and a command of intonation, which, when combined with apprehension of the subject-matter, is the essential feature of reading with expression. Connected with the statement of superior reading, and by far superior numbers in the girls', as compared with the boys' school, it is but justice to the latter to mention, 1st, that *cæteris paribus*, girls have a greater taste for, and more readily attain excellence in reading than boys; 2ndly, the average age of the girls of senior classes, considerably exceeds that of the boys; and 3rdly, from the large staff of young women who act as monitresses, the teaching power, in the girls' school, is far more effective than that in the boys'. In English grammar, the girls answered far better than the boys, in parsing the *same lesson*, at the rate of three lines to each pupil.

Of 12 boys in 5th class, 10 missed 52 words, or over 5 each, whilst 2 boys were so deficient that they could not distinguish the parts of speech.

Of 8 girls in 5th class, 6 missed only 3 words, or an error between each 2, and 2 other girls missed 13 between them.

The results of the answering in grammar are, on the whole, *twice* more favorable to the girls' school.

The proficiency of the girls in geography was tolerably good, except in mathematical geography, the use of the imaginary lines, &c.; as in the boys' school, the junior classes are not familiarized at a sufficiently early stage, with the leading features, relative positions, &c., of the great divisions of the earth, on the map of the World. In arithmetic, the answering of the girls was *extremely bad*, and quite out of character with the otherwise general merit of the school. The penmanship is nearly all that need be desired in point of neatness and finish, and has the rare merit of possessing the symmetry and legibility of round, combined with the elegance and grace of angular hand.

I regret to be obliged to notice a defect that constantly forced itself on my attention while in the school,—a marked absence of that delicacy and modesty, which, from their age, should be expected as an instinct, in some of the more grown girls in the school. This refers rather to carriage, tone and bearing, than to any supposed deficiency in moral goodness, in fact, I felt disappointed that such intellectual activity, and the advantage of daily intercourse, with a person of such mild and amiable disposition as Miss Murphy, had not had more influence in giving the manners of a few of the grown girls, a more feminine character.

I understand the needle and other work done by the girls is of a very superior order; on this occasion I saw but little of it, other matters having engrossed all my attention.

RELIGIOUS INSTRUCTION.

The religious instruction of the children being amply provided for by the services of Rev. Mr. Durden and Rev. Mr. Leonard, as chaplains to those of their respective communions, I have only to add, from the report of both gentlemen, that this important portion of the education of the pupils receives due attention. I beg leave, however, to suggest, that instead of the whole of Monday being devoted to this purpose, that two hours, or two hours and a half, either in the forenoon, or the afternoon of that day, be devoted to religious instruction, and the remainder of the day to secular instruction. Children of tender years, or even adults, could not well continue for five hours together at religious instruction without listlessness and inattention, and in the Dublin Model and other such schools, a couple of hours is the amount of time desired by the clergymen for this object.

INDUSTRIAL TRAINING.

Since the Oldcastle schools came into operation, the most important social changes have taken place in Ireland, and several of these bear *directly* on the *principle* of this charity bequeathed for the education of *the poor* (as I understand) of Oldcastle; the really poor or destitute, have since been removed, and their education undertaken by the State, in the Union workhouse, so that for the last 13 years, the very class for whose elevation the testator meant his bequest, has been excluded from it, under Act of Parliament. A school such as this, which secured freedom of conscience and non-compulsion in matters of religion, was a wonderful boon, when the Chancellor made his order for its establishment in 1828; but three years after, saw the rise of a school-system

with this principle recognised as its basis, and which has since so commanded the assent of the nation that it has grown into one of the matured institutions of the island, with nearly 600,000 children within its over 5,000 schools. The passing of the Roman Catholic Relief Act did not take effect for several years after the death of the testator, and this great measure by throwing open to the mass of the nation offices from which they had been for centuries debarred, stimulated the lower classes to educate their children; and in their anxiety to pay for it popular education lost much of that patronized and eleemosynary character which before had been its inseparable feature. Whilst these three great changes — Catholic Emancipation, the National System, and the Irish Poor Law—have deeply affected the principle of the charity which you administer, you appear to adhere to the same fixed regulations in the mode in which you carry it out.

From January, 1852, to September 19th, 1853, there were admitted to the girls' school :

151	Children of	Labourers,
73	,,	Farmers,
61	,,	Tradesmen,
15	,,	Dealers,
15	,,	Servants,
14	,,	Shopkeepers,
18	,,	Persons with no recorded occupation,
5	,,	Of whom no note on this head was taken.
Total, 352		

There is nothing in the nature of the case to lead us to suspect that the proportions in this return do not equally apply to the boys' school, and I shall therefore adopt it for both. All these children get free tuition, free books and requisites ; are eligible for premiums, some get clothes, and some get apprentice fees. I understand clothes to the amount of from £170 to £200 per annum are distributed to the children. Now, I have no doubt, that at least *one half* the pupils, looking to the social grades occupied by their parents, should pay reasonable rates for their tuition, and purchase their school requisites at moderate prices, and not to aggrandise the funds of the charity, or of the teachers, but for their parents' sake and for their own. Parental responsibility is weakened ; self-reliance is impaired ; respect, for the school, for the teachers, and for education, *in itself*, is lessened ; and regularity and punctuality of attendance are unattainable. The receipts from school-fees might be usefully applied in premiums of books, maps, &c. ; in supplying scientific apparatus, diagrams, models, and objects for the schools ; in aiding the salary of a drawing master and of a singing master ; or half the amount of the fees given to the teachers of the schools would form a good connecting link between the children and them. In the central model schools, in the ten district model schools, in all the schools under the direct management of the National Board, school-fees, *prepaid*, are exacted of *every* child in attendance, and even is required should the child be absent, but desire to have its name retained on the school-roll. For your information I beg leave to refer to a few of these district model schools situated in small towns like your own.

Population, 1851.	——	1852. Average Daily Attendance.	School Fees.	Amount of Books bought.
			£ s. d.	£ s. d.
1,100	Bailieboro' District Model Schools, ...	115	28 4 5	13 3 4
1,905	Trim, ...	225	62 4 4	Not recorded.
2,212	Dunmanway, county Cork,	207	78 18 9	19 6 9
1,072	Oldcastle, ...	278	None.	None.

The Commissioners, who framed these regulations, administer an annual fund of £180,000, and twenty-two years' experience determines them in making the schools, *as far as possible*, self-supporting.

In the case of the children of labourers, servants, &c., they, and indeed all the children, should get some industrial training. There is no boy who has to earn his bread by his hands but should have those hands in daily training, for at least an hour or two, from nine to twelve years of age, and two to four hours from twelve to fifteen years. He would thus on entering "the battle of life" be familiar with the use of the weapons with which alone, industrially speaking, it can be won ; a body of trained and skilled labourers would be raised, whose daily chorus would be :

> "No parish-money or loaf,
> No pauper-badge for me ;
> A son of the soil, by right of toil,
> Entitled to my fee ;"

and as five-sixths of the pupils are either directly or indirectly connected with land, the cultivation of a school-farm of ten to fifteen acres by spade husbandry, and a portion of it divided into small allotments, rented and tilled by the senior boys, would develop the muscular vigour of the pupils ; improve their health ; train them to the dignity of manual labour ; sharpen their mental faculties, and familiarized with a rotation of crops, the house-feeding of cattle, the economy of manures, and the principles and practice of scientific agriculture, there would be scattered, broadcast, through the vicinity such an amount of superior agricultural skill, both as to the use of improved implements and the application of scientific principles, as must in a short time elevate the character of the locality, as to skilled husbandry.

When the founder of this benevolent charity made his bequest, industrial education was totally unknown in the British Isles, and were he now here to witness the changes which over thirty years have produced, he would see that while clothing the naked is yet, and will ever be, held as a work of mercy, a still greater work is teaching the naked to clothe themselves, and the hungry to feed themselves ; and, with this idea, I would most respectfully urge on the trustees to restrict their charity in clothes, &c., and apply it to the wider, deeper, and more permanent charity of *industrial* training, which together with the moral, religious, and intellectual training to which the children are subjected, would give integrity to the whole scheme, and render the institution one of the noblest in the empire.

TEACHERS.

Your master, Mr. Folliott, is, as I am sure you all feel, a highly respectable man, well-informed, of respectable address and manner, and since he entered your service, he has become a graduate of the Dublin University. He appears most anxious as to the success of his school and pupils, and I have no doubt, brings sincere conscientiousness to bear on the discharge of his duties. It is to be regretted that in the earlier part of his career, he had not the benefit of a regular course of training in a good normal school ; and the more so, seeing that the school is altogether isolated, and shut out from those advantages which arise from intercourse with inspectors and educationists, whose entire study it is to watch the daily improving systems of school-organization and methods of teaching, not only in Ireland and the British Empire, but over the civilized world. This I conceive to be a vital defect in the position of your school, and one which mainly has produced the cramped, narrow, and mechanical routine, which it presents to the observation of an educationist. To an average National school it is thus necessarily related as a pond is to a spring ; the one self-contained and conservative, the other, an ever-flowing supply.

The mistress, Miss Murphy, was trained under the National Board, and conducted with great credit, as you are aware, a National school in Moynalty for several years. She exhibits considerable skill, indefatigable zeal, and generally speaking, great success, in the management of the school. Its order and discipline are yet open, however, to some improvement.

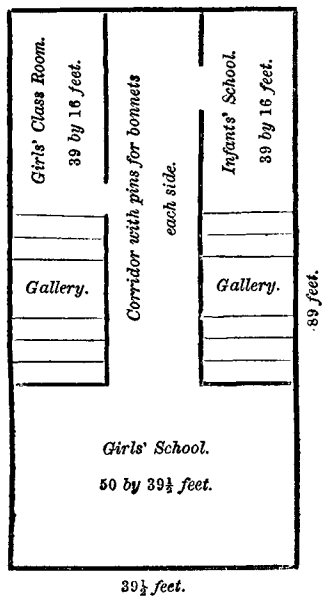
III. I now beg leave to submit for the consideration of the trustees, the following suggestions, and upon which I have bestowed all the attention in my power, with a view to the improvement of the Oldcastle schools :—

I. That an infants' school be at once established

APPENDIX, No. 19.

for all children under 8 years of age. Numbers of children in the town of 3 to 5 or 6 years, who do not now attend school, would attend the infants' school. By a partition, a room 29 feet long, cut off from the western end of the girls' school, would leave the latter a yet noble room, 50 feet in length, and a suitable infants' school-room would be provided. This to be fitted and furnished for the purpose—gallery, prints, cases of objects, &c., to be supplied. The junior classes in both schools are quite neglected, and the teachers have neither taste nor qualifications to train children of their age, and, moreover, their presence in the schools retards the progress of the senior classes. A first-rate infants' teacher could be procured from the National Board, at a salary of £50 a-year, with the furnished apartments lately occupied by your workmistress.

There would still be a class-room wanted for the girls' school, and which perhaps might best be obtained by a plan such as that here roughly sketched, which would give a class room 39 by 16 feet, with a gallery of 8 steps, and an infants' school to accommodate 100 children, of same dimensions.



The boys' school to have one class-room with gallery and the other corresponding room to serve as a board-room for the meeting of the trustees, and fitted up with presses, &c., for stock of books, stationery, &c.

A play-ground with covered shed at the sheltered side, to be fitted up for the infants, and a small yard, with suitable privies, to be set apart for their use.

The schools are insufficiently warmed, and the stone floors might be removed, and boards substituted. The flags are both damp and cold in winter. The desks in both schools are too long and too numerous, and a supply of forms of graduated heights, and not fixed to the floor, should be provided. A dozen black-boards, 3 by 2 feet are required for each school, and also a ball-frame or bead-table for each. A glass-case to contain a collection of metallic ores, rocks, raw materials, their several manufactured products, &c., should be supplied to each school, and object-lessons given thereon. Cheap models, illustrative of the mechanical powers, the steam engine, &c., Professor Johnston's large sheets of illustrations of the Principles of Natural Philosophy, a cheap set of chemical apparatus, sufficient to illustrate by experiment, Hodges' Agricultural Chemistry, diagrams of the outlines of Zoology and of Botany, and a pair of globes, would be required in the boys' school. There might also be added a few cases of drawing instruments, scales, &c., 2 Gunter's chain, a cheap theodolite, a mariner's compass (price about 10*s.*), a barometer and thermometer. For the girls' school, a terrestial globe, and the diagrams in Natural History might be supplied. A circulating school-library is also much required; that for boys' school might contain, besides works on history, travels, biography, natural history, poetry, English literature, fiction, &c., useful works on agriculture, the arts and manufactures, and various special branches of industry. The girls' portion to embrace works on cooking, domestic thrift, &c.

I beg leave to further recommend, that as soon as possible, the trustees introduce singing as a *daily* portion of the school instruction, and also elementary drawing. This could best be done by engaging the services of a person competent to instruct in both, and who would likely accept a salary of £100 for one year, at the end of which period your teachers should be competent to continue the instruction in both branches in their schools. It is quite unnecessary to discuss here, the importance of these as a portion of popular education.

I recommend that 10 to 15 acres of land, convenient to the schools, be taken; that the services of a first-rate agricultural teacher be secured, and who shall also act as second master in the literary department, in the schools; and that to him be confided the industrial instruction and training of the boys. He should be thoroughly conversant with the principles of scientific husbandry, and show skill and aptitude in communicating this knowledge to the industrial class, he should be eminently practical in the management of a farm, and should in addition be a trained and respectably classed literary teacher. Such a teacher would expect a salary of not less than £70 with apartments, or rent, in lieu thereof. It would be out of place here to give detailed suggestions as to the organization of the industrial training, but if the farm be taken, and a competent teacher appointed, I shall most willingly give suggestions to aid this most important object.

MONITORS.

With a second master, *six* monitors would quite suffice as a teaching staff in the 'boys' school. These should not be less than 13, nor over 16 years when appointed, and should hold office for 4 years.

Their salary should be:

1st Year,	£4	
2nd ,,	5	
3rd ,,	7	
4th ,,	9	To be paid quarterly.

As there are so many grown girls, I am of opinion it would be better to increase the staff of really efficient monitresses, than appoint an assistant teacher. I therefore recommend that 8 qualified monitresses be selected at the above rates of salary.

INSPECTION.

I have no hope even if the ample suggestions already given, were carried out in all their integrity, that this, or any similar institution, can keep its place amongst the active educational establishments of the country, without regular and authorized inspection and examination. Your public exhibitions, are no examination, and teachers, pupils, and examiners all feel that they are not. Careful detailed and professional superintendence is absolutely necessary, or your schools must inevitably sink into the condition of some of the old charity schools in England. This can be obtained in two ways; either by connecting your schools with one of the two Irish systems which employ Inspectors, or by engaging the services of an Inspector, at a salary proportioned to the extent of attention which you may require. If you join the National system, you would likely be entitled to the following aid, roughly estimated:

Salaries to 4 or 5 Teachers, including Grant to Industrial Department,	£130
Paid Monitors,	20
Saving by Books, Requisites, &c.,	35
	£185

In addition, you would be secured a full examination of your schools three times a year, the advice of the Agricultural Inspector, in the management of your farm; and from our visits to the schools, we would be able to recommend the most deserving of your pupils for situations under the National system. Likely the Commissioners might deem fit to aid you with inspec-

tion only, but in either case your control over your teachers and your charity would be unaltered by the connexion, conformity to their rules, being the only condition to entitle you to aid. It is also open to you to engage the services of an Inspector, to make two half-yearly examinations of your schools, each to occupy a week, and if you desire to hold a public examination, it would occupy the chief part of a week; and for this duty, with a half-yearly report on the state of the schools, £30 per annum, together with hotel and travelling allowances, would be a moderate stipend or fee.

I strongly recommend you to adopt the rolls, report-book, register, &c., of the National Board, and from January, 1854, that no other be used in your schools; also that in revising the whole question of premiums, clothes, &c., regularity of attendance for the entire of previous year, and good conduct, &c., be taken into account, in making the awards.

Pressure of heavy public duty, and recent delicacy of health, are my apology for the delay in preparing this report, which I have now the honour to submit to the trustees of the Oldcastle Endowed School, with the deepest conviction, that, one and all, they labour to carry out the benevolent intentions of the testator, and for which I, in common with all friends to popular enlightenment, beg most sincerely to tender you my admiration, and remain,

Appendix, No. 10.

Gentlemen, your obedient servant,

James W. Kavanagh,

Head Inspector of National Schools.

To The Right Hon. Sir John Young, Bart., Chief Secretary for Ireland; James L. Naper, Esq., D.L., Loughcrew; Gerald Dease, Esq., D.L., Turbotstown; Rev. Mr. Durden, Rector of Oldcastle, and Rev. Geo. Leonard, P.P., Oldcastle, Trustees of Oldcastle Schools.

Appendix No. XI.

Appendix, No. 11.

Revision of School Books on the Board's Catalogue. Letter to the Right Hon. Edward Cardwell, M.P., Chief Secretary for Ireland. Correspondence with the Commissioners, 1859–1861.

[See Question 12385, page 523—Mr. Kavanagh's Evidence.]

To the Right Hon. Edward Cardwell, M.P., Chief Secretary for Ireland.

Endowed School, 32, Essex-street, Dublin, July 25, 1861.

Sir,—I beg leave, most respectfully, to lay before you a copy of my correspondence with the Commissioners of National Education in Ireland, on the subject of which I had the honour of addressing you some months ago, and which having now reached a *quasi terminus*, I am enabled duly to report progress, and offer my sincere thanks for the courtesy with which my appeal to you was received.

In my reply to the letter from the Education Office, addressed to the Chief Secretary for Ireland, 4th January, 1861, having corrected misstatements thereof, and repeated the grounds of my complaint, considering that I had discharged my public duty in the matter,—*sat patriæ Priamoque*,—I deemed it not unbecoming me to accept the invitation of said letter, as to "pecuniary acknowledgment of my services."

I, therefore, presented to the Commissioners a claim for the sum of one hundred pounds for these acknowledged "services," —a sum not disproportionate to the payment which I had received from a private publisher for corrections in one of these books—a sum not suggested by the curious history of the "First Book of Arithmetic," which, though current, is scarcely credible,—namely, that it was purchased by the Commissioners, first, from one of their officers, at, of course, a handsome figure; secondly, at a cost of six hundred pounds, from a London house, which happened to have, as we Irish say, an earlier claim than that of the Board's ingenious compiler. And again, that some years subsequently, it was "revised and corrected" by one of the Board's professors, at the expense of another hundred pounds,—of which "revision" I have had elsewhere occasion to give a character. Twice bought, and not well bought; twice revised, and not well revised.

After a considerable delay I was honoured with a letter, 5th April, 1861, from the Education Office, in which, for the first time, my "services" are denied, but my "trouble in the matter" acknowledged, and a "compliment" awarded me. Now, having presented a claim for my "services," not for my "trouble,"—trouble enough, indeed, I had, through a sense of the discourtesy and injustice with which I was treated, in the name of the Commissioners—and being unable, although a professor of Arithmetic, to see clearly the elements of this calculation for said "trouble," I declined accepting any portion of the educational funds for which I could not fill a satisfactory receipt.

I was told in this letter, that the Commissioners "had no idea of employing me" in the correction of the books which I had the honour of bringing under their notice. Now, if words are not to be taken *à la Talleyrand*, I may refer any unsophisticated reader to the letter (No. 1) of the Commissioners to me, 29th November, 1859. I still believe that the Commissioners "had an idea" of so employing me; and I assert most truly, that, in effect, they did so employ me; although it may have been intended that another should enter into my labours. *Sic vos non vobis.*

I would ask why had the Commissioners "no idea" of employing *me*. I had proved myself "the right man in the right place," I say it not with vain boasting, for I am assured that there are thousands of schoolmasters in Ireland, who would be as willing and competent to assist the Board, if enjoying the advantages of my position in this matter. I do not, indeed, know what "ideas" on the subject were entertained at the Education Office; but this I know, that, regarding the Commission, not as private property, but as a great public trust, I felt that I had a public right to call attention to official neglect or inadvertence; a right to offer, respectfully, my services; and a right to expect due acknowledgment for whatever services I might be able to render. And I *now* feel, that the accident of my personal claim connected therewith, does not preclude my right and my duty, still to take an interest in the subject.

Having, in my letter to the Resident Commissioner, stated that the "public interest had been compromised in this matter;" having, in my appeal to the Chief Secretary for Ireland, complained of a "public wrong;" and, having, in my letter, 10th April, 1861, solicited from the Commissioners an investigation, "as of importance to the public interests;" I feel quite assured, that the subject cannot be dismissed from further consideration.

I have the honour to be, Sir, your obedient servant,

R. W. Hely.

APPENDIX, No. 11.

No. 1.—To Mr. R. W. HELY.

Office of National Education,
29th November, 1859.

SIR,—Having laid before the Commissioners of National Education your letter of the 31st ultimo, they direct us to convey to you their thanks for having brought under their notice the subject to which your communication has reference.

The Commissioners are not, at present, prepared to remodel the "First Book of Arithmetic" and the "Key" to the same; but, as regards the correction of any errors in their publications, the Commissioners are always glad to consider suggestions to that effect, provided they are made by competent persons.

With reference to the list of errors contained in your letter, the Commissioners have directed that you be furnished with the *latest* editions of the Arithmetic and Key, and they will be happy to consider any inaccuracies contained therein, which may be pointed out, and to test such corrections as may be suggested.

We are, sir, your obedient servants,

MAURICE CROSS,
JAMES KELLY, } Secretaries.

No. 2.—To the Right Hon. A. MACDONNELL.

32, Essex-street,
24th August, 1860.

SIR,—I beg leave, most respectfully, to solicit your attention, as Resident Commissioner, and that of the other members of the Board of National Education, to the following statement:—

In reply to a communication which I had made to the Board, I received a letter from the Education Office, dated 29th November, 1859, and marked 6973/'59, in which the Commissioners are pleased "to convey to me their thanks for having brought under their notice the subject of my communication, to direct that I be furnished with the *latest* editions of the First Book of Arithmetic and Key," and to say "that they would be happy to consider any inaccuracies contained therein, which may be pointed out, and to test such corrections as may be suggested."

In obedience to the wishes of the Board thus signified, I again made a careful examination of these books, and prepared, at considerable length, a list of errors and inaccuracies contained therein; which list, dated 20th December, 1859, accompanied with some requisite observations, I took to the Education Office, and handed to a gentleman who attended me by desire of Mr. Cross.

I naturally expected to be again honoured with some notice from the Commissioners—acquainting me that my corrections had been "tested"—were found inadmissible—required explanation—or, perhaps—were satisfactory, and adopted with due acknowledgment. But, now, after a suspense of eight months, I learn with astonishment, that a new edition of these books, for 1860, has been issued, and that upwards of 500 corrections have been made therein, solely founded on my suggestions.

Having been treated so discourteously, I hesitate not to assert, that my experience and ability, in this department, are equal to those of any reviser whose services may have been preferred; and that, not only an injustice has been inflicted on me, by ignoring my well-earned claim to the superintendence of the revised edition, but the public interest has, in this matter, been compromised; for I am prepared to show, that the majority of the corrections now made, are not of the best possible style, that some are rather to be called inaccurate alterations than judicious corrections, and that, errors, to which my hurried list did not afford guidance, are still unnoticed.

I am obliged to recollect that, on the occasion of my handing to Mr. Cross my first communication, he slightingly said "that I wanted to be employed, but that these books had been revised lately, and by a professor too." I therefore took some pains, to get copies of the older editions, and was able to remark, in my second letter to the Board, that the so-called revision amounted to this:—removing two or three errors from a long list, and allowing twice as many new ones to creep in.

In conclusion, I beg leave to express my conviction, that the course adopted has not received the sanction of the Board, and that the Commissioners of National Education, to some of whom I have the honour to be personally known, would treat with consideration even humbler efforts than those in which I sought to amend a school-book of the highest importance, by removing errors, inaccuracies, and inelegancies, repeated in annual editions for upwards of twenty years.

I have the honour to remain, sir,

Your obedient servant,

R. W. HELY.

No. 3. To the Right Hon. EDWARD CARDWELL, M.P., Chief Secretary for Ireland.

Endowed School, 32, Essex-street,
Dublin, 15th December, 1860.

SIR,—The more readily I beg leave to solicit your notice of a statement of individual grievance, in as much as this statement has reference to a subject of the highest importance, viz.—the faithful and judicious exercises of the powers entrusted to the Commissioners of National Education in Ireland.

Upwards of a year since I had the honour of addressing the Commissioners' observation to the following purport:

That, having been engaged to supply corrections for a private edition of the National school-books, I had found in a very unsatisfactory state the First Book of Arithmetic, and Key to the same, published by the Commissioners for the use of inexperienced teachers.

That, the First Book of Arithmetic, ill suited to the wants of junior classes, was worthless for the instruction of higher classes, while at the same time, there was not on the Board's catalogue a good school-book of Arithmetic, this department of school business having of late years become of great moment.

That, the style of calculation taught in this book and key was not in any degree superior to that of the works of Voster and Gough, published in this country a century ago; and that errors and inaccuracies, to a great extent, were to be found in even the latest editions of these National school-books.

To these observations I added a brief reference to some inaccuracies and, most respectfully, placed at the disposal of the Board the best services of a lengthened experience.

The annexed printed copy (No. 2) of a letter which, some months subsequently, I felt it necessary to address to the Resident Commissioner, will explain the nature and extent of my complaint in this matter, a complaint which is much less an expression of personal feelings than resentment of a public wrong.

To this letter of remonstrance, written, as will be seen, in respectful terms, the Resident Commissioner has not vouchsafed even the formal acknowledgment of its receipt, and I am, therefore, obliged to appeal to a higher quarter for that redress which I vainly expected from the Commissioners.

I have the honour to be, sir, your obedient servant,

R. W. HELY.

No. 4. To the Right Hon. EDWARD CARDWELL, M.P., Chief Secretary for Ireland.

Office of National Education,
4th January, 1861.

SIR,—With reference to the letter of Mr. R. W. Hely, addressed to you on the 15th ult., and forwarded by Mr. Burke to the Resident Commissioner for information, relative to a claim for certain correc-

tions in the First Book of Arithmetic, submitted by Mr. Hely for the consideration of the Board, in October, 1859.*

We are to acquaint you that Mr. Hely never intimated in any of his communications† to this department, that he was desirous of any pecuniary remuneration—all he seemed to wish for was a recognition of his services—and accordingly, the Commissioners directed an expression of thanks‡ to be conveyed to him, which order was carried out by letter, dated 29th November, 1859.

We are also to state, that if Mr. Hely wish to obtain a pecuniary acknowledgment of his services, and will write to us to that effect, the Commissioners will give his application every consideration.

We beg to enclose Mr. Hely's letter, and have, &c.

MAURICE CROSS, JAMES KELLY, } Secretaries.

No. 5.—To the SECRETARIES, EDUCATION OFFICE.

32, Essex-street, Dublin,
January 31, 1861.

GENTLEMEN,—In reply to a letter of the 4th inst. from the Education Office, addressed to the Chief Secretary for Ireland, a copy of which that right honorable gentleman has been pleased to transmit to me, I beg most respectfully to place before the Commissioners the following observations :—

This letter speaks of a claim as made by me, for corrections submitted to the Board in my communication of October, 1859, but I have not made any such claim. My first communication, of that date, was, I felt, sufficiently rewarded by the answer of 29th November, 1859, conveying to me the thanks of the Commissioners, "for having brought under their notice the subject of my communication."

My second communication, on which I do rest my claim for public service, bears date 20th December, 1859. The Commissioners having, in their reply to my first communication, signified their willingness to consider the corrections of errors and inaccuracies, and having furnished me, therefore, with the latest editions of the two books to which I had made reference, I immediately prepared, for the consideration of the Board, numerous corrections for the First Book of Arithmetic, and for the Key to the same; the result of much attention given to the subject, in anticipation of the wishes of the Board.

This communication, addressed as my former communication, must have come duly under notice, although I did not receive the usual official acknowledgment thereof, nor was it until after the issue of the new edition of these books, for 1860, that I was aware that my corrections had been, in their entirety, adopted by the Board.

I then deemed it my duty to forward to the Board, respectfully, a statement, which, under the circumstances, I thought proper to address, 24th August, 1860, to the Resident Commissioner; and notwithstanding informality, as it may have been, on my part, in so addressing the Board, I still feel, that to such a letter some notice was due by the right honorable gentleman, if it reached his hand, and that, if it did not, it should have been returned to me from the Education Office, with intimation of my error.

As to pecuniary acknowledgment of my services, I now beg leave,—availing myself of the invitation conveyed in the letter of the 4th inst. to the Chief Secretary, to present the Commissioners of National Education a claim for one hundred pounds.

It is, perhaps, unnecessary for me to say that I am precluded from legally demanding any acknowledgment of my services in the correction of these two books from the private publishers who reprint the Board's edition, and that, therefore, I have to look only to the Board for consideration of public services which extend to a far wider circulation than even that of the National schools of Ireland.

I have the honour to be, gentlemen, your obedient servant,

R. W. HELY.

No. 6.—To Mr. R. W. HELY.

Office of National Education,
5th April, 1861.

(FIRST ARITHMETIC.)

SIR,—The Commissioners of National Education having had under consideration your letter of the 31st January, claiming compensation for your trouble in pointing out certain errors in the First Book of Arithmetic—

We are directed to state that the Commissioners had no idea of employing you to correct the work in question; but as they find you took some trouble in the matter, they have awarded you a sum of twenty pounds as a compliment.

We are, sir, &c.

MAURICE CROSS, JAMES KELLY, } Secretaries.

No. 7.—To the SECRETARIES, EDUCATION OFFICE.

32, Essex-street, Dublin,
April 10, 1861.

GENTLEMEN,—In reply to a letter of 5th inst. from the Education Office, I beg leave briefly to say :—

That by their letter of 29th November, 1859, the Commissioners did employ me in the correction of the books which I had the honour of bringing under their notice—viz., the First Book of Arithmetic, and Key to the same.

That my communication of December 20, 1859, conveying the required corrections, was adopted by the Commissioners in its entirety; and that every correction—they being upwards of five hundred—in the edition of these books for 1860, is solely from my suggestion.

That I, most distinctly, made this claim in my statement, 24th August, 1859, to the Resident Commissioner; again in my statement of 15th December, 1859, to the Chief Secretary for Ireland; and again in my letter to the Commissioners of 31st January, 1861.

That I can also refer to one of the Commissioners, who did me the honour of urging me to forward the corrections as invited, and who, very recently, has been pleased to say that the Commissioners never denied my services.

That declining to accept "as a compliment" the sum of twenty pounds, or any other sum, I most earnestly solicit from the Commissioners a thorough investigation of my claim for these services—an investigation which is absolutely necessary, in justice to my professional character, and, at the same time, of considerable importance to the public interests.

I have the honour to be, gentlemen, your obedient servant,

R. W. HELY.

No. 8.—To the SECRETARIES, EDUCATION OFFICE.

32, Essex-street, Dublin,
June 10, 1861.

GENTLEMEN,—I beg leave, most respectfully, to inquire whether a letter addressed by me to the Commissioners, 10th April last, has yet come under notice of the Board.

I have the honour to be, your obedient servant,

R. W. HELY.

* Mr. Hely did not submit to the Board any corrections whatever in his communication of October, 1859.

† Communications are here acknowledged, but Mr. Hely's complaint is, that he did not receive any acknowledgment of his second or third communication to the Board, and was therefore obliged to address the Chief Secretary for Ireland.

‡ See letter No. 5.

APPENDIX, No. 11.

No. 9.—To the SECRETARIES, EDUCATION OFFICE.

32, Essex-street, Dublin,
July 10, 1861.

GENTLEMEN,—I had the honour of addressing to the Commissioners of National Education, a letter, dated 10th April, 1861, and, not having received an official acknowledgment thereof, I addressed to you a letter of inquiry, dated 10th June, 1861, to which, also, I am yet without reply.

Desirous to be respectful in all my communications to the Board, I now beg leave again to inquire whether my said letter, of the 10th April, has reached the Office of Education.

I have the honour to be, your obedient servant,

R. W. HELY.

No. 10.—To Mr. R. W. HELY.

Office of National Education,
15th July, 1861.

SIR,—The Commissioners of National Education, having had before them your letter of the 10th of April, direct us to inform you, that they do not consider they should order any investigation such as is requested by you in this communication. And the Commissioners further direct us to inform you that, under all the circumstances, they consider it to be their duty merely to repeat the offer made by the letter of the 5th of April, 1861.

We are, sir, your obedient servants,

MAURICE CROSS, } Secretaries.
JAMES KELLY, }

APPENDIX, No. 12.

APPENDIX No. XII.

PROGRAMME of PRELIMINARY EXAMINATION for ADMISSION to the ALBERT INSTITUTION, GLASNEVIN.

Conducted by the District Inspectors, on Friday, 29th May, 1868.

[See Question 13265, p. 561—Mr. Baldwin's Evidence.]

The Inspector will please attach this Form to the Examination Papers of each Candidate.

District No.———
Candidates's Name,———
(*To be written in full.*)
Religion,———
School where educated,
Name of Patron,*———
Post Town,———

RESULT OF EXAMINATION.

a. The District Inspectors are to assign the mark for *Reading* only.

b. The exercises are to be forwarded to the Education Office on the day following the examination.

c. The written exercises will be marked at the Education Office.

Time allowed for each subject.	Highest marks obtainable.	Subjects.	Value of Exercises.
A few minutes for each Candidate,	70	Reading: a passage in the Fourth Book of Lessons,	
½ an hour .	60	Penmanship (to be judged from the written papers generally, and from a line of large and a line of small hand), . .	
½ „ .	60	Dictation and Spelling: a few passages sent herewith, . . .	
1 hour, .	60	Grammar, . .	
1 „ .	50	Geography, . .	
1½ „ .	100	Arithmetic, . .	
¾ „ .	40	Book-keeping, . .	
1 „ .	60	Geometry and Mensuration,	
1 „ .	100	Agriculture, . .	
Total, .	600		

Observations (to be made by the Inspector) as to the Candidate's physical capacity for farm labour, and his fitness, generally, for admission to the Albert Institution.

Signature,——— ———District Inspector.

GRAMMAR.

Parse the following sentence:—

1. This little rill that from the springs of yonder grove its current brings, plays on the slope awhile.

2. Give the name of the opposite gender of each of the following words:—*belle, czar, filly, roe, niece, executor.*

3. Write out the positive form of each of the following words:—*first, last, most, next, least.*

4. What distinction would you draw between a principal and an auxiliary verb? Name the auxiliary verbs.

5. What determines the case of the noun or pronoun which answers a question?—Give examples.

6. Correct the following errors, giving in each case the reason for the correction:—

a. Thou who has known his services can aid him.
b. Who will I give them slates to.
c. Rebecca took goodly raiment and put them on Jacob.
d. Pleasure, and not wealth, were his object.

GEOGRAPHY.

1. What is meant by a great circle of the globe? and name four of the most important parallels of latitude generally marked on a map of the world.

2. Name the chief mountain ranges of Europe; give their general directions, and the principal rivers which rise in each.

3. Refer the following to their respective countries, stating what each is:—The Hague, Appenines, Andorra, Hecla, Negropont, Baikal, Auckland, Funen, Tiber, Melbourne, Windermere, New Orleans.

4. Assign to their respective counties the following towns:—Cootehill, Lismore, Holywood, Foynes, Ballinrobe, Lisburn, Clonakilty, Kilbeggan, Carlingford, Omagh, Parsonstown, Granard, Callan and Mountrath,

5. Describe the position of Ireland, and give its area and population; also mention its principal exports, and its mineral productions.

ARITHMETIC.

No credit will be given for an answer unless the work be set out in full.

1. Express in figures seventy millions one thousand and eleven, and divide it by thirty thousand and fifty.

2. Reduce 351,366 inches to miles.

3. Divide $15\frac{4}{9}$ by 12, and add $3\frac{5}{7}$ to the quotient.

4. Find the difference between $9\frac{1}{2}$ guineas and £4·375.

5. Reduce 35A. 3R. 30P. Irish to statute measure, and calculate the rent at £2 4*s.* 8*d.* per statute acre.

6. How much oats at 17*s.* 8*d.* per barrel must I give for 52 barrels of wheat at 27*s.* 6*d.* per barrel so as to gain 6 per cent. by the exchange?

7. A can do a piece of work in 12 days, A and B together in 8 days, in what time would B alone do it?

8. A bankrupt pays 2*s.* 8*d.* in the pound, and the total of his payments amounts to £760 12*s.*; what is his debt?

9. Purchased £25 12*s.* worth of wheat at 36*s.* 6*d.* per barrel, part of which being damaged was lost, for the remainder, which was sold at 20 per cent. profit, I received £28 12*s.*; how many barrels were lost?

GEOMETRY AND MENSURATION.

1. Give Euclid's definition of a plane rectilineal angle and define *opposite* agles, *vertical* angles, *alternate* and *adjacent* angles; also state on what does the magnitude of an angle depend?

* If the Candidate's parent is the applicant, please to state his name and address.

2. Prove that triangles upon equal bases and between the same parallels are equal to one another?

3. What is the area of a field in the form of a trapezium, one of the diagonals measuring 1,868 links, and the perpendiculars to that diagonal from the opposite angles being 946 links and 849 links?

4. The diameter of a circle is 595, what is the side of the circumscribed square?

5. Required the cost of excavating the drains of 4A. 3R., at 4*d.* per cubic yard; the drains being 27 feet apart, 18 inches wide at top, 6 inches at bottom, and 40 inches deep.

BOOK-KEEPING.

1. Explain the uses of the following books: Waste Book, Journal, Ledger.

2. In journalizing repeat the rules for making proper Drs. and Crs.

3. What is meant by "Posting"?

4. How would you enter in the Ledger the following entry:—

M. Nolan, Dr.
To Goods, £50
„ Cash, 70
——120

5. I find on examining my books that £20 worth of Lime sold to William Wilson on the 5th of March, was placed to the account of Richard Joyce. How is the error rectified?

AGRICULTURE.

1. Describe the changes that take place in the decomposition of farmyard manure.

2. Explain the statement that phosphoric acid is the weaker link in the chain of the soil's fertility.

3. In the Norfolk four-course, what is the quantity of phosphoric acid per acre sold off the land in corn?

4. Describe, and state the uses of the implement known as Tenant's grubber.

5. Why is it necessary to introduce a "rack" into the common harrow?

6. State the objects and advantages of the saddle harrow.

7. Give the quantity of seeds required for the following crops:—

Mangold wurzel,
Swede turnip,
Yellow turnip,
Carrots,

8. How would you manage so as to have flax raised once in ten years in the Northumberland five-course rotation?

9. Describe the practice of "crossing" live stock; and name the breed of cattle best adapted for improving, by "crossing," the cattle of this country.

10. What do you consider a good average yield of a milch cow for the twelve months, supposing her to be fairly fed?

APPENDIX, No. 12.

APPENDIX No. XIII.

APPENDIX, No. 13.

EXTRACT from LETTER of E. HORNSBY, Esq., Secretary to Board of Public Works, dated 10th December, 1868.

[See Question 20467, page 889—Mr. De Vere's Evidence.]

The cause of the delay in this case (Kilcornan National school, county Limerick), as well as in some others in the same district, was the neglect of the district clerk of works to furnish the required plan and estimate, notwithstanding repeated reminders.

The Board had, in consequence of these delays, called on him to resign his appointment two years since, but in consideration of the great amount of duty he had to perform, and his previous services under the Board of National Education—from which department he was transferred on this Board, taking over the charge of the buildings connected with it—the Board, at his urgent solicitation, granted him a further trial, at the same time transferring him to a district of lesser extent, which the appointment of an additional district clerk of works enabled them to do.

The Board, however, although he somewhat improved, did not receive the report &c., on the Kilcornan school until the 10th October last, and they have decided that they can no longer retain his services. I have to add that the plan and report on the school in question are at present before the Board of Education since the 3rd instant.

APPENDIX No. XIV.

APPENDIX, No. 14.

RULES and DIRECTIONS for the REGULATION of the GRAMMAR SCHOOL in the TOWN of ELPHIN, in the COUNTY of ROSCOMMON, established in pursuance of the TRUSTS of BISHOP HODSON'S WILL, as settled and approved of by ORDER of the HIGH COURT of CHANCERY in IRELAND, bearing date the 18th day of February, 1867.

[See Question 20868, page 914—Evidence of the Very Rev. Wm. Warburton, D.D., Dean of Elphin.]

1. That a school-house having been erected in the town of Elphin, by and out of the funds of this charity, a school for boys shall be established and carried on in said school-house, for the benefit of the inhabitants of said town and immediate neighbourhood.

2. That pursuant to the directions in the will of Bishop Hodson, the founder of said school, the governing body having the oversight of said school shall be composed of the bishop of the diocese—that is to say, the bishop for the time being of the United Diocese of Kilmore, Elphin, and Ardagh, and of the Dean of Elphin for the time being, and of the several persons for the time being members of the Chapter of the Cathedral Church of Elphin.

3. That the place of meeting of such governing body shall be either the said school-house or the chapter-room of the Cathedral of Elphin, and their meetings shall be either on fixed days or as occasion shall require, according as it may seem right to the aforesaid governors to appoint.

4. That at all meetings the person present highest in ecclesiastical rank shall take the chair, and such chairman shall have a vote as if not in the chair, and in case of equality of votes, shall have a second and casting vote.

5. That except in the cases provided for by the 19th clause, three members of said governing body shall constitute a quorum.

6. That a list of the children admitted into the school shall be kept by the head master, and that such list shall specify the parentage of each child, the time of admission, the age when admitted, and whether such child is educated gratis or not.

7. That the admission of children to said school, and

the terms on which they shall be admitted, shall be in the discretion of said governing body.

8. That in any rules which they shall make as to admission, provision shall be made for the free and gratuitous education of children whose parents are too poor to afford to pay for their education.

9. That the governors may, in their discretion, at any time, remove from the school any child guilty of misconduct, or suffering from infectious disease, or for irregular attendance.

10. That the governors shall have power to fix, and from time to time to vary and regulate the payments to be made for the education of children not educated gratuitously, and the application of such payments.

11. That the governors shall have power to appoint one head master, and if the circumstances of the school shall appear to them at any time to call for a second master, also a second or assistant master, and that the nomination of such masters respectively shall be regulated by the governors, subject, however, to any provisions in that behalf in these rules.

12. That the governors shall have power in their discretion to revoke and deprive of his office any master, provided that the bishop of the diocese shall concur in such removal and deprivation.

13. That the head master shall not receive any child into the said school not admitted by the governors, and shall not receive any payment or recompense for the education of any child admitted to be educated gratis, nor any other payment or recompense for the education of any child than shall be allowed by the governors.

14. That the duties of the head master shall be to teach the children attending the said school spelling, reading, writing, arithmetic, plain geometry, mensuration, English grammar, English history, and if required by the governors, the Greek and Latin languages, to such of the children as they shall from time to time deem likely to be benefited by such instruction, and shall direct to be so instructed, and such other branches of education, including modern languages, as the governing body shall from time to time direct; and that the duties of the assistant master, if one shall be appointed, shall be to assist the head master in his said duties, in such manner and to such extent as shall be directed by the governors.

15. That except during holidays the said school shall be open from half-past nine o'clock in the morning until twelve o'clock, noon, and from half-past twelve o'clock until three o'clock in the afternoon; but it is hereby provided that the governors shall have power, from time to time, to alter the said hours of attendance to any other hours of attendance that shall seem to them more suitable.

16. That in every year there shall be a vacation at Christmas not exceeding three weeks, and a vacation at Midsummer of three weeks, to be fixed from time to time by the governors, with power for the governors to extend the Midsummer vacation for a further period not exceeding one fortnight, and that there shall in addition be allowed as holidays, Good Friday and the days intervening between that day and Thursday in Easter week, and Monday, Tuesday, and Wednesday in Whitsun week; the Queen's birthday, and any other day in the year appointed for a public fast or thanksgiving.

17. That once or oftener in every year an examination of the children attending such school shall be held at such time or times as the governors shall from time to time appoint, and that it shall be lawful for the said governors to confer rewards or prizes on such child or children as shall be deemed deserving at such examinations.

18. That every head master and assistant master shall, on his election and before admission to his office, sign a memorandum to the effect following, that is to say:—"I having been appointed master, or assistant master, as the case may be, of the Grammar School of the town of Elphin, do hereby undertake to perform faithfully and diligently the duties of such office in such manner as the governors shall from time to time appoint; and I undertake not to receive, directly or indirectly, any payment or recompense from any scholar in the said school, other than the stipend authorized by the governors; and I undertake, immediately on my discharge from such office by the said governors, to quit and deliver up to them, or any person or persons to be appointed by them, the school-house, buildings and premises, and all the property belonging to the said school of which I shall or may be in possession as master of the said school; and should I neglect or refuse to deliver up such possession of the said school-house, buildings, premises, and things, or any of them, the said governors may, or any person or persons whom they may appoint, may, without any proceeding at law, or in equity, enter into and upon, and take possession of the same, or so much thereof as possession of, shall not have been given by me as aforesaid. Witness my hand this day of ."

19. That the moiety of the rents of the lands dedicated by Bishop Hodson to the establishment of the said Grammar School, shall be applied by the governors, for the time being, of the said school, and applicable by them to the objects hereinafter specified. In the first place, in payment of the rent, rates, and taxes of the school buildings; and in the next place, in keeping the school buildings insured against loss or damage by fire, to the amount of £600, and in annually painting, keeping in repair and good order the school and other buildings which have been erected; and in the next place, in payment of the salary of the head master, and also of the salary of the assistant master, if a second master shall be employed, and in providing the said school with requisites; and in the last place, in providing rewards and prizes for the children at the said examinations, in conformity with Rule No. 17; and for distribution of the fund for the purposes aforesaid, and the making of any rules in connexion therewith, not less than five governors shall form a quorum, of whom the Lord Bishop of the diocese, for the time being, and the Dean of Elphin shall form two.

20. That an account shall be kept of the annual rents and expenditure of the said school, and deposited in the Chapter-house of the said Dean and Chapter.

21. That it shall be lawful for the governors, if they think it expedient, from time to time, to place the school so established in connexion with the National Board of Education for Ireland, as a non-vested school, so as to obtain thereby the benefit of inspection and assistance in books from said Board, and for that purpose to make any changes in the rules and regulations hereby made which shall be requisite; and it shall also be lawful for the governors, if it shall at any time or times afterwards appear expedient to them so to do, from time to time, to remove said school from connexion with the said Board.

22. That this scheme shall be printed, and a copy thereof given to each governor from time to time, and to every trustee for the time being of the deed constituting the trust.

APPENDIX No. XV.

APPENDIX, No. 15.

LETTER from the Rev. R. M'MORRIS.

[See Question 22079, page 968—Evidence of The Rev. John M'Menamin, P.P.]

Manor Cunningham, Co. Donegal,
Feb. 22nd, 1869.

The Rev. Dr. Wilson.

DEAR SIR,—I have heard with great surprise that it has been testified before the Royal Commission that I, whilst professing to favour a united system of education, got up a new school, thus acting denominationally, when previous to its establishment there were two schools within an Irish mile of each other, and that it was planted between them.

I affirm that this is neither a fair nor a full representation of the case, and I feel aggrieved by it.

I submit the following facts:—

1. There was a large district with a diameter of four Irish miles, in which there was no National school, a want very much felt by the people.

2. An effort was made in 1855 to get up a new school for this destitute district. Anxious parents and friends subscribed freely. A site could not then be obtained, as the proprietors were hostile to the National system. Efforts were repeatedly made for ten years without success.

3. When Sir J. Hill came of age and visited his property in the district in 1865, his tenants told him of this deep anxiety and these repeated efforts. He with generous liberality then offered to build a house, and selected the most suitable site on his property, where four roads meet. All this was done without any consultation of any kind with me, and as far as I know, without any desire to interfere with existing schools.

4. At that time, one of these existing schools referred to in the evidence above quoted was situated (where it had been for at least ten years) at a very *considerable distance* from its present site, and also from our new school. It was *afterwards* removed to a house built at the *very verge* of Sir J. Hill's property, and built *after* he had finished his new house, but before our school could be received by the Board.

5. Opposition was then given to the reception of our new school under the Board. The Local Inspector, himself a Roman Catholic, when he visited the locality to make his report, and examined the whole case, said—"there is room enough for all," and our school was received accordingly.

6. Our new school-house, built by Sir J. Hill, *remains as his property.* I am simply acting by request as local manager. Although I was not consulted about the site, I believe it to be the best that was *available.* The school was very much needed, and has always been well attended, as the subjoined statistics show. I may add, that on two sides of our school the nearest National school is 3¼ and 2½ miles respectively.

7. Presbyterian children in considerable numbers continue to attend the other two schools under *Roman Catholic management* with my *entire approval.*

I am and have always been a *consistent* advocate of united education, and would dread and deprecate the introduction of anything savouring of denominational education.

GLENMAQUIN NATIONAL SCHOOL.—*Manager*, Rev. R. M'MORRIS.

Average, 1866, first quarter after being opened:—
On rolls, 51·
Present, 40·4
Do. 1867, first quarter—On rolls, 66·4
Present, 39·9
Do. 1868, first quarter—On rolls, 53·7
Present, 40·2

I am yours, very truly,
R. M'MORRIS, Presbyterian Minister.

Sworn before me this 23rd February, 1869.
WM. THOMPSON, J.P., City of Derry.

LETTER from the Rev. O. LEITCH.

Letterkenny, February 23rd, 1869.

MY DEAR SIR,—The school recently established by me is situated in Corryvady—distant from this town about three miles—and my reason, respecting which you inquire, for establishing it was simply the educational requirements of the locality. There is and there has been for several years no school of any kind within three or four miles of the townlands from which, I expect, the children attending the new school will be principally drawn. The result is such as might be anticipated. A good many individuals living in the district have grown up to be young men and women without having acquired the rudiments of the commonest education. I am sorry to say instances of the kind are to be met with in families connected with my own congregation. Finding, however, this to be the case, I considered it to be my duty to use every exertion in my power to build a school-house in the place and set a school in operation. I am happy to say I have at length realized my wishes. The school was opened on the first of the present month, and, judging from the attendance, it is a great success. The house is already completely filled, and the children belong to every denomination of Christians living in the district. The numbers on the roll up to the present date are 46, and may thus denominationally be classed—12 Established Church, 14 Roman Catholic, and 20 Presbyterian. You will at once perceive that this is a very good sample of a mixed or non-sectarian school. There is no undue preponderance of any one denomination, but each is fairly represented. I may add, Roman Catholic parents as well as Protestant parents freely subscribed in order to purchase school requisites, such as desks, &c. They also assisted, when called on, in carting the building materials. The necessary funds for the building I provided myself, independent of the people.

Faithfully,
O. LEITCH.

The Rev. Dr. Wilson.

STATEMENT of Rev. R. BEATTIE, CONVOY, of the Number of Children on the Rolls of National Schools and the Number present on —— February, 1869, according to Religious Denomination in National Schools, referred to by the Rev. J. M'MENAMIN in his evidence on the 4th day of December, 1868.

APPENDIX No. XVI.

APPENDIX, No. 16.

REPORT of J. W. KAVANAGH, Esq., (formerly) Head Inspector under the Board of National Education, on Clonmel Model School for the year 1851, referred to in his Evidence—Question 22286, page 976.

THIRD ANNUAL REPORT on the CLONMEL DISTRICT MODEL SCHOOLS, by JAMES W. KAVANAGH, Esq., Head Inspector of National Schools.

Clonmel, April 5th, 1852.

GENTLEMEN,—I have the honour to submit for the information of the Commissioners this, my Third Annual Report, on the Clonmel District Model Schools.

Having, in the Reports for 1849 and 1850, given a detailed statement of the buildings; the accommodation for pupils and for pupil-teachers; the course of instruction and occupation of time in the several departments; the staff of teachers, pupil-teachers, and paid monitresses; the arrangement for religious instruction, and the opinions of the local clergy of all denominations in relation to the practical working thereof; the mixture of social ranks, and of religious denominations in the schools; the rates of school-fees, and the incomes of the teachers; the influence the schools have exercised in improving the efficiency of the several National and other schools in the town and neighbourhood, and in elevating the social position of the teacher; and having in the last Report given a full outline of the entire course of English, mathematical, scientific, and industrial education which we aim at imparting, whenever the accommodation for the pupils shall be properly extended, I shall on this occasion refer to those Reports for this information, and confine my present statement to such points only as are of more especial interest, or such as are necessary to record the progress of the establishment during the past year.

Buildings and School Accommodation.—The schools, from the period of their opening, had an attendance, at least in the boys' and in the girls' schools, far beyond what they were designed to accommodate; and two rooms in the domestic establishment have since been used as additional *temporary* school-rooms. Even this arrangement provides quite insufficient room, and such use is attended with loss of time, interference with discipline, imperfect cleanliness and ventilation, and the rooms being remote from the schools, withdraws the pupils from the central superintendence of the head teachers. In summer 1850 the schools were visited by the Archbishop of Dublin, and on that occasion I had the honour to point out these defects to his Grace, and at his request to forward to him a report on the subject, which report, I was led to understand, his Grace was pleased to recommend to the favourable consideration of the Commissioners for their adoption. The Board's architect and I were then instructed to arrange a meeting at the schools, in order to consider the means of extending them; and after our inspection of the premises, I forwarded my report to the office, and the architect also submitted his plans on the subject. The year 1850 passed on, and the crowded rooms, unenclosed lawn, and unfinished play-grounds still continued; the Commissioners, as I understand, deeming the expense of the proposed plans too great, and desirous to further test their necessity in the permanent success of the schools. From week to week Dr. Clarke, the District Inspector, continued to report the inconvenience felt from the state of the schools and premises; and in November last, Mr. Cross, one of the Board's secretaries, Mr. Darley, architect, and I, went to Clonmel for the purpose of inspecting the designed extension of the buildings, and that Mr. Cross might, from the state of the schools, be able to report to the Commissioners on the propriety of carrying out the proposed plans.

My recommendations respecting the extension of the buildings are—that the boys' school-room be increased to double its present length, and have a class-room added, so as to afford, in both, accommodation to 200 boys; that the girl's room be lengthened, and have a class-room (to serve also as a work-room) added, so as to accommodate 140 girls; that the infants' room remain as it is; that the internal communication between the three schools be closed; that the master's parlour and the study-room be thrown into one school-room for a *Classical* and a senior class, and in the mornings and evenings to serve as a study-room for the pupil-teachers; that a short wing be added to the west of the house, containing a good parlour for the head master, and above, two bed-rooms for him; that his present bed-room, &c., be fitted up, so as to provide dormitories for a total number of sixteen pupil-teachers; that a small sitting-room be furnished for the second master; that the play-grounds be extended, levelled, and completely finished; that the grounds and premises be enclosed by railing, and the lawn tastefully laid out and planted; that a small neat gate-lodge be built in front, and that the field opposite the house be taken and laid out in a neat garden to supply vegetables, &c., to the establishment, and in which the pupil-teachers might occasionally work, both for recreation and instruction. I trust that the Commissioners may be pleased to direct steps to be taken which will insure the completion of these improvements before the close of the present year.

Number and Attendance of Pupils.—In my last Report I stated that the number on the roll in the boys' school had been fixed at 140, and I have now to report that, during the entire year, the average number was 138, the vacations, and a slight falling off in January and December, causing a decrease of two in the year's average; the average number on the roll of the girls' school was ninety-three, and in the infants' school seventy-nine, or a total of 310 as compared with 330 in the year 1850. This exhibits the fixed and permanent character of the schools, and the estimation in which they continue to be held by the parents and the public; and the regularity of the pupils' daily attendance being on the average eighty-three *present* out of every 100 on the rolls, or precisely as in 1850, shows that the rules on this head have been carried out in a similar manner, and with similar results. The per-centage of attendance for each 100 children on the rolls was, in the boys' ninety-five, girls' eighty-five, and infants' school seventy-seven, which must be regarded as remarkably high, especially that

in the boys' school. The following table shows the numbers, &c., at different periods :—

	On Roll 31st Dec., 1849.	On Roll 31st Dec., 1850.	Admitted in 1851.	Struck off in 1851.	On Roll 31st Dec., 1851.	Daily average No. on Roll in 1851.	Daily average attendance in 1851.	Of 100 Pupils on Roll there were in average attendance
Boys' School, .	101	133	184	193	124	138	117½	95·2
Girls' School, .	75	102	90	123	69	93	79	85·
Infants' School,	68	80	63	72	70	79	61	77·2
Total, .	244	315	337	388	263	310	257½	83·

The large number of admissions and discharges chiefly relates to the pupils paying a penny per week, as in default of payment a single week their names are struck off the roll; and should they again apply for re-admission, they must be admitted as *new* pupils, thus increasing the trouble of keeping accounts and swelling the numbers of admissions and discharges in the year. In last report I showed why the numbers on the rolls on the 31st December afford no correct idea of the state of the schools, and I now beg to refer to the *averages for the year* as the true test of their numerical prosperity.

Social Classes and Rates of Payment.—In Appendix A will be found the occupations of the parents of the pupils who were on the school rolls at any time during 1851. This table exhibits a similar mixture of social classes to that referred to in former reports—the children of clergymen, barristers, attorneys, engineers, excise and other public officers, merchants, ex-mayors, shopkeepers, farmers, tradesmen, labourers, &c., in fact every social grade in the town.

The proportions of pupils paying 5*s.* and 2*s.* 6*d.* per quarter, and paying 1*d.* per week, have been maintained in conformity with the scale laid down in last report, the fees for the past year in each school having amounted as follows :—

	Amount of School Fees in 1851.	Head Teachers' salaries, including half fees.	School expenses for 1851.	Amount of School Requisites sold, 1851.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Boys' School, .	70 2 6	*95 1 3		14 10 7½
Girls' School, .	43 10 3	†75 15 1	23 2 1	5 9 9
Infants' School,	19 12 1	†64 16 1		0 14 1½
Total, .	133 4 10	235 12 5	‡23 2 1	20 14 6

It is very gratifying to notice that the amount of school fees here tabulated exceeds that prescribed in the regulations laid down in 1849 by the Commissioners; as taking the average number on the roll of each school, and dividing this number in the proportions assigned to the several rates of payment, the aggregate annual fees should be £130 6*s.*, or about £3 less than the sum actually received. Further, assuming the schools to accommodate 280 pupils, as perhaps designed, the fees received exceed by £18 those which, under the Board's scale, would be received from that number.

Religious Denominations and Religious Instruction.—The same mixture of children of all the religious denominations in Clonmel, as reported on former occasions, continues to attend the model schools, and the same unbroken harmony and good feeling continue to mark their mutual intercourse. During the year the proportions of children of the several communions remained as in 1850, two-thirds Roman Catholics, and one-third Protestants, including members of the Established Church, Presbyterians of the Synod of Ulster, Unitarians, Christian Brethren and Separatists. It has already been explained that the number on the rolls at the *end* of the year is considerably less than the average number on the rolls during the year; so far, however, as the present question is concerned, this difference merely diminishes the absolute numbers of children of each denomination, leaving the *ratio* between them unaltered. The following table exhibits the numbers on the religious instruction rolls of the model schools at the periods set forth :—

Denomination.	Number of Pupils on School Rolls, Dec. 31st,		
	1849.	1850.	1851.
Roman Catholics, . .	182	215	174
Established Church, . .	38	76	63
Presbyterians, . . .	10	9	8
Unitarians, . . .	8 (62)	8 (100)	8 (89)
Christian Brethren, . .	4	4	8
Separatists and Wesleyans, .	2	3	2
	244	315	263

The arrangements entered into by the several clergymen for giving religious instruction continue unaltered since they were made at the opening of the schools. These are, that the first half hour of the first four days of the week shall be devoted to the separate religious instruction of the children in rooms provided for each denomination; and that on Fridays the morning instruction be given by the respective clergymen for one hour to the children of their own communion. The clergymen who unanimously agreed to those arrangements, were the two parish priests of Clonmel, the Very Rev. Dr. Burke, V.G., and Rev. J. Baldwin, Rev. Mr. Crotty, C.C., Rev. John Dill, Presbyterian Minister, and Rev. James Orr, Unitarian Minister; and although not present at the opening of the schools, and not having attended for about a year to take any part in giving religious instruction, the rector, Rev. J. B. Palliser, has, on several occasions, expressed his entire concurrence in the arrangements which he found existing, and to the practical working of which he has since his first visit given most active and zealous co-operation. On Friday morning, Rev. Mr. Palliser, or one of his curates, Rev. Mr. Baldwin, or one or two of his curates, Rev. Mr. Dill, and Rev. Mr. Orr, attend regularly to instruct or examine the children of their several communions, and to ascertain the proficiency made by the children during the previous week's instruction, under the teachers and assistants of their respective persuasions. In addition to their visit on Fridays, all the clergymen are accustomed to visit occasionally at the time of religious instruction on the other mornings, as the teachers, while so engaged, act merely as their deputies, and under their exclusive control and direction. From the opening of the schools, up to the past summer, the Sisters of Charity, from the convent in the parish adjoining that in which the model schools are situated, were accustomed to visit and give religious instruction to the Roman Catholic girls on Fridays; owing, however, to the demands on their time from other duties, they have discontinued their attendance, intimating the cause in a note addressed to Rev. Mr. Baldwin. The progress made by the children in religious instruction, during the past year, is most favourably spoken of by the several clergymen, Rev. Mr. Palliser, Rev. Mr. Baldwin, Rev. Mr. Dill, and Rev. Mr. Orr, all equally testifying the zeal and attention of the teachers, pupil-teachers, and monitresses, in carrying out their instructions on this important head.

[*The following portion contained within* [ ] *was not published by the Commissioners of National Education in their Report for* 1851.]

[And I beg leave to further observe, that at the Roman Catholic Bishop's triennial visitation last July the answering of the Catholic pupils of the model schools, at the examination held in St. Mary's parish, was such as to call forth the marked approbation of his lordship, the Right Rev. Dr. Foran.§

* Exclusive of furnished apartments, fuel, and light, £20 for a servant for general attendance, a small profit on pupil-teachers' board, and an acre and a half of land rent free, in all £150 per annum.

† Including £20 for lodgings.

‡ This includes repairs of premises and several items not especially pertaining to the schools.

§ Rev. Mr. Dill and Rev. Mr. Orr both especially requested of me to express, on their behalf, the assistance they derived from the zeal and attention of Miss Bryant in the daily instruction of the Scripture class of Presbyterian and Unitarian children.

APPENDIX, No. 16.

The question of model schools having been a subject of discussion in a few localities in Ireland, I trust it may not be out of place here to make a few observations on the matter. The objections to model schools consist chiefly of two classes—those opposed to *mixed* or *united* education, and those who, while favourable to, *or at least* would *tolerate* united education, are opposed to the special management of model schools. Although the second class of objectors have used great pains in setting forth the differences between the ordinary National schools and the model schools, it will, I apprehend, eventually be found that their *toleration* of the National system, *so far as it means mixed or united education*, is merely *seeming, and not sincere;* and, therefore, that there is in reality but the one class of objectors to the model schools. It is quite true that the several model schools—both literary and combined literary and agricultural, and whether metropolitan and central, or provincial and local—are under the exclusive management of the Commissioners; but it is equally true that the Commissioners neither exercise nor claim any privilege or authority over these schools beyond that which their rules and regulations grant to the manager of an ordinary National school. When a clergyman, or a landlord, or a committee raises, by subscription or otherwise, one-third of the expense necessary to erect, with the aid of the Government grant, a *vested* National school, or when any of these parties provide a *non-vested* house for the purposes of a National school, few are so unreasonable as to deny the right of the clergyman, or the *landlord*, or the committee to appoint or to remove the teacher, the right to prescribe the course of instruction that shall be followed, or to make the several minor regulations necessary for the maintenance of the school. In the exercise of these rights there is, however, this restriction, and which forms the fundamental principle of the present system of education, that the conscience and religious principles of the parents of the children be honestly and sincerely respected—not only as to religious instruction, *but even as to the use of every book to be used in the secular instruction* of the school. In the ordinary schools not only is the use of NO book published or approved of by the Commissioners *compulsory*, but further, the use of any such books is *prohibited* in any school attended by children whose parents or guardians object to its being so used. These regulations, which have been so often set forth and dwelt upon in the reports of the Board, and which are supposed to be posted up as well as practised in every National school, are those which, *without alteration or modification*, are carried out in the model schools, conducted under the Commissioners as their managers. In some of the model schools the Scripture extracts are read, and in others, as Clonmel, they are not, the parents of most of the children objecting to their use. In the selection of teachers for their model schools, the Commissioners have ever wisely consulted the particular circumstances of each locality, and made the appointment in accordance therewith. In Clonmel the head master is a Roman Catholic, the second master of the Established Church; the mistress of the girls' school a Catholic, of the infants' school a Presbyterian; twelve of the pupil-teachers and paid monitresses are Catholics, two are of the Established Church, and two are Presbyterians. In Dunmanway model school both the head master and the head mistress are Catholics, the second master and the agriculturist being of the Established Church; and in the literary department of the agricultural model schools of Woodstock (Kilkenny), Derrycastle (Tipperary), Tervoe and Mount Trenchard (Limerick), and Farrahy and Glandore (Cork) all the teachers are Roman Catholics, there being scarcely any children of any other persuasion in the neighbourhood. The practice of the Commissioners has been similar throughout Ireland, the appointment of teachers to the several schools under their own management being made, as far as possible, in conformity with the special circumstances of each locality, and twenty years' exercise of their trust in this respect, and the remarkable amount of public confidence that has been bestowed on each of the schools, must, to every one not the slave of prejudice and mistrust, form a presumption of such moral weight as to be fully equal to any legal security that the practice which has been attended with such success will not, while the present National system lasts, be in anywise altered. About 130 of the 160 workhouses of Ireland have their schools in connexion with the National Board, and some few of the county gaols have their schools also receiving aid in books and inspection; and although the Boards of Guardians of the former, and the governors of the latter, too frequently show only a very moderate degree of skill and judgment in the selection of teachers, and in the management of the educational department of those institutions, yet the objectors to the Commissioners' exercise of similar functions in their own few schools—some of the objectors being persons connected with both prisons and workhouses—have never publicly questioned the right of those bodies to act as managers of National schools, almost every one of which is attended by pupils of more than one religious denomination, and therefore *mixed* schools. In the south of Ireland, and in every part of it, there are numbers of liberal landlords who themselves or their agents are managers of National schools, and it is highly creditable to all of them that in the appointment of teachers—and which right they generally reserve to themselves—they invariably act in the same spirit as the Commissioners, selecting those only who, from their religion and general character, would be fit instruments in securing public confidence, both on the part of the parents and of the clergy. This is the policy of the Devonshires, the Landsdownes, the Devons, the Fortescues, the Besboroughs, the Clares, the Corks, the Listowels, Monteagles, and scores of peers, baronets, and men of rank. The objection, if of any weight, which lies against the exercise of managership of a National school on the part of the Commissioners, applies with far greater force to such exercise by mixed bodies constituted like the Boards of Prisons and the Boards of Guardians, and should further be extended to the numbers of benevolent and liberal laymen to whom I have alluded, who have erected schools on their properties, have endowed them liberally, and who manage them in strict accordance with the rules of the Board. This statement should satisfy any unprejudiced mind that the few schools established at the sole expense of the Board within the last five or six years differ in no respect as to their rules and regulations on the questions of religious instruction, books, and appointment of teachers from any schools which now are or were heretofore in connexion with the National system, and that the Commissioners, as managers of those few schools, superintend them with no additional power or privilege beyond those always exercised by individual managers, whether clerical or lay, of whatever creed, or by mixed bodies as committees, Prison Boards, or Boards of Guardians. Being really opposed to united education, and knowing that the model schools, wherever established, have to a greater or less extent secured united education, the parties unfavourable to these schools first urge that they are on a different plan, or conducted under different rules, from the ordinary National schools, to which, under particular circumstances, they state they are not opposed. Then they state that they are a *new feature in the system* altogether; next, that it is the commencement of a scheme to supersede the ordinary schools under local management; and finally, that from the amount of direct Government patronage thus created, they are likely to be made subservient to arbitrary power, and thus peril civil and religious liberty. With the first of these objections I have fully dealt, and the second and third require but a brief statement of facts. From the establishment of the National system the Board have had either in Merrion-street (till 1837) or in Marlborough-street normal and training schools, and those now in operation are the largest of their kind in the world. From the first the Commissioners nominated the professors, teachers, and other officers of these departments, nor has there ever been any complaint on this ground no more than there could be of their right to appoint their secretaries, their inspectors, or their clerks. At these model schools over one-third of the National teachers through Ireland have been trained, and of the seven grades of salaries to them the highest three can be obtained by such teachers only as have passed through the training department in Dublin. So early as 1835, or when the National system had been only three years in operation, the want of preparatory model and training schools had been felt; and the Commissioners, in their second report (dated June, 1835) to Earl Mulgrave, then Lord Lieutenant, set forth *seriatim* replies to seven questions transmitted to them by His Excellency, and to the last of these questions I beg leave to draw attention. "Fifth Query—What extension can be given to the new system of education consistently with the demand for instruction, and with due regard to the preparation necessary for *training schoolmasters*, upon whom reliance can be placed, in respect to competency, character, and discretion; and what amount of funds may be annually expended beneficially by the State for that purpose." After describing the qualifications requisite to form a good and efficient teacher, and having set forth the several professorships which it would be desirable to establish in the Central Training Institution, the Commissioners state—"We are of opinion that in addition to the general training institution, thirty-two district model schools should be established, being a number equal to that of the counties of Ireland; that those model schools should be under the direction of teachers chosen for superior attainments, and receiving superior remuneration to those charged with the general or primary schools; and that hereafter each candidate for admission to the training establishments should undergo a preparatory training in one of them." Further, the Commissioners in the same report submitted an estimate

of the expense of the erection of these thirty-two model schools within two years, as also for their permanent annual support. Thus, it is evident that the local model schools instead of being a new idea, or a new feature in the National system, had from the beginning been the means to which the Commissioners looked, and on which they confidently relied for giving completeness and entirity to their system of training teachers; and it may not be unworthy of notice that one of the first attacks made on the scheme was by the Bishop of Exeter in a speech in the House of Lords a few months after its promulgation; while within two months of the issuing of Lord Stanley's letter, empowering the constitution of the National Board, Dr. Doyle forwarded a circular instructing his clergy to place their schools under the new Board, and in which his lordship states—"The rule which requires that all teachers henceforth to be employed be provided from some model school with a certificate of their competency, will aid us in a work of great difficulty, to wit, that of suppressing hedge schools, and placing youth under the direction of competent teachers, and of those only." The fear that the model schools are only a first step towards gradually superseding schools under local management could not be entertained by any person who understands the object and expense of those establishments, or who has read the Sixteenth or Seventeenth Reports of the Commissioners, in which detailed accounts of the working of six of them are given by the Head Inspectors. Those schools cost the State in their erection about £4,000 each, and for their annual maintenance about £800 each, and anxious as the Commissioners have been for the past seventeen years to establish one in each school district (now forty-four) the demands on their funds have yet enabled them to erect only ten of them, in addition to three others, sites for which have been selected, and the buildings of which are about to be commenced. Perhaps the most remarkable result that has arisen in connexion with some of the model schools, as Clonmel and Dunmanway is, that instead of injuring much less superseding the existing National schools under local management, they have in each case most materially improved them in number of pupils, and in efficiency, as may be seen in the reports on both model schools. The last objection to be noticed is the danger that is apprehended to the preservation and extension of civil liberty from the increased patronage which these situations will throw into the hands of the Government, and which a ministry might use to aid the establishment of arbitrary power. Of the Parliamentary grant of £130,000 the entire expense of those officers receiving above £50 a year, and who are appointed directly by the Board does not amount to £20,000, fully two-thirds of the entire annual grant being given in salaries, and which are under local control. From the establishment of the National system no Government has ever sought to control the appointment of the officers or to interfere with the general proceedings of the Commissioners. In the evidence before the Select Committee of the House of Commons on Education, the late Right Honorable A. R. Blake, a member of the National Board, replies as follows:—"Question 3427.—Does the Board appoint its officers?—It does. 3429. Does the Lord Lieutenant in any degree control the appointments?—Not in the slightest degree. 3433. Would it not be an eligible arrangement that no person should present himself for examination who could not produce certificates of having studied some particular course which should be prescribed by the Board?—Hereafter we expect to have our system so established and conducted that we shall be able to make all the highest appointments from persons already in our service; at present we could not do that. 4120. You do not intend it [promotion] to become a matter of Government patronage?—We do not in general communicate with the Government about anything except where it is necessary to get a change in the plan that may require expense." These extracts not only explain the early, but I also believe the subsequent relation of the Government to the National system, and to the appointments made under it, and further it may be observed that of those that have been promoted from the rank of teacher to situations in the local and the central model schools, and to places on the inspection staff, almost all of them held situations under local patrons through the provinces, and the Commissioners even if so minded, had no opportunity of either knowing or of influencing their political opinions in any respect. Frequent allusion is made to the danger to constitutional liberty from the continental systems of public instruction, whereas the arbitrary systems of education which prevail in some European states are the creation not the cause of these despotic governments, and experience proves that the spread of education even so obtained, gradually contributes to the rise and growth of legitimate freedom. In America, where so great an amount of rational liberty prevails, instead of weakening the connexion between the state and the school, the several states of the great Republic are binding them closer and closer in connexion and mutual dependence, and even in England the opinion generally obtains that the efficiency of the school should form the measure of extension of the suffrage. Having thus noticed the leading objections made by some persons against the model schools, I shall merely state that this is not the place to discuss the *real* question at issue in the controversy, and that to which those objections must give way, namely, *united* education being secured in the model schools should their extension on that ground be necessarily opposed.]

Literary Instruction—Boys' School.—During the past year I visited and examined the boys' school at various times, and although on no occasion able to complete an entire examination of all the classes in all the subjects taught, yet on the whole I was always able to form a correct estimate of the general progress attained in the several branches.* The private examination held during the entire week previous to the public examination in July last, by Dr. Clarke and Mr. Sheehy, District Inspectors, and by myself, enabled us to ascertain the *individual* progress of *every* pupil in the *several* subjects of study, as it was on this examination we awarded the premiums to those pupils whose proficiency and answering were most distinguished. We had reason to feel perfectly satisfied with the general result of the examination, and with the progress which had been made in the several branches during the previous year; and so equal were the attainments of large classes in some of the subjects, that the selection of the best answerer in each was frequently a prolonged and difficult task. It was only within the past year that we were able to form a fifth (or highest) class, so that the classification is now complete, and extends to the most advanced of the Board's class books. The entire 140 boys write on paper; all of them learn grammar, including 119 who can parse; 82 write from dictation; all learn mental arithmetic, including 82 who are in or byond proportion; all learn geography, including 60 who learn globes; 72 learn mensuration and geometry, and about 40 have gone over three books of Euclid; 18 learn book-keeping and also algebra; all learn to sing in parts, and the senior class is acquainted with the principles of music; 56 practice drawing from models; the senior class joins the masters and pupil-teachers in practical surveying in the field, and are also taught the use of the ordinary mathematical instruments in mapping and plotting the actual surveys thus made; and 60 boys of the upper classes are instructed by Dr. Clarke in the principles of natural philosophy, and in their application to the purposes of the arts and manufactures. I beg leave to refer to the accompanying report, by Dr. Clarke, on the subjects which formed the matter of his instruction for the past year, and on the proficiency attained in each; and I would especially request the attention of the Commissioners to the questions put to the pupils of Dr. Clarke's class, at the examination for a silver medal, awarded by him last summer. These questions form but a scanty index either to the extent or to the depth and accuracy of the pupils' acquaintance with the leading branches of physics, of experimental science, or of the application of chemistry, geology, mechanics, &c., to industrial and manufacturing purposes. Whether as to number and extent of scientific subjects of similar character, or as to their practical bearing on the purposes of life, there is no such range of instruction given in *any* school, or even *college* in Ireland; and of this *every* intelligent person who witnesses an examination of the pupils must soon feel satisfied.

Girls' School.—A class in the Girls' Reading Book has been formed within the past year, and the pupils of the two upper classes read the Selections from the British Poets. About 50 girls parse; in arithmetic 35 are learning or have learned proportion; 48 write from dictation; the entire school sing in parts; and the senior classes learn the elementary theory of music; 40 draw from models; all the girls sew, 60 knit, 40 can cut out plain garments and dresses, and are engaged at various branches of embroidery, and in crot-

* The schools are inspected and examined one day in each week by Dr. Clarke, District Inspector.

APPENDIX, No. 16.

chet, rug, Berlin, and other work. The girls', like the boys' school, was examined by me at various times when I visited during the year, but the private examination of the several classes for premiums, afforded me the best opportunity of testing the individual and collective proficiency of the pupils. The result of the examination was on the whole quite satisfactory, and afforded proof of successful industry and zeal, both on the part of teachers and pupils, during the previous year.

Infants' School.—The range of subjects here being limited, required only little formal examination, and on reading, spelling, writing, tables, and geography chiefly. In natural history and other subjects, the children show great general intelligence; and in singing, marching, and bodily exercises, it is most gratifying to witness the success that has attended Miss Bryant's training of the little ones. Nor are the more grown children confined to lessons suited only to mere infants, as many of them read with fluency, write fairly, and their minds undergo such active development, that on being transferred at the proper age to either the boys' or to the girls' school, they soon lead their class-fellows in all the branches of instruction.

Public Examination.—The annual public examination of the three schools was held by Dr. Clarke and myself, on the 30th and 31st July; Messrs. Graham, Doheney, and Sheehy, District Inspectors of schools, being also present. The school-rooms being too small, and wholly unsuited to accommodate the *public* on such an occasion, were most inconveniently crowded, although every precaution was taken to afford the greatest amount of room; and for this purpose only the single class under examination was allowed into the room at once. The attendance of the clergy, gentry, corporation, mercantile classes, and parents of the children, was even more numerous than in 1850, and numbers remained in the halls in the hope that when changing from one school-room to another they might secure a place so as to hear the examination. Many persons came from Waterford to attend the examination, amongst whom were Dean Hoare, and several Quakers. Amongst those present were Lady Osborne, Newtownanner, and friends; his Worship the Mayor of Clonmel; Lieut.-Col. and Mrs. Phipps and family; Percy Gough, esq., J.P.; the Hon. Mr. Gough; Dean Hoare, Waterford; Rev. J. B. Palliser, rector of Clonmel; Rev. John Baldwin, P.P., St. Mary's; Rev. John Dill, Presbyterian Minister; Rev. James Orr, Unitarian Minister; Rev. Mr. Meany, C.C.; Rev. J. Power, C.C.; Alderman Hackett, J.P.; Alderman Phelan, J.P.; Burrows Kelly, esq., Barrister; W. L. Hackett, esq., Barrister; Dr. Flynn, Resident Physician to the Lunatic Asylum; Capt. Hemsworth, County Inspector of police; Dr. Scully, Physician to the Workhouse; Dr. Shiell, Physician to the County Gaol; Mr. Jones, County Surveyor; Barclay Clibborn, esq.; W. Davis, esq.; Messrs. Grubb, &c., &c. A full list of the names of those who attended would include a transcript of the leading professional men, public officers, and the mercantile classes in Clonmel without distinction of creed or of politics. The examinations lasted two days, and from 11 to 5 o'clock on each day—the boys' school occupying one day, and the girls' and infants' school the chief part of the other. Recitation from the Selections of the British Poets, &c., mental arithmetic, geography, and mensuration, formed the chief of the ordinary school subjects upon which the boys were examined. Their penmanship, including their book-keeping exercises, was inspected; their progress in drawing from models was witnessed in their examination on the principles of perspective by the drawing master, and from the number of well executed subjects drawn by the boys, and which were hung round the walls; maps, and computations of actual surveys, made on portions of property in the neighbourhood, were also exhibited, and were much admired; and besides the part-singing at various times during the two days by the boys and girls, the singing master examined the former on the leading principles of music. It was explained to the audience that a private examination of the pupils had been held, in order to ascertain the most distinguished in each class, with a view to present them with premiums, but that beyond this no special preparation to any extent had been made for the public examination; and further, the clergymen and others were invited to name, within the proficiency of each class, any branch of the subject upon which they desired that the boys should be examined. The visitors appeared highly pleased with the answering and attainments of the boys in all the subjects which the short time permitted us to enter on, and a more cheerful and gratifying scene could scarcely be imagined than the bright countenances and requited looks of the parents as their children or relations warmed in the intellectual struggles with their class-fellows. The examination of Dr. Clarke's class excited the liveliest interest; and in order to exhibit the thorough knowledge of the boys, copies of a programme of the various branches of natural philosophy, chemistry, geology, and of manufacturing industry, which had been studied within the year, were put into the hands of several of the visitors, and they selected therefrom those that they desired as subjects for examination. Rev. Mr. Palliser, Colonel Phipps, and others, successively selected the manufacture of glass, the steam-engine, the barometer, geology, &c.; and with the small working steam-engine, the working model engine, and the sectional models, the boys gave a thorough exposition of the important subject of the steam-engine; and similarly from first-rate instruments, models, geological and mineral specimens, raw materials and their manufactured products, each subject named was examined on by Dr. Clarke, the boys illustrating their answers from the objects before them when necessary. To prevent misapprehension and disappointment, I explained to the audience that this was the only model school in Ireland in which such instruction was given; and that although the Commissioners give a small grant to aid it, the splendid collection of instruments, specimens, &c., with which they were then surrounded, is the private property of Dr. Clarke, and that this instruction has been given chiefly after school hours, and at times snatched by him from the ordinary and toilsome duties of his situation as Inspector of schools in one of the largest districts in Ireland; and further, that surprised and gratified as the parents and public were with the results of Dr. Clarke's disinterested exertions for the young people of Clonmel, there is at present no security for a continuance of such instruction to them. This explanation drew forth an animated conversation, in which some of the principal visitors stated that persons in other towns who had read the reports on the Clonmel Model Schools certainly expected that, should their localities be favoured with an extension of similar institutions to them, they would regard the scheme of education as wholly incomplete without Dr. Clarke's instruction as a prominent branch in it; and they urged the utility of extending such practical and industrial knowledge to all the model schools.

In the girls' school the public examination was quite as satisfactory to its extent as in the boys' school. The girls read much better, write better, and, all circumstances considered, exhibit in other branches as gratifying proficiency as the boys. Many of them show a decided taste for drawing, and some of their productions were greatly admired. Their plain and fancy needlework, knitting, &c., were laid out in a separate room, and contained a very varied assortment of elegant specimens of skill and finish in the several departments, and the execution of which was greatly complimented by the ladies who were present. Lady Osborne, assisted by a jury of ladies, whose counsel she invited, after careful examination of the work, pronounced the specimens in the various branches which, from their superiority, deserved premiums. In addition to arithmetic, geography, grammar, &c., the singing of the girls afforded much gratification; and all the senior classes, and the monitresses, are able to sing in parts any ordinary melody, or piece of music, at sight.

The examination of the infants excited much public

interest. Their recitation of suitable poetic pieces, their answering in geography, natural history, and on subjects of general information derived from the lessons on objects which are given, could not fail to excite the gratification of the parents and the public. The cheerful and happy faces of the children; the extreme neatness and cleanliness of their persons and dresses; their lively songs and orderly and spirited march, quite astonished those who had for the first time visited; and whether seen in the gallery at lesson, or in the play-ground at their varied amusements, it would be difficult to imagine a scene on earth more suggestive of unalloyed human happiness.

At the close of each day, after the examinations, the boys, girls, and infants, all assembled in one of the play-grounds, and for some minutes the boys went through some marching and other exercises in presence of the visitors. Under the direction of Mr. Washington, the senior pupils sung a selection of appropriate airs from the National melodies and other sources, and the proceedings terminated by all the pupils singing the anthem, "God save the Queen." Much credit is due to Mr. Washington for his success, not merely in teaching his singing classes, but also for the efficient assistance rendered by him to the head master in the discipline and order required during the days of the examination.

Premiums.—The Commissioners granted £10 last year towards premiums for the most deserving pupils, and these consisted chiefly of books, work-boxes, &c. The books were chiefly of a scientific character, and were submitted for the approval of the clergymen, before distribution. Each book contained a printed label, on which were set forth the name of the pupil, the subject for which it was awarded, and the names of the examiners, with their seals affixed. As a more portable testimonial, and one which hereafter may be used as a valuable recommendation of a boy through life, we also presented a handsome parchment certificate of similar character to each boy or girl who obtained a book, work-box, &c.; and as frequently there was only a slight shade of merit between the best and the second best in a class, we awarded one of these as a certificate of honour to the latter. There were also presented by Dr. Clarke and myself two very handsome silver medals to the two boys who had most distinguished themselves in their studies. At the close of the proceedings on the second day, the list of successful candidates in the three schools was read before the public, and as the several parties presented themselves they were greeted with the warm and loud applause of the audience and of their school-fellows.

From the late hour, and the room being distressingly crowded, it would be impossible to go through the ceremony of presenting the premiums to all; Lady Osborne, however, was pleased to kindly undertake some of the duty, and, prefaced by a short complimentary address to each pupil, her ladyship invested the two boys with the silver medals, and also presented two of the girls with very handsome work-boxes. Next day the remainder of the premiums were presented to the pupils by the Rev. Mr. Baldwin, P.P., and the Rev. Mr. Orr, a very large number of the parents being in attendance.

Pupil-Teachers and Paid Monitresses.—The course of studies, occupation of time, dietary, domestic life, general studies, and number of the pupil teachers continue the same as reported on former occasions. We have had some difficulty in finding candidates fully qualified in every respect to fill the vacancies in the pupil-teacherships according as these occur. Up to this date we have had nineteen pupil-teachers in training, including eight who are at present in the establishment completing their term. Of the eleven who have been trained two (Protestants) have been appoint second masters in the model schools in Clonmel and Dunmanway, their places being worth £50 a year; two are on the Special Class in the Central Training Establishment, and are likely to get charge of superior schools; two are masters of National schools in the town (convenient to the model school), and are in the receipt of incomes of £50 and £35; four others are in charge of good National schools; and the eleventh, or remaining young man, emigrated with his father, who was also a National teacher. Thus it appears that ten of the eleven are in the public service, and all of them are most favourably reported on, both by the managers and the Inspectors, for their good conduct and general efficiency. Of the eight at present in training six are Roman Catholics, one of the Established Church, and one is a Presbyterian; all were pupils in National schools; two were paid monitors, and six were pupils in the model school itself. Owing to the poverty of the country the pupils seldom remain at the ordinary schools to such an age, or till they are so advanced, as to afford a suitable class from which to select promising paid monitors. This circumstance obliges the District Inspectors to appoint lads who are in too many cases *far below the prescribed attainments*, and thus very few of them turn out to be of qualifications or capacity which would warrant us in nominating them to the vacant pupil-teacherships, as was primarily intended. This paucity of suitable candidates must soon become embarrassing unless steps are taken to provide a remedy; and already the result is that in Clonmel the brothers and sons of medical men, the grandsons of clergymen, the sons and daughters of comfortable shopkeepers and higher mechanics, are the principal candidates for the pupil-teacherships and monitorships in the model schools. A continuance of this state of things would give the model schools an isolated and narrow character, instead of having them centres upon which all the schools of the district would be affiliated; and instead of drawing into them the chief teaching capacity of the latter, and returning it back to the same sources, improved and cultivated for the general good, would limit the supply of candidate teachers to the pupils of the model schools themselves; and to not even the entire of these, but to those alone whose circumstances would enable them to remain at school to the age of sixteen years, or above it. This would practically exclude the humble millions from the promotion afforded under the National system, and throw it almost exclusively into the hands of those in more affluent station; but what is of equal importance, it would deprive the nation of the talent, virtue, and ability which numbers amongst these millions would assuredly supply to the ranks of the teachers. It must be a matter of deep gratification to the Commissioners to learn, that while three years ago the three National schools in Clonmel were attended by only the very humblest social grade in the town, and not one of whom paid a farthing for their education, that now, *through the influence of the model schools alone*, the social position of teachers and the character of the National system are so raised that parents in some of the highest stations in the town not only send their children to the model and other National schools, but that many of them even seek for the lowest situations in them for those children. Intended, however, for the education of the millions, the National schoolmaster should be *mainly taken from those millions*, but be the best of his class and order; and it is now for the Board to consider how far the altered and depressed state of the country have tended, in the absence of some new provision to render such selection difficult, if not impossible.

The proficiency of the pupil-teachers in their studies, and their conduct and attention during the year, were highly satisfactory; and their respective clergymen have several times spoken to me in the most favourable manner of their attention to their religious duties, and of the efficient aid they have given them in imparting religious instruction in the schools. Their health has been also remarkably good during the period.

Of the eight paid monitresses all have been pupils in the schools; six are Roman Catholics, one of the Established Church, and one a Presbyterian. Thirteen only, including those now in office, have been appointed from the opening of the schools; and of the five who left one is in charge of an important National school, under the Right Rev. Dr. Delany, in the city of Cork;

APPENDIX, No. 16.

one is in a National school in this district; one had to join her brother as housekeeper; one emigrated with her family; and one is assisting in her father's National school. According as their four years of office expire, or earlier if fully grown, we shall have no difficulty in providing them with situations in schools, as the managers evince a great desire to secure the services of persons so trained. The two female teachers report favourably of the conduct and attention of the monitresses, and their proficiency in their course of study is satisfactory.

Extern Candidate Teachers.—From the opening of the schools we have trained and instructed seven very respectable young women, who were admitted as candidates at the request and on the recommendation of several clergymen. They cost the Commissioners nothing, being merely allowed to witness the mode of conducting the girls' and infants' schools; and when sufficiently qualified, were given the charge of classes under the direction of the teachers. Six of the seven have been provided with situations in good National schools, two of them being at present in training in Dublin, and the seventh will soon get an appointment to the charge of a school. These young persons are giving the fullest satisfaction to the managers and to the Inspectors; and without a shilling expense to the State, six respectable teachers have been provided for National schools. Three young men who had been extern candidates have also got charge of National schools.

Visitors.—The number of visitors to the model schools during the year was very considerable, and their reports of the school highly satisfactory. Amongst some of those who visited may be mentioned—Lady Osborne, the Right Hon. W. F. F. Tighe, Lieutenant of Kilkenny; Bernal Osborne, esq., M.P.; N. V. Maher, esq., M.P.; A. O'Flaherty, esq., M.P.; Francis Scully, esq., M.P.; John Bagwell, esq., D.L.; R. Musgrave, esq., D.L.; Stephen Moore, esq., D.L.; Dr. Mullock, Roman Catholic Bishop, Newfoundland; Sir Thomas Deane, Rev. Messrs. Neligan, Clemenger, Alexander, &c.; Charles Bianconi, esq.; Stewart Blacker, esq.; numerous bodies of Quakers from England, Waterford, &c. Mr. Cross, one of the secretaries to the Commissioners, visited in November last, and heard several classes examined in the boys' school, and also inspected the other schools, the domestic establishment, and the premises generally. He appeared to be greatly pleased with his visit, and complimented the teachers on the state of their schools.

Influence of the Clonmel Model Schools on the state of Education.—During the year 1851 I visited the cities of Limerick, Waterford, and Kilkenny with a view to assist in the selection of a site for a model school in each; and the most active and influential of the local parties in these cities assured me that it was the reports of the remarkable success of the Clonmel model schools which mainly led to their desire to secure similar advantages for their own localities. The adequacy of the National system to the wants of the middle and burgher classes, has been tested in giving a higher and more practical education to their children; and if the Commissioners be pleased to add a *classical* branch to their present schools in Clonmel, it will give completeness to the scheme, and be competent to prepare young men to enter schools and colleges of a higher character. Several of the leading men in the town have spoken to me on the subject, and as the increased school-fees arising from the addition of such a branch would nearly afford a good salary to the teacher, the expense to the Board would be very trifling.

Attracted by the success of the model schools, to which they are frequent visitors, the Society of Friends or Quakers in Clonmel have spread through their reports to the members of their community in England and Ireland such a spirit for educational inquiry that numbers of their body have specially visited the town in order to witness the mode in which the schools are conducted. At their request I visited their large boarding-school for boys in Waterford, and at the desire of the committee of the establishment, the teachers have since spent some time in observing the system pursued in Clonmel. I know of no body of men in the country that evinces a higher desire to promote education than several of the Quakers in Clonmel, and a new school for the young ladies of their community built, but not yet opened in the town, is likely under their superintendence to become one of the first private schools in which the National system, so far as its books, improved methods of teaching, &c., are concerned, will be practically adopted. Some of the pupil-teachers of the model school who are now in charge of National schools in the town are employed as private tutors in the families of Quakers.

It may be necessary to repeat what was before stated in former reports that the borough of Clonmel, with a population of 13,505 persons, has extensive schools, with four spacious rooms conducted by the Christian Brothers, large schools for infant and grown girls under the Sister of Charity, these being attended by none but Roman Catholics; Protestant parochial schools for boys, girls, and infants under the rector's superintendence; a small school for girls, founded by a Miss Grubb, and which, with the rector's schools, are attended almost exclusively by Protestants; an endowed classical school, and two private classical schools; and two private schools for girls able to pay moderate school-fees. Of National schools there are two for boys under Rev. Mr. Baldwin's patronage, and taught by two young men who had been pupil-teachers in the model schools; and a girls' school, with two spacious rooms, conducted by the ladies of the Presentation Convent, which, as well as the two boys' schools, are in Rev. Mr. Baldwin's parish, and quite convenient to the model schools. In the eastern side of the town there are two National schools, a day and an evening, held in the Mechanics' Institution, and which were called into existence by the public attention which the model schools caused to be given to education. The day school is attended by about ninety boys, and like the model schools, these include every grade from the public officer or medical man, with an income of £300 a year, to the son of the day-labourer. The rates of payment are 5*s.* or 2*s.* 6*d.* per quarter, or 1*d.* per week, and the fees last year amounted to £20. Of the ninety boys sixty-four are Roman Catholics, twenty of the Established Church, two Presbyterians, and four Baptists. The evening school is attended by fifty-eight pupils, including policemen, clerks, tradesmen, apprentices, &c., who are employed during the day; and like the day-school pupils, they all pay moderate rates for their tuition, and they include a similar union of different religious denominations. Here, then, are three schools, boys', girls', and infants', opened under the Commissioners in 1849, in a town appearing to already abound with educational institutions; these schools are at once not merely filled, but crowded; and in addition two other National schools are opened, and these also secure a numerous attendance. One shilling was not paid for tuition in a single National or other public school in the town, *united* education was unknown, and the attempt to secure the attendance of children of different social grades in the same school was treated as perfectly Utopian. Including the model schools, of the eight National schools in the town, five are as perfect types of *united* education, *both as to creeds and to classes*, as the Commissioners could desire; and six of the eight are pay schools, with a receipt from school-fees of close on £200 a year; one of the two free schools being under nuns, who, from their principles, could not accept any fee for tuition.

The workhouse National school has partaken of the awakened educational spirit, and the Guardians evince an earnest desire to have it one of the most efficient of its kind in Ireland. They have lately got a female teacher from the model school in Dublin; one of the assistant schoolmasters had been a pupil-teacher in Clonmel: and over the industrial department they have placed an agriculturist from the model farm, Glasnevin.

Nor are the National schools the only ones that have been improved by the attention drawn to the model schools. The habits of order, punctuality and regu-

larity of attendance, readiness to purchase a supply of books, personal cleanliness, payment of fees, &c., which have been attained, prove to the managers of other schools, that results such as were deemed impossible, may be attempted; and that while the fullest opportunities for education should be thrown open to the poor, both parents and children will find that being obliged to exercise a moderate degree of forethought and self-denial in overcoming these obstacles, will eventually prove the best training for their children and themselves. As stated in my last report, we have never allowed any spirit of hostility or antagonism to associate itself with the model schools in relation to the denominational schools in the town; we have had the Sisters of Charity aiding in giving religious instruction; the Protestant rector sends one of his teachers to the model schools to be trained; and the Christian Brothers, both of Clonmel and other towns, have been cordially welcomed as visitors.

All the teachers, without exception, have given us the highest satisfaction in the discharge of their several duties; and during the year nothing occurred to disturb the harmony and good feeling between them.

To the several clergymen, Rev. Mr. Palliser, Rev. Mr. Baldwin, Rev. Mr. Dill, and Rev. Mr. Orr, I beg to tender my most sincere gratitude for the kind interest they have manifested in the general welfare of the schools, and especially for the regularity of their attendance in giving, or in directing, the religious instruction of the children of their respective communions.

I have the honour to remain, Gentlemen, your obedient servant,

JAMES W. KAVANAGH, Head Inspector.

The Secretaries, Education Office, Dublin.

APPENDIX, No. 17.

UNPUBLISHED PORTION of Mr. KEENAN'S REPORT for the Year 1858, with the MINUTES of BOARD, &c., relative to same.

[Referred to in the Evidence of the Right Hon. A. Macdonnell, question 23807, page 1061, and in the evidence of W. H. Newell, esq., LL.D., question 24633, page 1103, and question 24732, page 1107.]

1. Extract (unpublished) from General Report of P. J. Keenan, esq., for the year 1858, relative to the inadequacy of the existing Training Department for the wants of the country, and proposing the addition of training departments to the district model schools, and the establishment of non-vested model schools, as means towards rectifying the deficiency.

2. Also minute of Board thereon.

Training.—The only branch of the National system which is really inadequate to the wants of the country, is that recognised as the Training Department, and of all the agencies in operation in the system, this department is, perhaps, by far the most vital and important.

Of the 1,025 teachers in my circuit, only 60 per cent. of the masters, and 49·3 per cent. of the mistresses have been trained. A large number of unprepared, and, in many instances, poorly qualified persons are therefore in charge of schools. For the supply of trained teachers we are dependent upon one normal establishment, which is plainly incommensurate to the wants of between five and six thousand schools. It may be said that the model schools are so many training schools, producing every year large numbers of skilful masters and mistresses, but the fact is, that we profess to prepare only monitors and pupil-teachers in these institutions. In some of the model schools the monitors and pupil-teachers attain to a high order of skill and education, but training in the strict and comprehensive sense of the term is not attempted. I am of opinion, however, that it ought. I think that each of our model schools ought to be a training school, an institution in which a person could receive the philosophical and professional training requisite to make him an accomplished teacher. The minor object of training pupil-teachers and monitors, I would hand over entirely, as is done in England and other countries, to the masters and mistresses of good ordinary National schools. Nor would I confine the training of teachers to institutions belonging exclusively to the State, and wholly governed or managed by the Commissioners.

Perhaps I may be permitted to advance a reason or two for entertaining this view. In the first place, the model schools are anything but equally distributed over the face of the country; and experience shows that their influence does not travel much beyond the limits of the districts in which they are situated. For instance, there are at present, in my circuit of ten districts, *thirty-nine* teachers who had been pupil-teachers or monitors in model schools, and thirty-one of them are employed in the only districts, Trim and Bailieboro' in which there are model schools, whilst the remote districts of Westport, Swineford, and Roscommon, having 231 schools in them, are without a single ex-pupil-teacher or monitor of a model school. It is plain that besides the inequality of their distribution, the number of existing model schools is wholly inadequate to the wants of the country. I would, therefore, leave it to private enterprise to extend the number of such institutions, to establish them wherever philanthropy would suggest or local circumstances show, that they might be required. By opening up in this manner the model school system, the field of their development would be widened, and their usefulness and efficiency materially promoted. The literature of education would also, I conceive, derive incalculable advantage from the adoption of this plan. Public officials, especially in Ireland, and under such a system as ours, are scarcely at liberty to enter upon the speculative and debatable questions involved in the discussion of the science of education. The managers of non-vested model schools would suffer from no such embarrassments, and, from the competition which local enterprizes would doubtlessly inspire, an extensive and valuable literature—reports, essays, and school manuals might naturally be expected to emanate.

The details of the practical working of the scheme could be easily regulated.

In the district model schools there would be very little occasion for a change of arrangements. Additional dormitories, &c., would have to be provided, so as to accommodate eighteen or twenty students in each school. The only increase to the existing staff of officers which it would be necessary to make would be the appointment in each school of a training master, who should also be lecturer on the principal branches of science and literature, and be head of the whole institution. The scholarships or places should, except in rare cases, be open as prizes to monitors who would have completed their period of service in ordinary National schools. The course of training should extend to three years, and for each year there should be a clearly defined amount of business to be performed. The district model schools alone would, I estimate, produce about thirty fully trained teachers annually.

In respect to the constitution of the non-vested model schools, I would suggest a very simple code of regulations. As in the case of an ordinary National school, a non-vested model school should, during school hours, be open to children of all persuasions, and proselytism in any form should be rendered impossible; but the boarding and lodging of the students, being a private undertaking, might be conducted on whatever principle and discipline, moral and religious, the promoters of the school might choose to adopt. To obtain for a school the rank of a "non-vested model school" it should be only necessary to show that its resources

APPENDIX, No. 17.

would be equal to the task of training up teachers; that its attendance, mechanical appliances, and organization would be ample enough and complete enough to afford the students opportunities of practising the art of teaching; that its conductors would have the requisite scholarship and skill to instruct the students; and that suitable accommodation should exist for the lodging and boarding of the inmates. The minimum number of students to constitute a non-vested model school might be fixed at eighteen or twenty, and should the number fall below the minimum no recognition should be made of the establishment beyond that of any ordinary National school. An examination of the students should be held once a year, and a grant of some fixed sum, by way of reimbursement to the superiors of the school, should be made for each student whose answering would be satisfactory. The grant for each student might correspond in amount to the sum expended on a student in one of our own model schools, which would be about £20. For very superior merit I would, however, add to the grant a few pounds available to the student himself. In concluding my observations on this important suggestion, I beg to urge its adoption by the Commissioners on the double ground of creating a stimulus to thought and action in the working out of the practical details of education, and of supplying a great want, which, owing to our inadequate means of training teachers, would otherwise long remain an imperfection in the National system.

EXTRACT from the MINUTES of the BOARD of NATIONAL EDUCATION, dated 2nd December, 1859.

Present:— Right Hon. M. Brady, Lord Chancellor; Marquis of Kildare; Sir T. N. Redington, K.C.B.; Robert Andrews, Esq.; James Gibson, Esq.; Right Hon. J. Hatchell; Right Hon. A. Macdonnell.

The Secretary lays before the Commissioners Mr. Keenan's report, proposed to be included in the Appendix to the Twenty-fifth Report, and calls attention to the passage at pages 183-4, designated "training."

Ordered—That the passage read be expunged, and that Mr. Thom be authorized to cancel the sheet in which it is contained, it appearing to the Commissioners that the plan proposed by Mr. Keenan for the establishment of *non-vested* model schools involves an organic change in the system.

The Commissioners also decline to sanction Mr. Keenan's further proposal that the present district model schools should be altered in their constitution, so as to serve as training schools for National teachers in addition to the other objects they were designed to carry out.

APPENDIX, No. 18.

APPENDIX No. XVIII.

[See Mr. Kavanagh's evidence, questions 12205–12210, page 510.]

CORRESPONDENCE between ARCHDEACON STOPFORD, and JAMES W. KAVANAGH, Esq., in *The Morning News*, in reference to ARCHDEACON STOPFORD'S PAMPHLET upon "THE CATHOLIC CASE STATED."

To the Venerable EDWARD A. STOPFORD, Protestant Archdeacon of Meath.

VERY REV. SIR,—That you should come to the rescue of the National system, in its present hour of need, does not surprise me. An active propagandist to proselytize Catholics, you now see, clearly, that no scheme yet devised, for this purpose, in Ireland, has produced such hopeful results, as the National system. Therefore, you not only warn the Protestant clergy, against aiding in its overthrow, but you entreat those opposed to it, to reconsider whether the National system may not be made more effective than any other agency, in diffusing a knowledge of the Protestant Scriptures, amongst Catholics.

Your letter to the Right Hon. A. Macdonnell, in reply to "The Catholic Case Stated," opens with the following passage:—"Mr. James Kavanagh's book on National Education contains a misrepresentation of transactions between me and the Board of Education in Ireland, which I feel called on, publicly, to correct. I refer to the explanation of the Rule on which the question turned, whether a patron was *bound* himself to *remove children from religious instruction*, or only *to permit parents to withdraw them.*" Now, sir, while declaring that I do not believe you would write that which you knew to be false, I must state that, as you had my book before you, I am wholly unable to account for the serious charge of misrepresentation here made. You have not even followed up the charge, by a specific statement of the precise nature of the alleged misrepresentation, still less have you proved that any exists. In the many charges which for years you yourself brought against the Commissioners, you always extended to them the advantage of a clear statement, and, on many grounds, I claim, as my right, the same treatment, in this your *first* charge against me.

The matter of alleged misrepresentation is hastily slurred over, and your pamphlet, sir, contains many statements which must damage not only the tottering institution which you now support, but it cannot advance your own reputation. At page 21, you state:—"In Mr. Kavanagh's present position towards the Board, the exhibition of personal feeling can only weaken his statements. This mistake should have been corrected in the revision. The 'duplicity, untruth, and dishonesty, on the part of the authorities in Marlborough-street' (p. 117), . . . cannot have much weight with any who have been in communication 'with your Board, and with its officers.'" Now, sir, you have unfairly garbled this extract, as it is "*evidences*"—official, documentary *proofs*—of those vices that are expressly referred to, in the note from which you quote. I there advance no charge that I have not proved, and proved apart altogether from my own testimony. One other witness I shall call to sustain the charges—one who, when he gave his evidence, had, for some time, been in active correspondence with the Board; and I now leave the readers of your letters to the Resident Commissioner to determine what weight, sir, is to be attached to the testimony of the new witness. This gentleman, son to a Privy Councillor, and to a Peer by position, after minute and careful examination of the rules, reports, and working of the National system, published the result of his investigation, in three separate pamphlets—one, a report to his own father, a Most Rev. prelate; one, a letter to the Lord Lieutenant; and one, correspondence with the National Board. In each of these pamphlets, the gravest charges are preferred against the Commissioners: and, on the occasion of his applying for aid to a National school, a *special* meeting was called to consider this strange proceeding, when the Board conveyed to that gentleman the indignant reply, from which the following extract is copied:—

"Education Office, 29th March, 1845.

"SIR,—Your Letter affords ground, in one part of it, for inferring, or at least for suspecting, that it would be, in your opinion, not altogether unjustifiable for a person to receive a grant from the Board, while *concealing* his objection to some of the Rules, and *designing*, *afterwards*, *to disregard them in practice.*

"The Commissioners, therefore, feel that they can anticipate no cordial and efficient co-operation from you in the management of *any* National School, but rather mutual distrust, continual disputes, and, perhaps, troublesome litigation: *and this feeling is strengthened by the circumstances of your having openly, in a Pamphlet, imputed to the Commissioners conduct the most disingenuous and base.*

"No confidence, whatever, can reasonably be felt in the *persons* on whom such imputations are *deservedly* cast, or in the *author* of such imputations, if they are *groundless.* On either supposition, therefore, it is most undesirable that parties so circumstanced should have any dealings together.

"The Commissioners accordingly direct us to say that, if

you wish to have a National School established for the benefit of your tenantry, the application must be made, and the whole management of it conducted, *by some other persons*, between whom and the Commissioners the requisite degree of mutual confidence and sincere co-operation may reasonably be hoped for.

(Signed)
"MAURICE CROSS.
"JAMES KELLY."

Reverend Sir, this most serious letter was written —not to a Catholic Inspector, on resigning his office for conscience' sake, but to the *Reverend Edward A. Stopford, Protestant Archdeacon of Meath*, and was the solemn decision—not of Catholics, but of the *Right Hon. A. Macdonnell*, to whom your present letter is addressed; of Archbishop Whately (Chairman); Rev. Dr. Sadleir, Provost of Trinity College; the Marquis of Kildare, Baron Greene, and the Rev. Dr. Henry; the only Catholic Commissioner present being His Grace Archbishop Murray. Since you wrote these pamphlets, which thus proscribed you from becoming the patron of any National school, you have never once apologized for, or explained the grave matters which led to this most offensive letter to you from the Commissioners. On the contrary, *after* your connexion with the Board, you distinctly, and, I must say, bravely, submit a justification, in your pamphlet of 1847 (page 39, and Appendix B), of those grave imputations of "*forecasting knavery*," as the Rev. Dr. Elrington called one of your charges, and "*conduct most disingenuous and base*," as the Commissioners themselves regarded those charges generally. If you had addressed yourself, sir, to the task of impeaching the evidences upon which I prove the charges of "duplicity, untruth, and dishonesty," against the Board, it would be charitable and becoming; but, unless you do so, silence is your bounden duty.

Again, sir, you state, the "terrorism, the eavesdropping, the backstairs intrigues, the bullying, the bribing, the general corruption of the whole inspection staff (p. 328, "Catholic Case")—of whom Mr. Kavanagh appears rather to have *failed in taking the lead*—cannot have much weight with any who have been in communication with your Board and with its officers."

When you wrote that passage you were fully aware that this statement by me referred solely to the *internal* economy and discipline of the staff, and, therefore, that your opinion upon the subject, as that of one wholly ignorant of the question, was worthless. You knew nothing—you could know nothing, sir, about it. The only Inspectors ever officially connected with you were Messrs. Coyle, Clarke, Newell, Hunter, Potterton, Conwell, and myself. Some of these you may never have met—as no patron in Ireland has, for some years back, given much less attention to his schools than you have done—and your slight knowledge of these few—of a large staff of officers—could, in no way, entitle you to offer any opinion, whatever, upon the internal government and official direction of a corps of seventy officers.

Several of your observations, personal to me, are unwarranted, ungenerous, and unjust. Thus, in the passage last quoted, you insinuate that I was an applicant—as no trial, no failure—for the leadership of the inspection staff, and this insinuation you make, in the face of my specific refutation of the same calumny by the Resident Commissioner, given in my book, p. 428. Your friend, the Resident Commissioner, if he told you any of the whole truth, should have informed you that on mentioning to me, in 1855, that such a leadership was about to be created, he added, "Allow me to do this now; give no opposition, and it will be your turn next. Your evidence, last year, has made such enemies of the Protestants here, and in England, against you, that although you are the man that should be appointed, it would be highly dangerous to take such a step now." Motives were attributed to *you*, sir, when, from being the most violent clerical opponent of the National system, you suddenly turned round in December, 1846, just as the Peel Ministry went out (July, 1846), which had given your father the Bishopric of Meath, and yourself, through him, a living of £1,800 a year; and you were charged, by your own clergy, with seeing a mitre through the vista which led to Tyrone House. Defending yourself against such a charge, you meekly state:—"But I cannot see why a man's personal or private motives should be examined, to find explanation of his conduct, when he puts forward reasons which many just and upright men feel to be of great weight"—(Letter upon Non-Vested Schools, p. 59). I beg, sir, to remind you that in voluntarily withdrawing from the service of the National Board, I had no fortune upon which to fall back, no political or party market to barter myself in, no rival educational institution to bid for my services. If I was grossly treated, it was only temporary; and my restoration to my former position, as Head Inspector, *was certain*, and, as I was assured, *would be immediate*. Every consideration of self-interest, association, and personal prudence, dictated to me to remain—deterred me from resigning. A good Providence has blessed my labours, and I shall never cease until the Catholics of Ireland obtain a Catholic system of education. Personal abuse, misrepresentation, calumny, only strengthen our cause. The victory is in the hands of the Catholic prelates and people, and your pamphlet and all such productions, will materially promote the very end they were devised to frustrate.

You appear, sir, to know what portions of my book were written by myself, and what by others. You state:—"The style of the book justifies its use of the editorial 'We': a clear and forcible style on those topics which Mr. Kavanagh can have least studied, and of which he would least be permitted to treat, stands in contrast with the confused and ungrammatical structure of sentences in other places." This, sir, is the pedant's reply to "The Catholic Case," but unintentionally, no doubt, you compliment both my Church and myself. I *have been* permitted to write upon every subject discussed in the book; I *have* given much attention to the topics to which you refer, and the clear and forcible style, no less than the alleged loose and ungrammatical structure of sentences, elsewhere—*contrasts*, though they be, in your judgment—are by one and the same hand. You now must see, either that you rashly decide upon insufficient evidence, or, that your opinion, sir, is of comparatively little value.

In the opening of your letter the following passage occurs:—

"In page 95 of his book, Mr. Kavanagh cites me to prove that *the rule* [as to the obligation or non-obligation of patrons to remove Catholic children from Protestant religious instruction] before its amendment, *required* the patron to *exclude*. I cannot prove this for him; for, in the very words he quotes, I stated, as I always had done, that 'it was capable of either construction.' I never asked for anything respecting this rule but for the removal of an ambiguity."

I have already made you prove this, sir; but, if, in your opinion, I have failed, I shall bring you up again upon the table, and make you prove it, by new evidence. I am bound to say, sir, that a more insincere and inaccurate statement I have never read than your present account of the change of rule 3, section 2, effected, at your instance, in 1847. Writing about the change, at the close of 1847, *just after it had been effected*, you state, in a letter to the Protestant clergy of the diocese of Meath, written and published with the approbation of the Bishop, your father:—

"The Board had themselves raised the question" [as to the interpretation of the rule]. "They had formerly gone beyond the most objectionable sense of this rule. They had affirmed that it was *of the essence of these rules*" [these italics copied from your own pamphlet] "*that the patron should exclude from religious instruction all who were not actually directed by their parents to remain.*" (Letter on the Temple Meeting-house school). And, when a proposition for aid to a school ('the Correen,' see Sixth Report), in terms corresponding to the favourable construction of this rule, was put before them, they re-published, as being substantially the same, that letter to the Temple School, putting in italics the most objectionable parts." With your own pamphlet before you, published in 1847, containing (page 10) those clear statements, I am astounded, sir, at the assertions

APPENDIX, No. 18.

made in your letter to Mr. Macdonnell. Against this interpretation, as placed upon the rule by the Board, you thus strongly and solemnly protest, on your own behalf, and on that of the Protestant clergy :—

"To us [the Protestant clergy] the difference of interpretation, *in point of principle*, was very great."

"We cannot carry into effect the parent's prohibition. This we cannot do." "We cannot undertake to perform [a wrong act] for the parent."

"We feel bound to leave a child's religious instruction in the hands of his parent, although he abuse it; we cannot make the abuse our own act."

This was one of "the two things we judged essential; had they then (in 1844) been granted to us, we would have acceded; being refused, we remained separate. Having (in 1847) obtained, we accept them; were they not granted, we should yet remain apart."

I have, sir, quoted quite enough to satisfy you that you can prove for me—that you have proved for me, "*that the rule* (3, section 2) *before its amendment* (in 1847) *required the patron to exclude*" the children from any religious instruction different from that which they professed. You obtained the change—a substantive, a radical change—of the rule, which, in justice to you, I call the *Stopford pro-proselytizing rule*. In so doing I mean no disrespect, nor could you feel that the association of your name with an instrument potent, beyond all your expectations, in securing the attendance of Catholic children at Protestant Bible-reading can be imputed to you, sir, as a reproach.

You would, however, most kindly share the honour of the change of rule with me, but, as the imputation came from Tyrone House, the calumny will be short-lived. I went as Inspector to Cavan, Meath, and Westmeath, in January, 1845, and was stationed in Virginia, in 1845 and 1846. I had the pleasure of *accidentally* meeting you on three occasions only—in two National schools, and in the Oldcastle schools. On 2nd December, 1846, the last of these occasions, you asked me to obtain an official answer to the question put by you—"Are we to regard the non-vested system of schools as a temporary nurse to the vested, to be discarded when its foster-child can go alone?" I transcribe my reply to you, as published in your own pamphlet in 1847 :—

"Education Office, 14th January, 1847.

"REV. SIR,—Having had some conversation with you on a recent occasion, in Carnaross National School-house, with reference to the intentions of the Board on the subject of vested schools, and desirous to procure an official answer to your inquiries on the subject, I laid the matter before the Commissioners, and beg leave to submit a copy of their reply to my letter on the subject :—

"'Your letter of the 5th instant having been laid before the Board, we are directed to inform you that the Commissioners have no intention to supersede gradually, at convenient times, all non-vested schools, by establishing vested ones in their vicinity; but they do not consider it compatible with their duties to give specific pledges to any individuals who may wish to put schools under the Board.

"'Dated, 22nd December, 1846.'

"I remain, Reverend Sir, your obedient servant,

"JAMES W. KAVANAGH,

"General Inspector of National Schools.

"Archdeacon Stopford."

Between the date of your question and that of my letter, I was promoted from the rank of District, to that of General Inspector, and my official connexion with your locality soon after ceased. In April, 1847, at your request, and directed by the National Board, I went down, from Dublin, to conduct, for a few hours, a public examination of your non-National school, in Kells. At the close of August, 1847, you wrote to me to send you *the usual printed forms* of application, upon which to apply for aid to your schools. Your first application, in September, failed, but, at length, you succeeded in removing, by a slight verbal alteration, the original rule, against which you so strongly protested, and had substituted that which so justly bears your name. Call it *verbal* alteration, or, as I call it, the mere substitution of the particle "*to*," it was, practically, *the total subversion of Lord Stanley's system*. I was the means of procuring, as was my duty, this official answer to your inquiry, as to the Board's intentions towards the foster-children—the non-vested schools; and this, you state, led to your renewing your lapsed, and *interdicted* relations with the Board. With the second question—*the change of rule*—I had no official connexion whatever. You assert that the explanations afforded to you, which led to your being brought a second time into communication with the Board, were obtained through me. This statement, sir, is contrary to fact. I obtained but *one* explanation for you—that in reference to non-vested schools, and this was obtained at your own instance—*it had no connection whatever with the change of rule*, nor did you take any step towards putting yourself in communication with the Board for *eight months afterwards, during which period, and for seven years subsequent, I was officially unconnected with your schools and with the district.* To state, as you do, that it was I who brought you a second time into communication with the Board, *on the subject of the rule which was then changed* (letter, p. 7), is not only destitute of truth, but I call upon, and, as a clergyman, I expect you to, at once, either prove your statement or retract it. I demand, sir, a clear, plain, unequivocal answer upon this simple, but important matter. In order to help your memory, and, as I have no desire to exhibit you to the public in any more unfavourable light than you have already placed yourself, I beg, sir, to submit copies of the following letters to me, previous to your application for aid for your schools :—

"The Archdeacon of Meath hopes Mr. Kavanagh may be able to fulfil his kind promise of conducting an examination of his school at Kells. The Archdeacon would be greatly obliged by his valuable assistance. Lord Headford being to leave Kells on the 12th of April, the Archdeacon would like, if possible, to have the examination some day at the latter end of the week preceding that day. Should this not be convenient to Mr. K., the Archdeacon would fix some later day which might suit Mr. Kavanagh.

"Archdeaconry, March 31st, 1847."

The following note proves, that from the date of that examination, held early in April, 1847, up to August 24, you had neither met me nor written to me, my official connexion with the district having wholly ceased :—

"The Archdeacon of Meath would be much obliged by Mr. Kavanagh's sending *proper forms of application for aid for his school at Kells, and also for his infant school.*

"The Archdeacon *regretted not having had the pleasure of meeting Mr. K. again, after the examination of the school at Kells, to thank him for his services.* The Archdeacon would feel much pleasure in having the advantage of Mr. Kavanagh's inspection in future.

"Archdeaconry, Kells, Aug. 24th, 1847."

The forms of application were sent to you. Mr. Clarke, the District Inspector, visited and reported upon the cases, and I now, again, demand that you will prove your assertions that it was explanations —*amongst others of the Rule in question*—obtained by me from the Board, which brought you a second time into *this* communication with the Commissioners. I pronounce it an unmitigated mis-statement, for which you had no warranty; and I require you, sir, to either publicly prove it or publicly retract it. That I volunteered any office for you, or any interference beyond the strict requirements of my duty as a public officer, is not correct, as the terms of my first letter, of January, 1847, clearly prove. The explanation, rather assurance, in that letter is the only one obtained through me—that in reference to non-vested schools; the subsequent explanation of the rule was effected *through your own direct correspondence* with the Commissioners, and without any official interference whatever on my part. Page 12 of your own pamphlet, written immediately after your joining the Board in 1847, designed to set forth a minute account of the particulars of that connexion, states :—

"There were *two* points—the permanence of the non-vested system, and the limitation of the obligations respecting religious instruction—which we formerly thought *essential* to our acting with the

Board. And this was not a hasty or changeable conclusion."

The former of these I had explained for you through my letter, and to which you refer (page 7 of your pamphlet) as "an announcement no less important than satisfactory," and (page 5) that the previous "refusal of this explanation made the impediment insurmountable," of connecting your schools with the Board. Here, sir, is the truth, in your own words, as given in 1847; your present version of it is one tissue of gross, although undesigned misrepresentation. I obtained one explanation for you, which led to your opening *direct* correspondence with the Board; you, yourself, through that direct correspondence, obtained the other—namely, the alteration of part of a rule, from "That no child be compelled to receive, or be present at any religious instruction to which his parents or guardians object," to "That no child be compelled to receive or *to* be present at," &c.—the latter being totally and radically different from the other. The former required the Protestant patron to *exclude* a Catholic child from being present at *Protestant religious instruction;* the latter merely *prohibits* him from *compelling* the Catholic child *to receive*, and from compelling the Catholic child *to be present* at such instruction, but if they attend, as unfortunately they do, in tens of thousands, at such instruction, *no rule of the system is now violated.* Here, sir, is the simple history of the two stages in your exodus, from the position of *official outlaw*, when the Peel Ministry was in office, in March, 1845, to your settlement in the land of *promise*, October, 1847, when the Russell Government was restored.

There are many most serious errors, sir, in your pamphlet, for several of which I am unable to account. You quote this passage from my book—"Archdeacon Stopford and the Protestant clergy sought the change in the rule, and he *at once availed himself of it for the purpose of proselytism*, as appeared from his evidence in 1854;" and, thereupon, you observe—"I think it due to myself to state that this is totally untrue and unfounded. I never asked a Roman Catholic to send his child to my school, nor a Roman Catholic child to attend. These Roman Catholics who sent their children to my school *were not in my employment*, nor, so far as I know, in the employment *of any Protestant.*" Now, sir, your own evidence is quoted by me—"Every Roman Catholic child (from two, at one time, to seven or eight at another) who has ever come to the school, *has always attended the religious instruction*, consisting of reading and explaining the Scriptures." I have made no comment, and, therefore, your statement is unwarranted and offensive, as even Mr. Macdonnell, to whom your letter is addressed, assures us, on oath, "that any system of schools that renders it necessary for the children attending those schools to read the Protestant Bible, may be considered *proselytism.* I look upon it," he says, "that the great and vital distinction between Protestant and Roman Catholic is involved in the indiscriminate reading of the Bible." Equally unfounded is your new statement, that the parents of none of the Catholic children in your school were in Protestant employment, as, from my notes, I find that *three* of the Catholic children who had been in your National schools *belonged to your own herd*, named Gibney. In the postscript of your pamphlet you incautiously contradict my assertion that, on the 17th February, 1854, I had examined your schools, stating, "It was on the 16th that Mr. Kavanagh visited my school." You have *two* schools, sir, and I refer to *both*, while you appear to contradict me, but do not do so in reality. I examined your schools *both on the 16th and on the 17th* February, 1854. Again, there is another equally unmeaning statement, in which you evidently intended to impute an inconsistency, or a contradiction against me, but which is wholly destitute of point. In quoting from my evidence, in your postscript, you omit to inform the reader that it is in reference to *apostacy* or *perversion* I am asked, and surely you do not accuse me of wrong, because I stated on oath that I had never heard of a single case of *apostacy* amongst the children in your school. The three negative answers given to Lord Harrowby's questions (2752-3-4), denying that I had ever known or heard of any case of *proselytism* in a National school, are as clear as light, and specifically refer—questions and answers—to cases of *open apostacy*, not at all to mere *proselytizing practices*, such as are now common, unfortunately, in most Protestant National schools attended by Catholics:—

2752.—Have you heard, in the course of your inspection, any complaint that *proselytism* has been the *result* of mixed education?—I have never heard of an instance in which it could be *traced* to that *cause* alone.

2753. You have never heard of the sympathy of numbers, which has been spoken of *as having carried along the minority?*—No; I am not aware of any such instance. I do not know of any instance *of a change of religion happening to any of the children*, in a mixed school, where it could be *traced* to the *influence* of the schools.

2754. Or in which clergymen, of either religious persuasion, have come to you with the complaint *that the children have been drawn away* through the influence of the school?—No; I never heard of a single instance.

Now, unless, sir, some of your Catholic pupils became *apostates*, and that I had known this, in 1854, when I gave that evidence, there is neither point nor force in your reference to my answers, now quoted. The Earl of Harrowby meant *apostacy* or *perversion*, and in most explicit terms I replied in the same sense.

Your entire statement, sir, in reference to the educational claims of Catholics, is founded on misapprehension. My book nowhere asks that the priest shall have more legal power in the school than he has in the church. He cannot legally compel any Catholic parent or child to go to the parish chapel, nor do we ask that he shall be invested with legal power to compel any child to go to the parish school.

There is no one of your adverse strictures, sir, of any moment to which I have not now replied; the only other one to which you could, by possibility, attach any importance being that in reference to a sentence in my paper read at the British Association, and which, as it has been alluded to in other letters, I shall elsewhere notice.

There are several other Protestant dignitaries who may yet come out upon the subject of National Education. Dean Hoare, for whom Mr. Macdonnell states he has already written one pamphlet, has not yet appeared, and, doubtless, several other episcopal cadets may yet, like you, assure the Resident Commissioner that their pamphlet was not written to order; but, reverend sir, I happen to know, and can, any day, enlighten the Irish public how these matters are managed.

Upon the following points I demand, sir, distinct and explicit answers:—

Whether I obtained *any explanation* whatever for you from the Board, except the assurance contained in my letter, above quoted, *previous* to your entering into *direct* communication with the Commissioners for aid to your schools? I emphatically, sir, deny that I did, and as I had never seen you, nor written to you, nor held any communication whatever with you, from the beginning of April, until you first applied to put your schools under the Board, any statement to the contrary *must be false.*

Next, I deny that I had any official connexion whatever with the discussion of the change of rule, which was conducted *exclusively* between yourself and the Commissioners, through *direct* correspondence, *none of which passed through my hands.* I challenge you to disprove this statement.

Lastly, any statement that I may have made as to my agency in effecting your junction with the Board, must have been made mainly in reference to the state of moral and official outlawry in which I found you, in 1845, and the facilities which my knowledge of my business, and my courtesy afforded you, in effecting that junction.

I am reverend sir, your obedient servant,

JAMES W. KAVANAGH.

2nd June, 1859.

APPENDIX No. XIX.

PAPERS connected with the INCORPORATED SOCIETY FOR PROMOTING ENGLISH PROTESTANT SCHOOLS in IRELAND, referred to as Papers No. 1 and No. 2, in the Statement handed in as Evidence by Rev. JOHN WINTHROP HACKETT, Secretary to the Society.

[See page 1147, 1st column.]

PAPER No. 1.

Counties in which the Schools are situated.	Names of Schools.	Description.	No. of Boarders, viz.: Foundation or Free Pupils.	No. of Boarders, viz.: Pay Pupils.	No. of Day Pupils.	Names and Addresses of Principals.
ANTRIM,	Ramoan, Ballycastle,	Day School,	–	–	60	Rev. W. H. Biedermann, Visitor.
DUBLIN,	Training Commercial and Scientific Institution, near Santry.	Boys' Boarding School,	20	80	none	Mr. W. H. Engledow, A.B., Training Institution, Santry.
	English Commercial and Scientific School, 55, Aungier-street, Dublin.	Boys' Day School,	none	none	80 to 90	Mr. J. de Glanville, Sch. T.C.D., 55, Aungier-street.
DONEGAL,	Ray School,	Elementary Day School for Boys and Girls.	none	none	100 to 120	Mr. Thomas Finucane, Ray Day School, Strabane.
DOWN,	Killinchy School,	Day School,	–	–	50	Hon. and Rev. H. Ward, Visitor.
KILDARE,	Celbridge Institution,	Female Boarding School,	62	none	none	Mrs. Crawford, Incorporated Society's Institution, Celbridge.
KILKENNY,	Pococke Institution, near Kilkenny.	Boys' Boarding School,	28	24	none	Mr. J. B. Browne, Pococke Institution, Kilkenny.
LOUTH,	Educational Institution, Dundalk.	Boys' Boarding and Day School.	44	56	16	Mr. John Turner, Educational Institution, Dundalk.
MEATH,	Trim School,	Boys' Day School,	none	none	21	Mr. W. P. Lowe, Trim.
QUEEN'S CO.,	Stradbally School,	Elementary Day School for Boys and Girls.	none	none	24	Mr. John Steede, Stradbally.
ROSCOMMON,	Ranelagh Institution, Athlone,	Boys' Boarding and Day School.	20	45	14	Mr. J. Macnamara, Ranelagh Institution, Athlone.
	St. Peter's Schools, Athlone,	Day School (Boys and Girls),	–	–	60	Rev. James Gully, Athlone, Visitor.
	Ranelagh Institution, Roscommon.	Female Boarding School,	20	10	none	Mrs. Crawford, Ranelagh Institution, Roscommon.
SLIGO,	Primrose Grange Institution, near Sligo.	Boys' Boarding and Day School.	20	10	10	Mr. George M'Clenaghan, Primrose Grange Institution, Sligo.
TIPPERARY,	Clonmel School,	Boys' Day School,	none	none	24	Rev. F. T. Brady, Clonmel, Visitor.
	Cashel Schools (2),	Boys' and Girls' Schools,	none	none	40	The Dean of Cashel, Visitor.
	Bird-Hill School,	Elementary Day School for Boys and Girls.	none	none	15	At present (1869) closed.
	Newport School,	Boys' Day School,	none	none	50	Mr. J. Cox, Newport.
	St. John's College, Newport,	Boys' Boarding and Day School.	none	20	10	Mr. J. L. Whitty, Ex-Sch. T.C.D., St. John's College, Newport, Tipperary.
WESTMEATH,	Farra Institution,	Boys' Boarding School,	20	12	none	Mr. J. D. Falloon, Farra School, Bunbrusna, Rathowen.
WICKLOW,	Arklow School,	Boys' Day School,	none	none	56	Rev. W. G. Ormsby, Visitor.

☞ The numbers given above are those which the Schools can comfortably accommodate. The number of Free Pupils is fixed in each case. Pay Boarders and Day Pupils vary in number at different times.

BOARDING INSTITUTIONS.

BOARDING INSTITUTIONS.

Boys.

Foundation (Free) Pupils.

A limited number of boys are annually elected to free places on the foundation of the Society, and are thenceforward dieted, lodged, clothed, and educated during four years (unless removed for misconduct) without expense to parents or friends. At the termination of this period, each boy vacates his scholarship, in order to make room for a newly elected candidate, and ceases to have any further claim on the Society, except for a testimonial of character, in case he shall have proved himself entitled to it.

NOTE.—The only exception to this rule is in the case of re-election to the Santry Training Commercial and Scientific Institution, subsequently alluded to.

Competitive Examination.

Boys are elected by competitive examination, conducted by a deputation from the Society, who attend for the purpose at the several institutions and schools on certain days (in June or July each year), of which due notice is given to all persons interested in the matter.

Subjects.

Candidates are examined in the Book of Genesis, the first twenty chapters of Exodus, the Four Gospels, the Acts of the Apostles; the Church Catechism and the Scriptural references shewing its doctrine to be in conformity with the Word of God; reading, writing; the rudiments of English grammar; the geography of Europe, Palestine, and Asia Minor; and in arithmetic, as far as the Rule of Three inclusive, and vulgar and decimal fractions. The examinations are conducted with the strictest impartiality, and the best answerers elected.

Rules.

With reference to the examinations, the following rules are strictly observed:—

1. Candidates shall not be under twelve, nor above sixteen years of age.

2. Candidates must have been in attendance at a Scriptural school within prescribed districts for at least one year previous to the day of examination.

3. Certificates of age and moral conduct, signed by the clergyman of the parish in which the candidate has been educated, as also of health, signed by a medical practitioner, must be produced previous to the examination. BOARDING INSTITUTIONS.

BOYS.

4. Certificates are received only on the Society's printed forms, which can be obtained on application to the respective masters at the institutions.

5. The number of candidates in each case must be at least three times that of the vacancies to be filled; when this does not occur, the scholarships are given only in that proportion, and the Society confer the remainder upon deserving but unsuccessful candidates at other institutions.

6. When two brothers are candidates at the same examination, only one of them can be elected, if the next boy on the examination list be found duly qualified.

Elected foundationers are required to have, on their admission, each—one jacket, one waistcoat, one pair of trousers, one pair of shoes, one cap, two shirts, and two pair of stockings—all in good repair.

Candidates are eligible to the respective foundations from the Scriptural schools of the following districts:— Districts—Privileged to supply Candidates.

To the Pococke Institution, near Kilkenny—From the Counties of Kilkenny and Waterford, and the Parish of Durrow, Queen's County; from the City and County of Cork, and from the County of Kerry.

To the Dundalk Institution—From the Counties of Louth and Down; the County of Armagh; and the Parishes of Lisburn, Ballinderry, and Glenavy, in the County of Antrim; also Ramoan Parish in same county.

To the Ranelagh Institution, Athlone—From the towns of Athlone and Roscommon, and the Counties of Roscommon and Galway.

To the Primrose Grange Institution, near Sligo—From the Town and County of Sligo, and seven bordering Parishes in the County of Mayo, also from Achill.

To the Farra Institution, near Mullingar—From the Counties of Westmeath and Meath.

A proportion of the scholars who have completed their term of four years in the above-named Institutions are annually re-elected for an additional period to the Society's Training, Commercial and Scientific Institution at Santry, near Dublin (if after examination and inquiry as to character, they shall appear deserving of such distinction), where an opportunity is afforded of continuing and extending those studies in which, as a necessary qualification for such re-election, they must have already made considerable progress. Santry School—re-election to.

N.B.—Boys are also elected to the Santry Institution from the day school, 55, Aungier-street, Dublin.

The foregoing Institutions afford a sound Scriptural and superior English, commercial, and mathematical education, calculated to fit young men for the offices of schoolmasters, accountants, assistants to civil engineers, and for commercial pursuits generally. Education afforded.

The Thackeray Exhibition in Trinity College, Dublin, of the annual value of £30, and tenable for four years, is open to the pupils of all schools under the Incorporated Society. Thackeray Exhibition.

Each Institution has the advantage of frequent visitation by the minister of the parish, or other neighbouring clergyman, the paid officer of the Incorporated Society, by whom the pupils are regularly catechised and instructed in the Holy Scriptures. Catechists.

Boys are received as boarders, irrespective of locality, and without any preliminary literary examination. They enjoy all the educational advantages above referred to, and are comfortably dieted and lodged, washed for, and supplied with stationery and medical attendance, at £20 each per annum. Pay (Hall) Boarders Terms.

Day pupils are also received at the Institutions, and instructed in English and mathematics at £3 per annum each. Day Pupils.

The masters are at liberty to provide instruction in classics, modern languages, drawing, &c., for pupils whose friends desire to afford them such advantages—the terms being subject to private arrangement. Extras.

The dietary appointed for boys on the foundation and for pay (hall) boarders, in the several Institutions, is as follows:— Dietary.

Breakfast, daily—Stirabout or bread, and new milk.
Dinner, 3 days in each week—Fresh beef or mutton,
" 3 " " —Soup, seasoned and thickened with vegetables, } with potatoes or bread.
" 1 " " —Bacon and greens,

The several masters are permitted to receive parlour boarders, on terms to be arranged with the friends of the pupils. Parlour Boarders.

Boys are received as boarders, if under the age of fourteen, at 40 guineas per annum. St. John's College, Terms.
" " " if above " " " 45 " "
" " day pupils . . . . 10 to 12 " "
Modern languages, drawing, stationery and washing, extra.

GIRLS.

A limited number of girls are annually elected to free places on the foundation of the Celbridge and Roscommon female boarding institutions, where they remain during four years (unless removed for misconduct), and are dieted, lodged, clothed, and educated without expense to parents or friends. At the termination of this period each girl vacates her place in the institution, in order to make room for a newly-elected candidate, and ceases to have any further claim on the Society, except for a testimonial of character and conduct, in case she shall have proved herself duly entitled to it. Foundation (Free) Pupils.

Girls are elected by competitive examination, conducted by a deputation from the Society, who attend for the purpose on certain days, in June or July each year, of which due notice is given to all persons interested in the matter. Competitive Examination.

The candidates are examined in spelling, reading, and writing, and in St. Matthew's Gospel, together with the Church Catechism and the Scriptural references showing its doctrines to be in conformity with the Word of God:—the examinations are conducted with the utmost impartiality, and the best answers elected. Subjects.

With reference to these examinations the following rules are strictly observed:— Rules.

1. Candidates shall not be under ten nor above fourteen years of age.

2. Candidates must have been in attendance at a Scriptural school within prescribed districts, for at least one year previous to the day of examination.

3. Certificates of age, attendance at school, and moral conduct, signed by the clergyman of the parish, as also of health, signed by a medical practitioner of the neighbourhood, must be produced previous to the examination.

4. Certificates will be received only on the Society's printed forms, which can be obtained on application at the institutions.

5. The number of candidates in each case must be at least twice that of the vacancies to be filled. When this does not occur, the vacant places are given only in that proportion.

BOARDING INSTITUTIONS.

GIRLS.

Education.

Catechists.

Districts—Privileged to supply Candidates.

6. In cases where two sisters are candidates at the same examination, one of them only can be elected, if the next girl in the examination list be found duly qualified.

The Celbridge and Roscommon Institutions afford a sound Scriptural and useful English education; the children are also instructed in needle-work, and in domestic employments, including the care of the house, management of the dairy, laundry, &c.

As in the case of the boys' boarding institutions, the pupils enjoy the advantage of regular Scriptural instruction from clergymen who act as catechists, and are the paid officers of the Incorporated Society.

Candidates are eligible to the respective foundations from the Scriptural schools of the following districts:—

To the Celbridge Institution—From the Counties of Kildare, Wicklow, Meath, and Westmeath, and the following parishes in the County of Dublin:—

Newcastle.	Castleknock.	Chapelizod.	Rathcoole.
Tallaght.	Mullahidart.	Palmerstown.	Saggart.
Clondalkin.	Clonsilla.	Ballyfermott.	Finglas.
Kilmactalway.	Santry.	Leixlip.	Glasnevin.
Kilbride.	Clontarf.	Lucan and Esker.	Drumcondra.

To the Ranelagh Institution, Roscommon—From the Towns of Athlone and Roscommon, and Counties of Roscommon, Galway, and Sligo.

Pay Boarders Terms.

The Roscommon female Institution affords accommodation for a limited number of children, whom the mistress is permitted to receive as pay boarders.—Terms, which are moderate, and according to age, may be known on application to the mistress, at the institution.

DAY SCHOOLS.

DAY SCHOOLS.

Education.

The education afforded in the day schools (with the exception of the Aungier-street school, Dublin, subsequently referred to) is of an elementary character. In order to encourage these schools, and stimulate the exertions of both teachers and pupils, the latter (under the prescribed conditions as to age, attainments, and attendance at school) are eligible as candidates for free scholarships on the foundation of the Society's Institutions.

Terms.

In general the teachers are allowed to receive a small payment from children whose friends can afford to pay for their education; the poorer children being free.

Dublin Day School, 55, Aungier-street.

This school provides a sound Scriptural and excellent English, Commercial, and Mathematical education.

Scholarships.

A competitive examination is held annually for a scholarship in the Santry Training Commercial and Scientific Institution: while in that institution the successful candidate is maintained, clothed, and educated at the expense of the Incorporated Society.

Terms.

Fee for English and science course, £4 per annum.

„ French, German, Italian, and Latin (if required), each £1 per annum.

It is the earnest desire of the Incorporated Society that their institutions and schools should be visited, and that the several public examinations of the pupils and of candidates for free scholarships should be witnessed by patrons of schools, by the clergy of the various districts, by parents and school-teachers, and by all persons who take an interest in the improvement and welfare of the rising generation.

By order,

INCORPORATED SOCIETY'S OFFICE,
73, *Harcourt-street, Dublin.*

Advantages of National system—Convent schools—United education—Vested schools—Necessity for improving position of teachers—Constitution of National Board—Local aid—Management.	1479	694–712

ANALYSIS OF EVIDENCE.

N.B.—In this Analysis the *Figures* [25313–25321, &c.] refer to the Questions in the Evidence.

ALLIES, THOMAS W., Esq., M.A.

Thomas W. Allies, esq., M.A.

Has been fifteen and a half years secretary to Catholic Poor School Committee in England. Committee consists of forty-five members, being three representatives, one clergyman, and two laymen, from fifteen of the sixteen English dioceses; meets once a year in London, but a sub-committee manages any business in the interim; members are nominated absolutely by bishops; many resign, but does not remember any being removed by authority. As Committee represents bishops, these are not members, 25313–25321.—Roman Catholic schools were brought into union with Privy Council through committee; arrangements stand as at first made, and no difficulties have arisen. Reads minute defining conditions, 25322–25325.—Correspondence from 1848 to 1852 as to giving clergy whole charge of religious and moral training; model trust deed prepared and ultimately approved, allowing it to them absolutely and free from appeal, except on a minor point, 25326.—School committees. Neither Privy Council nor Poor School Committee make grants to buildings belonging to convents or monasteries. Sixty-four schools have received building grants up to end of 1867; are vested in individual trustees, lay and clerical. Three Inspectors for secular education only, 25327–25339.

Male training school is at Hammersmith; has had building grants from Privy Council; originally intended for students of religious teaching order. Forty-two teachers; main part of them are secular; course, two years. Annual statement; income. Superior is an Oratorian priest; other teachers laymen. *Wished* it to have been wholly a school managed by religious teachers, but have not succeeded in this. Deficiency of teachers; none are Protestants. Some Irish, but National Board's classification not taken; must pass same as others, 25340–25363.—Female training school is at Liverpool; about seventy in training; course, two years. Managed by Sisters of Nôtre Dame in buildings of their own; has had no building grant. Relations with Poor School Committee. Privy Council bear upwards of 70 per cent. of whole expense. Reads balance-sheet for 1867. Students' entrance fee, 25364–25378.

Committee have had no differences with Privy Council, 25379, 25380.—But few Protestants in their schools; there would be no difficulty in making rules for children to receive secular instruction only. Principle from the first has been that children whose parents conscientiously object to the religious instruction may partake of secular only, 25381–25384.—Cannot say whether it was from Church of England deeds having no conscience clause that Catholics claimed to have none; they do not object to principle. Talacre school, 25385–25392, 25397.—Catholic landlord wishing to build a school could not now be compelled to accept conscience clause, 25393.—Committee would not like to adopt rule that parent must give written authority for child to attend adverse religious instruction. It would interfere with ordinary teaching of school; of history, for instance, but no difficulty in exempting from special religious instruction. If history excluded, school is no school at all. Without active proselytizing, a child attending school will imbibe its doctrines, &c., whether Catholic or Protestant. Believes certain times are set apart for religious instruction in Committee's schools, 25398–25408.

Degree of control of Committee over schools; correspondence between managers and Privy Council through them. Members of Committee represent and communicate with bishops, but act independently; though appointed by bishops, lay element is double that of clerical, 25049–25419.—Knows that some Roman Catholics object to a conscience clause; bishops in 1837 considered it just, and what was then just is just still; is not aware that they have changed their views, though if evil have resulted it would justify change. If "conscience clause" is to mean abandoning hourly and other short devotional observances, it would not be submitted to. As to plan of having religious exercises at commencement, and Protestants to come in after, 25420–25427.

Quotation from statement of "Catholic Institute" to show character of history taught. Managers choose their own text-books; cannot say what they are. Committee know they are right books; may use those of Christian Brothers if they please, 25428–25439.

Examination of candidates for normal schools; answers to questions in history. Inspectors are the same three gentlemen who inspect ordinary schools, 25440–25447.—Reasons why members of Poor School Committee are appointed solely by bishops and not by people; resignations from sickness, &c. They represent dioceses, and have full power to act as they think best, 25448–25459.—Catholic training schools are allowed teachers in holy orders, but Privy Council give no salary; practice in other denominations. Church of England can request removal of Inspectors, other denominations have only veto on appointment, 25460–25473.

Thinks there was no opposition to bishops forming regulations for religious training in schools, 25474–25477.—Christian Brothers in training schools would simply act as teachers, subject to authority of bishops. Only two associations of Brothers in England in connexion with Privy Council, the Xaverian and the Marists, about twelve of each. French and Irish Brothers in England, 25478–25491.

Cannot say whether proselytism goes on in Committee's schools; supposes Protestants could withdraw from direct dogmatic teaching, but not, of course, from the general influence; this must be so in denominational schools. Conscience clause would be same protection as in others. Undenominational involves anti-religious teaching, and is as dogmatic, in a certain sense, as denominational; unsectarian teaching is not merely negative, but is anti-Catholic in the highest degree, 25492–25507.—Object of a conscience clause should be to do as much justice to religious convictions as compatible with religious character of school. Under one a Protestant might receive secular instruction in a Catholic school without change of faith, and *vice versâ*, but Catholics in un-Catholic schools undesirable, 25508–25515.—There is the closest analogy as to education between England and Ireland; local support is much greater in the former than the latter, but adoption of English does not involve that parties demanding it should raise a much larger amount than now, 25516–25531.—If State granted whole amount, they would not be authorized to interfere with rights of conscience, 25570.

Irish lesson books; Irish teachers in England. Training school at Liverpool is conducted by an exclusively teaching Order, 25532–25537.—Many Catholics in English Protestant schools. Believes children are not compelled to receive religious instruction against their will in Committee's schools. Catholic teacher giving Catholic instruction to non-Catholic child by

Thomas W. Allies, esq., M.A.

desire of parent; would consider Catholic teacher giving Protestant instruction next to apostasy, 25538–25546.

Examination of nuns same as that of other teachers; course of examination: is held at some training school; if at a Protestant establishment would be by a Protestant Inspector, but this is unimportant, as the papers go to London. Believes nuns accept examination as a penance, they do not like it; are examined in same room as others, 25547–25553.—Reads passages from his last report saying that nuns need not be deterred from examination, setting forth the good produced by training system, and stating that "no age or country has witnessed a system of more perfect liberty," 25554–25555.

Although inspection is confined to secular subjects, only Catholic Inspectors would be accepted, as that right is allowed to other bodies, and because secular and religious instruction cannot be separated; account of negotiations on the subject, and illustration of the latter point, 25556–25562.—If Inspector incurred displeasure of Committee, no doubt Privy Council would attend to their representations. They refused to grant right which Church of England possesses, of demanding removal; for the good reason that the latter permits Government Inspectors to examine in religion; nonconformists have right to Inspectors of their own denomination, 25563–25569.

Relations with school managers; most schools have an annual collection for Committee's fund; managers are clergy and chief laity; how appointed. Communications with local committees are satisfactory; bishops do not object to latter, 25571–25577. Relations with Privy Council satisfactory except in one respect, viz., the condition that grants for building, &c., shall not exceed amount contributed by immediate locality. This rule frequently presses with extreme severity upon Catholics, as schools are often most wanted where hardly any of the Catholic population are above the class of labourers. Difficulty might be met by getting subscriptions from a distance in the name of priest or other residents, 25578–25582.—Reads extract from Committee's last report, showing miserably small proportion of Privy Council building grants to Catholic schools; causes: poverty, style of building required to be erected, and suspicion (unfounded in witness's opinion) that such control is to be secured by trust deed that school may be lost altogether, whereas the condition really is only to secure dedication to purpose for which built. These and other causes have operated largely in preventing applications for aid. Amount now given to small schools is not worth the trouble of applying for, 25583–25586.

Grants for teachers' residences; advantage of these, 25587–25589.—Privy Council grants towards Catholic schools in Great Britain now amount to over £30,000 a year; particulars. Distributed by managers, who must submit accounts for audit, 25590–25597.—645 aided Catholic schools in Great Britain, and large number unaided; besides reasons above for latter circumstance, are: necessity for certificated teacher, and dread of inspection; restriction as to certificated teacher is quite essential. Privy Council treats religious teachers with perfect fairness, 25598–25603.—Thinks there cannot be a good school without denominational inspection. Great dislike to undenominational inspection of reformatories and industrial schools, and to their being under Home Office. Catholics do not like having a Protestant Inspector, but there are not enough to employ a Catholic; cannot say any evil has resulted, 25604–25614.—Reason for denominational inspection in England. Catholics would wholly object to lay undenominational secular inspection, one important reason being that historical views are inseparably connected with religion, 25615–25617.

Roman Catholics would consider a general national system of education for England with undenominational inspection as the greatest possible grievance; it would practically favour Protestants, 25618–25620.—Desirability of some Catholic officer of Privy Council above rank of Inspector; Catholic Inspectors for Protestant schools, 25622–25624.—Committee hopes for establishment of separate schools for Catholic paupers; at present Catholics are preyed upon by all denominations of Protestants. Irish National system would never have been endured by Englishmen, 25625–25629.—A few Protestants in Committee's schools, 25630, 25631.—English laity admit right of clergy to control religious and moral education, but expect management of secular and financial departments; clergy and laity are quite at one upon this matter; difficulty if otherwise in finding lay managers. Have had no difficulty between them respecting books, 25632–25640.—Reasons for believing that they are at one about education, 25661–25663.—Strong objections to Protestant inspection, even in secular knowledge; it might satisfy State, but would have bad effect in schools if certain debatable subjects were passed over, it would be imperfect, and still would be objected to. Plan, occasionally pursued in England, of Inspector requesting teacher to examine on controversial matters in his presence, would be equally unsatisfactory. Does not doubt that a Protestant Inspector would act fairly, 25641–25651.

English Catholics never considered it an insult that nuns must pass an examination; some have been examined at dissenting training schools; never knew them demand to be examined in their own house; no objection but expense to this plan, 25652–25660.—Great difficulties in obtaining sites for schools in England, especially in large towns, where they are most wanted, 25664–25670.—Selection of trustees. Application to Privy Council must have three signatures, but one manager is accepted. Appointment and dismissal of teachers, 25664–25681. Teachers' salaries; some are miserably low. Many pay for their own residences, 25682–25684.

ANDREWS, Rev. W.

Rev. W. Andrews.

Vicar Choral of the Cathedral of St. Canice, Kilkenny, and Deputation Secretary of the Church Missionary Society. Desirous of suggesting improvements in the present National system of education in Ireland. There should be a more thorough recognition of simply aiding schools; the assistance given should recognise that the parents are responsible for education, and not the State nor the Church; the Bible should form a staple text-book in every school, but without any interference with particular doctrinal views, 14739–14741, 14751.—This would not exclude Roman Catholic schools, as Archbishop Murray, in a speech delivered to the teachers at the model school in Dublin, in 1840, stated that the Pope had sanctioned the circulation of an edition of the New Testament, 14752–14758.

An uniform rate (of about a penny in the pound) for the whole of Ireland should be levied for educational purposes on the members of the religious community to which the school belongs, the funds being managed by an elected board, consisting of two-thirds laymen and one-third clergy, who would be responsible to a central board in Dublin, 14741–14744, 14762–14764, 14820–14825, 14850–14852, 14853.—The system of aiding schools only in proportion to the attendance is a great defect; those schools where the attendance is small are the very places where State interference is needed; the State should give a capitation grant, to be supplemented by a local contribution and the payment of school fees, then, if these be not sufficient, the rating system should be applied, 14744–14750, 14801–14808.

The Kildare-place system required that the teachers should be appointed by the society, which would be objectionable to Roman Catholics, and they gave no guarantee that doctrine should not be taught. The Church Education Society requires that the school les-

sons should be based upon Scripture, 14759, 14761.—Inspectors under the proposed plan would examine simply on the text of Scripture, 14765, 14766.—There might be the danger of the Inspectors manifesting their own theological views, but there would be no difficulty in conducting the examination if a model of questions were supplied by the Central Board, 14817–14819.—The plan of rating is the same in principle as the poor law, 14767, 14768.

The plan on which the model schools are conducted has produced indifferentism in religion to an immense extent; Fenianism would never have had such a footing in the country but for the influence of the present system of education, 14769–14774, 14776.—Teaching of the Sabbath schools is not sufficient to counteract this influence, 14775.—Steps taken by Protestant clergy with regard to this state of things, 14777, 14778.—The tendency to indifferentism exists in many countries at the present time, 14779–14781.—There is provision made in the model schools for imparting religious instruction, and the clergy of all denominations have access to the schools; but this is more than counteracted by the children being together for several hours during which religion must be entirely ignored, 14782–14787, 14790–14800, 14837–14841.—Books of the National Board contain moral truth, but are not largely permeated with religious truth, 14788–14789.—The Kildare-place Society allowed the Douay version to be read; the Church Education Society allows only the authorized version; this is the only material difference between the two systems, 14809–14813

The fact of so many Roman Catholic children benefiting by the Kildare-place system may be accounted for by the Roman Catholic authorities allowing the teaching of the Scriptures, and by the small number of schools connected with that Church at the time, 14814–14816.—Money given by the State in aid should not depend upon results; prizes should be given to the masters for keeping the schools efficient, 14826, 14827.—The objections to the use of the Protestant and Roman Catholic versions of the Bible might cause the system to become denominational, 14828.—Where children of the minority refused to go to the school of the majority they would have a school of their own, 14829–14831.—In the south and west the attendance is as low as 18 or 20, 14832, 14833.—Roman Catholics do not attend the Church Education schools under witness; average attendance in these schools, 14834, 14836.—If the State, as a matter of principle, deem it right to require some version of the Scriptures to be read, it ought to require it; this may be objectionable to many; the onus of rejecting the system would not lie with the State, but with those who will not recognise the principle, 14842–14849.

Rev. W. Andrews.

The present system arose from the community neglecting its duty with regard to educating the people, 14854, 14855.—The reading of the New Testament only might be accepted as a compromise, and as the teachers of the different schools would have power to teach their own views, they would introduce teaching of the Old Testament, 14856–14863.—A system of boarding schools for the poor should be established, 14863, 14864.

Witness hands in a memorandum setting forth his proposed system, as shown in his evidence, including supplemental suggestions—1, that the Marlborough-street and Kildare-place schools be made into training schools under the Central Board, supported by the State; 2, that the present buildings of non-vested schools be left, under certain conditions, in the hands of their patrons, &c.; 3, that the State assist in building, &c., other school-houses; 4, that the present model schools should be made middle class schools, and enlarged so as to be boarding and day schools, 14851.

ATKINS, The Very Rev. WILLIAM, D.D., Dean of Ferns.

The Very Rev. William Atkins, D.D.

Is a supporter of National system. Was formerly patron of two schools at Ramelton (Donegal). At present has a large parish with two National schools in it, but is not a patron; one is a convent school with 202 children, the other a National school with forty or fifty Roman Catholics and two Protestants, 20697–20701. Church population is 1,152, with a separate district curacy of 300. Schools are—one supported by Board of Erasmus Smith, an infant school, supported by voluntary subscription, and a Church Education school chiefly supported by Lord Courtown. Average attendance in the Erasmus Smith's school thirty-two boys and twenty-five girls; and in infants' twenty-five. Erasmus Smith's inferior to National schools; not sufficient inspection; assists in management and frequently visits the one in his parish, 20702–20709.—In all schools, but especially Erasmus Smith's, reading is not sufficiently attended to; geography also wants different treatment, 20702-20711. Particulars of schools in Ramelton; National system most efficiently worked; denominations friendly and in constant association on equal terms, in Gorey, with an Erasmus Smith's and a convent school, would not mingle. Maps of Ireland in National schools are not sufficiently accompanied with others to show relative size of countries, 20712–20720.—British Isles and Europe are to be had, but are dear. Children are extremely well acquainted with geography of Ireland, but should always have map of British Isles beside it to show proportion; no advantage to have an exaggerated idea of the country, 20731–20742. Schools in neighbourhood; some Roman Catholics always attends Church Education school; no unpleasantness in consequence; no other school within three miles. No wish in these parts for denominational system; National system successful and serviceable. No need for denominational inspection, 20721–20730.

Laments that National system is unacceptable to clergy of Establishment and of Roman Catholic Church; scheme by which it might be modified; if a total change made, let State concern itself only with secular education, patrons managing as they think fit, attainments ascertained by inspection. If system continue, give more fixity, abolish Commissioners, and appoint a small executive, 20742–20756. Allowing patrons whole control of religious instruction might at first give a tendency to denominationalism, but if left free to work, there would be a disposition to consult feelings of all, and a satisfactory state of things would result; instances in illustration. There would be a gradual working back to present system of mixed education. Parents will generally send their children where they are best taught, 20751–20754. Suggests in addition to fixity and paid Commissioners, that Poor Law Guardians be allowed to establish schools where there are none, and to be the patrons, workhouse chaplains to give the religious instruction. Is chaplain of Gorey workhouse, and is never interfered with by Catholic or Presbyterian chaplain. Further suggests that very small schools, of which there are necessarily many, might be grouped under one competent master, 20755. With foregoing modifications, would advocate continuance of National system, State attending to secular education only, 20756. Believes Roman Catholics desire the latter, and that Church Education Society would fall in with it. Knows that few Church clergy approve of National system, 20757–20761. Though it might appear that National system has been dragging towards denominationalism from beginning, it is not so; statistics in proof, 20762. Even where there are two National schools near, one Catholic and one Protestant, there is some admixture, parties having confidence in each other. Believes number of clergy and laity of establishment in favour of National system is increasing, 20763–20767. Roman Catholic children are taken away from Church Education schools earlier than from National schools, 20768, 20769. If secular

The Very Rev. William Aitkins, D.D.

system adopted, is sure religious instruction would be given every day; would apply system to all; National schools would go on as now except as to rules for religious instruction; desire for secular instruction is growing, 20770–20776. Does not think poverty the cause of increase in number of clergy joining Board, 20777–20781. Personal proof of benefit of mixed education, 20782. Clergy supporting National and Church Education schools are about equal, formerly the latter preponderated, 20783–20786. Favourable opinion of Londonderry model school, but it has failed as to mixed education, being opposed by Roman Catholic bishop; impropriety of allowing wealthy persons' sons there. Few Episcopalians in Derry, 20787–20794.

Changes in rules of Board ought to be laid before Parliament; had this been done, greater success would have followed introduction of non-vested system; this was the turning-point,—this enabled Presbyterians to join; does not think it has alienated Catholics; they are dissatisfied, as are Church Education Society, that they cannot teach religion as they like, 20795–20801. Mixture of denominations in schools prior to National Board, 20802–20812. Introduction of non-vested system; if not done to please the Presbyterians, believes it was the occasion on which they joined, 20813–20818. Would repeal all rules affecting religious instruction, and leave managers free to choose books. Model schools must be kept as now, 20819–20823.

Thomas Baldwin, esq.

Baldwin, Thomas, Esq.

Superintendent of the Agricultural Schools under the National Board. Entered Glasnevin agricultural school as an agricultural pupil in May, 1850 (at the age of twenty), was promoted to be a teacher and clerk in October, 1850, and has since advanced, step by step, to his present office, which he obtained in October, 1854, 4432–4439.—Acres given in witness's report for 1866 are statute, 4440.—The only model farm in Ireland unconnected with Board is at Oldcastle, Meath. Has for years inspected it for trustees, 4441–4444.

Producing a profit is the best test of success of a model farm, 4445, 4446.—Those under the Board have given a fair profit latterly. In the larger ones the buildings are too expensive; causes of this; in the smaller ones they are too numerous, 4447–4450, 4457.—A farm supporting a family respectably, or one on which two horses are kept, cannot be called a small farm. A vast number of "one-horse" farms in Ireland; in these neighbours generally lend each other a horse when required, 4451–4454.

A farm that employs a man, his wife, and two sons, ought to maintain a family respectably (10*s.* a week keeps a labourer and family respectably); a net profit of £40 a year should do this, the rental from £12 to £14, 4455, 4456, 4545, 4548.

Example of the Board's farms in cultivating artificial grass has been largely followed; the same, to some extent, with roots. Small occupiers cannot afford to mow their artificial grass; they are very badly off in accommodation for their cattle. A fair amount of interest is taken in the model farms, 4458–4461.

There are 121 model farms, in 3 grades; of these 20 are managed solely by Board, 18 by local parties, and 83 are attached to ordinary schools, 4462.—Witness's duties in respect to the Board's farms are to receive and examine a "pre-annual estimate" from each steward, detailing his proposed arrangements (suggesting any needed alterations), and to see them carried out, to check the expenditure monthly, to authorize purchase and sale of stock, and to visit farms at least three times in the year; is furnished weekly with an account of what has been done, 4463–4466. These pre-annual estimates are not applied to school farms; the system only applies to cases where the State has invested money, 13050–13057.

The steward is the head of the farm; the local manager, who resides there, is called the agriculturist; the literary teacher generally has the superintendence of the boarders; the Commissioners feed them or pay £14 or £20 a year for the purpose; their sleeping apartments immediately adjoin the master's, 4467–4473.—The agriculturists are paid from £3 10*s.* a month, with rooms, to £120 a year, 4474.

Visits farms under local management at least once a year; an Inspector under him is supposed to visit them at least three times; the latter is not so well paid as ordinary Inspectors; he has nothing to do with the Glasnevin institution; witness presents an annual report, and transacts all the business with the Board; he attends every Tuesday, 4475–4488.

The eighty-three farms attached to the schools vary from half an acre to upwards of twenty; one horse is kept on some of them; witness visits them as often as he can; Mr. Brogan, the Inspector, cannot really visit all the 121 three times in the year; his reports are sent into the office and referred to witness, 4489–4495.—Does not interfere in the management of the eighty-three school farms unless they violate rules of husbandry, 4496–4498, 4511.

None of the farms are cultivated wholly by the schoolboys; agricultural instruction is never allowed to interfere with the school instruction, and no case to the contrary has been reported. The children like the farm work, 4499–4503.—The teachers seem a grade more intelligent than ordinary school teachers, and are capable of giving lectures while visiting the farms; many youths come to the Board's farms from the smaller ones; they do not appear better agricultural pupils than ordinary National schoolboys, 4504–4508.

Distinction between the small agricultural schools and the school gardens; the teacher arranges rotation of crops, &c., 4509–4511.—Boys sometimes work over hours, for which they are paid, 4512.—The number appears less now than ten years ago, because the workhouse schools have been struck off, 4513.—All the expenditure during witness's time can be shown; principles on which he calculates profits, 4514–4517.—The masters working the agricultural schools with their own capital for their own profit are not likely to try experiments or introduce novelties; they differ but little from a farm any schoolmaster might keep who attended to the established principles of husbandry, 4518–4523.

The model farms are worked entirely at cost and responsibility of Commissioners; experiments are discouraged, and established principles of farming illustrated. If experiments are desired a farm should be set apart for the purpose. The model farms are properly restricted to ordinary farming, well carried out, and are more profitable than when experiments were tried, 4524–4530.

There is a horticultural department at Glasnevin, for the purpose of training men as steward and gardener combined, 4531–4534.—Experiments undesirable at Glasnevin, or any other public institution; better left to zeal and enterprise of private individuals. Glasnevin will best perform its functions by practising the proved best systems, 4535–4544.

A man having two statute acres should be able to feed a cow all the year round; by rotation of crops, &c., it might be done with half an acre; at Glasnevin five and a half acres keep four cows; perhaps one school with another, it takes two acres to keep one, 4549–4556.—Four-course rotation is usually pursued on the school farms. Instance where the master keeps a cow on two acres, and produces vegetables, butter, &c., for himself and family all the year, 4557–4560.—Witness can control the farmers if they go wrong. The buildings are erected sometimes by the landlords and sometimes by the teachers, 4558, 4559.—Masters keep an account of produce. Commissioners only inspect, and see that correct systems are pursued and the

elements of agriculture properly taught; they do not oblige the master to keep the farm; the boys do not labour in 10 per cent. of them, 4561–4567.—Managers stand in same relation as in other schools; some schools are vested, some non-vested; generally the land is near the house, but not always, 4568–4572.

The smaller farms at Glasnevin most useful for instruction; all the land is very productive. Land of small farmers is generally poor, 4573–4576.—Any farm of same rental as Glasnevin (£4 per acre) can be conducted profitably; the five-acre farm keeps four cows, and employs as much labour as some twenty-acre farms with poor soil; depth of soil is double that of many farms, 4577–4585.—Improvement of land by good tillage; explanation as to keeping a cow on half an acre, 4586–4594.—Small farms as against large not advocated, but, as there are 300,000 small farmers in Ireland, it is desirable to teach them the best means of cultivation; buildings might be put up cheaply; aptitude of small farmers for erecting their own is often considerable, 4595.

Young men from Glasnevin become good stewards; some have returned home, but not to small farms, 4596, 4597.—The pupils come chiefly from the other agricultural schools; there are some free scholarships, filled by competitive examination; for paying pupils there is only a pass-examination; all the schools are not full, too many have been established. The yearly fee of £8 is not so much an obstruction as the loss of services at home, 4598–4601.

The Athy farm is managed with great skill, and is very popular; it has only room for four boarders, whilst Limerick takes twenty and Cork twelve. Free scholarships are not always taken readily. Liberality of Limerick trustees has caused a larger number there than elsewhere; Cork and Belfast schools are the largest, 4602–4607.—Derrycastle school is an ordinary one, but the senior boys receive agricultural instruction; this should be given in every school, and a plot of ground added wherever possible, 4608–4613.

The rising wages of labourers, and the insecurity of land tenure, cause indifference in farmers to agricultural progress; but the want of interest in model farms may be because they do not show a good balance sheet. Some of them are beginning to pay. Model schools each cost the Commissioners a little over £5 a year, 4814–4822.—Blanks in returns from a few of the schools arise from accidental and passing causes, 4623.

The elements which enter into the value of land are staple of the soil, proximity to market and sources of manure, and elevation above the sea. Lesson to be derived from Glasnevin school-farm is, that on given conditions of cultivation a family can be maintained in competence. Expense of working soil increases directly as the depth, 4624–4632.—Elements named are taken into account in Griffith's valuation, which, with a per-centage added, is a fair one. Valuation of Glasnevin farm twenty years ago was £369 15*s.* Griffith's valuation is about half the present rent. If taxes had to be paid they would be about 2*s.* 6*d.* in the pound, but as an educational institution it is exempt, 4633–4643.

Origin and progress of the industrial and educational schools in Ireland. An industrial school grafted on the normal school at Glasnevin in 1838. English and Irish Royal Agricultural Societies, the Devon Commission, Lord Monteagle's letter, &c., in 1847, all gave an impetus to the movement. In 1845 the Commissioners had 12 model and agricultural schools, in 1848 29, in 1854 79, and 3 school gardens, and in 1858 88, and 3 gardens; then they decreased till 1861, since when they have increased again to 83, 4644–4650.

Agricultural teaching might be further extended, and still would not interfere with the literary work; no subject more useful or interesting, 4651–4655, 4717, 4718.—Board's system is best adapted to small farms. Taking acreage and land at £1 an acre, £15 rent may be considered as the limit of small farms; half the farms in Ireland are under fifteen acres. Prevalent belief that all the small farms will become absorbed in larger is erroneous, 4656–4663.—In several counties the small farmers are prosperous without aid from other sources, 4664–4668.—If well-managed school farms were freely scattered over the country, and the small farmers (one-fourth of the population) believed their holdings were not likely to be absorbed, the public mind would be much tranquillized, 4669–4673, 4705. Thomas Baldwin, esq.

Detail of an instance, at Derrycastle, to show that farms of ten to fifteen acres can be made to pay a fair rent and maintain a family in moderate comfort; a net profit of £55 produced on a rental of £13, 4674–4677. Particulars to the same effect of the Oldcastle school farm; this produced £75 net on eleven acres, 4678–4689. The amount of produce sold exceeds what might be expected on same number of acres forming part of a 300 acre farm. In regard to advancing money for buildings on small farms, the intention of the Legislature has been frustrated by a by-law of the Board of Works. Taking one year with another, two rents more may be produced by tillage than grazing, 4690–4701.—Seeds and manures cost about £1 an acre; implements never more than that sum. On all grounds tillage is superior to grazing, 4702–4704.

Model farms should realise a fair profit, those under Board have not done so; last year they were better. Boarders have not been so numerous as expected, though Irish Commissioners have been more successful in this department than other countries; for instance, Grignon, in France, and America, 4706–4712.—Great efforts have been made and money spent at the College of the Royal Agricultural Society at Cirencester, but with poor results; not 10 per cent. of the students are farmers' sons. At the college near Brussels of 49 students 20 were Americans. The classes of agriculture in the University of Edinburgh and in the Queen's Colleges, Ireland, have been comparative failures. Numerous private efforts have equally failed. These are quoted to show that the Board, on the whole, has been the most successful, 4712–4714.

At the school farms juniors do not receive agricultural instruction; paucity of boarders is not from any religious difficulty, 4715, 4716.—The present number of model schools is ample, 4718.

Experiments in farming are not for public Boards to undertake; those of English Agricultural Society and Highland Society have not been worth much; 4719–4725.—Experiments might be undertaken if Board had men of taste, zeal, and genius to carry them out. If they are conducted by men not bent on forwarding science more harm than good is likely to result, 4726 4730.

Further examination.

There are two principal reasons for the failure of the attempts to establish agricultural schools and classes; (1.) the persons who generally founded those agricultural institutions were benevolent and enthusiastic, but without the necessary knowledge to see the bearings of what they were doing; (2.) when the experiments begun people attached too much importance to science and too little to well digested knowledge; a counter action is now taking place, and people begin to see the real value of science; Cirencester College sunk £20,000 in farming experiments without a single practical result, 12935.—The earlier attempts were intended to reach the sons of farmers, but the farming class refused to take advantage of them, 12936.

There are under the Board seventy-eight ordinary agricultural schools, and five National-school gardens, 12937.—Agriculture, as a branch of popular education, has only been tried in Ireland; it ought to be taught in every National school, especially in Ireland, its practice and theory being lower there than in England, 12937–12941.—The National Board's example has been or is about to be followed in other countries, 12942, 12943.

Four reasons stated why agricultural instruction in primary schools has not extended more than it has; (1.) the indifference of teachers; (2.) want of en-

Thomas Baldwin, esq.

couragement on the part of Inspectors; (3.) fear of the landed gentry as to perpetuation of small holdings; and (4.) the difficulty of getting a piece of ground in close proximity to a school, 12944–12948.

The most important thing the Commissioners have done to extend the agricultural school system is the publication of the new class book, which is read in mixed schools by both boys and girls; the introduction of agriculture into the ordinary rural schools would not interfere with the literary work; it is rather promoted, as proved at Glasnevin, 12949–12955.

There is not sufficient material to make a comparison of the numbers attending agricultural schools with others; the industrial classes in these schools furnish an inducement for increased attendance, in the pence bestowed for their labour; the Commissioners expend about £50 a year in this manner, 12956–12960.

Generally, unless a boy can read in the Third Book, he should not be taught agriculture; but there are many exceptions in Ireland, big boys, who could very well learn agricultural lessons, no matter in what school class they may be; children above eleven years of age can very well receive instruction in the elements of agriculture, it is a thing they are continually concerned in, 12961–12970.—The boys show a taste for the theory, and a greater taste for the practice, 12971.

The objection that the addition of farms to National schools tends to the multiplication of small farms is not valid; teaching small farmers the value of land promotes healthy consolidation of holdings; the principles of agriculture can be taught as well upon one acre as upon 100; there is at present a great tendency to enlarge holdings, which goes on in proportion to the opportunity the capitalist has to buy up his neighbour's interest; and the better an educated farmer cultivates, the more capital he will have to buy with, 12972–12978.

It would be a great advantage to the country to have land attached to schools whereon the boys should be taught agriculture, but they must not be allowed to work there for the teacher's benefit, except with the consent of their parents; a good theory of agriculture can be taught in a school without a farm; a second element of success is for the teacher to show the boys over the farm without performing any manual labour; the third and best is where the boy's agricultural skill is cultivated on the farm, he being paid one penny per hour while working, the teacher profiting by his labour; when the latter mode is in use land for a school-farm is generally forthcoming; if there is any fear of the boy being worked for the teacher's benefit to his own detriment the practice is at once prohibited, 12979–12989.

The fact that teachers can improve their incomes by means of school-farms, and by qualifying themselves for agricultural teachers, ought to be an inducement to patrons to give land for the purpose; the schoolmasters (though willing) fear that, in taking up agriculture, they would lose their literary status; the thing is discouraged by literary inspectors; there exists no legal difficulty in establishing 500 schools in accordance with the views just expressed; it rests with the landlords, who have the land and sometimes the schools in their own hands; a moderate distance between the school and the farm does not vitally interfere with the practical farm-labour of the school pupils, 12990–12995.

The present system of payment should be changed; every teacher of the elements of agriculture, who cultivates his land, gets £5 a year, good, bad, or indifferent; payment should be by results, both in agriculture and literature; the teaching of agriculture, and rewards for answers in it, should be on a par with arithmetic, 12996–13010.

Generally the teachers of National schools in rural districts are considered to be under-paid; the addition of teaching agriculture to a school has brought an average addition to a teacher's income of nearly £20; an example cited of a really successful agricultural school, both in theory and practice, where the master has increased his income by £70 a year; this man accummulated his own capital, and has built himself a house, with accommodation for boarders, receiving no assistance beyond the £5 a year allowed for agricultural instruction; his character stands high in his neighbourhood, 13011–13031.

In the greater number of agricultural schools half an hour on five days in the week is given to indoor instruction; in some cases the hour devoted to play is occupied with agricultural teaching, so as not to interfere with the literary instruction, and the boys like it, 13032, 13033.—Reading the Agricultural Class Book is a lesson both in agriculture and reading, good especially for girls; all girls ought to learn the rules of dairy husbandry; the female teachers in the Central Training Establishment have for the last three years received lectures on the subject, and have shown considerable interest in it, 13034–13038.

The Commissioners pay for agricultural instruction only £5 a year to the teacher, and a penny an hour (on an average 3*d.* a week) to a few children; the teacher pays, and sometimes the patron, also one penny an hour for their labour to the children, 13039–13049.

The same principle of valuation is carried out in these schools as in the model schools; the only difference is, the Board's officers are not present; the valuation is generally done by two local farmers; the managers, as a rule, especially those who are priests, take an interest in these farms, 13050–13053.

The average number of pupils attending schools with farms is about forty, mostly boys, some girls are intermixed, both should be included; the average age of boys capable of earning 1*d.* per hour at the outdoor labour is from six to ten; witness prefers not to take boys under ten, the time to be after school hours, otherwise the school would be neglected; the work is done now after school hours, and the boys are mostly glad to do it, thereby earning one penny per hour; reading the class book should be compulsory, working on the farm must be voluntary, 13058–13078.

In some schools an hour is allowed for play; this hour is sometimes used for indoor instruction, sometimes for outdoor work; half an hour is the general play time; it is at the discretion of the manager; school time might without detriment be curtailed, 13078–13083.

There is at least one instance where a boy pays for his schooling by his afternoon's labour, 13086.

The system of agricultural schools was first established in Ireland by the Commissioners; it is a system *sui generis*, 13087, 13088.

The difference between model agricultural schools and ordinary school farms is, that in the former the buildings are more pretentious and the farms larger, and they provide accommodation for a larger number of boarders; Government contributes £10 a year to such, that is double what is given to ordinary agricultural schools; if Government contributes anything to the building the school must be vested, 13091–13097.—The position of manager of these schools differs in no respect from that of manager of ordinary vested schools; local management is not so efficient as that of the Board; the position of the teacher is a grade higher than that of ordinary teachers, as is also his literary proficiency; witness would abolish the distinction between the schools, 13098–13107.

As an instance of the success of a first-class school under local management, the history is stated of Lough Ash, the property of a minor, ward of Mr. (now Colonel) Kennedy, and in 1834 pupil of the Templemoyle agricultural seminary. Mr. Kennedy planted his ward Mr. Moore in the mountainous district of Lough Ash with a very small capital; bit by bit he has reclaimed 70 acres from absolute barrenness; he was agricultural teacher to his day school and receiver of rents of the estate. By his exertions and example the rental of the property has been increased from £144 2*s.* 10*d.* in 1834 to £317 14*s.* in 1864; the acres under cultivation have increased from 141 in 1834 to 670 in 1864; the population has risen from 96 to 282 in the same time; other statistics stated; all brought about through the wisdom of establishing the

school, and the zeal and energy of the teacher; the success is owing not so much to the individual as to the system; Mr. Moore's success, though singular, is not solitary, 13108–13113, 13252.—Map of the estate put in, 13135, 13136.

As a general rule roots and hay should not be sold off a farm, unless in exceptional cases, as from the neighbourhood of towns, and such like; but as few restrictions as possible should be put on an enlightened farmer, 13114–13122.—Further statements as to the sale of roots and purchase of manure, and to the practice of French farmers as to beet root, 13123–13135.

Explanation of the figures in report for 1866 concerning Glasnevin model farm and Athy school farm; the apparent discrepancy arises from the actual expenditure in one month not being entered in the office books till the following month; the two accounts could never be made to exactly correspond, 13137–13149.

The physical capacity of candidates at Glasnevin is tested for about four days; 10 were rejected last month; the class for training ordinary working stewards has good success; out of 878 trained, 500 are engaged in agriculture at home, a satisfactory proportion; of the remainder many are employed in offices in which their knowledge of agriculture is useful, or whose employments are more or less connected with agriculture, 13150–13165.

The rent of the spade labour farm is £3 19*s.* 3*d.* per acre; if it were situated in Sligo the land would not be worth more than 35*s.* per acre; the value of land depends on its contiguity to markets, and other things; the Glasnevin system might be carried out in any part of Ireland with profit, if the succession of crops be adapted to the climate, 13166–13173.—Glasnevin farm is worked as a normal representative of the farming of the country, nothing is grown that could not be grown on the mountains of Kerry; no advantage is taken of its position; it is in fact a small Belgian farm, 13188–13191.—The value of pupils' labour cannot be estimated; it has been put at the amount of a man and two lads, but that is merely an opinion; if witness worked the farm for his own profit he would pay the pupils to remain idle; an estimate can only be made of the labour that would require to be paid for; a man working 5½ acres in the neighbourhood of Dublin efficiently would realize £67 odd a year; if he worked it as a market garden he would make more; milk in the neighbourhood of an inland town would fetch only half what it is worth at Glasnevin; the profit would be increased considerably if early potatoes were grown, 13174–13187.

Explanation as to some so-called fixtures, 13192, 13193.—As to drainage, the Government rate is charged, 13194, 13195.

There was a general prejudice that model farms were like farming societies, established by landlords for their own benefit; the feeling is gradually diminishing, 13196, 13197.—It is a short-sighted feeling, which witness has endeavoured to remove; instances of its occurrence; the idea is that all tends to raise the rent; almost any move made by a landlord is in Ireland regarded by the tenant with suspicion, 13266–13272.

No returns are required where the manager farms on his own responsibility, 13198.

Explanations as to the balance sheet of Athy model farm, 13199–13204.

Statements as to the non-establishment of an agricultural class at Kilkenny, as to Cork farm, as to hired labour on Tervoe and Oldcastle school farms, and as to the Castleblaney school, 13205–13212.—There is a good class of boarding pupils in the Kilkenny agricultural school; the want of success in the boarding class there and at Limerick and Cork is not so great as it appears, the pupils leaving their schools for the Glasnevin establishment, 13223.

The boarding establishments as a whole have failed, they were too rapidly increased; the existing provincial schools are quite adequate to bring out the most deserving lads as skilled agriculturists; a moderate sum could not be more usefully employed than in so instructing them and then scattering them over the country to instruct the people; as a test of *bona fides* a small fee might be required; there was no demand for the young men first educated, they had to emigrate, 13213–13218.—Frequent complaints have been made of the remuneration offered to persons so educated, 13219–13222. Thomas Baldwin, esq.

The number of applicants at these schools is increasing, except at Belfast, 13224–13227.

The minor model schools vested in the Board correspond to the schools vested in trustees; boarders ought not to be continued in these schools, the literary department should be made first rate, and the farm made a real model of skilful cultivation; boarding might be continued in the district model schools, seven in number, which would afford all the accommodation needed; pupils to spend one year therein and then proceed to Glasnevin for two years, 13228–13237.

Glasnevin is going on very well, but is capable of great development; the teaching staff is not adequate, there should be at least one professor of veterinary surgery; with a moderate outlay the place could be made a great normal institution; instruction in the diseases of animals and their treatment, and in natural history, is much needed, 13238–13246.—The training there should be completed by the establishment of a rearing farm in the Dublin or Wicklow mountains, and by instruction in reclaiming land; the calves and sheep now reared at Glasnevin are so done at a loss, 13250, 13251.—It is desirable something should be done in forestry, 13253–13256.—Admission to Glasnevin is at present obtained by competitive examination; the character of the men selected is greatly improved thereby; description of the examination, programmes for the preliminary and second examinations handed in, 13257–13266.

The small farms in Belgium are about one-third the size of those in Ireland; several people live there entirely on farms of six acres; seven acres would be the average of small Belgian farms, as against fifteen acres of the Irish farms; the dairy is the general rent-payer on Belgian small farms, and ought to be and might be made to be so in Ireland; the annual wealth of Ireland might be increased £2,000,000 a year by means of dairy husbandry, 13273–13293.

The difference of climate would not prevent the Belgian system from being carried out in Ireland; the mean average temperature of both is nearly the same; statement comparative of monthly averages; it is a great mistake to state that the south of Ireland is too warm to grow flax; it is grown in Belgium at a far higher temperature and more profitably, 13294–13302.

An Irishman does not produce such good samples of flax as a Belgian, because he does not know how to treat it when grown; Government grants £3,000 a year for encouragement of growth of flax; the people do not want instruction so much in its cultivation as in the treatment of it when grown, after it is pulled; the proof that Irish farmers are not ignorant as to the growth of flax is in the fact that the gross produce of the raw material is rather more in Ireland than in Belgium; no doubt the crop requires special instruction, particularly among the small farmers, 13303–13315.—The erection of small scutch mills at convenient distances would be desirable; but in Belgium the average produce of hand-scutched flax is above that of mill-scutched; small farmers would be encouraged to grow flax by seeing some one enter on the linen manufacture, 13316–13320.

Farmers of both classes are wrong in their objection to grow flax; it is one of the most ancient agricultural pursuits of the country; the famine of 1848 put an end to the peculiar knowledge of its cultivation in Connaught, so that what we regard as new is in reality very old, 13321–13327.—The soil in Belgium being alluvial is more easily prepared, and, from its nature, the flax is better; it is hopeless to expect to grow flax without perfect tillage, 13328–13330.

Instruction in growing flax has been attempted on a small scale at Glasnevin; instruction on flax growth and manipulation should be a portion of the work done in industrial schools; a complete course of technical instruction is afforded in the school at Ghent, 13331–13333.

Rev. Lowry F. Berkeley.

BERKELEY, Rev. LOWRY E.

Is a Presbyterian minister at Lurgan, and Convener of the Committee on Elementary Education, 11355–11362.—Questions relating to elementary education which have been brought before the Committee during the past two or three years, 11357–11362.

Presbyterian body generally consider that the National system is doing good service to elementary education, 11363–11373.—Constitution of the Board requires modification; the work would be more efficiently done by a smaller number, and the public feeling would be as well ascertained; members should not be appointed as repesentatives of churches, but from their knowledge of education, and their desire to advance it over the country, 11374–11377, 11409, 11467–11479, 11641–11646.—A paid commission would be an improvement on the present system, 11480–11482, 11645.—Lord Stanley, in his letter, lays it down that the Board should be composed of men of high personal character and exalted position in the church, but he does not say that they are to be representatives of churches; such men as some of the Roman Catholic members have the confidence of the clergy and members of the different churches, 11410–11428, 11466.

Salaries of teachers, both male and female, are too low, 11378, 11379, 11458, 11612, 11613.—The increase should mainly come from the parents, 11399, 11459, 11614–11617.—Insufficient remuneration, and the dread of payment by results are driving away the best teachers, 11618–11622.—Qualification of teachers, 11382–11384.

Difficulty of getting teachers is increasing, especially in case of males, 11380, 11381.—No difficulty in Lurgan in obtaining monitors, 11385–11390.

Evening classes are very desirable, and should receive more encouragement than at present, 11391–11397.—Payment by results very objectionable as a general rule, 11398–11401, 11604–11611.—Mere examination does not ascertain the instruction given; some children who have been diligently instructed may be dull, and examination would not show the care bestowed; a system of payment by results puts an untrained unclassed teacher on a level with one of the highest qualifications; the system, however, is not altogether objectionable, 11685–11697.—Scale of fees in schools under witness is regulated by what the children are learning and the means of the parents, 11402–11408.—It is very desirable that classics should be taught in National schools; time might be allotted in the time-table as for other things, 11429–11436.—Classical instruction in the model schools is very desirable, but this alone would not meet the educational wants of the country, 11636–11640.

Presbyterian schools stand on precisely same footing as other National schools; the argument that the Board made a concession of principle to the Synod of Ulster has no foundation in fact, 11437–11447.

The Presbyterian Committee objects to the new rule of the Board, because it interferes with the parent's right of directing his child's religious instruction, 11448-11457.—Present classification of teachers is very good, 11460–11462.—At Faughanvale, in 1850, there was not one National school, 11483–11487.—When witness settled in Lurgan ten years ago, there was not a National school under Protestant management, owing to the political hostility of Protestants to the system; the system throughout the district is now very popular, and has been the means of removing prejudices and softening asperities, 11488–11497.—Number of Roman Catholics attending schools under supervision of witness, 11498–11519.

Roman Catholic children attend schools under Protestant managers, and Protestant children attend those under Catholics, for the sake of the superior education offered, 11520–11527.—The General Assembly has, on several occasions, expressed its approval of the National system, because it secures liberty of conscience to the members of all Churches alike, as opposed to the denominational system; the Presbyterian people are thoroughly agreed in this respect with the Assembly; ministers and people would rather have secular education than the denominational system, 11528–11533.—Number of ministers in the Assembly; number of Presbyterians at last census; number of children on school-rolls, 11534–11539.

The operation of the new rule of the Board, as to religious instruction, is not satisfactory; committee has a decided objection to the teacher being required to sign the declaration, 11540–11556.—Children in Presbyterian schools have full liberty to be absent from religious instruction; teachers are not allowed to advance Presbyterian views among children of other denominations; ministers sanctioning such a course would be censured by the Assembly, 11557–11561.

The Assembly has expressed its satisfaction at the decision of the Government not to carry out the changes proposed in Mr. Fortescue's letter; change in the system of boarding the teachers in training is very undesirable, 11562–11573.—The establishment of local model schools is disapproved by the Assembly, on the ground of their being in the interest of one denomination only, 11574–11587.—Objections to convent schools, and as to their becoming "local model schools," 11588, 11589.—Chaplains are not necessary; teachers in model schools are quite competent to give religious instruction required, 11590–11603.

Books of the National Board on the whole are good, but frequent editions are objectionable, and the changes have led to many teachers leaving the service, 11623–11635.

The rule regarding religious instruction, as explained in Mr. Kelly's letter with respect to the minute of August 25, 1833, was never carried out; the Presbyterians in 1840 agreed to receive aid from the Board on the basis of the four propositions of the Synod of Ulster in 1833, 11647–11656.—Reasons for rejecting aid prior to 1840, 11657.—The Presbyterians as a body decline to vest their schools on the ground that they would rather leave them so as to be free to receive State aid or not as they might see fit; Roman Catholics should enjoy the same liberty in every way, 11667–11682, 11738–11744.—Members of the Synod of Ulster had a large number of schools prior to union with the Board—so also had Episcopalians and Roman Catholics, 11745–11755.—The rule allowing ministers of any religion to visit the schools for the purpose of giving religious instruction applies permanently to vested schools, and to non-vested schools only during the receipt of grants, 11658–11666.—Presbyterians in Scotland are in favour of united education, 11683, 11684.

The present training institution should be maintained; the model schools are training schools; local model schools in the interests of one denomination would not be *model schools*, 11698–11702.—Presbyterians desire to maintain the present system; the success of the National system throughout Ulster has led to the extinction of middle class schools, and Presbyterians are anxious to introduce into National schools the same facilities as formerly existed, and these should be extended to all religious persuasions alike, 11703–11714.—Parents who are able to pay should be required to pay, 11715–11718.

Throughout Ulster there is a large number of Roman Catholics who wish their children to read the authorized version of the Scriptures, 11719–11730.—Personally witness would not object to one day a week being set apart for religious instruction, the remaining days being devoted to secular teaching; many would object to the teaching being entirely secular, 11731–11737.—Presbyterians object that clergymen of other denominations should have the right to visit their schools for purpose of religious instruction, 11756–11764.

Proportionately there were in Antrim and Down, prior to 1840, more vested schools under Presbyterian managers than under Roman Catholics, 11765–11768.—The Synod of Ulster proposed a system of education, specially providing against interference with Roman Catholic or other children who declined to accept religious instruction, 11769–11772.—Presbyterian

schools have increased very much of late, but the increase has not been promoted with the view of proselytizing, 11773–11779.

Further examination.

Referring to answers to questions 12103–12107, is only acquainted with Mr. Kavanagh by his having recently introduced himself. Had a conversation with him relative to observance by Presbyterians of rule of National Board as to excluding children from religious instruction; did not say one word to Mr. Kavanagh importing that Presbyterian clergymen do not obey the rule. Believes they do obey it, 13899–13907.—Mr. Kavanagh is under a misapprehension if he thinks anything was said or intended to the effect that managers do not observe rule in question; could not have said it, never having heard of such a thing, 13908–13911. Rev. Lowry E. Berkeley.

Has written reports and read them to General Assembly on relations of Presbyterian Church to National Board, but never published a pamphlet on the subject. Has never stated that Presbyterians ought to carry out their own teaching in National schools to the exclusion of Roman Catholics. Quotes, as an example of what has been said on the subject, a resolution of the Assembly recommending faithful observance of rules of Board, and the giving all children for whom it is desired full liberty to be absent from religious teaching, 13912–13917.

Blacker, Stewart, Esq. Stewart Blacker, esq.

Resides at Carrickblacker, Armagh, and is a patron of Church Education schools; is well acquainted with three or four. Schools are fairly efficient, but crippled for want of means, 16335–16340.—Teachers are very badly paid; competent ones are often obtained, though as a class they are inferior to those of National Board, 16341–16346.

Society will not receive State aid whilst exclusion of Scripture from schools is one condition of acceptance; Government might assist them by paying for secular education, and not obstructing their religious operations, 16347–16349.—Society had charter schools until Government grant was withdrawn; they now have only their own income of about £10,000 a year; with this, by having only a few superior schools, into which pupils are elected from ordinary schools in various parts, they do more for education than they previously did with their own income and Government grant combined. They receive some handsome sums for masters for pupils' answers, and prizes for pupils themselves from South Kensington; one boy got the gold medal. Some system of Government payment for results, similar to those for pupils' answers, might be adopted for primary education, 16350–16352.—Cases referred to of prizes obtained; boys were poor, and could not have competed had not primary schools been encouraged by Society; high attainments of teachers, 16353–16356.

Difficulty of Society is one of principle; they insist upon absolute freedom as to giving Scriptural instruction at any time they think right, 16357–16361.

The duty of Government is to give a religious education, but as things are, the religious point might be dropped, and secular primary instruction only paid for by State; the one great difficulty at present is, that Society and those who sympathise with them, insist upon not being bound in any way as to time of giving Scriptural instruction; as a rule it would doubtless be given at stated times, but they will not be shackled in the matter or bound to exclude it at any time whatever, 16362–16369, 16372, 16420–16422.—Party in Church holding these opinions is not practically diminishing, and funds of Society are fully kept up, 16370, 16371.

Schools are strictly denominational in principles of Church of England, and Society will not be satisfied with hours being divided between secular and religious instruction; will not have children "warned off" or Bible shut up at any time; will have liberty to introduce religious questions, &c., incidentally as occasion may arise; cannot say how many Roman Catholics attend, 16373–16385.—Would welcome State inspection even by people of contrary opinions, 16386–16389.

Never heard of proselytizing in Society's schools; Broad Scriptural principles should be taught to Roman Catholics and Protestants indiscriminately in ordinary course of instruction; controversial matters are not specially taught; cannot give any evidence as to National schools or system, 16390–16397.—Would be glad of State aid if restrictions withdrawn, but at present cannot get a fair share, as opinions are not respected, 16398–16401.—The law requiring Church ministers to provide a parochial school is more than carried out, but they have not the facilities they require, 16402–16406.

Society cannot agree with the restriction in National system, every human being having a right to a knowledge of the Word of God; the rule permitting some to leave school whilst it is read is wrong; parents have no right to prevent children learning the Scriptures, 16407–16412.

All who come to Society's schools must abide by rules; some of all denominations attend; design is to give an ordinary education based on the Scriptures, 16413–16416.—Number of pupils, &c., to warrant application for grant, 16417.—Cannot agree with those Protestants who accept terms of National Board, 16418.—Would not agree to exclude children of other communions for the sake of grant, 16419.

Never observed the Ten Commandments posted up in a National school, but has heard a priest in one teaching a whole class; their arrangement is to omit the Second and divide the Tenth, 16423–16425.—Society's principle is that Scripture shall be embodied in teaching; those attending know this, 16426–16427.—Principle of State ascertaining proficiency in secular matters, and leaving religious teaching to managers, &c., should be allowed to all sects. Denomination of Inspectors quite immaterial, 16428–16432.

"Proselytism" is an attempt to bring over a person of other religious opinions to your own; no such attempts in Society's schools; the Word of God is read and left to do its own work, 16433–16437.—Do not pretend to judge what is best for Roman Catholics, but insist that no shackle shall be put on Bible, 16438, 16439.

Well qualified Inspectors might be expected to discharge their duties quite impartially, 16440.—That part of rules under which Presbyterians receive aid that allows children to leave during Scripture teaching would not meet views of Society; the fundamental rule is that every child who goes to a school must read the Scriptures; a child refusing to listen cannot attend, 16441–16446.

Butler, Edward, Esq. Edward Butler, esq.

Is Professor in the Science Department and Superintendent of the Training and Central Model Schools, Marlborough-street, Dublin, 5940, 5941, 5943, 5958, 6260, 6261.—Was District Inspector for eight and a half years, also Head Inspector for eight and a half years, and for four years was in the Catholic University, 5942, 6052, 6126, 6129.

Subjects on which instruction is given in the science department, 5944.—Teachers in training are divided into two classes—the general and the special; those in

Edward Butler, esq.

the latter generally receive eighteen months' training. There are two courses during the year, the first, or spring course, lasting about five months (January to June), the second, or autumn course, four months and a half (August to Christmas), 5945–5953, 6070–6072.—In consequence of one term being shorter than the other, the instruction in some subjects has to be curtailed; it would be better if these two terms were equalized, but the summer and Christmas vacations prevent this, 5954–5957.—There is a great improvement in the acquirements both of male and female teachers who come up for training, especially those who have served as pupil-teachers, 5959, 5960, 5970, 5971, 5990, 5991.

Some few teachers (especially females) who have been educated in private schools, or schools other than National schools, have from time to time come up for training, 5961–5963.—Those who have not passed through a National school are rather deficient as compared with those who have; those who come from convent schools are generally exceedingly well prepared; very few come from monks' schools, 5965–5969.

Some few teachers have gone through a second course in the general class, 5972, 5992, 6100–6105.—The special class consists of young teachers who in passing through the general class have appeared likely, by some additional training, to become very efficient, 5973, 6093–6096.—Some of the special class reach the first grade of classification; others generally attain the second or first division of second class, 5974.—The numbers in the special class are limited to twenty-four masters and fifteen mistresses, 6097–6099.

Detail of professor's duties with the divisions during the week, 5975.—There were sixty-six male teachers (thirty-seven Catholics, twenty-nine Protestants), and seventy-three female teachers (thirty-one Catholics, forty-two Protestants) in training at the spring course, 1868, including masters and mistresses who actually hold schools, 5976–5978.—The greater number of those who come up are actual teachers, but during the last few years the non-teachers have been on the increase, 5979.—The non-teachers expect to obtain schools, but almost every course some have to leave without situations, 5980, 5984, 5986.—Applications for teachers have very much of late decreased, which may be attributed partly to the better training the monitors receive in the ordinary schools, and partly to the feeling of some of the Roman Catholic clergy against employing teachers trained at Marlborough-street, 5984–5986.—Origin of the objection, 6022–6024, 6067–6069, 6118.

Religious instruction of the Protestant teachers in training is entirely in the hands of the Protestant clergymen who attend to give that instruction to the children of the school. To members of the Established Church it is given by the Rev. Mr. O'Mahoney; he receives no emolument or pay from the Board, but an allowance was made to him by Archbishop Whately, which has been continued by the present Archbishop. The Presbyterians, Wesleyans, and Unitarians are attended by ministers of their own denomination. With regard to the Roman Catholic teachers, no clergyman has attended for about eight years, but whatever regulations he made at the time of his withdrawal are adhered to now as far as can be done; their religious instruction is conducted by the superintendents of the houses in which they reside, 5987, 5988, 6025–6038, 6060–6066–6232–6241.—No payment is made by the Board to ministers in attendance for religious exercises, 5989–6032.—Witness never knew of religious instruction being given to Catholic and Protestant teachers together by one person; had such been the case he would have heard of it; the arrangements of the institution would not allow of it, 6039–6043.

Witness is one of the general superintendents, Dr. Sullivan the other; the former takes scientific branches of instruction—mainly elementary mathematics and physical science, the latter having charge of the literary subjects, 5993–5997.—Both departments have a principal and assistant, 6053–6059.—Apparatus for illustration of physical science is very defective; it was used by Dr. Clarke for his lectures in the several model schools as well as at the training establishment, and consequently at his death was spread about; this is a disadvantage to the science instruction, and no steps have been taken to remedy it. There is a difficulty in getting things done; witness being under the impression that the Board intended to appoint another person to take charge of the physical science branch of his department, did not make any representation to the Board, 5998–6001, 6003–6008, 6073–6076, 6079–6090, 6227–6229, 6287–6295.—Extent of mathematical instruction, 6002.

Of 4,600 masters in the employment of the Board 2,400 have passed through the training establishment; as to mistresses, out of the 3,000 employed, about 1,000 have been at the training school; this is the latest return (1865), 6009–6011.—Schools under trained teachers are better than those under untrained teachers, 6012.—Every teacher should be required to possess some evidence of qualification; this is done to some extent now, as the Board will not pay the salary unless the Inspector reports that the teacher is qualified, 6013–6015.—Capabilities of training establishment to meet the demand for teachers, 6016–6019.—The number of Catholic masters who come up for training has diminished, owing to the objection of the Roman Catholic clergy to employing the teachers, 6020–6021.

No inconvenience has arisen from teachers of various religious denominations residing together, nor has any indifference to religious duties been observed by witness in the case of either Protestants or Catholics, 6044–6048.—Catholic clergymen always visit at these houses in case of sickness, and at any other time when called, 6049–6051.

Model schools do not train teachers, only pupil-teachers, 6077, 6078.—If a teacher be classed at the end of his training he is considered competent, 6091, 6092.—Number of teachers trained in several years from 1858, showing a decrease in the number of Roman Catholic teachers and an increase of Protestants, 6106–6117.—Many Catholic teachers are not under priests as managers, which accounts for the number who still come up for training, 6119.—Some Catholic teachers are appointed by Protestant managers, 6120, 6121, 6259.—Pupils of the training school are in point of mental power equal to those of former times, 6122–6125.

The pupil-teachers in the model schools are examined at the close of each year, and those who have completed their training of one or two years are recommended by the District Inspectors for further training in the Central Training Establishment at Dublin, 6130–6133.—It was the intention of Lord Stanley and the Government that after a certain time all teachers should receive instruction and training in the model school, Dublin, before appointment as teachers, but this regulation has not been carried out, 6134–6139.—Pupil-teachers and monitors who come up for training are well prepared, 6140, 6141.

All the teachers in training receive practical instruction in teaching; they are made to teach a class in the presence of the head masters of the model schools, who point out any defects and suggest improvements, 6142–6144.

If the circumstances of the country would allow it, it would be desirable that teachers should not be appointed until after their training; no great injury is felt by the schools in withdrawing the teachers, as the period of training is so short, but if they were to remain at the training institution for a year the schools would suffer materially, 6145–6147, 6162.—Out of 7,532 teachers trained by the Board, only about 3,000 remain; in ten years, from 1856 to 1866, 2,225 trained teachers left the service of the Board, being within 727 of the number trained in the same period, 6148–6153.—It is doubtful whether earlier training would induce teachers to remain, 6154–6158.—Comparatively very few teachers come up badly prepared for the Professors' lectures, as Inspectors are expected to recommend only those in the second division of the

third class; very few come up merely with the qualification of probationer—in fact they should not be sent, 6163.

Witness concurs in the opinion of Mr. Robinson, an Inspector, so far as concerns young men without schools, that they should be examined for a certificate allowing them to act as assistants only, after two years' service as pupil-teachers; but there is no necessity that a teacher should be trained at Dublin before entering a school as assistant, 6164–6166.

Mode of classification depends greatly on the mode of instruction, which is very personal; the examination is carried on concurrently with the instruction. At the end of the course the teachers are subjected to a written examination, and the professors, their assistants, and the head master form a board for classification, 6167, 6168.—Some Inspectors think very little of the classification, 6169. There is a difference of opinion as to whether the system of classification by professors is bad or good; the Inspectors possibly find a difficulty in having teachers sent with a higher classification from the professors than other equally good teachers who have been classed by the Inspectors for school-keeping; a similar difficulty arises in the training school, in which case not only the literary acquirements but the mode of teaching in the school decides the classification, 6170-6172.

Cases where the rules of the establishment are violated are very few. In cases of moral delinquency there is no means whatever of bringing the influence of ministers of religion to bear on the conduct of the pupils; with regard to Protestant teachers there is a clergyman who might be appealed to, but in the case of Catholics there is not, 6173–6182, 6185–6187.

Limit of age of male and female pupils in training, 6183, 6184.

The teachers make some advance in mathematics during the course, the main object however is to give them the best mode of teaching arithmetic, 6188–6197.

The majority of the teachers only stay one course; even this is better than nothing, as it gives them an insight into many modes of teaching, which they would otherwise know nothing about, 6200–6202.

Instruction in geometry, Euclid, and trigonometry, 6203–6207.—Chemistry and physiology are not taught—the teachers get them up from the reading books, 6208–6220.—Description of the method pursued up to classification, 6221–6225.—All the pupils in training at Marlborough-street are kept entirely at the public expense, 6226.—Many of the teachers who come up for training have been for some time in their schools, 6230–6231.—Training is not necessary in order to acquire high qualification and high pay, 6232–6233.

As far as witness is aware the Board took no action with regard to religious instruction of the teachers. When Dr. Murray was a member of the Board he appointed a priest to attend, but since Dr. Power was removed to Clonliffe no other clergyman has been appointed, 6242–6246.

The arrangements in the model and training schools are the same now as they were before objections were made by the Roman Catholic clergy, 6248, 6249.—Seventy-six per cent. of male teachers in training for five years preceding 1863, and seventy-three per cent. of females were Catholics; now these numbers are reduced to fifty-three and forty-eight per cent., 6250–6253.—Does not know whether lay patrons of Catholic schools have the same objection as the clergy, 6254, 6255.—Increase in number of Protestant teachers attributable to increase of schools under Protestant management, 6256.

Every teacher classed in the country is classed by the Head and District Inspector conjointly, 6257,6258.

Teaching of natural philosophy and physical science by witness and Dr. Clarke, 6262–6286.—The statement in a parliamentary return that the revision of the manuals of natural philosophy had been intrusted to witness is incorrect, 6296–6301–6445–6449.—Having seen that paper he revised the arithmetics—two of them, which he gave to Mr. M'Creedy, but nothing more was done with them, 6450.—This was done without any communication from the Board, 6451–6453.

Witness gives about thirty lessons to each division of the male class, 20 of an hour, and 10 of half an hour; besides these, he gives forty lessons to the whole class, and forty lessons to the mistresses, 6302–6305.—The arrangement that one man should be professor of a variety of subjects not a bad one, 6306.—Geology is not taught in the training schools; Dr. Clarke at one time occasionally lectured upon it, 6307–6309.—The apparatus already mentioned contains geological specimens, 6311, 6312.

Many of the teachers in the country have classes under the Science and Art Department; it is not the business of the Board to train teachers in that department, 6314-6316.—A book on zoology is among those sanctioned by the Board, but there are no means of teaching it, 6317, 6318.—Pupils attend the model farm at Glasnevin for instruction in agriculture; what preparatory knowledge they have of physical science they obtain in the country, 6319–6322.

Witness cannot say whether any other normal schools in Europe are like the Training Department at Marlborough-street; the latter is not a college; it is an institution for training teachers already in possession of schools, 6322–6324.

The assistant to the professor in the Science Department teaches arithmetic and algebra by an arrangement with the professor, 6325–6327.—There is not time in the course to give instruction in all the branches under five or six professors, 6328–6333.—There are at present two professors too many, and not enough grinders, 6334, 6336.—Any re-organization of the departments must depend entirely on what kind of work the teachers in training come up to; they will never benefit by being lectured to by professors; it would be better to do away with professors altogether, and have nothing but grinders, 6337–6339.—The assistants are not entirely independent of the professors, 6340.

Witness never received any communication from the Board as to any remedy of wants in his department with regard to physical science since death of Dr. Clarke; Dr. Clarke was appointed lecturer on physical science, having a choice of subjects, 6341–6348.—Inspectors make applications for science apparatus in model schools; there is no department for supplying apparatus, 6349–6351.

About 30 or 40 per cent. of the masters who come up are in a position to commence trigonometry, 6352–6356.—Trigonometry and the physical sciences are not necessary, nor should they be a *sine quâ non* even for a first-class teacher, 6357.

Mr. M'Gauley's book on physical science does not represent the present condition of science, 6358–6359.

Superintendence of boarding-houses by professors; previous to the superintendents the secretaries had charge, before them the accountants; an addition of £50 was made to the salaries of the professors for their duties, 6360–6371.—Superintendents visit the female establishments five or six times a year; the male establishments at Glasnevin about twice a year, 6372, 6373, 6384.—All matters of discipline, the dietaries, and internal arrangements of the houses, are brought before the professors as superintendents, 6374–6376–6384.—An alteration was made in the dietary with the sanction of Dr. M'Creedy, as the meat allowance was greater than the teachers got at home, other articles of food being substituted; as a practical result the teachers have been better in health since than before, 6377–6383.

Teachers were and are expected to produce certificates from the officiating clergyman, not as a *sine qua non;* these certificates are given to Mr. O'Sullivan and Mr. Rintoul, who register the teachers on their arrival in Dublin, 6385–6393.

The increase of salary, which can be obtained by classification from training, ultimately compensates for the loss of salary to the families of teachers; the teachers are not compelled to come up for training, 6394–6399.

Edward Butler, esq.

Witness never made any representation to the Board that religious instruction by a Catholic clergyman had ceased; the Resident Commissioner knew it perfectly well, 6400, 6401.—The superintendents have nothing to do with the matter; all their duty is to see that the rules are properly carried out, 6402, 6403, 6406.—There is no provision in the training establishments for the religious superintendence of the pupils, 6407.—Protestants receive direct instruction from their own clergymen, 6408, 6409.—Cognizance of superintendents as to attendance of teachers at public worship, 6410-6421.

Superintendence of females in the training department, 6422-6436.—In this establishment there are three persons in authority—superintendent, matron, and assistant to the superintendent; their functions, 6437–6444.

The period of training is not sufficient, 6454-6456.

The Very Rev. James Byrne, A.M.

BYRNE, the Very Rev. JAMES, A.M., Dean of Clonfert.

Is rector of the parish of Cappagh, Tyrone; one half the population are Roman Catholics, the other half equally divided between Presbyterians and Episcopalians, 21553–21557.—Is sole manager of three schools and joint manager of another; one fourth the children are Roman Catholics; several Roman Catholic schools in the parish, the nearest about two miles off; some Protestants attend these; reason, 21558–21566.—Is satisfied with National system, but not with results; objects to payment by results; reasons, 21567–21571.—Few school-fees paid; landowners subscribe. Residences for masters desirable. Has a model school; system is as good as can be desired; but same difficulty as in other schools, viz., the bad attendance. System of inspection is good. As high fees should be paid for children of upper classes in model schools as in private schools; thinks this is a general opinion. Advantage of mixture of classes; with properly arranged fees, model schools should be open to all, 21572–21584. 21619–21621.—National system is more likely to promote cordiality between opposite sects than denominational; intermixture above named leads to no inconvenience or religious indifferentism, 21585–21590.

Witness's schools are non-vested, and no Roman Catholic religious instruction is given; would not object to it, or to assistant master being a Roman Catholic. Has objected to a Protestant teacher giving such instruction. Believes Roman Catholic children attend on account of superiority of teaching, not from any pressure, 21591–21604.—Roman Catholic school being vested, witness's curate attends and gives religious instruction to the Protestants; is on best terms with priest; this cordiality is a most salutary example, and is one of the advantages likely to result from National system of united education. Roman Catholic teachers and pupils in Omagh model school; the latter get no religious instruction, but the Protestants do, 21605–21618.

No Church Education schools now in witness's parish; most of the neighbouring clergy acquiesce in National system; evils of denominational system for Ireland, and advantages of present system, 21622–21630.—Particulars of Protestant religious instruction in witness's schools and in the Roman Catholic schools; no arrangement for mutually visiting schools. Does not know a non-vested school where a clergyman of a different denomination visits, but knows one where a Roman Catholic master reads Authorized Version, &c.; particulars. Thinks it within rules of Board for a teacher to refer to Scriptures without quoting, 21631–21660.—One means of denominational system having a disuniting effect would be that secular reading books would be impregnated with dogma; observation refers mainly to working under Roman Catholic church; another strong objection would be oppression of religious minorities where numbers are too small to have a school of their own. Reasons for objecting to a scheme for having distinct schools for denominations in each parish, 21661–21669.—In south and west many parishes do not contain Protestants enough for an efficient school. Deteriorating effect and undesirability of small schools. Would not apprehend evil from rival schools in a district, 21670–21676.

As to Roman Catholic teachers in Protestant schools, and *vice versâ*, and as to Protestant children in Roman Catholic schools—would rather have separate schools for them. Believes Roman Catholics of his neighbourhood are satisfied with existing system, 21677–21683.

Religious instruction, to be efficient, must be distinct from secular, 21684–21687.—It would not do for State to support school and attend only to secular, leaving religious instruction wholly to patrons; minorities must be protected by a conscience clause, 21688–21690.—One objection to denominational system is, that it would necessitate denominational inspectors, as Roman Catholic hierarchy hold that secular education must be permeated with religion; still believes system advocated to be practicable, believes it works advantageously, and desires no alteration, 21691–21696, 21707.—Knows no instance of application for priest to give religious instruction in a Protestant non-vested school; has heard of Episcopalian teachers instructing Roman Catholic pupils in their catechism, but objects to it himself; it is exceptional for clergy of one denomination to teach in school belonging to another, 21701–21704, 21729–21732.—No doubt there is a less amount of religious teaching under present than under denominational system, 21705, 21706.—Thinks statement incorrect that every Episcopalian minority has a Protestant school accessible, 21708.—Religious minorities everywhere should have equal protection. No difficulty in obtaining sites for Roman Catholic schools in Omagh; is surprised that more do not attend model schools; is satisfied with management; never heard the teachers objected to; character of the latter, 21709–21728, 21749–21753, 21759, 21760.

Is quite satisfied with National system and books, 21733–21737.—Believes teachers in Kildare-place Society's schools used to hear reading lessons in Authorized and in Douay version, 21738–21740.—Referring to secular books as an important element in National system, should one (Burn's Third Standard Reading Book) containing distinct dogmas, be used, conscience clause allowing child to retire during catechetical instruction would be of no service whatever. Reading books in which dogmatic reasons on one side exclusively are given would tend to lead children to abandon their religion, 21741–21748, 21761, 21762.—Duties of clergy in giving religious instruction. Sunday teaching an effective addition, but daily instruction very desirable; where this cannot be given would be the more anxious to use other opportunities, 21754–21758.

Believes the demand for denominational system is chiefly clerical, and that therefore Government need not pay much attention to it. Laity unquestionably desire their children to have teachers of their own belief, but would rather have others than none at all, and therefore desire retention of conscience clause, 21763–21769.—Really efficient inspection highly important; frequent visits of persons interested are salutary, but their benefits are exaggerated. House visitation to urge sending children to school is very useful. Though majority of laity are quite satisfied with present system, majority of patrons desire denominational, 21770–21783. Is not aware that Church Education schools have held out special inducements to other denominations; clergy who have left these for National system are still zealous, 21784–21787.—Suggested system of State attending exclusively to secular, and leaving religious instruction to patrons, would not meet with general approbation, 21788–21790.—Gives an analysis of the signatures to a declaration in favour of united education, by members of Church of England and Ireland, and reads declaration, 21791–21798.

CLARIDGE, JAMES, Esq. James Claridge, esq.

Is accountant to the National Board of Education, and in that capacity has had charge of all their financial business, down to 1855, since then a portion of the duty has devolved upon Mr. Kelly, who is called the financial secretary, 3745–3747.—Has held office since 1835, and had been on the Commission of Public Instruction in 1834, 3748, 3749.

In answer to a request to describe the general nature of the arrangements of account and book-keeping in the National Board, witness produces two papers, one drawn up in 1861 to enable the secretaries to answer a letter from the committee of the Privy Council on Education in England, asking the same questions, the other a memorandum giving similar information in 1866 to Messrs. Vine and Mills, special commissioners from the Treasury to inquire into the accounts of all the public offices, and reads extracts supplying the information required; with some modifications the same state of things exists now, 3750–3759, 3939.

The staff in witness's special department consists of a book-keeper and seven clerks, a pay clerk, and a clerk whose business is confined to registering orders for books in the cash office; if the system were extended all over the country the present staff would not be sufficient, 3760, 3942–3947. All orders for payments, after passing through witness's department, and having his signature, go to the resident Commissioner; so that no money is paid on account of the Board without formal cognizance, 3761, 3762.

The expression "checking poundage" refers to a payment to the Post Office for their trouble of 3*d.* for sums under £2 and 6*d.* for from £2 to £5, it amounts to about £1,400 or 1,500 a year, and is the most troublesome part of the business, 3763–3765. The form of write-off between the Post Office and witness is by a cheque drawn on the bank; witness's object is to have as little money as possible pass through his hands, 3766, 3767.—The expenditure paid in coin at the office is paid by witness, who is the cashier, although accountant is his official title; since Mr. Kelly's appointment as financial secretary, the accountant's business has been done partly by him, partly by witness, and partly by the chiefs of inspection, all sitting in committee, 3768.—It is difficult to distinguish the duty of the finance secretary from that of the accountant, many things—requisitions from the country, contracts for provisions and coals, &c.—now go to him; in a mercantile office cashier and accountant are separate officers, with us the book-keeper and accountant are considered as mutual checks; 3769–3771.

There has never been a cashier distinct and separate; all money payments have been made by witness or the pay clerk; his accounts as cashier are balanced daily with the book-keeper, who is considered a subordinate officer in witness's department; our pay clerk is similar to what in other offices is called cashier, 3772–3776, 3779–3781.

Accounts are ultimately rendered to the Audit Office once a month; references back are sometimes made, but mostly on matters of form; Messrs. Vine and Mills reported, with regard to keeping account-books, "the National Education Office left nothing to be desired in this respect," 3777, 3778, 3969.

Mr. Kelly was made financial secretary by special order of the Board, which clearly defined his duties and the subjects of his cognizance, 3782–3786. *See further* 3969.

The pay clerk who sits in the same room with witness, and so subject to his supervision, takes receipts for the money paid, which receipts go at once to the book-keeper; practically the pay clerk balances his cash every day; the book of petty cash, payments of £20, £30, or £40, is balanced once a week; the book-keeper is the superior officer, the pay clerk is witness's assistant as cashier and accountant, 3787–3794.

The practice with respect to remittances on account of grant has been lately changed; formerly when money was wanted, application was made to the Irish Government asking them to apply to the paymaster in England for the money, and a fortnight passed before the thing was done; now application is made directly to the Paymaster-General in Dublin, and the money is got in three or four days; there is but one general account of the National Board in Ireland; witness keeps a personal one for his own security, he having always an imprest in hand for special services, 3795–3799.

Cheques are drawn in the book-keeper's office, initialed by him, signed by witness, and afterwards by Mr. Macdonnell, Resident Commissioner; every cheque requires these signatures; a registry of cheques is carefully kept, but it is not initialed by the signers of the cheques, 3800–3804.—In the occasional absence of witness or Mr. Macdonnell, cheques are signed by the book-keeper for witness, and by one of the other Commissioners for Mr. Macdonnell, 3805, 3806.—The Bank of Ireland returns the cheques, which are sent to the Audit office; they are checked every day, and always preserved, so that if questions arise the cheque itself can be referred to; the actual cheques, the orders for payment, and the receipts all go to London, 3807–3810.

The floating sum of £700 left in witness's hands, is to meet occasional expenditure and small payments in advance, 3811.

Witness describes (reading from his paper of 1866, there having been no change since) the course taken in remitting by post office orders the quarterly salaries to school teachers, 3812, 3813, 3976.

The bulk of the teachers will receive, in ordinary course, their salaries within three or four weeks after it is due by the Board, provided there is no irregularity, and the managers can attend to them; letters containing the remittances are not registered, they scarcely ever miss in the ordinary delivery by post; the post office order is drawn in favour of the teacher, and sent to the manager, 3814–3824.—The bulk of the Lady Day payment of teachers is now (May 4) finished. Witness does not know whether particular districts are taken first in making out the sheets for the quarterly payments; that branch is entirely under the Secretary's management, 3825–3828.—The manager has to fill up an elaborate quarterly account before payment is made to the teacher; if the manager delays, payment is delayed; or there may be correspondence or complaint; all doubtful cases lie over, 3829, 3830.

Separate post office orders are sent in all cases, so that each man gets his own money; about 53,000 post office orders are drawn in the course of the year, 3831–3834.—Formerly it was the custom to send the amount due to a school in one sum to the manager; on consideration, it was thought desirable to alter the practice, but, to keep up the authority of the managers, the orders were remitted to them, 3835.—If the manager be from home the teacher must wait for his money, 3836, 3837.—The change increased the labour in the office, 3838.

To some of the larger schools—convent schools—large sums are paid; in convent schools payment is made in one sum to the manager or principal person, generally the superioress; cannot explain the variation as regards convent schools from the general practice of sending a separate remittance to each teacher or monitor, 3839–3848.

The different sums paid to convent and other schools can be told from the books exactly; the details are so kept, many minute returns being often called for, 3849, 3850.—This information could not be furnished from the finance department; there they are entered as other schools are, 3851–3855.

Payments to pupil teachers in model schools are mostly made through an Inspector, who has a credit opened for him in a local bank; the pay sheets are sent

James Claridge, esq.

to him, which are sent back signed, and serve as vouchers; by this arrangement one or two small losses have accrued to the Board, not to the amount of £20 in thirty years, 3856–3864.

For printing forms the Board pays a bulk sum quarterly to the Stationery Office, who keep the control of such matters in their own hands; in printing school books the Board has a check; it first orders so many books to be printed, and the storekeeper certifies that so many have been received, then the contract is referred to, and a certificate, that the books are of the regulation size and quality; the account is examined, and if correct, witness signs an order for payment, which is countersigned by Mr. Macdonnell; "corrections," it is believed, are certified by the Secretaries; the contracts are made after the book is fully corrected, 3862–3872, 3878.

Duplicates of ordinary vouchers sent in for payment are kept; in the case of woodcuts the Secretaries vouch that they are value for the money paid; it is possible Mr. Thom has vouched for some; there might have been some peculiar circumstances leading to do it, but as a general rule, vouchers of persons not officers of the Board would not be accepted, 3879–3883.—Circumstances detailed under which Mr. Thom's certificate as to the charges for certain woodcuts was admitted, 3977.

The paymaster makes remittances in the name of the Commissioners of National Education, Ireland; they are made when occasion arises, both parties wishing to have as little balance as possible lying in the bank; smaller sums are applied for more than formerly; the requisition does not go to London now, it goes to the Paymaster-General here (Dublin) Mr. Godfrey, who merely directs the amount to be transferred from his credit to the Board's, in the Bank of Ireland, 3885–3889.

Information as to the course of proceeding in cases of delay in payment of teacher's salaries must be obtained from the Secretaries or Chiefs of Inspection; all the accountant has to do with is the actual fact of paying money when it is ordered; in some particular circumstances managers' certificates are altogether dispensed with, this is done on the authority of the Secretaries, as representing the Commissioners; the signature of the salary department is the accountant's authority for the payment of money; if they are satisfied no further questions are asked, 3890–3898, 3922–3924.

Interview of witness with the Commissioners on Public Accounts with reference to many of the subjects now under examination; the whole question of teachers' salaries is in a state of transition, pending the report of Messrs. Vine and Mills, 3898, 3899.—The teachers are anxious for more frequent payments, *i.e.*, monthly, 3900–3902.

All post-office orders are presumed to be cashed unless it is heard to the contrary; some complaints of irregularities have arisen; careful inquiry is made into such cases, and a duplicate payment is made pending the inquiry; the original sum has been recovered, 3903–3908.—The number of post-office orders per day is limited; the late Accountant-General of the Post Office could only issue 24 sheets a-day; the present Accountant-General gives 40; in round numbers 350 sheets altogether are required; considerable convenience would, of course, be afforded to the teachers if an acceleration of payment could be effected; at present if there be a teacher, assistant, and two monitors in a school they would require four post-office orders, which would be sent in one cover to the manager, 3913–3921.

The vouchers passed to the Audit Office consist of sheets containing the abstracts and receipts for each payment; the receipts are signed before payment to expedite business; in case of mistake a new receipt for the proper sum is sent for signature; the money is always received, 3925–3929.

There is always a difficulty, in endeavouring to expedite business, of not satisfying the Audit Office; a proposition to pay a man entitled to £20 a-year one-twelfth each month was met by the Audit Office with a supposition as to defalcations; the proposition would have involved an increase of staff; the same checks could have been used, 3929–3931.

A credit is opened to the Inspector in the local bank for the total amount due to the model school, and pay-sheets are forwarded to him signed by the teachers, &c.; these are stamped and sent back as vouchers; the correct amount only is remitted; no money is left in the Inspector's hands, 3932, 3933.—The Inspectors receive the school-fees and remit them once a month, 3934.—Inspectors' salaries are paid by bank post bills sent through the post, 3935.—So far as the accountant is concerned one document signed by the teacher is sufficient for the payment of his salary, 3936–3938.

Further examination.

Referring to two papers mentioned formerly (see qq. 3750–3759) witness puts in a fresh memorandum, as more respectful to the Commissioners, 3939.—(See page 176 of Minutes of Evidence, for "Memorandum for the Royal Commissioners on Primary Education, giving a short history of the financial department of the National Board of Education, from its commencement in 1831 to the present time.")

The proposition to pay salaries monthly instead of quarterly would be objected to; an alteration would be necessary in obtaining the managers' certificates, and the formal receipts now required to satisfy the Audit Office; the advance of the quarter's salaries to managers for them to dispense monthly would not be acceptable to the Audit Office, 3940, 3941, 3956, 3957.

The proposition that Head Inspectors should dispose of lump sums has been considered; it would not answer; the present system of checks and counter-checks is quite sufficient, 3948–3952.

Payments from the office are made in town by cheques, in the country by post-bills sent in halves, in England and Scotland by English bills at seven or ten days, and to National schools by Post Office orders in favour of the person who is to receive the money, 3953–3955.

Several commissions of inquiry have been had heretofore into the management of the office; Mr. Dean Wilson was the first, in 1838; he reported most favourably; Mr. Bromley came over in 1849 with a view of checking the whole system of accounts, he reported in 1850; a correspondence with him ensued, which resulted in bringing the accounts into pretty much their present state, and the appointment of a first-rate book-keeper; the next commission of inquiry was composed of Lord Monck, Mr. Stephenson, and Mr. Seaton of the Treasury; they suggested considerable alterations, some of which were not carried out; some alterations in the duties of several of the officers were made. After that in 1866, Mr. Vine and Mr. Mills came and examined our accounts, reporting that there was nothing to be desired in regard to accuracy and the mode of keeping the books; and in reference to the subject, witness hands in a paper asked for respecting the duties of Mr. Kelly consequent on the change, 3958–3969.

Witness, the proper person of whom to inquire, promises to furnish a statement of the entire cost of the last revision of the books, including extra pay to parties so employed, salaries to their substitutes while so employed, cost and names of reference books to assist in revision, and cost of printing of proof, 3970–3975.

Referring to a former statement (*see* 3777, 3778), the Post Office grant to us and to the Privy Council Post Office orders to any amount; the general public is limited to £10; and monitors in convent schools are paid separately by Post Office orders drawn in favour of themselves, not in lump sums, exactly in the same way as in ordinary schools, 3976, 3977.

CORY, Rev. HENRY C.

Rev. Henry C. Cory.

Is Secretary of Irish Church Missions; constitution and management of Society; number of schools, and number of scholars on the books, 11780–11792, 11889.—Object of the society is the dissemination of Protestant principles and the conversion of Roman Catholics, 11851–11854.—Income of the society, 11900–11903.—Description of education given in the schools, 11793.—Training schools; number and classification of teachers in training, 11794–11797.—Religious instruction is made very prominent in society's schools, 11798.—About two-fifths of the scholars are children of Roman Catholics, attracted by the excellence of the secular instruction and other inducements, 11799–11814, *and note*, 11822–11824, 11891–11898.—In some schools children receive food and clothing, which are contributed by local friends, not by the society, and are given to children of all denominations alike, 11825, 11930–11936, 11969, 11970.—Inspection of schools, 11826, 11827, 11839–11841.—Number of children on the roll; average attendance in winter and summer; number present on May 12, 1868; number of schools, 11816–11821; *see also table at foot of page* 494; 11870–11879, 11944–11947, 11966–11968.—Number of teachers in the schools, 11886–11890.

Teachers (all members of the Established Church) come up for training at about seventeen years of age, being selected by examination in Dublin, and remain in training for about two years, one month in each year being allowed for vacation; teaching is practised in the two model schools, 11828–11838, 11865–11867.—Staff of the training schools and course of training, 11880 11885.—Two-thirds of the scholars can read a little, 11842–11845.—Children come to the schools as early as three or four years of age, and generally remain till fourteen or fifteen, 11846–11850.—Results of society's operations, 11855–11864, 11971–11973.—The catechism is not taught to all the children, but the religious element pervades all the teaching, 11868, 11869, 11924–11928.—Salary of teachers, 11904–11909, 11913–11915.

Christian Knowledge Society's books are used in the schools, also some few historical books and the Bible, 11910, 11991, 11994.—School-fees are very rarely paid, even in Dublin, 11916–11920.—Teachers are not allowed to follow other occupations, 11921–11923.—The amount spent by the society on the schools, including training and inspection, is £6,000 per annum, 11937–11943, *and note*.—Society would be glad to receive aid from the State, but has not asked for it, 11929, 11962–11965.

The aim of the teaching, both in theory and practice, is the fundamental evangelical principles of the Bible, not controversy, 11948–11961.—Class from which teachers are drawn, 11974–11983.—About half the scholars are above ten years of age, 11985–11986.

Hostility to the schools is very rare; tranquillity has pervaded the localities of the Mission schools for many years past, 11992, 11995–12001.—Teachers in training attend a school-room in Townsend-street, which has been licensed as a church, for divine worship, 12003.—The teachers are all Irish, many of them Irish-speaking, 12004–12007.

CRAIG, THOMAS H., Esq.

Thomas H. Craig, esq.

Has been connected with Marlborough-street establishment eighteen years; is second-class clerk in Registry and Salary Office. Mr. M'Creedy's scheme for amalgamation of Inspection, Registry, Salary, and Correspondence Offices was to have country divided into sixty districts, instead of counties; less number of books and entries; letters to come only to men who did the work. This would save half the time, and prevent correspondence travelling from one office to another, 26991–27006.—Clerks would then have a smaller number of schools, and would know all connected with them; they often note what is to be done and superiors initial it, &c. Certain fixed matters and matters of routine could be left wholly to them, thereby saving superior's time considerably, 27007–27017.—Opinions of heads on scheme; has not heard any valid objection to it. Two books, and reading reports several times over, would be done away with, 27018–27020.

Office is under-handed from deaths, &c., some are sick; the principal room in which clerks work is unhealthy; complaints of this, and vote on the subject; extreme cold causes clerks to go to the fire frequently, which is against orders; position of room, 27021–27035.—Has never been called before Board to give an opinion on book named above; Mr. Keenan approved of it; Dr. Newell objected to it. Witness wrote to them because they were heads of his department. Description of the "Long Book," and explanation of the uses for the various columns, &c. There should be a regular record of everything done in the office—the particular action on any document either sent in or out. Is not aware whether Mr. M'Creedy showed this book to Mr. Claridge or not, 27036–27043.

CULLEN, His Eminence CARDINAL.

His Eminence Cardinal Cullen.

The three leading points which witness wishes to lay before the Commission are—1, religious education; 2, mixed education; 3, the National system in Ireland generally.

Religious Education.—Importance of religious education is shown in St. Matthew. The end is the salvation of souls; this cannot be attained unless we know what to believe and what to do; faith and works are necessary; this is the Catholic belief. There is a tendency to materialism, which can only be combated by early religious education, and there are bad books circulated against morality and religion; if the young be not trained up to resist the temptations, they cannot get through the world in safety. Many works have been recently published not only against the Catholic doctrines, but against the leading truths of religion which are admitted by all Christians. An extensive and practical knowledge of religion is therefore necessary to be imparted to children in school to prepare them for the struggles of afterlife. Testimony of Milton and Locke. Many speakers in the House of Commons show the value they attach to religious education; for instance, Lord Sandon, Lord Mahon, Lord John Russell, and Sir Robert Peel. Washington also, in his farewell address, points out the importance of religion and morality. Napoleon, when he undertook to re-establish religion in France, saw that he must begin with the education of the people; and M. Portalis, his Minister of Public Instruction, declared to the Legislative Body that religion must be taken as the basis of education. Guizot, Raumer (the Prussian Minister of Education), and Bishop Dupanloup, speak in the same strain. Dr. Doyle, an Irish bishop, who has been frequently referred to as favourable to the separation of secular from religious education, authoritatively teaches the contrary. The atmosphere of the school should be religious, and every hour of the day religion should be inhaled, 26587.

Catholics admit that religion should form the basis of education, and as they believe that there is only one true religion, it is a necessary condition of a good education that Catholic children should be trained in the Catholic faith. A denominational system should be introduced, Protestants and Catholics each having

His Eminence Cardinal Cullen.

schools for themselves. Under such a system there will be less contention, and more charity maintained. In Dublin there is very little mixed education, and there are no angry disputes about religion, whilst in Belfast, where the schools are mixed, there are continual religious dissensions. The old territorial or parochial system should not be abandoned. Where the minority is small it would have no right to interfere with the majority; they would probably be provided for by persons of their own religion from other districts. If, however, a provision be necessary, let the Prussian system be introduced, and some special regulation be made to protect the religion of each class, 26588–26591.

In a letter addressed to Sir G. Grey, the bishops say that where a religious denomination is unable to supply by itself numbers sufficient for a school, mixed schools might be established as an exception to the general rule, 26620.

Mixed Education.—As now established in Ireland, mixed education consists in assembling children of different denominations together, and excluding from the schools the teaching of doctrines offensive to the children present; however, the teaching of those doctrines in which all Christians unite has been introduced. If the principle on which the system is founded were fully carried out there would be very little religious training in the schools. In schools fully mixed nothing should be taught clashing with the views of Unitarians, Socinians, Arians, &c., or even with Jews, Hindoos, and the like. If poor children be not obliged to study religious matters in the schools, they cannot learn them elsewhere; they have not sufficient attention to derive much benefit from a long and continued discourse on Sundays, and it is difficult to keep them together for a sufficient time to give them full religious instruction. The feeling in Ireland is altogether unfavourable to mixed education, and as to the Catholic clergy, though they have sometimes consented to mixed education as an experiment, they have always been in favour of a denominational system. In 1824 a petition from the Catholic bishops was presented to Parliament, altogether favourable to basing education on religion. In 1826 a series of resolutions was adopted by the same bishops, insisting on an education fully Catholic, but consenting to certain modifications to meet the views of those who were anxious for a certain mixture of different denominations in the schools. Again, by the Synod of Thurles, in 1850, and by general meetings of bishops in 1859, 1863, and 1867, the principle of mixed education was condemned, and a distinct declaration made in favour of a denominational system. The bishops have also at later times addressed letters to members of the Government explaining their reasons for wishing for denominational education. Six millions of money have been spent in promoting the National system, and every possible encouragement has been given to it, and still the schools are not mixed to any great extent, 26598, 26599, 26620, 26621.

Turning from Ireland, we find that in England denominational education is recognised by law, and all the schools aided by the State are required to have a religious character. Even in the appointment of the Inspectors the Committee of Council consults the religious bodies before making representations for appointments, and in the trust deeds the rights of Catholic priests and bishops are guaranteed. The Popular Education Commission reported in 1861 that the existing plan (the denominational one) is the only one by which it would be possible to secure the religious character of popular education: this Commission in its report expresses very much what Catholics feel in general in Ireland.

In foreign countries the same feeling is found which manifests itself in England. In France, after attempts to spread mixed education under Louis Philippe, freedom of education was introduced under the President of the Republic, and denominational and religious schools have spread through the whole Empire. From the fact that there are more than two millions of children frequenting schools under Christian Brothers or nuns, it may be concluded that a great feeling exists in France in favour of unmixed education. In Prussia the denominational system is established, and is working satisfactorily to every class of the people. This system prevails also in Austria, where Catholics form the great mass of the population; the Protestants have the same rights in their schools as the Catholics have in theirs. In Belgium the same liberty of education exists as in Prussia and Austria; some attempts have lately been made to establish mixed schools, but they were opposed by the bishops and clergy as not being in unison with the general feeling of the country, which is Catholic.

In Holland a system has been introduced similar to that which prevails in Ireland; it is described in a recent letter of the Very Rev. Dr. Lambert Van de Winkel, who states that the public in that country is divided into two camps—the one that of State education and neutral schools, the other that of denominational schools and private teaching. The bishops of Holland assembled last August, and published a letter in which they explain their views in favour of denominational, and emphatically condemn mixed, or godless, education. Mr. Gregory, M.P., in a speech in the House of Commons on 15th May, 1866, points out the evils arising from that system of instruction.

The system of education in the United States is very like the system in Ireland, and is of old date. The Rev. Mr. Fraser, in his report upon the common or mixed schools, states that in several of the States religion is not altogether excluded, but he reports very unfavourably of the effects produced by the teaching in them; the religious tone is altogether wanting in them. The Protestant Bishop of Tennessee, in an address on education, delivered in London, points out the important defects of the secular system, as leaving the children utterly ignorant of the principles of duty, truth, religion, and honour. The Catholic Archbishop of Baltimore, in his volume of "Miscellanea," writes that, so far as Catholics are concerned, the system of common schools in America is a monstrous engine of injustice and tyranny, and practically operates as a gigantic scheme for proselytism. Several other Catholic bishops write in the same strain. The Archbishop of New York (in which State the common school system has been very fully developed) writes that, so strong is the feeling among Catholics that the working of the system is detrimental to their faith, the most strenuous efforts and sacrifices are made to support Catholic parochial schools. Though they are taxed for the common schools, they get very little of the public money. Catholics may occasionally get a site for a school, or some little assistance from the State, but they are excluded from all substantial government aid. Church Education schools in Ireland cannot be compared with Catholic schools in New York. In the latter place Catholics are taxed for schools which they condemn, whilst in Ireland, there being no school tax, the supporters of Church Education Society have only to support their own schools. In Ireland, too, Protestants have at their disposal large funds for educational purposes, taken at least in part from Catholics. The Bishop of Newark writes that in his opinion a great deal of the crime of America, and most of the private and public dishonesty which is so prevalent, are originated by the system of intellectual training without religion; it breaks down family influence, and is an injustice by the exclusion of Catholics through the dangers to which it exposes their faith. The decrees of the Plenary Synod of Baltimore in October, 1866, also point out the dangers and evils entailed on Catholic youth by frequenting these schools, and the Synod exhorts the bishops to take care that schools be attached to every church in their dioceses. These various documents show that in the United States the feeling is very much against mixed, and in favour of separate education for Catholics, and in Canada the same feeling prevails.

In Lower Canada, where the population is Catholic,

the schools are denominational. Protestants have schools of their own, and special provisions are made for maintaining these schools independently, giving full satisfaction to the Protestant population. In Upper Canada, where Protestants are in the majority, an attempt was made to compel Catholics to attend the Protestant schools, and to establish the system which prevails in the United States. After a great deal of quarrelling it was agreed that, wherever five families should unite in asking for a school of their own denomination, such a school should be established, and in this way the requirements of the Catholic minority are now provided for.

The Pope, in a letter addressed to the Archbishop of Friburg in Germany in 1864, regards the mixed system of education as being fraught with great evils, especially in primary schools, where religious teaching ought to have such a leading place in all that concerns education and instruction, that whatever else the children may learn should appear subsidiary to it. Reasons for laying before the Commission the testimonies of lay and ecclesiastical authorities.

A mixed system was attempted in India. In a Parliamentary Report, published in 1853, an account will be found of schools where Hindoos, Mahomedans, and Christians were assembled together. The witnesses examined by the Committee show that the effect of mixed education in those schools has been to create a spirit of infidelity, and while tending to undermine the convictions of the native mind in Hindooism, has failed to supply a purer faith.

In a literary institution in Belfast [the Belfast Academic Institute], the professors professed to pledge themselves not to interfere directly or indirectly with the religious faith of any of the pupils, but, notwithstanding, great complaints of proselytism were heard, and a Government Commission was appointed to inquire into them. The Bishop of Down and Connor, one of the witnesses, considered that students learning Hebrew and Greek from heterodox professors were in danger of being infected with heretical opinions. Must it not then be admitted that Catholic children are at still greater risks in National schools? The late Dr. Cooke pointed out the various ways in which the convictions of children may be shaken by professors of a different religious opinion. Other witnesses gave evidence to a similar effect.

The Royal Hibernian Military School in Dublin was a purely Protestant school up to 1839, and has cost an immense amount of money since its foundation. In 1839 the restriction was modified, allowing only one-third of the children to be Catholics whilst two-thirds are Protestants. The Catholics are now entitled to a free profession of their religion. Up to 1861 there was no Roman Catholic officer or person of any station, except the Chaplain, and according to a Parliamentary return in 1864, only a few of the inferior officers and servants were Catholics. There are grounds of grave complaint against the books used, in which things are represented in a most unfavourable light to Catholics. Every increase of mixed schools is an evil; there should be none but denominational schools.

The number of children at present in Church Education Society's schools is about 6,000 in all Ireland, but there are tens of thousands of Catholic children getting indirect religious instruction from Protestant teachers. Witness was under the impression that the Bible was not read by Catholic children in Church Education schools, but that not being the case the sooner the children leave the better, as they are violating the discipline of their Church, and the poor children cannot make a religion out of the Bible. If the schools were made denominational, those of the Church Education Society becoming Protestant in name and reality, and Catholic schools Catholic, each could then fairly claim a Government grant, just as Protestants and Catholics do in England; but if any unfair proselytizing arts were used, the grant should be withdrawn, whether from Catholics or Protestants. The Irish Catholics have never been charged with proselytism; witness would not dread proselytism if exercised without violence, threats, or bribes; if it were the grant should be withdrawn. It might be necessary for the State to interfere financially, and it would be quite justified in stopping supplies if things were done improperly. There would be no difficulty in deciding whether the managers of a school were acting fairly. It is very easy for a board to determine that; the National Board must at present decide such questions. His Eminence Cardinal Cullen.

The French laws contain many objectionable enactments, and the higher schools appear to be tainted with infidelity. The schoolmasters are appointed by a committee, but the parish priest is always a principal member of it, and he has very great power in the appointment and removal of the master, and he has the right of visiting the school, and seeing that nothing improper is taught in it; the priest has the control of everything connected with religion. The higher schools cannot be opened without the sanction of the Government; the lower schools are sanctioned by the Prefect of the department, who represents the Government, and who must be consulted on almost everything. The General Inspectors are appointed by the Minister of Public Instruction after consultation with the Superior Council; the inferior Inspectors *après avis du Conseil Académique*, one of which exists in every department. The Inspectors are appointed according to the religion of the school. French schoolmasters are required to hold a certificate of capacity; this would not be tolerated in free countries. In the end liberty will work better than restrictions and systems of examinations and certificates. The French system is very much opposed to our ideas of liberty and constitutional government, and witness would not desire to see it introduced among us. The Prussian system is very similar to the French in these respects. In Prussia the priest has much more power than in France. In these countries, where the commune is too small for two schools, both parties unite and form a mixed school, but the religious opinions of each must be respected. The same system might be introduced into Ireland in similar exceptional cases, care being taken to secure that the schools in general should have a religious character. In Belgium the priests occupy a similar position to the priests in Ireland; they are managers of many schools, and have a great control over them. Aid given to Belgian schools, 26630–26683.

If the denominational system were established, Catholics would have no objection to a mixed board constituted of independent gentlemen receiving no salaries, provided its functions were confined to financial and literary matters, with a general right of inspection in these departments. Paid boards do not enjoy the confidence of the people, and have not been very successful. The constitution of the National Board is better than that of the Poor Law Board, but its working could be improved by selecting gentlemen who could generally attend to manage the business; it would be better without the paid Commissioner. Two paid Secretaries acting under the orders of the Board would conduct matters better than a paid official of the same rank as the other Commissioners.

The leading rules of the Board should be confirmed by Parliament, leaving to the Board itself the right of modifying them in minor matters. Before the last change in the constitution of the Board very few Commissioners ever attended; since the numbers have been increased, a larger number may be present, without giving the merit of better attendance to each member, 26592–26597, 26622–26629.—Lord Stanley's letter stated that the system should afford a combined literary with a separate religious education, that the Commissioners should exercise full control over the books used both in the literary and religious instruction, and that the most scrupulous care should be taken not to interfere with the peculiar tenets of any description of Christian pupils. This system has been abandoned. The books for common use in the schools are all explained by the teacher, and hence an opening has been made for proselytism. It is impossible, where the books are replete with Scriptural and religious

His Eminence Cardinal Cullen.

matters, to prevent a Protestant master from giving Protestant religious instruction to Catholic children, or a Catholic teacher from giving Catholic religious instruction to Protestant children; the only remedy is denominational schools. The financial arrangements of England cannot be suited to Ireland, where the people are so poor. If training schools were allowed to be established on the same principles as those at Hammersmith and Liverpool the Irish people would be very thankful, and the same privilege should be extended to other bodies. This would diminish the objections to the Marlborough-street institution, but it would not remedy everything, as the religion of the pupils would still be exposed to great danger. Nothing will satisfy the Catholic body now but denominational model and training schools; they do not see why they should not have schools the same as in England, 26600–26610.

Mr. Fortescue's proposal to have separate boarding houses, but the pupils still all to meet in the same class, would not be satisfactory, as it would retain all the evils of the mixed system; his proposal with regard to the establishing of model schools by private persons with a National school attached would be a measure of great national importance if carried out. The Board's agricultural schools are objectionable both on religious and economical grounds. School gardens and school residences would be of great service to the teachers, whose salaries are not at all sufficient for their support. In the greater part of the country payment by results would be very useful, as it would be an inducement to the master and manager to see that proper attention was paid to study; exceptions would have to be made for those districts where the master could not keep sufficient children to obtain good results. In many cases a little more local aid might be obtained, but if the people have not contributed very largely to the payment of schoolmasters, this is due to their poverty and to the many demands for works of charity. Local school rates might be as unequally levied as the poor rate, the rich places would perhaps pay least, and the poorer most. The question of books is of very great importance. In order to promote the publication of good books and to secure variety, every manager should have full liberty to select his own; the Board should have power to exclude everything treasonable or illegal, and the ecclesiastical authorities should look to the religious part. The anti-national monopoly enjoyed by the Board has put an end to all competition and served to crush the talent of the country, 26611–26619.

The National or Mixed system as it prevails in Ireland.—The system was introduced about the end of 1831, or beginning of 1832, based on a letter from Lord Stanley to the Duke of Leinster. The plan laid down was that the system should be a "combined literary and a separate religious education." This was adopted by Catholics as an experiment; Dr. Murray took an active part in establishing it, and the other bishops wished to give it a fair trial. A change of feeling was, however, brought about to a great extent by the modifications which were made in the original system, and both the Catholic prelates and the great mass of the Catholic people began to condemn it as being gradually developed in a way injurious to their religion. There was to be nothing about religion either in the teaching or in the books of the school. Books, compiled by Protestants were introduced containing a great deal of religious matter, and long extracts from the Old and New Testament: this was a measure which could not be approved of by the Catholic prelates and people. Originally the clergy were permitted and encouraged to give religious instruction to children of their own persuasion, but now in non-vested schools the manager has the power to exclude all religious teaching. The rule as to the register of attendance at divine worship required by Lord Stanley's letter has been altogether abandoned or never carried out.

In the beginning, schools kept by nuns and those of the Christian Brothers (who are the very best teachers in the country) were allowed to get grants; the rule has been, since 1855, that no one who makes religious vows or is in holy orders shall teach in National schools. The Board in the case of nuns' schools allow 4*s.* per head, whilst in some National schools the payment is more than £1. Other changes have been made, all tending very much to excite the jealousy of the country against the National system. It was laid down by Lord Stanley that the rights of the pastors should be fully recognized, and Mr. Cardwell stated that the government cheerfully recognized the right and duty which belong to the heads of the respective churches in regard to religious instruction. Under the present rules the system is wholly changed. No child is now to receive or be present at any religious instruction which the parents or guardians disapprove. Catholics admit the parental right to its fullest extent, but as the poor are oftentimes ignorant, and not sufficiently independent to resist the wishes of those above them, the abandoning of the protection of the children to mere parental power is not sufficient to prevent proselytism. While Catholics admit the parental right, the authority of the Church must not be excluded; those who have become Catholics must be guided by the decisions of the Church. Persons not subject to the Church do as they wish; the Church does not interfere with them. Archdeacon Stopford shows how easily parental authority can be set aside when it clashes with Protestant views. According to Dr. Whately (who was the life and founder of the Board), parental authority being set aside, the religion of any child may be exposed to great danger, and thus by substituting parental for paternal authority a great opening has been made for proselytism in National schools.

The analysis circulated by the Board with its books gives a very fair account of their character; they are religious, but not so in a Catholic sense. None of the religious matters were taken from Catholic authors. The fact of these books containing so many religious matters gives an opportunity to teachers of insinuating or directly teaching their own religious opinions. This is confirmed by several Protestant managers of schools. The Rev. Mr. Trench, Rector of Newtownmeath, states that in his judgment the teaching of Roman Catholic children on the points upon which Protestants and Roman Catholics agree is very far from letting Popery alone. Rev. Mr. Campbell and Dean Kennedy, in their evidence before the Parliamentary Committee of 1837, show that there is no protection against proselytism for a Catholic child under a Protestant teacher. Dean Kennedy adds that the "principles of the Board are the principles of the Reformation." From this it appears that there is very little protection in the guarantees now given by the Board that parental rights will be respected. The opinions expressed by Protestant dignitaries show how difficult it must be to restrain proselytism, as may be seen, for instance, from a speech of Dr. Daly, Bishop of Cashel and Waterford, in 1843, which has been re-echoed by the Church Education Society in their various reports.

With regard to the attendance of children of different religions at the same religious instruction, it appears that in the beginning children were not to be present at any religious instruction of which the parents did not approve, or at which the parents did not direct them to attend. By the modified rule the only protection is that children are not *compelled* to attend at religious instruction, but it is left free to masters or managers to persuade or induce them to attend. Now a notice-book is to be kept; no child is to attend religious instruction unless the parent shall have signed a form in that book. The proper rule would be to hold, as a matter of course, that all poor Catholic parents wish their children to be educated in the Catholic religion unless they give positive directions to the contrary. These changes have excited a bad feeling against the Board. In the report for 1859 it is stated that 1,816 Catholic children were reading the Protestant Bible in Protestant schools, and Mr. Keenan stated that this practice was quite common.

How this mixed religious education was working against Catholics may be seen from the "Life," works, and charges, of Dr. Whately, according to whose opinion the National system was acting as a great engine for undermining and destroying the Catholic Church in Ireland, and upsetting the authority of the very persons who were engaged with him in carrying out the working of the system.

There are 2,365 schools with 360,000 Catholic children attending them, and with no Protestants. So far as these schools are concerned witness has no objection, except that they are under undue restraint, and the religious principles of the children may be weakened through the absence of prayer and good works. Besides these schools there are 2,649 under Catholic teachers, with 330,000 Catholic children, and 24,800 Protestants on the roll, or an average attendance of about 8,000 of the latter. In these schools Catholics would have no great danger to apprehend, but Protestants would have a right to complain that in such schools they are not very likely to be safe.

There are 132 really mixed schools with 13,000 Catholics and 14,000 Protestants; these are mixed in principle and practice, and are the more dangerous on that account. There are 197 Protestant schools with no Catholics, and to these schools there is no objection. Then there are 1,039 Protestant schools with 29,000 Catholics and 115,000 Protestants; in these the example and tendency of the teaching must contribute to shake Catholic convictions and wean the children from their own Church. In Dublin there are at least 36,000 Catholic children attending purely Catholic schools (that is, including schools under the Board, schools belonging to the Christian Brothers, and schools of a higher class). Throughout the diocese of Dublin the mixture is so small as scarcely to be taken into account, and in the south or west it is the same or less than about Dublin. The only really mixed schools are the model and training schools, which would not maintain their mixed character long but for the money spent upon them, and the efforts made to attract children to them. In Dublin, the absence of the Protestant element in schools under the Board may be accounted for by the attendance at Church Education schools; the number of children in them is not great, but these and the Protestant parochial schools are purely denominational. In every parish there are parochial or other schools for Protestants alone, so that both Protestants and Catholics show their desire for separate education, 27044–27048, 27446–27450.

The first objection to the model schools is that they are founded upon the mixed system. The training schools attached (which are a sort of mixed boarding houses for Protestants and Catholics) are of a most objectionable character. Young men of every religion live and are trained together, with very little religious teaching, and with very little care to make them practise any religion. Young teachers cannot be well trained in such establishments. The training schools are also deficient in some important branches of literary teaching, history for example. Mr. Butler, Dr. Newell, and Mr. Keenan show in their reports how much history is neglected. In all the books of the National Board there is scarcely a page of Irish history. The distinguished men of later times are not mentioned, and the books are silent as to the great saints and missionaries of the Church of Ireland: this is worthy of the severest reprobation.

The period of training is not long enough. Some of the young teachers remain for four and others for six months at the institution in Dublin. Four months are not sufficient to give a training to any man who is to teach others. In France every teacher must pass three years in the training school before he is allowed to teach, and the Christian Brothers in Ireland oblige their young members to go through several years probation.

The agricultural schools are of little value. One good agricultural training school would be very useful. Glasnevin is rather successful, but as long as it is conducted on the mixed system it will be very objectionable.

His Eminence Cardinal Cullen.

The model schools in general are exceedingly expensive. If the enormous amount spent on model and farming schools had been expended in building ordinary schools a great deal of good service would have been done. In the model schools the cost of education is about £6 per head per annum, whilst in convent schools, where the education is perhaps better, it is only 4*s.* per head. In a financial point of view there is a great waste of money. There are good teachers in Marlborough-street, but a great number of the children receive a very inferior education; the smart intelligent boys are taken care of while the others are neglected. Another objectionable feature in model schools is that they are frequented by children who can afford to pay for themselves. Those who can afford to pay for yearly tickets on railways to attend should go to boarding schools, 27048–27050.

Board's books.—The First and Second Books of Lessons were compiled by the Rev. J. Carlile and his relation, Dr. M'Arthur. The Second Book was revised by Dr. Whately, and Sequels Nos. 1 and 2 were compiled by his Grace and some of his family. Dr. Carlile shows that ushers or under teachers, Scotch and Protestant, assembled together and concocted these books, containing Scriptural extracts and religious matters, for the Catholic people of Ireland. As regards Carlile's Scripture Lessons they have been long since banished from Catholic schools, and Dr. Whately's Lessons on Christianity have been condemned by the Holy See. Some of the very elementary books have a great deal of matter totally unfit for poor children. In the index of one of them will be found such terms as Grallatores, Rasores, Quadrumana, Pachydermata, &c.; a poor child meeting such hard words as these would be tempted to throw the book into the fire and never read a word again. Indeed, this book contains no instruction of value that a person would wish a child to recollect; and in the chapter on National schools there is a passage calculated to make a false impression on the minds of the children.

In the Second Book matters are introduced which offer a ready occasion for insinuating doctrines contradictory of the Catholic Church. In the Fourth Book there is a passage which intimates that no one who speaks Irish, or Welsh, or Scotch is educated, and that England and Ireland have the same laws, which is not correct. The deaf and dumb school at Glasnevin is mentioned, but those at Cabra are excluded, and there are statements which are altogether incorrect. This book also contains passages which either suggest anti-Catholic ideas, or give an opportunity of inculcating them. In a book for girls lately published there is scarcely a word about religion; it could have been written by any of the old Pagans.

The Fifth Book contains a description of the globe and a short geography, but Ireland is not mentioned at all. As to history, Ireland is mentioned twice only, in a chronological table. In the passages with regard to the Reformation, to Constantine, and to the apostacy of Julian, there is much that is false and injurious to Catholics. The Fourth Book (ed. 1867) contains, for children of eight to ten years old, fourteen chapters on political economy. What profit can children derive from reading such treatises? The passage as to Queen Phillippa making the sign of the cross has been objected to, and is said to have been struck out; it contains nothing objectionable, and why should not Catholic children read it if they wish? The fact shows the difficulty of carrying out mixed education. The Supplement to the Fourth Book has many objectionable passages in it, and the like is the case with the Fourth Book of 1851; all this shows that the books are not of real value, and are not suited to Catholic children; if they were cast into the sea, neither literature nor religion would suffer. There should be Catholic books for Catholic children, and others should have books for themselves according to their particular opinions, as in England, France, and Prussia, 27048–27050, 27076, 27106–27110.—The Catholic Poor

His Eminence Cardinal Cullen.

School Committee adopted the National books, and desired to continue them, because they would otherwise have had to recur to worse. The books published for Protestant schools could scarcely have been used by the Committee, 27111–27118.

Christian Brothers' Schools.—The Christian Brothers were founded about 1802, since which time they have extended themselves very much. They were connected with the Board at the commencement, but have separated from it, as they would not be allowed to carry on their own system. They have 60 establishments in Ireland, 225 schools (the building of which cost £154,000) and between 25,000 and 30,000 children on the roll. The State does not contribute to their support. The efficiency of the schools and the excellence of the training are shown in the report of the Endowed Schools' Commissioners. The schools are conducted on the religious principle, religion being continually inculcated in the lessons, to which may be attributed the fact that they have scarcely produced one Fenian. The superior, in 1866, addressed a letter to the directors, the object of which was that every possible care might be taken by the teachers to prevent the spread of Fenianism amongst the pupils, and undoubtedly this had a good effect. The attendance at these schools is much greater than it would probably be in others in the same place. Notwithstanding these merits, the Board exclude them by the rule which will not recognise members of religious communities or persons in holy orders as teachers. The best proof of good teaching is that which is obtained by results. In England clergymen act as teachers and as inspectors; why exclude them in Ireland? 27051, 27071, 27072.—The Christian Brothers' history is taken from Fredet; it is very good, 27133.

Convent Schools.—These are rendering immense service to the country. Some are in connexion with the National Board, but many are not, in consequence of the annoying restrictions imposed. The teachers generally are highly educated ladies, fit to teach the highest classes in the country, but still they devote themselves to the education of the poor, teaching them by word and example to be practically useful in this world, and at the same time preparing them for eternity. When they find the children very destitute, they feed and clothe them, and in this way attract many to the schools who otherwise would go without education. There are no National schools better, if there be any so good. Mr. Cross, in his evidence before the Lords' Committee of 1854, bore high testimony as to the efficiency of these schools, but, notwithstanding, the nuns are under severe restrictions. Personally the nuns suffer but little from this treatment, as they generally apply the moneys received from the Board to the assistance and education of the poor; but this is no reason why they should not get the same salaries as other teachers, especially as the teaching is as good as, or better than in other schools. There are about 140 convent schools, with 72,000 children on the rolls; the number in attendance is 31,017, or 221 per school. The subsidy now amounts to £12,000, or something like 4*s.* per head. If the number of these schools were increased, it would tend to a wider spread of education, and make the Board more popular and more useful, 27051, 27358.

Lord Stanley's original plan was founded on the mixed principle, with certain safeguards; the system having failed in conciliating the people, it is quite useless to return to the original project. The system, as it stands, could be reformed, without much difficulty, so as to render it satisfactory to the people. The schools should be denominational, dependent upon the Board in literary and financial matters only. To meet the evil of children going from a Catholic school to a Protestant school, and *vice versâ*, the same rule should apply as in gaols, and this would prevent disputes. Wherever children would be sent to a school of a different religious denomination the pastor of the children should have the right of visiting that school to see that nothing was taught contrary to their religion, which dare not be done now in non-vested schools. The appointment of masters should remain with the local managers; the teachers should be better trained, and they should be instructed in history. The clergy should have the right to exclude immoral or irreligious men from acting as teachers. The training schools should also be denominational, and the Inspectors should be appointed as in England—Catholics for Catholic schools, Protestants for Protestant schools. If an Inspector disregarded the practice of his own religion, on the representation of the religious body to which he belonged, he should be dismissed, as a matter of course. Every school should be allowed to choose its own books, the Board providing the means of purchasing them; religious books should be approved by the heads of the respective religious bodies.

The Board should consist of gentlemen of the same rank as at present; some Catholic bishops should sit, and other representatives of religious bodies. There should also be some *ex-officio* Commissioners, and two or three paid secretaries. Roman Catholic bishops cannot now sit, as they do not consider themselves authorized by conscience to assist in carrying out a system which is in opposition to the Catholic Church throughout the world. There should be no Resident Commissioner, 27052–27066.

A register of children's attendance at Divine worship could not be kept under a mixed system; under a denominational one it would be very useful and proper. The rule with regard to this was rescinded; changes in relation to religious matters awakened suspicions in the minds of Catholics, and although some were not very objectionable, yet they showed there was no permanency in the system, 27067–27070.—The objection to vesting schools in the Board is grounded on the fear that the Government might turn these schools to some purposes of hostility to the religion of the country, and this feeling still remains. There would be little difficulty in securing that schools built by a Government grant should fulfil their purposes. Edmund Burke was quite opposed to making education a State engine, 27073–27075, 27193–27198, 27431–27444.

Ultramontanism is the teaching of those who are determined to carry out to the fullest extent the principles of their religion, and who acknowledge the full authority of the Pope. The bishops who consented to give a trial to the National Board were just as Ultramontane as the bishops are now. What is meant by the word "Ultramontane" as used by the English press it is not easy to understand, unless it be used as an opprobrious term. Dr. Murray always looked upon the National system as an experiment, and he expected it would turn out favourable to Catholics. There are some who still adhere to it, but they are very few in proportion to those who wish for a change, 27077, 27078, 27184–27191.

Religion is not very free in Belgium; the kingdom is governed by a revolutionary anti-Catholic party at present, and arguments in favour of Catholicity cannot be deduced from their measures; the Belgian bishops are decidedly in favour of denominational education, 27079-27086.—Dr. Doyle's letter was written before the National system was in operation; it states that "religious instruction shall be given (that is, Catholic instruction) on one or two days in the week, and probably can, as I hope it will, every day." One of the rules now is that the manager may prevent any sort of religious instruction every day in the week; Dr. Doyle speaks of an imaginary system which has not been carried into operation; he was most opposed to the Kildare-street Society's schools, so little inclined was he to mixed education. The National system has been well tried and failed; if it had not failed this Commission would not be sitting, 27087–27105.—There is a certain sort of recognition of the rights of the Catholic bishops and priests by the Austrian law, but it is not desirable to be guided by the decrees of a party hostile to religion, 27119–27125.

It is not surprising that some very distinguished men have been educated at the Belfast Academic In-

stitute; one person may pass safe through danger, but if the multitude be exposed to the same risk the loss will be great, 27126–27132.—The word "unlawful," as to the means of compelling children to attend schools against their will with the view of proselytizing, was used in a moral sense, 27135, 27136.—Licences to teach are not necessary, but care must be used to secure good moral teachers. The clergy should have the power to remove masters who, from their conduct, would be a source of scandal to the pupils. There is nothing bad in granting certificates of competency; training schools could give certificates of proficiency which would have great weight. The granting of certificates, however, should be a private matter, not a State affair; it is better for education generally that teachers should be tried and then judged by their results. Those who pass the best examinations are oftentimes the very worst teachers; they have high ideas of their own acquirements, and look upon the teaching of elementary subjects as irksome. If a man be sufficiently instructed, though he may not attain to the highest branches, he may be an excellent teacher. The requirements for teaching in National schools should not be too great; too high an education will make the poor discontented. The schools should be adapted to the wants of the great majority, not to cultivate the talent of a miserable minority, 27142–27153.

An objection to model schools is that children of the rich are educated at the expense of the State. The mingling of rich and poor in the same school is good for neither. There has been and always will be to the end of the world a great distinction between rich and poor; each class should be educated for the sphere of life in which they have to move. The Board makes no exception in favour of nuns. The superioress acts as manager, and managers in every case receive the payment from the Board. The teachers and the superioress constitute one society, and they agree to manage the money in a certain way. Until 1839 the convent schools got as much as others. Training is not required in other teachers, though they are classified; if the nuns teach well, nothing ought to be done to put them in a position worse than other teachers. The last rule as to giving religious instruction is not satisfactory; the simplest thing is to make the schools denominational. Where a mixed school is necessary, the teacher should be forbidden to give instruction to children not of his own faith. If the school were under a Catholic no alteration would be made to suit a small Protestant minority, except by excluding them from special religious teaching, and so in the case of a school under a Protestant. Parents who consider one religion as good as another would not care what religion was taught to their children; a Roman Catholic who would allow his children to be brought up in a different faith would be committing a grievous offence against faith and against his conscience, 27154–27168, 27231–27237.

Education ought to provide for the whole existence of man—both here and hereafter; without religion, it would rather be a scourge to a country than anything else. This is peculiarly the case with regard to the Catholic Church; the great mysteries will not be remembered in after days unless deeply impressed upon the minds of children, and this is a strong reason in favour of denominational education. Education need not necessarily fall into the hands of the clergy by becoming denominational; the managers would have the whole control whether laymen or priests; if they conducted the schools properly no one would interfere with them. The bishops, under their Divine commission, would be the judges of the mode of conducting schools, but this would not give them the entire control. Bishops merely exercise the authority given to them by God when they insist that books containing heresy or immorality shall not be used in schools; if the books are free from these they do not interfere. Haughton's and Elrington's Mathematics are as freely used in Catholic schools as in others, 27169–27183.—Mode of electing the Catholic hierarchy in Ireland, 27192.

His Eminence Cardinal Cullen.

The pastoral issued by witness in 1850, when Archbishop of Armagh, states that the Divine commission "extends to the supervision and control of every system of education proposed or instituted for children of the Catholic Church, lest in any particular department of knowledge they should be infected with errors or opinions at variance with their faith." To this witness still adheres. The two points to which the control of the Church extends are, the teaching of Divine doctrine, and the prevention of the spread of error. If there be no departure from the truth or no teaching of error, the bishops will not be called upon to exercise their authority. They got their power in this from Christ, and their power cannot be contested. In some countries the exercise of this right may be occasionally prevented by unjust laws or violence, but the right always remains. If a man teaching chemistry or geology were to assert, that the cosmogony of Moses was in opposition to the order of things at present existing, or to turn the teaching of the sciences to a bad purpose, he would be removed. This is an illustration of the control mentioned in the pastoral, 27199–27219.

There is nothing in the teaching of the Catholic Church to prevent the development of genius. Many of the greatest men who have appeared in the world in any of the departments of life, belonged to the Catholic Church, and were educated by the Catholic Church. The infallible teaching of the Church is a protection against error, not an impediment in the way of real progress. There are several high Catholic schools in Ireland and England, which are filled with the children of the gentry and nobility, and other schools conducted by ecclesiastics are crowded with the sons of the highest and wealthiest Catholics, which shows that parents are far from wishing to prevent their children's education being under the control of the Church. The abeyance of the bishops' right to control may be accounted for by the persecutions and penal laws to which Catholics were subjected in Ireland. The bishops did not delay to raise their voice against the National system when they found that little by little the system so developed itself as to prove that its tendency was hostile to Catholicity. The reasons for temporizing were great; it was a serious matter for the bishops to put themselves in opposition to the Government of the country, and to refuse the large assistance offered to them. The spread of mixed education, and the efforts made to extend it, necessitate the assertion of the claim now. In 1825 there were 11,000 schools in Ireland generally kept by Catholics, and to which the Government contributed little or nothing. This shows that even at that time Catholics and their clergy were most anxious to promote education. Since Catholic Emancipation greater efforts have been made. Almost every priest has got up schools in his parish, and nearly every bishop has a seminary for the education of his clergy. A great many colleges have been established, and a great deal has been done by the poor, the middle classes, and the gentry to promote secular and religious education, 27220–27229.

The mixture of various religious classes in schools, exposes all to danger, but in America a great number of Protestant children are educated by nuns, and yet remain Protestants; this is not the natural tendency of such associations. Admitting the importance of combining religious and secular education, the admission by the Board of the great fundamental truths of religion into the schools was calculated to do mischief to the great body of the children of this country. The teaching of these truths is of importance, but there are others which all true members of the Catholic Church must believe. The Roman Catholic bishops acquiesced in the alteration as to the introduction of the Scripture Extracts into the books, but no formal approbation was ever given to the change. The Synod of Thurles commenced the general united action against mixed education, but it did not enter into the general question, except so far as it related to the Queen's Colleges. It objected to mixed education as carried out in National schools, but proposed

His Eminence Cardinal Cullen.

modifications and safeguards, which were substantially the denominational system.

Dr. Whately thought that the Scripture Extracts would be a means of undermining the vast fabric of Romanism. Dr. Murray tolerated these Extracts, but had he known the views of Dr. Whately, which have since been published, his opinion of these books and the system generally would have been totally changed; no doubt, they were both acting in very different ways—the one was trying to weaken Catholicity—the other never attempted to assail Protestantism. Dr. Whately probably thought, but he thought wrongly, that he was justified in excluding Catholic doctrine from Catholic schools. Had he looked across the Channel, to his own country, he could not have imagined that united religious education was necessary. He was altogether mistaken in his views of the denominational system. If we look to what occurs in practice we will find less bigotry and contention where that education exists than in mixed schools. The Protestants of England are not nearly so bigoted as those of Ireland, and so with the Catholics. If Dr. Whately knew the Catholic doctrines in regard to the authority of the Church, and wished to shake the faith of Catholics, he was acting treacherously. He was doing this knowingly and deliberately, and he says himself that he was fighting the battle of Protestantism with one hand, and that his best, tied behind his back. He should have told the world that the system had that tendency, and should not have told them there was no danger of proselytism. Different degrees of proselytism, 27238–27270.

From the increased communication between Ireland and other countries, from the circulation of low-class newspapers and books, the people require to be better educated than ever. An immense improvement has been produced in the country since the establishment of the National Board, to some extent through its agency, but still more through other causes. Probably if the Board had never been thought of, the improvement by some attributed to it would have occurred through the schools in operation before its establishment. The "missions" which the Catholic clergy sent throughout the country were the cause of the greatest improvement in morals, and consequently of the utmost benefit to society. Occasionally difficulty has been experienced in obtaining school sites, but in the diocese of Dublin the gentry have been very good in providing them. There is no objection on the part of Catholic bishops to laymen as patrons, provided they teach Catholic doctrine. If there were a moral certainty that a landed proprietor as patron would carry out his promises absolutely not to interfere with religious education, and would allow the Roman Catholic clergyman to approve of the master, a priest would have no difficulty at all in consenting to such a proposal. Where landowners are members of proselytizing societies, no trust could be put in them as patrons of Catholic schools.

There are 4,267 National schools under Catholic patrons. There is no opportunity to give religious instruction in these schools, as all religious emblems are prohibited, and all reference to Catholicity is carefully excluded from the books, and where the children are poor and half-starved they become weary and broken down and anxious to get home, and would look upon religious instruction after the school hour as a sort of penance. In the first rules laid down the clergy were mentioned as the persons destined to give religious instruction. The position of the clergy is now totally changed; they must be approved of by the parents. The minute of April 10, 1832, does not give the right to say who should give religious instruction to the children. It gave the pastors the right of determining the books. The parents were to determine the religion of the child; this is necessary, as we cannot know who is a Catholic child and who a Protestant except upon the testimony of the parent. When the Commissioners altered the rule so that no child should be *required* to be present at religious instruction not approved by the parents, they changed the system. Dr. Murray and the other Catholic Commissioners went astray when they consented to mixed education in Ireland. In the beginning the religious instruction was to be given in the school. Where there were three denominations this would seem to be impossible; Lord Stanley must have formed a false estimate of the size of the schools. The rule appears to have been changed in 1847, and from about 1833 to that date changes were successively made. Some of the Presbyterians joined the Board in 1833, as may be seen from a letter of Mr. Kelly; when the Presbyterians joined, the rule appears to have been altered to suit their convenience. From Dr. Henry's evidence it appears, and the Presbyterians in the North generally think, that if they can induce Catholic children to attend, they may give them religious instruction. There is no reason to doubt the truthfulness of this testimony, 27271–27354.

Convents in the North are few in proportion to the other provinces. Their schools are excellent. Statistics are not to be depended upon unless closely analysed. Though the Census Report may show that there was a greater per-centage of increase in the numbers who could read and write in Ulster over Connaught, the circumstances are different, and upon examination the convent schools of Galway might show a superiority over the children in the schools of Carrickfergus, 27355–27357, 27359–27365.—The Roman Catholics of Ireland do not ask for separate grants; what they want is a common grant, administered according to the proportion of the schools and population of each denomination. Witness does not attach much importance to Dean Meyler's opinions; he was a respectable man, but respectable men sometimes hold very false opinions. Dr. Murray was a venerable man, but many Roman Catholics were opposed to him in regard to education. Catholics are anxious that the opinions of the people and of the clergy should both be respected. It has been shown that priests and people are favourable to the denominational system, 27366–27376.

The separate system to which Dr. Kieran, the present Roman Catholic Primate of Ireland, objected was probably such prosleytizing schools as those of the Irish Church Missions; he has changed his opinions since then, as have many other Catholics, and no doubt he can give a very good account of the reasons for this change. He might have declared himself in favour of the present system, because in his parish the education of Catholics was under his control, and so virtually denominational. The witness condemns the propositions contained in "The Encyclical and Syllabus of Condemned Propositions, published by his Holiness Pope Pius the Ninth, and authorized by the Most Rev. Dr. Cullen, Archbishop of Dublin," on religious grounds; they were condemned by the Pope, and whatever he condemns witness condemns in the sense in which the Head of the Church condemns them. The Pope does not condemn the principles of toleration. The case to which he refers is that of a country where all are Catholics (as in Italy), and where it would be unwise to introduce an element of discord, 27377–27396.

Mr. Kavanagh knows well the statistics and general bearing of the National system; he did not go to the north of Ireland as an agent of witness or of any other bishop, 27397–27400.

With regard to the books of the Christian Brothers, the History of Ireland contains facts not creditable to the English Government; this, however, must be so unless the history of the country is to be ignored; but hostility to the Government is not inculcated. The Catholic faith teaches charity to all men, and due respect to the established government. The Sacred Volume details greater cruelties than were perpetrated in Irish history, yet the divinely inspired writers thought fit to mention them. Former kings and a former queen persecuted the Irish, but under the present Queen Irishmen enjoy the greatest protection, and the English people are most anxious to protect the interests of the Irish. Parliament, too, is doing

away every day with the penal laws that exist. This, under good teachers, would be pointed out. The Christian Brothers, in their teaching, would point out that the perpetration of the cruelties described in their books has nothing to do with the Government of the present day. With regard to the statements as to Sir Phelim O'Neill, it will be found that Owen Roe O'Neill is stated to have denounced in the strongest language the excesses which his kinsman had sanctioned, 27401–27414.

It would be desirable to have Catholic Inspectors for Catholic schools, and Protestants for Protestant schools. Protestants do not understand the little devotions and practices of Catholics, and so might come to the conclusion that something wrong was going on in the school. An Inspector of a different religion to the school would excite a little amazement among the children. A Protestant too might, without wishing to offend Catholics, like to ask questions which would be distasteful to them. It is better that the teaching should be homogeneous from beginning to end.

The certification of teachers is not a matter of religion, but a question of practical economy; it is not necessary to have them certificated; if an Inspector finds a teacher not capable of teaching, let him report him, and let the Board withdraw his salary. Payment by results is a matter of economy, and would be of use in most parts of the country. Extracts from a letter addressed by the bishops in 1860 to Mr. Cardwell, showing that the separate system was not opposed to the proper management of the public funds, and that Government interference in education ought to be merely financial and inspectional, 27415–27439, 27467.

Witness was never consulted as to Mr. Fortescue's letter before it was written; some of its propositions would be very acceptable. As long as the mixed system continues, witness would not allow a chaplain to act under the Board in the model school at Marlborough-street, because the presence of such a chaplain would be an approval of what all the bishops condemn. Reasons for withdrawing children from the model school at Athy, and not from Marlborough-street. Teachers in the latter school have not been placed under any religious disability; they have been allowed to act according to the dictates of their own conscience, 27440–27445. His Eminence Cardinal Cullen.

Teachers in Catholic schools generally teach the catechism; it is of the greatest importance that they should be specially instructed in religion; they cannot be properly trained except in denominational schools —they must be trained both in the practice and in the theory of religion. The Christian Brothers would have no objection to inspection in financial and literary matters, but they would not submit to any inspection which would interfere with the internal management of their own community, or with their religious teaching. Compulsory education would interfere with the liberty of the subject, which would be mischievous to the country; as a general rule freedom of education should be upheld. The law of Canada, as to the exemption of members of religious orders from examination, should be applied, but the religious orders should show afterwards good results in their schools. If the examination could be conducted in writing there would be no great difficulty in examining nuns and the Christian Brothers, but such examinations are quite unnecessary, and would be inconvenient to carry out. Motives which induce children to go to convent schools, 27451–27466.

De Vere, Stephen, Esq. S. De Vere, esq.

Was member for county of Limerick, is an acting magistrate for that county, and Chairman of Rathkeale Board of Guardians; has managed several schools in the county since the commencement of the National system, 20141–20145.

In Kilcornan school (of which the teachers have always been Catholics) there was a considerable admixture of denominations, and there no attempt was ever made to alter the religious opinions of the pupils, 20146–20151, 20424–20428. — Protestant families have not shown any reluctance to send their children to schools under Catholic teachers, 20153.—The National system on the whole has been eminently successful, and the people are perfectly satisfied with it so far as it goes—whether they would prefer any other system is not now the question; the disapprobation of the Roman Catholic bishops would materially lessen its efficiency, 20154, 20263–20265, 20286–20292, 20296, 20298, 20299.

Irish was much spoken in the district, but the children do not understand it; the system has been the means of extending the knowledge of the English language, without the loss of the Irish, 20155–20160, 20260–20262.

The present country model schools are not used to a great extent as training schools, and as a necessary consequence the Board is obliged to employ many teachers who have not been trained; the cause of the falling off is the dislike entertained by the Roman Catholic bishops; if satisfactory training schools were established the masters would be suitable for vested schools, though more suitable for non-vested schools, as the managers would have, as to religious instruction, a greater confidence in the teachers who had been trained under their own superintendence. The payment of so much for each teacher who passed a satisfactory examination by some authority appointed by the Board at a non-vested training school, superadded to a fixed contribution, would be a useful system of State support, 20161–20170, 20318, 20319.—Permission should be given to all parties to apply to institute non-vested training schools upon the condition of their being conducted on the National system, no State assistance in building being granted; the appointment of teachers should vest in the patrons; the Board to have the right to withdraw its grants if results should not justify their continuance, 20171–20175, 20217–20219, 20389.—The principle in operation as to non-vested schools should apply to the proposed training schools, 20310–20314.—What is meant by a non-vested training school is a school for bringing up teachers; if a boarding establishment could be added it would be very useful, but need not form an essential part, 20319; arrangements might be made for admission of the pupils to Marlborough-street, 20393.

The National system has been very successful in teaching reading, writing, and arithmetic, and improving the behaviour of the children, and has contributed in a great degree to the increased comfort, cleanliness, and material prosperity of the small cultivators, 20176–20181.—The minor agricultural schools have not succeeded because they are too small to teach scientific agriculture, and too small in proportion to the capital expended; farmers have not the money to enable them to copy, although they may admire, what is carried out at the farms, 20182–20189. —Persons having limited interests in settled estates should have power to give or lease school sites, and the Legislature should give the Board compulsory powers to take land for schools, the landowner having just so much protection as the law gives him in analogous cases, 20190–20193.

The books of the Board, on the whole, are very good; the Agricultural Class-book is excellent; managers are compelled to use the books, but cannot introduce others unless approved by the Board. Uniformity of books as between school and school is desirable, but they should contain greater variety both of topic and gradation; lessons in history might be introduced, the objections are not insuperable; every fair man wants the absence of false colouring—there has been enough false colouring on both Protestant and Catholic sides;

S. De Vere, esq.

what is wanted is truth, and that can be had, and if historical instruction were introduced it would be most useful in the education of the people; the Board should have a comprehensive list from which managers might choose such books as they prefer, 20194–20197, 20220, 20236, 20284, 20388, 20421–20423.—Children generally go to the school nearest to them; schools with a higher character for instruction will generally attract the more advanced children, 20198, 20199.—The small number of cases where free residences are given arise from this, that free residence means subscription, and there is no general habit of giving subscriptions; nothing would so much tend to improve the character and position of teachers, and to exalt the system in its sphere of usefulness as the provision of fixed residences by the State as part of the salaries, which are inadequate to the duties performed, 20200–20204.—Contribution by means of a local rate would make the system unpopular; people do not like taxation; the circumstances of Ireland are so peculiar, and the landowners have so much to do in endeavouring to raise the condition of Ireland, that it would not be well to put an extraordinary pressure upon them for the education of the people, 20205–20210.

Teachers' salaries might be increased by providing a free residence, with a kitchen garden of half or three quarters of an acre attached, a premium in the form of payments for results of the teaching, the efficiency of the scholars, and the teacher's efforts to secure good attendance. The kitchen garden might form an essential part of the education by teaching the children its use, and so prevent the present waste of food from want of knowing how to cook it. A good cook and a good schoolmistress might be combined in the same individual if cookery were made part of the training course. A third mode of improving the salary would be the establishment of the proposed non-vested training schools, for as the teachers have their salaries according to their classification, the want of training keeps their salaries low; 20211–20214, 20374–20377, 20382–20387.—A small farm, cultivated by spade labour on the Belgium model, should be attached to the teacher's residence, and held by him directly from the landlord, from whom he would be entitled to notice to quit in case of dismissal from the school; with this farm the Board should have nothing to do but inspect its progress. It would be objectionable to attach farms of twenty acres to schools, 20221–20226, 20369–20373, 20448–20452.

Inspectors do their duty with great zeal and impartiality, 20215, 20216.—Lending libraries should be established in connexion with the schools for loan to the children of the fourth and fifth classes; the Christian Brothers have established them, and find them very successful, 20227–20230, 20284.

It would be well to get rid of the minor agricultural schools as soon as possible, and of the boarding system in them; at Mount Trenchard model school, out of thirty-eight boarders only seven or eight became farmers, gardeners, or land bailiffs; the agricultural training should be confined to two or three great agricultural colleges. Let the system be this—at one limit give really scientific instruction, at the other give an example to the poor which will be really useful and available to them, 20231–20234, 20280–20284, 20415–20420.

In Kilcornan school (a school vested in trustees) the orders of the Board were strictly carried out, the Protestant children leaving the room while the Roman Catholic children received religious instruction, which was given daily by the teacher, the parish priest (who was appointed sub-manager) attending frequently to impart the instruction himself, 20237–20248, 20340–20346.—In witness's experience the admixture of children of various denominations has not had the effect of diminishing the strength of their religious convictions, nor is there any danger of its tending to indifferentism, 20240–20252.—In training teachers it would be well that persons who wish to have them trained separately should have the means of doing so; witness is not acquainted with the working of the present model schools, and does not wish to go into the abstract question of whether mixed or denominational education is to be preferred, desiring to confine himself to his experience of the present system; the training schools proposed were non-vested ones, not denominational—the distinction is important—the religious instruction of which would be in the hands of the patron, 20253–20259, 20278, 20279, 20320, 20321.

The examination of intermediate schools by the Board's Inspectors would improve the character of the education; the exceptional use of the model schools by middle-class children is beneficial, 20266–20272.—Witness is not prepared to say what effect the appointment of paid chaplains would have; the attempt was made in the Queen's Colleges and failed, 20273–20277.—The schools shut up by the National schools were hedge schools, not schools where mathematics were taught, 20285.—Schools in Limerick are generally under Roman Catholic management, 20300, 20301.—In vested schools all the clergy have a right to come in and teach religion; in non-vested schools the religious instruction is given according to the will of the manager, 20302–20309.

The clergy and gentry have not, practically, taken steps to obtain better remuneration for the teachers, because they think the teachers are remunerated on a fixed system, 20315.—Some landlords are willing to grant sites for schools, others are not, 20316, 20317. In the north of Ireland a difficulty is experienced in procuring school sites, 20350, 20351.—The Protestants of Limerick are scattered over the county in colonies, having been originally planted from the Palatinate, and still retain their distinctive character; within the district with which witness is familiar there are schools, within a reasonable distance, in which Protestants can obtain separate instruction—one a purely Protestant denominational school, 20322–20332.—There is a Protestant school within about three miles of Kildimo, on Sir Vere de Vere's estate; cannot speak as to Croom, nor generally as to accommodation for Protestant minorities, 20333–20339.—Catholic ecclesiastical authorities do not object to appointment of teachers by laymen, 20347–20349.—Resident landlords who know their duty feel an interest in their schools, 20352, 20353.—Every school which would conform to the regulations of the system should be included, 20354.—The cost of primary education in Ireland should be borne partly by the Consolidated Fund, and partly by local contributions and school-fees, 20355–20357.

Endowments for such schools as Erasmus Smith's schools should be made available for the intermediate education of the country, 20357, 20358.—If sites were taken under compulsory powers the vested schools would be built and repaired, as now, by the Board, and the same rules as to management applied, 20359–20363.—Before taking sites compulsorily it would be well to make available grants of land already made in fee, 20364, 20365.—As regards Ireland, there is no probability of primary education falling into the hands of females, as their intellectual development goes on more slowly than in the case of men; if non-vested training schools were founded there would be no difficulty in getting teachers, 20366, 20367.—Farms held by ecclesiastical persons are generally better managed than those around them, 20368.

Parents object to their children being employed at hand-labour while at school, but the industrial instruction proposed goes no further than literary instruction upon industrial matters illustrated by natural objects, 20378–20381.

Although non-vested training schools, in the case of Catholics, would be founded on the application of the ecclesiastical authorities, and the management and religious instruction would rest in their hands, the schools would not necessarily become denominational; the Board would exercise the same control as in ordinary non-vested schools, they would have the right of requiring the use of their books and of rejecting, on examination, those pupils found unfit for teaching or

further training, 20395–20403.—If the pupils should quit their profession and go into other occupations, the money would not be wasted, 20404–20408.—The training schools suggested would not necessarily fall into the hands of "brothers" as schoolmasters, nor into the hands of nuns as mistresses; "brothers" are excluded by the Board from being teachers, 20409–20414.—It is important that the teacher should be of the religion of the majority, care being taken that no injustice is done to the minority, 20429–20431.

The objections to the present model schools are that they are not doing their work, that Catholic and Protestant teachers are educated together; if non-vested training schools were added the objections would lose much of their weight; any attempt to instruct Protestant pupils in schools under Catholic management would be so directly in contravention of the rules of the Board that the managers could not have the folly to propose such a scheme, 20432–20439.

If a landlord is not prepared to do the duties of a manager (which are important and responsible), he should not be appointed and ought not to seek the office; if a landlord offered to give a site for a school, and to bind himself not to interfere with the religious belief of the children, it would be unreasonable to refuse the offer, 20440–20446.—It is the duty of landlords to promote the education of their tenantry and of the people about them; if they place the management of their schools in the hands of others, they do not exclude themselves from taking part in the education of the country, 20455–20457.—Every one connected with education would be bound to look to every possible contingency which a school may suffer when land passes from one hand to another, 20458, 20459. S. De Vere, esq.

Great complaints have been made as to the delay in building, enlarging, and repairing vested schools, from the dilatoriness of the Board of Works, 20460–20470, 20479–20481.—Imputations of proselytism have been made in the north of Ireland, 20471.—Confidence in the National system is deservedly increasing; several cases have occurred creating distrust, but almost all causes have been removed, and the true interpretation has been put on the Stopford clause, so that confidence in the fairness of the Board and the whole system is increasing every day; a change in the constitution of the Board is not desirable, 20472–20475.—All fundamental changes in the rules of the Commissioners should be laid before Parliament, and not submitted merely to the Lord Lieutenant, 20476–20478.—Under Lord Derby's letter ministers of religion had the right to come into all schools and teach religion; the repeal of this permission shook confidence in the system; distinction between vested and non-vested schools, 20482–20506.—If there were a separate room for religious instruction a great deal of objection to mixed schools would be done away with, 20507–20520.

Dorrian, Most Rev. Dr., Roman Catholic Bishop of Belfast. Dr. Dorrian.

Was formerly, when parish priest, patron of a mixed school, which became a success more because of his personal exertions than by aid received from the National Board; the numbers were raised from about 40 to about 190; it was a non-vested school; assistance could not be had from the Board because a lease of the premises could not be obtained, 8641–8648, 8653.

Difficulties in obtaining sites for schools are great and numerous; Keogh's Act enables a landlord to grant a site for a school, however limited his interest, on condition that he gets a market price for the land, 8649–8652.

Witness's school was in the centre of a rural parish, with a large population within a radius of two miles; there were two Protestant schools about two miles distant; seldom any Roman Catholic children attended the latter; some Protestant children attended witness's school, attracted probably by the superiority of teaching, 8654–8661.

The efficiency of elementary teaching in National schools depends on the teacher; the standard of classification has latterly been raised, but the amount of education imparted does not depend entirely on the teacher's classification; sometimes those of a low classification, with industry and application, are the most efficient teachers; witness prefers such, 8662–8667, 8957–8959.—And always adopted a sort of payment by results, 8668.

The religious instruction given in witness's school was given on Saturdays only, and by the teachers; the clergymen sometimes attended, 8669–8673.

There is only one parish (Rathlin) in the diocese where Irish is spoken; the National schools have been ancillary to spreading a grammatical knowledge of English, but if they had never been established all the people would speak English now, 8674, 8675.

The rules of the National Board hinder the co-operation of members of the Roman Catholic Church, by preventing religious instruction going *pari passu* with other instruction; one set of books cannot possibly be compiled to suit the various denominations of the country; books should be left entirely to the choice of the manager, as the person whose religious sympathies would be in unison with those of the pupils; certain passages in the Fourth Book referred to, and objected to, 8676–8678, 8964–8967.—In saying that the managers should have the choice of the books, it is to be supposed that they would be amenable to the approbation of the heads of their religious denomination; the Christian Brothers' books would be unobjectionable to Roman Catholics; and it cannot be conceived that one book would please parties of various religions, 8681–8684.—The senses as well as the intellect being a channel of instruction, religious emblems should be placed before children's eyes; relation of a visit to a Christian Brothers' school, 8685.—The books of the Society for the Diffusion of Useful Knowledge, and the cheap Scripture prints published in England, though unobjectionable in themselves, would not be sufficient for Roman Catholics, 8686, 8687.

The masters and mistresses known by witness, who had been trained in Marlborough-street, had been efficiently trained, and there are many such in schools in Belfast under Catholic management; but now, by resolution of the prelates, no Roman Catholic teacher is allowed to go to Marlborough-street for training; any Catholics who are in the training institution are there in opposition to their pastor's wish, 8688–8691.

Witness's objection to the training schools is on account of the abuses allowed to exist in them; instances a travestie of rites of the Roman Catholic Church in the model school of Belfast, and the difficulty of getting a satisfactory inquiry into the case; and an alleged case of forcing a Roman Catholic child to receive Protestant instruction; the child had been registered a Roman Catholic, and surreptitiously re-registered as a Protestant, 8692–8704.—An instance, of refusal to register children as Roman Catholics without the consent of their Protestant father, the porter of the school being sent to make inquiries; in a second instance, of a child of a mixed marriage being registered as a Roman Catholic, a note was sent to the father to have it registered as Protestant; witness conceived the interference in both cases to be improper, and made complaint, 8705–8711.—Further reference to these cases; witness cannot state his opinion, supposing the father had been a Roman Catholic, 8838–8852; *see further* 9019–9030.

Objects to model schools also because persons who can well afford to send their children to superior and respectable schools, send them to model schools to save expense; model schools are not suited to poor children, although the system was intended for the poorer classes; for these reasons, and because religious teaching is entirely excluded, and the children trained in them acquire an air of stubbornness, indocility, and

Dr. Dorrian.

conceit, without any spirit of union or kindliness among them, but of bickering and criticism, witness advocates their abolition, 8712–8719, 8725.—Does not know of any case where the children of the poor were excluded from the Belfast school; the fees range from 1*d.* to 5*s.*; the same class who pay 2*s.* or 5*s.* pay at the Christian Brothers' or nuns' schools only 1*d.*, 9035–9045.

The plan of attaching ministers of different persuasions to model schools was tried and found not to succeed; the Board appointed (but never paid) chaplains to give religious instruction; a Roman Catholic chaplain attended the Belfast model school, but he was withdrawn, and the experiment was not repeated; the presence of a clergyman implies that all is right, when in reality all is deceptive and deficient, he having no control over the appointment of teachers, over the literature, or for the prevention of abuses, 8720–8726, 9055.

The Catholic prelates cannot consent to have the appointment of teachers removed from their control; they must have some control somehow; one system of training cannot turn out teachers qualified to enter a Catholic, a Protestant, or a Presbyterian school indiscriminately; Government should have a control over the system of education as to, at all events, the minimum of qualification it would recognise, and the amount of assistance awarded to a deserving school; but the tone of the school, the style of literature, and the religious training should be left in the hands of the clergymen, 8727–8729.—The State, which maintained the schools, training or ordinary, by parliamentary grants, could exercise its authority through its Inspectors, and no assistance should be rendered to a school without their certificate of its proper working, 8730.—The machinery should be kept up by Government, but the instruction should come from professors appointed by ecclesiastical authorities, Roman Catholic, Protestant, or Presbyterian, 8731–8733.

Is not satisfied with the regulations of the Board as regards convent schools, of which there are two in Belfast and one in Downpatrick; in Belfast the nuns have collected a night school of 500 factory girls, who are taught reading, writing, the catechism, and good behaviour; the nuns have endeavoured to obtain assistance in the form of assistant teachers or monitresses, without success; all they get is a small capitation grant, 8734-8736.—These girls are too old to go to school under the Factory Act; there are several secular night schools, also many girls' schools, under Roman Catholic managers in Belfast; the girls trained by the nuns are the most moral of the population; only the same favours are asked for nuns' schools as are granted to secular schools; the application for assistance was made about two years ago, the answer was that it could not be complied with; monitors did not work well at night schools, 8734–8753.

Girls go to the factories at half-past five in the morning, and leave at six in the evening; school commences about seven, and lasts about two hours; if the girls were not at school they would be getting into all sorts of mischief; the necessity for night schools is not so great in the country as in a place like Belfast; besides the nuns, the Presbyterians have girls' night schools, which are taught by seculars, 8777–8789.

The education in workhouse schools is fair; in Belfast the teacher is appointed with the sanction of the chaplain; the education is much the same as in common schools in the country, where, although there is much that is good, there would be more if information by the senses was admitted, and the religious element not excluded; the common schools are therefore practically denominational schools; and it is objectionable that the clergyman of a congregation will become the manager of twelve or eighteen schools when two or three would suffice him. The educational staff in workhouse schools is probably sufficient, 8754–8761.

The salaries of the different classes of masters and mistresses is not sufficient; if after three or five years' practice the results were satisfactory, a teacher ought to look for an increase of salary, but if after that time he could not raise himself above the second division of third class, although it would be hard to turn him off to seek another employment, he might be treated as any other servant with whom you might be dissatisfied; it would be sufficient punishment to let him remain at the lowest standard of pay, without, however, dispensing with his services, 8762–8769.

The rules of the Board as to religious instruction are defective, and in many cases nugatory; two cases cited where Roman Catholic children are religiously instructed by Episcopalians, and where the Inspector, after explanation, took no exception, 8770, 8771.—It is questionable if the parents knew anything about it; it would be inconvenient, and might bring odium on a party complaining of such infractions, 8872–8878.

The cases are not numerous of a change of religion in consequence of the mixed education system, and where it has occurred, it has been in the towns; the country schools have protections not to be found in training schools; changes of religious belief, both one way and the other, are common among grown persons of the working classes in the north of Ireland, 8772–8776.

Objects to the rule that, before a grant is made towards building a school-house, the necessity for such a school must be shown, an eligible site procured, and a satisfactory lease executed, because it precluded him from getting the assistance he required for his school at Loughinisland; a lease could not be given, but the site was perfectly secure; £25 had been granted to his predecessors for the school; now, when it was desired to make the school suited to the locality, no assistance could be got; exceptions had been made to the rule in other places, 8790–8802.—Neither could he get an assistant teacher allowed him; the average attendance was not quite up to the required mark; but Ballymoney model school and Donegall-street common school had assistants allowed them, though their attendances were far below the average; the Commissioners became generous afterwards, 8804–8817.

One day in the week (Saturday) was originally set apart in witness's schools for religious instruction; he has since changed his mind, and would have the religious teaching combined with the secular; without religious teaching in school children deteriorate in morals and manners; the State should provide schools with religious instruction, each according to its denomination, not interfering with the conscience of any, but giving freedom to all, 8817–8829.

The appointment of one day in the week for religious instruction is not sufficient, religious education must go on together with secular education; the system of education introduced by Lord Stanley, and undertaken by the Commissioners, for this country, was based on the atheistical principle, but it turned out denominational, 8960–8963.

Books alone do not teach religion; the most important part is taught by the "surroundings" of education, and especially by the deportment, the tone and air and habits of the teacher, and for Roman Catholics these surroundings must be altogether Roman Catholic, 8830–8834.—The use of the Board's books is not compulsory, but it amounts to much the same, as the Board will not sell any books but its own at a reduced price, and the expense of books is an important item in a school, 8835–8837.

The books to be used in a Roman Catholic system of education must be approved by the Catholic authorities; mixed education, as it is generally understood, is an impossibility; it imparts secular learning without religion, which is uncatholic, and cannot be accepted by a Catholic, 8964–8972.

In saying that the poor are not able to pay the high charges of the model schools, witness is aware that they are proportioned to the ability of the parent, the child of a poor person not being required to pay more than one penny a week; the expense lies in dress and associations; the expense of education per head in a model school is £4 per annum, in a common school 18*s.* to 25*s.*, in a Christian Brothers' school 9*s.*, in the nuns' schools 10*s.*, the education imparted in the latter two being much superior, 8855–8863, 9046-9054.

In such a school as Belfast model school, with the working of the machinery, a chaplain would not be able to do much good; it is impossible he can be of any use unless his supervision penetrates every branch of education; if he is permitted only to give religious instruction to his children he is out of place, his presence would be giving a false security, 8864–8871.

The constitution of a National Board of Education is of little importance if the Board had unobjectionable rules to guide it; if the Board be a permanent paid Board, appointed by the Crown, the Crown must be advised, and, so far as respects Roman Catholics, the only persons qualified to advise are the bishops; a removable Board would be merely a political Board, and politics should not enter into a question of this kind; it is not necessary that the members of the Board be Roman Catholics, so that they have the confidence of the Catholic bishops, who could supply the names of many persons well qualified for the office, 8879–8888. A Board appointed with the confidence of the bishops, serving gratuitously, would give most satisfaction, 9202, 9203.

The model schools are dangerous to both faith and morals; to faith, because religion is excluded at a time of life when its influence is most needed, in forming the character; to morals, because notions are put into the teachers' heads unsuited to their position in life; the Church cannot interfere at all except by mere permission, 8889–8892, 8909, 8910.—The clergy ceased to attend the training school for the reason already assigned, namely, that their presence implied a security which did not exist, 8911.

Schools where the teachers are appointed by Protestant landlords or by independent Roman Catholic gentlemen would not be approved of by the bishops; their approbation is confined to ordinary schools where Catholic children are taught by masters appointed by Roman Catholic clergymen who are themselves the managers, which are in reality denominational schools; a Protestant landlord cannot be a judge of a Catholic teacher's qualifications; the veto should be in the parish priest, who would be responsible to his bishop, 8893–8899.

The prohibition of the bishops has been applied to all schools not under Catholic management, and to model schools particularly; all schools are considered dangerous which are not under the management of the Roman Catholic clergy; the prohibition has taken effect only in proportion as schools have been opened to which children could go, 8900–8903.—A Protestant landlord may in the first instance make a satisfactory appointment, but his successor may have different views; an instance quoted, 8904.—In such cases, if practicable, witness would open district schools; a school is considered to be wanted if there is only one under Protestant management in the neighbourhood; the appointment of the teachers by the Board without reference to the Roman Catholic clergy is decidedly objected to, 8905–8908.

The books of the Christian Brothers are unobjectionable, being approved of by episcopal authority; the approval of one bishop will be accepted by another as sufficient, 8912–8917.

A book, the reading of which without anything else would make one a Protestant, while it stated what was unobjectionable to a Catholic, did not state what was sufficient for a Catholic; its merits were only negative; the morals deducible from its stories, &c., were good, but its tone throughout was Protestant; it did not purport to be more than a secular book, but any book must be written from the standpoint of either Catholic or Protestant, and must therefore be either objectionable or unobjectionable; it is impossible to produce a book that will be unobjectionable to both parties, 8918–8925, 8964–8968.—A prohibition of a book is never withdrawn; young men and women might be allowed to read these neutral books if they had received sufficient Catholic instruction *pari passu*, 8926–8928.

Detail of proceedings taken by witness in connexion with the Young Men's Association—the Catholic Institute—of Belfast, 8929–8933. Dr. Dorrian.

The Roman Catholic hierarchy would not be satisfied with any modifications of the National Board of Education that did not afford ample security for the full education of Catholic children in a Catholic spirit; the bishops are the sole judges of what is Catholic and what is not; Protestant Inspectors would not be objected to, but Catholics would be preferred, 8934–8939.

The system of training desired would be one wherein each denomination would have its own separate establishment; no one system could make provision for all; the central Board attending only to the financial arrangements, and seeing that a fair value was had for the money expended; the number of existing training schools need not be increased; all the common schools are virtually practical denominational schools; the books used must be approved of by the Roman Catholic bishops, 8940–8947.

The education in workhouse schools is tolerably good, so far as it goes; there is no mixture in the schools; there are Catholic teachers for Catholics, and Protestant teachers for Protestants; the Poor Law Boards being composed of almost every religious party is a security against interference with the discipline by the chaplains, 8948–8956.

Religious emblems should be always before children; schools properly managed should give a sound secular education, but at the same time the spirit should be educated as well as the intellect; witness cannot conceive an absolute distinction between religious and secular education, 8973–8977.—It is not the business of the state to declare what religious education is; it is that of the parents, and, by their selection, the pastors; if in a mixed community the state could teach the same principles to all there would soon be no difference, if the principle were successful, 8978–8980.

Objects generally to teachers trained in connexion with the National system on the ground that their religious education is not attended to; is not aware that all the Inspectors, Protestant and Catholic, have expressed their opinion as to the excellence and efficiency of the training schools, neither is he aware of their competency to express what religious training should be; the Commissioners may have selected seven assistant teachers from the Belfast model school to be principal teachers in other schools, witness probably would not have selected one; is not prepared to admit that the Head and District Inspectors are by any means qualified to decide in any case of the kind; some bishops and clergy and ministers have expressed unmingled satisfaction with the model schools, but now there is not one Roman Catholic bishop who will do so; is not aware that the same parties expressed entire satisfaction as to the progress of the pupils in religious education; it is a question not to be put in connexion with the Commissioners, inasmuch as they do not give religious education but throw it in the background; Rev. J. Lynch may in 1849 have expressed his approval of the model school, he has since changed his mind, 8982–8992.

At its opening the Belfast model school was largely attended by Roman Catholics; notwithstanding the very favourable report of Mr. Keenan, the ample time set apart for religious instruction, the attendance of a clergyman who was assisted by nuns, the letter of Mr. Marner testifying the most perfect satisfaction with the religious teaching—the Catholic authorities saw that the system was leading to an erroneous idea abroad that it was safe, and they withdrew the nuns and priests; Mr. Marner was the clergyman engaged in the exposure of the mock tribunal, and has since expressed his disgust and abhorrence of the whole system, 8993–9005.

In opposition to the report of Mr. Keenan, that during the riots at Belfast there was not a single case of dissension between the pupils of the model school, witness has heard that they, outside the precincts, were like other rioters, 9006–9008.

Referring to the travesty of the rites of the Church in Belfast model school, witness confesses his ignorance of all

Dr. Dorrian.

the proceedings attending the investigation, 9009–9018. —And with respect to the case of the boy who was dragged to receive Protestant instruction, the boy had been registered as a Protestant, but had all along been taught as a Roman Catholic; brute force ought not to have been used; such a case illustrates the difficulties of the system; the Protestant father had been put up to re-registering his boy as a Protestant; otherwise, why was it not done at first? 9019–9030.—As to the headship of a family, witness's idea from his point of view is the same as a Protestant's from a Protestant point of view; in holding his religion to be the true one he holds that the parent professing the same religion is bound to see the child reared in it; as a Catholic does not recognise mixed marriages, 9030–9034.

Statement of the disparity in point of expense between model schools and Christian Brothers' and nuns' schools; the model schools may have produced a considerable number of trained teachers, but for some years Roman Catholics have not employed teachers from training schools under Government, 8855-8863, 9046-9054.

Convent schools are practically denominational schools, but are open to all, according to the rules of the Board, which would not recognise them as denominational; the superioress is the manager; it is one of the chief duties of the sisters to educate the poor, 9057–9062.

Witness's attention being called to the number of instances where the Roman Catholics are in a very small minority, and being asked how, under the denominational system advocated by him, these small minorities would get their education, replies, that since that return was made circumstances have much changed; that there are now many schools freshly established; that otherwise the children must do the best they can; the best safeguards possible being provided for them; and that if interference with their religion were attempted, the priest's duty would be to withdraw them from the school, leaving them without any education rather than having their faith put to risk, 9063–9090.

Although in some cases Protestant managers appoint Roman Catholic teachers to schools, where not one-fourth of the pupils were Catholics, unless the priest was consulted the appointment would not be approved; there would be no protection; Roman Catholic managers do not appoint Protestant teachers; Protestants think secular training may be given without religion, a Catholic's views are different, 9091–9099.

It is possible that in the Ballymena district, out of nine schools not under Roman Catholic management, seven are attended by Catholics; they may have been forced to attend by the employers of their parents; knows instances of such things in his diocese, 9100–9106, 9258-9260.

Witness's predecessors were favourable to the non-sectarian system, and had he only their experience he would have entertained their views, but the deportment of the children coming from the model schools would have made them change their minds; if a dozen clergymen attended there to give religious instruction it would be giving a colour to an unsound principle; no conscientious Catholic would obey if commanded to do so, he could appeal to a higher authority, 9107–9112. It is unsound Catholic doctrine to believe that a knowledge of natural things even can be imparted without religious influences; if a single point in the commonest book turns up of which he cannot give a Catholic explanation, he is hemmed in. There is a time set apart in the Belfast model school for dogmatic teaching, but religion is not to be taught by a set process, it must be taken in spiritually, morally, otherwise the intellect being informed, without virtue to balance it, society is endangered; children should go to schools where they will have proper rules for their guidance; the Church is a mission Church, but it cannot go where it is not free to act; witness is not bound to follow his children into the model school, any more than to follow people into a brothel, 9113–9120.

Returns quoted by examiners showing an increase of Roman Catholics in the rolls of district model schools (in 1864, 4597; in 1867, 6581), disbelieved by witness, 9121–9124.

Private schools stand on very different ground from National schools; in private schools there are safeguards not to be found in this system; witness was educated by a Presbyterian clergyman, who effectually prevented any interference with his religious opinions, 9128–9131.

Bigotry is perpetuated by these model schools; there is no advantage to the country in having education in common; it leads to the very opposite of kindly feeling, mutual respect, good-will and forbearance; when a man knows his own religion, and understands its principles, he will know how to be tolerant, and associate with others civilly; such reciprocity is not to be produced by Roman Catholic gentlemen and Protestant gentlemen being educated together; it would be delightful if it could be done without too great a sacrifice; every country requires kindly feeling for its peace and prosperity, but no united education, or what is called the National system, is possible in this country; if the Catholic laity are not in harmony with witness on this point they are not sound Catholics, 9132–9148, 9198.

The Roman Catholic population have up to a late period made free use of the opportunities afforded by the National Board, with the toleration of their spiritual guides, who, however, are now opposed to this, and demand the denominational system, which the present system practically is where the population is large, 9149–9153.

In places where only one school could be maintained it is the duty of the State to secure to all the benefits afforded by that school, the minority, whether Protestant or Catholic, being secured against any interference with their religious feelings; the present safeguards, if maintained, would be sufficient for Roman Catholic minorities, 9154–9159.

Each denomination must have its own training establishment; the approval of teachers trained in approved institutions must rest with the ecclesiastical authorities, not the selection, 9160–9163.

Would not deny the right of patronage, if, on consultation with ecclesiastical authority, the party appointed be satisfactory, 9164.

The superintendence of primary schools is one of the most important duties of a parish priest, 9165, 9166.

If the management of schools were free from all restrictions except a conscience clause, Catholic managers would be willing to contribute, as far as they could, to maintain the schools, but the bulk of the Catholic population is so poor it is not able to do so, independently of the Government; a general fund could not be raised for the purpose; it was seen that the Board intended, by means of their vested schools, to secure the system of schools all over Ireland in their own hands, therefore, by advice of high anthority, we resolved to keep the sites of schools in our own hands, 9167–9170. —Many contributions for building schools are collected outside the district, but as to any combined system for the purpose there is a doubt; as a bishop, sees no necessity for it; would expect to get a fair share of any money appropriated to the education of the people, 9171–9173.

With a system of separate training schools, the Catholic prelates would be glad to receive any reasonable assistance, and do their utmost to complete the arrangement; as a general rule, they and the parish priests are always giving more than they receive in any collection for building a new church or school; what is done for England should in justice be done for Ireland; as an alternative, a more moderate contribution would be accepted than the continuation of the present system, 9173–9179, 9233.

In convent schools the principle of payment by results should be applied; there would be no objection to the application of the Board's rules to convent schools, if fairly applied, and the Board's regulation, confining the nuns to teach in one locality, should be

removed; all the nuns in witness's diocese take aid from the National Board, 9180–9184.

No Protestant girls attend the nuns' evening schools; the girls attending are taught their religious duties; Protestant girls are not induced to attend, but are not excluded; otherwise the schools could not be connected with the Board, 9185–9188.

The Commissioners, before making a grant for building a school, are entitled to be informed as to the trustees and the security for the site; the trust to be carried out being that no other system than the National system will be taught in the school; we cannot tell what changes of rule may take place, the trust therefore is no security to us, 9189, 9190.

The reason influencing the Roman Catholic hierarchy to withdraw their confidence from the National Board was its tendency towards a system of proselytising; that faith was broken with the Catholic body on the subject of education, 9191, 9192.

Definition of the duty of the State in educating the poor; in all Roman Catholic families, schools, and colleges, religious teaching is incorporated with secular, 9193–9196.

Mixed education has prevailed in the north of Ireland more than in any other part, and the north is the most prosperous, but the one is not the cause of the other, 9197–9201.

Has never heard of complaints against Catholic managers interfering with the religion of Protestant pupils, 9204.—The advantage the country has derived from the National system is in spite of, not in consequence of, its being a mixed system; the training of the Christian Brothers is in every way more fruitful of good consequences to the country, 9204, 9205.

The complaint with regard to convent schools is, that they get no assistance for the evening training of 500 pupils; if 500 are trained in a convent school up to the standard of 500 trained in a secular school, the nuns should at least receive an equal remuneration; in small schools in the country more money is paid for less work, 9206–9209.—Nuns, from their peculiar character, cannot be classified; they will not submit to lay examinations, they ought, therefore, to be paid by the results; there might not be the same objection to written papers, but still there will be an objection to the system, 9206–9214, 9263.

Dr. Dorrian.

In secular schools payment by results should be combined with payment by classification; classification of teachers is necessary, 9215–9217.

The selection of a school would rest in the parent, but if he be a good Catholic he will be guided by the rulers of his Church, there can therefore be no antagonism between parental authority and Church authority; the Church has a general right to examine any book to see if it contains anything contrary to sound faith and morals; if the parent opposes, he acts in violation of his principles, 9218–9220.

Schools where a higher class of education is given are very desirable; the only want is to make the present model schools good training schools; the State should contribute in every way to ameliorate the condition of the people, not excluding religion; competent lay teachers are always to be found by those who wish for them; clerical patrons have always promoted the higher class of education; Christian Brothers teach the elements of mechanics, and National Board schools should as far as possible teach such things, 9221–9233.

Some special provision should be made for training teachers, in addition to the money devoted to buildings, 9234–9236.

The law should enable any persons to obtain a site compulsorily for a school upon proof of the necessity for it being shown; once built the school should be always appropriated to that purpose, the Catholic Church to be satisfied as to the system of education; the clergyman should naturally be one of the trustees, 9237–9241.

Statements and objections as to the law regarding clerical trusts and charitable bequests, 9242–9251.

Difficulties in procuring sites for schools are of frequent occurrence, even when the full market value is offered, 9252–9257.

Is not aware that the Board shows any disposition to encourage proselytism, but from the constitution of the Board and the working of the system, it will prevail in spite of their efforts; if the present rules as to religious teaching were relaxed, any school detected in proselytising, would be sufficiently punished by a stoppage of its pay, 9261, 9262.

Reference to the case of the boy Mortara, in connexion with the question as to parental authority; that was an extreme case, 9264–9265.

Down and Connor, The Lord Bishop of.

The Lord Bishop of Down and Connor.

Has a personal preference for old National system, but would accept another more generally liked as best under the circumstances, *before* Q. 19585.

Denominational system highly injurious. Would establish a purely secular system, State to assist in proportion to secular knowledge imparted, religious instruction to be left wholly to managers, secular teaching only to occupy five hours of five days each week, so as to leave ample opportunities for religious teaching. Thinks supporters of Church Education schools would be largely attracted by it, 19585–19590, 19602.

If model schools be not kept under Board, local committees might be formed to which they could be handed over, but these should not class teachers—one central institution at Dublin, with a uniform system, should do this; considers Marlborough-street an efficient training establishment, 19591–19593.—Teachers might get their knowledge anywhere, provided they could pass the central institution, but no State aid should be given to denominational training schools. If any denomination had one of its own it must support it wholly, as there would be the model schools and the central institution, and the system suggested is purely secular. Cannot compare English training schools, as they are all denominational, 19594–19601, 19606, 19607.—Local committees suggested above should be voluntary associations of parties willing to manage and partially support the model schools; would prefer their remaining as they are, 19603–19605.—Marlborough-street schools would be indispensable, 19608.—If model schools were to be conducted as above suggested, should have same rules as others, viz., five hours a day for secular, with sufficient margin for religious teaching. Appointment of the local committees. Where locality would not help to maintain them, should remain as they are, 19659–19665.

No doubt the Roman Catholics desire denominational system. Reasons for State not assisting religious training of teachers. Religious bodies should do this in their own way. Approval by State of any denominational system should be guarded against, 19609–19612.—National schools in witness's locality very efficient, 19613.—Under any circumstances there should be a change in composition of Board; it should be purely administrative; changes in rules, &c. should be made by a Minister of Education or Privy Council; few would be necessary under a secular system. Selection of books should be left to patrons; Board might be allowed power of forbidding a book, 19614–19617.

A modified system of payments by results desirable; objection to local rate for education, 19618–19620.—Masters of higher acquirements more necessary for large towns than for the country, 19621–19623.—"Secular" would not exclude moral instruction; no objection to such religious teaching as is contained in books of National Board, but would not require these to be used. Though leaving open choice, would not allow denominational books to be introduced; choice should be limited to secular ones. No cognizance should be

The Lord Bishop of Down and Connor.

taken of books if containing only secular instruction, 19624–19634.

Though strongly against denominational system, sees no objection to teachers coming up to central training institution from denominational colleges, as they would only be classified for secular knowledge, 19635–19639. —Desirability of united education, and of giving the largest possible amount to the uneducated masses, 19640, 19641.—Objects to denominational system, because it trains and keeps creeds in antagonism; could not say it would be a waste of money; it causes an unnecessary number of schools, 19642–19645.—Under a denominational system, in districts where there are very small minorities, State should wholly support some schools and be themselves the patrons, but under secular system, which would be best for present circumstances, no necessity for this, 19646–19649.—Religious instruction would rest with parents and churches, but managers should make such provision for pupils attending out of school hours as they pleased, 19650, 19651.

Formerly many of the bishops and clergy of the Establishment objected to National system, and the Roman Catholics fell in with it, but the latter (the clergy chiefly) are now against it, 19652–19654, 19666. —Under suggested system religious instruction might be fixed for any time, if five hours were retained for secular: Episcopalians are less determined than formerly in enforcing introduction of Scripture, 19655–19658.

Witness some years ago presented a memorial to the Lord Lieutenant on behalf of some of his clergy and laity to relax rule of Board sufficiently to allow teachers to make reference to Scriptures as occasion might demand, not merely what was already in the lessons, but such as occurred to their minds in teaching; prayer of memorial was not granted, 19667–19678. —As National schools give moral instruction which is based on revelation, and their reading books contain extracts from Scripture, it was reasonable to suppose that above would be permitted, 19679–19688.—Commissioners probably thought it would facilitate a larger violation than witness contemplated; they did not prohibit all Bible reference; Ten Commandments could be used, and these embody all moral principles; if a child broke one, no doubt teacher might quote another in reproof, 19689–19695.

Though highly approving of National system, would accede to suggested plan to make it more acceptable and general; five hours a day should be perfectly free from any creed instruction; there might be difficulties and complications to overcome, but State paying for secular instruction would have a right to demand a certain portion of time to be devoted to it; time for religious instruction should be left open, but master to certify that five hours' secular instruction a day is given on five days a week, 19696–19706.—As to use of controversial texts as writing copies, 19707, 19708. —From amount of Scripture information elicited at a National school examination referred to, there would appear to be sufficient Scripture to be learnt from Board's books, but thinks these books are now withdrawn, 19709, 19710.—Cannot suggest any improvement in present National system, 19711.—Not safe to rely upon religious zeal without emulation; would neither prohibit nor enjoin religious instruction, 19712, 19713.—Exclusion of sedition, &c., from school-books, 19715, 19716.—Training of teachers; necessity for improving their position, 19717, 19718.

Objection to denominational system that it draws severe lines of demarcation between churches, and feeds animosities, while united education would have opposite tendencies; though the latter prevails in the north, adverse influences prevail to keep up antagonism, and mixed education is drifting into denominational. Unfortunately, Board sometimes grants two schools where under mixed system one would be sufficient, 19719–19726.—Rules should be fixed by Act of Parliament, and Board only administrative, 19714, 19727.—Changes which have been made are objectionable; have not conciliated Roman Catholics; should have kept rigidly to Lord Stanley's letter; changes certainly have not modified opposition, 19728–19731.—Denominational training schools objectionable; hopes that patrons would train teachers and send them up for classification; Government should not assist teachers until certificated, 19732–19737.—Control of books by State desirable, but the less control exercised by it the better, 19738–19741.

James Duffy, esq.

Duffy, James, Esq.

Published a book about twenty years ago written by Mr. Mahony, bearing his correct initial, "C," on the title page. Witness possessing the copyright, he published a second edition this year, with the preface abridged by himself, entirely without Mr. Mahony's knowledge, in which by accident the author's name was printed "D." Mahony. Is alone responsible for this; has not seen or heard of Mr. Mahony, for many years. He (Mr. Mahony) could not therefore possibly be responsible for any change in this edition, 23320–23340.

Michael Fitzgerald, esq.

Fitzgerald, Michael, Esq.

Is a Head Inspector under National Board; appointed Sub-Inspector in January 1858, second class District Inspector in July 1861, and to present situation in February, 1867, 8286–8289.

There are sixty districts; each Head Inspector superintends ten; geographical description of witness's district; its technical name is North Dublin; headquarters are at Dublin, 8290–8292.—Except Newry and part of Dublin, the district is agricultural; from a recent change, is not yet fully acquainted with district, 8294–8296.—Last year inspected 101 schools and incidentally visited 112 more, 8297.

Four model schools in district,—West Dublin, Trim, Newry, and Bailieboro'; none of them take boarders, except pupil-teachers; only Bailieboro' is full. Number of pupils on rolls of West Dublin school in May 1868 was 439; in May 1867, 527; average attendance in May 1868, 363·5; in May 1867, 427·7.—Diminution is caused by new schools near, intended, it is believed, to draw off the Roman Catholic children, 8302–8304.—In Newry school a decrease from 229 to 210 on rolls, and 196 to 184 in average attendance in above period from same cause—from efforts of Roman Catholic clergy to withdraw their children; population of denominations is about equal, 8305–8307.—At Bailieboro' an increase of 31 on rolls and a large increase in attendance; here 133 are Protestants and 111 Roman Catholics, 8308, 8309.—At Trim decrease on rolls from 363 to 246, and in attendance from 290 to 154; this from religious difficulty, 8310, 8311.

New convent schools were opened in Trim by the Sisters of Mercy in May 1868. Early in June not one Roman Catholic girl remained in the model school; in the previous year, of an attendance of 160, 140 were Roman Catholics. No material reduction in attendance of boys; probably the girls acted under some special impulse, 8311–8314.—Public and private directions were given by Roman Catholic clergy that children were to attend convent school. Believes same course was adopted at Newry; great hostility is shown by the Roman Catholic clergy, and is likely to be, unless their feelings change, 8384–8388. —As rules of Board must be observed in convent schools, instruction is same in model schools, if properly conducted. No female National school at Trim before establishment of convent school. Fees in convent school are generally lower than in model school, 8389–8395.—The model school is the only National

school at Trim; a few pupils are admitted free; at the others all pay; rates are from 5*s.* to 1*s.* per quarter; the convent school does not intend to seek connexion with Board, 8315–8319.—Believes reasons of free pupils at Trim to be that when established a large number of poor were anxious to attend; it was one of the earliest model schools, 8381–8383.

Pupil-teachers are trained at the model schools; no payment in first year, but have board, lodging and washing; accommodation for 21 in three of them; they are about two-thirds full; pupil-teachers are of all denominations; a fixed proportion of Roman Catholics to Protestants is always kept, 8320–8330.—8448–8451. If in any instance the proportion of one denomination appeared small, it would probably be from original arrangement. Local parties sometimes apply for a fair representation, 8452–8454.—Inspectors never recommend a pupil-teacher who is not likely to remain afterwards; but have no certain guide, and cannot compel them to remain. They are all drawn from the humbler ranks, more from country than town, 8331–8334.—They are taken at 16 for one year, and if satisfactory, for a second, when they are eligible for training department, or as teachers if deserving, 8335–8339.

Proficiency of children in witness' late district has almost doubled in six years. Lower-class teachers are no better than they were some years ago, as the standard is the same. Elementary subjects receive fair attention, 8340–8344.—Pupil teachers are well grounded when they come; most are from National schools. Not easy for a teacher to obtain classification unless from a National school; very few offer themselves; no allowance made in examining such for their want of familiarity with Board's books; some pass, and make fair teachers, 8347–8354.

Pupil-teachers boarded and lodged in model schools are well treated and contented; the masters receive £20 a year for each; district Inspectors visit frequently at meal times; never heard of a complaint, 8356–8361.

Too late now to raise rates of payment in National schools; would injure attendance; a greater number might be made to pay, and this would improve attendance; manager, not Inspector, should settle who should pay, 8362–8365.—It has been stated that Roman Catholic clergy, who are generally the managers, do not press parents to pay, as being dependent on their flocks it would be so much taken from them; 8366–8367.

Needlework is well attended to in female and model schools, but not in mixed schools; it is practised in after life, 8368–8371.

Reasons for objecting to Inspectors having to decide how much parents shall pay. Inspectors fix rate of payment in model schools in disputed cases only. Managers, as a rule are not anxious to make parents pay. Inspectors are not champions of teachers against the managers, 8372–8380.

Should a manager appoint an incompetent master, it would be discovered, at furthest, within three months, as district Inspector must visit his school within that period; in practice, managers generally consult Inspectors beforehand, 8396–8402.—Annual examination of teachers for classification is more severe than that on appointment; a teacher might pass the latter and fail in the former; in this case he could continue another year. It is seldom that an incompetent teacher would remain so long, 8403–8410.—If at annual examination he is found incompetent, he is dismissed at once, unless he appears likely to improve himself, 8411.

Teachers are required to mark the rolls every day before 12 o'clock; inspectors visit between then and time of closing, and are thus able to detect any inaccuracy at once. In 90 per cent. of the schools the attendance is marked most faithfully, 8412–8413.—Managers do not give much assistance in verifying attendance; visits (even of clerical managers) are rare. They generally side with the masters, though they have power to dismiss them without appeal, and use it, 8414–8419.

Michael Fitzgerald, esq.

Managers do not take an active part; generally take a warm interest in schools; district Inspector can form better opinion than Head Inspector whether manager does his duty, 8420–8422.

Model schools were one of the first classes of schools contemplated by Commissioners; their chief object was to train future teachers, and impart a good education to children of all ranks. It was intended to have one in each county, with eight teachers in training in each, 8423–8441.—Commissioners have encouraged classed teachers to enter district model schools as pupil-teachers, but they are not training schools in the sense in which the central establishment is, 8442–8447.

Mixed attendance is less now than before opposition arose. Diminution of Roman Catholics in attendance is not from deterioration of schools, they are as efficient as ever; there is always at least one teacher of each denomination. Same safeguards for religion and morals of pupils as at first. Clergy of all denominations have expressed themselves satisfied, 8455–8463.—Never heard a complaint of attempt to tamper with pupils' faith or morals, 8464, 8465.

Attendance more regular in model than in convent or ordinary schools; statistics in proof, 8466–8470.—Proficiency greater in model than in convent schools, and pupil teachers and monitors superior, 8471–8473.—A monitress from a well conducted convent school will generally obtain good classification; will not say they show a marked superiority over monitors in model schools. All in model schools and most in convent schools are senior monitors; Commissioners sometimes allow them to remain in convent schools, and sometimes also in ordinary schools, over four years, 8474–8486.

Children in convent schools are too young to gain much knowledge, but they acquire good habits, 8487, 8488.—Other large and efficient schools besides convent schools; 192 with attendance over 100, and 444 with attendance from 70 to 100, 8489–8491.—Rule as to first-class monitors applies chiefly to convent schools; cannot compare first-class monitors at £17 a year with senior monitors at £5, 8492, 8493.

Convent schools not altogether gratuitous; some children pay school fees, and there are contributions towards religious objects not entered in school accounts; some convents charge considerably more than others; superioress is frequently manager, 8494–8502.—Most convent schools have two departments; one under National Board, the other for the better classes, 8503, 8504.—Not generally overcrowded, but there should be a limit, 8632, 8633.—Many who offer as teachers are imperfectly qualified. On being appointed by manager, teacher takes charge of school and may not be examined for two or three months; much better that he should be examined before commencing, 8505–8511.—Managers work harmoniously, 8512.—Teachers are generally promoted on recommendation of Head Inspector; chiefs of inspection can alter their classification; would not like this done without being consulted, but there should be a controlling power. Order of procedure in promoting a teacher, 8513–8518.

Teachers, pupil-teachers, and monitors coming to be trained, should have had some practical experience; rule that none should reach first class unless trained has been rescinded, 8519–8523.—Teachers frequently come for training in opposition to clerical managers, and at certainty of losing their schools; but schools generally get supplied again with efficient teachers; they resent the interference strongly; never knew Roman Catholic teachers refuse to be trained; as a rule, they are most anxious for training, 8524–8534.

Bad condition of schools in Dublin; causes, 8535–8538.—Effect of Inspector's efficiency on schools; location of Inspectors; cannot say why there has never before been a Protestant Inspector for Dublin; Belfast and Derry, though Protestant centres, have Roman Catholic Inspectors, 8539–8551.

Does not consider that united education is owing to Roman Catholic clergy; is not aware that Commissioners have unduly multiplied schools, nor (until now

Michael Fitzgerald, esq.

informed) that such is stated in a Parliamentary paper, 8552–8558.

Generally in Board's reports "school" means a department, boys and girls counting separately, 8559–8563.

Pupil-teachers in model schools, as members of the congregation of the place, receive religious instruction, but the Board never contribute to special religious education; the master is *in loco parentis*, and there is the supervision of District Inspector and local clergy; where master is of different denomination, religious instruction is not provided for, but moral supervision is; this is not unsatisfactory, 8564–8569.

April and May not so suitable for education census as February and March, or June and July, 8570–8572.—Opinion of Baron Von Holzendorff, that education in Ireland is superior to that of Prussia, 8573–8576.

After so much gratuitous education, it would now be difficult to make people pay, though it would be more valued if paid for; portion of expense might fairly be laid on locality and landlords, 8577–8584.—To pass successfully, masters must be acquainted with substance of all Board's books; not desirable to have a summary for the purpose; it would result in cram; present system does not, as it is spread over so many books, and tends to draw out intellectual powers, 8585–8593.—Third class standard sufficiently low; probationary too low, 8594.—Board drew up and published a book on Scripture; this was not spending money on religious instruction, 8594–8599.—Infants in model and other schools, 8600–8602.

Priests not to be blamed for advising people to send children to the school they think best for them, 8603–8605. Managers, as a rule, hardly do their duty. Roman Catholics form poorest part of population, but support their clergy. National schools being looked upon as parochial schools have not stimulated local support. Few instances of Roman Catholic clergy spending money in support of schools, 8606–8611.

Great necessity for and advantage of providing teachers with residences, 8612–8615.—Libraries for use of those who have left school most desirable, nothing that could be done would be attended with better results; but hardly possible to select books that would not be open to cavil; a demand for such might create a supply, 8616–8622.

Upper grade teachers fairly paid, but not lower. None should be retained who cannot get above second division of third class in about two years; in 1866 there were 1,317 of these, they receive as much as they are worth. None should be allowed to remain in this division more than three years if salaries were raised, 8623–8629.—Salaries should be fixed partly by results and partly by classification, 8630, 8631.

Advantage to both parties of better class children attending National schools with poorer; the mixing together is much required in Ireland; cannot charge more than 5*s.* a quarter; no distinction of social scale is made in the schools. In Convent schools rich and poor are kept entirely apart. Better classes do not attend to any extent in either model or National schools, 8634–8640.

Further Examination.

Puts in return respecting attendance in model, convent, and ordinary schools; finds it is one of those asked for in the general requisition, 12218–12220. [*This will be found among the returns furnished by National Board, sec.* xiii., *par.* 4.] Statistics quoted from this return, showing that attendance at model schools is more regular than at convent schools, notwithstanding systematic opposition to former, 12221, 12222.—Same classes attend to a great extent in both; comparison is between the whole of the schools of the two classes; in most convent schools witness knows of there is a school for the better class, and one for the poorer children; is acquainted with schools of Sisters of Mercy, of Sacred Heart, of Les Dames de la Sainte Union, of Carmelites, and of Sisters of Charity; comparison is with lower class of convent schools; has no statistics of middle class; would not be surprised to hear that children go in their carriages to Cork model school, 12223–12243.

Explains how opposition of clergy would affect attendance rather than rolls of model schools; fees are paid quarterly in advance in model schools; this insures greater regularity in attendance; no similar system in convent schools, 12244–12248.—Rolls are well kept in 90 per cent. of all schools; means taken to ensure regularity of attendance in model schools as compared with those in convent schools, 12249–12255.—No separation of classes in the National school part of any convent school that witness is acquainted with; has not been able to visit Sisters of Mercy's schools, 12256–12261.—Heard Mr. Keenan state in conversation that attendance was better in convent than in model schools, and was much surprised, 12262, 12263.

Forde, The Very Rev. Mons. Laurence.

Very Rev. Monsignor Laurence Forde.

Is priest of a suburban parish and a vicar-general of diocese of Dublin. Is conversant with views of ecclesiastics as to National education, but does not speak representatively. Is practically manager of nine schools; there were formerly a few Protestants in them, but none now; detail of circumstances under which some received Roman Catholic instruction, 22934–22940.—Schools being practically denominational, rules of Board are no impediment, 22941.—Secular instruction in National schools is too varied, 22942.—Fees are badly paid; allows teachers to receive them where it will not discourage attendance of poor. Payment by results. Local contributions are not satisfactory, but people who contribute are heavily taxed already. Local rate in aid of State grant. Payment of schoolmaster should be as much as possible from those who use school, 22944–22949, 22975.—Objects to model school as being more under Board than others; that, having a higher class of pupils, there is more mixed education; that ecclesiastical authorities have no direct control, &c. Denominational training more important for teachers than for children, 22950–22953.

Dissatisfaction with religious restrictions in National schools. Should be denominational, in order that religious training may be carried throughout daily teaching. Inspector should report only on secular results; much of present inspection is useless and annoying. If religious minorities must be provided for, less oppressive systems than the present could be devised, but no necessity for such provision; *e.g.*, in the city of Dublin in 1866, of 24,000 children in schools under Roman Catholics, only seven were Protestants, 22954–22961, 23076.—Approves English plan of Inspector being of same denomination as school, and examining only into secular instruction. Is never present during inspections; reasons, 22962–22965.—All his teachers are very efficient, two were there before him; obtained two by advertisement; all have a high classification but one. Where a school has long had a high class teacher, custom should be continued; sometimes a lower class one is better for bringing up a school from a low condition, 22966–22974.—Per-centage of attendances 71, 57, and 62, in three of his boys' schools; 62 in one girls' school, and 80 and 74 in two conducted by religious. In one not under Board, conducted by ladies of the Sacred Heart, the whole (about 200) are in constant attendance; fees (from one penny a week) are rigidly exacted, and fines inflicted for absence. People value what they pay for. Probable reasons for variations in attendance. In some instances payment would promote attendance; in others, from poverty, &c., not so, 22976–22986.—A deal of poverty in district; scarcely any of the parents are what may be called fairly off; allow teachers to

keep fees as an encouragement, but direct them to admit gratuitously where necessary, and do all they can to get children to attend; the great majority pay nothing, 22987–22994.

If denominational system established, believes there is no part where there is not sufficient Roman Catholic population for a school of, say, 35 or 40, enough to fairly entitle them to aid. In the unlikely case of a smaller number, they might be safely left to zeal of clergy and laity; notwithstanding the many other duties clergy have, there is no fear in the case of, say, 6 or 8, that they would have to attend school of another denomination, 22995–23001.—Knows little of Antrim or Down, and cannot tell whether they may contain many such small minorities, but if so, could certainly devise some means to deal with them, 23002–23007.—How model schools are more immediately connected with Board than ordinary schools; evils of system cannot be neutralized, as they constantly are in the others, by watchful care of clergy, &c., "evils" being that religion is unrecognised; remedy, making them as denominational as possible. In managing, observes rules of Board, but stretches them as far as possible. Believes rules governing model schools are not precisely similar to those of National schools, 23008–23015.

Would not admit minister of another denomination to instruct his own creed; is opposed to vested schools; but few in hands of Catholic clergy; no objection to members of other denominations being patrons of their own non-vested schools, 23016–23020.—One great objection to model schools is appointments being in the hands of Board; has no confidence in that body; they make most objectionable and unfair appointments of teachers, even in infant schools; have not been generous towards Roman Catholic denomination, 23021–23028.—Is aware of opposition of bishops to model schools, but declines to pass any opinion on their words or acts; bishops will answer for themselves, if asked, as to anything they have said, 23029–23032.—Clergy believe National system to be founded on unsound principle, and that had original intention been carried out, it would have uprooted Catholic religion; clergy are nowhere opposed to bishops; they have all accepted the fact forced on them as an experiment; appointment and tenure of office of parish priest and curate; in a few instances priest and curate may hold different views on education; has not heard of curates adopting bishops' views while parish priests uphold mixed system, but if so, it would be beside the question; nor of laity being opposed to bishops, 23033–23041.

National system when introduced was in the then state of things a benefit to Roman Catholics, being practically denominational; Inspectors' reports may be so framed as to make schools appear mixed, which are not so; cannot speak of schools he is personally unacquainted with, 23043–23045.—Catholics extensively availed themselves of National system at first; believes Board were more easily influenced and less rigorous than now; considers it an unsound system, and takes no interest in attempts to patch it up; except in regard to the books, it is practically denominational. Has good opportunities of knowing opinions of leading ecclesiastics, 23046–23052.—If State paid denominational chaplains to model schools, leaving appointment to denominations, it would not remove the main objection of making religion a secondary matter, and it would inspire a false confidence; no Catholic clergy in them since censured by bishops, 23053–23055.—Teaching cannot be confined to secular matters without important sacrifices; as a matter of fact, those brought up in exclusively Catholic or Protestant schools mingle in after-life quite amicably; the more people are educated in their own religion the better they mingle with others afterwards; State will best discharge its duty by avoiding interference and protecting people in their rights, 23056–23059.—With regard to liberty of parent to send his child to school where he likes, mixed schools being wrong, he does a wrong thing to send him there, and should be amenable to control; exceptional cases might arise, 23060–23066.

Very Rev. Monsignor Laurence Forde.

Denominational schools cannot be considered "seminaries of particular views;" they are seminaries of particular religious opinions, but not exclusively so, as all give secular instruction; distinction between instruction and education; the former not sufficient; Catholics insist on religious influences and observances being infused throughout secular instruction, and this cannot be altogether free from dogma, 23067–23071.—Would on no account allow an infant school teacher of a different religion to touch on religion, 23072–23075.—In witness's eight schools has had but four Protestants; one only stopped a month, two received Catholic instruction at request of parent; the fourth became a Catholic, and the father requested he might be taught to serve mass, 23077, 23078.—Experience has taught how far Board allow Catholic observances; more carried out in some schools than others; thinks question did not arise where above Protestants attended; if Protestants come, conditions on which aid received must be observed; if many came, would try for another school, 23079–23084.—Religious instruction is generally at mid-day; cannot say whether Protestant named above was put out; had no second room; presumes rules were observed, 23085–23092.—Tolerate and use such schools under Board as are practically denominational; case of a school built by a Protestant landlord, he appointing Catholic teachers; under some circumstances might sanction this, but would rather teach school himself and use his own house than allow mixed system, 23093–23095.

Cannot give instance of evil arising from non-denominational inspection. It has occurred that a Protestant Inspector has shocked feelings of those present by not treating nuns with respect shown by Catholic Inspectors; Catholic observances likely to be misinterpreted by those not fully understanding them; danger not so great at present as when observances more fully carried out. If denominational system established, cannot see how Protestant Inspectors could avoid misapprehending many things they would see; case in illustration which has actually occurred, 23096–23101.—If rules of Board were strictly observed, nuns should not enter schools (being strong "religious emblems"); this practical contradiction shows system to be at war with itself. Made school in which he was patron as denominational as he could by having prayers, &c., three times a day; gives this as an instance of stretching Board's rules as far as possible. Used only Board's books, but not all of them; continues this practice, except for monitors not under Board. Does not read much of Christian Brothers' books, but has great confidence in them; carefully tests suspected books; trusts teachers very much in this matter, 23102–23109.—Monitors above referred to are under Sisters at Blackrock; supplies them with Christian Brothers' books, 23110–23112.—School previously referred to as not under Board is conducted by community at Mount Annville; it contains about 200 girls; they use Christian Brothers' books, 23113–23117.

Aid to monks' and nuns' schools from commencement of system. Has at present only two nuns' schools in connexion with Board; should say that in the main rules are observed in these. History of event which caused rule of Board that nuns in one convent should not teach in more than one school. Blackrock school was not within operation of rule, so that statement that it was violated there must be a mistake, 23118–23126.—Books being sanctioned by Board, no question can arise with Inspectors. If mental prayer, &c., questioned, witness would fight it out with Board. Under denominational system, choice of books should be perfectly free, Inspectors should only look to quality of reading, not to matter read, 23127–23131.—Strong point of Catholic ecclesiastics' position is, having schools in their own hands. In case of collision with State, does not think they would attempt education of people; it would violate political and re-

Very Rev. Monsignor Laurence Forde.

ligious freedom; if they did, clergy must bring to bear their influence on parents, which is their real safeguard, 23132–23136.—Notwithstanding this influence, would strongly object to property being held on behalf of Board; reasons. Is quite satisfied that title of his schools is good. Ordinary plan is to vest property in reliable trustees simply to hold and transmit. Cannot call property his own in the sense of being able to dispose of it, only as representative of Church. Reason for trust deeds not being too specific; three ways of holding these schools under Board, 23137–23142.—In the case of a school held as described, property is not priest's own, trustees hold it for him, and practically he would be as much at home in it as in his church. If everything *bonâ fide*, a deed setting out trusts in a way approved by ecclesiastical authorities might be safe, if they were allowed to decide disputed points; is not sure that it would be better than present mode, 23143–23147.

Model schools being condemned by Catholic bishops, Catholic teachers appointed are in a false position; it is an injury to them, as it is to those trained, whom priests will not now employ. As to wrong done to young Catholics by Board appointing them to positions (model schools) where they cannot properly follow their religion, 23148–23151.—Board does not grant such a fair allowance to schools in connexion with religious bodies as to others; they are sometimes very liberal, sometimes the reverse; influences at work seem to vary. Is not very conversant with Dublin schools, and would not like to say they are neglected in order to drive children to Marlborough-street. Cannot compare them with Belfast schools. Has heard that the north is more liberally treated than other parts, 23152–23159.—With regard to model schools, examination of question as between ignorance and obtaining education at extreme religious risk; as to lawfulness of choosing lesser of two evils. Would not judge harshly in any individual case without knowing particulars. It was not approval of system that led Catholic prelates to partially support it. For various reasons they to some extent adopted it, endeavouring to neutralize evil influences, 23160–23162.

It is a primary duty of all in authority to redress an urgent evil, such as want of education here is, population being too poor to provide it; State making available existing endowments for the purpose would be a great benefit, 23163.—Denominational training-schools necessary for denominational system; would prefer that Catholics should provide their own premises, and that religious communities should have control, but much would depend upon secular training-schools; as to share of parochial clergy in management; wide difference between this and management of ordinary schools. Religious management would vest in bishop, and a great deal would depend on terms of foundation, 23164–23175.—State should confine itself to providing the money and seeing it properly spent. No doubt religious bodies would provide their own buildings. Nuns, Christian Brothers, &c., already have large premises, part of which could no doubt be devoted to the purpose, 23176–23180.—Would like to do without State aid, but would require considerable help just now; hopes Irish Catholics will soon be less dependent. Question if Parliament would continue wholly to support institutions controlled by religious orders even if they commenced it; English public might expect Catholics to bear part of the burden. Would be very glad to see vote reduced yearly until it could be done without. Thoughtful men would like as little State interference (which would accompany State help) as possible, but latter will be required many years yet, 23181–23189.

Agrees with view expressed in a judgment of Vice-Chancellor Knight Bruce (quoted), that religion is an essential part of all education, but that children should not be forced to attend any religious service contrary to wish of parent. Would have every religious denomination pursuing its own religion untrammelled by mixture with any other. Various means adopted by Board to prevent proselytising. The latest rule, namely, parents signifying their assent in writing, is the only efficient means, 23190–23202.—Cannot say how Prussian system, viz., a small parish Board, with priest at the head, would work; Boards do not generally work well here; would share the fate of most local Boards, and the matter, as a rule, would fall into the hands of the priest, 23203–23206.—Though laity sometimes advocate mixed system, practically they always use Roman Catholic schools; mass meeting at Cork favouring views of ecclesiastics; they and laity who adopt system do so only as being best under the circumstances, and because it is really denominational, and in the hands of the priests; they hope for something better. Unwisdom of a system not heartily adopted by people, 23207–23214.—National system has been extensively used, with co-operation of Catholic hierarchy, for upwards of thirty years. During this time there has been a great advance of substantial religious knowledge, the result of religious influences being more within people's reach in consequence of their being better instructed, 23215–23219.

Whatever system be adopted, the distinct religious teaching should be in hands of clergy, and they should be enabled to prevent anything detrimental being imported into secular teaching. State should pay, and might arrange secular teaching within certain limits; should have same authority as private individual endowing a school. Looks upon action of State as transitory; would be sorry to see them found all the schools. State direction of education utterly bad, 23220–23224.

If denominational system established, with direction and control of religious instruction in the hands of the Church, it is most desirable that Inspectors for purely secular subjects should be of the same denomination, 23225–23228.—No objection to Board appointing Inspectors, but they must be persons in the confidence of the ecclesiastical authorities, and whose moral and religious character is known and approved by them, 23230–23233.—Cannot speak as to Catholic State education abroad. Christian Brothers have a central authority for purposes of removal, &c., but are subject to bishops; should their schools be taken as training-schools under denominational system, no difficulty need be apprehended from their partial independence, 23234–23237.—Religious orders would not employ teachers before testing capability. State must fix guarantee as to fitness of any they pay. No objection on principle to examining monks and nuns before appointment, but it must be done with due regard to their feelings, especially the latter, 23238–23241.

Would be glad to be independent of State. Would like schools to be supported partly or wholly by laity. Religious instruction and care of children must be altogether in hands of clergy, but laity should have a certain amount of control and inspection in secular department (at present they scarcely ever enter a school); this might approach Prussian system, named above, but from their many avocations they would probably but seldom attend meetings, &c., and unless they could attend and co-operate regularly, to allow the right, might really only amount to giving opportunities of injurious interference. No objection to principle of lay co-operation, and what was conceded to State Board should also be allowed to local Board, 23242–23248.—Continental system of one school for Catholics and another for Protestants in places where there are enough of each, and in smaller places only one, with arrangement for separate religious instruction, would be better than present plan; it would be an acknowledgment of denominational system, and officers, &c., of Board, would no longer advocate mixed system; still, presenting two forms of religion as having equal claims, is calculated to lead children to indifferentism or Deism, and under some circumstances objections might be insuperable; would not mind a few Protestants, well protected with a conscience clause, in Catholic schools, but would never allow Catholics in Protestant schools, 23249–23252.—As to persons of the better classes, while advocating united education for those below them, sending their

children to boarding schools, &c., of their own denomination, the fact is that there are no mixed boarding schools. In the few cases where Catholics use Protestant boarding schools, it is for the peculiar character of the instruction, 23253–23255.

Sees no objection to a system of State attending only to secular instruction, and paying by results, leaving managers exclusively to give any or what religious instruction they pleased; it would be practically denominational, 23256–23259.

Knows little about meeting at Cork above referred to, but takes it for granted that it was to consider intermediate education; would be slow to draw conclusions from resolutions of any public meeting. Believes laity, if they got a fair chance, would immensely prefer denominational to mixed education; does not see how they could think otherwise, 23260–23265. If denominational system established in places where numbers sufficient, and where otherwise Protestant minority attended Catholic school, religious observances might be made as few as possible, but could not be eliminated; minority must put up with the inconvenience; but such schools altogether undesirable, 23266–23268.—Knows nothing about English conscience clause; no doubt in granting aid Parliament would jealously guard Protestant minorities; Catholics look for justice; thinks Catholic or Protestant minorities to be protected are few. There might be a central fund, out of which grants could be made, but believes cases are exceptional, and if legislated for, logically the wants of one person might upset a neighbourhood. Catholics are the poorer part of the population, partly from past misgovernment, and therefore deserve consideration, 23269–23275.

Would not co-operate with a mixed system; could not give a certificate that no child had been excluded on account of his religion; no Protestants come, or probably would come, to his schools. Supposing all restrictions on religious teaching removed, cannot see use of such certificates; schools would be practically denominational. If the two classes of schools established, State would be throwing responsibility on individuals that they ought to take on themselves, 23276–23282. —"Religious atmosphere" of Catholic schools will make a Protestant child Catholic without direct teaching; this is lost in mixed schools. Believes the Angelus is said, and other practices observed in most Catholic schools, and that sufficient religious influence is brought to bear throughout all the teaching to maintain the Catholic atmosphere. Cannot answer as to practice in the ordinary National schools throughout the country, 23283–23288. Very Rev. Monsignor Laurence Forde.

Since condemnation of model schools by bishops, Catholic teachers in them are in a false position, as in their conscience they are subject to guidance of religious superiors; does not believe there are many of them in full communion. It is a great injury to young men trained there; cannot say how it is that vacancies are filled up so readily; present gain is often a temptation; case of teachers and those in training very different; cannot say if any are excluded from the sacraments, practice differs according to circumstances in different places; this is not expediency, but the result of wise discretion and careful deliberation on each case, 23289–23311.—Would prefer children stopping away from school altogether to attending model schools; reasons. Declines to say whether it is a legitimate exercise of clerical authority to prevent them. If some pass by a convent school to go, presumes it is because they like it, and choose to disobey advice, 23312–23318.—Ecclesiastical authorities do not wish to entirely prohibit them until sufficient other schools are provided, which is being rapidly done. When this is accomplished, the proper action will be taken, 23319.

GALLAGHER, Mr. PATRICK.

Is teacher of Drumkeeran school, county Leitrim, which he has taught for the last twenty-one years; is classed third of first; was trained at Marlborough-street in 1849, and has been a teacher under the Board for twenty-one years, 19141–19151, 19269.—Is also Deputy Registrar of Births, Deaths, and Marriages, 19307, 19308. Mr. P. Gallagher.

The principal things of which teachers complain are—the insufficiency of the salaries, want of pensions for old teachers, and having to pay rent for school-houses and residences, 19152–19155, 19223–19225.—Witness's school is under a Roman Catholic clerical manager; circumstances under which it came into connexion with the Board, 19156–19166. —Ordinary amount of rent paid for schools is about £2 a year; there is no reluctance on part of landlords to accept schoolmasters as tenants, 19167–19171.—Teachers are the servants of the managers as far as education is concerned, but their money comes from the State, and from it they expect their pensions; teachers rather encourage parents to pay school fees than otherwise; the children generally throughout the country are kept at school as regularly as the parents can spare them; average attendance at witness's school from 1860 to 1867, 19171–19188.—There are about twenty Protestant children in the school, and there have never been any differences with regard to religious instruction, 19189, 19190, 19252. —The present salaries are not sufficient to enable a man to support his family and keep himself out of debt, 19191.—Payment by results is believed by many teachers to lead to a system of cramming, the subject is too intricate for witness to answer, 19192–19194, 19278–19283.—Is not prepared to suggest a remedy for the hardships inflicted by having to pay rent for the schools, 19195, 19196.

If a garden were attached to the school-house and the residence provided free of rent, it would be a great advantage; many schools are very much in want of offices for the accommodation of the children, 19197–19210, 19226–19233.—The salary of masters of the third class should be £1 a week, and promotion from class to class should be quicker; there should only be two grades in the first-class, and none in the others, 19211–19219.—Witness does not receive any local aid from the landholder, 19220, 19221, 19254–19256, 19270–19272.—If a teacher become incapacitated through age or ill health, he should be entitled to a pension, 19222.—The allowances made by the Board on retirement are quite insufficient, 19234–19241.—Teachers in Connaught have no cause of complaint as to the time and mode of payment. If the salaries were paid direct to the teachers, the managers would be ignored altogether, which would be wrong, 19242–19249.—The managers in Connaught encourage the payment of school-fees; many parents who can afford to pay are under the impression that their children ought to be educated free in the National schools, 19257–19268.

Qualified masters are reluctant to take new schools in the face of the hardships they have to undergo, 19273.—Teachers cannot keep a tone of morality through the school without the support of the managers, 19276–19277.—A teacher who is able to produce a better school than another is entitled to a higher salary; a good teacher may not be able to show equal results to his labour with one inferior; irregularity of attendance is an obstacle to a system of payment by results, 19284–19294.—The effect of granting pensions, so far as offering an inducement to good teachers to leave their schools, would depend upon the amount; witness suggests twenty-one years as the period to entitle to pension, because that is the term adopted in the army and the constabulary; the twenty-one years would not of necessity be passed in one school; masters are not in the habit of changing from school to school, 19295–19306. Profit made by witness on sale of Board's books is very small, about 10*s.* a year; very little demand for literature in Drumkeeran, 19309–19312.—Receives £9 10*s.* a year for long service, 19316–19318.—Monitors, &c., in the school, 19319–19325.

Brother Patrick A. Gaynor.

Gaynor, Brother Patrick A.

Is a Presentation Brother, residing at Cork with Father Townsend, 17353, 17354.—Had management of schools at Killarney up to 1867; schools are under National Board; attendance about 300, chiefly poor, 17353–17362.—No difficulty with Board as to religious instruction; had a small number of Protestants at Milltown, who used to walk in the yard during religious instruction; they now attend the parochial school; there were other Protestant schools in Milltown, 17355–17373.—Is not patron of any National school; does not get money enough from Board; schools are same as convent schools; totally objects to rule of Board excluding clergymen and members of religious orders from being teachers in National schools; this rule excludes Greenmount; qualifications desired by Board are just those to be found in a monk, 17375 17380.

Brothers would not submit to examinations for certificates; should be paid by results—a fair day's wages for a fair day's work; has nothing to say to examination of ordinary teachers; but men who abandon good prospects, and take vows from pure motives of charity, ought to be exceptionally and considerately treated; wishes to bear testimony to uniform kindness and courtesy of Commissioners and officers of Board, 17381–17391.

Convent and monastic schools are at present paid differently from ordinary schools—namely, by capitation, but only at 4*s.* per head, while the latter receive 25*s.*; at Milltown four Brothers received only £8 a year each; is not afraid of payment by results, 17392–17398.—Have many children over twelve years of age; some have become National teachers; many are sons of artisans, 17399–17403.—Cost, dimensions, and accommodation of schools at Killarney; two convent National schools there, 17404–17407.

J. Gordon, esq.

Gordon, John, Esq.

Has been Inspector under the National Board for three years in the districts of Galway and Tuam; was previously in Canada West as head master of a grammar school with common schools combined (known in Canada as a union school) for eleven years, 18713–18726, 18913–18915.

Management and control of common schools in Upper Canada are vested in a local board of trustees who are elected by the ratepayers of the district, the trustees being constituted a corporation for the purposes of school management. There is no position corresponding to the patron of National schools, the appointment and removal of teachers being in the hands of the trustees, 18727, 18728, 18730–18733, 18735–18739.

The superior administration is vested in the Council of Public Instruction, one of whom is the chief superintendent of education, who is the only paid member; under this Council come the county boards, 18756–18763. The whole of Upper Canada is divided into school sections; it is not compulsory for each section to have a school—two may be united, 19083–19088.

The schools are principally supported by local taxation, the money voted by the Legislature being to aid paying salaries only, 18729, 18753–18755.—Grants of Crown lands are made for the support of schools, the funds derived being allocated proportionately to common schools and to separate schools, 18795–18805, 18812–18815.—The schools are built entirely from local funds; the Government grant is the same whatever amount the locality may raise, so that it contributes the minimum amount required by law—the grant depends upon the average attendance in the municipality of the division; the rating is by municipalities, 19089–19098.

The books used in Upper Canada were almost entirely those of the National Board; lately the Council have published some books of their own, 18764–18771.—Roman Catholics may possibly have objected to the historical books in use, 19140.

Teachers must possess a certificate of qualification. This is granted at an annual examination, when the teachers are classified according to their competency. If a vacancy occurs before the time for the examination arrives the local superintendent (who corresponds to the Inspector of the Irish system) may grant a provisional certificate, 18740–18752, 18983–18987.—Teachers of separate schools need not undergo this examination; a certificate from the local trustees is sufficient to draw the legislative grant, 18988–18990. Inefficiency of separate schools, 18991–18994.

The schools are opened and closed with prayer, which in many cases is omitted out of deference to the wishes of certain classes who attend the schools. Six hours a day are devoted to secular instruction, the clergymen having the right to arrange with the trustees to give religious instruction to members of their community at any hour of the day out of the regular school hours, 18772–18785, 18950–18954, 18965–18967, 19054–19059.—Under certain conditions Roman Catholics may establish separate schools for children of their own faith, but this is only done in exceptional cases, as Catholics generally avail themselves of the ordinary common schools, 18786–18794, 18806, 18807, 18968–18971.—In several cases the separate schools have been given up, and merged in the common schools, 19114–19118.—The Common Schools Act of 1850 authorizes, under certain conditions, the establishment of separate schools for Roman Catholics, Protestants, or coloured people; those who desire the separate school must tax themselves for its support, and are relieved from all tax for the public schools. The trustees are elected from the ratepayers who separate, the clergyman of the religious denomination being usually chosen as one, 18808–18811, 18816–18833, 18955–18964.—Points of difference as to management between Irish and Canadian schools; the Canadian system is preferable, 18972–18974, 19034–19045.—Principles on which public or separate schools are allowed by the State, 18975–18982.

Amount of legislative grant to common and separate schools in 1863, 18995–19003. Proportion of local support, 19004–19019. The statement in Rev. J. Fraser's Report that the clergy hold themselves aloof from the common school system is erroneous; it may have been condemned by the Roman Catholic bishops, 19020–19025, 19060–19074. Opinions of the system given by Mr. Maguire in his work on the "Irish in America," and in *The Month* (an English Roman Catholic publication), 19026–19033. There are training schools in Upper and Lower Canada, 19049–19053. Number of families who may start a separate school; expense of separate schools; rules as to religious instruction, 19099–19113.

The school system of the United States differs from that of Upper Canada in having no provision for religious instruction after school hours, and in not having separate schools, 18834–18837. Sunday schools are considered very important in supplying religious instruction, 18903. The secular schools are supported by a local school tax; the school of the district is managed by the local directors, who are governed by the State laws, 18934–18939. Arrangements with regard to religious instruction, 18940–18945.

General principles of school system in Lower Canada are the same as in Upper Canada; the general administration is vested in a Council of Public Instruction analogous to that in Upper Canada, with school sections and elective trustees, the management being similar in both provinces. There are Common and Separate Schools Acts for Lower Canada differing in some minute points from those for Upper Canada, 18838–18849.

The formalities to be observed in the foundation and

J. Gordon, esq.

management of dissentient schools (called "separate" schools in the Upper Province) are similar; the dissentient schools are generally founded by Protestants, though Roman Catholics have availed themselves of the privilege; the schools would still possess an undenominational character, 18850–18861.—In founding a dissentient school no reasons are asked, generally it arises from personal quarrels at the board among the trustees of different religious faiths, but independent of the great principles of religious liberty, 18862–18868.

In 1863 there were in Upper Canada 120 separate schools, with 171 Roman Catholic teachers, whilst in the common schools there were 504 Catholic teachers, the total number of teachers being 4,504, and of common schools 4,013, 18869–18876, 18894–18898.—There is no provision as to the religion of the teachers; the denomination of the teachers is not recognised, 18877–18885, 19119–19120.—The Canadian principle is that the master is to occupy himself solely with secular teaching, 18886–18893, 18949.

There is no Government arrangement for Sunday schools, but there is a system carried out by the ministers of the various denominations which is looked upon as important in supplying religious education, 18899–18902, 18904–18907.—The people live harmoniously together, and religious feuds do not lead to disturbances of the peace, 18908–18912.—Pay of common school teachers $700 to $250, 18916.

School-fees are limited to not more than a shilling a month, nor less than sixpence; they are not generally paid, there being many free schools, 18917–18918.—Teachers, size, number of pupils, &c., in Canadian schools under witness, 18919-18933.—Schools in Canada belong to the people, 18946–18948.—If the Canadian system were introduced into Ireland many of the children would attend the common schools; in Galway, for instance, the common schools would be in the hands of the majority, who would have the right of appointing their own teachers, 19075–19077.—Difference between this system and non-vested schools, 19078–19082.—One master might teach fifty children in the same class, but not if divided in three or four classes, 19121–19122.—There is nothing analogous in Canada to the pupil-teacher or monitorial system, the training schools being fed from the more advanced classes, 19123–19124, 19130–19133.—Irish National teachers who emigrate often become schoolmasters in Canada, but are hardly so popular as those born in the country, 19134–19139.

Grace, Brother John Augustin.

Brother John Augustin Grace.

Is head of the Richmond-street establishment of Christian Brothers, 9266.—Order was founded at Waterford in 1802; head is styled Superior-General; each house is managed by a brother director, subject to head superior; some brothers teach, others attend to domestic matters; change from one house to another as required; cannot enter priesthood; must be on probation eleven years before becoming life members; brother director of house may be removed, 9267–9284, 9351, 9352.

Many children are taught free, none pay above a penny a week; fees are expended solely on schools, 9285-9287.—Rather object to children able to pay more than a penny a week, 9303, 9304.—Similar instruction at all the schools, viz., English course. Latin is taught in one or two, at urgent request of some of the bishops, but classics objected to, main object being instruction of the poor, 9288–9292, 9354–9420.—Object of society being to give a Catholic education, rules of National Board were found so to restrict operations that connexion could not be continued; no present desire for State aid, 9293–9296.—Believes National Board would not have objected to more than one school being taught from one house, 9297–9302.

No children of other persuasions in schools at present; when they had, they were always sent out during religious instruction, and every care was taken to avoid suspicion of proselytizing, 9305–9311.—Emblems in schools would be objectionable to Protestants; books are of a Catholic tendency; are supplied gratis to those who cannot afford to pay; prices; some go to India, Australia, &c., 9313–9324.

Society has 60 establishments and 225 schoolrooms, some at a distance, 9325–9327.—A return is taken yearly, to ascertain attendance and classification. Average daily attendance 18,000, number on rolls 25,000; causes of absences; names kept on rolls 13 weeks; no food given to induce attendance, 9328–9337.—A few pupils have become classified teachers under National Board. Do not train boys as teachers except destined for Society, 9338, 9339.—Objection to connexion with Board, 9340.

Vesting and repairs of outlying schools. Only one in Ireland the property of a private individual, and used during his pleasure, 9341–9350.—All the teachers are members of the Society, 9353.—Books are prepared by members. Parochial clergy visit schools as confessors; brothers prepare the pupils for religious duties, and may instruct them as fully as priests, 9356–9361.

In Dublin there are 9 district school buildings, containing 31 school-rooms; localities of some. Lending libraries; their usefulness and success; a catalogue is about to be printed, 9362-9369, 9428-9430.—Brothers' houses are supported chiefly by annual subscriptions and collections; funds of one house cannot be applied to another, 9370–9376.—Daily school work commences and ends with prayer; half an hour's religious instruction, &c., at noon; a pause is made for a short prayer every time the clock strikes. In the secular lessons moral and religious instruction is introduced wherever the opportunity occurs and the subject will admit of it, but a time is laid out for regular dogmatic religious teaching, 9377–9391.—Main object of schools is primary instruction, but any highly-gifted boy is encouraged to continue, and is taught advanced subjects, 9392, 9393.

Analogy of order to French Christian Brothers; relations of the latter to the State, 9394–9398.—Inspection of schools is by superiors, and must take place at least once a year, 9399–9403.—Eight school-rooms in Richmond-street establishment, and four branches elsewhere. Particulars of management of classes, &c., which correspond in many respects with system of National Board; a drawing school is being prepared, 9404–9419.—Any distinction in admission is in favour of destitute children (temporally or spiritually), 9421–9422.—Many pupils have been successful in after life; several have entered the order. Have no accommodation now for teaching school-organization to others, 9423–9427.—In teaching history, comments are made according to tenor of class book, 9431–9434.—Protestants would probably not use this book, though it has been said that some are used by them, 9357, 9435, 9436.

Brothers are mainly from the middle class; can retire from the order; Mr. Hoare is Superior-General, 9437–9440.—Success in regard to silence, order, and regularity in schools is achieved mainly by moral means; teachers being religious men have great influence; but little corporal punishment, 9441–9446.

Episcopal sanction to books, 9447-9449.—Poetry learnt by heart. Period of reading Fourth Book; its object is moral as well as literary; obedience to the law and forgiveness of enemies are included in the morality it inculcates, but a difference must be drawn between personal injuries and national wrongs. Eloquent passages describing the latter have been selected as models of literary style, &c. There is nothing inconsistent with Christian forgiveness in teaching what has been suffered for the faith, or immoral in teaching historical truth which may contain bitter recollections, 9450–

Brother John Augustin Grace.

9467.—Course of instruction capable of being adopted when reading passages in Fourth Book containing severe censures on the English Government. It might be made the occasion of enforcing the principle of forgiveness of injuries, &c. Political subjects form no part of Christian Brothers' teaching, nor do these take part in any political organization. Nothing inconsistent with loyalty to the Crown in desiring a separate Irish Parliament; 9468–9471.—In regard to another passage implying resistance to English rule being a duty, it would not be right to conceal history from pupils—they would probably learn it elsewhere without advantage of Christian Brothers' teaching to modify it. They are taught respect and submission to governing power, but that should not prevent their learning facts of history, 9472–9475.—Statement in school-book that English power was "wrested in blood" and preserved by "stratagem and force," would be difficult to disprove, 9476.—Justification of insertion of foregoing passage; does not now apply; is given to teach elocution, not to impress political ideas, 9477–9479.

With regard to further passages hostile to English Government, and calculated to stir up blood of boys, witness considers that lessons on moral subjects abound in book with a tendency to reconcile minds of Irish to go on as brethren with English. Does not think passages were introduced to convey history though referring to historical facts, but as specimens of eloquence, 9480–9484.

Poetry (quoted), written before 1829, speaking of time when "Erin's fetters shall be broken," &c., also recent poem talking of "Erin's ruined glory," &c., are read, and may be got by heart by the young men; witness feels the weight of one of the fetters himself, but does not teach his personal grievances; there is much to remedy yet. Another poem, speaking of ancient glory of St. Columba being overturned by "dungeon and steel," is justifiable, seeing what that faith has had to endure; persecution of it is perhaps without a parallel in any Christian country, 9484–9494.—Matter of opinion whether constant praise of resistance to tyranny is the best training for boys; not likely to make them disloyal; do not teach duty of resistance to power. Times are past when subject would be free from bond of allegiance, 9495–9497.—Has heard that Protestants use book referred to; cannot say who; would not use it himself if a Protestant, 9498, 9499.

Domestic Brothers' qualification is acquaintance with housekeeping, &c., 9500, 9501.—Newspaper report that boys walked in procession in honour of Fenians executed at Manchester is untrue. Individual boys and individual students from Queen's Colleges may have attended, but not as organized bodies, 9502–9506, 9630–9632.—A penny a week is highest school fee; cannot receive payment for instruction given; parents may contribute to church collections, or give subscriptions. Average fees per head, taking number on rolls, 1*s.* 9½*d.*; or on number in average attendance, 2*s.* 5¾*d.*; only 1*s.* 2*d.* in Limerick, as children are very poor, 9508–9523, 9533, 9534.—Twenty-five Brothers in Limerick; personal expenses £32 per head; £40 at Richmond-street, not including training; Richmond-street is the executive department, 9524–9532.

In Limerick subscriptions come from Protestants as well as Catholics; facilities for collecting, 9533–9541.—Eighteen schools and four establishments in Limerick; high character of establishment and principal at Roxborough-road; one building has been given to nuns for an infants' school, 9542–9546.—Never knew a Brothers' school set up in opposition to a National school; locality might have got one up, and asked Brothers to superintend it, 9547–9551.—Would accept State aid if Inspector had nothing to do with religion or history taught, 9552–9555.—Religious teaching is the main object of Society, also probably of Church Education Society, each from their own view; State should aid all impartially, without distinction of creed or class, 9556–9563.

Christian Brothers' schools may in effect be rivals of National schools, though not so intended; they are decidedly Catholic schools, and could not dispense with use of emblems, &c., for sake of State aid, 9564–9568.—Could not so alter devotional arrangements that Protestant children who might attend could escape them all, 9569–9573.—No objection on principle to State aid, but distrust Government; even National system is penal against Catholics. Could not submit to rules under which nuns receive aid; their system has probably received *acquiescence* of ecclesiastical authorities, 9574–9577.—Nothing but want of means and members prevents spread of organization all over the land. To live in harmony with other denominations is systematically inculcated, 9578–9583.—All trust deeds are registered; some Brothers are trustees jointly with other persons. Those Brothers registered before 1829 are eligible, but all admitted since that year are liable to transportation; hardship of this law, 9584–9592.

Support of schools; visits of parish priests, 9593–9599. Progress in First Book; average age at admission is seven, but many are younger; no infants' schools, 9600–9605.—Cost of those in training exceeds the £25 a year they pay; no holidays during whole term, 9606–9608.—Schools at Liverpool. Connexion with Frères de la Salle is nominal; French Brothers in England accepting aid cannot object to inspection, 9610–9616.—Schools did not keep rolls formerly, but do so regularly now; figures may be relied on, 9617–9621.—Children of lower class of shopkeepers are commonly sent to the schools. Brothers cannot be clergymen, 9622–9626.

Bishops have full right of supervision over books, but it is not always exercised, 9627–9629.—A fair supply of candidates; effect of their having to pay £25 a year, 9633–9635. Undesirability of classics in the schools, 9636, 9637.—Scotch history is taught in Scotch schools; knowing past history of country need not lead to objecting to present state of things; it may have a contrary effect, 9638–9641.—Irish history, published by Society for Promoting Christian Knowledge, speaking of Irish Catholics in seventeenth century as savages, murderers, &c., which is used in Church Education Society's schools, is calculated to produce bad feeling in Ireland among different classes, and shows importance of Christian Brothers teaching facts of history to their scholars before they learn them elsewhere through a false and offensive medium, 9642, 9643.—State should reconcile parties as far as they can, but the light of history will fall on the dark deeds of the past; if forgiven they cannot be forgotten. Children had better learn them under school influences than otherwise; reasons. State should endeavour to promote peace and good-will, but not by suppressing the truth. It would be monstrous to bring up children of a nation ignorant of its history; suppression of the past rather has an immoral tendency, 9644–9650.

Society's books are rather more advanced than National Board's. Half the boys can read and write; proportion in Third and Fourth Books, &c. Is surprised to hear that only 7·1 per cent. in National Schools are in Fourth Book and upwards, 9651–9660. Coincidence between ages of children and what they are learning, 9661, 9662. Reasons of children remaining longer in Christian Brothers' schools than in others are the kindness, care, and attention shown, &c., and not because fees are remitted; average paid is fully as high as in National schools, 9663–9667. Parents may be less anxious to pay in schools supported by the State, 9671. Large class in natural philosophy in one school. Connexion with Science and Art Department. No objection to pupils sending in their drawings for competition, 9668–9670, 9690–9697.

Ample cubic space allowed in schools built by Christian Brothers; Richmond-street schools at present are full, 9673–9683. Extent to which grammar is taught, 9684–9689.

Christian Brothers' training being equal to any outside, they would never submit to external training and classification; results are the best test of com-

petency. Would object to be paid by capitation and results only, while others received for classification in addition, as pay should be equal if equal results are produced. Teachers are not paid for the knowledge they possess, but for what they impart. If the three standards, above named, were adopted, it would not be fair to withhold payment for classification, though not examined, if results were equal to those of classified teachers. Law of Canada cited in confirmation of this view. If there were grades in the classification, qualification could be judged of by range of subjects, coupled with results, 9698-9714.

Disabilities under which Christian Brothers labour are liability to transportation for taking vows, and inability as a religious body to hold property; no difficulty if the property be vested in trustees. There have been cases of loss of property left to Society through above-named penal clause, 9715-9720.—Board of Education would not sanction use of historical books referred to above, 9721.

Further Examination.

In reference to previous examination, wishes clearly to be understood that neither Repeal of the Union nor any other political subject forms part of the teaching in Christian Brothers' schools. In confirmation, reads one of the rules of a literary society formed by ex-pupils, drawn up by himself, expressly prohibiting political discussion, and part of an address he delivered at its opening, stating that such a course would lead to its dissolution. If necessary, could have brought much stronger proof, 13952.—Pupils read a lesson as part of history, setting forth necessity for a separate Irish Parliament, and it, no doubt, leaves an impression, as any other lesson would, but they are not necessarily convinced by it; if they did not read this, they might read it elsewhere under less favourable circumstances, 13953–13955. Brother John Augustin Grace.

Instruction fully does justice to advantages of the British constitution. Arguments for and against Repeal of the Union must be familiar to pupils from other sources, 13956–13958.—Could not give a variety of lessons on each subject in their small class books, but have other means of informing them of the opposite side of the question, namely, a lending library of 1,000 volumes, containing works by Lord Brougham, Mr. Goldwin Smith, &c. Cannot refer to writing in this direction in their own lesson-books, 13959–13961.—Books of National Board are so distrusted as to national sentiment that much that they say is scoffed at, and their neutral tint acts in the opposite direction to that intended, 13962–13964.—Before any book is adopted, it is submitted to Head of Order and a special committee; a doctrinal work was submitted to bishop of diocese, 13965–13967.

Hackett, Rev. John Winthrop.

Rev. John Winthrop Hackett.

Is incumbent of St. James's church, near Bray, where he resides; is secretary of Incorporated Society, and has an official residence in Dublin; his duties are to carry out orders of Society, manage correspondence, and visit and examine schools. Has nothing to do with estates or rents, 25781–25786. Society wholly or partly support six boarding schools for boys and two for girls, and thirteen day schools; training institution is at Santry, the others in various places. Pupils are obtained from other schools by examination for Santry, where they receive an education qualifying them for the Civil Service, &c., 25787–25793.—Society was incorporated for promoting English Protestant schools in Ireland. Reads a statement giving constitution, history, &c., 25793.—Lord Lieutenant is the patron; certain dignitaries are *ex-officio* members, others are elected. Subscription not now necessary to membership. Witness became Secretary in 1858, succeeding the Rev. R. Ardill. Charter was issued in 1733. Is aware that a petition was presented by bishops and clergy recognising obligations of beneficed clergy to provide schools, &c., 25794–25805.

After certain recitals, charter empowers Society to hold property for maintenance of schools to teach English, principles of true religion, and industrial occupations to children of poor Papists, &c., 25806–25812.—Funds are derived from estates and money invested; originally the King subscribed £1,000 a year, and Society received produce of tax upon hawkers; parliamentary grants ceased in 1832; amounts received from this source. Income now about £8,000 a year; extent of landed property; about £100,000 in the funds. Trusts now include board and lodging of children; cannot say whether charter contains any reference to these matters, 25813–25827.—Society was mainly for children of Roman Catholic parents down to withdrawal of parliamentary grant in 1832; particulars of special bequests, some of which were for Protestants; object was to reclaim children from errors of Roman Catholic system and bring them up to Established Church; cannot say when other denominations were first admitted, 25828–25847.—Society can only teach Protestantism. When Government grant was withdrawn were compelled to restrict operations. Has been mainly for Protestants since 1825. Admission by competition commenced in 1839; particulars of these admissions. Children from National schools not necessarily excluded, but they must have read Holy Scriptures; some come from National schools containing Catholics, 25848–25859.

Society have a middle class day school in Dublin, where they give an excellent education for £4 a year; occasionally have Catholics. Sums paid in boarding-schools and at Santry by paying boys; number is not limited; class of boarders; artisan's children at a reduced rate; is not aware of any Roman Catholics, 25860–25871. Charter was for teaching Popish and other poor natives English, husbandry, and trades; under it and bequests either Roman Catholics or Protestants can be taken if willing to be brought up to Established Church; condition—that they are *poor* children—is observed. Attempts to teach husbandry and trades failed, 25872–25884.—Schools sometimes happen to provide for minorities otherwise unprovided for. Advantages of the boarding schools; is aware that previous Commission condemned old charter schools, which were suppressed, and agrees with it, but cannot at all assent as to present boarding schools, 25885–25890.—Charter-schools were subject to great abuses, and children were much neglected; total change and good results under present system, 25891–25895.—One object of Society was to promote loyalty; opposition to National system does not imply disloyalty. Does not see how exclusion of Roman Catholics from schools unless they abandon their faith would affect their loyalty, 25896–25901.

Schools on Society's estates; Roman Catholics must attend them or go without education; do not subscribe to any National schools. Inspection is more strict, regular, and frequent than formerly. Committees for managing are named at annual meeting. Reports, &c., are not published. Local management is by local committee and catechist, who is generally clergyman of parish, and is paid £20 a year, but he has other than religious matters to attend to; cannot say whether National school managers perform same duties. Catechists visit and report regularly, 25902–25923.

Appointment of teachers: sometimes undergo examination; paid by salary, average nearly £100 a year, 25924–25927.—Would not like funds and schools to be brought under National Board. Of three propositions for a change of system, would prefer one leaving boarding schools as they are now, exclusively for Protestants, giving preference to children from localities where Protestants are unable to maintain a separate school. Board could make this alteration without any

Rev. John Winthrop Hackett.

new powers; have acted in this direction already; middle class school at Dublin is quite in harmony with this view, 25928–25933.—Santry school was instituted to train Protestant schoolmasters, but for want of funds can only take a few; doubtful if a Government grant would do good; great success of pupils, especially with Science and Art Department, who, in consequence, make a large grant; prospect of this might be a temptation to master to neglect other work, but he does not yield to it, 25934–25943.—Failure of the Farra agricultural school was mainly owing to superiority of Government schools; any profits would have belonged to society, but expenditure exceeded returns: land is now let to master, and profits are greater and land better cultivated. It is an advantage to him, as he is able to produce vegetables and milk for schools; Society see that he does not neglect his other duties, 25944–25963.

Number of girls in boarding schools; situations filled by them after leaving, 25964–25969.—When Government grant ceased, Society felt bound to administer trusts as they found them; any Roman Catholics who come must be educated as Protestants. Abuse under system now abolished in order to provide children (bringing them up from their infancy) as they did not come forward sufficiently. But few come now, therefore Protestants are educated; does not think this a breach, or that Society has failed in carrying out trusts, 25970–25981, 25986, 25987.—Area for candidates is restricted by Society in consequence of funds being limited; would be glad to enlarge it when opportunity offered, 25982–25985.—Foundation boys are admitted from twelve to sixteen, girls from ten to fourteen; superiority of this over having them from infancy, in advantage of home influence: schools are on same principle as English boarding schools, 25986–25991.—As trusts were left in interests of Protestantism, if Roman Catholics will not accept Protestant education, it is more in accordance with them to train up Protestant children as Protestants than to train up Roman Catholics as Roman Catholics. This view is confirmed by a Chancery decision quoted, 25992–25997. Religious instruction is only part of catechist's duty; he is chaplain and represents Society. Teaching staff in Santry school; a few pupils are taught classics, 25998–26005.—Boys who have to get their living at husbandry should leave school at about twelve; boarding school age commencing at tweve does not put them out of the reach of poor children. Reasons for superior education in these schools, 26006–26011.

Hamilton, Rev. Hugh.

Rev. H. Hamilton.

Is Inspector of Church Education Society's schools in the united dioceses of Dublin, Kildare, and Glandelagh, 8045.

Number of ordinary schools under inspection in the three dioceses—Dublin, 76; Kildare, 27; Glandelagh, 21. Number of scholars on the roll varied from 100 to 10, 8046–8049.—Twenty children would be sufficient to keep a school alive, 8050–8053, 8167–8170.—Number of schools has diminished within the last few years, 8054, 8055, 8141–8144, 8171–8184, 8187–8190.—Loss of pupils in Church Education schools caused rather by emigration than by establishment of National schools, 8056, 8057.—Duties of witness in connexion with Kildare place, 8059, 8060.—The number of candidate teachers is limited by want of means and accommodation; present number in training, 8061–8065.—No difficulty in getting places for properly trained mistresses, 8066–8068.—Salaries of masters are rather low; they often complain, 8069, 8248–8252.—State of preparation, places of education, and social condition of candidate teachers, 8070–8075.—Teachers fairly acquire the subjects taught, 8076–8079.—There were two free scholarships, but the fund is exhausted, 8080–8082.

All the children, Protestant and Catholic, are examined in Scripture, but not in the formularies of the Established Church, 8083–8088.—Causes which attract Roman Catholics to the society's schools, 8090–8093.—A portion of each day is devoted to religious instruction; secular teaching is quite sufficient to occupy the teacher's time, 8094–8097.—Residences and gardens are attached to the schools in most cases, 8098–8103.—Masters generally remain in the service, 8104–8107.—Secular instruction should be illustrated by reference to Scripture, 8108, 8010, 8111.—Classics are not taught in Church education schools, 8109.—There are many boys in the schools over fifteen years of age, which is an advantage to the younger classes, 8112–8116.—Scale of proficiency and mode of working it, 8117, 8118, 8149.—A few teachers take holy orders, 8119–8122.—Needlework, 8123, 8124.

Clergymen and subscribers take part in the instruction, 8125–8127.—Teachers generally act as parish clerks; the amount of emolument is kept distinct from the salary in the Inspector's reports, 8128–8137.—Schools are not well supplied with requisites from want of funds; the central Board should supply them; there is a fair supply of books, 8138, 8145–8148, 8272.—Not many Catholics attend the schools in the diocese of Dublin, 8139.—In some cases children pay school fees, in some not; when they do pay the children attend more regularly, 8140, 8253–8254. The school at Prospect, in Glandelagh, has not been inspected, as the clergyman would not allow it, in consequence of the Inspector having found fault with it, 8150–8157.—Averages are deceptive; taking averages is not the way of judging of a school, 8158–8163.—Cannot account for low average attendance in Kildare and Dublin, 8164–8166.—Parochial clergymen are generally the patrons of society's schools, 8185, 8186, 8191.—The Downing's school, parish of Caragh, 8192–8202.

National schools deal with a lower class of children than attend society's schools, 8203–8208.—The influence of inspection is moral only; no gratuities flow from it, 8209–8214.—Teachers are certificated by Church Education Board, and are responsible to the clergymen, who may dismiss them; in the case of Erasmus Smith's schools they could not be dismissed without consulting the Secretary and the Governors, 8215–8217.—Books used are those published by Christian Knowledge Society, some of the National Board's books, and the reading and spelling books of the Kildare-place Society; Church Education Society never publish books, 8218–8223.—If the National Board were to allow the Scriptures to be read without limitation, society could participate in the grants, 8224–8232.—In Clonkeen school there are seven Church children and thirteen Roman Catholics on the roll; this is very uncommon, 8233–8247.—Teachers' salaries, by whom paid, 8255.—Many female teachers are lost through marriage, 8256–8258.—Some of the statements in the report of the Endowed Schools Commission are very unfair, 8259–8261.—The teachers are often parish clerks; as such they have nothing to do on week days except attend a funeral or a wedding, 8262–8265.—In the fourth class in society's schools the teaching is as good as in National schools; the fourth class is a fair specimen of what a school should be, 8266–8268.—Witness endeavours to prevent the promotion of children who are not qualified, 8269.—The books used answer the purpose very well; the schools have the Bible, the finest classical book in the world, 8270.—Notice of inspection is better than going unawares, as the school is more likely to be full, 8271.—The report of the Endowed Schools Commission is worth nothing; it is the report of five Commissioners with different standards, 8274–8277.

About nine out of ten teachers have been trained in the Church Education training schools, 8278, 8279.—Writing from dictation is not a good test; it is mere child's work, 8280–8285.

HUNTER, WILLIAM ADAMS, Esq.

William Adams Hunter, esq.

Became Chief of Inspection under the National Board in February, 1867; had been previously Head Inspector and District Inspector; served in several districts as District Inspector and Head Inspector, and in one or other capacity has been through nearly the whole of Ireland, 3133–3135.

Dungannon, at the time of witness's connexion with it, was a medium district, neither rich nor poor; has a considerable area, with from 120 to 130 schools, under charge of the Inspector; the patrons of the schools were much mixed, but the majority were Roman Catholics, so also were the schoolmasters, 3136–3139.

Ballymena district had a considerable amount of manufacturing industry; there were many small farmers, who also carried on weaving; the majority of patrons in this district were Protestants; the children were about equal, 3140–3143.—The weaving caused children to be occasionally withdrawn from school to assist in some of the operations; if the families depended exclusively on weaving, they were not better off than ordinary peasantry; at that period females were just beginning to weave; the idea of sending children to school early, so as to get their education quickly and then go to work, did much enter into the parents' calculation, 3144–3146.

In Monaghan the population is more agricultural; in the northern part, towards Armagh, the farms are large and the farmers comfortable; the majority of the population—perhaps two-thirds or three-fourths, are Roman Catholic, 3147, 3148.

Trim was principally a grazing district, and thin in population, and the poorer classes certainly inferior and more ignorant than in other districts, 3149, 3163, 3164.

In Castlewellan district the people were more comfortable; manufactures and mills gave extensive employment; Cookstown district was very much like Castlewellan, its religious character very much mixed, 3150–3152.

Ballymena district had the greatest amount, but not a preponderance, of Presbyterians; a considerable number of schools in this district were under Presbyterian patrons, 3153, 3154.

There was little difference as regards the average number of children in attendance at school compared with the total number on the rolls; the average attendance was higher in town than in country schools in all these districts; children generally remain longer in country schools than in town schools, whether in southern or northern districts, 3155, 3156, 3161, 3162.—And because of their irregular attendance are longer on the rolls before they reach a higher class, 3157.

Country schoolmasters are not inferior in ability to town schoolmasters; a first class teacher always prefers a school with the highest emolument, and many country schools having a private endowment or a liberal landlord attract first class masters, living also being cheaper in the country; in one sense town schools are better, having more pupils, and therefore a greater amount of fees, 3158–3160.

Witness has very little direct correspondence with either the Head or District Inspectors; most of his correspondence is conducted through the Secretaries, 3165–3169.—One class of business (the payment of salaries with reference to the average attendance at school) is dealt with without bringing it to the Secretary, 3170.

A fine on a schoolmaster would never be imposed without consulting the Secretary or Resident Commissioner, 3171.—Not more than four or five fines a week have been imposed in the last half-year; a fine ranges between £2 and 5*s.*; late attendance is one cause of a fine, 3171–3176.

Not many cases occur of irregularities in teachers' accounts, none of misappropriating money; in the model schools there have been cases of misappropriation of fees, 3176, 3177.

Schools having other sources of income than grants from the Board give a return of the money locally contributed; they have to attend to repairs, 3178.

The manager states on the pay-sheet as to the regularity of the teacher's attendance, and whether the school has been closed for a time, and for what cause; these returns may be generally relied on, the report of the District Inspector furnishing a check; the manager's information is mostly obtained from the class-roll, 3180–3182.

In case an Inspector discovers an irregularity of attendance on the part of the teacher, he is required to communicate with the manager; if he does not, he is directed to do so by a Secretary's letter, written by direction of a Chief of Inspection, 3183, 3184.

There have been a few instances of opposition on the part of local managers to the action of the Board, 3185–3187.

No abuse arises from the allowance of 25 per cent. on the sale of books by teachers; it is an advantageous arrangement, a fair remuneration for their trouble, and permits of an adequate supply of books for sale to the children, 3188, 3189.—The arrangement has caused an increase of labour to the Office, in having to send out a larger quntity of books; there are no accounts kept, payment is made beforehand; it is not known that the profit has caused a master to force an undue sale, 3190–3192.

Teachers who have been in the service eight or ten years are likely to remain; younger teachers leave as they find more lucrative or more pleasant employment; many of the latter class are superior men, 3193–3195, 3236, 3237.—The proportion of those who continue in the service is a fair one, considering the remuneration offered; it will increase, the training given to these young men qualifying them for higher positions, 3196, 3197.

A few years ago the salaries of schoolmasters, particularly of the lowest class, were much increased, but the increase did not do much more than keep pace with the higher expense of living; there should be further increase to keep pace with the improvement of the country generally, 3198–3200.

At the present time it is not known that any schoolmaster is absolutely out of a situation; often those who apply would not take the situations offered them; no master of the first rank in the third class would have a difficulty in finding a situation, 3201, 3202.—A master seeking employment usually addresses himself to the Inspector, and occasionally to the office in Dublin; at present, good teachers even, through the objection of Roman Catholic managers to those who have been trained at the model schools since 1864, find a difficulty in getting places, 3203–3205.

At present the supply of teachers, qualified and paid for as they are, is equal to the demand; to increase the supply the pay should be raised; but if the emoluments and the scale of qualifications were raised to what they ought to be, the demand would exceed the supply, 3207, 3210.

A school is sometimes closed from the inability of the manager to get a master; but such a case probably arises from inattention, 3208, 3209.

Latterly in the north of Ireland some difficulty has been experienced in getting monitors; the deficiency is not serious, and occurs chiefly in boys' schools, 3211–3214.—The difficulty in the supply of monitors is chiefly in town schools and in the immediate neighbourhood of manufactures, both in model and ordinary schools, 3246–3248.

Schoolmistresses continue to act as teachers after they are married; the unmarried are the most efficient; female teachers are best for infant schools; no model school but that in Marlborough-street is taught by a master, and there all the assistants are females, 3215–3218.

The qualifications of the National school teachers have lately very much improved, partly from the

William Adams Hunter, esq.

teachers having passed themselves through the schools, partly from the stimulus of the system upon teachers generally, 3219–3221.

Very few complaints have been made of late years of excessive corporal punishment, it is not much resorted to in the schools; not more than three cases of punishment of teachers for inflicting improper corporal punishment on pupils have occurred in one half of Ireland, 3222–3225.

Some of the Inspectors have been previously teachers of National schools; there is no essential difference in their mode of doing business from other Inspectors; some of them may place too much reliance on mere technical details instead of looking at the general improvement; some do not exercise the same authority over teachers as Inspectors coming from outside; and those who have been long teachers are not so likely to make good Inspectors as younger men; teachers should have opportunities of becoming Inspectors, but the latter should certainly not be exclusively chosen from teachers; the limitation as to age at appointment might be altered with advantage: the maximum of non-teachers to thirty, of teachers to thirty-five, and the minimum to twenty or twenty-one; the present minimum of twenty-three prevents many men from competing for inspectorships, they having by that time settled themselves in other courses of life, 3226–3233.

In some districts the schools are unduly numerous; in some places two schools exist where there might have been only one; but this may not be disadvantageous; schools with an average attendance of thirty-five are likely to be more efficient than those with a very high attendance, 3234, 3235.

It is certainly desirable that all principal teachers of National schools should have been trained, 3240–3242.

Roman Catholic managers have objected to trained teachers since 1864, it is presumed because about that time Roman Catholic bishops denounced the training schools, 3243–3245.

Managers have an absolute right to dismiss teachers; the Board does not interfere; there are many cases of dismissal, the reasons for some are known, in others none are assigned; some attempts at appeal to the Board have been but have not been entertained. The effect of this arbitrary power is to make the teacher the mere servant of the manager, 3249–3255. No cases of undue pressure on the teacher to make him give up a portion of his salary have ever been formally investigated; a more expeditious and satisfactory system of paying the teachers directly through the Board might be struck out, but under the present system the manager's power over the teacher can hardly be interfered with; it is as it were the condition of his allegiance to the Board, and so long as local managers are recognised the power must be recognised; in the majority of cases, it is true the "management"—taking the word in its proper meaning—is merely nominal, and the manager does not give the services fairly required of him, 3256–3266.

Some portions of Monaghan are well superintended by managers, but on the whole the district does not outshine its neighbours, 3267–3269.

In checking the returns of teachers as to the numbers in attendance, the rule is that the teacher shall make his entry before twelve o'clock; in case of suspicion of attempting to falsify accounts the Inspector would visit the school after twelve o'clock; if the entry was made at the proper time, and the number in school corresponded, it would suppose the suspicion was unfounded; one cause of suspicion would be, if on the day of inspection the number was less than the number entered the day previous; another, if on three visits the average number was less than that returned by the teacher within the six or twelve months within which those visits were made; the latter is a test seldom found to fail, 3270, 3271.

It was never heard of a National schoolmaster borrowing children from another school to swell his numbers on the day of inspection; it could only be done where an Inspector visits a school but once a year, and then after previous notice, 3272–3273.—The Board would certainly take action in such or any other fraud, 3490–3494.

There is no means of checking the unpunctual attendance of the schoolmaster but by the Inspector's visits and the manager's complaints, 3275–3277.

Managers generally defend a schoolmaster when he is found fault with, unless he is clearly in the wrong, 3278.

In taking the average attendance Saturdays are excluded, and any day when the attendance is exceptionally small; more than two days a month under this head is considered unsatisfactory; in Roman Catholic districts the holidays of the Romish Church, of which there are thirteen or fourteen, are excluded; sometimes in the neighbourhood of a fair town the fair day is allowed to be left out, and very wet days may be excluded, but of these an explanation is required, 3279–3288.

It is said that the Presbyterian body considers itself, by a special contract, not to be strictly under the printed rules of the Board; witness is not aware of any exemption of the Presbyterians from the Commissioners' rules; there is no practical difference in their working; they may or may not open with prayer, so also the Roman Catholics; he cannot contradict Dr. Cooke's statement in 1854 that they uniformly opened their schools with prayer; it is a thing never considered necessary for inquiry, 3289–3297.

Many Roman Catholic children are at school under Presbyterian management, but very few have partaken of the religious instruction; the superior character of the master or mistress draws children to a school irrespective of the denomination, 3298–3303.—(*On this subject see further infra*, 3337 *to* 3347.)

Presbyterian managers and teachers feel themselves bound by the rule that prevents any allusion whatever to the Scriptures in the course of general instruction, but they consider themselves at liberty to refer to the Ten Commandments and to the General Lesson, in both of which reference is made to Scripture, 3304–3309.

Nearly all managers and teachers hang up in their schools the General Lesson, or one of similar import; the difference explained, 3310–3313.

With reference to the phrase "very few" just used as to Roman Catholic children receiving religious teaching in Presbyterian schools, the "O'Reilly returns" state a considerable number to be in that position, but 1,000 in 900,000, that is 1 in 900, is a very small per-centage, and the rule would not be broken if the parents of the children consented that they should read the Scriptures; the proportion would be smaller if compared with Ulster only, and still smaller if compared with a particular school; if the greater number of cases where the Authorized Version is read happened to be in two or three counties the disproportion would not be so great, 3315-3227.—Witness believes the rule to be strictly enforced, 3329.

It has been said that some managers have expressed their determination never to carry out the new rule; if so, the salary of the teacher would be at once stopped; but if the occasion for enforcing it never arises, of course there is no interference, 3331–3332.—Some complaints have been made; in such cases the action of the Board has been to write to the manager, and probably wait for an Inspector's visit and report; if the matter had been remedied the thing would be allowed to drop; the rule is honestly carried out at present, 3333–3336.

With respect to Roman Catholic children going to a Presbyterian school while there was an average well-conducted Catholic school in the neighbourhood, and *vice versâ*, witness cannot conceive it possible; there are no Roman Catholic schools within a reasonable distance in an immense number of instances of mixed attendance; Catholics have been found in Presbyterian schools, both in town and country, and it is presumed they had some reason for the preference; frequently there were mills in the district; the attendance of mill children in a mill school may be looked upon as compulsory, but no other com-

pulsion is supposed, 3337-3344.—An answer as to this matter cannot be given from absolute knowledge; it is impossible to learn from every Protestant pupil why he is in a Roman Catholic school, or from the Roman Catholic by what means he came into a Protestant school; witness believes that these children did so attend because they preferred a better teaching in one school or the other, but admits that an opinion of this kind must be speculative, 3345-3346.—A few instances have been heard of where landlords have been anxious to bring children into their schools, but that has not been general, especially as regards National schools, 3347.

There is little difference as regards supervision between schools under single patrons and those under committees, the latter generally leave the management of one person appointed to see to it; with properly constituted and established committees a gain might arise to the schools, 3348-3350.

In many cases managers do not take an active part in superintending a school, but very few where they do not visit occasionally; there is less supervision generally in the rural than in town and manufacturing districts; a manufacturer naturally looks after his own school; clerical managers in manufacturing districts are also more attentive, 3351-3355.

Some of the Dublin schools are better looked after than schools in the country, but the ordinary Dublin schools are the worst specimens of National schools, speaking from the last two years' experience, 3356-3363.

The supply of books in the schools is upon the whole satisfactory; the teacher is allowed a per-centage on the sale; but he must pay beforehand—sending the money with the order, and send to the depôt for the parcel, so that his profit is but small; no special favour is done to the teachers but by being made agents, 3364-3369.

One cause leading many teachers to leave the service is the excellent training they get, in making them excellent penmen and arithmeticians, and generally expert and intelligent; this training is from the whole system, not alone from the central school, though that is generally the culminating point; the mere training for six months in Marlborough-street would not give such a result, 3370-3372.

There is no system of registration for teachers wanting situations, or of vacant places, 3373, 3374.

In the central establishment, in the salary and registry office for about three weeks every three months there is great pressure of work and unpaid overtime, caused by anxiety to have the teachers paid within a reasonable time, and an amalgamation of some of the other departments would be of considerable importance; in the correspondence office and the inspection office, at present two men may be writing a letter on the same day, to the same person, on the same school, and each not know what the other is doing; there is also a loss of time frequently caused by irregularities in the pay-sheets, in not knowing where a certain letter is to be found; if all the correspondence were conducted in one office there would be less trouble and chance of delay, 3375-3383.—The accountant's office could not be amalgamated, 3378, 3379.

After the expense of providing books according to the system of Mr. M'Creedy, that system was not carried into operation, because on consideration it was found that the books so ordered would not be sufficient to carry out the arrangements in a satisfactory way; the book will answer all purposes but that of paying salaries, and will be introduced; it would be impossible to do away with the salary book, 3384-3388.—The new books can be utilized for the county books, which are now nearly used up, 3389.—The expenditure in supplying these books before ascertaining whether the system would work is surprising, but it would have been necessary at all events for information which these books will supply; they were ordered before witness entered the office, 3390-3392.—The attempt to get rid of the long books led to confusion, but they are now in use, 3393-3396.

About 600 reports and 150 letters on the average come before the Chiefs of Inspection weekly, 3397-3399.—All the satisfactory reports are marked and put up; cases of leave of absence to Inspectors go to the Secretaries; often the clerk, who examines the report, will note the point for consideration, which will be then dealt with according to circumstances, 3400, 3401.—The Secretary has the power of refusing to sign, and so preventing the action which has been suggested from taking place, 3402.—There is not much loss of time in consequence of referring to the Secretaries' business which clearly belongs to the inspection, 3403-3405. William Adams Hunter, esq.

The revision of the books was commenced under Mr. M'Creedy's superintendence, who appeared to have some jealousy of interference; witness was never consulted, and has had no experience; the books previously were capable of improvement, but were not in a very deplorable state, 3406-3413.—They were found not up to the level of progress in literature and information generally, hence the necessity for revision, 3418.

One reason why the system of National education became so popular was the excellent books it introduced, which were then necessary; the educational books in all Europe were inferior generally; books of the advanced character we have now are quite the things of the present time, 3414-3416.

The idea is desirable and pleasant to contemplate that all the children in the country are repeating the same lesson on the same day, and having an intellectual training in the same mould, provided the mould is a good one; if the same rule was applied to art, art would not progress, the cases are not analogous, but even in art a selection of good models, spread over the country, would be a good thing, 3419-3422.

If the Board had the selection of all books published, and not confine themselves to those produced by itself, the difficulty would be to get books suitable in every respect to be read all over Ireland by children of every denomination; the wish has been to avoid producing books suitable only to persons professing a particular creed, political or religious, 3423, 3424.

The Inspectors are not unduly looked after by the Head Inspectors and Secretaries; they have to give an account of every hour of their time, but they are public servants, and are bound to give their time to the public, and the Commissioners have a right to see that they do so; the forms they have to fill up are perhaps too numerous, there might be a reform in that respect, 3427-3430.

Complaints have been made of the returns from Inspectors called for by Royal Commissions, and of the time occupied in making out those returns; the work of the Inspectors and the office generally would be facilitated if no parliamentary returns were required, but, of course, Parliament cannot be dictated to as what returns are wished for; the work of inspection is not so much interfered with as that of the clerks in the office on whom the duty devolves; no returns are made to provide for contingencies, 3431-3436.

With respect to payment by results, a very large portion of what is now paid is more or less a payment by results; every step of promotion of a teacher, the supplemental or good service salary, special payments as for teaching of monitors, payments for vocal music, for drawing, for navigation, are all payments by results, and the system might be further extended with advantage, 3437-3440.—The classification of the teacher should be a separate matter; there should be a separate payment for a teacher according to class, but there should be a scheme by which all the various results should be consolidated, so that the present payments for results might be combined in some more efficient way; the capitation grant is doubtful, it should be combined with a certain average attendance in each school; with a capitation grant, as understood, there is no security that the children would be well taught; this disadvantage would be removed by the payment for results, and the teacher receive his classification in addition, 3441-3448.

William Adams Hunter, esq.

The eventual responsibility is with the Commissioners as a body, under them the Secretaries, and the Chiefs of Inspection are subordinate to the Secretaries, 3449–3451.

In Ireland, where there is in many parts the want of a middle class, the theory of the system is that the local manager is a valuable connecting link between the higher classes and the humble parents of the school children; that it is desirable that the gentry should take an interest in the educational institutions of the country; whenever that interest is taken, the schools show the advantage of it, 3452–3456.—Every school, except a model school, must be under a manager; there might, by possibility, be cases where the Commissioners could step in and establish schools, as in a district where a school is much wanted, and there is no person willing to come forward and undertake the duty of a manager, 3457–3460.

The state of schools in Trim district is unsatisfactory; Trim district includes nearly the whole of county Meath, which is a pastoral county, and in pastoral districts the poorer classes are very poor; there is more absolute destitution in some parts of Meath than in any other district of Ireland witness is acquainted with, 3461–3465.

Since 1864, when the Roman Catholic prelates expressed their disapprobation of the system, the Roman Catholic teachers in training have been reduced, 3466, 3467.

Teachers in the normal institution are divided into three classes; in the third or extern class, composed of a limited number of young persons, who wish to qualify themselves as teachers, there are very few, and the permission for teachers of schools not connected with the Board to attend as auditors or visitors is very seldom taken advantage of, 3468, 3469.

It would be much better, though difficult to make it a general rule, that teachers should be examined before appointment, instead of, as now, being appointed before examination, and so liable to rejection, 3470–3474.—There is some advantage in testing his capacity as a teacher, but his literary qualifications should be certified before he is put in charge, 3495–3501.

Complaints against teachers may be addressed to the managers or immediately to the Board, who always entertain a direct application, 3475, 3476.

A pupil must be present four hours in school to entitle him to credit for attendance; if he leave during school hours his name is entered on the absentee slate, to show that he has been there, 3477–3480.—It would not be desirable to call the roll twice a day, 3481.

A school with an average attendance of from 30 to 50 is more efficient generally than larger schools; one competent teacher with sole responsibility will make the school more beneficial than another equally competent in a large school with several assistants, 3482–3487, 3603.—The development of education on the part of the institution would be beneficial and is necessary to the cause of primary education, 3489.—But the introduction of French and Latin must not be allowed to interfere with the ordinary business of the school so as to impair its efficiency as a National school; and in localities where such knowledge could not be otherwise obtained, teaching them might be encouraged, 3502–3505.

It would be advantageous to have art and science schools established in connexion with the National Board; teachers in many places take advantage of the system voluntarily under the Science and Art Department; the result has been satisfactory if it is to be estimated by the amount of money drawn by the teachers from that department; some of our teachers in our model schools were doing nearly as much in teaching physical science; and our training has enabled many of our teachers to obtain first-class certificates from the Science and Art Department in London; the same remarks applied to teaching the classics apply also to teaching physical sciences, 3506–3515.

The system of payments for teaching physical science would be done much better through the instrumentality of the National Board than in any other way; such a system can be grafted on the present organization, but it must be done so as not to interfere with the regular business of schools; at present the temptation to neglect this business is great, the payments by the Science and Art. Department being high; the temptation would be less if the system were connected directly with the National Board, and the cost to the State would be less, but it would take a longer time, 3516–3522.—If done judiciously it would not interfere with primary education; it did not where it was introduced under the direction of the Board as a part of the regular business of model schools, so that in every place where the Science and Art Department have obtained footing they have found a class ready made for every pupil who passes in the first grade; perhaps in two instances where science classes were introduced the reports for general efficiency not being satisfactory might be traced to that cause, 3423, 3524.—Therefore, the Board should have some control over it, 3525.—Objections to drawing could only extend to a small number of schools, but any school with an average of 100 pupils could get up a drawing class; payment by results could be made to include such subjects, and all payments for them should be made through the Commissioners of National Education, 3526–3528.

Further Examination.

Referring to questions previously asked as to the areas of districts and the number of schools therein, witness now supplies that information (*see note on page* 158).—Also, that very few Roman Catholics received religious instruction from Protestant teachers, which appeared inconsistent with Major O'Reilly's return, giving thousands of such cases; his answer was correct having reference to the last six years, O'Reilly's return being for 1862; this return, embracing only the province of Ulster, shows 1,180 instances of Roman Catholic pupils reading the Authorized Version of the Scriptures under Protestant teachers; the same return shows also that it was usual for both Protestants and Roman Catholics to go to schools conducted by teachers of a different faith, provided they thought they received a better education. (*For details see answer to* Q. 3529, pp. 158, 159.)—And with reference to an alleged error in the Epitome of Geography, on reference to his own edition of the book, dated 1853, witness finds there is no such error, 3529.

At the beginning of the National system the parents of Roman Catholic children did not look upon reading the Authorized Version of the Bible as religious instruction; they permitted their children to remain during the reading of it, when they had liberty to remove them, and the return does not show a single instance where the reading of the Scriptures was not fixed either as the first part or the last part of the business of the day, so that Roman Catholics could not be entrapped, as it were, into reading them, 3530–3534.

There have been cases in the north of Ireland where the teachers were Roman Catholic, chosen by the Protestant or Presbyterian management, the majority of the children being Protestant or Presbyterian also, 3535.

There are sixty Inspectors, whose inspection is generally efficient; their opportunities for becoming acquainted with both teachers and children favourable, each having only a limited district; the rules require them to visit each school three times a year, and to make incidental visits besides; witness's estimate that each school is visited four times a year is an underestimate, 3536–3539.—The Inspectors have to take notes and furnish statistics, and make a report on each school, the preparation for which is heavy; many of the letters they write are very important, and require a great deal of time, 3540, 3541.

Head Inspectors make confidential reports to Chiefs of Inspection, concerning the District Inspectors; the

course was considered desirable when it was introduced, but very little use is made of these reports, and it is important they should be furnished; in case of unfavourable mention, the Chiefs of Inspection would send a copy to the District Inspector, and ask for an explanation, 3542-3544.

The location of Inspectors is entirely in the hands of the Board, and re-arrangement of the districts are made from time to time; there was a slight modification last year, 3545, 3546.

As to promotion of Inspectors, so long as it is considered necessary to have an equal number of Roman Catholic and Protestant Inspectors it would be difficult to alter the existing arrangement, which is preferable to having a general minimum and maximum salary, rising to the latter being open to all irrespective of denomination; efficiency is the chief guide, and the religious element is no difficulty, in the matter of promotion; but the numbers in each class being limited, it may happen that a junior of one or other denomination may get promotion in advance, 3547-3553.

In nominating candidates for inspectorships religious profession is still regarded by the Board; there is sometimes a doubt as to whether the turn was for an Established Church or Presbyterian candidate; the present vacancy is clearly for an Established Church candidate, 3661-3662.

There is a Protestant Head Inspector now for the city of Dublin, it being part of his district, 3554, 3555.

Inspectors have the power of appeal from the judgment of the Head Inspector or Chief of Inspection, but it is seldom exercised, 3556.

The duties of Chiefs of Inspection are very numerous, they have to deal with all the reports that come from the District and Head Inspectors, all the letters from the same officers, and all letters from managers of schools; the duties of the two chiefs are fairly divided; there are no arrears of business now in the department, the work is kept up from week to week, 3557-3562.

Teachers are classified into probationers or unclassed teachers, two divisions of third class, two divisions of second class, and three divisions of first class; these grades with the present system of payment are necessary; a scheme might be introduced that would embrace literary qualification as well as classification of teachers, and consolidate the manner of payment by results such as is now in operation, 3563-3568.—The professors classify the teachers who come up for training; it would be better if they simply gave a certificate of competency, leaving the Inspectors to classify, on taking that and the state of the school into consideration, 3569-3571.—An untrained person appointed as a teacher is not necessarily obliged to remain two years in the third class; he may be placed in either division of his class, provided he obtains that class at his first examination, 3572, 3573.—The Head and District Inspectors together arrange the classification, 3694, 3695.

The rescinding of the rule that "no teacher shall be raised to any division of first class, unless he has been trained at the normal school of the Commissioners," will be that it will prevent some teachers attending the training establishment who would otherwise wish to do so, 3574.

The principle embodied in Lord Stanley's letter, "the training of teachers as soon as the Board can be in a position to give it," is no longer applicable; there are now means of training to a certain extent in every first class National school in the country, capped by the Central Training Establishment in Marlborough-street, 3575, 3576.

The rule that if a teacher cannot attend the training a satisfactory cause must be assigned, on pain of exclusion, still exists; it has never been acted upon, the presumption being that sufficient reason was always assigned; the summons for training is addressed to the manager; some teachers present themselves for training at the risk of losing their schools, 3577-3581.

The male teachers are all examined in Easter week all over Ireland, on the same set of printed questions, by the local Inspectors; the oral examination, which is necessary to complete the teacher's examination, is held later by the Head and District Inspectors conjointly, the teachers being summoned upon the result of the written answers; if a man makes no written answer he would not be eligible for the oral examination, and would probably be recommended for dismissal; the examination of female teachers is conducted differently, they are not assembled in the same week, but at such time as suits the convenience of the Head Inspector who visits their district; they have different sets of questions, and their oral examination is held on the day following their written papers, 3582-3588.

A first class teacher is depressed in salary unless he has an average attendance of 35; but if he has once enjoyed first class salary it is not reduced unless the average attendance falls to 30; this average is at first a quarterly one, but the mean of the three best quarters before the one under consideration, may be taken as the average, 3589, 3590.

The present mode of payment of teachers' salaries is attended with difficulty and delay; an improved mode might be devised by which teachers would be paid through the Inspectors; it would be a matter of easy accomplishment, involving no practical difficulty, and but very little extra trouble to the Inspectors, and the payments could be finished in three or four days, with less trouble than now to the teachers, 3591-3594.—Teachers' salaries were at one time paid to the managers, 3595.

With respect to allowances to aged teachers, the practice is to pay a sum to every teacher when permitted to retire from the service on certificate that he is unfit longer to discharge his duty; merit is not invariably a necessity; he must have been ten years in the service; a system of pensions would be much better and more economical, and in this opinion all the Inspectors who have thought about the matter concur, 3596-3601.

It does not depend upon a school being vested or non-vested that the mixed attendance depends; the people generally know nothing of the difference, 3604-3607.—In the attendance at mixed schools, the religious question does not enter into computation so much as the qualifications of the teacher; there is, however, a greater tendency in Roman Catholics to go under Protestant teachers than *vice versâ*, 3608.

The distinction of vested and non-vested schools came into operation very early in the history of the Board, previous to which the different denominations had schools of their own; Lord Stanley (in a passage of his letter read by witness) evidently contemplated that the Board should build or possess all the school-houses that would be required, allowing all parties equal rights and privileges on placing themselves under its management and submitting to its regulations; acting on this letter the Commissioners had in view the building a large number (5,000) of houses for primary schools, 3609-3617.—The Commissioners soon found there was a large number of schools on private property that might be brought into connexion with them, 3618.

The resolutions of the Synod of Ulster, contained in the report of 1833,—"That . . . . this Church, without the necessary concurrence of . . . . any other Church, shall enjoy the right of applying to the Board of Education for aid to schools," &c.; "that it shall be the right of all parents to require . . . . to set apart for reading of the Holy Scriptures a convenient and sufficient portion of the stated school hours," &c.; and "that all children whose parents and guardians shall so direct shall daily read the Holy Scriptures during the period appointed, but that no compulsion whatever be employed to induce others to read or remain during the reading"—recognise a distinction as to the two classes of schools, and do not contain anything inconsistent with the system of education committed to the Commissioners' charge; there is no important difference between the rules now referred to and those after 1840, 3619-3625.

The rule is, that probationers, if found unfit for the third class at the expiration of the first year, must re-

William Adams Hunter. esq.

move from the service; instances have been of such being kept on for two years or longer, though District and Head Inspectors had represented their unfitness; out of 6,095 principal teachers on 31st December 1867, 562 were probationers; they seldom fail more than once, the rule being generally applied, 3626–3630.—Senior monitors are allowed to schools having an average attendance of thirty-five; for special reasons, paid monitors would be allowed with a less average attendance, 3631, 3632.—It is supposed the average of thirty-five could be managed by one principal teacher; an average of fifty requires an efficient monitor in addition; a teacher in the first division of the third class may manage fifty efficiently, but if lower he could not be considered qualified for principal teacher in such a school, 3634–3638.—Schools with a moderate attendance are more efficiently conducted than very large schools, 3603–3668, 3670.

The amount paid for monitorial teaching in convent schools has considerably increased during the last five or six years, as compared with the average attendance; a large proportion of female monitors is to be found in those schools; the principal object of the Commissioners is to train young persons to become teachers, not to supplement the teaching staff; it depends on the character of the school, either model or conventual, whether the pupil turns out an excellent teacher or otherwise; on the whole a model school is better calculated to produce good teachers, 3641–3648.

In convent schools the ladies superintending have a certain influence in bringing children out; a considerable number of children attending are under four years of age; very few above eighteen; the monitors in these schools are not as a rule superior to those in ordinary schools, it depends on the character of the school itself; they are allowed but not encouraged to remain a fifth year, four years being the term; gratuities were formerly granted for this fifth year, but recently they have been discontinued, 3649–3660.

Presbyterian children often attend schools under managers of a different profession; in such cases a manager not a Presbyterian often appoints a Presbyterian teacher to impart religious instruction; in the model school Presbyterian pupil-teachers have no separate religious instruction beyond what may be given him by his own clergyman, who is at liberty to attend for that purpose; there is no rule on the subject enforced, 3663–3667.

Poor Roman Catholic families generally prefer convent schools if within a reasonable distance; the operation of the Board's rule (No. 4) is to overcrowd convent schools, 3669–3671.

In any system of education the moral conduct and character of a teacher should be regarded as a leading consideration, and some local supervision of it is essential; it would not be right to intrust the Inspector with the judgment of such except in the case of a flagrant breach of morals, which he is bound to report; the local manager is the best judge in these matters, which it would be highly detrimental to suppress; an efficient manager would also look after punctuality in school and regularity in keeping accounts, and would also promote economy, 3672–3679.

The preliminary conditions required in newly admitting a school to aid from the Board are—a convenient house, a playground if possible, with suitable out-offices; often the only way of getting a proper house is by refusing aid; the fulfilment of the conditions is ascertained from the Inspector's report, 3680–3682.—Defects are required to be remedied by writing to the manager, and if not attended to, the grant would be suspended or withdrawn, 3683.

The Inspector is always required to visit and report on a school before it is admitted in connexion with the Board; defective schools are often admitted rather than aid refused altogether; they are kept on the roll in hope of improvement, 3684–3685.

The system of partial or total payments by results would improve the average attendance and the quality of instruction, 3686, 3687.

The Head Inspector's duty is to visit the schools and see how the District Inspector performs his duty, and to assist in the examination and classification of the teachers, 3688.

Witness, as Chief of Inspection, visited in one month 101 schools, and had no occasion to find fault with the character of the schools as represented by the District Inspectors, 3689–3693.

With reference to the retention of probationers more than a year, contrary to the rule, there was always a reason, generally legitimate, assigned; sometimes the retention is through favouritism, but mostly from the difficulty in getting good teachers in the poorest districts, where probationers are generally to be found; the remedy would be in the manager trying to get the salary raised, which in the poor districts would be often impossible, 3696–3705.

With reference to O'Reilly's return of 1,100 Roman Catholic children attending religious instruction of other denominations—in one school 37 children, and in another 27, under Roman Catholic teachers, were reading the Authorized Version of the Bible with Protestant children; witness knows of no reason except that the manager had made a rule that the Authorized Version should be read, and had supplied the books; in such cases the teacher might have power to substitute the Douay Version, and the manager would permit, 3706–3711.—In the cases just mentioned it would be supposed the parents had given permission to use the Authorized Version, and therefore the rule would not be violated, 3712.

The reports from Head Inspectors as to the conduct of Inspectors under their charge are confidential merely that they do not pass the routine of the office; they would not be acted upon without communication with the party concerned, and getting explanations, 3713–3715. The Inspectors know of these reports, which are not necessarily of an injurious character, though they may affect the Inspectors' position; they are prepared according to a regular printed form, and are sent as part of the Head Inspector's regular business; the position or promotion of a District Inspector was never largely interfered with by a confidential report of this character, 3726–3738.

There is no distinction made in the religion of an Inspector employed in a certain district, or for a certain class of schools; there are Protestant Inspectors in the south and west and Roman Catholic Inspectors in the north of Ireland; this indiscriminate inspection works very satisfactorily; there have been objections on the part of some managers, but more in the nature of private communications than official; in the actual work of inspection the religious individuality of the Inspector is no obstacle to the proper performance of his duties, 3716–3721.

No inconvenience has arisen from an Inspector being placed in a district with which he is connected; as a rule it is preferred not to have them so placed; there is more independence, 3722, 3723.—As a rule, Inspectors are changed in their districts about every five years, 3724, 3725.

There are many checks in the system, but it is not altogether a system of checks; the Chiefs of Inspection overlook all below them; District Inspectors report not to the Head Inspectors but directly to the office; schoolmasters promoted to inspectorships are often more severe then Inspectors appointed from without, 3739–3744.

IRWIN, Rev. ALEXANDER. Rev. Alex. Irwin.

Is Rector of Killeavy and Precentor of Armagh Cathedral, 9722; one of the honorary secretaries of Diocesan Church Education Society of Armagh; has management, with committee, of local society and contributions, 9722-9724.—Committee apportion collections and award gratuities for merit to schoolmasters; salaries are paid by localities, not by society; masters receive little from children's pence; few pay more than 1*d.* a week, 9725-9729.—They select Inspectors, who are ten clergymen of the diocese, 9730.—Majority of masters are insufficiently paid, and not well qualified, 9731, 9732, 9807.—Clergyman or local patron supplies school requisites, 9733.—Tendency of schools to decrease; causes. Not many cases latterly of National schools set up in rivalry; country is now fairly supplied with schools, 9734-9739, 9911-9914.

About 900 Roman Catholic children attending society's schools; no religious difficulties with them, 9740, 9741.—Rule of National Board as to use of Scripture is the most essential point preventing society joining; they hold that Scripture should be directly taught, as well as intermixed with such secular lessons as admit it. Instruction thus given is simple, but valuable; it does not extend to controversial matters, 9742-9749.—Some teachers have been trained at Kildare-street; some masters at Marlborough-street; these have proved very good teachers, 9750-9754, 9808, 9809.—The teacher is the appointed substitute of the parent, and the Divine command to teach Scripture, therefore, rests on him; would not receive a child for secular instruction only; this is no refusal of education in Ireland, as there are many other schools where he could be taught as desired. Doubtless, it is better that a child should learn to read, even if he refuses to read the Bible, but witness would not be the medium of teaching him in a manner contrary to the Divine rule, 9755-9779.—At Trinity College Roman Catholics are not compelled to attend catechetical lectures, 9780-9787.—It cannot be assumed that Roman Catholic children are taught religion at home; practically they are not taught the Scriptures, 9788, 9789.

Would not undertake to be substitute for parent except in accordance with Divine will, nor to give instruction defective in most important point, 9790-9794.—Thinks it a charitable thing if a clergyman can give secular instruction, but not separated from spiritual; the secular is the instrument of the religious, 9795-9800.—If one pupil were admitted on principles of National Board it would suspend religious education of remainder during his presence, 9801-9804.—Religious instruction is given in reading lessons, not in writing, 9805, 9806.

Extent of Diocesan Society; 130 schools in connexion with it, 9810-9813.—Ten inspections last year; twelve in 1867; inspections are voluntary, but slight travelling expenses are paid; one inspection annually; more desirable; want of a uniform standard of efficiency and a more systematic inspection; one permanent inspection would be better; late Primate paid for one. Clergy would like a Government Inspector, even if of a different denomination, 9814-9823.

Advantages of society to schools; local funds last year £3,293; 130 schools. Incomes of teachers from £60 to £8 a year. Female teachers efficient and of good character; many trained in Kildare-place, 9824-9835.—Ages when children leave school. Some female teachers have children in the fifth class; in poor districts an efficient female teacher better than an indifferent master; mixed schools do very well, 9836-9844.

Two ample endowments for Church instruction in Armagh city, Drelincourt school £220 a year, and Stuart's £85, 9845-9848.—Several National schools near society's, giving parents free choice; much united education in society's schools; in one there are 22 Church children, 29 Presbyterians, and 19 Roman Catholics; Dissenters and Roman Catholics who begin often continue, 9849-9856.—Per-centage of children in the various classes; ten of the schools have no third class, 9856-9862.—Increasing difficulty in getting qualified teachers; small remuneration, 9863.—Books in use; some of National society's are used, but objectionable passages are sometimes found, 9864-9870.

The only stimulus to masters beyond the small pay is sending pupils to a competitive examination for admission to Dundalk Institution, 9871, 9872.—Method of taking average of attendances; days when schools are closed, 9873-9877.—School fee (1*d.* a week) is expected, but none are excluded who cannot pay; education is more valued when paid for. Euclid is taught in some of the schools, 9878-9886.—Opinion that Society's are equal to National schools, 9887-9890, 9908-9910.—"Roman Catholic" and "Methodist" National schools are open to children of all denominations; no religious doctrine taught in secular hours except such as found in reading books; objectionable book lately withdrawn; would not be surprised to hear that Roman Catholic bishop objects to some of the books, 9891-9907.

Some of the clergy, and the Wesleyans as a body, who are considered friends to an open Bible, have become adherents to National system; Churchmen and Wesleyans who have become managers, 9915-9925.—Small average attendance in society's schools often caused by children attending National schools, 9926-9942.—Society's schools must be considered denominational, and though Roman Catholics attend, they must have conscientious objection to the teaching. Can hardly admit that denominational character prevents the general community from availing themselves of them, or that there is a waste of teaching and inspecting power, 9943-9958.—Society would be glad of State aid if they could retain denominational character, 9959-9963.—Would not sanction any system where children did not read Scripture and receive religious teaching, 9964-9967.

Roman Catholics are quite right upon their own views; cannot approve of their principles of education, 9968, 9969.—Reading Scripture may be at a fixed hour, but not the religious instruction, 9970, 9971.—Society's are called Scripture schools; any National or other school where the Authorized Scripture or Douay version is read may be called a Scriptural school. If any Roman Catholic children attend a school and do not read the Scriptures it cannot be called a Scriptural school. Douay version may be regarded as the Word of God, 9972-9983.—Would be surprised to hear that Roman Catholic children and servants can in controversy defeat their equals, 9986, 9987.

National education is education for whole body of the people; Roman Catholics have a right to educate their children; should not interfere with their faith in schools; they are taught out of same books as Church children, and hear teachers' comments; these do not broach controversial topics, 9988-9994.—Roman Catholic parents do not distrust Protestant clergy, but Protestants have not equal confidence in Roman Catholics; Roman Catholic manager of a National school would not attempt proselytism, 9995-9997.—Society's schools, except the smallest, ought to receive State aid; they are open to every denomination, but Scripture is taught to all who come; they are "clergymen's schools for the poor," 9998-10001.—Reading must be taught before writing, &c., and religious instruction is given in reading lessons; to teach a child only secular matters would upset the character of the school, 10002-10007, 10018.

Would be very glad of State aid, but would not modify present rules to obtain it; members do not all hold such strict views; most of the patrons do, 10009-10015.—Society's principle not generally held by public schools, 10016, 10017.—At the risk of having no school in a parish, would not accept State aid on present terms; they are unfair. If State enforced attendance and paid all expenses they might prescribe, but where private parties have the trouble and expense they have the right. Would be satisfied with such teaching as could be given in Sunday

Rev. Alex. Irwin.

schools rather than accept State aid on present terms, 10019–10026.

Roman Catholic pupils have fallen off lately, 10027.—Few of the teachers have any other resource; Latin and French might be taught, but not by present masters; this might lead to undue attention being given to clever pupils; superior education not adopted in society's training schools, 10028–10033.—If clergyman provides and superintends teacher and gets the children to attend he has a right to have his sentiments consulted; Roman Catholics should have same right, 10034–10042.—Cannot account for a number of Roman Catholics attending a society's school, where they have to read the Authorized version, with a National school near, 10043–10046.—Has not heard of any cases of proselytizing, 10047–10049.—Not more opportunities for religious instruction from Dublin or Christian Knowledge Society's books than from those of National society, 10050–10059.—It would be hard upon a large body of the people now if State were to insist upon Scriptures being read in every school, 10060–10062.

The late Primate advised clergy to join National Board if they could not make their schools efficient without; few followed the advice; objection to that course is still as strong as ever, 10063–10066.—Society's school children, except Catholics, learn Church catechism; are not bound to attend church; schools not open on Sunday, 10067–10070.

JOYCE, P. W., Esq., A.M.

P. W. Joyce, esq., A.M.

Is head master of the boys' central model school No. 1; was teacher of a National school, head master of the West Dublin Model School, and organizer of schools, 6457–6460.

The young teachers who have spent their time as pupil-teachers before coming up for training are better scholars and more intelligent than the class of teachers that used to come; the class that requires training most—the teachers of ordinary country schools—comes up in very small proportions, 6461–6463, 6503, 6504.—Those who have been pupil-teachers in the model schools come up very well grounded, but the monitors of National schools are not so well prepared; both pupil-teachers and monitors stand in need of much instruction in the methods of teaching, 6464–6466.

Number of pupils in model school No. 1, 6467, 6468.

The teachers in training attend at the school on four days a week for the purpose of teaching, the ordinary class from two to three o'clock, the special from 10.30 to 11.30, 6469, 6470.

There is no rule regulating the total attendance of pupil-teachers; they are appointed by competition, and advance from class to class by seniority, 6471.—A large proportion of them leave for more lucrative employments; some of them obtain places in the Civil Service, 6472–6476.—In the case of Roman Catholic teachers it is not easy to get schools for them round Dublin, the priests, as a rule, declining to take them out of the model schools, 6520–6524.

The children at the model school No. 1 are of a mixed class; about one-third are children of parents paying income tax, 6477, 6478.—There is no boarding establishment in connexion with the school for the children, 6479.—There is an evening department for adults of various ages from thirteen to twenty open for six months of the year, attended by about 200 young men; this part of the school was at one time given up, but was reopened two years ago, and seems to be becoming more popular, 6479–6484.

Heads of the school have no control over general conduct out of school of masters in training, 6485, 6486–6499.

The five months' course is not sufficient for training; it would require very near a year to train the teachers effectually; at present they do not receive enough instruction in school management, too much of the five months being devoted to literary instruction, 6489–6491, 6505, 6506.—It would be better if the masters' attention were directed to fewer subjects, so that they might be taught more effectively, or else the literary instruction should be imparted out of school hours, 6492, 6493.—Four of the model schools are small schools, differently organized in order that the teachers in training may select the plan most suited to their own schools; these schools, however, are not fulfilling the original intention, as the masters do not get sufficient time in them, 6494, 6495.—They receive a lecture each morning on school management from the head master, who partially supervises them when in school No. 1, 6496–6498.

Religious instruction of Roman Catholic children, the pupil-teachers, monitors, and teachers in training devolves on the head master and such of his assistants as are Roman Catholics; a regular paid chaplain should be appointed for this duty, 6500–6502.

It is very desirable that young persons should enter on the office of teacher at a very early period of life; the best plan would be that after serving as pupil-teachers and before coming to the training school they should have charge of a school for a year or two, so that they might experience the difficulties teachers have to contend with, 6507, 6508, 6544.—The practice in teaching which a pupil-teacher gets is very different from practice as master of a school of his own, 6509–6541.—To a limited extent instruction in the necessary subjects is given to the teachers, but they are really not trained in the business of school keeping and school management, 6510–6514, 6527–6530, 6542.—The teachers in the ordinary class attend, twelve at the time, for one hour on four days a week, for giving instruction under the superintendence of the head master and the professors; that is the whole amount of their teaching in the schools; the teachers may derive benefit from this, 6515–6519, 6636–6640.

Managers of schools are in the habit of applying to the Professors for masters, 6525, 6526.

When the four small schools were established witness prepared a memorandum as to their organization, and the manner in which they should be generally managed; probably it would be useful to have one of the schools conducted altogether by teachers in training under the charge of a head master, 6531–6535.—The circumstances of the country prevent the adoption of a rule that all teachers should be trained before being allowed to have charge of a school, 6536–6540.

Opinions of the Inspectors as a body are worthy of high respect, and very probably their opinions on training may differ, 6545–6547.—Cannot account for the classification being comparatively lower in 1866 than in 1856, having no means of calculation, 6548–6550.

In giving religious instruction to the pupils, attention is mainly directed to the catechism, although books expounding doctrine are occasionally used; the Douay version of the Bible is not used; every Catholic layman feels a difficulty in imparting religious instruction without authority, 6551–6553.

The model school in Marlborough-street is not inspected by the Inspectors, it being under the superintendence of the Professors; they have never formally examined it since witness has been head master, but some years previously they did, and made a regular report on it, 6554–6558.—No prizes are given away, nor is there any annual examination; the proficiency of the pupils is indicated by their promotion from class to class, 6559–6565.—There is no fixed examination of pupil-teachers and monitors—indeed none at all except that of the head-master; it is very desirable that there should be one, 6571–6577.

Cost of central model school; number of pupils on the roll, and average attendance, 6578–6587–6641.—Pupils in this school pay quarterly in advance, and as long as they pay the names are kept on the roll; in ordinary National schools the name is retained for a

quarter after the child begins to be absent, without reference to payment; there is a possibility that a boy's name might appear in different schools, but it does not much affect the gross number of pupils, 6587–6590.

Every pupil pays for its education, the lowest fee being 1*s.* per quarter, the highest 5*s.*, the rates being fixed by the Professors according to the circumstances of the parents, 6591–6594.

To a certain extent the model school is a practising school, 6595, 6596.—Arrangements for practising masters in teaching; classification of children in the school, 6597–6608–6618.—Appointment of teachers to the various classes in the model school is the duty of the Professors, who overlook and correct them while teaching, 6609–6613.—The teachers are lectured on method by the head master, and examined orally during the lecture; there is no time for written examinations, 6614–6616–6633.—There has not been until lately any regular text books on the science of school management, 6617.

Teachers in many cases will have to give religious instruction in their schools after training, for which they are by no means prepared, from want of a chaplain at the Dublin school; one of the great wants of the institution is proper superintendence of religious instruction, 6619–6624.

Pupils in training are not instructed in mode of teaching evening classes, 6625, 6626.—Subjects of lectures by head master, and method of carrying them on, 6627–6632.—No instruction is given as to moral discipline of a school, 6634, 6635.

Religious instruction is given to the Protestant teachers by their pastors; Archbishop Whately paid the ministers of the Established Church out of his private purse; the Board have not paid, and do not pay for religious instruction, 6642–6646.—No obstacle has been thrown in the way of appointing a Catholic chaplain; and although no application has been made through the ecclesiastical authorities, it must be known that Catholics are anxious to have a chaplain; Dr. Power attended before his appointment to Clonliffe, but no one has been sent in his place; witness has represented conversationally to the official authorities the necessity of a religious instructor, 6647–6655.— Besides religious instruction being given to the children in the model schools, the masters in training should also obtain it, in order that they might impart it to the children of the schools of which they may ultimately have charge, 6656–6658.—In the ordinary National schools the priest has the entire responsibility of preparing the children for reception of the sacraments, commonly delegating a considerable portion of the labour to the teacher, 6557–6681–6685.—Saturdays are generally set apart, but religious instruction is often given every day, 6661, 6662.

P. W. Joyce, esq., A.M.

It is very usual in Roman Catholic churches to have the children together for instruction quite irrespective of the ordinary school instruction, but this is not sufficient for many reasons, 6659, 6660.

The object of witness in suggesting the necessity of appointing a chaplain is not to get rid of the labour of imparting religious instruction to the children, but from the difficulty which all Catholic laymen experience in the want of a spiritual director to take the responsibility, 6661–6667, 6671–6676, 6689–6691. Protestant as well as Catholic clergy should be paid for services they may render in the schools, 6668–6670.—The catechism is not taught to teachers in training—in fact they get no religious instruction at all except from the religious books which are put into their hands, 6677–6686.

The duties of the head mistress correspond with those of the head master, 6678–6680.

The refusal of Catholic managers to take teachers trained in the schools dates from the pastoral issued in 1863, 6692, 6693.

Pupil teachers are chosen by the professors on competitive examination, and appointed by the Commissioners; the numbers are fixed for Catholics and Protestants; none but Catholics are allowed to compete for Catholic vacancies, so also in case of Protestants, 6694–6697.

Catholic teachers in training are sent to mass on Sundays; on Tuesdays, the male teachers go to 10 o'clock mass to Marlborough-street Cathedral, under the supervision. of the head master or a Catholic assistant master, 6698–6702.

KAVANAGH, JAMES WILLIAM, Esq.

James William Kavanagh, esq.

Was formerly District Inspector and Head Inspector under National Board; is now Professor of Mathematics in the Roman Catholic University, 10071–10073, 10253, 10254.—Elementary secular instruction varies greatly in National schools; worst teaching is in lower subjects. Tendency, caused by imperfect training, to give undue attention to higher subjects; this is checked by inspection; causes of children being too long in First and Second Books, 10074–10078.—Inspected in all parts for many years; has never ceased visiting schools; has visited a large number recently, 10078–10080.

Teaching in model schools, and pupil teachers from them, very superior. Children attending are above class for which intended; the few poor who do attend them derive great advantage, 10081–10084.—Leaving out economical, religious, and social questions, model schools are all that can be wished; particulars to show that they are too expensive, especially in buildings, 10085–10088.—Teaching in training and model schools at Marlborough-street most excellent; was head master there for four years, 10089–10091.—Acquirements of some of the teachers coming for training higher than formerly, but fewer men of years and solid attainments now. From various causes, general ability of teachers has gone down, 10092, 10093.

Monitorial scheme commenced sparingly in 1845; largely developed lately, but qualifications of many are very low. Suitable people cannot be got; many prefer being soldiers or porters; orphans in charity schools have refused; some take the money and run away; schoolkeeping most irksome where no natural liking for it. Bitter controversies of late years have been very injurious to schools, 10094–10096.

Insufficient provision for religious instruction now. Catholic clergy are forbidden to visit training and model schools; objectionable that salaried sectarian chaplains should be attached to central schools; no more a function of the State to make schoolmasters than to make clergy; not attempted in England, 10097–10099. If present system continued and clergy attend, they should be paid, 10100, 10101. Much better that State should confine itself to assisting and using such institutions as religious bodies or voluntary associations create for training schools; thirty-nine such in England under different denominations, with 3,000 students, supported by State at an annual cost of £74,000.

If this system adopted in Ireland, State should bear entire cost, but with guarantee that teacher remain in the service; in England three-fourths is the maximum paid by State, 10102–10108.—Where possible, localities should bear portion of expense; mixed payment should follow mixed management, 10109–10111.—State should see that its money is properly spent, 10114.—A leading defect in present system has been for years, and still is, unskilfulness of teachers in dealing with lower classes, 10112, 10113.

Training schools should be established according to geographical distribution of religious bodies; patronage, &c., in their hands as in England, with power to Government to prevent supply exceeding demand, and same control they now have in ordinary schools, 10115–10119.—To encourage teachers to continue in the service, liberal salaries might be given, or an agreement for years made before training, 10120–10126.—Religious bodies should guarantee suitable candidates, 10127.—Change of late years in teachers,

James William Kavanagh, esq.

caused by rise in labour market, temptations to emigrate, low pay, want of residences, &c.; the men are lower class socially, much younger, and less attached to business; except with married teachers, there is a general unsettledness, and withal, candidates are most difficult to find, 10128–10132.

Teachers' returns of attendance, &c., are made with wonderful fidelity; those for which Board are responsible are most deceptive and fallacious; the attendance itself is very unsatisfactory, 10133–10135.—Strong temptations to exaggerate the numbers present, as held out in recent changes made in regulations of Board, 10135. In 1847, witness found daily attendance deliberately falsified in many schools, in order to sustain numbers required by rules. Suggested to Board to introduce rule (which still exists) that roll should be called daily before twelve o'clock. Inspector visiting after that hour could then ascertain whether correct. In 1850, wrote to the effect that, National Board having completed its twentieth year, correct statistics, if obtainable, would be invaluable, but few teachers pay sufficient attention to instructions. Their returns of daily attendance, however, were now quite reliable. All important questions hinge upon this—"What is the amount of effective time spent, on an average, by each child in a National school?" 10136.

The Board's two chief annual returns are "average daily attendance" and "total number of distinct pupils on rolls." The former is in the main reliable, the latter also as far as the teachers are concerned, but as to mode of publication by Board, nothing could be more inaccurate or fallacious. They make it appear that a million children are at school out of a population of 5½ millions. In Shankill, where there are but 24,023 children, 34,250 are returned as on the rolls; in Antrim, 84,509, where there are but 74,910; so that in these districts more children are given as in attendance at National schools than there are living between the ages of 5 and 15, and that too notwithstanding the numbers of other schools in existence, 10137, 10138. The number at school under five years of age would but slightly modify the gross error committed. In Belfast, again, 10,227 more are given than are living between 5 and 15, 10139–10141. Also of Presbyterian children between 5 and 15 in the whole of Ireland, all but 1,619 are given as attending National schools. Schools have been unduly multiplied; children are passing and re-passing from one to another, and the names of thousands may be on the rolls of a dozen schools at the same time. Also, the same applies to the Catholic schools in Dublin, 10141–10145.

Preceding is not a matter of mistake, but "of openly inaccurate return publicly and repeatedly made" by National Board. Nearly 100,000 children are given who never enter school within the year. The fluctuation will allow for much of the multiplication, 10146–10151.

Inspectors noticing same children in different schools does not touch the case, as teachers' returns may be considered *bonâ fide*. The error arises from form of published returns, adding together those from 6,520 schools, and heading total with the misdescription, "Number of distinct pupils on roll," and describing the total as that number of "individual children," 10152–10158.

Inspectors of National Board are most respectable men, and would give similar testimony. Reiteration of point objected to. Neither Inspectors, patrons, clergymen, or teachers are responsible for the misstatements, 10159–10163.

Three hundred thousand yearly struck off under thirteen weeks' rule; this leaves 75,000 too many in each quarter, irrespective of duplicates. The purgation of the roll is quarterly in Ireland though monthly in England, but return of Board extends to a period of fifteen months. In the last quarter, say, if a child gives one attendance, his name is transferred to first quarter of new year, 10164, 10165.—Many children go from school to school. Return for 1865 is 922,084. At least one-third must be struck off for above two causes, 75,000 for first quarter, and 275,000 for duplicates, 10166–10172.

Causes of children going from school to school, are change of teachers and lowered reputation of schools, and closing of some; undue multiplication of schools from the religious difficulty, causing them to be distributed according to localization of religious parties rather than to wants of localities, 10173–10177.—A visit to the schools in Dublin will prove foregoing. Reports of Inspectors confirm it; one says, "In some places schools are quite too numerous, and there the quality of the education is worst; . . . . people care less for what they can easily get;" another, "in some places the schools are too numerous;" another, "the schools are numerous, not where the population is greatest, but where there is the greatest mixture of religious persuasions," 10178–10182.—The schools have not the hold upon the people they had; the number should be reduced. In towns and populous localities the evil of migration is most felt, 10183–10185.

The proportion of the population under fifteen years of age is 32·8 per cent. In Ireland only 5·9 per cent. of the children under five are found in schools aided by State, in Great Britain 16·26, 10265–10270.—From 98 to 99 per cent. of Presbyterians of five to fifteen appear on rolls of National Board for 1867; this is a gross exaggeration; from their social position, and the warmth with which they have adopted National system, probably 90 per cent. may attend. The Presbyterians' is the most exaggerated statement, 10271–10276, 10280, 10281.—The attendance at the night schools may somewhat modify the exaggeration, but the numbers are comparatively small. They are not an important element, and do not abate the force of previous statements. In Antrim, for instance, the average evening attendance was only 7·8 per cent, 10287–10296.

The Roman Catholics are the lowest poor, Presbyterians next, Dissenters next, and Church of England best off. Children who might be at school are about 20 per cent.; number in returns is incorrect; many put down who are industrially employed, though these may give a partial attendance, 10277–10279.

Particulars of fluctuations of attendance in various districts, 10282.—Exaggeration of 42 per cent. in returns of attendance for Belfast, 10283–10286.

The Board, as well as the Inspectors, know that the children migrate and are duplicated, yet they are entered as "distinct individual pupils on roll." In 1857, when this new total was introduced, without any sensible increase in attendance, 216,339 were added as on the rolls, 10297–10303.—Returns were formerly made out for the half-year. No fault lies with the Inspectors. Witness's complaint is that the Board cooks the accounts, 10304.

Repeats that children absent part of last quarter would be transferred to new year; these ought to be struck off, unless re-admitted as new pupils. In 1865 the difference between nominal return and number on rolls is given by Board as 165,514; this is a considerable under-statement, and could not be proved; identification would be impossible. The 165,000 does not include the duplicates. The net number cannot exceed 600,000, though the Board gives 922,000, 10310–10318.

Witness has long been familiar with the National system; was pupil in a National school for a year; appointed head master of the Central Model School in 1841. Still takes a very deep interest in them; has visited hundreds lately, and inspected them to the full extent allowed to visitors; inspected books, examined classes, &c., 10186–10198.—Has visited many of the model schools lately; they are attended by better class children; proportion cannot be given, as Board suppresses tables showing social status; District Inspectors visit them very frequently; Head Inspector at least once a year; would not alter opinion if Inspectors said the per-centage of better class children was small. Objects to such large State grants for

schools for the middle classes exclusively directed by the Board; better classes attend now in a larger proportion than formerly; the instruction given is excellent. Great praise of effects of National model school system in bringing together different classes, &c., expressed in a report published in 1861, referred particularly to Clonmel model school, not generally; the "wisdom, justice, and impartiality" which formerly characterized the system do not now exist. Clonmel school, which then contained 79 per cent. of Roman Catholics to 87 per cent. of population, is now a mere Protestant parish school, 10199–10224.

Did not recommend establishment of model schools; reported on them, and on subjects connected with them, when directed, 10225–10228.—Never knew poor excluded from them by the rich; rule as to payment excludes them; knows a whole class of cases, but not a single case. Searched in vain at some model schools for barefooted children, but they attend National schools by thousands, 10225–10234.—Knows of only one case where poor children are admitted free; would be glad to hear of more, 10235–10238.

Foresaw the difficulty in the training—the religious difficulty; never officially reported it, as, being a complaint against the system, it would have been cut out, but frequently made it a subject of conversation. Special reports on sectarian contention amongst the officers was a matter of every day occurrence, 10239–10247.—Important official reports have been mutilated, and the mutilated portions printed as Parliamentary returns. Board might be justified in suppressing reports hostile to their principle, but not if on common topics. To a great extent they will only publish what is pleasant. Instance of a mutilated report presented to Parliament, which had afterwards to be presented *in extenso*. Witness's reports have several times been mutilated, 10305–10309.

Approved of idea of district model schools as preparatory training schools, but their function as *model* primary schools was higher, 10248–10252.

Was in Board's service seventeen years, eleven of which as Head Inspector; was prospectively depressed a grade, and, in consequence, resigned, though entreated by the Lord Lieutenant and others to remain, 10253–10257.—If the State got the direction of education as a whole, great political and social dangers might be apprehended; tentatively, the State is laying its hands on education. Does not charge Board with favouritism in its appointments, but duality system often keeps best men out, 10258–10264.

Witness repeats a statement he made before the British Association in 1857, that the prospects of edution never looked worse, with children attending one day in three, and learning little more than the alphabet; one-half of 560,000 children at school are classed as learning to spell and read words of one syllable. In 1861, 39 per cent. of the people were unable to read or write; in 1851, 47 per cent.; and in 1841, 53 per cent. This is not the decrease in illiteracy, it appears, as a vast mass has been removed by death and emigration. Quotation from Census Commissioners in proof, 10319–10321.—Another proof of fallacious returns as to reading and writing; up to thirty years ago children were kept spelling before they began to read, now as soon as they know a few letters they are returned as learning to read and write. Distinction should be made between teachers' classification, or the book pupils are in, and a test by actual examination, 10321–10324.

To pass from First to Fourth Book, it took a pupil 785 days' actual attendance, which indicated 2,252 days on the roll. Explanation how this proportion is obtained. Average three days on the roll for one attendance. This proportion is deduced from reports for the last ten years; three children on the roll for one present, 10325–10332.—If two years are occupied in getting from First to Second Book, it would not take so long proportionally to get to the higher books. Average daily attendance at present is 49, and number on roll 140. Irregularity of attendance extends over all ages. Of pupils in First Book in one year, 18 per cent. are promoted, in the Second 27·9, in the Third 31, &c., so that 25 years would be required for the whole; a most lamentable picture, 10333–10336. James William Kavanagh, esq.

Average school age is 9½ years. Average school period for 1861 was 2 years 5 months 12 days; for 1862, 2 years 5 months 26 days; for 1863, 2 years 7 months 17 days; for 1864, 2 years 8 months 27 days; for 1865, 2 years 9 months 7 days; which means that period from entry till name struck off for first time is under 3 years. Should say that average attendance is only a little over a day a week. Return, giving the average at 64 days a year, 10337–10340.—Would be agreeably surprised to find it 90 days, but knows it is not so; if taken at 90, it would give a total attendance of 216 days; 202 days are required to get through the primer; this agrees with classification according to books. In England, age and standard are nearly convertible, but not so here; it was alleged that 7 years and under represent First Book, 8 and 9 years Second Book, &c., but actual returns show ages up to 9 in First Book, and 9, 10, and 11 in Second Book, &c., 10341–10343.

Children leaving while in First Book will soon forget all they have learnt; to retain some knowledge of reading, they must reach the Third Book; not more than 25 per cent. in Third Book and above, 10344–10349.

Principle originally laid down was for schools to be vested in Board; this was found impracticable, and local trustees were resorted to till 1845, when, Board representing to Government that there were legal difficulties, they were incorporated. Roman Catholic body refused to accept new form of lease vesting schools in Board, or to assign to them the trusts in any schools already built, as local parties after building the school must hand over control to Government. A rescript was sent from Rome in 1841 directing parochial property, including schools, to be kept in hands of bishops and clergy, 10350–10353.

Roman Catholics did not object to original principles or to conscience clause, but Protestants did; Church Education Society strongly; they presented a most influential memorial to Sir R. Peel, protesting against principle of trust deed and of excluding children; they would not be agents in diffusing Roman Catholic system among Roman Catholic people, and they would not turn children out during reading the Bible, 10354–10359.—Presbyterians never had any vested schools; they, or persons professing to represent them, objected to the plan. Dr. Cooke, and Dr. Kelly, late Judge of Admiralty Court, gave testimony to this effect; probably they were not acknowledged by Presbyterians to represent their opinions. Neither Presbyterians, nor any other religious body as such, has ever come into communication with Commissioners, 10360–10370.

Further Examination.

A population of 500 should give 100 on school roll. Population of Shankill or Belfast is about 120,000, giving 24,000 school-going children. 34,250 are on rolls of National schools, being an excess on children of five to fifteen years of age of over 10,000; children under five could not materially affect it; on the face of it the number is false. Excess is caused by keeping names three months on roll, and by children moving from school to school. Local parties are not to blame—the fault lies in the Commissioners not giving explanation of the fiction. Return for 1867 removes a little of the false impression. At least 300,000 of the 913,198 on roll are only names on paper; table illustrating this, 10700–10719.

In 1853, according to Registrar-General's returns, only 45·19 per cent. of the Protestant women marrying signed their names; since the whole population has been included about 49 per cent. sign. Act including Roman Catholics came into operation at beginning of 1864; in bad times a larger proportion sign, as fewer poor get married. Persons able, but who do not write, would not make more than two per cent. difference. Tabulated abstracts only published

James William Kavanagh, esq.

by Registrar-General since 1864, 10720–10730.—In England twenty years ago one-third of the men and one-half of the women could not sign, but a great improvement has taken place since, as in 1866 only 21·6 per cent. of the men and 30 per cent. of the women were unable to do so. Exceptional cases (such as having the hand guided) would not affect more than 2 or 3 per cent. of these. In Scotland only 11·4 per cent. of men (in some districts only 1 per cent.) and 22·2 of women are unable to sign; this shows the excellence of their old parochial schools. In France in 1866 only 33·42 per cent. were unable to sign. Looking back at the Irish returns, there appears to be rather an increase of illiteracy. Tables illustrating the foregoing, 10731, 10732.

Relative proportions of pupils in each class book in the four provinces and in the whole of Ireland in 1867. The highest classification is in Munster. Taking the fourth and fifth books jointly as a test, in Munster there are 9·0 per cent. in the advanced books and only 5·7 in Ulster, though it contains half the model schools. The same superiority is shown in previous years. Tables giving these statistics from 1860 to 1867; but without these returns any experienced Inspector would be struck with the disparity, 10733–10738.—Of the 912,100 children on roll of the schools, 6 in every 1,000 remain to enter the fifth book; this includes girls: there is a fifth book for girls. In 1865, of 396,526 pupils struck off roll, 38·7 were in the first book, 25·6 in second, 15·9 in sequel (now withdrawn), 12·5 in third, 6·7 in fourth, and 0·6 in fifth, giving only 19·8 per cent. able to read a verse at first sight, 10739–10744.—Of pupils admitted in 1858, 2 per cent. were in first book, showing that a large number had been at school previously; this is one proof of the gross inaccuracy of return of number on roll. Clearly nearly 40 per cent. in one year were re-admissions, and ought therefore to be deducted. Table showing number on roll at opening, number admitted, and number at close of each year from 1861 to 1865, 10745–10750.

Proportion on rolls examined by Inspector at annual examination. In 1858 only one-fifth of those on rolls examined in reading. From 1858 to 1863 Inspectors gave results of examination in reading only under two categories, but seeing the numbers gave such poor national results they added a third, so that return now includes first book. Results of Inspectors' examinations, therefore, refers to less than the average attendance, and to only a small proportion of those on roll. Return illustrating the foregoing, 10751–10755.

Regarding the time necessary for reaching the higher books. In Mr. Conwell's district, in the richest land in Ireland, embracing Meath, abutting on Dublin, and taking in part of Westmeath, with the Trim Model school in the centre, the teachers are amongst the worst paid, the attendance most irregular, and schools least efficient of any in Ireland; it would take 25·4 years before every child would get into the fifth book. Process by which this result is shown to be correct. The teachers are well trained, but receive no local support. Mr. Fitzgerald's district, with Parsonstown in the centre, differs from this only in degree, and it is the case in pretty nearly all schools, 10756–10761.—No uniformity throughout the country in time of maximum and minimum attendance; June or February would probably give the highest; April, September, and October the lowest. Number struck off rolls is greatest in the last quarter; but there is no substantial difference between one quarter and another. By a table produced with highest and lowest given for each month, it is shown that they compensate one another. Ten or eleven years ago witness foresaw danger to which returns as to number on roll were open, and wrote to the Resident Commissioner warning him of it, 10762–10769.

In 1856 the five Head Inspectors, Dr. Newell, Mr. Keenan, Mr. Sheehan, Dr. Patten, and witness, wrote a joint letter to the Commissioners. Previous to this, Inspectors had been called to a conference every spring. At that of 1855, the last attended by witness, the whole system was brought before them, and every principle and practice came under discussion; they were also employed at this time in clearing the "tremendous" arrear in the office, where 11,000 reports had been allowed to accumulate; as an inquiry was impending, the Resident Commissioner thought the office was not in a pleasant state. Thirty-nine questions were submitted to and reported on by them; some of these reports were not such as Board expected. The duty of preparing the school accounts was assigned to witness by his colleagues on account of his special fitness. They had nothing to do with present inaccurate returns, but warned Commissioners in a round robin on the subject, for which they were all severely reprimanded and threatened with instant dismissal if they repeated the offence, 10769–10776.—Origin of letter: in 1853 some of the Commissioners seceded from the Board, and matters were in a very unsettled state; witness excluded certain books, for which he had to answer before the House of Lords, where he satisfactorily accounted for his conduct; serious altercations took place between the officials; Mr Keenan held an inquiry, for report of which he was threatened with dismissal. The Head Inspectors were dissatisfied with serious charges made through Mr. M'Creedy, and after conferring together, the round robin, which took months to prepare, and in which all equally concurred, was presented. Board's order in reply stated that if dissatisfied they ought as men of honour to resign, and that the letter was marked with unprecedented "indiscretion, indecorum, and insubordination." Letter drew attention to school accounts, 10777–10780.

Heads of joint letter (the round robin referred to):—"Head Inspectors obliged to submit this remonstrance. Services of Head Inspectors. Classification of teachers. Model schools. Superintendence of the inspection. General reports of Head Inspectors. Investigations. Our counsel invited. Object of our appointment. Recent occurrences. Detailed summary of work done in spring 1855. Re-casting school districts. Allotment of districts. Examination papers. Joint reports on thirty-nine special subjects. Examined and dealt with a year's arrear of work in inspection office. Mode of expediting official business. Reports upon re-organization of office. New books, forms, &c. Inspectors' code. Advantages derived from the conference. We resume our ordinary duties. Mr. M'Creedy's appointment. Style and character of official correspondence. Recent tendency to increase the clerical business of the Inspectors; results. Head Inspectors had for nine years made out (conjointly) the forms connected with inspection. Recent departure from this; results. Primary report (District Inspectors') on National schools. Observation book. Inspectors' annual report, &c. New form of Head Inspectors' Journal objectionable. Infliction of punishment on teachers too severe. Promotion withheld from teachers recommended by Head Inspectors. Usual annual conference of Head Inspectors prohibited in 1856. Lord Monck's report on the office ignores our services in organizing the inspection department in spring 1855. Summary of objections. Salaries. Report of Lord Monck, &c., on Education Office. Salaries of clerks. Comparison on first-class clerks' and first-class District Inspectors' salaries. Relative official rank of both classes of officers. Salaries of English and of Irish Inspectors. Daily allowance vacation commutation. Injurious effects of Board's rule. Purchase of books. Requirements of new scale of salaries;" *pages* 453 to 457.—Board's order in reply, dated 6th June, 1856, *page* 457.

After joint letter, in consequence of a conversation with Mr. Gibson and the Resident Commissioner, Mr. Macdonnell, witness himself wrote officially to the latter on the subject of school accounts, &c. The letter is dated 1st April, 1857, and is entitled "Abstract of deductions made from the statistical records of the National schools in Ireland," and is intended to show the fallacious view the school returns give of attendance, time spent in teaching, efficiency of instruction, school arrangements, &c., and the greater necessity for

prompt legislation than for inquiry, 10781, 10782. [*The letter will be found* in extenso *at* 10782.]

Returns show 33 per cent. average attendance, whereas it is really 50; the Commissioners here do themselves an injustice which they do not seem to perceive, 10783–10787. Statement before British Association in 1857 that the forms for school accounts are clear, simple, and comprehensive, and that no country in the world should be able to furnish more reliable educational statistics than Irish National schools, is not at all inconsistent with warning given to Mr. Macdonnell of error in accounts, as it refers to new form of accounts, framed by witness, and not to returns in question. It referred to returns *to be* furnished. These forms are still in use, and are not surpassed in any schools in the world; none equal to them in England, 10788–10795. The returns from the teachers are reliable and correct; the inaccuracies are from putting wrong headings to results, and from abuse of rule for keeping names thirteen weeks on register; the rule itself is necessary; neither teachers nor managers are impeached, but those who draw up reports of Board, 10796–10806. The Board claims credit for the whole number of names on roll, as if they were all distinct individuals, whereas one-third reappear or have left, 10807–10811.

Board reverted to principle of local vesting in 1864. Previous system had three phases: from 1831 to 1845 was the period of local vesting, from 1845 to 1864 no erection was aided unless vested in Board; since 1864 either system was allowed. Statistics of schools built, repaired, &c., during these periods. Particulars showing disastrous effects of Board's attempt in 1845 to get possession of all the school property in the kingdom and the determined opposition to it. During twenty-five years £384,764 has been expended in 121 model schools with 9,000 pupils, whilst only £177,576 has been devoted to 6,567 ordinary schools with 312,000 pupils, 10812–10813. These changes shook confidence in Board, as shown by limited number of applications, &c, 10814–10816.

In 1826 Roman Catholic Bishops decided that school property could not be given up for the sake of parliamentary support; next Lord Stanley's project that aided schools should be vested in Board was abandoned as impracticable at first meeting of Board; in 1839 a serious discussion arose and was referred to Rome, where it was decided that National system should be tolerated, but that schools ought to vest in clergy; on publication of Board's rule in 1845, by which they would have confiscated £60,223 locally raised, and secured to themselves patronage and management, bishops were greatly alarmed, and passed a resolution strongly condemning it. Board undertakes repair of all vested in them, 10817–10820. Many schools being greatly out of repair, Board endeavoured to obtain them under above rule by threatening trustees with legal proceedings; the threat had little effect, as in twenty-three years they have only got the assignment of 101 schools, 10821–10824. Change of rules in 1837 necessitated change in trust deed: history of this matter, 10825.

The Presbyterians have set their faces against vested schools throughout. At present, after 37 years, they have only 67 in Ireland. Outside Ulster, they have but 1. Of the 67, 4 are held by bond, 29 are vested in trustees, and but 19 are vested absolutely in the Commissioners. Presbyterians' objection is the compulsory provision of religious instruction for the minority, 10826–10832.

No change ever shook confidence so much as change in vesting. Board could have repaired school whilst vested in local parties; offer to repair was only a bribe; alteration in conveyance, giving vague declaration in place of specific enumeration of rights, &c., confirmed apprehensions; after two years they had to change the system; this proved justice of opposition. Up to 1845, trust deed required exclusion of children from adverse religious instruction; 1847 to 1866–7, obligation was withdrawn; and now there is a return to original obligation, 10833, 10834.

James William Kavanagh, esq.

Return of total expenditure from parliamentary grant on works and repairs of ordinary and model schools by the National Board from 1831 to 1868, 10835.

Number of vested schools in 1867 was 1,864; of these, 71 are suspended—some being in ruins, some otherwise occupied, and some permanently closed; 121 are the Board's Model schools, several of which are only "official fictions," though costing a deal of money. The whole expenses of the model schools were defrayed by the state, 10836–10839.—More than a third of the cost of building, &c., the 617 ordinary schools vested in or assigned to Board was contributed by local parties, viz., £109,524, as against £177,576 by state, 10840–10844.—A third of the non-vested schools, worth perhaps £100 each, erected and maintained solely by localities. Ninety-five held by bond are not really vested; only 1,557 actual ordinary vested schools, and title defective of many of these. Before 1845, 100 a year were built; only 20 a year since, though grant is 8 times as much; decreasing limit to educational wants, but sum not laid out upon these that was intended, whilst model schools have cost 7 to 10 times as much as intended. Delay in commencing these, particulars to support statement of their cost; £177,577 expended on all the ordinary vested schools, and £384,000 on model schools. Twenty-six model schools, costing £50,945 a year to instruct 9,000 children, a quarter of whom are infants. The 121 model schools of all classes contain 40 departments; erection and repairs for 1831–1868 cost £384,764; estimate for support for current year, £50,945; pupils on rolls at end of 1867—boys, 7,981; girls, 5,433; infants, 4,307; daily average attendance, 8,059, 10845–10856.—Large proportion of model schools in north of Ireland; original intention in these schools departed from; their cost shows an indefensible and deliberate squandering of public money. Table giving condition of National school-houses, premises, &c., in 1865, 10857–10861.

Six millions have been granted by Parliament to National Board, £216,587 of which has been paid to Board of Works; since 1857 they have had charge of fabrics, and amount is granted in a separate vote, which keeps the public in ignorance of amount. Detail of their expenditure on schools from 1857 to 1869, 10862–10866.—Great increase in cost and decrease in efficiency since 1843. Many model schools are so ill attended that they should be struck off; at Enniscorthy each child costs state £110 a year; Carrickmacross, with one pupil, costs £400 or £500 a year, 10867–10872.

Church Education schools are extremely efficient, but have peculiar advantages; some of their model schools are as good as any of the National Board. Their books also are excellent; a large portion of National Board's lessons are taken from them; they are eminently deserving of State support. Returns are not quite so well kept lately, but no reasonable doubt of thorough accuracy; giving decreasing Roman Catholic attendance shows they are honest, 10873–10886.—Although Roman Catholics have a traditional feeling against them, there is really a better protection for conscience than in National schools; no unworthy influences are used. Witness has visited all the so-called proselytizing schools and districts, and never saw unfair means of attracting Catholic children, never witnessed what he saw at King's Inns-street National Presbyterian school in Dublin, under one of the Commissioners, Dr. Hall, namely, the gross attraction of giving away soup. Particulars of this circumstance. Dr. Hall's connexion is that he is a National school Commissioner, and that he has conducted religious services in the school; he entered it "as a Presbyterian minister, and an active patron of an odious scheme, of which that school was the public symbol and centre," 10887–10906.—Unfairness to Roman Catholics of allowing religious services in National schools, as from their tenets they cannot avail themselves of them; rule was made in 1840 to suit the views of the Presbyterians; privilege was not allowed previous to 1840 in same unlimited sense as

James William Kavanagh, esq.

now; vote of General Assembly in 1855 quoted in proof, 10907–10924.

In workhouse schools absence of rule for keeping name three months on rolls, and permanence of the children, cause returns to be more reliable, and better attendance is shown. Many are good and efficient schools; of late they have improved, and number of pauper children has diminished, 10925–10929.—Workhouse teachers are better off pecuniarily, but worse socially than National school teachers; reluctance to become workhouse teachers; their work is incessant and responsibility great; particulars of salaries, rations, &c., 10930–10935.

Parliamentary returns from National Board for 1862 of a most interesting and grave character; how far reliable. There never has been in Ireland a scheme more thoroughly denominational than the National system, and it is becoming more so every day, save in one part, 10936–10939.—High character of Oldcastle school, Meath, which is under joint management; denominational system is strictly carried out; it has given the greatest satisfaction such a school can give; still there are difficulties and dangers, 10940–10943.—[*In Appendix No.* X. *will be found a report by witness on this school.*]

Kildare-place Society aided nuns' and monks' schools; in 1855 latter were excluded from grant. Explanation by Board of denominational principle. Nuns' and monks' schools attended sparingly by non-Catholic children; never knew them tampered with, though they are hardly fit places for them, 10944–10951.—Reasons why Catholics accepted denominational principle, and bore to a certain extent the restrictions, but from bit-by-bit aggressions, it is now unendurable, 10952–10953.—Protestant officers speak as highly of conventual schools as Catholics; reasons of their superiority, 10954.—Christian Brothers have sixty establishments with about 26,000 children, and have secured centres of influence; nuns' and monks' schools are in every county; £100,000 has been spent on convent schools; nuns are fed and lodged, and all done on voluntary principle. Further particulars of convent schools, which are being all withdrawn from Board; they cannot submit to the intolerable privations for the sake of the money. Archbishop of Tuam does not permit any in his diocese to be connected with Board, 10955, 10956. Monks' and nuns' schools are the best in Ireland for general comfort; books and forms of Christian Brothers' schools are admirable; defect in rolls of monks' schools, 10957–10962.

One-third of girls in National schools are taught by nuns, and the number is increasing rapidly; in a few years State schools will be paralysed. Children go earlier and remain later in nuns' schools than in any others. From character of teachers, many of them being ladies of high position, and working from the highest motives, none need object to send their children, though they might mix with lower classes; children of middle classes are not kept by themselves. There are higher class children in some intermediate schools where a fair fee is paid, but no distinction or classification is made in nuns' National schools, 10963–10975.—Nuns acknowledge distinctions existing in society, and do their best to soften them; no real distinction between their intermediate schools and the higher boarding schools; education of poorer children is not injured by presence of better class. Presentation nuns teach poor only; will not conduct pay schools of any sort. The most neglected class in Ireland are the middle class of boys. The State pays model schools liberally and nuns' schools very poorly; monitresses are of no advantage to nuns. Intermediate convent schools, 10976–10983.—Objection to State aid for classes who attend model schools. Poor should be admitted to State schools, whether able to pay or not. Adheres to opinion formerly expressed as to great and various advantages of commingling of classes in model schools; always considered that there should be some limitation of classes whom State should aid; attention to rich should not detract from general usefulness of school. Adheres also to favourable opinion of the extended course of instruction at Clonmel school as it existed when opinion was uttered; deplored then and does still that so many were learning their letters; worse now than formerly. Technical and superior schools of that class are wanted now more than ever, 10984–10995.

Three months not too long to keep name on rolls, but number of days' attendance of each child should be given; other suggestions for getting more exact returns of actual attendance from teacher, which Inspector should carefully check, 10996–10998.—Fallacious returns from migration of children; causes of migration; has increased of late years, as schools have been improperly multiplied; offer to visit schools and give a practical proof of this; proof also in the fact that only 58 per cent. admitted in a year are entered in First Book; declines to name officers of Board who would corroborate it; a visit to the schools is the best proof, 10999–11006, 11019.

National schools have become denominational except in north, where people are of mixed creeds; children from other schools are sometimes set to watch proceedings of Inspectors, 11007–11016.—Only one Church school in Dublin and one in Belfast connected with Board, 11017, 11018.—Founders may convey sites to Board or to trustees nominated by themselves; repairs, 11020–11022.—Present system of trustees should be abolished; a public department, or each religious body, or Commissioners of Charitable Donations and Bequests, should be incorporated, and have power to hold property; hitherto individuals only have been accepted by National Board; neither boards of guardians nor grand juries should have control over schools or education, 11023–11027.—Trustees should be aided with funds as now; trust deeds refer only to school and premises; case of Board stopping salaries, &c., because trustees violated rules made subsequent to trust deed; this procedure calculated to break down confidence; if change above indicated made, Board would have greater security than now; English National Society is incorporated, 11028–11031.

English and Irish monitorial systems; the latter is in collision with principles in Lord Stanley's letter guarding local rights, 11032–11034.—Occasionally lay patrons have paid school-fees to induce attendance, 11035, 11036.—Proselytizing practices are carried on in thousands of cases to the extent of children attending instruction in a religion different from their own; instances of Catholic children attending prayer and reading of Authorized Version in school, although Catholics are absolutely forbidden to take part in prayers of another denomination; cases have occurred where such practice has changed views of scholars; some individual Roman Catholic parents may allow children to read Authorized Version, but their Church forbids it; question of going a considerable distance to attend school under a particular priest, 11037–11060, 11066, 11067.—In cases of minorities, original system of their being put out during religious teaching should be reverted to; patron and teacher should have power to do this at parent's desire, 11061–11065.

Boys should be educated sufficiently to leave school at twelve or thirteen; if payment by results adopted, no maximum age should be fixed in present state of education; ages higher in Irish than in English schools, 11068, 11069.

In a large number of parishes in Ireland Protestants are extremely few; whole system of State education should not be affected for such very small minorities; as far as possible denominational system should be adopted; Protestant minorities could be protected by mixed schools, where parties agree to have them, 11070, 11071, 11079.

Elementary secular teaching merely secondary, and very indifferent in Connaught Mission schools; great allowance to be made for them; many of the children would doubtless become Protestants; at an orphanage at Ballina, after the famine, unfair proselytizing was being carried on, and National Board's funds used to maintain it; waifs and strays of the famine were being sold by unfortunate widows like little pigs; the price went up and down; "parson Armstrong," a Presby-

terian, who had been a Roman Catholic teacher, bought them, 11072–11074, 11087–11094.—Principle of Church Education Society and Christian Brothers in giving religious instruction at all times is quite right, but a dissenting child could not be protected, 11075–11079.—Protestant children, in however small minority, should be provided for, but Protestant landlords, clergy, &c., should do it; State should not legislate for such cases; in same way Roman Catholic minorities should also take care of themselves, 11080–11086.

Further Examination.

National Board inspection districts were re-cast in 1855. Predominance of Protestant Inspectors in Ulster, where districts are very advantageous. Ulster men predominate in all offices at the Board; Inspectors do not select their own districts. Parish of Shankhill has two Inspectors, there being so many schools. Witness proposed re-casting of districts and equalization of Inspectors' work, and it was done under superintendence of himself and other Head Inspectors; distribution of districts is a very fair one; no desire to exile Protestant Inspectors from Ulster, 12008–12017.

Witness organized and opened a very successful model school at Clonmel; success was not owing to principles, &c., of Board, but to co-operation of clergy of different denominations; it is now a failure and a wreck as a united school; the attendance was 272 in 1856, but is now only 128, 12018–12019.

Most model schools are under an interdict for Roman Catholics; not 15 per cent. now attend in all the district model schools in Ireland; towns with model schools contain one-eighth of the population. List of model schools at which attendance is prohibited by Roman Catholic bishops; in some cases the sacraments are denied to offending parents, children, and teachers. Two or three of the bishops prohibiting only some of the model schools in their dioceses is a temporary matter of expediency, to be continued only until a sufficiency of other schools is established, 12020–12025. Schools which are still tolerated. In Dublin, Roman Catholics are 76 per cent. of the population; in provincial towns having model schools 63·6 per cent., while only 24 per cent. of children attended in 1867; number has been steadily falling since 1856. Convent schools recently opened at Trim have emptied the model schools there. Tabular view of attendance and creed of pupils in model schools from 1849 to 1867, 12026–12030.

Londonderry, Sligo, and Enniscorthy are among those strictly prohibited by the bishops. At Londonderry, with a Roman Catholic population of 12,036, not one on roll; Sligo, with 8,392, none the first year, 0·7 per cent. the second, &c.; official persons supply part of the few that do attend. Witness in 1856, then a Head Inspector, strongly objected to establishment of the Enniscorthy school; knew it would outrage the feelings of the people, and wrote to Board that it would be a certain failure; was answered that it must go on, as they were under a pledge to build it; has not kept a copy of letter, but hopes to obtain one. In only a few instances have Head Inspectors been consulted about establishment of model schools, 12031–12039, 12044.

About the year 1851 model schools became popular from success at Clonmel; Inspector at Wexford endeavoured to get one there, but Catholics strongly objecting, he persuaded landlord's agent at Enniscorthy that a good tenant could be got if he obtained a site; it was given, and Board promised to build; it was a total failure, was not opened for a year after it was built; nearly all denominations refused to use it; attendance has been declining for two years, and is now fifty-nine; total cost was £6,768, 12040–12044. Any model school should have a minimum of ninety to obtain a grant, but Enniscorthy had only sixty-three in 1866; many others are miserably attended. The new model school at Enniskillen, which cost £7,099 for erection, and takes a large annual sum for its maintenance, has only 133 in the three departments. Return showing the cost of erection of each model school and the cost per pupil, the annual cost per school and per pupil, the year when opened, the average daily attendance, and other particulars, from 1861 to 1867, 12045, 12046. Their total failure is only a question of time, 12058. James William Kavanagh, esq.

In 1843, with 2,912 schools, annual grant was £50,000, less than sum now spent on model schools with 8,000 or 9,000 children. Cost per school to state in 1843 was £17 3*s.* 5*d.*; in 1866, £56 18*s.* 11*d.* Cost per child in 1852, 11*s.* 9*d.*; in 1867, £1 2*s.* 4*d.* Table of average annual cost, from state grant and from local funds per school and per pupil, and number of pupils on roll from 1832 to 1868; number in daily average attendance from 1852 to 1868, 12047–12050.

Apart from religious objection, model schools are excellent; nowhere needed more than in Ireland; witness was the first to give impetus to improved secular education in them. No possible way to conduct them satisfactorily but by handing them over to the several religious bodies, clergy and laity; their excellent machinery should be made available for the classes intended. Manner in which they might be distributed among religious bodies; not strictly in proportion to number, because for poor Catholics it ought to be directly as to numbers and inversely as to property, 12051–12056.

In towns of 4,000 or 5,000 inhabitants they should be good secondary schools, in smaller towns primary schools; special aid should be given to ordinary schools where minority insufficient for grant, 12057–12061.—Looking to education, schools should not have less than 60 or 80 scholars, but from religious difficulties smaller schools must be aided. Average attendance at English and Scotch aided schools is 85, in Ireland 49, 12062–12071.

In 1826 bishops demanded separate model schools for Catholic teachers. First active opposition was Cardinal Cullen's objecting to one being established at Drogheda in 1851; opposition has gone on increasing since, but remonstrances were set at defiance by National Board. In Cork, with a Roman Catholic population of 70,000, not 10 per cent. are on rolls of schools, 12072–12076.

It was never contemplated that official connexion should exist between Queen's Colleges and model schools; Roman Catholic bishops always looked unfavourably upon both; they accepted mixed primary schools in practice, but objected to attempt to get education into the hands of state; appointments under Board from Queen's Colleges, and same parties holding office in both, confirmed apprehensions, 12077–12080.—While under Board witness did his utmost to prevent abuses, and failing, left the service, 12081–12083.

The increasing hostility of the Roman Catholic hierarchy to mixed system of primary education is attributable to their growing belief that object of state was to undermine their religion in Ireland. Opinion of Archbishop Whately published since his death, that the Scripture Lessons introduced into the schools were gradually weakening power of priesthood and stealthily uncatholicising Ireland, has strikingly confirmed justice of belief above stated; but the generally unfavourable working of the whole system is a stronger proof. Disruption of Board in 1852, when Archbishop Whately and others left, was caused by discovering that witness had not introduced "Scripture Extracts," &c., into Clonmel model school. Animadversions on Archbishop Whately for acting publicly on principles he could not publicly profess; he held that mixed education was the only means of weaning the Irish from Popery, but "could not openly support National Board as an instrument of conversion," &c. An indignant pastoral on the subject, published by a Roman Catholic bishop in Australia, has justly aroused Catholic feeling throughout the British colonies, 12084–12090.

Catholics consider that faith has been broken with them, as they accepted mixed system on promise of safeguards that should "banish even the suspicion of proselytism from the schools." Vital changes have been made at the instance of Protestants; some have

James William Kavanagh, esq.

recently been made to try and win back the Roman Catholics, but not at their solicitation; no change which can be effected will make system agreeable to them. Restoration by Mr. Fortescue in 1866 of original rule as to exclusion of children of a different faith during religious instruction has not removed chief practical objection; its having been broken shook confidence permanently; does not believe that Presbyterian clergymen even now observe it; for instance, was told by Rev. L. E. Berkeley, a witness before present Commission, that "of course they don't observe it," 12091-12108.

Difficulty in obtaining returns regarding above-named rule, moved for by Major O'Reilly. On Chief Secretary inquiring whether they could be furnished, Board made numerous objections; after long delay and much pressure they were obtained; delayed again before being ordered to be printed, nearly a year printing, and at last published in a mutilated form. Their revelations compelled Commissioners to return to rule in a modified form, and plead guilty to breaking it, 12109, 12110.—Portions omitted were not of much consequence; most important were whether patron was a clergyman, and creed of inspectors. This is the only complete return regarding religious instruction for 37 years, 12111, 12112.—The return shows that Lord Stanley's system was openly ignored and trampled on. Parents of 20,000 children received notice in one year that religious instruction in a different creed was being given; tens of thousands may have had notice in previous years. Has heard of instances, but never met with them, of Catholic parents wishing their children to read Protestant Scriptures; cases might have occurred while he was inspector without his hearing of them. Many more than 1,180 instances of Catholic children reading Authorized Version under Protestant teachers. There may be many cases of poor Catholic parents expressing a wish that children should read Authorized Version, as there are instances of pressure being put upon them. Cases of pressure cited from above return, being in schools attached to mills, &c., conducted by Protestant teachers, in which Authorized Version was read; the pressure consisted in the school being part of the establishment and children being expected to attend, 12113-12146.—Pressure is well known to exist, but is difficult of proof. Relative numbers of Catholics and Protestants in schools referred to. Order of Board declining to interfere in one of above cases, 12147-12151.

Circumstances under which Board's rule as to religious instruction was changed in 1847, and extract from report announcing change and detailing new principle of action, 12155-12159.—Report by Mr. Keenan in 1855 upon its working, and showing abuses existing; this was presented to Parliament in a mutilated form, but omitted parts were afterwards moved for at witness's instance, and presented; witness derived his knowledge from having been an inspector when report was made, 12160-12166.

Publication of Archbishop Whately's views, previously referred to, confirmed Roman Catholic prelates in their objections. Had he only spoken of people being enlightened, and not mentioned Scriptural teaching as the means of producing conversions, he would not have been open to animadversion, but he wrote books for schools and continued a member of Board supposed to be impartial, and meanwhile was privately expressing himself that these books, reading of Scripture, &c., would sap the faith of Catholic children. In one sense the Scripture Extracts were approved by Dr. Murray; they now form part of special religious instruction, 12167-12185.—The rule was made to protect religious minorities; the alteration removed protection, and chiefly affected Catholics. Under rule children should be put out unless parents directed their remaining. Roman Catholic Dean of Cork acted under rule as altered, 12186-12194.—Cases known of changes in faith of Roman Catholics attending National schools; only one in witness's knowledge of Protestant turning Catholic, 12196-12204.

Statement of Archdeacon Stopford that witness was instrumental in getting rule altered to suit his (the Archdeacon's) views is wholly false. Explanation of the circumstances, and public correspondence between them on the subject, 12205-12210.

Religious instruction to different denominations unitedly is impossible. Information in "Scripture Extracts" should be spread far and wide, but only through safe and authorized parties, 12211-12217.

Further Examination.

Previous statements that Board had extended grants for repairs to new locally-vested schools, and that locality pay for one-third and Board for two-thirds, were incorrect. At present, as formerly, local trustees are bound to provide for whole of repairs of schools vested in them, 12264-12272.

Catholic hierarchy received Lord Stanley's scheme rather favourably, but never accepted it. It came out of Commission of 1824-1826. Kildare-place Society having practically failed, it was thought that something should be done. In 1830 a conference took place between Lord Cloncurry, Lord Stanley, Right Hon. A. R. Blake, and the Marquis of Anglesey, from which the National system really sprung, the Irish bishops not being consulted about it; a minority were opposed to the scheme when it came out, wishing for a purely Catholic system, but all accepted it as far as taking grants, and were favourable to it as an experiment, for which it was proposed, 12273-12282.—To prevent scandal, as Irish bishops were publicly opposing one another on the question, the Court of Rome, in 1841, issued a rescript tolerating the system, 12283.

It is a mistake to suppose that Dr. Doyle was favourable to mixed education. His memorable letter was written before the system started, and was addressed to his clergy, informing them of it, as it appeared from the published outline to be a great improvement on the Kildare-place system, to which he was inveterately opposed, and inviting them to send in applications for aid, but reviewing the terms of Lord Stanley's letter with remarkable caution, and saying that if bad men succeeded first Commissioners and tampered with education, they could at once exclude the system from their schools. He never wrote or stated one word subsequently about the National society, or in favour of mixed education. He issued the letter in question as a general instruction to his clergy when he withdrew from Kildare-place Society. He, among other things, laid down that where Protestant children attended Catholic schools, they should not receive religious instruction except directed by parents; so that they got secular instruction and obtained shelter under roof of school, and, if number at all considerable, opportunity for religious instruction by their own pastors, though they might not have given a shilling towards the school. Witness hands in the letter, which is headed "Carlow, 26th December, 1831; circular letter addressed by the Right Rev. James Doyle, Bishop of Kildare and Leighlin, to the Clergy under him, upon the first announcement of the National System of Education." Hands in also a document headed "Rules and regulations for the schools in the diocese of Kildare and Leighlin, prescribed by the Right Rev. Dr. Doyle," 12284-12290.

Scheme to establish a school for each denomination where numbers sufficient, and mixed school with strongest safeguards where insufficient, not satisfactory. It could not work, as it is impossible to exclude religion wholly from teaching, class books, or history, 12291, 12292, 12305, 12310-12312.—A witness before Lords' Committee of 1854 stated that many masters, especially Presbyterians in the North, used the ordinary National Board class books to change religion of Roman Catholic children; several other cases spoken to; a Presbyterian witness stated he should be ashamed of himself if schools were ever used for such a purpose, 12293-12302.—No book of even a moral or general character could be written to be satisfactory to all; and in the ordinary occurrences of the school religious allusions are unavoidable, 12303, 12304.

In a mixed community primary schools must, like churches, be open to all, without compulsion to any to enter or remain, with secular instruction for all, and liberty to minority to withdraw from religious teaching, 12306.—English conscience clause is only a rough attempt at protection, and would not work satisfactorily there or here, 12307.—Dr. Doyle only alluded to formal religious instruction when directing that Protestants should retire, 12308, 12309.

Previous to changes made in rules of National Board in 1837, Presbyterian Synod of Ulster contemplated establishing a training department, and to keep themselves dissociated from National system; they had not the same views as now; they wanted what the Catholics now want—Catholic teachers trained by Catholics, 12313–12320.—First change in rules of National Board, caused by Presbyterians, was in 1837, getting permission to introduce religious instruction in school hours; the second, obtaining school-house for preaching in out of school hours; opinion of Dr. Cooke that National system was invented to please Romish priests, &c.; history of manner in which second change was brought about; it has turned most of the Presbyterian school-houses in the North of Ireland into auxiliary meeting-houses, for which General Assembly in 1855 gratefully thanked Board, 12321–12323.—The third and greatest change was in 1840; by it the rule was withdrawn in the case of non-vested schools, whereby patrons were bound to provide a convenient time and place for religious instruction of all children by their own pastors; it was done to prevent Catholics receiving their religious instruction in Presbyterian schools, and to make peace with the latter body; Though change made in 1840, it was not embodied in rules of Board till 1842-43, 12324–12334.—The next change was in 1847, subverting the only remaining principle of Lord Stanley's system of any value; this was the withdrawing obligation on patrons to exclude children from religious instruction which parents had not desired them to attend; by this proselytizing was protected; Presbyterians largely availed themselves of it; another change in 1839, putting small Protestant schools on a level with large Catholic ones, 12335–12337.

Lord Derby's opinion of one of the changes, as shown by his examination of Dr. Cooke before Select Committee in 1837, pressing the latter for a reason why he objected to answer query, whether clergy of other denominations had been applied to for signatures before seeking aid from Board; his reason was to avoid the recognition of Roman Catholic clergy, whom he would only look upon as members of the public in visiting his schools; witness considers he had no right any longer to look upon them as "his own" schools when he sought aid from National Board, 12338–12346.—To respect conscientious scruples of Presbyterians, oath of allegiance, taken by teachers in training, was given up, also use of school placards containing the Ten Commandments; at their instance teachers in training department are now separated on Sunday; they at first sternly refused to carry out notice system, but they are obliged to keep Lent in Marlborough House, 12347–12354.—Statistics showing that Presbyterians are an isolated and compact body, confined to a small part of Ireland, but have got education system completely into their hands; education would have fallen into a form agreeable to wishes of the country had it not been for the concessions made to them, 12355–12359.

Absence of concert between Catholic members of National Board; probably owing to their being political men, chiefly lawyers. Catholics object to appointments to the chief administrative offices, also to composition of Board. Of the seven original Commissioners only two were Catholics to two Presbyterians, though Catholic pupils were 90 per cent. Nearly all the books were written by a nephew of one of the Presbyterian Commissioners, and several chief offices were filled by other connexions, 12360–12363.

Notwithstanding observation of an Inspector to the contrary, the "Epitome of General Geography," written by Mr. Carlile, an Inspector, and nephew to a Presbyterian Commissioner, contains numerous serious errors in geography of Ireland, and in spelling (quoted); also in information on America, 12364-12372. Failure to a great extent of Board's religious books; secular books in which objectionable moral and religious elements prevail; some to which there is no objection, 12373–12376. Larger treatise on arithmetic was restrained by injunction for piracy; smaller arithmetic, written by a person who was unacquainted with first principles; he, too, was a relative of above-named Commissioner; hundreds of thousands of copies were sold. A remarkable number of errors was discovered and pointed out by a common schoolmaster, and communicated to Board, for which they thanked him, and adopted his corrections, but declined to pay him for his trouble, when he appealed to the Chief Secretary. The correspondence was published, and will be found in Appendix No. XI. Board paid £300 for writing the book, and the man knew nothing about the subject, 12377–12385. Book on mensuration, which cost £400 or £500, is greatly pirated, and is equally a failure. Objection to the Tract on Book-keeping, 12386–12391. James William Kavanagh, esq.

Witness and Dr. Clarke introduced physical science into the model schools. Most advanced book on this subject untouched since 1836; its glaring defects. Recent editions of some of the books are improved, portions being restored that had been put out by Presbyterians, 12392–12397. Attempt to keep books free from references to the history and literature of Ireland has had a bad effect; has produced an opposite result to that intended, and has contributed somewhat to Fenianism; grounds for this opinion. Quotation from Report of Board for 1866, stating that only 47 out of nearly 5,000 National teachers had been connected with this conspiracy; judging from their position and from experience of previous conspiracies, this is considered satisfactory. Witness asserts that parts of this are contrary to the fact; 75 per cent. of the Fenians have been educated in National schools, 12398–12406.

Teaching power in normal school proper is neither adequate nor efficient. Calling attention to this whilst head master of a model school led to such unpleasantness with professors, that witness had to go out as an Inspector. Similar differences occurred with his two predecessors. When he got a model school under his own charge, as in Clonmel, he was able to give his view of how such an establishment should be conducted. Puts in a letter written by himself to National Board fourteen years ago on defects in training, in answer to a circular addressed to Head Inspectors. It contains suggestions as to inspection, training of teachers, method of teaching, and school management, &c.; has not altered his opinions on these subjects since, 12407–12412.

The training establishment is a mere common school; failure of the practising schools led to the organizing system. Position of male teachers in training is very unsatisfactory morally and socially. Dormitories not equal to a police barrack, 12413–12418. Total change in the description of those admitted since about 1862; no character required now; Catholic clergy are prohibited from sending up their young men or giving them a character. Up to 1862 number of Catholics fairly represented proportion of population, but has now fallen very low. Correction of error in memorandum as to position of assistants, &c., in training institution; will put in a return of numbers, &c., since establishment was opened; source of this information, 12419-12429. Quality and number of teachers rapidly falling; causes are chiefly insufficient remuneration and appreciation, prohibition by the bishops, and emigration, 12430–12432.

Desirability of payment by results, by capitation in some cases, with retention of certificate grants; the teachers' seven grades should be reduced to three, and sub-divisions abolished; classification of teachers should enter into classification of school, and children should be examined individually, 12433. Most practical men

James William Kavanagh, esq.

connected with education societies would recommend a transitional plan for re-casting salaries. English system neither practicable nor desirable. Advantages of capitation, certificate, and results, as elements. With materials at their command, Commission might recommend a scheme that any Government would be inclined to adopt. School fees have been allowed to fall too low; landlords should give more; demand on State should be moderate, 12434.

Evidence given by witness before Lords' Select Committee in 1854, that every precaution was taken by rules of National Board against proselytism, that rules were faithfully observed, that the recent changes had not diminished confidence in Board, that greater security could not be had, &c., had no connexion with changes above named, but referred to his having excluded Archbishop Whately's books from Clonmel model school, which led to the Archbishop, Baron Greene, and Mr. Blackburne leaving the Board; had not then visited Protestant schools and seen abuses which he has since found existed; having never heard in 1854 of cases of proselytizing under National system, could have given no other answer then, 12435–12446.—After his examination, however, heard of numerous instances, causing entire change in his views; heard from Mr. Macdonnell that lots of cases had turned up in the evidence, 12447–12451.—In July, 1858, wrote a letter to Secretaries of National Board, expressing surprise that certain returns moved for in the House of Commons had been printed by Board's authority, and requesting that other returns ordered might be forwarded forthwith, also denying that he desired overthrow of Board; no contradiction between this and opinions expressed above, 12452–12455.

Archbishop Whately's "Scripture Extracts," &c., are very good books, but does not approve of their use by Protestants in schools for Catholics; letter to the Archbishop in 1852, declining to use them in his schools, but stating that he uses them for the instruction of his own children, and thanking him on personal and public grounds for various acts, 12456–12465.

In saying that parties representing Roman Catholic bishops were not consulted in establishment of National education, witness meant in the sense of being formally elected and sent. It was intended to be a combined system with all parties sharing in the management, but the Presbyterians frustrated this; Board is not, and never was, representative, 12466–12482.—Government presented a system to Catholics of Ireland, and bishops individually availed themselves of it as they thought fit; Dr. Doyle (and every other Roman Catholic bishop) was unfavourable to united education in a certain sense; he tolerated it, or proposed to try it, but did not contemplate a scheme of mixed education for his flock; in his letter he referred his clergy to the system, and advised them to take advantage of it, 12483–12501.

At this time, according to evidence given by Dr. Cooke in 1837, a majority of the Synod of Ulster dissented from National system, and introduced a scheme of education without State aid, which included religious teaching according to their own principles, but allowed those differing from them to take advantage of the literary instruction without being present at religious exercises. These schools were to be supported by their own body. Although foregoing resolution was passed, witness does not believe that in practice that freedom existed. In the evidence on this matter, Dr. Cooke makes a distinction between his own opinions and those of Presbyterian body, 12502–12522.—Similar resolutions were passed by Synod of Derry in 1834, but witness does not believe the parties would have honestly carried them out, as it is incompatible with their conduct under National system, 12523–12525.

Proposed Presbyterian model school. Schools got up by denominations. First vested school. Roman Catholics' objection to vested schools was not liking to bind themselves to an experimental system; Dr. Doyle's difficulty (and that of others) was the number of schools already in existence, 12526–12539.—Conjoint applications by Protestant and Roman Catholic clergy from 1832 to 1838. Would not be surprised to hear of early applications for, or of considerable number of, Presbyterian vested schools, or of conjoint application of parish priest and Presbyterian minister. There are now only sixty-eight vested Presbyterian schools in Ireland, and Presbyterians are eleven per cent. of pupils in schools, 12540-12560.

Readiness of Presbyterians to employ Roman Catholic teachers was to use them as proselytizing agents. Regarding evidence given by Mr. M'Creedy in 1854, showing that mixed system allayed feelings of irritation among the people, causing Roman Catholics and ultra-Protestants to work harmoniously together, and that Presbyterians readily employed Roman Catholic teachers, &c., witness was much surprised when he read it, but as to the latter, considers they were employed as decoy ducks to get Catholic children to read Authorized Version. This has nothing to do with previous answer that he never heard of an instance of proselytism. Is absolutely certain that Episcopalians and Presbyterians used Roman Catholics for proselytizing purposes, some accepting the employment unconsciously, and some being very poor, 12561-12574.

Mixed education in Ireland is quite impracticable, and has wholly, hopelessly failed; Roman Catholic clergy disapprove of it. They never change their opinion that Catholics ought to be taught by Catholics. In giving evidence in 1854 that National system was working well in providing united instruction for children of labouring poor, and that all that could be reasonably expected had been realised, merely spoke of it as it was carried out. Explanation of evidence of same date as to recommending Board to withdraw from connexion with South Dublin Union school on account of Guardians carrying it on on sectarian principles, 12575–12585.

Statutes of Synod of Thurles inoperative at first, but have produced serious effects since. Catholics should be taught by Catholics. The highest religious instruction may be given in some schools connected with Board. High opinions expressed in 1850 of successful working of Clonmel school,—that "education, united both as to creeds and classes, has been tried, watched," &c., and gained public confidence,—referred to that one school; the boast is not in the principle of the model schools, or the justice of the administration, but that under difficult circumstances the joint management of four clergymen had been secured. Changed opinion on subject in 1856 or 1857, when religious contentions commenced among staff and pupils. As to favourable opinions recorded since, 12586–12617.

Visited so many schools recently in order to ascertain actual condition, and to obtain overthrow of National system, or such a modification as Catholics could accept. Reasons for advising withdrawal of all Catholic children, teachers, &c., from schools under Board. Sympathies will be with them whenever they carry on the work fairly. Does not approve of model schools being continued by Commissioners; when opinion on this subject changed. Former favourable opinions justified when expressed. Always gave official opinion candidly as to necessity for establishment of any model school, 12618–12639.—Approved Trim model school when connected with it, and publicly expressed a wish that members of Lords' Committee in 1854 could visit it; it was an excellent and well-managed school, and the parish priest regularly gave instruction in it. Has no doubt *The Tablet* at that time spoke of his high opinion of model schools in general, and that at Trim in particular, 12640–12646.

Favourable account of National system in a paper read before British Association in 1857, was his statement of the broad statistics of primary education, and a summary of programme of course of instruction; has nothing of it to modify. Being brought under notice of Commissioners, they publicly complained of it as an unauthorized proceeding. Witness immediately forwarded it to them, and heard no more of it until it was included in an indictment, details of which are too trivial to go into; it was one of the things

that led to his final disagreement and retirement from Board, 12648–12651.

The "alarming circumstance of bishops not coinciding with members of Board," spoken of in witness's book, referred to projected model school at Sligo, which bishops objected to, but which was unopposed by some of the Catholic Commissioners; witness, to prevent its erection, employed the natural expedient of emptying the Galway model school; was not at that time opposed to all these institutions; was never consulted about the Sligo one. Is proud of a letter written in 1856, suggesting inquiries of people of Sligo and other places whether they desired model schools; approved of their being extended to town populations if desired and required; some of them gave a great impetus to secular education. Knew of no instances of proselytism, or of interference with freedom of conscience, in the south; main seat of the latter is the Presbyterian patch of Ireland. Can speak favourably of some schools in Ulster, 12652–12672.

One teacher cannot efficiently manage more than an average attendance of forty children, but much depends on age and classification. Observation in 1849 on evil of multiplication of small schools, and that in large ones teachers were not properly paid, 12672–12677. —From 1831 to 1839 teachers were paid wholly by capitation, 12678–12681.—Grievance that convent schools were not on same system of payment as others; classified lay teachers in them could not receive class salary as such, because nuns did not submit to rules of classification. While salaries have trebled or quadrupled from 1839 to 1868 in female lay schools, there has been hardly any improvement in convent schools. Return showing that annual cost per child in a convent school is 7*s.* 2*d.*, and in a model school 36*s.* Further complaints as to payments to convent schools, 12682–12687.

Further Examination.

Respecting statement (in answer to questions 12103–12107) that Presbyterian clergymen disobey rule of Board as to excluding children of a different faith during religious instruction, reiterates his view of the conversation with Rev. L. E. Berkeley, viz., that in answer to his question, "Of course you do not observe the new rule of putting out the children?" that gentleman replied, "Of course not at all; the children are not put out;" "the rule does not work at all," &c. There could be no mistake, 13918, 13919.—It might be that he meant they were not put out because parents assented to their staying, 13920, 13921.—On whichever side the misunderstanding is, the subject was the new rule, and how it worked; witness said, "the Presbyterians do not observe it, because they did not intend to observe it;" and this is nonsense if the other part was not intended, 13922.

After hearing Mr. Berkeley's evidence read, witness considers it supports his recollection, save in one particular. Repeats identical words; never stated that Mr. Berkeley said all the Presbyterians disregarded rule, or that he knew it personally, but that it was his belief that many disregarded it, 13923, 13924.—Neither honesty nor integrity of Presbyterians was impugned. Mr. Berkeley's remark was in reference to witness's statement of their non-observance of the rule; he did not seem surprised at the statement. Had no special object in introducing himself to Mr. Berkeley, 13925–13939.—Sense in which Mr Berkeley is a "hostile" witness, 13940, 13941.—Witness is certain Presbyterians never meant to observe rule; cannot give a case; will give 18,000; would not observe it himself; reasons; would do his best to get it altered, 13942–13948.—Presbyterian as well as other managers have to answer quarterly the questions whether rules have been observed, 13949–13951.

Further Examination.

Produces and reads letter previously referred to (Q. 12,665), addressed by himself to Board in 1856, remonstrating against establishment of a model school at Enniscorthy, for reasons given, stating that the first intimation he received of it was a notice that its erection was about to commence, and suggesting inquiries of people of Sligo and other places as to whether they desired establishment of model schools, 19326, 19327.—When previously examined, had looked most carefully and found he had not a copy of letter by him; had no clue to show what letter was referred to. States how he has since obtained a copy, 19393–19399. —Complains that the suppressed portion of one of his reports, and other documents addressed by himself to Board, have been produced before this Commission in an informal manner, 19328.

James William Kavanagh, esq.

Original rule of Board for protection of minorities was positive exclusion during adverse religious instruction; creed registers not introduced till 1856; a strong objection was previously raised to them by six out of seven of the original Commissioners. Creed return was moved for in the House of Commons by Mr. H. Grattan; one had been previously moved for in the Lords. Enumeration of the various other Parliamentary returns, 19329–19341.

It was originally intended that attendance at Sunday school and divine service should be recorded, but Protestants refused. Creed register, drawn up by witness, was introduced under instructions from Government. Changes in 1833 and 1837, making more definite the time for religious instruction, and allowing it to break the secular teaching once a day; the latter at the instance of the Presbyterians, 19342–19345.—In 1850 the tablet "Religious Instruction" was introduced in consequence of complaints made by Roman Catholics of proselytizing practices. Decree of Council of Thurles on this subject, and tolerating but not approving mixed education, 19346–19351.

Notice system introduced in 1855, but opposed by Presbyterians, especially as to children already in schools; modification in 1856, restricting it to new scholars, 19352–19359.—Operation of rule in its modified form. Portion of report of Head-Inspector Keenan in 1856, stating that rules failed to protect minorities, was struck out, but was subsequently ordered by Parliament. Board did not accompany change with any statement that they thought no evil would result. Quotation from their Report of 1859, stating their efforts to maintain rule, 19360–19362.—Witness replied to this by drafting notice of motion for the O'Reilly Returns, results in which were obtained from patrons and teachers through Commissioners. Will leave this Commission and the public to compare the two statements. Puts in "Analytic Summary of the 'O'Reilly Returns, 1862,'" and table headed "Proselytizing Practices,—The *Notice* System," 19363, 19364.

Effect of O'Reilly Returns was that Government desired Board to return to old rule; they therefore (in May, 1866) passed present rule, strictly prohibiting presence of children during adverse religious teaching; Presbyterians protested against this, and a rider was added almost nullifying rule. Commissioners reluctantly agreed to this, and notified to Lord Lieutenant that they might feel bound to reconsider the matter, 19365–19375.—Being consulted by Catholic bishops, witness told them that rider would negative rule, and that children were entitled to at least same protection as paupers or delinquents in reformatories; published a letter to same effect, 19376–19378.

Believing rule was not observed, has visited about 300 schools of all denominations in the north-east of Ireland since last examination; this—the Plantation District—being where Catholics most need protection, 19379–19383.—Gives in copy of Certificate Book of Religious Instruction framed under proviso of new rule of 1866. National Board issued with it a very fair explanatory minute, detailing method by which general principle of Board—that no child shall receive religious instruction contrary to wishes of parent—shall be carried out, 19384–19387.—Between 1847 and 1866 it was understood that children need not be expelled during adverse religious teaching. Previous to 1847 everyone understood the contrary, and acted upon it. Distinctly contradicts statements that from 1840

James William Kavanagh, esq.

to 1866 it devolved upon parent to withdraw child, nor subsequently to 1840, until 1848, 19388–19392, 19400, 19401.—Quotation from report of Commissioners for 1847 on above subject (as to compulsory absence of children, &c.), which witness considers proves statements just made; the Board meant the rule to bear a prospective, not a retrospective, interpretation, 19402–19408.—Will not give a personal opinion as to rule outside the facts, 19409–19412.—As a then officer of Board, is sure it was intended to prevent children being present. It certainly was not meant to allow them to be present and not compelled to receive instruction. When Presbyterians joined Board in 1840 they were warned that no change would be made in rule. The Temple Meeting-house letter of 1833 was reproduced, showing that Board were not indifferent whether minority remained, that it was of the essence of the rules that they should be excluded, 19413–19418.—As to meaning of enactment regarding children in workhouse schools, and analogy to point under discussion. Interpretation of non-compulsion in one case and non-exclusion in the other is in opposition to principles of Board; in their Report of 1837 they state that "no child shall be required to be present" at any religious instruction disapproved of by his parents, &c.; meaning of this, 19419–19434.

Referring to the Correen case, the Commissioners say "the school is conducted by a committee chosen by the parents; the time for religious instruction is so arranged as not to interfere with secular instruction; no children are required to be present whose parents object, . . . but are permitted to absent themselves," &c.; in the Temple Meeting-house schools "no children shall be required to attend or be present" at religious teaching whose parents object, but are allowed to absent themselves on Saturday to receive religious instruction elsewhere. Preceding supports witness's views, 19435–19449.—Expressions—"no child shall be compelled to attend or be present," "no child shall thereby be excluded from other advantages which school affords," "times for reading Scriptures, &c., are so arranged as not to impede other instruction, . . . no child whose parents object is required to be present or take part," &c.—are part of the larger truth that no child shall be permitted to be present, 19450–19457. Similar expressions in leases are not incompatible with obligation to exclude them, 19458–19461.

Referring to Commissioners' Report for 1836, query as to time set apart for religious instruction, &c., does not prove that it was the parents who were left to withhold children; there are obvious civil rights of the parents quite compatible with patrons' duty to remove children. Query (quoted) finally settles the question up to 1839 that patrons were bound to exclude minorities; no distinction between vested and non-vested schools as to exclusion, 19462–19479.—Can produce cases of patrons of non-vested schools being required to put children out, 19480.—Maintains that in both vested and non-vested schools patrons were bound "to take care" that children of non-consenting parents were not present, "parents are at liberty to withhold" children, &c., conveys the same, though not so fully expressed, 19481–19487.

Synod of Ulster in one sense entered into relationship with Board prior to 1840, but did not join, 19488–19496.—Dr. Henry, senior Commissioner of National Education, stated before Committee of House of Lords in 1854, that while no child should be compelled to receive religious instruction which parent objected to, neither himself nor Dr. Murray could be a party to compel him to retire; the onus must be thrown upon the parent; but this evidence is wholly inaccurate,—Dr. Murray and Dr. Henry were parties to the rule compelling retirement. Agrees with Dr. Henry, that system was loose and undefined, and led to abuse. Sees no real difference in distinction drawn by Presbyterians between "active" and "passive" toleration, 19497–19505.

Government in 1840 imposed a change on Board seriously affecting Roman Catholics, but this produced such an outcry that original rule was reverted to. Rule of 1847, permitting proselytizing, was at the instance of Anglicans; in 1866, from proofs of abuse given in the O'Reilly Returns, Government pressure brought about a step back towards the original principle, 19506–19516.—Educational grant should be administered under a code sanctioned by Parliament, 19517–19520.

Is before this Commission to prove that from foundation of National system to November, 1847, there was no second opinion as to patrons being *compelled to exclude* any child from religious instruction not approved by its parents. In proof, quotes Commissioners' answer to the Four Propositions of the Synod of Ulster in 1833, Temple Meeting-house case, evidence of Right Hon. A. Blake and Rev. Mr. Carlile in 1837, practice of Inspectors, &c. Refusal of Presbyterians to join till 1840 was not on account of rule to exclude. Same rule was applied to Protestant minorities in the south. It was intended that every child should get literary instruction, protection against adverse religious instruction, and facilities for getting his own religious instruction from his pastors; the latter two were taken away between 1847 and 1866, 19521–19532.

Controversy between Archdeacon Stopford and Board from 1844 to 1847, leading to decision in his favour in the latter year, was as to discrepancy between trust deed and rules—the first being fixed and the other changing—and as to rule that "no child be compelled to receive or be present at," &c., which he got altered to "be compelled to receive or *to* be present at," 19533–19539.—Reasons which may account for Board not correcting erroneous views of their rules held for years by leaders of Presbyterian body. Witness has had most intimate relations with framers of and those most conversant with rules; their statements more likely to express opinion of Board than those of Dr. Henry and Dr. Cooke. Board did not investigate soundness of latter's opinions till forced by Parliament. When in 1859 Board stated that rules afforded sufficient protection, witness drafted terms of O'Reilly Returns; production of these (in 1865) was "the death-knell of mixed education in Ireland," 19540–19548.

Causes keeping Presbyterians from joining Board previous to 1840; condition of excluding Catholic children was attached to concession. No official document of Board from 1840 to 1847 incompatible with Temple Meeting-house letter; maintains that a change was made when Presbyterians joined, though Dr. Murray, Dr. Wilson, Mr. Blake, and other Commissioners stated that none was proposed or hinted at; refers to 8th Report and rule introduced in 1843 in proof; the junction of the Presbyterians after such a protracted warfare is in itself a sufficient proof. Official account of what took place between some of the Commissioners and a deputation from the Synod of Ulster, and minute that "practice as to religious instruction is in substance similar to that in many Catholic schools" does not alter witness's opinion. Interview referred to was not with "the Commissioners," but between a deputation from Synod of Ulster and three of the Commissioners, before the Lord Lieutenant at Dublin Castle. Nothing in minute inconsistent with statement that rules were afterwards changed, 19549–19563.

Earl Grey found nothing in four propositions of Synod of Ulster (1833) incompatible with system, but Presbyterians did not join till 1840, and in the interim they held monster meetings and took violent proceedings against the system. Quotations in support of the latter statement, from evidence given before Commons' Select Committee in 1837 by the late Professor Sullivan, 19564–19569.—Cannot explain why Board took no action for eight or nine years after Presbyterians had stated on oath that they misunderstood and habitually violated rule, but gives reasons for thinking Board were not to blame. Presbyterian violence above referred to is quoted to show that they were

not in agreement with Board at the time. The first meeting was chiefly of Orangemen, but after that it was taken up by the Presbyterians; the violence was not to be attributed to their clergy as a body, only to masses of people led on by individual clergymen, 19570–19584.

Further Examination.

Puts in an analysis by provinces of number of schools, number on roll, average attendance, grants, salaries, &c., for one year, drawn from Report of National Board for 1866. Also copy of the O'Reilly Return of 1864, with average State grants per pupil added, 22226–22231.—Puts in also a return of grants, salaries, &c., to model schools in 1862, with average cost per pupil in each and in ordinary schools, under the various classes of teachers, also in convent schools, compiled from a Parliamentary Paper of 1864, with a short table drawn up by himself, to make items more intelligible. Puts in, lastly, table (taken from Table II. of Grogan's Return) of grants to convent schools under heads of capitation, premiums, and gratuities, industrial instruction, paid monitors, and total, for 1860 to 1863, showing that more than half the grants are not received by the nuns. Strong objection to Board appointing the paid monitors in convent schools, 22232.

Supplements answers to Q. 12484 to 12495, by reading extracts from Dr. Doyle's "Life and Works," to show that he was not favourable to mixed education, and that he considered religious instruction must be the basis of education; these opinions were expressed about 1825, some years before establishment of National Board, 22233–22241.—Dr. Doyle so far approved National system as to direct his clergy to place their schools under Board, saying that if the experiment proved unfavourable they could withdraw again; he never approved of Board's model schools, he approved of a model school as projected when National system was established (*see* Q. 12290), 22242–22250.—No inconsistency between present statements and views expressed in a Report on Clonmel Model School in 1851 (quoted), saying that first attacks on National system were made by Bishop of Exeter soon after its promulgation, and that Dr. Doyle considered rule requiring that all teachers should have been at a model school, would greatly aid education, &c. Never meant that Dr. Doyle approved of model schools and united education while the Bishop of Exeter opposed them, 22251–22263.—A formidable Catholic opposition was forming in 1854. Repeats and explains various statements as to model schools, &c., from above Report, part of which was suppressed by Board; requests that Report, which is now before Commission in full, may be all read. This was another instance of mutilation of reports by Board. [*The complete Report will be found in No.* 16 *of Appendix to Evidence.*] 22264–22286.

Visited a Presbyterian school in Portadown on 8th September, 1868, and found that rule directing children to be put out during adverse religious teaching was infringed; one or two of the Catholic children came in and out during Presbyterian teaching; believes teacher had no wrong intention, said it could not be avoided; it was a very mild violation of rule; they were merely moving about the room, and were not receiving any of the instruction, but they were not *put out*, and the others (forty-three Roman Catholics out of a total of 391) were similarly exposed. Entered name and date in visitors' book, but did not consider it his duty to interfere further. Name of school is Edenderry, 22287–22317.

On same day visited Presbyterian school in Lurgan, containing sixteen Roman Catholics out of a total of 117, and found serious violation of rule. The parents are canvassed to sign Certificate Book, which is improper. Three Roman Catholics were present whilst religious instruction was going on; this was no violation, had not parents been asked to sign the book, but this had been done by direction of patron. Up to two years ago it was a ragged school, and children were fed and clothed, but now, from want of funds, they only get clothes at half price, and bread. Parents are asked, "Do you wish to have *all* the advantages? if so, sign your name?" if they cannot, teacher signs for them. In the worst days of proselytising never met with a worse case. Discussion as to expression "canvassing" the parents, and as to when mothers are eligible to sign. Foregoing proves it is only going from notice system to something worse. Parents should not be asked at all—the creed register should settle the question. There were certificates for fifteen children on the book. Cannot say inducements have not increased attendance, because only three happened to be present that day. Went into the school accidentally. Food, &c., were given to all, but in the case of the Catholics it was to induce them to falsify their religion. Clothes are given in convent schools, but only to Catholics. Children should be assisted irrespective of creed, but not so as to induce them to join in religious instruction in which they do not believe, 22318–22371, 22381.—Would say the same to a Catholic if found doing the same thing. Knows nothing of antecedents of school named; had no communication with Inspector, 22372–22380.—Roman Catholics would act in the same way; case cited, 22382.—Reiteration of opinion that the "canvassing" misled parents; that every Catholic name was obtained through misunderstanding, bribe, trick, or deceit. Teacher stated that she followed precedent in asking for signatures, and that she was directed to send for parents by the patron, not by the Inspector. Acknowledges that when new rule was introduced all the parents were applied to, but considers this the opposite of honestly carrying it out; teacher should have been silent on the subject, 22382–22407.

James William Kavanagh, esq.

The two preceding were not selected instances; can give numbers of similar cases, 22408–22413. Visited Fountain-street schools, Belfast, on 9th September; of 317 on roll, eight are Catholics; these are allowed to go in and out during Protestant religious teaching, though it did not occur in witness's presence. Catholic clergy are grossly insulted if they attempt to visit this school, 22414–22421. Was engaged in these visitations in Ulster from 7th September to 3rd October, whenever the schools were open, sometimes even on Sundays; religious instruction is generally at commencement of business in Protestant schools, and at close in Catholic schools; in ten or twelve there is no religious instruction. Did not visit above five per cent. during religious instruction, visited or made inquiries as to about 300 schools in all; particulars of time spent in model schools at Londonderry, Newtownards, and Belfast. In speaking of visiting a school, means a department, 22422–22469. Infraction of rules in Nelson-street school by absence of Certificate book, by one Roman Catholic improperly receiving religious instruction, and by two Protestants not Presbyterians learning the Shorter Catechism. Quotes rule violated. Patron of school is Dr. Knox, the teacher a Presbyterian. As to whether teaching Shorter Catechism as above is an infraction of rule, the teacher told him the Roman Catholic child was receiving instruction without authority from parent, that he had had no communication with him. Paper quoted is a circular minute, more important perhaps than a rule. Cannot say how long Roman Catholic child had been in school; the teacher was appointed in August, 1868, 22470–22507.

Ballymacarret school has 243 pupils, of whom six are Roman Catholics; some of these are allowed to be present during religious teaching, and there are no entries in Certificate Book, though Head Inspector had recently visited school, and it is his especial business to see that District Inspector does his duty; both are Catholics. Preceding shows inspection to be so inefficient as not to afford protection to minorities, 22508–22523. In New Road school there are four Catholics, and in Killaghey school, one; all remain during religious instruction, contrary to rule. In the latter case there had been a certificate by the mother, which the Inspector cancelled. As to whether certi-

James William Kavanagh, esq.

ficate by mother is sufficient, if father is living, and as to Inspector's power of cancelling it. The teacher admitted that he had solicited the certificate of the parent, and of the parents of three others who had been in the school. No Catholic school within reach, 22524-22554.

Visited Donaghadee No. 3 school on 25th September. Found a certificate purporting to be signed by the mother of a girl desiring that she might read Authorized Version, which certificate had really been forged by the teacher. Observing signature to be like the teacher's handwriting, asked him if mother signed it; he said "yes." He then went to the mother, who said she could not write. She accompanied him back to the school, where the teacher admitted the fraud. He then made a note of the circumstance in the book, and brought a transcript away, which he will produce. Head Inspector was there the day before, and failed to discover in three hours what he discovered in five minutes, and so failed to protect minority. The father of the child had directed the mother to keep her away till after Bible reading, but the teacher persuaded her to send her, 22555-22562, 22570-22581. Made these visits to north of Ireland on his own account, but bishops sympathized with his mission, 22563-22569. Other cases where certificates were made out in anticipation, but parents refused to sign, 22582-22584.

In Broughshane school, of 101 boys, eleven were Catholics; the late Inspector told the teacher to call on parents to obtain signatures, but they all refused; the teacher told the patron, who directed him not to heed it, that he thought rule would be altered *by the General Assembly*, or through its influence, and all the eleven attended the religious instruction; so that patron, Inspector, and teacher were all concerned in making the rule a nullity, 22585-22604, 22615. Visited school as a private person, not as a Commissioner or Assistant Commissioner; was accompanied by parish priest of Ballymena. Cannot explain an affidavit by teacher stating that he represented himself to be a Commissioner or as deputed by them, and that school time was lost in consequence; it is an absurdity; said explicitly that he was examining working of schools to bring it before Commission. Never met this teacher while an Inspector under National Board; might have been seen by him in Dublin. Might have told him that he ought to take Roman Catholic children by the neck and put them out, 22605-22626. Inspector never inquired for Certificate Book; would not take it without teacher's knowledge; teacher broke rule in not submitting it, 22627-22633. Is quite indifferent to indignation of teachers regarding his charge of canvassing. As to registering creed. Did not seek any explanation. Having heard read a letter from patron—indignantly repudiating insinuations as to attempting to kidnap pupils, stating that he performed his duties faithfully, that children are put out if desired by parents, that mixed education works most beneficially, and showing necessity for visits to parents in consequence of changing to new rule—considers it makes the case worse, and is contrary to the truth, and controverts opinion as to benefit of mixed education, 22634-22645.

Parish priest was present on visit to Carreen, and asked for Inspector's observation book; teacher objected to produce it. Carefully avoided violating rules of Board. At Portadown heard Bible class on invitation of teacher, who also gave permission to proceed with inquiries; teacher well knew he was a Catholic. Does not believe either teacher was threatend for not producing Inspector's Observation Book, 22646-22659. Never made any charge publicly in schools; stated quietly to teachers where he found infraction of rule that he should report it. Has never used the term "kidnapping." Found a blank certificate at Correen signed by parent, that might have been filled up with anything, 22660-22666. Explanation of this circumstance, 22676-22684. Concurs entirely with sentiments contained in a letter (read) from a respectable schoolmaster near Ballymena as to evil effects of mixed education system in model schools, 22667-22669. District of Correen is chiefly Presbyterian; not a good place for mixed education. Secular instruction of minorities, 22671-22675. Deplorable condition of Correen school-house; Inspector has recently reported on it, 22688-22691.

Referring to teacher's objection to get Observation Book, Rev. Mr. Lynch (the parish priest) made a request; she went for it, but did not bring it. Did not speak roughly to her; pitied her wretched condition. Mr. Lynch interrupted school to extent of asking children as to supply of books, and teacher remonstrated; she has £23 1*s.* 3*d.* a year, and has a night school; her qualifications are of the humblest kind. Mr. Lynch was accustomed to visit there, 22685-22703. Mr. Lynch's schools at Ballymena, &c. Excellent Presbyterian schools also; mixed education is fast disappearing. Of mixed schools in the sense of different Protestant denominations, there are eight out of the thirteen. A few Catholics are in some of the Protestant schools. Surprise of Mr. Lynch at finding some attending Broughshane school, 22704-22722. Considers many such attend under some kind of compulsion. Other causes. Cannot speak as to Mr. Lynch's ignorance of the existence of some Roman Catholics and of their residences in places where they visited, 22723-22732.

Further Examination.

Case of a Presbyterian mother of seven children, having Catholic father, improperly authorizing them to receive Protestant instruction, and argument to show that wherever there is a father, he only is ordinarily competent to give certificate. This occurred in Charlotte-street school, Belfast, which witness visited on 11th September; quotation from rules of National Board (originally drawn up by himself) directing that wherever possible father should take child for admission and register creed; teacher need not object to mother, if family known to be of one denomination, but she cannot decide religion of child during father's life, 22879-22895.—Case of a Catholic father being "trapped" by allowing child to be taught "the Spelling Book, *or* the Authorized Version;" fathers being often unable to go proves necessity of rules being rigidly enforced; instructions imply that teachers should ascertain cases of mixed marriage; it is done in every model school; if necessary, he should inquire at the home; this would not be canvassing, 22896-22914.

In some mixed schools in Belfast found that most of the Roman Catholic children were attending religious instruction without certificates; master, a very young man recently come, stated that Inspector urged him to look up certificates from parents; the mistress, among other reasons, gave the great immorality of the neighbourhood; wholly disapproves of advice given by Inspector, 22915-22921.—In St. Anne's, Belfast (till lately a Church Education school), seven Catholics were receiving adverse religious instruction, five without certificates, the others with certificates obtained by canvassing, 22922-22928.—Found at Catholic school in Stranorlar that there was no certificate book; particulars of one case in Dublin of a Protestant child being taught Roman Catholic catechism and prayers against wish of father; this is the only instance of the kind he has found, 22929-22932. —Instances cited are only samples taken from a large number; case of a school where all the children are receiving Protestant instruction, and the certificate book is without an entry, 22933.

Further Examination.

Regarding letter spoken of in Q. 12665, and again in Q. 19326, considers it was dishonourable in relation to parties who supplied it to Commissioner. Also considers anyone who heard the portions read would suppose that they were read to make witness appear to recommend model schools, whereas it was in discouragement of one, and a recommendation to try whether desired in other places. Repeats that he could not at first identify the letter, that he did not know for days

afterwards to what subject it referred. Repeats that opinions expressed in that letter are what he has always held. Cannot see anything conflicting between answers given in July and in November as to discovery of letter, 23341–23357.

Still contradicts statement that Presbyterians' understanding from 1840 to 1866 was that parent must withdraw child from religious instruction of which he disapproved, &c. It was on result of Correen case in January, 1840, that Presbyterians joined as a body. Reads application to Board in this case, stating that "no child whose parents or guardians object is to be present or take part" in religious exercises, &c. Decision on this application was the model for future cases; the application has been called the "model application," 23358–23370.—From this time query sheet was sent to inspector and not to patron, staff being increased, but not as a consequence of this case. Value of Dr. Cooke's evidence. Synod of Ulster at this time bound themselves to exclude children. Contradicts statement of Dr. Cooke that school committees followed regulations agreeably to Synod's four propositions, and are bound by them alone. Never has been any conflict between third proposition, and that of Board including it, 23371–23382.

Statements to prove that Board did not tamper with this question till 1847. Rule of Board in 1838 was clearly to exclude; then came the Correen case and the junction of the Presbyterians, on which Commissioners say "no children are required to be present at," &c., and that this agrees in substance with regulations of Temple Meeting-house school, letter on which they quote, which cannot be said to agree with proposal in Correen application; latter must be taken as binding applicants only, but in decision Commissioners say they entertain same views as in 1833, when they told Temple Meeting-house patrons emphatically that minorities must be excluded. Presbyterians joined in face of this, and if applicants say they did not go in under that rule, they stand convicted of breaking faith with Presbyterian body, 23383–23388.—Expression "that no child be compelled to receive or be present at religious instruction" existed in 1843, and was continued up to January, 1848. In December, 1844, Archdeacon Stopford asked for an interpretation, saying if it implied putting child out he would not submit to it, but Board would not give it. Prelates, clergy, &c., of Irish Church, then petitioned Premier for aid to Church Education schools. Quotation from petition (which was signed by 60,000 persons) to show that obligation on patrons to exclude minority was quite understood. Prayer of petition was rejected, as Government would not say patrons were not bound to put children out. Account by Archdeacon Stopford of the change he succeeded in effecting in 1847, "We cannot carry into effect the parents' prohibition," &c., 23389, 23390.

In the Correen application Board considered there was nothing incompatible with their principles, as here, as well as in the Temple Meeting-house case, children were at liberty to withdraw, but they say further, as in each instance, that the children must be put out; quotation from evidence of Mr. Commissioner Blake in 1837 in support of this statement, 23391, 23392.—Wishes to prove continuous identity of views and rule up to 1848; words "no child be compelled," &c., not altered till that year; does not say rules were not changed, but that above prohibition was unaltered; repeats that from 1831 to 1847 obligation to exclude was not relaxed; ambiguity in 1843 arose from looseness of style, and was not detected till Archdeacon Stopford drew attention to it; Board reluctantly admitted change of interpretation after three years' controversy; rule stared Presbyterians in the face in 1840, though they might not have seen it, 23393–23395.—No doubt among officials as to rule between 1840 and 1847, notwithstanding statements in Dr. Henry's evidence, 23396–23398.

However Presbyterians might have construed statement of Lord Lieutenant to Synod of Ulster in 1840, witness considers it supports views he has already expressed; words of rule are included in statement which was made under advice of Commissioners; further observations to same effect, and quotation from Archdeacon Stopford's application as to the two constructions of rule "that no child be compelled," &c., with letter from Board in 1845 giving final decision, 23399, 23400.—Reads quotation from the Archdeacon's evidence given in 1854, which bears out the statement that he considered the rule had been changed, 23401, 23402.—Board expressed surprise that rule should be considered capable of two interpretations, they held that child must be removed unless parent had expressly assented; reads Board's explanation of rule (in Report for 1849) "that no child be compelled to receive or be present at," &c., "that though all that is required . . . is that patron should not compel any child to be present," &c., 23403–23411.—Though they gave interpretation to be that no child be compelled *to be* present at, they allowed Archdeacon Stopford and the 60,000 petitioners to remain under delusion till 1847; their interpretation has not been uniform; object in 1847 was to facilitate proselytizing; the meaning of the words had not altered, 23412–23415. James William Kavanagh, esq.

Answer to Dr. Henry's statement as to non-compulsion; Mr. Blake was not in Ireland when change was made, 23416–23418.—"Directed" in proviso that only such children as are *directed* by parents to attend be allowed to continue in the school, means that others must be put out; Dr. Stewart's application of this could not bind Board; they told him that it was "of the essence of the rules that they should previously retire;" report clearly implies that this communication was sent; witness assumes they sent him a copy of Temple Meeting-house Letter, 23419–23427.—As to whether "directed" is explained by Dr. Stewart, when he says, "no child whose parents or guardians object is required to be present," and by certain statement of Commissioners, 23428–23435.—Object of rule as to religious instruction is to give same security as forty-ninth section of Poor Law Act gives, that no child be compelled to receive or *be present* at religious instruction different from creed of parents; distinction between "receive" and "be present at," &c., dates from 1833; words "compelled to receive or be present at" first occur in Poor Law Act; the three Presbyterian Commissioners protested against thorough alteration of rule in 1866, 23436–23446.

Explanation of a previous answer as to private instructions from Government to Board in 1854 to make a creed return, 23447, 23448.—Up to 1843 no distinction as to religious instruction in vested and non-vested schools; quotation from evidence of Rev. Mr. Carlile (a late resident paid Commissioner, &c.), in 1837 as to monks' and nuns' schools; it merely implies that patrons of vested and non-vested schools must afford a convenient time and place *in the room* for separate religious instruction, 23449–23454.—Board never acknowledges that any evil follows from change of rules, but they have admitted that O'Reilly returns proved proselytizing to be going on; a resolution was proposed (in 1866) to reconsider rules regarding religious instruction, and was passed in a modified form; the Presbyterian members objecting, a proviso was afterwards added which has the effect of completely frustrating the intended action of the rule, 23455–23460.

Between 1831 and 1840, joint applications from parties of different denominations were looked upon with great favour; preference was given up, in 1839, in deference to Presbyterians, who considered it a bar to them, as they objected to connect themselves with others, especially Roman Catholics, 23461–23466.—Mr. Cross stated, before Lords' Select Committee, in 1854, that alteration had placed schools more under management of individuals of separate creeds; also that, previous to 1840, joint applications had the preference to those from one denomination. Produces a tabular summary given in by Mr. Cross at that time, giving classification of all the schools according to

James William Kavanagh, esq.

creed of patrons, showing that few were under joint management, and those, Mr. Cross added, gave more trouble than any others, 23467–23470.—Supplements this by reading a statement for 1862, giving results under four categories, viz., Joint Patrons, Joint Teachers, Joint Pupils, and Joint Religious Instruction, which shows that "no pretence of mixed education remains," 23471.—As it takes three on roll to give average attendance of one, the ones and twos must be rejected. A second religious instruction might be expected wherever there are two denominations, but it is hardly to be found apart from official schools, 23472–23475.—Gives in an analysis of 6,382 schools, grouped in five categories of mixed and unmixed schools, compiled from Report of National Board for 1867, showing number of schools in operation, creed of teachers, number and creed of pupils on the rolls, &c., 23476–23478.

No possible defence for applying restrictions of mixed system to the great bulk of schools; only 132 mixed really to legislate for, and these chiefly official, 23479.—Inattention of Commissioners to their main business; no real mixed education in Ireland, and where it exists it is an unmixed evil, 23480.—Letter (read) from nineteen of the principal Catholic members of the House of Commons to Mr. Cardwell, in 1860; shows that they believe fundamental rules of system to be changed, and indicates ground of belief, 23481–23483.—At establishment of system, great importance was attached to provision for religious instruction of minority; hardly any instances now of clergy of minority attending to give such instruction; was never much practised. Though privilege to patrons of non-vested schools not much used, it ought not to have been taken away in deference to the Presbyterians, 23484–23491.—From 1832 to 1837, Catholic children could not attend Protestant instruction unless *directed* by parent; rules of Board the only authority on this point. Is astonished that an extract from Lord Stanley's celebrated letter to Presbyterians, in 1833, should be put forward in support of opposite view. Quotations on this point from letter, 23492–23501.

Right Rev. Dr. Keane.

KEANE, Right Rev. Dr., Roman Catholic Bishop of Cloyne.

Diocese is in county Cork, in which there are in round numbers 250 National schools, attended by 39,000 pupils, with an average attendance of 24,000 in the year 1865; there are not many schools with a mixed religious attendance, 15534–15536.—Both the secular and religious instruction in these schools might be improved. The schools are not so numerous as they might be. In working out a scheme of National education there should be a feeling of mutual confidence in promoting impartially the religious and literary instruction of the young. Causes that occurred to disturb such confidence: the requirement that a certain time should be set apart for separate religious teaching by the clergy of the various persuasions, and religious teaching be made a component part of the whole scheme has been departed from; first, in non-vested schools there need not now, according to the rules of 1866, be any religious teaching whatever; secondly, religious instruction is communicated in the different books of the National schools; thirdly, the substitution of parental control in the place of pastoral control over religious instruction, notwithstanding the acknowledgment of such right by Mr. Cardwell; the confidence of the bishops in the mode of conducting the system of National education has therefore been shaken, and the system's progress in a great measure marred. Superiority of the Christian Brothers' books and method of teaching, both secular and religious. There is nothing to prevent the Board from having under its auspices all the schools of the Christian Brothers. Up to 1840 religious instruction was obligatory; then, through the influence of the Presbyterians, it was left discretionary with the patrons, so that in the non-vested schools (about 70 per cent. of the whole) religious instruction is practically denied altogether, 15537, 15538.

There are not in witness's diocese many vested schools, either Catholic or Protestant; there are many non-vested schools under Roman Catholic patrons; the Catholic clergy are supposed to visit them once a week, 15539–15546; they do not in every case so visit them, their time is too much occupied; the Inspectors may complain of it, but they will complain, with or without reason, 15629–15631.

The reasons stated, and others, showing that the whole system is for Ireland in a very unsatisfactory way, have prevented the Roman Catholic clergy from seeking to increase the number of schools. One additional reason is another change that was made in 1847, on the application of Archdeacon Stopford, when exclusion from contrary religious instruction was made optional instead of compulsory, as at first. Let the State develop fairly the intellect (their only fortune) of the rising youth of Ireland, but with religious instruction, Catholics to teach Catholics, Presbyterians to teach Presbyterians, and Protestants, Protestants; the view of the Roman Catholic bishops is to have the ordinary schools, and if possible more especially the model schools, become strictly denominational, in any way practicable; if mixed schools be found necessary in some localities, which is doubtful, let the best arrangements possible be made; the Catholic bishops ask for and will be satisfied with the system already established in England; a return to the original rule would be one way of remedying the present difficulty, but not so good a way as the denominational system would secure for Catholic, Protestant, or Presbyterian; the Roman Catholics were at first the only supporters of the National system; extracts read from letters of English Roman Catholic bishops bearing on the same subject, 15547–15554; 15561; 15678, 15679.

There are several trained teachers in witness's district, but there are non-trained teachers quite as efficient, 15555–15559.

There is no complaint against the National Board of laxity in enforcing the rules against proselytism, 15560.

If these denominational schools be established, under Government control, they should be supported by the State; but if the Christian Brothers' schools and the convent schools be brought within the action of the Board, they would furnish some of the best and most efficient model schools, 15562.

So far as concerns the appointment of teachers, the Roman Catholic bishops are willing to accept the present state of things, because teachers are now appointed and dismissed by the local managers, the schools being all in the hands of the clergy; extract from the answer of the bishops of Ireland to Mr. Cardwell's letter, setting forth that the right of the Roman Catholic Church to teach is recognised; if the difficulty arose of a Catholic lay patron exercising his right in a manner disapproved by the bishops, it would be time enough to meet it when it arose; if a Protestant were appointed schoolmaster to Catholic children, and any tampering with their religious convictions took place, the children would be required to absent themselves from that school; does not admit that such a case is next to impossible to occur; the bishops would not be content to leave in the hands of a Protestant patron the appointment of a Roman Catholic teacher to Roman Catholic children, 15563–15569.

The bishops do not insist on decisive authority with regard to secular books properly so called; but it is hard to find such; believes the National Board's books are valuable as far as the information in them goes; but they are defective, inasmuch as they contain very little about the history of Ireland, although an attempt has been lately made to remedy this defect; the bishops require to have their authority recognised in the acceptance and rejection of books just as it is

recognised in England; their right would be absolute not altogether so much to the introduction as to the expulsion of a book; except that the question would arise as to the preparation of a book, it being impossible that Catholic bishops can have the same confidence in books not prepared by themselves or by persons in whom they trusted, 15570–15577.—The same power of expulsion applies also to the teacher, 15578, 15579.—The same power might be given to the National Board, provided it was not upon religious grounds; if the schools were to be denominational no Board should have the power of expulsion on the question of religious teaching, that does not belong to lay people, 15578–15580.

If a book contained matter dangerous to the State. and a Board appointed by the State objected to that book, the question should be brought before the Catholic bishops, with whom would be the ultimate decision as to the doctrine whether it were Catholic or not, 15581.

Would certainly have denominational Inspectors for denominational schools; religious training should be given without any limitation; literary and religious training cannot be separated; a zealous lay Inspector, Protestant or Presbyterian, will have the power of unpleasantly intermeddling in the schools of those of a different persuasion; instance of a Presbyterian Inspector objecting to the song of "The Angel's Whisper," because of the expression in it "numbering her beads;" his so doing was against the rules, but no rules can check a zealous partizan; from the experience of the past, and in his own opinion, the denominational system would be the far better arrangement for ensuring the confidence and the co-operation of all parties, 15582–15595.—Cannot say whether the song was in a book; does not know the name of the Inspector; is not sure in what district it occurred; read the statement, but does not remember where; is not aware it was ever denied, 15909–15922.

It is essential that the training schools should be strictly denominational, and their whole management under the control of the bishops, 15596, 15597.

In all secular matters the Roman Catholic parent has all the control he is entitled to, but on the religious point the bishops claim an exclusive right to teach; they require the system as established in England; France and Belgium must not be taken as examples, there the lay authority is over the superior, badly, detrimentally exercised; in Prussia and in Austria the denominational system has been established since and in consequence of the revolutionary disturbances in 1848, but the bishops have not yet got back the power and position they ought to have. Now, in Ireland, where the State is beginning to see the importance of gaining the confidence of the bishops, it is time for the latter to assert their rights, 15598–15606.

Witness has looked over all and read several of the Christian Brothers' books; defends the passages in them bearing exclusively on what are called the wrongs of Ireland; as to the studious collection of passages calculated to excite the utmost possible hatred of England in the Christian Brothers' books,—the youth of Ireland have been taught to read, and they read in newspapers the past facts of history in more profusion than in those books; if the Christian Brothers were brought within the sphere of Government action, and made denominational, and if there were then anything objectionable in their books, the bishops will correct it; one of the grievances of Ireland was that the Catholics were not on a level with the English; let them be put on a level with their fellow-subjects and the past will be forgotten in undivided loyalty to the Government; why should Ireland be ignored in a system of National education, 15607–15623; 15639–15641.

It is hard to say to what extent the bishops and clergy have exercised their influence in preventing the spread of disaffection from the reading of inflammatory newspapers, &c.; they have no right of action in such cases beyond that of cautioning their people, 15624, 15625; 15642.

Right Rev. Dr. Keane.

There would be difficulties in localities where the minority is very small, under a denominational system, which the conscience clause would be hardly sufficient to overcome, 15626–15628.

As to the parental right in matters of education recognised by the Catholic Church,—there is a difference between instruction and education; the first means elemental learning, education develops the whole man, including religion; the parent may give any instruction he may please in preparing his son for a profession, but if he is a Catholic he must yield all religious instruction to the Church which derives its authority by delegation not from the parent but from heaven, 15632–15634. The Church claims exclusive right in matters of education, because it is hard to draw a line between the religious and secular elements, 15635–15637; 15680–15682.

It is his duty as a bishop to raise in every way the standard of literary instruction, both in a religious point of view and for the benefit of the scholars; the anxiety of the Church in Ireland in this respect is proved by its exertions made in past years, before the introduction of the National Board, 15638.

It would be well if the Irish clergy were spared the necessity of interfering in politics, but if politics will not let religion alone, religion must act on the defensive. The Catholic religion is still affected by many penal laws; it is therefore the duty of priests and bishops to interfere to return men to Parliament who will endeavour to pass fair laws and repeal bad ones, 15643, 15644.

Witness deprecates the question of the introduction of any measure by which local aid should be called into action in Ireland with regard to schools; he rather contemplates the State coming to the aid of Ireland; Ireland has claims on the English exchequer, which is enriched at the former's expense; but he is anxious to improve the income of the teachers, therefore the pupils ought to pay something, it being found that they are more attentive than when the instruction is altogether gratuitous; objects to local rates; more is often contributed by voluntary labour than would be obtained by a forced rate, both in building and repairing schools; the vested schools under the Board are not in better repair for being so vested; there is too much correspondence, &c., even for the mending of a pane of a glass; would prefer that all repairs, &c. should be done by the State; at present such things are generally managed by the Sunday collections at the gate, 15645–15653.—Prefers the non-vested system, 15793.

Would hear with surprise and regret that there were many non-vested schools in Ireland where the rent was paid and the repairs made by the teachers, without any aid from patrons or parishioners, 15654–15657.

There would be no practical advantage in having local Boards for the purpose of looking after the repairs of schools, either vested or non-vested, the matter could be done better, if funds allowed of it, between the Inspector and the manager; local committees might be of service in aiding the patron to obtain a better attendance, and in exposing the worthlessness of many excuses for non-attendance, but thinks the people in rural districts would have nothing to do with it, 15658–15669.

The question of the payment of teachers ought to be entertained; their salaries should be higher, and provision should be made for their old age; doubts the advisability under the present system of the success of payment by results, the results often do not appear; a young teacher now exerts himself to obtain promotion, but when he gets to be first of first he is often not so efficient a teacher as formerly; the hope of future reward might induce a continuance of his exertions; sees no reason why the State should not accept the present status of teachers under the Board in instituting a system of superannuation; knows of no practical difficulty, in such a case, in securing the rights of patrons and of the State, if a feeling of confidence was established between all concerned, 15670–15677.

Right Rev. Dr. Keane.

Definition attached by the bishops to the word morals, 15684, 15685.

It being impossible to separate secular from religious education, the bishops therefore assert their exclusive right to control education in its entirety; the Catholic bishops in England have it, but in no other country, to the detriment of the State, 15686–15692, 15708.—If the State, supposing such exclusive right acknowledged, should think there was anything of a dangerous tendency in the books used under such a system, it would have a right to ask why such books were used; if it found that its remonstrances were not attended to, it would find its own remedy by closing the purse strings, 15693–15697.—The bishops claim an exclusive right to direct religious education, and over literary education so that it shall not interfere with religious education; they do not claim anything outside these two categories, but of that there is scarcely anything beyond the multiplication table, 15698–15707, 15751–15756.

The parent has the power to get his child educated as he pleases, how he exercises that power he is answerable to God and his conscience; if he is a Catholic he must allow the child to be educated by those who alone have a commission from heaven for that purpose, 15709–15720, and statement at end of examination, p. 693. Conversation between the witness and one of the examiners as to the meaning to be deduced from the expression "go and *teach*," 15721–15738.—With another examiner on the same; reading, writing, and arithmetic may be made to interfere with the spiritual welfare of the children, therefore the Church claims to teach "all things;" there is no need for the State to stand aloof, 15889–15902.

Believes from the expressions of Archbishop Whately, as published by his daughter, that he supported the National system of education because it was one calculated to undermine the faith of Roman Catholics; it is possible he might have meant that the spread of education was calculated to emancipate the mind from a blind obedience to authority, and lead a man to examine for himself the grounds of his religious belief, but he ought to have used other words if that were his sole meaning; as it is, his words have the more offensive signification, 15739–15750.

Does not concur in a statement by a Head Inspector that whatever of mixed education there is existing in the south of Ireland is owing to the action of the Catholic clergy and people; it is owing to the refusal of the Protestant clergy to have anything to do with the Board, because they wanted to have it all in their own hands, and as they were able to get up the Church Education schools, those of the Board necessarily fell into the hands of the Catholic clergy, who would have an objection to any faith but their own being taught in non-vested schools, 15757–15766.

As to the substitution of parental for pastoral authority, as one of the departures from the principle of Lord Stanley's letter, witness cannot give the date; it is only a proof of one of the reasons for the disappointment of Catholics that the whole outline of Lord Stanley's letter was not carried out; and the farther back one goes shows the difficulty of combining the religious bodies in Ireland in a system of education that would be acceptable to all sincere in their religious convictions; up to 1840 religious instruction was obligatory only so far that the heads of denominations should be allowed to go to the school to give it, not that they were obliged to go, 15777–15795.—Witness's impression is that up to 1840 all schools were open to the clergy of all denominations who wished to give religious instruction, according to the letter of Lord Stanley; the change may have taken place sooner, 15796–15801.—In reply to several statements quoted from official documents, including an extract from the minutes of the Commissioners of Education of 13th February, 1840, witness modifies his opinion as to dates and as to the application of the Presbyterians, but not as to the fundamental merits of the question; the letter of Lord Stanley was to the effect that every clergyman should have the right to go in and give religious instruction to his co-religionists; the change was, that in non-vested schools, 70 per cent. of the whole, the patron was to decide what religious instruction, if any, was to be given, 15809–15830.—The change has been unfavourable to Roman Catholic managers, because it has shaken the confidence of the bishops, for this reason, that it militates principally against Roman Catholics, not in the south, where the schools are practically denominational, but in the north, where the proportion of Roman Catholics is said to be 40 per cent.; it has been the universal practice of ministers of the three principal religious bodies not to go into schools under different management from their own persuasion, 15802–15808.

In preferring the denominational system, the inconvenience of small minorities, either of Protestants in the south or of Catholics in the north, must be dealt with in the best way possible, the advantages of the largest number being first considered; there would be difficulties in the case of the Catholic minority in the country districts of the north; in case of a diversity of opinion, a bishop would be bound by the action of the majority, 15831–15841.

Does not know to what extent, or how often, his clergy give religious instruction in the schools; their duties are numerous, and they have to go long distances, but they do so, and do it well, 15842–15849.

Recognises the law by which the father is looked upon as the head of the family; to a certain extent recognises the law as in France, which gives paternal authority as to the education of a child; but if the child, of say, twelve or fourteen years of age, comes to the successors of the apostles, then the right of conscience should override the other right, 15851–15856.

The laity have no rights in the matter of religious instruction, 15857, 15858.

The extent of action the bishops are prepared to grant the State is, finance, inspection, and administration; the State to furnish the sinews of war and each religious body to work the education of its own, 15859–15862.

On the whole the National system is regarded by the Roman Catholic bishops as dangerous to faith and morals, inasmuch as the influences in the schools will change the religious opinions of the children; three cases have occurred even in the South, 15863–15866.

The Examiner reads extracts from Dr. Denvir's evidence before the Lords' Committee, giving a statement of the infinite superiority of the present system over any other which has been carried out, and as to the non-occurrence of any actual case of proselytism in any National school, in Ireland; the witness refers to a complaint by Dr. Denvir, as quoted by Dr. Croke, of Catholic children being refused literary teaching unless they attended Protestant Scripture classes, and asserts that the previously quoted testimony does not disprove that quoted by him, 15870–15881.

The majority of teachers are Roman Catholic; they might not allow any interference with the faith of Catholic children, but a Catholic teacher might interfere with the faith of a Protestant or Presbyterian, and *vice versa;* crime has decreased, and the education, religious instruction, and morality of the people improved of late years; the question is, whether under a denominational system, things would not have been much better still, 15882–15888.

By "the Church" witness understands only the Catholic church; does not recognise the Established Church, the Presbyterian, or any other section, as forming part of the Catholic Church, and his claim is for the section of the Church to which he belongs to control the education of the people, 15889–15894.

Believes the statement to be substantially correct that there is no district in Ireland where there are not Protestant schools accessible to the Protestant minority; the Catholic bishops would be satisfied with a veto on the appointment of teachers or inspectors of Catholic schools, that is, with the system as he understands it to exist in England; does not contemplate any inspection into religious matters, 15923–15930.

KEENAN, PATRICK JOSEPH, Esq.

Chief of Inspection under National Board; was head master of model school, Dublin, District Inspector, and Head Inspector before appointment as Chief of Inspection, 809–814.

Inspectors furnish a weekly "journal," stating amount of work done, &c., to the Chiefs of Inspection, who submit it to the Resident Commissioner in sub-committee, or in important matters to the Board, 772–777, 779–781, 825.—Resident Commissioner is the sub-committee, attended by one of the Chiefs of Inspection or other leading officers, 778, 886.—Trifling matters are disposed of by the Resident Commissioner, and in cases of mere routine by the Chiefs of Inspection; complex cases are disposed of in sub-committee, but cases involving extraordinary action are disposed of by the Board, each decision being recorded, 782–787. Every matter decided in sub-committee comes formally before the Board, 899.

The work of Chiefs of Inspection is of a very varied and extensive character, 788, 789.—Subdivision of work in Secretaries' office, 790–792.—Chiefs of Inspection correspond occasionally with Inspectors, but all communications to the latter from the Board are made through the Secretaries, every document being submitted to the Chief of Inspection, 793–796, 837, 888.

About 600 reports and 400 letters come from the Inspectors to the Chiefs of Inspection weekly, 797–800.—Documents relating to administration of schools, claims for expenses of Inspectors, claims and recommendations for pupil-teachers, &c., go to the Chiefs of Inspection after registry, but they have nothing to do with the actual payment of money, further than certifying the claims before their consideration by the Finance Committee, 801–805.—Chiefs of Inspection are directly responsible to the Secretaries as well as to the Board, 806–809.—They are merely officers of the Board, 815, 816, 889.

Inspectors are directly responsible to the Board, 817.—Supervision of Inspectors by the Office and by Head Inspectors, 819–824.—Chiefs of Inspection examine the weekly "Journal," and note on the document what action should be taken, 826, 827.

Inspectors, as a body, are as punctual and diligent as any body of public men could reasonably be expected to be, and are satisfied with the notice taken by the Board of their recommendations, 1191–1194.—The Inspectors receive their instructions direct from the secretaries, except on local matters, which proceed from the Head Inspectors, 1195–1197.

Inspection of schools by Chiefs of Inspection, 828, 933–935.—Selection of schools entirely at their discretion, except in cases where the Board directs special duty to be done, 829–835.

Arrangement of the sixty school districts, 836–842.—Outline of relations between Chiefs of Inspection and Head Inspectors, 843.—Duties of Head Inspectors, 844, 845, 855.—Chiefs of Inspection very rarely have personal communication with them, except those who reside in Dublin, 846–848.—Head Inspectors send a weekly report to the Head Office, stating work done during the past week, and intimating that proposed for the ensuing week, 849.

Head Inspectors must concur in all cases of promotion of teachers, but not where a teacher is depressed in scale; in the latter the District Inspector would report to the office, and on the Head Inspector's annual visitation would show the District Book, containing a record of the action taken; the Head Inspector must concur in depressions where he is a party to the depression, 850, 851, 857, 865.—Frequently months elapse before the depression of a teacher is brought to the notice of the Head Inspector, but as the punishment is so rarely inflicted no injustice results; the duties of Head Inspectors are so onerous, that if each individual case were reported to him no ordinary man would get through the business, 852–857.

Review of Head Inspector's decision by Chief of Inspection, 858.—Teacher may appeal against decision of Inspector, 859, 860.—Action of Head Inspectors in appeals, 861, 862.

Three reports on a school are made by Inspectors every year, viz., secondary, No. 1, once; secondary, No. 2, twice. These, with such reports as emanate from Head Inspectors, and remonstrances from managers, enable Chiefs of Inspection to judge of the fairness of Inspectors' decisions, 863, 864.

Period of service required for promotion from third to second class, 866.—Existing number of grades necessary with present system of payment, 867, 917.—Examinations for promotion of teachers is conducted by marks, 868.—Maximum number of marks attainable in oral and written examinations, 869, 870.—For promotion to the first or second gradation of the third class a teacher must show satisfactory proficiency in the essential subjects, viz., penmanship, spelling, composition, grammar, geography, lesson books, and arithmetic, together with efficiency as a schoolmaster, 871–873, 943.—The second class is examined in the same branches as the third, with algebra, natural philosophy, logic, and history as additional subjects; the first class examination is the same as the second, but in higher branches of the particular subjects, 874–878.

Masters of the third class must pass through the second before reaching the first; exceptional cases have occurred of teachers going from third to first class, but the practice is very undesirable, and would not now be allowed, 879–881.—The rule which requires a teacher to remain two years in his class would not prevent him being classed in the highest class at the training school, Dublin, an exception having always been made in favour of the training department, 882.—Neither Head nor District Inspectors, nor both conjointly, can promote trained or untrained teachers from third to second class until after the man has served two years probation, 883, 884.

The Inspectors' reports, when sent to the office, are noted by the clerks, who refer to the records which contain a history of the schools reported on, and from them make a short minute for the information of the Chief of Inspection, showing the good side as well as the bad of a teacher, 885.

Action determined upon by Chief Inspector is always adopted by the Board, 890, 891.—In case of depression of a teacher the Head Inspector invariably consults the District Inspector, 892.—Relations between Head and District Inspectors are very amicable, 893.—Depression of class involves diminution of salary, 894, 906, 907.—If on investigation of a case the final decision be favourable to the teacher he would be recouped the loss, 895–898.—A teacher's salary may be diminished through the attendance falling off, but he suffers no depression of rank, 908.

Depression of a teacher is the direct act of the Board on the Inspector's report; the Chief of Inspection submits the report to the Sub-Committee with his opinion; the Sub-Committee act upon that opinion, which is finally approved by the Board, 900–902.

The Board possesses a history of every school in connexion with it, from the time of the first application for a grant, 903–905.

Promotion of pupils from class to class is made by the schoolmaster independently of the Inspector, whose duty it is to see that these promotions are properly made, 909, 910.

Gradation of officers at the Board as it exists at the central office:—The Board, the Secretaries, the Chiefs of Inspection, the Accountant, the Clerks; with reference to the staff exterior to the office: The Board, the Secretaries, the Chiefs of Inspection, the Head Inspectors, the District Inspectors, the Organizers, and the Teachers, 911.

The Head Inspector is the immediate superior to the District Inspector, and is responsible for the efficient inspection by the District Inspectors of the ten districts under his charge, 912–914.—The District Inspectors receive their instructions directly from the office, except in matters calling for the joint action of

Patrick Joseph Keenan, esq.

the Head and District Inspectors; the English system of the Head Inspector receiving all communications never existed in Ireland, 915, 916.

Teachers, whether trained or untrained, are eligible for the first class, the rule which hitherto prevented this having been rescinded, owing to representations of the Catholic bishops and others, 918, 1012–1016.

No actual record of a teacher's depression is kept, but any one acquainted with the official details of a school can ascertain the fact, 919.

The written examination of male teachers is the same, and takes place at the same day and hour, throughout Ireland, lasting for two days; the oral examination is held at a subsequent and varying part of the year, for which one day is sometimes enough, 921, 922, 924–926, 948, 949, 1160.—The written answers are perused by the District Inspector, the value of each answer is set forth in the examination docket, and the whole sent to the Education Office; the papers are then transmitted to the Head Inspector, whose duty it is to revise and consider them before the oral examination, 923.

From an understanding between the Head Inspectors a certain degree of uniformity in the oral examinations has been reached, 1161.—The examinations take place in the books published by the Commissioners; to some extent it cannot be said that the use of these books is optional; if different unexceptionable books were published, it would be desirable to allow freedom of selection, 1162–1164.

The examination is held at the head quarters of each district, the travelling and personal expenses of teachers being defrayed by the Board, 928–930. Teachers who have once been classed, need not present themselves again for examination for promotion, 931, 932.—Examination, as far as subjects are concerned, has existed since 1848; the mark system was introduced in 1856, 936, 937.—Five or six questions are put on each of the subjects in the written examination; in the oral one, the number is at the option of the Inspector, 938.—Rule for guidance of Inspector, 939, 940.—A record of the examinations is preserved in the office, 941, 942.—Questions on the science of teaching form part of the oral examination; the question of "schoolmastership" is determined by inspection of the school, 944–947.

Head Inspectors' inspection of schools is mainly directed to ascertain the manner in which the District Inspector has done his duty, 950.

Inspectors are appointed by public competition on nominations made by the Commissioners, the examinations being conducted by the Civil Service Commissioners, 951–953.—Inspectors are appointed with regard to religious belief. When a vacancy occurs for a Roman Catholic none but Catholics compete, so also in the case of Protestants, none but Protestants compete, 954, 958.—Salaries of the Inspectors, 955.—Inspectors in the first instance are appointed to the third class; seniority generally determines promotion, 956.—Number of Inspectors in each class, 957.—Inspectors are located in their districts by Chiefs of Inspection, 959.—Scales of travelling allowance to Inspectors and other expenses, 960, 1109, 1115.—These are checked by Chief of Inspection, 1110.—Allowance of stationery, 1113, 1114.

Degradation of a teacher is communicated to managers, 961.

In case of failure at second examination of a classified teacher, he retains his rank, unless he shows decided neglect, 962.

Third-class teachers are not examined in history; the historical instruction they give in their schools is of an humble description, as they use the Second and Third Books only, 963–966, 987.

The lessons contained in the Fifth Book are of a difficult character, and if taught in schools under third-class masters would be of little value to the scholars; the question of compiling a history for these schools has been considered, but obvious difficulties have prevented the design being carried out, 988–993.—Nearly one-half the entire number of the schools are under third-class teachers, 967, 968.

In Lord Powerscourt's school at Enniskerry history is taught at a *separate* time just as if it were the hour for religious instruction, notice being given that parents who object may withdraw their children from the lesson; an arrangement of this kind might be generally adopted, 1254.

Chiefs of Inspection are the heads of the Statistical Department, 969–971.

Distinction between vested and non-vested schools came into operation about 1840, but a distinction always existed between schools built partly by State aid and schools built out of local funds, 972, 973, 1116, 1117.—In vested schools parents not of the same religion as the manager or teacher may have the clergyman of their denomination admitted to give religious instruction to their children; in rural districts the pupils are more or less mixed, whether the school be vested or non-vested, 974–976.—Managers are frequently entirely ignorant whether their schools are vested or non-vested, 975–1120.—The unmixed element preponderates in vested schools; Protestant children are not so prone to attend schools taught by Catholics, as Catholic children to attend those taught by Protestants, 977, 979.

Very little difference of proportion between vested and non-vested schools as to mixture of different religious creeds; on the whole there would be a slight preponderance of the mixed element in the latter, 978, 1119.—As a fact only one religion is taught in non-vested schools, 994.—If patron of vested school prevented religious instruction by pastors not of same religion Board would interfere; instances have occurred in non-vested schools, 1250–1252.—Mixed schools are increasing, as shown in the report for 1866, 1121–1123.—In a few cases religious instruction may be supplied elsewhere than in the schools, 1151.

Managers of vested and non-vested schools respectively prescribe the course of religious instruction for the scholars; in the 1,805 vested schools witness does not know of an instance where parents have availed themselves of the rule allowing clergymen of their own religion to give their children religious instruction, 995, 996.—This is not the fault of the Board; the fact is neither parents nor pastors take advantage of the rule, 1124–1127, 1147, 1150.—Patrons of schools have not interfered to prevent intentions of Board being realized in this respect, 1148, 1149.—It is contrary to the rules of the Board for patrons of non-vested schools not to admit clergyman of different religion to give instruction to children of his own communion, 1324, 1325.

The model schools are the only schools witness can remember where Protestant and Roman Catholic clergymen attend to give religious instruction, 997–999.—Practically no religious instruction is given to the minority where the majority of scholars is of same religion as the manager, 1018, 1019.

The condition of recently vested schools is satisfactory; those erected some years since have fallen into bad repair, and others have been diverted from school purposes after having been suspended by the Board, 1008–1011.

Form of lease for vested schools, *see* Appendix No. III.; the lease does not contain a clause as to repairs; the only way the Board can compel repairs to be executed is by suspending the salary, 981–984.

The arrangement with Board of Works as to building and repairing schools (which came into operation about 1857) has worked well in many parts of Ireland, in others very unsatisfactorily, 985, 986.

Managers are improving in their supervision of the teachers; they are the medium of communication with the Board, 1000, 1001.—Some, but very few, managers attend the schools daily to test accuracy of returns, 1002.—The manager generally protects the teacher, 1003.—From the efficiency of the inspection erroneous returns would soon be detected, 1004.

Inspectors must make three periodical visits to each school in a year, and they are also required to make frequent incidental visits, a note of such visits being made on the proper form, 1005–1007, 1109.

Central Institution, Marlborough-street, is the only training establishment in connexion with the Board, 1017.

The combination of Roman Catholic and Protestant pupils, and Roman Catholic and Protestant teachers, practically exists only in schools under the direct management of the Board, 1020–1023.

About three-fourths of the vested schools are under Catholic management; number of vested and non-vested schools under clerical managers and under lay managers, 1024–1030.

System of inspection is very efficient; witness is not prepared to suggest any alteration of a fundamental character, 1031.

Many classes of schools get their salaries on too easy terms; the Board is disposed to give a greater teaching staff than is absolutely required, 1032.—According to the Board's rule, the numbers of pupils vary with the classification of the teacher; any one of fair training and average ability ought to be able to teach fifty children without difficulty, 1033, 1068.

The present plan of payment per head, involving so many varieties of payment, is defective, 1036.—Thinks the maximum cost to the State should be a high one, 1037, 1038.

Reason why in a boys' school the daily attendance of 60 scholars entitles the school to an assistant, while 50 is sufficient in a girls' school, 1039.—First class masters are frequently found in schools where the average attendance is only thirty; in these cases he enjoys the honour without the emolument, 1040.—Number of scholars to entitle him to full salary; number of assistants and monitors; their salaries, 1041–1044.—Under the rule of the Board, retrenchment on expenses of teaching power would be limited to the monitors, 1045, 1046, 1080.

The Inspectors' business is to check undue multiplication of teachers (for which they have many opportunities) subject to the office supervision, 1047, 1048, 1065–1067; Inspectors frequently draw attention of the Board to disproportion between teaching power and attendance, but as the scale which regulates the proportion is well known, the rules become self-acting, 1074.—Attendance of monitors is marked on the roll, but not that of assistants; this is a defect likely soon to be remedied, 1049, 1050.—There is no absolute check on the teacher's attendance, 1051.

Schools liable to accidental or abnormal fluctuations of attendance are allowed a certain degree of grace, under a rule upon which the Commissioners act, but which has never been published; it is important to understand the effect of the "grace" allowance. The "grace" allowance is the difference between the number required for any particular class, and that degree which is immediately above the number required for the next lower class, 1075. The question of the relative number of teachers and pupils would be brought under the notice of the Board by the person who goes through the accounts in the office, 1076–1078, 1227–1229.—The rules as to attendance in relation to teachers do not apply to the case of monitors, 1079.

Mode by which the Chiefs of Inspection exercise control over finances of the model schools, 1054.—Model schools are inspected by a District Inspector, but more frequently than an ordinary school, 1055.—Payment of fees in model schools, 1056–1061, 1063, 1064.—Payments to teachers, &c., 1062, 1136, 1137, 1186–1190.—Some model and other schools are worked on tripartite system, where there is class-room accommodation, 1069.

Inspection department first placed under Chiefs of Inspection in 1855, 1070–1073.—Opportunities for ascertaining whether teachers have performed their duties, 1081.—Printed rules are issued for guidance of teachers in keeping the register, which rules serve to assist the Inspector in checking it, 1082–1084.

Payment of teachers annually is impossible in the condition of the country; payment monthly would involve the office in such multiplicity of detail as to cause confusion, 1085–1087, 1186–1190.—Monthly payment of teachers has been a moot point for years, 1246, 1247.

Patrick Joseph Keenan, esq.

Free grants of books are made at the time of taking on new schools; grants of books at reduced prices are made whenever the manager applies; no free grants are made after the first, except in cases where special assistance might be given on the ground of poverty, or bestowed as a recognition of the excellence of a particular school; it is an important part of the Inspector's duty to see that the schools are properly supplied with books and school requisites, 1088–1095.—Payment to Board for store and free stock of school requisites, 1096, 1097.

Gratuities to masters are of several kinds; are recommended by the Inspectors annually, 1098, 1099.—Penalties on masters—fines, depression, dismissal, admonition, reprimand, suspension of salary—recommended by Inspectors after inspection of school, 1100–1103.

Code of instructions to Inspectors, 1104–1108. [For copy of code, *see* Appendix to evidence No. IV.] Code of 1855 is the only one published; no objections to it have ever been made by Head Inspectors or District Inspectors, 1259–1261.—Head Inspectors took exception to various instructions issued by Mr. M'Creedy, the Chief of Inspection, but not with relation to the code, 1262–1265.

Board's system of organization is successful, 1129–1132.

System of school-fees necessary; where any attempt is made to confine schools to a high class of pupils the Inspector would report it, and the Board would interfere, 1133–1135. Commissioners have no rule imposing a fixed rate of school-fee, 1248, 1249.

The Report for 1865 gives in a tabular form the religion of the teachers, but this was omitted from later reports by direction of the Treasury, on the ground of expense in printing; considering that the leading feature of the system is the combination of persons of different religious denominations, it is desirable that some such statement should be made from time to time, and when it is deemed advisable will no doubt be repeated, 1138–1144.—Witness is prepared to put in a table showing number of Catholic teachers appointed by Protestant managers, 1145, 1146.

Catholic students in training schools receive no religious instruction from ministers of their own creed, as the attendance of the latter has long been discontinued; Protestant clergymen attend, 1152–1158.

Regulation as to local subscriptions, contained in Lord Stanley's letter, has never been carried out, from its impracticability, 1159.

Witness states number and distribution of holidays and vacations and mode of computing average attendance, 1165–1181.—The class-roll is called not later than twelve o'clock, 1256–1258.—It is the interest of the teacher that the attendance shall equal the number required for his class salary, 1182.—Average attendance for 1866; attendance at inspection generally corresponds with the average, 1183–1185.

Although the Inspectors generally, the office authorities, and others favour the plan by which teachers sell books to the children, witness is not satisfied with the propriety of the arrangement, 1199–1201.—The plan has been in operation about four years, and was introduced with the view of giving teachers an interest in having their schools well stocked with books, not to increase the sale of works published by the Board, 1202–1210, 1213–1216.—Twenty per cent. is allowed on sale of books in all schools except model schools, 1253.—The amount of profit to the teacher cannot be very considerable, 1446–1449.

Prior to 1849 the Board sold their books to everybody, but since then have ceased to sell them to any but persons connected with National schools for use in such schools, 1217–1219, 1242.—The difficulty of providing books for schools of mixed religious denominations is so great that practically none but the Commissioners' books are used; the only other books used would be on arithmetic, algebra, &c., 1220–1223.—The Inspector must report what books are in use, and if he find any other than the Board's must state their contents, 1224, 1225.—Reading books of Christian

Patrick Joseph Keenan, esq.

Brothers are prohibited by the Board; their arithmetic is used, 1226.

Since 1849 the Board's copyright in their books has become public property, and other editions containing precisely the same matter are published in England, Ireland, and Scotland, 1242–1245, 1270.—The change in 1849 was brought about by Earl Russell on remonstrance of the great London publishers, who considered the plan adopted by the Board as an interference with the sale and production of books for public schools, 1271.

Board contracts for printing the books, 1272.—The same edition is printed over and over again, and no alteration of the matter takes place when an order is given to the printer to print off a new lot, 1273, 1274.—If the books be not revised before new contracts for printing are entered into a person who has the contract for one period has an advantage over others in a subsequent competition, 1275, 1276.—New editions of the first four books have appeared, and a new edition of the fifth is in the press; the printers in these cases have had to set up new type, 1276.—Arrangement by which the books have not been revised previous to entering into fresh contracts has enabled the contractors to print the works at a much lower rate than if they had, again and again, to set up the type, 1277.

The text book on natural philosophy has not been revised for a great number of years; it remains to-day pretty much what it was some twenty years ago, 1278, 1279.—Students in training are taught from this, and candidates for Inspectorships are examined in it, so that in fact they are bound to answer in natural philosophy in a different sense from what is understood by the world outside, 1693–1695.

The paper for the report books, roll-books, and other official books and forms is supplied by the Stationery Office, the cost of which is debited to the National Board, 1342–1344.—Paper for the school-books is supplied by the printer, 1344, 1345.

Witness is responsible for the extracts from Inspectors' reports and statistics accompanying them, contained in the Appendix to the Board's Annual Report, 1211, 1212.

Teaching power is excessive in the case of assistant masters, 1230.

Inspectors now have the power to promote untrained teachers to first class; this power is very desirable, as it put an end to great injustice; there is no reason why a man who has passed through the school as a monitor, and shown aptitude as a scholar, should not be quite as useful as one trained at Dublin; number of teachers trained at Dublin has fallen off, 1231–1235.

It is not desirable that intermediate education, such as teaching classics, modern languages, &c., should be introduced, but the ordinary National school might legitimately afford opportunities for classical instruction to those pupils of genius who, from poverty, would be debarred from getting it in an intermediate school, 1236, 1237.—A few teachers so qualified would be found in the sixty districts, 1238.—Teachers possessing such qualifications would no doubt abandon primary education, 1239, 1240.—Imparting higher education to teachers would not interfere with the primary education of the country, 1241.

Constitution of National Board facilitates the ends of justice in dealing with matters of complaint that may arise between different grades of officers, or between managers and the Board, 1255.

Witness gives a list showing the present distribution of the Inspectors in the school districts of Ireland according to their religious denomination, 1266, 1267.—Some of the Presbyterian Inspectors have been in Roman Catholic districts; explains reason for present arrangement, 1326–1328, 1353, 1354.—Inspectors are not sent to districts by promotion, 1348.—The north districts are the smallest in Ireland, but the schools there are closely packed together; the south and south-west are very large, 1349–1351.—Explains disparity of labour in the districts, 1352.—Protestant Inspectors should be placed over Catholic districts and Catholic Inspectors in Protestant districts; such plan was recommended by Chief Secretary for Ireland in the House of Commons in 1860, 1268, 1269.

Never heard Catholics desire to have Catholic Inspectors, but has heard Catholic managers express a wish for Protestant Inspectors, 1329.—Inspectors, whether Protestant or Catholic, generally have given satisfaction, 1330.—Representation of Catholic Inspectors in Northern districts, 1331–1337.

There is a slight difference between the programmes of proficiency for male and female schools, 1282.—Course of instruction in National schools, 1283.—Essential subjects, as reading, writing, &c., are common both to male and female schools, 1284.—Many managers and teachers consider that grammar is an unnecessary study for junior boys and girls, and in this opinion witness coincides, 1285.—No alteration has taken place since this Commission issued, 1286.—The Inspectors in the report for 1866 complain that time is wasted in teaching grammar to the humblest class of children, but it would be a serious revolution to exclude so important a study as grammar; the question has not assumed the condition of remonstrance, 1287–1290, 1295, 1316.—Witness is not responsible for the retention or removal of this subject in teaching junior classes; the Board is responsible, 1291, 1292.

Does not attend the Board unless specially summoned, but knows the result of their deliberations by their decisions, 1280, 1281, 1294.—The Board has shown that it is capable of performing its duties intelligently, 1293.

The model schools are open to children of every class; in many towns the children of magistrates, aldermen, town councillors, &c., are taught in these schools; it is a very unobjectionable arrangement; but special care is taken that they shall not be admitted to the exclusion of the poor, 1298, 1299, 1317.—If magistrates and others were to send their children to the ordinary schools, the Commissioners could not interfere, 1300–1302.—Case of the model schools is identical with that of the ordinary National schools; the great principle of the National schools is that they are open to everyone, irrespective of class and creed; when the system was started it was pronounced to be a system of non-restriction and non-compulsion and it remains so still, 1303, 1304.

A model school, efficiently conducted and well supplied with teachers, would interfere with the prospects of a school supported by the parents of the children, but the State cannot step in to interfere with the model schools simply on that score, 1305.—The effect of the institution of every State system of education, is, to some extent, to drive private schools from the school world, but that is not a substantial objection to the institution of model schools, 1306, 1307.—The poor derive great advantage from the opportunity of mixing with the children of a better rank, and the rich are equally benefited by contact with the poor, 1318.

Music is not an essential part of the school course, but where managers choose to introduce it, the Board favour it by awarding a premium to the efficient and successful teacher of it, 1308, 1311, 1319.—Never heard any complaints in reference to music; one of the most attractive features of the convent schools is the provision for teaching the harmonium and singing, 1309, 1310, 1313.—The only persons taught instrumental music are the senior children, who receive this instruction in extra hours, 1312.—Any complaint that may have been made could not apply to convent schools, as the statistics show that their proficiency over ordinary schools is remarkable, 1314.—Music is taught to the senior pupils and monitors in the female model schools, 1315.

Music is not efficiently taught in National schools; the Manual issued by the Board not containing a single Irish tune has had the effect of leading teachers to conclude that Irish music was excluded from the programme, and consequently but little attention has been paid to its cultivation, 2032.—Irish music well adapted for choral singing, 2033.—Gratuities for teaching singing, 2034.

Eight or nine years ago, the Commissioners added

harmoniums to their stock of requisites for sale to National schools, 433 of which were sold to about as many schools, at a loss to the Board of £895, 2035–2037.

Cannot say whether any of the first-class teachers have been trained elsewhere than in the Central Model School, 1320.—Hands in a return of first-class teachers who have not been trained in the normal establishment, 1322 and *note*.—Hands in also a return of the distribution of the 143 first-class paid monitors at the end of 1866, 1323 and *note*.

Teachers are not bound to give notice of their intention to leave; it is highly desirable that they should give at least a month's notice; bad conduct would be sufficient justification for immediate removal, 1338–1341, 1347.

The allowance of 20 per cent. to the teachers as a commission on the sale of books is objectionable, and might be abolished, the salary awarded being a recompence to the teacher for the sale of books to his pupils, as well as of the various other duties which he discharges; it should be distinctly understood by the teachers that they are not to make profit on the sale of the Board's books; in Belfast it was recently discovered that the copy-books intended to be sold at 1*d.* were sold at 1½*d.* each, 1355–1359, 1450.—The teacher is not *bound* to have the prices of books hung up in the school; but in most of the books the prices are set forth; in the new editions the price is on the title-page, 1360.

Books are not so good or perfect as they should be; two Inspectors and an assistant have been engaged for a considerable time revising them, and one of the professors has been commissioned to revise some of the books; every book when revised is brought before the Board for approval, 1361–1363, 1439–1441.—It is desirable that the teachers should enjoy the option of selecting the books for the use of their pupils, and that the pupils should have some variety in the books they use. With that object the Commissioners determined to publish, besides the regular class-books, supplements of a literary character, but none have yet been issued; some have been selected, but have not yet obtained approval, 1364–1366.—No substantial change has taken place in the greater portion of the books; in the reading class books, lessons of a higher order of literary merit than that of the old ones, &c., have been introduced, 1367.—Four have been passed by the Board as finally revised, and three others are now before the Board for approval, 1368, 1370, 1371, 1452.

All the old books require revision; the books on arithmetic require it; the book on Natural Philosophy decidedly requires change, 1369.—The literary selections, which should be used as alternative volumes, will come next for revision; they will be adapted for supplemental reading for the senior or upper classes, either at home or in school, 1372–1375.—Any officer of the Board may suggest a book for revision; the pending revision was the result of a recommendation of the Government in the year 1860, 1376.

If a school is reported as insufficiently supplied with books, a letter would be addressed to the manager, calling his attention to the fact; if the Inspector found the deficiency continuing, strong measures would be resorted to in reprehension of the neglect of the teacher; in many cases the books required are sent down and the cost stopped from the next accruing salary of the teacher, 1377.

Where schools are reported deficient as to the repairs of the premises or ventilation, the attention of the manager is drawn to the defect, and, finally if the school become unsuitable as a school-house, it is struck off the roll, 1378.—In some parts of Ireland owing to the chronic poverty prevailing, bad buildings, bad supply of books and requisites, and even inefficient teaching have been tolerated, 1379.—The duty of providing out-offices in schools vested in trustees devolves upon the trustees, the Board paying two-thirds the expense, cost of repairs entirely falling on the local parties; but where a school is vested in the Commissioners, all repairs, &c., fall upon the Board, 1380.—44·6 per cent. of schools have no out-offices, nearly the whole being non-vested schools, 1584, 1585. Patrick Joseph Keenan, esq.

For all Ireland the endowments and subscriptions together amount to only £12,000 a year; the teachers receiving the endowment in addition to salary, which it is not desirable to diminish, 1382–1384, 1387.—Under the head of "endowments," are included subscriptions and all local sources of school revenue, except pupils' fees; at the end of 1865, of the 5,533 schools from which returns were obtained 80·5 per cent. had no endowments of any kind, 1385.—States number of endowments of £10 a year and upwards, 1386.

The manager, but no one else, has a perfect right to take part in the business of the school; but in actual practice very few managers take part in the ordinary literary instruction of the pupils; there are instances where managers spend a considerable portion of each day in the schools; the number of such managers appears to be increasing, 1388, 1389.

The monitorial system is a most popular element of the organization, and every year its advantages are more appreciated by managers and teachers, 1390.—In some parts, Belfast for instance, there is great difficulty in finding monitors, but not in the rural districts; monitors very rarely change from school to school, 1391–1393.

The proneness of teachers to move about from school to school is so great that the slightest temptation induces them to change, 1394.—The manager certifies in the quarterly return whether the teacher has been in constant attendance during the quarter; in most instances the return is signed as a matter of form, but managers take precaution against misrepresentation, 1395, 1396.

Qualifications for obtaining good service allowance; from the stringency of the conditions the eligible candidates are the *élite* of the teachers; it is regarded as a great distinction to be in receipt of the allowance, 1397, 1398.—The fund out of which the allowance is paid is voted by Parliament annually; practically this would prevent the Board from increasing the number of teachers in receipt of it, but as a matter of fact the good service salaries have not amounted to the sum voted by Parliament in any year, 1416–1419.

Corporal punishment is not absolutely prohibited, but an undue infliction is deprecated by the Board; as a general rule it is not much resorted to; complaints of undue chastisement have reached the Board, and the Inspectors have been directed to inquire into them, but during the past year not more than ten or twelve were reported; the Inspector would note this in his report of a school as a serious blemish on the character of the teacher, and in every instance of excessive chastisement a fine is inflicted on the teacher, 1400–1404.

On the part of the Catholic clergy there appears to be a considerable objection to vesting schools, either in the Board in their corporate capacity or in trustees nominated by themselves; and the Presbyterian clergy do not desire grants towards the erection of their schools; they appear to have some reason for preferring non-vested schools; the difficulty of obtaining sites is the first consideration in deciding managers to be satisfied with common rented houses to be employed as ordinary non-vested schools, 1405, 1406.—There are some parts of Ireland where, from the hostility of feeling to the National system, it is utterly impossible to get sites, 1407.—The question of applying to Parliament for powers to owners to give sites has been mooted, but has not come before the Board, 1408. The statutes of the Synod of Thurles forbid the vesting of schools in the Board or in trustees, but from the fact of some schools being vested one would infer that the statutes are not absolute, 1420–1422.—Since the passing of the statutes the Commissioners, at the suggestion of the Government, have modified the requirements as to vesting, 1423, 1424.

In deciding the class of a teacher the intellectual qualifications are measured in reference to the requirements of the programme of proficiency laid down for each class, the per-centage of answering determining

Patrick Joseph Keenan, esq.

his success or failure; with regard to his practical experience and power in working schools, *prima facie* the mere appearance of a teacher at an examination signifies that his claim on the score of schoolmastership is to a great extent recognised; as a general rule, a balance of scholarship and schoolmastership determines the classification, 1409.—Some very rare cases have occurred where promotion has been conferred for a high rate of practical ability in conducting a school, 1410, 1411.

Teachers do not now experience any difficulty in getting money for the Post Office orders, in which their salaries are paid; but some years ago, when Post Office arrangements were not so complete, there was very considerable difficulty, 1412, 1413.

It is very hard to obtain statistics of private adventure schools. In many parts of Ireland they are pretty numerous still, 1414.—The adventure school is generally the school of a dismissed National teacher, or old man or woman; the children are exactly the class who frequent the National school, into which, in the long run, they are sure to enter, 1415.

Difference in the rule respecting religious instruction in vested and non-vested schools but little influences people in making their choice, 1425.

The patron of the non-vested school says whether any and what religious instruction is to be given in the school, but in the vested school the patron is bound to admit whatever teacher the parents provide to give religious instruction, 1426, 1427.

Witness made a report in 1855 in reference to the establishment of libraries in connexion with the schools, but no action has been taken by the Board; one of the most salutary arrangements that could be conceived would be the institution of such libraries; the supplementary reading-books already referred to would assist in promoting the formation of such libraries, 1429–1431, 1433, 1488–1490.—A list of books could be made for such libraries that would not offend any sect, and at the same time afford a great deal of highly useful information, 1432.—The Kildare-place Society prepared books for this purpose; they were the first in Ireland to establish the sale of diagrams, charts, &c.; and up to that time books of a very injurious character extensively circulated throughout the country; indeed their circulation has not yet ceased, and the establishment of such libraries, with the publication, on the part of the Board, of the books to which you are referring, would assist in getting rid of them, and would attach the children for a longer period to the schools, 1434–1437.

Mr. Eardley, a Roman Catholic Inspector, having reported with regard to certain expressions and statements contained in Chambers's "History of the British Empire," which he found in use in the Annaneese school, witness considers Chambers's set of school-books generally unsuited to National schools, 1443–1445, 1860–1862.

The use of different kinds of books in different schools would be perfectly practicable; the only condition which should be imposed is, that they should be suitable for use in the National schools, 1451.—Every decision of the Commissioners is subject to revision, 1453.

The rule requiring the Commissioners to communicate with the Lord Lieutenant prior to withdrawing or essentially altering a book does not apply to the revision of the old books; some persons have an opinion that the alterations made come within the rule; the alterations are not essential; the general character of the books remain the same, 1454, 1457.

When the revision was originally started, the Chiefs of Inspection were consulted, and a joint report was drawn up by them at the request of a committee of the Board, giving a general outline of what the revision should accomplish; the revision was commenced, on the suggestion of the Government, about 1861 or 1862, by Mr. Gillic and Mr. Robinson (one a Catholic, the other a Protestant Inspector), Mr. Clarke being associated with them as literary assistant. They were referred to the report drawn up by the Chiefs of Inspection, and directed to wait on Mr. M'Creedy, who had become Secretary, to receive instructions, 1458–1461, 1463–1473.

This is the only general revision of the books; on previous occasions Archbishop Whately frequently revised them, brought out new additions, and made various alterations, 1462, 1542, 1543, 1935–1946.—The essential feature of the books was their Scripture history lessons, and these have been retained, 1544, 1545.

On the part of Catholic managers the expression is one of nearly universal satisfaction with the revised books; on the part of a few Protestant managers, official remonstrances have been made against them both by Presbyterians and clergymen of the Established Church; the Board have considered these remonstrances, but have not yet come to any decision upon them, 1475–1479.

The revision has given universal satisfaction to the teachers and parents of the children, 1480.—The use of several editions of the same book in a school would be very confusing and embarrassing to the teacher and Inspector, 1481–1485.—[*See also* Appendix to Evidence, No. V., for return showing extent to which this exists.] Never heard a case of children refusing to buy the new books, 1486.

The Inspectors constantly represent that the teachers in all parts of the country are subject to great hardship from being themselves driven to execute repairs, 1491, 1492.

A few well endowed schools to which teachers could be promoted as a sort of prize, would be the life and soul of the system, 1493.

Monitors were first established in the year 1833, and appear to be an institution very much prized, and acceptable to all parties, 1494–1496, 1507, 1508, 1648. The number of monitors on the occasion of the last Report was 3,030, consisting of 143 first-class, 2,426 senior, and 461 junior monitors, distributed generally over the country, 1497–1499.—Puts in a return of the 143 paid monitors of the first-class, 1500–1504.—[For return, see foot note to question 1323.] Female monitors remain pretty much to the end of their term, especially in the case of convent schools, but the male monitors as a rule, leave the service of the Board for more remunerative employment, 1505, 1506.

A proposition that Head or District Inspectors should pay the teachers was considered twelve years ago, but deemed impracticable; witness is not prepared to say offhand whether some such arrangement might not be made so as to speed the distribution of the salaries, 1509, 1510.

Commissioners grant a salary to a new school in a locality where sufficient accommodation already exists, on the principle of the modified grants, 1511.—Possibly the Commissioners may have allowed these grants contrary to the reports of the Inspectors, the Commissioners forming a different opinion on consideration of the same facts, 1512.—The great object of the "modified" grants is to secure that every locality shall have schools, where children of a different religious creed than those attending existing schools may obtain a literary and religious education; no grant has been made in a locality where this religious want was not manifest, 1515, 1516, 1546–1551.

The opening of additional schools in many localities has had the effect of diminishing the attendance in previously existing schools, and perhaps of obliterating others in connexion with the Board, 1513, 1514.—A few cases of remonstrance from managers of schools unfavourably affected have occurred, 1515.

There is no rule or regulation as to the proportion of monitors in a school, the essential provision is that there must be an average of, at least, 35 pupils; the Inspector is bound to look to the wants of a school, its attendance, &c., before he recommends the appointment of a monitor; however, in a thinly-attended school, having the essential number of 35, the Inspector would be justified in recommending the appointment of a monitor, if he found a lad who gave promise of becoming a useful teacher, 1521, 1522.

In convent schools, after the thirty-five necessary for the first monitor, there should be at least thirty pupils for every other monitor; in convent schools there are not monitors for every thirty pupils, 1523. The Board in every case pay the salaries of paid monitors, besides the capitation grant to the schools; unpaid monitors, don't come into the contemplation of the rules of the Board, 1524, 1525.

Pupil-teacher is the name a male monitor bears when in a model school, and is resident there; also in the case of a limited number of superior monitors in the model schools, who reside at their homes; generally speaking, they are monitors of four years' standing, 1526–1528.

A considerable number of books other than those on the sanctioned list are in use in National schools, 1529.—If the Inspector meet with an unsanctioned book, or if the manager state the name of a new book in use, the Inspector reports it to the Board; if he find a difficulty in forming an opinion, he submits the book to the Board; his *ipse dixit* would not be taken, unless supported by facts, 1530, 1531.

There is a considerable disposition to use Board's books in other primary schools; never heard of their use in modern times in the Christian Brothers' schools, as they have books which they themselves have produced; some have been introduced into the Church Education Society's schools, 1532–1534.

Teachers both of the higher and lower classes frequently leave the schools, those of the higher class obtaining appointments of considerable value in the colonies; the lower class leave in greater proportion than the higher, 1535–1537.—A great number have emigrated to America, where some have schools, but occupations of a more lucrative character are sought, 1538.—A very high class of teachers receiving very low remuneration, would undoubtedly soon leave; the salaries attached to the higher ranks in the classification are sufficient to induce a large proportion of the teachers to remain, 1540, 1541.

Managers have not had opportunities of receiving such a training for the effective discharge of their functions as managers receive in Prussia, where the law requires a person who is a candidate for holy orders to attend a training school before he can be ordained; this law refers only to Protestant clergymen, but the Catholic clergy in some parts of Prussia have voluntarily adopted the same regulation; in England, the late Bishop of Norwich, Dr. Hinds, instituted a system of examination of candidates for holy orders in the subject of school management, but nothing of the kind has ever been attempted in Ireland, 1552, 1553.—If in the principal places throughout the country there were in operation model or training schools, which the clergy could patronise and use, and in which they could have implicit confidence, such model or training schools would present facilities for the technical training of managers, 1554–1558.

The per-centage system gives an interest to the teachers to sell books; but it might possibly be attended with consequences which would indispose the pupils to buy; they should only be allowed to sell as agents of the Board, 1555–1558.

Some children, who are not of his own creed, might go to the landlord's school; but Protestant children prefer to go to a school taught by a Protestant, and on the other hand, Catholic children frequent the school taught by a Catholic teacher, 1559–1561.

When there is a sufficient admixture of children of different religious denominations in any district to keep in operation two schools the mixed system does not prevail, 1562.

The number of Protestant children who in 1867 attended convent schools was 73 for all Ireland, of whom 60 were of the Established Church and 13 Presbyterians, the total number of children attending convent schools being 73,331, 1563–1564, 1947–1950.

With regard to the relative proficiency of males and females in the different schools of Ireland, an abstract of the Census Returns shows that, in the case of males, in 1841, 32 per cent. could read and write; and in 1851, 36·6 per cent. could read and write; and in 1861, 42·6 could read and write; and in the case of females, in 1841, 16·3 per cent. could read and write; in 1851, 22·9; in 1861, 33·5, 1566.—The increase in the case of females is considerably greater than in the case of males, which may be specially attributed to the operation of the convent schools, 1567, 1568.—The pupils are more regular in attendance in convent schools; besides the regularity of attendance there are various evidences as to the relative superior proficiency of the pupils in these schools compared with the ordinary schools, 1569, 1570.—States results of examination of monitors, which show, so far as their education is concerned, that the convent schools have the advantage over the ordinary schools, and to that fact, as indicating their superiority, along with many others, may be attributed the general character which they bear for efficiency and usefulness; and in the other classes below the monitors the same proportion of superiority exists, 1571, 1572, 1980–1983.

Patrick Joseph Keenan, esq.

Commissioners require that in every girls' school needlework shall be taught, and that every female teacher shall be capable of giving instruction in it, which is given as a general rule, but not with even tolerable success, 1573, 1574.

The higher descriptions of needlework as well as the humbler are taught in convent schools which gives them an advantage in the results, 1575–1577.—No difference between convent and ordinary schools as to observance of Board's rules, 1578.

Model schools are not an unwholesome interference with private enterprise; the establishment of any superior school in a place, improves the taste for education, and increases the number of good schools, 1579.—The attendance of Roman Catholics in the model school at Galway has considerably diminished, 1581–1583.

Thirty-five per cent. of the schools have no playgrounds, or bad ones; the Board have not taken much action in that respect, except in case of vested schools, 1586–5819.

Course to be pursued by persons seeking building grants, 1590, 1591.—Specification of Board of Works need not be strictly adhered to; in some outlying districts managers find it impossible to build at the prices laid down in the specifications; consequently the works remain suspended for years, 1593, 1594.—Where schools cannot be finished for the specified amounts, the Board gives supplemental grants, 1595.—New plans proposed by Board of Works have been submitted to the Commissioners, but have not yet been approved, 1596, 1597, 1897–1900.

The Board four or five years since resolved to make grants of a modified character to meet the case of schools in thinly populated and poor districts, but the rule has been acted upon in very few instances, 1598–1601.—There are many parts where the full ordinary school attendance cannot be secured; this is a very serious defect in the Board's arrangements, 1602.—Witness reported on the question of schools in thinly peopled districts in 1855 or 1856; summary of the results arrived at, 1603–1605.

The rule of the Board requires eight superficial feet of space for each child; this space is ample, 1606.—In city schools there is at all times very considerable crowding; during certain short seasons, even in the country, crowding to a great extent takes place, but on the whole, the accommodation is equal to the wants of the system; as a general rule, there is not sufficient cubic space in the school accommodation, 1607–1609, 1884–1887.

There is a very considerable correspondence between age and classification: a little more than three-fourths are under twelve years, and nearly the same proportion are classified below the Third Book, 1611–1613.

The children are withdrawn from school at a very early age, especially in manufacturing towns; the attendance at schools in tillage districts is much better than at those in pasture districts; in the mountainous districts may be found some of the best schools, 1614–1616.—Witness, in a report to the Board, suggested a

Patrick Joseph Keenan, esq.

remedy with reference to the early withdrawal of children from school, by offering premiums to children who had spent five years in a National school, 1621–1625.

In schools in the fishing districts navigation should be taught, 1617.—There are six regular navigation schools, but they have not been successful, in consequence of being established in improper places; navigation classes have been conducted in some ordinary schools with most gratifying success, especially in one at Glenariff, county Antrim; the proper places for navigation schools are the small fishing villages along the coast, 1618–1620, 1726–1732, 1739–1742.

In June, 1866, a suggestion was made by the Government, with respect to the introduction of a new plan of paying the teachers' salaries—of paying for ascertained results. An inquiry was then made to ascertain if the English rule could be applied to Ireland, by obtaining a nominal return of every pupil on the rolls, with the number of days' attendance in each individual case, which showed that only 33·5 per cent. of all the children had attended 100 days and upwards, 1629–1631.—Hands in an abstract showing number of attendances from 220 days down to 50 and under, 1631.

A similar return for each of the school districts or counties can be furnished, and would be found most invaluable in connexion with any consideration of the statistics of the schools, as "averages" are almost useless; the publication of the abstracts for the counties would give the actual condition of the schools, as to attendance, in the geographical divisions of the country, and would afford a complete exposition of the quality of the attendance at the schools; such a return could not be produced often, for it involves an immensity of labour, 1632–1639.

The principle of organizing schools was introduced in 1856, on suggestions made by the Inspectors; the system is still in operation, but not so extensively as soon after its introduction, 1640–1644.—Nothing could be more successful, 1645.

The circular letter issued at the introduction of the organization system was drawn up by witness, 1646, 1647.—[See also Appendix to Evidence, No. VI.]

In the report for 1856 witness gave a history of the monitorial system in connexion with the organization; states substance of the report, 1649–1651.—There are now four classes of monitors—1, unpaid monitors, in schools that have been organized; 2, junior paid monitors from eleven to fourteen years of age; 3, senior paid monitors from fourteen to eighteen; lastly, first-class monitors who have completed the preceding stages, and whose period of service is two years, 1651.—"First class monitors" are engaged for two years; they get £15 for the first year, and £17 for the second, 1652.

In the county of Galway 62·1 per cent. of the people speak Irish; Mayo, 61·1; in Kerry, 57; in the West Riding of Cork, 53·1; in Waterford, 52·1; in Clare, 47·6; and in Donegal, only 30 per cent.; the total of the Irish-speaking population is 1,105,536, or 19·1 per cent. of the whole population, 1653–1657.—About 25 per cent. of the Irish-speaking population would be between five and fifteen years of age; the positive numbers have diminished, 2005–2017.—Cause of smaller attendance in the Galway schools, 2022–2025.—No provision has ever been made by the Board for teaching these people through the medium of Irish; it is next to impossible to teach, skilfully and effectively, the Irish-speaking population by the ordinary process; if they were taught to read Irish first they would more readily learn to read English, 1658–1660, 1662–1663, 1736–1738, *and note*, 2018–2021.—The fact of the Irish language being spoken materially influences the number who are able to read and write, 1661.

No provision is made by the Privy Council in England for the Welsh-speaking population of Wales, 1664–1665.—Witness has several times drawn the attention of the Commissioners to the subject of the Irish-speaking portion of the people, but the project proposed was not favourably received, 1666–1669.

Comparison of net annual value of property rated under the Tenements Act, and the amount of annual subscriptions to National schools, 1670–1676.—Statement of the averages, ranging from the worst to the best, under the two heads of fees and subscriptions, showing great disparity in the amount of fees in the several districts, 1677.

Variety of payments in the different districts leads to endless changes on the part of the teachers, 1678.

The best county in Ireland is Londonderry, where there are comparatively few resident gentry; the local subscriptions here are high, and the fees paid by pupils are also high, so that the circumstances of Londonderry do not establish any superior advantages over the rest of the country with regard to resident or non-resident landlords, 1679–1681.—The London companies are bound by their charters to subscribe to the local schools, 1682.

In the convent schools the average amount of school fees per head is only 8¼*d.*, compared with 2*s.* 7½*d.* in the schools of Ireland generally; and the average from subscriptions, per pupil, in convent schools is 4¼*d.* per pupil, compared with 9½*d.* in the schools generally, 1683.—In the ordinary schools the Board pays 13*s.* 7*d.* per head as teachers' salaries, and in convent and monastic schools 4*s.* 3½*d.* per head; the average of premiums and gratuities paid to the ordinary schools is 5¼*d.* per head, and to the convent schools 1*s.* 1½*d.* per head, 1684–1685.

The average attendance in the ordinary schools is 268,260, and in the convent schools, 31,017, 1686, 2038–2040.

Relation between amount of school-fees paid and classification of the teachers; the parents appear to recognise the superior efficiency of the highly classed teachers, and think it worth while to pay for it, 1687, 1688.—The same law prevails with regard to all local subscriptions, which is due to the fact, that the higher class teachers look out for the schools, and get them, where high fees and subscriptions prevail, 1689, 1690.

Defective condition of lessons in science in the Fourth and Fifth Books; children at Clonmel National schools were examined in these books on occasion of Lord Kimberley's visit; they answered according to what was in the book, but their answers did not agree with his Excellency's information on the subject, 1696–1698.

Incorrectness of the "Epitome of Geographical Knowledge, Ancient and Modern, compiled for the Use of the Teachers and Advanced Classes of the National Schools of Ireland," 1699–1704.

Under the circumstances of Ireland, the National system could not have succeeded as it has done but for the fact that the Board undertook to produce the books; the time is now pretty near for a salutary modification of the arrangements as to the production of books—the more general the class of books used the better, 1705, 1710, 1711.—Mr. Thom on various occasions has drawn the attention of the Board to important and necessary corrections; his interest is to make them as correct as possible, 1706, 1707.—The action of the Board with regard to its books has destroyed the production of *school-books* throughout Ireland, 1708, 1709.—Books are more likely to be kept up to the condition in which they ought to be by private enterprise than by Boards of Commissioners, 1710.

It is a disadvantage to education that books like the "Epitome of Geography" should be prepared by men unknown to literature or science, 1713.—An accusation has often been made that the authors of books in the employment of the Board used their official positions to sell their books, but it has not been satisfactorily sustained, 1716, 1717.

The success of the books has arisen from the popularity of their authors, and their own merits; they have proportionately obtained as considerable a circulation in England and Scotland as the books *published* by the Board have commanded; an author connected with the Board has a considerable advantage; the Board, however, have now resolved not to place on their list books written by any of the officers who have to deal with the classification of the teachers, 1718–1720, 1733–1735.

The production of school books—on the part of the Government, through the agency of the Board—ought not to be directly or indirectly a monopoly, 1722.—The books of the Board circulate generally all through the colonies, 1723–1725.

The use of books sanctioned or published by the Board is necessary to a monitor, and to a teacher, to prepare himself for examination, and, in that sense, it may be concluded that their use is compulsory; if a teacher made a representation that he entertained a conscientious objection to the use of the books, the Commissioners would yield to his representations, but no such case has occurred, 1743–1747, 1750, 1752.—The examination papers being based on the lesson books, it would be impossible for anyone to answer the questions if he had not got the books, 1748, 1749.—The new editions do not contain lessons on special or technical subjects; the lessons on Scripture history are preserved, 1751, 1752.—The object of the examination in the lesson books is to discover whether the teachers have an intimate acquaintance with the books in use amongst the children, so that to this extent their use is indirectly compulsory, 1753–1755.—In most parts the children are well supplied with books at their own expense, 1756, 1757.

A proposition to encourage benevolent societies among the teachers has never been brought before the Commissioners, but they have considered the propriety of granting pensions instead of, as at present, retiring gratuities, but no decision has been come to, 1758–1762.—The general opinion is in favour of pensions, as being more serviceable to the teachers and more economic to the public; scale on which retiring gratuities are calculated, 1762–1764, 1766.

Teachers' salaries are too small for them safely to contribute to a benevolent society, or to take advantage of Post Office Savings Banks, 1765, 1849.—It is doubtful whether an arrangement of compelling teachers to subscribe to a fund for pensions, after generally increasing the salaries, would be wise in Ireland; if the teachers could be educated to it, the project would be a very desirable and excellent one, 1767–1769.

The Board makes grants for enlarging vested schools only; non-vested schools are three times as numerous as the others, 1770–1772.

The Commissioners are appointed to administer the funds granted by Parliament for the education of the *poor* in Ireland, 1773–1778.—Practically, the operation of the Board is limited to the education of the poor, but the model schools are frequented by the children of the better classes, whose parents should share the cost, 1779, 1780.—It is very difficult to define the time at which children should leave school, 1781, 1782.

Four hours a day on five days a week are required to be devoted to secular subjects, which in many cases is voluntarily exceeded; the course at present consists of five books, 1783–1786.—Period necessary for a child to get through the course, 1787, 1790–1792. The fact that there are 300,000 holdings of less than fifteen acres each, and that every child has to work as soon as it is able, accounts for the irregularity of attendance, 1788–1789.

Any boy who has attained to the Fourth Book, and acquired the necessary knowledge for his class, ought decidedly to be prepared to commence the world; a girl should be able to read, write, do arithmetic, and needlework, 1793, 1794.

Some of the convent schools include children just able to walk up to others of upwards of nineteen years of age, 1795, 1801.—St. Finbar's Convent National school, Cork, is returned as having 120 young persons in the highest classes whose ages average 19·9; the school must possess immense attractions, and it is better that these people should be at school, as there is but little employment for females in Cork, 1802–1805, 1824.—It would be very difficult to lay down any fixed rule as to the time when children should begin and end their education, 1806.

7·1 per cent. of children attending the National schools reach the higher classes, 1807.—Pupils remaining in the school to an advanced age serve the interest of the junior pupils, 1808–1810.—A child should be sent to an infant school as soon as it can walk there, but where there is no provision for infant education five years should be the minimum age, 1811.—The system of payment according to numbers should be abolished, 1813. Patrick Joseph Keenan, esq.

The number of children attending the schools is an indication of the success of the National system, and the Board, being desirous to discharge its duties efficiently, is interested in a large attendance, 1814–1817.

Every scholar should attend school before roll-call; if the Inspector find any discrepancy between the number on the roll and the number actually present at the time of his visit it should be accounted for on the "absence slate," where the teacher should record the names of children who had permission to leave school: the record would remain unchanged, the whole number counting as attendances, 1818–1822.—Inspectors examine children to test their proficiency, 1823.

The Board gives aid to convent schools, under certain restrictions, but not to schools conducted by members of any religious brotherhood, 1825–1831.—There are six schools taught by monks, which were in connexion with the Board prior to the rule excluding those so taught; there is no examination of monks as to their competency as teachers any more than of nuns, examination of the school is quite a sufficient test of any teacher's fitness, 2041–2047.—Capitation grant is paid in the same way as to convent schools, 2048.—Never found anything in schools of the monks calculated to deprive them of recognition and support, 1832.

It would be difficult to fix the amount to be contributed by localities, 1835–1840.—No compulsory arrangement ought to be made requiring any specific proportion of contribution by managers, 1841, 1842.

Chambers's books on geometry and algebra are used in National schools, 1843, 1844.—Teachers in England are fortunate in being allowed to select their books, 1845.

The effect of the National system has been to displace the schools previously existing where the humbler and better classes received their education, and the want of such schools is now much felt, 1850–1856.

Dr. Sullivan offered his books gratuitously to the Board, but they declined to accept them except on the usual terms of payment, 1857–1858.

The standard of examination for first and second class teachers has been considerably raised since the origin of the Board; the only recent change of consequence is the introduction of agriculture, 1863, 1864.—The number of marks for second class remains much the same as in 1848, 1865.

Amount of discount, on sale of books, varies from 8*s.* or 10*s.* to £6 or £8, 1866, 1867.

In the south-west of Ireland complaints of delay in execution of repairs by Board of Works have been for a long time frequent and serious, 1868, 1869.—The Commissioners of Works become informed, through their own officers, as to the condition of the schools, and the Inspectors report to the National Board, who communicate with the Board of Works, 1870–1874, 1907, 1908.

The navigation schools that have hitherto been instituted, have been merely branches of model schools, and a literary education may be given in them to the nautical pupils, who seldom or never avail themselves of it, 1876.—Classification of the masters varies, the teachers receiving a special salary, 1877–1880.

There are 140 first class monitors, rather less than half of whom are in ordinary schools and the remainder in convent schools, 1881–1883.

Examination of a school in Scripture history is entirely within the Inspector's discretion, 1888–1894.—The Inspectors are prohibited from examining in any secular subject not laid down in the programme for National schools, 1895, 1896.

Vested school-houses are better than the non-vested, 1901, 1902.—If the provisions of the "Land Improvement Act" were extended to school-houses it would

Patrick Joseph Keenan, esq.

be a great advantage, as all school-houses would be made suitable to their purpose, 1903–1905.

Relative number of schools having under thirty pupils in each school in each of the provinces, 1909.—Relative proportion between schools having less than thirty pupils each, and the total number of schools in each province, 1910.—Cause of small number in Munster as compared with Ulster, 1911.

It is desirable that managers should have the option of introducing classics into the ordinary schools as an extra subject at extra hours; classics might be taught as part of the course, so as not to interfere with the teaching of the essential subjects, 1915–1921.—The business of preparing for a University is connected with the business of primary education in the parochial schools of Scotland; in many Irish National schools the thing has been successfully done, 1922–1928.—Ability of present masters to teach classics, 1929, 1930, *and note.*

The course adopted by the Inspectors in examining a school is not an undeviating one; they would not deliberately pass over the Scripture history lessons, but they are not the lessons they would probably select, 1951–1954.

Local duties of managers as to the school; their duty towards the Board, 1956.—It is very desirable that clerical and other managers should receive some instruction in the *technical parts* of educational affairs, and that they should get some idea as to the general organization, government, and management of schools, 1957–1961.

The National schools are superior to the elementary schools of other countries, and this superiority may be maintained, 1962–1965, 2026, 2027.

Attendance of Protestant children at Catholic schools, 1966–1968.

Special attractions of convent schools: respect for the conductors, superior education and rank of teachers, their fame as bringing on the children from class to class, that the religious education of the children is excellently provided for, and that heads of the school watch over the scholars after they have left, 1969, 1970.—In some cases the children are clothed, in others fed, which form attractions to the more destitute children, 1972–1975.—Industrial instruction is given in all convent schools, and where industrial work is done, payment is made for it, 1976–1979.

The amount paid for monitorial teaching in convent schools has increased, 1984, 1985.—Monitors in convent schools are superior to monitors in ordinary schools, 1987, 1988.—Under special circumstances monitors are allowed to remain after the fourth year, but no premiums are now paid, unless the monitors become first-class, 1989–1998.

Return of all the cases where gratuities have been paid within the last six years, to monitors retained beyond the regular period of four years, 1999.—[*See also* Appendix to Evidence, No. VII.]

Return of the number of children in King's Inns-street convent school under four years of age, and above fifteen years, also a similar return from the model school, 2000–2004, *and note.*

Reference to page lxx. of Mr. Nicolson's report for Scotch Schools Inquiry Commission as to teaching Gaelic in schools of districts where it is spoken, 2049–2051, *and note.*

Witness produces a memorandum on a system of Payment for Results, drawn up at the request of the Royal Commissioners. The memorandum sets forth, in the first place, the leading considerations which show that a system of paying for results is preferable to that at present in force, *pages* 89, 90. The plan is divided into three parts, viz.—Part I., Inspectors' Result Fees; Part II., Managers' Result Fees; Part III., Classification Salaries of Principal Teachers, *page* 90.

PART I.—INSPECTORS' RESULTS FEES.

Ninety attendances to qualify a child for examination as to Inspector's results fees, § 8, p. 90.—Sliding scale of payment for teaching pupil-teachers or monitors proposed, § 9, p. 90.—Curriculum to consist of eight gradations to be called sections, § 10, p. 90.—Programme of examinations in each section, with the results fees obtainable for each subject and section, p. 90.

Subjects of each section are arranged under four primary heads, § 12, p. 92.—Table of scale of fees; qualification for examination, § 13, pp. 92, 93.—Estimate of expense for Part I., § 14–16, p. 93.

PART II.—MANAGERS' QUARTERLY RESULTS FEES.

Objection to paying for mere attendance and on so delusive a basis as an average attendance, § 17, 18, p. 93.—In addition to the Inspector's annual examination for results there shall be a quarterly examination held by the manager, and on the manager's certificate a fee of one shilling shall be paid for each child who makes thirty attendances in the quarter, on the following conditions:—1. If in the case of an infant pupil, or of a pupil in the first or second sections, it be certified that during the quarter the instruction was progressive and efficient. 2. If in the case of a pupil in the third, fourth, fifth, sixth, seventh, or eighth sections, it be certified that the pupil exhibited *at least thirty fairly written* copies or exercises, written by himself (and initialed and dated in each case by the teacher), on *thirty different days in the quarter.* 3. If it be certified that the general instruction of each pupil for whom a fee may be claimed has been progressive and efficient. 4. If it be certified that an effort will be made that each pupil for whom a fee may be claimed shall, if at all practicable, be subsequently present at the Inspector's annual examination. 5. That for any pupil on whose account a manager's results fee shall have been awarded, who may be absent without satisfactory cause on the day of the Inspector's annual examination, or whose written exercises, referred to at condition 2, cannot be produced for the Inspector's revision, the fee shall be deducted from the payment next accruing to the school. 6. That the Inspector on his first incidental visit in the month succeeding the manager's examination shall verify the statistics, inspect the copies, &c., referred to in the manager's report. 7. That the Inspector, whilst not required to make an individual return of the answering, at the next annual examination of each of the "limited attendants" (that is, the thirty days and the sixty days attendants—the ninety days attendants being called "full attendants"), shall however, examine them in such a manner as to be able to report generally that conditions 1, 2, and 3 had been fulfilled, § 19, p. 93.—Estimate of expense for Part II., § 20, 21, p. 94.

PART III.—CLASSIFICATION SALARIES of PRINCIPAL TEACHERS.

Scale proposed, § 22–26.—Estimate for Part III. § 27, p. 94.

Monitors; assistants; appropriation of results' fees, &c., § 28–30, p. 95.—Night schools to be open for half the time of day schools, to be entitled to half day school results fees, and subject to the same general regulations, § 31, p. 95.—Examples of the probable incomes of teachers from results fees and class salaries (gratuities omitted) to be derived from different sizes of schools, § 32, p. 95.—General estimate, § 33, p. 95.—Mode of payment, § 34, p. 96.—Check of accounts, § 35, p. 96.—Scheme to come into operation at end of three years from its promulgation, § 37, p. 96.

46·4 per cent. of the pupils are under nine years of age, and 45·4 per cent. are in the First Book, 2052–2054, 2072–2075.—30 per cent. are between nine and twelve; they would range at present between the third and fourth sections, 2055.—Payment by results would bring about such an improvement in the quality of the attendance, that instead of only 33½ per cent. giving 100 days' attendance, 50 or 60 per cent. might give a like attendance, 2057, 2058.

Different scales for rural and civic schools would tend to embarrass the system, 2059, 2076.—Infants to be presented in second section when they go into the grown school, 2060, 2061.—The rule might be relaxed

in certain cases, 2069-2071.—A child entering at an advanced age should have an opportunity of passing from class to class until it attained the highest section, utterly and entirely irrespectively of its age, 2062-2064.

The quarterly inspections may, for a time, be with many managers only nominal and perfunctory, but when the duty is imposed upon them they would discharge the obligation, 2065, 2066, 2083-2096.—Children to write a copy every day they attend, 2067, 2068.

With regard to "Inspectors' results fees" present staff of sixty Inspectors with six Head Inspectors would be perfectly equal to the duties which the scheme would impose, 2077-2082, 2116-2119.

Payment by results would stimulate landed proprietors to help the schools more, 2098, 2099.—Rating for school purposes would be utterly impracticable in Ireland, 2100, 2101.—The English rate of payment for examinations would be too low for Ireland, 2102, 2103.

A child should finish the first section on the completion of his sixth year; the second on the completion of his seventh year; the third on the completion of his eighth year; and the fourth on the completion of his ninth year, 2104-2107.

Considerations which led to placing grammar in the fifth section, 2108-2110.—Income of teachers, 2112-2115.

Pass is to be obtained by creditable answering in all branches, 2119-2123.

System proposed would not interfere with model and training schools, 2124-2125.—No maximum limit of age fixed for pupils, but the minimum would practically be limited to four years, 2126-2129.—The co-operation of the managers, combined with care on the part of the Inspectors, would prevent an infant grant being paid twice in respect of the same child, 2130-2135.

Those children that come from respectable homes as well as those that come from needy homes require State aid, 2136-2140.—Gratuity for an infant under six 8*s.* a year in Inspector's results' fees, and, possibly, 4*s.* a year in Manager's results' fees, 2141.

There is no difficulty in ascertaining the age of a child in Ireland, 2142-2146.

The introduction of getting poetry off by heart would tend to improve the quality of the reading, 2151-2153.

It is very difficult to say what is the average school-life; in many parts of the country children remain at school for ten years, 2154-2158.

The scheme proposed would remedy many defects in the National system, as stated in paragraph I. of the memorandum, 2159-2169.

In many places the school-houses are very bad; the memorandum does not enter into the question of school-houses at all, but where the premises are quite unsuitable the proposed grants would not be paid, 2170-2177.—There may be cases (for instance in Ballina district, county Mayo), where under special circumstances the Board have continued to make the grants notwithstanding the unfitness of the school-houses, 2199-2204, 2207, 2208.—Effect of the scheme will be, by elevating the tone of education generally, to introduce a better class of school-houses, 2205, 2206.

If the schoolmasters exerted themselves more, and were sustained in their exertions by the managers, they might considerably improve the attendance, 2178-2183.

In Ballinamore district (an exceedingly poor one), the landed proprietors are nearly all absentees, and contribute very little aid to the schools, 2184-2188.

Instruction in agriculture is provided for in the memorandum from the 5th section upwards; it can without disadvantage be included in the usual school course, just as needlework in the case of girls, 2189-2194. Patrick Joseph Keenan, esq.

The management of schools is infinitely more efficient now than it was seven years ago; it is more efficient in 1868 than it was in 1867, more efficient in 1867 than it was in 1866, and so on; it is, in point of fact, improving every year, 2195-2198.

The effect of the plan suggested, with regard to classification of teachers, will be to induce them to select promotion by personal examination; the desire to earn the results fees and to be rated as successful and accomplished teachers will be stimulus enough to lead them to continue their studies, 2209-2218.

It would not be desirable to give a schoolmaster a direct interest in passing an examination in the additional subjects by enabling him to raise his classification; his status, as a teacher, once determined, will be ample for all purposes, 2219, 2220.—Payments for Inspector's results to be made once a year; for managers' results, four times a year, 2221-2223.—The system of classification proposed would not tend to degrade the teachers nor to ignore their scholastic attainments, 2224-2226.—Reasons for making classification partly dependent on numbers, 2227-2229.—Payments of teachers advance up to 70, and then begin to fall to 120 because of the employment of assistants; number of assistants to be employed in schools having from 75 to 300 pupils in attendance; present and proposed salary, 2230-2240.

Under the present rules every female teacher is required to be qualified as a workmistress, and would have to perform the duties under the new scheme, 2241, 2242.

Although managers would be directly interested in passing all the children, as they became more experienced as examiners they would feel the necessity of observing strictness in the examination of the children, 2243-2246.—Any case of dishonesty on the part of the teacher, would be punished, as now, by dismissal, 2247-2251.—In the case of vested schools the Board can remove managers; this power has not been exercised, 2252, 2253.

It is most desirable to accomplish the system of paying quarterly if possible; it would be a good plan, in case a school was examined between the 31st January and the 31st March, that the sum earned by the annual examination should be paid by the next quarter-day, 2254-2259.

Under the proposed scheme the Inspectors will examine individually about 331,000 children (those who attended 90 days), and in a general way about 309,000; the examination will be quite as efficacious and satisfactory as at present, 2260-2268.—Work of Inspectors will be largely increased, 2276-2277.—The Inspectors would have to make ten monthly visits, but there would only be one full inspection, 2278-2282.

It is most desirable that schools should be frequently grouped together for general examination, 2269-2271.

The classification at present in force—in regard to the three leading grades—would remain as it is, 2272.—Teachers in virtue of their classification receive sums varying from £16 to £52 year; possibly a case might occur where a teacher at present in receipt of £52 a year would receive less under the proposed plan, but the teacher at present receiving £52 a year would most likely be placed in charge of a large school, which would be an immense improvement for him in point of income, 2273-2275.

KELLY, JAMES, Esq.

Financial Secretary to the Board of National Education; discharges from time to time much the same duties as his colleague; attends chiefly to correspondence and the committees; Dr. Newell attends more particularly to the inspection department, he also attends the Board meetings; the present arrangement is a matter of agreement between themselves, 3040-3042, 3082. James Kelly, esq.

Description of the management of the correspondence; if the matter be one over which witness has jurisdiction, he notes an answer, if not it is referred

James Kelly, esq.

to the Board or the Resident Commissioner; in case of a division of opinion in the Board, protests are sometimes entered on the minutes, and, on occasions, *in extenso;* the papers are not always preserved; the practice is not uniform, 3043–3052, 3083.—[The witness subsequently supplied a statement of the occasions on which protests were made, the subjects, and the names of the protesting members, *see note on* pp. 139, 140.]—The majority of the Board have allowed the dissent of the minority to be recorded, but have not allowed the protest to appear on the minutes, 3092, 3093.

Recently the Board has been called on by the Executive Government to reverse its decision in the case of a teacher accused of Fenianism who had been permitted to resume his duties; the teacher was dismissed, 3053–3055.

The system of two secretaries is not inconvenient; one could not discharge the duties; one secretary would require an assistant, which comes to the same thing, 3056, 3057, 3084.—Both secretaries are present at the preparation of the annual estimate sent to the Treasury, as well as the Chiefs of Inspection, the Accountant, the Book-keeper, and the Resident Commissioner, 3058, 3085.

The Board can apply the savings on one item to cover excess on another; the Treasury merely requires it to keep within the sum total of the estimate, 3059, 3060.—Transfers from one item to another do not frequently occur; the estimate is made out with tolerable accuracy, as far as possible; on the item of teachers' salaries there may be £2,000 or £3,000 excess, 3061.

An abstract showing the actual expenditure under each head as compared with the parliamentary estimate is sent at the end of the year to the Audit Office; the estimate and the amount of expenditure for the year 1866–67 will be found in Appendix No. VIII., 3062–3069.

Many instances have arisen of difficulty in getting proper sites for schools; landowners willing to give sites were not able to do so from having only a limited interest in their property; increased facilities for granting sites for schools are very desirable; the Commissioners have often been obliged to accept unsuitable sites because of the inability or unwillingness of landowners; the propriety of endeavouring to get an Act like the School Sites (England) Bill has never been formally brought before them, 3070–3073.

A few complaints of proselytising in schools have come before the Board, but the charges were not established; the complaints did not come exclusively from one religious body, 3074–3076, 3096, 3098.

Although appointed a member of the committee, witness, from circumstances, had nothing to do with the revision of the Board's books; the First, Second, Third, and Fourth Books have been recently approved; the Fifth Book and the First Book of Poetry are now under consideration; the committee decides on a book, it is put in type, a copy is sent to each member of the Board, and it is considered at the next meeting, 3077–3081.

The special compilation of the books for the revised edition was prepared for the most part by the late Mr. M'Creedy, by two inspectors, Messrs. Robinson and Gillic, and a clerk appointed for the purpose; the revision of the scientific books has not yet taken place, 3086–3088.—So far as the revision has gone the professors have had nothing to say to it; they were certainly competent persons, inasmuch as some of them were authors; and the fact of being professors having charge of training and other schools would be sufficient to qualify them to revise the school-books used throughout the country, 3089–3091.

No communications have passed from the Executive Government to the Board showing a desire to use the Board for political purposes, 3094, 3095.

Witness is not familiar with the system of school accounts throughout the country, they would be merely accounts of receipts by teachers; the Commissioners require accounts from managers as to the amount of fees paid to teachers—no more, 3099–3103.

It would certainly be an abuse if the entire sums given by the Commissioners for the teachers were not applied for their benefit; there may be several ways of checking such abuse, either by paying the teachers directly or by removing the managers who should be guilty of it; the Board has no fixed course of proceeding in such cases, 3104–3106.—If a teacher pays the rent out of his salary it depends on the nature of the agreement between him and the manager, the Board might object in such cases, 3107–3109.

Schools must be kept in repair by the localities; if non-vested schools be suffered to fall out of repair, the grant is withdrawn or the salary is suspended; the Board would object to repairs being done at the master's expense, though there is no fixed rule to that effect, 3110–3112, 3215.

The annual report shows the total annual cost of a school, except repairs, 3113–3120.

The teacher is bound to give an exact account of all emoluments received from the school, including the payments by the scholars, which is returned to the Board by the manager, 3121–3124.

The Board grants salaries to teachers of non-vested schools as well as grants for books and other requisites; the teacher gives a receipt for his salary, but it is not always a guarantee that he has received it; the salary is sent by post office order in favour of the teacher through the manager, and in seven cases out of ten the receipt is signed by the teacher and countersigned by the manager before the Board pays the money, 3126–3130.

If the teachers go away—emigrate—before they receive their salaries, the managers return the post office order; the Board does not inquire at the end of the year if any of its orders are outstanding, 3131, 3132.

KYLE, WILLIAM COTTER, Esq., LL.D.

William Cotter Kyle, esq., LL.D.

Is secretary to Clare-street Commissioners; their corporate title is "Commissioners of Education in Ireland;" property is chiefly land endowments; with a small exception, that of each school has to be kept separate, 15392–15396, 15457.—Principal estates belong to the seven royal grammar schools; these are somewhat similar to the large English schools. A few primary schools for tenants of estates; one is under National Board, and a few others in connexion with it, 15397–15405, 15416.—Nothing in trust deed as to primary education or education of the poor, 15417.—Origin of primary schools just named, 15512.—Enumeration of those not connected with National Board. Want of supervision of the latter, 15406–15410.—Commissioners wish all to be under Board, but often cannot get persons to act as joint managers. In one case, after house was built, parish priest at last moment refused to act with anyone else; would not act at all unless allowed whole and sole control; matter is still pending. School referred to is at King's Island, Tyrone; further particulars; hope of difficulty being set right yet; there are many children who would attend, 15505–15508.—Reason for requiring joint managers, 15402, 15411–15413.—Commissioners appoint masters of those schools not under National Board; supervision, 15414, 15415.

Annual report is laid before Parliament, 15420–15422.—Bad condition of estates; improvements; cannot raise rents. Difference of opinion as to whether endowed schools were intended for the poor, 15423–15426.—Unsatisfactory condition of diocesan schools; Board has no power to improve them; abortive suggestions, 15427–15429.—Original intention of the royal free schools; that at Enniskillen is now the

best; has been greatly improved, and is open to all denominations. Question as to necessity for a model school at this place, 15430–15436.—Unsatisfactory state of grammar school at Clonmel; it was endowed for gratuitous education of children of Protestant freemen, but is not confined to them. These two schools could not have supplied a training for teachers of primary education generally. Schools may be considered intermediate, 15437–15444.

Tullyvin school, Cavan, 15446–15448.—Little means for commercial education in Limerick under Board's control; powers are only over schools named in Act. Act of 1822 only extended control prospectively to same class of schools as already under Board. Evidence of witness before Endowed Schools Commission contained suggestions for every possible improvement, but these have not been acted on, 15449–15454.

All funds are specially appropriated. Expenses of Board are defrayed by annual parliamentary vote. Funds for primary schools are deducted from rents of estates where situated, 15456–15460.—Each royal school has its own patent granted by Charles II.; they are substantially the same—for the sustainment of "*libera schola*," a term the Endowed Schools Commissioners completely misunderstood. Dates of charters are given in Report on Endowed Schools. Acts of Parliament have transferred control from schoolmasters to Commissioners. Whole system of diocesan schools is completely rotten. Board have only a visitatorial power; not so the royal schools, of which they hold estates and administer funds with certain powers as to surplus, 15461–15471, 15493.

Royal schools are open to all denominations, with freedom as to attending religious teaching, 15472, 15521–15523.—Government appoint masters; evil effects of this. Nothing in charters necessitating religious instruction. As to alleged unwillingness of masters of Dungannon school to receive boarders of a different denomination; Commissioners do not interfere in religious matters at all, 15473–15486.—Commissioners admit some free pupils. "*Libera schola*" means a school free from particular control, not gratuitous education. Some of the Endowed Schools Commissioners have admitted they were wrong in adopting the latter interpretation, 15487–15490. William Cotter Kyle, esq., LL.D.

Commissioners have no power to found intermediate schools. Primary schools give a return every six months of number in attendance at that particular date. Witness cannot furnish returns of number on roll and average attendance, nor of age, 15494–15499.—Kilbricken school is under National Board. Can furnish attendance at primary school at Raphoe, 15500–15504.

The Armagh school is badly attended, and in a very unsatisfactory state; Board are powerless to remedy it; appointment and dismissal of masters should rest with them, 15509–15511.—They would not like to introduce religious elements by asking for return of denomination of children; cannot say whether masters could refuse to comply; masters are all Protestants. Schools are not nearly so successful as they ought to be, but there is no religious discord. Opinion that schools should be exclusively Protestant, not supported by charters, 15513–15520.

Board much need additional powers; they are still as defective as when witness gave evidence before Endowed Schools Commission, 15524–15526.—Board receive rents of estates from agents monthly; no money passes through witness's hands, only drafts for payments, 15527, 15528.—Witness has had several interviews with Mr. Cardwell, and supplied him with statistics, &c., hoping that his suggestions would have been acted upon; patronage should be taken from Government and given to Board; they should have visitatorial powers, and power of appointment, dismissal, and superannuation, 15529–15533.

Tabular statement of the income and expenditure of each school (royal, diocesan, and private foundation) having funds under Commission for the year 1867, *page* 669.

Return of the number of children at the primary schools on the estates of the Commissioners, or under their patronage, showing the numbers *in attendance* at each school separately, and the religious persuasion of the said children, *page* 670.

LEEPER, Rev. ALEXANDER, D.D.

Is assistant secretary, chaplain, and general superintendent of the training and model schools of the Church Education Society, 6703–6705, 6787. Rev. A. Leeper, D.D.

Organization of the society, 6706, 6707.—Funds received in Dublin are under the control of the Dublin Committee; the country societies retain their own funds and dispense them as they choose, 6708.—The training schools are maintained solely out of the Dublin funds; one is situate in Dublin, the other at Bandon, 6709–6745, 6747.—Each teacher on entrance pays, £6, 6772.

There are 16 men and 41 women in training at Dublin, their ages varying from 16 to 20, all of whom are members of the Established Church, 6710–6713, 6715, 6719, 6733.—The course is divided into sessions, which each last five months, the women remaining for three, the men for two sessions, 6711, 6728, 6729.—No difficulty in obtaining places for teachers; they cannot be supplied quick enough, 6712, 6900.—The number of mistresses in training is limited by the accommodation, 6734.

Subjects of instruction in training school, 6716, 6717.—At the close of each session there is a public examination both orally and by paper, 6717, 6906, 6907.—There is no restriction as to when or how religious instruction shall be given; it is more or less mixed up with all the branches, 6718.

There are model and practising schools, the teaching of which is carried on by those who come up for training, under the supervision of the training master and mistress, who listen to them teach, and point out privately their defects, 6720–6725, 6800–6806.—The teachers are classified at the end of the course of training, there being a first class and three orders of second, about 25 per cent. male and female obtaining first class, 6726, 6727, 6730, 6731.

Some of those who come for training have been pupils in schools not connected with the society, 6735–6737.—The salaries of teachers, although better than they were some years ago, are not sufficient; in the society's inferior schools they are less than in National schools, 6738, 6739.

In the model and training schools there are 250 children of various religious denominations, the Scriptures being read by all; Presbyterians and Catholics are not taught the formularies, nor on controversial questions unless the matter turns up, 6740–6744, 6764, 6765, 6785, 6786.

Religious instruction is carried on *pari passu* with whatever subject is being taught, 6750–6758, 6760–6763, 6766–6768.—Every day there is special religious instruction in the Scriptures and Catechism, 6769–6771.—The blending religious instruction with general information tends to fasten the lesson on the child's mind, and gives an interest to what would be but a dry detail of facts, 6775–6784.

Scientific instruction given, 6759.—There is no model time table, managers can use any one they please, 6773, 6774.

Moral and religious effect of the training school on the teachers is decided and remarkable, 6788, 6789—All teachers attend a place of worship on Sundays under supervision of a teacher, 6790, 6791.—Only three instances have occurred where it was necessary to expel teachers for immoral conduct, 6792.

A few teachers give up their occupation, but generally they remain schoolmasters, 6793, 6794.—Some teachers enter Dublin College, continuing to act

Rev. A. Leeper, D.D.

as teachers, and studying in their extra hours, 6795–6798.

Teaching staff in the training and model schools, 6799.

The Church Education Society was established to assist schools existing at the time of its formation and to found new ones on an improved principle for the purpose of affording instruction in the Scriptures and in the formularies of the Established Church to children of its members, 6808–6810, 7072–7074.—The meaning of "on an improved principle" probably alluded to an improvement on the Kildare-place system or on that of the National Board, 6811–6816.—The rule of the Kildare-place Society as to religious instruction was that the children should be taught the text of Scripture without note or comment, Roman Catholic children reading the Douay version; some of the Catholic clergy, as well as clergymen of the Establishment, were patrons of this system, 6817–6824.

The number of society's schools is 1,404, containing 44,378 Church children, 12,300 Dissenters, and 6,871 Catholics; total, 63,549; all of whom, according to the rule, should receive a daily lesson in Scripture, 6828–6832.—There are sixteen Inspectors, who visit the schools generally once, sometimes twice a year, 6833, 6834; they are generally unpaid, and are appointed by the Diocesan Committees, 6877, 6908, 6909. The reports of Inspectors are not published on account of the cost, 7026, 7027.—The Committee have no means of knowing whether the teachers carry out the rules, except from the Inspectors and from the clergy, 6835, 6836.

Teachers have greatly improved of late years; their efficiency is not only tested by inspection, but by examination, 6837–6840.—Salaries and accommodation of teachers, 6841–6847.—The society does not undertake to supplement the teachers' salaries, except in the case of the London Hibernian Society's schools, 6848–6850, 6897, 6899.—A residence is generally provided for them, 6851–6854.—In general they receive the school fees; these vary in amount, according to the circumstances of the locality, 6855–6860.—Some children of the better classes attend the schools, 6861–6864.—The number of teachers is about the same as the number of schools, and all are members of the Established Church, 6865, 6866–6884.—Many of them act as parish clerks, 6867–6871.

There is a scale of proficiency for the schools, both in secular and religious instruction, which the children are expected to reach, 6872–6878.

The books of the National Board are used in some parts, but there is a rule of the society that only books in the catalogue or those approved by the Diocesan Committee shall be used; the Dublin Committee never formally object, though their opinion of them is not high; the books of Christian Knowledge Society are generally used, 6879–6882, 6901–6905.—There may be cases where Protestant parents send their children to National schools under Catholic managers in which the education is superior, but Protestant parents generally prefer to place their children under Protestant teachers, 6886–6896.

Special advantages of schools by union with society, 6910.—Objects of the model and practising schools, 6911–6914.—It is hardly possible that a school could be in union with the National Board and the Society, 6915–6918.—Some of the society's teachers have joined the Board; many of the Board's teachers have come to the society's training school; their ignorance of Scripture is quite remarkable, and in secular subjects also they are deficient, 6919–6924, 7028, 7029.

If a system of payment by results in secular subjects were established the society's schools might be able to receive aid from the Board; plan of Bishop of Ossory and the Attorney-General, 6925–6927, 7069–7071.

Parents must know that their children will be required to read the Authorized Version of the Bible; no means are taken to ascertain whether they desire it or not, 6928–6932, 7030.

The number of Catholics in the schools is decreasing every year, 6933–6937.—Although the teachers must be members of Established Church, the books Protestant books, and the commentaries on the Scriptures given in a Protestant spirit, it does not follow that Catholic children must become Protestants, nor that the society is proselytizing in its character, 6938–6963.

No one can deny that the locality of a National school in a Roman Catholic chapelyard, with the service constantly going on, and with a Catholic teacher, must influence the Protestant child's mind; the converse might have a similar effect, 7031–7035.

It is difficult to account for the number of Catholic children on the rolls, but pressure from the landlords is not the cause, 6964–6967, 7049, 7051–7053, 7057, 7058.—Catholic children are excused instruction in the formularies just the same as Protestants, 6968–6970.—There are a few in the three schools in Dublin, 6971–6979.—Catholic parents and children do not object to the reading of the Scriptures, 6980–6991, 7036–7041.—Many Catholic children attend Protestant ragged schools; they may obtain there some material advantage, such as breakfast, 6991–6995.

Comparison of number of children educated by the Society and by the National Board; it is hard to compare the two systems, 6996–7020.—The income of the society gives about £27 per school, while the National Board receive about £50, 7084–7091.

An account of school fees is generally kept, but as there are very few paid agents it is difficult to obtain accurate information on the point, 7021.—School buildings are repaired by clergymen and others out of local funds, 7022–7023.—Ecclesiastical Commissioners do not pay for repairs of parish school-houses, 7024, 7025.

It is matter of opinion whether the parent is the proper judge of what the religious education of his child should be; if we were to listen to parental authority there would be no Christian missions, 7042–7048.

The central body has no control over the finance of any one school, 7059–7062.

The children are promoted from class to class by the Inspectors; the scale of proficiency enables the Inspectors to use a common standard, 7063–7066.—Some fourteen years ago there was a board of eight or nine Inspectors, each receiving about £150 a year and travelling expenses, but the funds failed, and this had to be given up, as also a subsequent annual grant of 10*s.* towards the expenses of inspection of each school; there is now only one paid Inspector, 7067, 7068.

Many of the great primitive doctrines are common to both Churches; a large portion of practical morality is founded on the Scriptures, and a very large scope of commentary is to be found in them in no way hostile to Roman Catholics, and it is in this spirit that the teaching in the society's schools is conducted, 7055–7081.—Schools in which no moral instruction is founded on the Word of God, nor any allusion made to its existence, have a positive infidel tendency, 7081–7083.—Knows of no school under the National Board answering this description, but there may be one, 7095–7105.—The number of Established clergy who are indifferent as to the National system is on the increase; those who take a decided interest in upholding it may be increasing, but very slowly, 7106, 7107. Declaration in favour of the present united system, 7108.—In correspondence between the Bishop of Down and the Board it was distinctly declared that the Scriptures could not be referred to at all, 7109.

LONGFIELD, Right Hon. MOUNTIFORT.

Was a Judge of Encumbered Estates Court. Has been a member of National Board for fifteen years. In early days system could only have been carried out by a representative Board; is more representative now; desirable that it should be so. Equality of religious parties on it gives satisfaction out of doors. Advantages of its numbers, 24178–24185.—Ordinary business of Resident Commissioner; duties performed by the Board. A single head or a Board best for administrative purposes. No necessity for a second paid Commissioner. Reasons for dual secretaries. Balance as to religion among clerks generally, among Inspectors always, 24186–24193.—Present constitution better than one having a parliamentary chief. Changes in rules being submitted to Lord Lieutenant preferable to being laid before Parliament. Classes being well represented, no changes offensive to any large number would be made. Certain changes distasteful to Presbyterians; would not have been less ill-feeling had they been laid before Parliament before being acted on, 24194–24201.—No fundamental change is made without consent of Lord Lieutenant; all are sent to him through Secretary; no harm if they were laid before Council. Cannot always avoid discontent. Change that Presbyterians objected to did not effect one Presbyterian child, 24202–24207.

Board meetings less frequently than once a week might do; under present system no fear of business falling into the hands of a few, 24208–24211.

Monastic schools were excluded as being denominational; would not have excluded them himself; convent schools were retained because of their efficiency and of nuns being more amenable to regulation. Rule against convents having more than one school was to prevent their destroying all the others in the neighbourhood; does not object to this rule, 24212–24219.

Question as to a second paid Commissioner; more routine business than formerly; Board is fairly constituted and not too large; attendance at meetings; fair spirit to any who happen to be absent, 24220–24227.—Self and majority of Commissioners approve and desire continuance of peculiar fundamental principle of system, viz., non-interference with religion of pupils. Denominational system would cause majority to get a good education, and minority to do without. Difficulty of dealing with ecclesiastics, 24228–24236.—Many of the Commissioners are well acquainted with system; Resident Commissioner most so; some, who attend irregularly, need informing as business comes on. Appointment, dismissal, &c., of officers, and all other important matters, are brought before Board. Dismissals, fines, &c., have occasionally been revoked, 24237–24250.—Instance in 1862, when an officer was dismissed on what were considered good grounds, and was afterwards reinstated; a memorial was presented, as is almost always the case after a dismissal. Promise to lay particulars before Commission, 24250–24263.—Never heard of a re-appointment of an Inspector after several years' suspension, 24426.

Does not approve of "rival system," namely, a small paid body of Commissioners. At present, chief work is done by Resident Commissioner, Secretaries, and Chiefs of Inspection, but Commissioners oversee all, as they are responsible to the public, whose varied interests and feelings they represent, 24264–24275.—Fundamental principles are easily understood, but not always easily applied; advantage of representation of varied interests when discussions on important points arise; since increase in Board many divisions and protests. Bureaucratic feelings likely to prevail in a small paid Board. Have rescinded decisions, but never in deference to a popular cry; as to chaplains, 24276–24287.—Advantage of Resident Commissioner as a link between Board and officers; he sits on all committees, and attends Board meetings, and through him chief officers learn feelings and opinions of Board, as it is often not enough that they merely know decisions. Board being divided in opinion causes no difficulty to officers in carrying out their wishes, 24288–24301.

Is not aware that Board ever fell into mistake through ignorance of rules. Do not give speculative interpretations, but deal with cases when they arise. Knows of no reasonable doubt about interpretation of rule of 1866 on religious instruction. Interpretation would not have been left to officers; is not aware that they have applied for a uniform interpretation, 24302–24317.—Considers that under it a Protestant teacher is bound to put out a Roman Catholic during instruction in Authorised Version, but not a Protestant of another denomination.

Disagrees with an order signed by Mr. Keenan, Chief of Inspection, given in opposition to latter view, and agrees with one signed by Mr. Bole, District Inspector, in accordance with it. These conflicting views show that rule might have been better framed, 24318–24329.

Present paid Commissioner gives satisfaction to all, but is overworked; two paid Commissioners, one a Catholic, and the other a Protestant, would not alter relative power on Board, and would be advantageous, 24330–24334.—One secretary quite sufficient for the work, but two necessary to secure public confidence, which unfortunately does not exist between Roman Catholics and Protestants. Believes the day will come when above will not be necessary. As to such an arrangement for Protestant sects, 24335–24339.—Believes only instance of interference of Lord Lieutenant was suggesting rule of 1866; all important rules and changes must be laid before him; not desirable to lay them before Council, better left to his own responsibility, 24196, 24340–24346.

Scheme of State secular education, leaving religion wholly to patrons; unfair to minorities, even if latter were provided for by voluntary means; clergy might like it, but laity are satisfied with present system, 24347–24350.—No reference to denomination in appointing inspectors to districts, 24351–24353.—Objections of denominations to changes in rules; Catholics object most at present. Unnecessary to submit rules to Parliament; Board is freely criticised there already; the only advantage would be that rules could be discussed before coming into operation, 24354–24364.—Believes that educated part of Roman Catholic laity prefer present to denominational system, as it has all its advantages, but do not like to take steps hostile to clergy. State-aided education should be acceptable to clergy of the various Churches, 24365–24371.

Difficulties have occurred on removal of agricultural teachers on account of claims for improvements; might be well to make acceptance of some principle of arbitration a preliminary to granting aid, if landlords would submit to it, but doubts whether they would; does not think disputes arise between landlords and teachers, as Board make improvements. Is not aware that teachers take farms except of Board, who treat them liberally if they leave anything, 24372–24380.

Cannot say why Board allowed the book on geography to remain in a most imperfect condition for years; it might have been the best when it came out, and been since neglected. Schoolmasters are not confined to books of Board; the market of the latter is open to the public, 24381–24389.—A book written by one of Board's professors had a large circulation, but Board do not like their officers to write books; reasons, 24391, 24392.—Certain books are recommended to teachers in training, which are generally used by them; can hardly say this gives authors a monopoly; programme is seldom altered. Printing is put up to contract. Obligation to allow anyone to publish books, 24393–24400.—Further particulars as to printing and publishing books of Board; when they have paid for setting, &c., a book, of course it gives printer an advantage, but sometimes others will produce competing editions. Cannot get suitable books without publishing; does not see that this stops production of others, for if anyone wrote a good book the Board would very likely take it up. No necessity for one uniform book, 24401–24420.

Right Hon. Mountifort Longfield.

Though one secretary could do the work of the two, chiefs of inspection could not be dispensed with, 24421, 24422.—A scheme of separate schools for denominations where more than one, and present system with conscience clause where only one, might be worked. Grievance of want of religious instruction is very slight, 24423–24425.—Nuns are allowed as many schools as they can manage; lay teachers could compete if no superior influence at work; exclusion of monastic schools cannot be considered persecution; does not think they want to be under Board, 24427–24436.—Reading-books are so good as to exclude others; an unsectarian religious tone pervades them; is not aware that Roman Catholic bishops object to them, 24437–24442.

Does not know why Government appointed only one paid Commissioner; he stands superior in rank to all but three, and signs minutes as the organ of the Board, 24443–24448.—Board pay for copyright, and anybody may print their books, which must be in conformity with their views on secular education, 24449–24453.—Considers that if Roman Catholic bishops and clergy conscientiously object to National system it cannot be carried on, but makes a distinction between "objection conscientiously obtained" and a "conscientious objection." Action of Archbishops Murray and Whately showed that system is not incompatible with Roman Catholic or English Church. It still has sanction and good wishes of many priests, 24454–24463.

Regarding suggestion of denominational schools where there is room for two, only the secular instruction should be recognized or attended to by Inspector; hopes they would not be proselytizing. They should not be allowed unless minority school could muster eighty on roll; reasons. Would only be applicable to the larger towns. Board now pay teachers according to classification, and allow schools of less than thirty, but do not give full amount in such cases. Hope that these small schools will die out; a small school is a bad thing, 24464–24483.

The only fundamental change which hostility of Roman Catholic hierarchy would justify is denominational training schools; they still use National schools. Proper sphere of clergy is advice, not coercion. Though law does not allow anyone to come between parent and child, it allows parent to take any adviser he may choose, 24484–24494.—Bishops' position is one of expediency; partial denominational system above suggested would not entirely deprive parents of best school. Denominational training schools, with conscience clause for small minority, would not work. Protestants in convent schools, 24495–24500.—If secular teaching be intermixed with dogma, conscience clause is useless. Only two systems possible for Ireland, 24501–24503.

Macdonnell, Right Hon. Alexander.

Right Hon. Alexander Macdonnell.

First became a member, and Resident Commissioner, of National Education, in 1839, 1–3.—The machinery of the Board consists of six Head Inspectors, and sixty Inspectors, and a manager and teacher or teachers to every school, of which there are about 6,500 in operation. The Inspectors make weekly reports, which are received by Chiefs of Inspection. The Board itself consists of twenty members, who correspond directly with the managers, 4, 5.

When a new school is wanted, the local parties apply to the Board, who sends an Inspector to examine into the circumstances; the Board does not originate schools, except model schools, of which there are a few in Ireland, 6–8, 49.—When the school is established, the person who applies generally becomes the manager; if he mentions that he acts only as agent, the owner of the property is mostly appointed patron; but it is difficult always to distinguish between them; the appointment is in accordance with the desire of the owner, 9–11.—In all communications with the school, the Board always writes to the manager, whether he be patron or not, 12.

There are few cases of committees of management now; there were originally many, but they are going out of use; formerly the people were anxious that one of two patrons should be a Protestant, and the other a Roman Catholic; now there is hardly an instance of such a combination, 13, 14.

There is no fixed rule for communication with the managers; it is sometimes direct from the Board, sometimes through the Inspectors; the Inspector may report to the Board upon the matter, but there is no imperative rule on the subject; the Inspector keeps a journal, which he sends up weekly, and any communication he has with regard to a school would naturally appear in it, 15–18.—There is very little complaint or difficulty arising from the Inspector writing directly to the manager, 19.

The patron has the power of appointing and removing the teachers; the Board has a veto on the appointment, but not on the dismissal, 20–22.—The patron's responsibility consists in: that he will exercise a sound judgment in appointing and dismissing a teacher; in letting the Board know quarterly the progress of the school and the value of the teacher; in deciding what books are to be used, which must be of a non-sectarian character; in making arrangements with regard to the time-table; in paying the teacher's salary, and transmitting the receipt, 23–25, 45.—This system has worked well; the very few complaints made as to delay in payment of teachers' salaries have generally turned out to be groundless, 30–32.

The system has spread a large number of schools over the country, which is to be accounted for from the great demand for, and love of, education; and the country being poor, the people were anxious to place their schools under the Board; the increase in the number of schools has doubtless been caused by the increase in the number of Inspectors, who, being very intelligent men, were anxious to promote schools where required, 26–29.

The management of a committee of intelligent people, anxious to take part in the progress of a school, would be preferable to that of a single person; patrons and managers do a great deal of good, but they are not all so attentive to their duties as they might be, 33–36.—There is no recognition of managers *ex officio*, 37.—The Board has a veto on the appointment of managers, but it is seldom exercised; witness is not aware that managers have ever been dismissed for neglect, 38–40.—Roman Catholic managers are not more zealous than others, 46–48.

Many teachers are dismissed every year by the Board, although not dismissed by managers or patrons; in such case the manager fills the vacancy, the Board retaining their veto as before; every teacher is examined as soon as convenient after his appointment by the Inspector who visits the school, and if the report of the latter be unfavourable, the salary is withdrawn; a teacher may be tolerated at first, but on a second report of his deficiency he is dismissed, 41–44.

There is no apathy in any part of Ireland with respect to education; in Connaught the desire for education is spreading more and more, and if it be more backward in point of education than the rest of Ireland, it is because of its backwardness in point of wealth and general condition; the Roman Catholic clergy were not so favourable as in other parts to the National system; if it were possible grants should be given more liberally to Connaught and to the mountainous, insular, and peninsular districts of Ireland than to the richer parts, but there are difficulties in the way of doing so, 50–52.

On the death or removal of a manager, whatever he be, the Board, as a rule, recognise his successor as the succeeding manager; they have a control in such cases but never exercise it, except in case of decided unfitness, 53, 54.

In making quarterly payments, the usual quarters of the year are observed; and in the case of a school

examination in June, the fractional part is given, 55–57, 67.

Towards the cost of erecting a new school the Board contributes two-thirds, the locality or manager, &c., the remainder; the Board of Works see to the expenditure and the building of the school. As to maintenance, the repairs, if of a non-vested school, are made by the locality or manager, if of a vested school, built by the State, they are made by the State, through the Board of Works; if the school is vested in trustees, the trustees repair, 58–62.—The locality contributes towards keeping up the furniture, the supply of books, and support of teachers; the whole amount given by the locality, £52,000 a year, is very small in proportion to that given by the State; there is no compulsion used to make localities contribute, 63–66.

The salaries of teachers are paid entirely by the Board; teachers in National schools in Ireland, about 8,100 in number, receive in round numbers £250,000 a year from the State, and £52,000 from localities: of this £52,000 about £40,000 arises from school pence, the remainder from endowments and contributions; no difference is made by the Board in their payments as to vested or non-vested schools, 81–86.

In ordinary schools the teacher, appointed by the manager, is responsible both to him and the Board, who dismiss in case of unfitness by withdrawing the salary, 68–70.—The manager appoints the books to be used, the Board reserving a right of control; the Inspector is the censor of the books, or, in case of doubt, the Board itself; witness knows of no instance, out of the 6,500 schools, where other books than those of the Board are used, because they are good and cheap, 71–75.

Although the manager has the appointment of the time-table, he has no uncontrolled power over it; the Inspector examines it and, if he thinks requisite, recommends but does not require an alteration; there is no standard or model time-table; there are some which a manager can use if he pleases, but they are not required as a matter of necessity; the most useful thing done by Inspectors is to advise teachers and managers as to the most judicious time-table to be used; the arrangement of a time-table includes the time of religious instruction as well as other things, 76–80. Not desirable to have an absolute time-table for all Ireland, 102–104.

The mention made of the inattention of managers and laxity of supervision is not founded on any official report; it is merely a general impression, but is, nevertheless, well grounded; there are no means officially taken to record the amount of supervision given to a school, 87–90.

After a schoolmaster is appointed, the first occasion his competency is tested is when the Inspector visits the school, which is supposed to be three times a year; the patron appoints on his own responsibility, and if the teacher be incompetent or unworthy, the Commissioners have the power to refuse his salary from the time of his appointment; some such cases have occurred—not many; it would, perhaps, be fairer to pay the salary for the time before his examination, in default of a machinery to examine on appointment, 91–101.—Notice is given of the intended stoppage, 149, 150.

Few managers write regularly to the Board, either yearly or quarterly; they communicate every quarter through the payment of the teachers' salaries, certifying certain matters; but unless something special arises they are not expected or desired to write more frequently than once a quarter to the Board, 105–107.

The manager, if a clergyman, is not allowed by the rules to be a teacher in a National school, the Irish practice in that respect differing from that of England; it would be wrong to say they are not to take any part at all, it may be necessary for them to test by examination the education given in the schools; there should be a general liberty of the sort; but if exercised to a great extent it would be a dangerous thing; persons of education seldom take part in the management of a school where there are no managers, 109–113.

Right Hon. Alexander Macdonnell.

Every school is inspected three times a year by the Inspector of the district if possible; Inspectors are divided into three classes; they are sixty in number; there are six Head Inspectors—three Protestants, three Roman Catholics; it is on the report of the District Inspectors that teachers are dismissed and their salaries stopped, 115–122.

The school-pence amount to £40,000 a year; not all the children pay; the manager has the power of excusing from payment the children of destitute parents, the salary of the teacher coming from the State on the condition of teaching children not able to pay; the rate is 1*d.* a week; in some schools, especially in the North, 2*d.* or 3*d.* a week; the rate is higher in model schools; it is according to the ability of the parents to pay, and is left to the discretion of the manager, 123–127.

The remaining proportion of local funds, £12,000, arises from subscriptions, sermons, and every other source except the children's pence; with regard to the children's pence the manager has a liberty, but almost invariably he allows the money to go to the teacher; there may be exceptions; the manager is bound to show in his accounts how the school-pence are disposed of; there have been some, very rare, complaints of exorbitant school-pence being exacted; the amount of local assistance is increasing, although slowly, 128–134.—There are no accounts to show what proportion of the £12,000 comes from annual subscriptions; a landlord's subscription to a school would be mentioned in the Inspector's report, and the proportion, so far, might be ascertained, 151, 152, 170.

The Commissioners supply only a portion as free stock of what is wanted for the schools; their funds do not enable them to give a free stock sufficiently large, they therefore require the local parties to purchase the requisite proportion, which is purchased at first starting and is kept up afterwards; there is no rule or condition to that effect, the Commissioners expect it to be done, and generally it is done; the Inspector is bound to see that a sufficient amount of stock is purchased by the local parties, but it is not very narrowly looked into, 135–141.—The teacher of the school generally purchases the quantity of stock required, getting a per-centage for himself, which is a useful stimulus towards supplying schools with a sufficiency, 142, 143.

The rule that if the managers use any other than the Commissioners' books, they must notify the same, is strictly insisted upon; one instance occurred lately where the parties desired to use the Christian Brothers' books, which was disallowed, the books, though excellent, being of a sectarian character, 144–148, 225.

A very important class of schools in connexion with the Board is taught by religious ladies in convents, and a few by monks; these teachers are paid directly by the Board, and the schools are subject to the same rules, as other National schools; the value of the teachers' services is estimated by the number of children taught, 153–156.

The teacher ordinarily keeps the school accounts, which, when certified by the manager, are transmitted to the Board; the manager sends a receipt for the money, with a certificate that it has been received by the person for whom it was intended; the rules in Part VI. as to receipts being signed by managers and teachers are strictly enforced, 157–160.

There has been no loss arising from the transmission or the appropriation of money sent to managers; nor any kind of dishonesty on the part of managers or teachers, 161, 162.—No money goes to the manager but the payments for the teacher; a case cannot arise for dispute between the Board and the manager as to its appropriation, 163, 164.

Differences sometimes arise between the local manager and the Board with respect to teachers; the manager desires to save the teacher from dismissal, and gives his reasons. The Board always listen to such statements, and sometimes yield to them, if well founded, 165.—Witness thinks it would be a very unwise thing to alter the relations that in the main exist between

Right Hon. Alexander Macdonnell.

the central authority and managers of National schools in Ireland; it would not be desirable for the Board to assume more power over the managers than they now have; and altogether it would be unwise to make any essential alteration in the existing system, 166–168.

If a house have been erected or given rent free for a teacher's residence, it would be mentioned in the Inspector's report, 170.

It was taken into account, from the beginning of the National system, that local contributions should be made, and a further payment made therefrom to the teacher beyond the amount contributed by the State; Lord Stanley intended there should be a considerable local endowment in every case; the Commissioners of Education have been always desirous of pushing the matter as far as they could judiciously; but were wise in violating from the commencement the rule laid down by Lord Derby; their doing so has been a main element of success in the establishment of National schools in Ireland, 172–177.

In 1866 Ulster contributed the largest share of school-fees, having about one-third of all the schools in Ireland, and the largest proportion of local fees came from the county of Antrim, the richest county in Ireland, which being three-fourths Protestant had always enjoyed much prosperity and education; on the whole, local effort has increased with the increase of the education system, 177–180.

With respect to schools taught by nuns, there is no case of a school in connexion with the Board taught gratuitously by those religious ladies, they all receive the usual capitation grant, 185–188.

Every penny the nuns receive for teaching is spent on their work; they get £20 for 100 scholars; in all the 140 convent schools in Ireland more has been spent in the erection and management than has been received from the public, 209–211.—Nuns are not examined for classification if there are sufficient children attending and well taught, and if the Board's rules are observed, 212.—They are prevented (unwisely in witness's opinion) by a rule made in 1855 from teaching more than one school connected with a convent, 213, 214.—There would be a great difference of opinion on the question of allowing nuns to teach female schools gratuitously, 215.—The payments to the nuns are on the principle of capitation grants; there is no payment by results, 226–230.

Prescribed forms of school accounts are sent to be filled up, and if the return is properly made the disposal of any surplus fees above what is paid to the teacher would appear, 189–191.—The only money payment made by the Board is for the teacher's salary, books and apparatus are always given in kind; the money is sent by post office order, if possible, 192–194.

With respect to discipline, a teacher in any difficulty would go to the manager, or if the teacher were in fault, the manager would act; if the Board heard of a case requiring notice, they would inquire and act accordingly; communication with teachers is always through the managers; cases of cruelty on the part of teachers are very few, 195–200.

An estimate of the sum received from voluntary contributions towards the erection of vested schools can only be given generally, it is about a third of the amount expended, 201, 202.—The expense of providing non-vested schools is all supplied by the localities, 203, 204.

Although the teacher has an interest in the sale of books, no complaints have been made of forcing sales or of change of classification for the sake of new books; there is a remarkable amount of honesty on the part of our teachers in that respect, 205–208.—The books must be sold to the children at the usual price, otherwise action would be taken, 223, 224.

School accounts are examined by the Inspectors; they must be kept in a prescribed form; the Chiefs of Inspection and Head Inspectors can best supply this information, 216–222.

If a teacher wishes to expel a pupil, he must have the manager's permission; he is the manager's officer, short of the power of dismissing, which rests in the Board, 231–233.

The Board grants two-thirds of the cost of vested schools, whatever they may be worth when finished, the average is about £150; the Commissioners have plans and specifications, 234–238.

In the case of monks' schools, the system of payment is the same as in nuns' schools, and, like the latter, they are not classified, 240–244.

There is no rule prohibiting corporal punishment in National schools; it is very seldom inflicted, and never in model schools; any case of excessive punishment is discovered, not through the Inspector, but through the parents, who are sure to complain, 245–247.

The rule that "no members of a religious order will be recognised as teachers of a National school" relates only to males; the latter portion of the rule—"this does not apply to teachers of convent or monastery schools," applies to all convent schools that choose to place themselves under the Board and to the few monastery schools that were in connexion with the Board before the rule was passed and continue to be so; the rule prevents the multiplication of monastery schools, 248–251.

There is no difference in the functions of teachers of different classes; the classification depends on the acquirements of the teachers and their powers as such; a teacher may be rated first class, but unless he has an average attendance of thirty-five children he would not get first-rate pay, 252–254.

Probationers are persons who have recently entered the service and are not yet classed; they are not necessarily trained persons; after their appointment as teachers by managers they are examined by the Inspectors, and receive pay and are classified according to fitness; a probationer can be the sole master of a school; they must undergo examination, and if not fit for the third class must leave the service at the end of a year; the number of probationers is very large; the numbers who have passed and who have failed to pass will be found in returns furnished by the Commissioners of National Education, section 10, paragraph 4, 257–266.

As a general rule third class teachers have come in as probationers, being placed, when examined, in the class fitting for them, getting the corresponding salary; no person is allowed to enter the service until he is eighteen; no limit of age is fixed for refusal, but very few are above thirty at entering, 268–270.

A schoolmaster is not required to pass from one class to another within a given time; encouragement is given to a competent teacher to rise, but he is not excluded from the service if he remains in the third class, 271–275.—In promotions two elements are considered in a teacher—his intellectual attainments and his power of management; as to the relative value of these elements it has never been nicely settled, 273, 274.—The examinations upon this point are conducted by the Inspectors and Head Inspector; as the latter cannot possibly visit all the schools in his group of districts, the decision rests virtually on the Inspector; the Head Inspector can only judge of the teacher's intellectual qualifications, this he does at periodical meetings of the candidates for promotion; there have been a few complaints of unfair judgment, but, on the whole, the schoolmasters consider themselves justly treated; the Chiefs of Inspection inspect the papers, and thereby exercise a check, 276–286.

Monitors are recommended in the first instance by the Inspector, and are almost invariably taken from a particular school; the Board reserves the power of selection, and the manager has a veto on the appointment; teachers are anxious to increase the number of monitors, it is to their advantage; no monitor is allowed to a school which has not an average daily attendance of thirty-five, nor to teachers below a certain grade, 287–290, 297, 298, 300.—A junior monitor commences at eleven years of age for three years, he may then be chosen senior monitor for four years, from that rise to a first class monitor, with salary of £15 for first

year and £17 for second; the talent of teaching develops itself at the age of eleven, and children of the poor would be removed from school unless some such inducement be given them to remain; a junior monitor gets at first £2 a year, which rises to £4; the senior monitor's salary rises from £5 to £10, 291, 292.—Senior monitors are usually selected at fourteen years of age, they are not necessarily required to be juniors first, 293, 296.

Monitors have been established from a very early period, they were in the model schools from the first; the present corps of paid monitors numbers 3,000; the system has developed itself much within the last ten years; the Commissioners have not had occasion to check the undue multiplication of monitors, 299, 300.—If a monitor has served till eighteen, and is then selected by a manager as teacher, he then enters as a probationer; there must be many who do not find employment, but the teachers now entering the service are more and more drawn from the monitors; witness does not know what those become who are not teachers, nor whether they are appreciated because of their former monitorship, 302, 305.

Many teachers remain so all their lives, and many good teachers are lost by finding more profitable employment, 307, 309.—The supply of teachers is in one sense equal to the demand, but the supply of well qualified persons is much below what it should be; it is desirable to increase the supply of teachers, which can only be done by increasing the number and size of training institutions, 310–312.—Untrained teachers can rise to first and second class if they deserve it, 313.

There is no difficulty in procuring a sufficient supply of monitors; the number should be larger, as they must form the seed-plot of future teachers; the necessity that the boy must be clever, that the school has a high average attendance, and the low rate of pay, are restrictions on the more numerous supply of monitors, especially in the north; the present rate of pay was fixed some years ago, when prices were less expensive, they must, therefore, be considered too low now; if the Board had means afforded by Parliament it would give higher salaries, 314–317.

Female teachers predominate and are further increasing, for two reasons; female schools increase, and in mixed schools the Commissioners require the second teacher to be a female; there is a full supply of female candidates for the training schools, and but for the interdict laid on Roman Catholic female teachers, numbers would desire to be trained in the Central Institution; there is ample room for all who come, 319–322.

There are many mixed schools in Ireland, especially in the north; in the south and middle the Roman Catholic clergy are anxious to have male and female schools exclusively; the sex of the head teacher in a mixed school is left to the manager's discretion, but if there be a second teacher, it is expected (though not imperatively) that a female be chosen; the question of male or female principal teacher depends chiefly on the number of children in attendance, 323–325.

Female teachers, on the whole, continue longer in their schools than males, even after marriage; many especially of the first-class teachers remain long unmarried, 326, 327.

There has been a considerable increase in the scales of payment for teachers in the last twenty years; the qualifications required have remained the same; no elevation has been necessary, 328, 329.

Trained teachers are preferred by Protestant patrons; the Roman Catholic Church objecting to them, they are not so demanded by Catholic patrons as they formerly were, 330.

The present scale of salary is much too low; an increase in it is the main thing required to improve the teachers and keep them longer in the service; the best and most effective way is to give them a house and garden, but that must be done by the gentry of the country; nothing has been done practically by the Board on the subject; it has directed attention to the matter in its reports, 331–335.—There have been 7,000 teachers trained, and there now remain 3,320; the Board does not know what has become of the number fallen off; witness attributes the falling off to the insufficiency of salary, 336–338.—The Commissioners are aware of the Inspectors' report of 1864 on this point, and are anxious to increase salaries, but fear to alarm the House of Commons by asking for larger grants, 339.—The salaries of principal teachers vary from £18 (for the second division of third class) to £52 (for the first division of first class); upwards of 1,300 receive only £18 a year; and a first-class teacher, unless he has a daily average attendance of 35, would be depressed in salary; the Board pays for the man's abilities, but looks chiefly to the amount of good done to the community, 340–347.

Right Hon. Alexander Macdonnell.

Monitors remain long in the service in the south of Ireland—in the north, where there is manufacturing occupation, they swarm off rapidly; it is difficult to get good monitors in the north; the 3,000 paid monitors are scattered over the country; it is desirable they should be so, they are the chief nursery of the future teachers, now the Roman Catholic clergy will not allow their teachers to be trained; a great number of first-class monitors are in the convent schools, 348–354.

The arrangement of teachers in different classes depends on the report of the Inspector and Head Inspector; there are no specific instructions, and no inconvenience has arisen from their absence; Inspectors have pretty much the same standard throughout the country; the question would be referred to the Chief of Inspection, 357–359.

The appointment of monitors by the Board, and of teachers by managers, appears a little inconsistent, but the patrons have submitted cheerfully to the Board's selection, reserving to themselves the power of declining to employ the person selected; the system prevents favouritism, 360.—No apprehension is felt about an increase in the number of monitors such as was felt in England about pupil-teachers, 361.

The waste or diminution in the number of trained teachers is less than it is in England, but then there were fewer trained at first, 364.—No retiring pension is granted after length of service; a gratuity at the rate of one year's salary for ten years' service is allowed to persons broken in health or aged, 365, 366.

The Commissioners of Education have no fixed opinion in favour of or against mixed schools; with a small population, one good mixed school is preferable to two small separate schools; no reasons have been mentioned why the clergy of the south and west are disinclined to mixed schools; witness doubts not that they have a notion that it is not desirable for persons of sixteen or seventeen to be taught together, and that a special secular and a special religious education is fitter for the one and the other, 367, 368.

If the religious teacher gives as good an education as the lay teacher he should receive the same remuneration, 369, 370.

Why nuns have been always exempt from examination is, the understanding that they had the greatest objection to it; so long as the convent schools were as good as others, it was not thought necessary or wise to force the nuns to a classification; although the nuns in England, with slight exceptions, undergo the same examinations as lay teachers, witness has always understood there would be the greatest objection to it here, 371–373.—The nuns do not exclude any class of children from their schools, but very few Protestants go to them, 374.

All other things being equal, it will be generally found that a first-class teacher is a superior teacher to a third-class teacher; there are exceptions; but the general rule that a first-class teacher does more good to the public than a third-class teacher is the chief principle upon which the variation in the salaries is made, 375–377.

The Inspector's examination is partly oral, partly by written papers: the written questions are sent simultaneously to the examiners; the persons examined are not aware of what questions will be put to them; there is no suspicion of favouritism, 378–381.—The chief

Right Hon. Alexander Macdonnell.

elements of classification are ability, knowledge, and usefulness as a teacher; no one of an immoral character would be classed, although they do not enter minutely into the question of morals, provided that on the whole he is well conducted, 382, 383.

The teacher of a first-class school with thirty-five children would receive a salary of £52; a monitor might be allowed, whose pay would be from £2 as a junior monitor up to the maximum of £10 as a senior monitor; such a grant to so small a school does not appear reasonable, 384-388.

With regard to augmentation of teachers' salaries, it is very difficult in Ireland to raise much money by local aid; if residences are given to teachers it would be very desirable to have land, say an acre; witness cannot enter into the question as to the dismissal of a teacher while his crop was in the ground, 390–393.—Parliamentary power to take land for teachers' houses and gardens would be desirable if it could be obtained; there are many cases where it would not be desirable to give land to teachers; the more intellectual teachers are not likely to wish for or to take an interest in managing land, 394–395.

In extending the benefits of training it is necessary to make liberal allowance for the wishes of teachers and managers, 396–397.

With reference to the appointment of a teacher before examination, it would be very desirable, but very difficult, for him to be examined before appointment, 398–399.

From the beginning it was the rule that no clergyman, even though he gave up the cure of souls, should teach in a school; but monks and nuns could; the rule was an unnecessary restriction upon liberty, 400–404.

The rule permitting untrained teachers to be admitted as first-class teachers is recent, and was adopted because of the objection of the Roman Catholic Church to receiving teachers trained at the Board's model schools, 405–406.

Although the manager has the appointment of the teacher he generally asks the Inspector to recommend him a master, and the practice is on the increase; much of an Inspector's utility consists in his being able at all times to advise, 407.

Mixed schools in the north of Ireland are so because of the smallness of the population, and also from the desire to educate the sexes together; such schools are preferred in the north; in the south less preference is given to them, 408–409.

Female teachers are easier to be found than male teachers because of the greater relative improvement in the education of women than of men during the last ten or fifteen years, the demand for male labour being infinitely greater in other walks of life; and a large proportion of female teachers have been educated in convent schools, where they get a most admirable training, 410–411.

Independently of the class of monitors being a nursery for masters, the monitors are useful as teachers of schools, and there ought to be more, supposing even they did not become teachers afterwards; more could be had if there were means of paying for them, 412–413.

Schoolmasters are mostly lodgers, 414.—The rule of the Commissioners against granting aids for building residences was of their own making; it was thought at the time there was more necessity for schools; the question as to the policy of giving aid towards the erection of teachers' residences has never come before the Board, 415–417.

If the man were qualified both to teach school and to manage three or four acres of land, it would, in an agricultural country like Ireland, be productive of the greatest good; he would be required in that case to teach the Board's Agricultural Manual to the pupils; the danger of his neglecting the school for the land is to be guarded against by the Inspectors, 419–421.

The check on the returns of numbers of children in attendance at schools on which is grounded the Government grant is in the examination by the Inspectors as minutely as possible of the accounts kept by the teachers; on the whole, it is believed these accounts are accurately kept, although many teachers have been dismissed on account of the inaccuracy or dishonesty of their accounts; this examination of accounts applies both to common schools and to those taught by religious bodies; in convent schools the capitation allowance depends entirely on the number of pupils, 422–424.

There are 144 teachers receiving good service salary; to obtain this they must have served some years, those in the first class eight years, in the second twelve, and in the third seventeen years; they must, besides, be distinguished as good and useful teachers; the printed conditions will be found under the head "Teachers. Part IV., section 7*b*—Supplemental or Good Service Salaries," 425–427.—The Inspector reports in the first instance, and gives his reasons; the concurrence of the Head Inspector is required in every case, 428–430.

There are sixty Inspectors, who are divided into three grades, six Head Inspectors, and two Chiefs of Inspection; Ireland is divided into two districts, one under each head of inspection; sixty districts are distributed among the six Head Inspectors, each having about 1,000 schools under him; the Chiefs of Inspection are appointed by the Board of Education, the Head Inspectors are selected from the best and most deserving of the Inspectors; no examination is requisite for promotion to rank of Head Inspector or Chief of Inspection, 431–440, 470.—Inspectors undergo a sort of competitive examination before appointment, 441–444.—They attend after appointment to learn the details of their future duties, go with an Inspector and Head Inspector to witness the mode of action and make experimental inspections, they then go to the districts assigned to them; no successful candidate has been rejected for want of aptness; no officers but Inspectors and clerks in the office are examined by the Civil Service Commissioners, 445–447.—Inspectors of the third class were formerly called Sub-Inspectors, 448.

It is always the practice when a vacancy occurs to send up several candidates; many inspectors have been teachers, but there is no restriction to any class of persons; generally the best candidate among the teachers is a teacher of a model school, 449–453.—The proportion of Inspectors who have been teachers is large, and is increasing; candidates not already in the service apply, if a Protestant to a Protestant member of the Board, if a Roman Catholic to a Roman Catholic member, 454–455.—Several of the existing Inspectors are university graduates belonging to the educated middle class, 457–460.—No condition is imposed after passing the examination but that of being of good character; no preliminary acquaintance with the management of schools is required, 458–459.—It is desirable that teachers should be candidates, desirable also that they should not have a monopoly, 461.

There is no professional bias in the reports of teacher-inspectors when compared with others; their conduct and talent is quite equal to that of other Inspectors; only one Inspector who had been a teacher has been dismissed; nine Inspectors in all since 1839 have been dismissed either for neglect of duty or improper conduct, 462–465.—Books used formerly to be sent to the Inspectors' depôts, who sold them to the schools, a practice which interfered with their higher duties and led to irregularities; that source of defalcation is now removed, 466–468.

The duties of Head Inspectors, of whom there are six, each having charge of a group of districts through which he travels, consist in inspecting the schools, examining remarks and suggestions, holding special inquiries and annual examinations, classifying teachers, and reporting to the Commissioners on the work of the district inspectors, and of their communications with the latter, 469.

The Head Inspector sends up each week a report of the work done by him and of each school he examines: it would be impossible for him to go round his 1,000 schools in regular circuit; he selects in the course of the year those he thinks it most desirable to examine;

there is no rule laid down; each Head Inspector examines on an average 300 schools in a year; the selection is left to his judgment; but he is expected to visit every school within a few years, 471–475.

There is great anxiety in the head office to discover any neglect on the part of an Inspector in visiting his schools; the Head Inspectors have a great deal of office work; the Inspectors' reports come directly to the office; if there is anything of importance the Head Inspectors, who reside at different places, are informed through the office, 476–481.—They communicate directly with the Board, and their reports go immediately to the Chiefs of Inspection; it is a part of their duty to examine minutely into school accounts, 482–483.

The Chiefs of Inspection reside in Dublin, but are expected to examine some schools for about a month in the year (their vacation time) in order to keep up an intimate acquaintance with the state of education; no formal reports are made of these examinations, 484.

Ample directions are given in the printed code of instructions for Inspectors; the Head Inspectors superintend the District Inspectors without any formal rule to that effect, and would, if necessary, direct them to visit any particular school, 485–488.

Communications from Chiefs of Inspection must proceed through the Board's Secretaries to the persons to whom addressed, 489.

Inspectors have the power of appeal, but it is scarcely ever exercised; their weekly reports are made on printed forms; they have to state reasons for their conclusions, 490–492.—Once a year the Inspector is bound to examine every child and to class it; on other occasions he is to examine as far as time will permit, 493.

In a primary report, made every fourth year, the Inspector must state every thing connected with the school and premises; in the secondary report No. 1. he is bound to examine every child in the school he is reporting; in secondary report No. 2. it is not necessary to examine every child; report No. 1. is sent in yearly, No. 2. possibly twice a year; no stated time is fixed for No. 1, and the parties to be examined must have warning; on other occasions the Inspector's visit is to be unexpected; there is no uniform practice as to making these reports or visits, 494–500.

The question in the report asking if there are any points calling for the notice of the Board is not unfrequently answered at considerable length; if there be anything the manager of the school should know, the substance only of it is sent to him; the managers sometimes make rejoinders, but not much continued correspondence arises, 501–504.

No portion of a teacher's salary is awarded on results; the salary is paid according to efficiency and attention; a first-class teacher receiving the highest salary would, for neglect, be fined; if he did not improve, his salary or his classification would be lowered; all this depends on the personal judgment of the Inspector; the teachers sometimes, but seldom, complain of severe punishment, 505–507.—In case of complaint the Head Inspector is sent to examine the case, 508.

About 600 reports from Inspectors are received weekly; Head Inspectors also report weekly; Chiefs of Inspection do not send reports, they are employed in superintending, 509–513.—In addition each Inspector and Head Inspector makes an annual report, 518–520.

The number of Inspectors is not sufficient to enable them to visit all their schools three times a year; they cannot fairly do so more than twice a year; the question of increase in numbers lies with the Board of Education, who would have to consult the Treasury, 515, 516.—In 1866, 439 schools were examined only once, and 1,643 only twice, 517.

The Head Inspector and the Inspector do not go together when visiting schools; in making special inquiries they frequently do so; it is important that the Inspector should not know what schools the Head Inspector will visit, the latter being in a great degree a check upon the other, 521–526.

With reference to the dismissal of some teachers for making exaggerated returns of school attendance, there has been no case of dishonesty on the part of religious bodies on that point; the grant is made on the average daily attendance, 527–529. Right Hon. Alexander Macdonnell.

It is possible a teacher may have fulfilled the conditions and yet not have received the good service salary; the Board's means are limited, but it would be glad, in case of an oversight, to have the case investigated; on the contrary, some persons who have not kept up to the standard may have received the salary, in these cases also a thorough examination would be made willingly; there have been cases where the Inspector has recommended for these salaries and the Head Inspector has objected, 530–532.

Witness is not aware that any complaints have been made as to the mode in which candidates for inspectorships comes before the Board, 533, 534.

The reports from the Inspectors bear favourable testimony to their diligence and their labours, which are constant, and their duties numerous; many have to go long distances to the schools they visit, 535–537.

The inspection of the several districts is advancing in effectiveness; the system is a good one, its only defect is the paucity of Inspectors, 538, 539.—When an Inspector has 120 or 130 schools under him it is impossible for him to have that minute knowledge of them it were desirable he should have; the Inspectors do their best to be thoroughly acquainted with the teachers under them, as is proved by their reports, which are filled with favourable testimony as to their general good conduct and devotion to their duties, 540.

A classified list of Inspectors who have been dismissed could be furnished, but it would take time to prepare; one Inspector dismissed was afterwards restored, 541, 542.

The action taken by the Chief of Inspection upon the Inspectors' reports consists in this: if he sees anything in them requiring action he gives directions accordingly; if a letter is required to be written, a letter is written; the chiefs sit in the same room, and often consult one another, 543, 544.

Head Inspectors and District Inspectors work harmoniously together, 545, 546.

The system of payment by results is acted on practically, but not to a great extent, 547.

Witness describes how the dishonesty of a teacher in his returns of the number of pupils in school may be discovered, 548, 549.—All visits of Inspectors are unexpected, except that for secondary Report No. 1, 550.

An Inspector cannot make three visits in the year to all his schools; it would be better, unless the number of Inspectors be increased, to be content with two real inspections in a year, 551, 552. If an Inspector be bound to examine his schools three times a year, he ought not to have more than seventy under his charge, 565.

At two periods of the year, sowing time and reaping time, the attendance of children is much less than at other times; allowance would be made for that; a manager who attended faithfully to his duty, could check the returns from day to day, but there are very few who attend so closely; detections of inaccuracy do not arise from the vigilance of the managers, 553–556.

The examination of teachers by the Head and District Inspector is annual, and generally about the same time; a teacher appointed by a manager may teach for a year before examination as to his capability, and receive a higher salary than he merits; but when examined he gets his class salary from the time of appointment, 558-561, 564.

Many cases have occurred of teachers being removed for incompetency, 562, 563.

The managers' returns are quarterly, and have reference to the payment of teachers' salaries; they go directly to the office, and furnish a check for Inspector's returns as to the number of children, 567–571.—Teachers only keep a daily attendance-book, 572.

The Inspector writes a report in the School Observation Book, which is kept in the school and is open to the public; and sends a report to Dublin, which is not intended for the public; the latter is not supposed to be an exact copy of the former, 572–577.

Right Hon. Alexander Macdonnell.

The infliction of a fine for misconduct or inattention of a teacher is something analogous to "payment by results;" the fine is in consequence of the Inspector's report, but the latter seldom mentions the amount of fine, it is left to the Board, 578-580.—The only means of checking such judgment of the Inspector, supposing the manager to rebel, is by sending the Head Inspector to examine into the matter, 581.

The constant communication of a Head Inspector with his District Inspectors is the Board's ground for believing that a uniform standard of school examination exists, 582.

A new Inspector undergoes no sort of apprenticeship; he is chosen by competitive examination, studies official documents for about three weeks, travels with an Inspector for another three weeks, and so picks up a knowledge of his duties, 583.—An Inspector is not permitted to annoy a teacher by inquisitorial inquiries or otherwise, 584.—A new Inspector can disapprove of his predecessor's plans, if he shows them to be faulty, 585.

The Board enforces the Inspector's recommendations against the teacher by fines, stoppage of salary, &c.; if the school premises be defective, the manager and teacher have notice; if the repairs be not made, the teacher's salary is withdrawn, he being made to suffer for the fault of the manager, 586-588.

A school having 150 children, and capable of holding only 100, would have monitors awarded only in proportion to the 100; the dimensions of a school are always looked to by the Inspectors; overcrowding would always influence the treatment of a school, 589-591.

The rules require the Inspector to visit his schools unexpectedly; witness is not aware that an Inspector always visits the same set of schools at the same period of the year; the more unexpected his visits the better; it is his duty to visit the school as soon after opening as possible, 592-596.

The Inspectors' districts are changed about every six years; there is no certain period for the change; when it is desirable, 597-599.

The Inspectors being the most important officers of the Board, as only through them can a knowledge of anything about the schools be obtained, and not being able to visit their schools as often as they ought, should certainly be increased in number to 93; the only difficulty in procuring that increase would be the expense, 600-606.

The pay of Inspectors of the third class is not sufficient to live upon respectably and in strict morality; practically it is sufficient to attract such a class as could be depended on, 607, 608.

The quarterly return of the manager of a school must be properly filled up before the teacher's salary is paid; the power of imposing fines on teachers, in consequence of neglect or violation of rules by themselves or by local patrons and conductors, was always in the Board; in non-vested schools the manager alone can dismiss, because the school is his own, 609-614.

If an Inspector recommends that a teacher be fined, his report comes first to the office, and is dealt with by a Chief of Inspection; if there be any difficulty in the case, the Chief refers it to witness; if more consideration be required, it is brought before the Board; no fine is inflicted but by the Board directly, 615-618.

It was considered in 1858 that much good might be done by sending persons through the country to organize schools, and some of the best teachers were appointed to do so; organizing teachers are still employed, but not to any great extent; their chief use at present is in performing temporarily the duties of Inspectors who die or are removed; witness thinks the system a good one; a school organizer, being a man who thoroughly understands school-keeping, can give good advice and set a good example; the system would, if carried out, supplement the work of the present Inspectors; there are at present four acting organizers, and three acting *pro tempore* as Inspectors, 619-626, 634, 635.—Organizing masters get £150 a year, 642, 643.—So far as witness knows, the Roman Catholic authorities have no objection to them; they remain in a school about two or three weeks, 644, 645. If the objection of Roman Catholic patrons to take teachers from the central training establishment continues, it would be desirable to extend the system of school organization, 639-641.

The rule against the admission of convent or monastic schools into communion with the Board was made soon after the inquiry in the House of Lords on the retirement of Archbishop Whately from the Board, 627.

With regard to the table in the report as to good service salaries, a person shown therein to be possessed of a seventeen years' salary, for example, may have been appointed to receipt of it only very recently, 557, 558, 628-631.

A report book is placed on the desk of the teacher, accessible to the public, in which every person who visits the school is requested to make his observations, 632, 633.

The reports of the Head Inspectors, published yearly, are generally given without omissions; the Commissioners are the parties who exercise this discretion; the reports are remarkably candid, 636-638.

In providing school accommodation for the whole population of a district, the highest limit of age at which children should be admitted should be fifteen; in building a school the probable number of children is ascertained, not the population of the parish; the ordinary radius within which children would come to school is from two to three miles, except in the case of infant schools, of which there are not many in Ireland; the Board would be guided in determining the accommodation by the report of the Inspector as to the number of children he had reason to believe would attend, presumably between seven and eleven years of age, 648-654, 681.—In 1865 there were in round numbers 100,000 children above thirteen years of age in ordinary schools, 657. There is no means of estimating the number of children in schools not connected with the Board, 658.

The basis of estimation as to the number of children a school ought to hold is its contents in square feet; the Primary Reports show the size of the school-rooms, from which can be deduced the number of children each is capable of holding with due regard to sanitary requirements, 659, 660.

In some districts the school-houses are much better than in others; vested schools are on the whole better than non-vested; county Kerry has very good vested schools; non-vested schools in the north are better than those in the west, and some parts of the south; in Kerry, Limerick, and parts of Tipperary they are good, 661-663.—Connaught is not well supplied with schools, and the schools that are there are not so good as in richer parts of Ireland, partly because of the opposition to the National system in that province, 664, 665.

Generally throughout Ireland schools are not sufficiently numerous; in some parts there are too many; that is, the number of children might be accommodated in fewer schools; this remark applies chiefly to non-vested schools, for one vested school is never placed within three miles of another, 666-668.—Still, if a non-vested school, within one mile or so of one vested, applies to be taken into connexion, if there is a sufficient number of children and a qualified teacher, the grant is made, 669.

No discouragement is imposed on masters of non-vested schools; practically there is little difference between them and the vested schools; the chief difference is that the vested school is partly built by the State, and that ministers of different denominations can religiously instruct according to their own views; in a non-vested school the manager can confine the religious instruction according to his own faith; but the power in vested schools of giving such instruction separate from that of the manager is made little use of, 670.

A vested school cannot cease to be vested unless there is a clause in the deed allowing the trustees to redeem, 671.

Non-vested schools are constantly increasing; in 1866 there was an addition of sixty-eight, and about twelve or thirteen vested schools, 672, 673.

Small grants of salary are made to night schools; there are not many in Ireland; the number is increasing, but only in large towns, like Belfast; £5 a year for every twenty-five attendants is allowed to the teacher, who is generally the teacher of the National school to which the night school is attached; no complaint has been made that the teachers overwork themselves and so neglect the day schools, but it would be desirable that other persons should be employed for the purpose; the Inspectors are bound to visit night schools, which is another reason for increasing their numbers; the returns of attendance are kept in the same manner as those of day schools, 674–677.—There is no means of learning the efficiency of night schools but by the reports of the Inspectors, 679.

In building vested schools, the practice is to insist on one-third the expense being furnished by the locality; when the school is built, the Board of Works, by whom the whole thing is done, pays its two-thirds, and always sees that the locality's one-third is first expended; our part is to ascertain whether a school ought to be built, and the Board of Works sees to the building it; the case would be the same as to repairs, 682–691.—The Board of Works repair all schools vested in the Board of Education, those vested in trustees must be repaired by the trustees, 692, 693.—School-houses are generally in a pretty good state of repair, 694.—Non-vested schools are reasonably well attended to in regard to repairs, 708.

There is much complaint as to the dilatoriness of the Board of Works in building and carrying out repairs; there is constant communication with them on the subject; there is no special record of these cases kept, but the facts can be easily ascertained, 695–698.—The complaints mostly come from the Inspectors, 709.

No local rate is levied on the school-houses, 699.

Within the last three years the stoppages of grants on account of the buildings falling out of repair have been 14 in 1865, 13 in 1866, 10 in 1867, 700–701.

There are no official means of estimating the number of schools not belonging to the Board; there is a considerable number, 500 or 600 at least, of what are called hedge schools still in Ireland, 702–704.

Briefly the great object of this system of education was to give to the poor of every denomination in Ireland as good a secular education as possible, free from all suspicion of proselytism; to give every facility for separate religious instruction; and to give the secular education to Roman Catholics and Protestants unitedly, 705.—It was at first supposed that 5,000 schools would cover the country; they now number 6,500, and many more are wanted, 706, 707.—It is an evil connected with education in Ireland that many poor teachers under the Board are expected to pay the rents of their school-houses, 709.

Excepting in towns, the three-mile rule is strictly observed, 710.—Many vested schools have ceased to be such, especially in Connaught, where, because of the opposition of the Roman Catholic clergy, they have fallen out of repair; the State has not received back its proportion expended on them, 710–712.

Half the Inspectors are Protestants, half Roman Catholics, except in the third class, in which are six Roman Catholics and four Protestants; there is no rule to that effect, the practice has always been so, 713–714.

The Board does not interfere with the building of new schools or repairs of non-vested schools; the whole expense of education in Ireland consists of two grants, one of say £340,000 for the Board of Education, and one of say £13,000 for the Board of Works, 718–721.—The amount teachers earn from the Science and Art Department is not taken into account, which forms a third item of public encouragement to the education of the Irish people, 722–723.

The first motion for repairs generally comes from the Board of Education, on the report of the Inspector, which is communicated to the Board of Works; sometimes their own officers discover a school in want of repair; reference to the Board of Works is kept up till the repairs are completed, 724–726, 737.—The only way to enforce repairs of a non-vested school is by stopping the grant, 736. Right Hon. Alexander Macdonnell.

The estimate for building and repairing is prepared by the Board of Works, on information supplied by us; if funds remain in hand at the end of the financial year they must be returned, 728–730.

The Board of Education renders aid to schools under four heads: salaries of teachers, salaries of monitors, repairs, and books and apparatus; the last estimate for books was nearly £13,000; if schools do not use the Board's books no equivalent grant is made to them, 731–735.

The Inspector's information as to the number of children likely to attend a proposed school is obtained on the spot by inquiries, 738, 739.

The class of pupils attending night schools will be shown in the returns only in a general way; they are both adults and non-adults; night schools are of the greatest possible advantage, 740–742.

The total receipts from subscriptions received by National school teachers in 1866 amounted to £12,441, of which £4,380 was from local endowments; in this amount the value of teachers' residences is not included, neither are the children's pence, 743–744, 746.

The schools of Erasmus Smith are not under the Board, 745.

The Government grant is paid by the Treasury through the Bank of Ireland, where the Board keeps an account; accounts are sent monthly to the audit office, with all vouchers except receipts from National school teachers; they are seldom disallowed; the accounts for 1866 are fully and finally audited, 747–755.

There is no official recognition of the classes formed under the Science and Art Department in connexion with the National Board, 756, 757.

From the first the distinction between vested and non-vested schools was in use; and with regard to the power of the patron as to religious matters, it is difficult to reconcile the statement in the report, explanatory of Lord Stanley's letter, with the long-recognised distinction between vested and non-vested schools; it appears from the passage referred to that that distinction did not exist in 1836, 758–761.

The present arrangement with regard to building and repair by the Board of Works came into operation about eleven years ago; it was made at the desire of the Treasury; it cannot be said the change was a bad one, 762–768.—The Board of Works has clerks of works in different parts of Ireland, 769.—A return for last year, showing the amount spent in building, cost of architect, clerks of works, &c., classified under different heads, will be found in Appendix No. 2, 771.

Further Examination.

Increase in the number of members of the National Board, from time to time, from seven to twenty; reasons for such increase, 11095–11102.—The meetings are weekly or fortnightly, as the case may be, 11103, 11104.—Equality in numbers of Protestants and Roman Catholics is necessary to the successful and just working of the National system; a representative Board cannot now be dispensed with, although a paid Board might at first have been necessary; twenty (the present) is a sufficient number of members, 11105–11107.—There was less discussion and more unanimity when the Board was less in number; the increased Board has not interfered with the efficiency and despatch of business; the chief point is to have Protestants and Roman Catholics balanced, but with lesser numbers there is less chance of having superior minds and information, 11110–11114, 11141.—It is not desirable to have a Board smaller than at present; a small paid Board of three members, one a Roman Catholic, one a Presbyterian, and one a Church of England man, would be fatal to the system, 11139–11142.

Such a Board as there is now is decidedly desirable, the system not yet having attained its maturity; the last increase in its numbers gave unmixed satisfaction

Right Hon. Alexander Macdonnell.

to the Roman Catholics, and the Protestants never publicly objected to it, 11115–11117.—As an administrative body, the Board stands as high with the public as it ever did, the proof being that the schools are constantly increasing in number, 11118.—There is less business brought before the Board, and less debating, than there was twenty years ago, 11119.—The administration of the Board is in a great degree carried on by the chief officers, 11120–11121.

Questions arising out of the religious differences of the country form, and have formed, a considerable part of the discussions of the Board, but more time is occupied with purely educational questions than religious ones, 11122, 11123.—The action of the Board has been generally uniform, and, though nothing would give unmixed satisfaction to a nation like ours, there has been no case in which the public has been decidedly against it, 11124, 11125.

The Board has brought back its system to the original rule, that no child shall receive religious instruction adverse to its profession without the express consent of its parent, the departure from the system consisted in the child receiving such instruction voluntarily, 11120–11123, 11126–11132.

Practically, the meetings of the Board consist of six or eight members, but when matters of importance require their attendance there is no difficulty in getting a large attendance; "matters of importance" means anything that touches religious feeling, or any appointment of importance; these appointments are not made entirely in accordance with merit or seniority, 11133–11138.—There is no chairman of the Board; a question requiring a casting vote has never arisen; the practical advantage of having equal numbers on the Board consists in having both parties of the people fairly represented, 11188–11194.

If the question were put the majority of the people would prefer the present system, and if it were upset, and a denominational one established, it must be administered by a paid Board; if a National system, a mixed system, is to be maintained by Government, the only chance is to continue the present Board, with a paid Commissioner and paid officers under him, 11143–11147.—It is important that the general public should be represented in a council of education, and the present Board represents the interests of every part of the public in a remarkable manner, 11148–11150.—It would not do to place the education of the Irish people under one minister of public instruction sitting in London; no practical evil has arisen from the Chief Secretary for Ireland not being a member of the Board, and therefore not being thoroughly familiar with its business, 11152–11155.

The more united the training of Protestant and Roman Catholic pupil-teachers the better; but if one great denomination will not avail itself of our State teaching, means should be given to them to provide training for themselves, which would be favourable to the system's successful working, 11156, 11157.

The inadequacy of payments to convent schools can be remedied by introducing a system of payments by results, 11158.—An increased allowance to them would be an act of justice, 11205–11207.

The complaints of delays in repairing schools by the Board of Works can be remedied by increasing the means of that Board; building and repairs of schools were at first done by the Board of Education with tolerable success, but were wisely transferred to a Board more conversant with such matters; there is no want of harmony between the two Boards, 11159–11168.—The ordinary repairs of non-vested schools might be made by Government, 11170–11174, 11208.—There has been a great deal of trouble about the repairs of school-houses vested in trustees, 11326–11329.

The right in vested schools of pastors of all denominations to give religious instruction at convenient times is so little used, that the distinction between vested and non-vested schools is of little importance, 11169.

The State cannot help the Church Education schools without, at the same time, helping the Christian Brothers' and all other denominational schools; in doing so, the whole system of National education goes to pieces; there is no advantage in any system being supported wholly or in part by voluntary subscriptions, 11175–11180.—A school which is always open to the introduction of the religious element is denominational in the strictest sense of the word, 11181, 11182.—The system of National education consists in excluding all sectarian religious teaching, but declining to make secular teaching exclusively secular, all the books being permeated with a religious but not sectarian spirit, of so general a nature that hardly anyone has objected to them, and nothing but good has arisen from it, 11183–11187.—Notwithstanding the books of the Board being permeated with a religious spirit, no complaint has arisen of a teacher availing himself of them to infuse his own opinions into the children of another sect, 11217–11219.—Being subjected to a severe scrutiny before adoption, the books must be unobjectionable, even to the most fastidious, 11224, 11225.

Practically the great part of the business is done by the permanent paid officers, everything of importance requiring further consideration being brought before the Board; the secretaries are good officers; the division of the officers into Protestants and Roman Catholics does not interfere seriously with promotion; it is of more importance to have a person understanding the feelings of his church than to give way to mere seniority; two secretaries are necessary, 11195–11204.

Desks, &c., might be furnished to non-vested schools at little expense, to the State; if the State were willing to be at the chief expense (two-thirds) for building such schools, it would be a great advantage to Ireland, but such a thing is impossible, 11208–11211.

The universal preference of the Irish people is not in favour of denominational schools; all parents who are able and wish to send their children to boarding schools would naturally send them where they would be educated according to their own views, but that is quite a different question from the education of the poor; this does not necessarily involve a preference for the denominational system over the ordinary day schools, 11212–11216, 11226–11228.

A great number of the middle class schools that formerly existed were extinguished at the time of the famine, not only for that reason, but also because the National system absorbed the education of the people; therefore Government ought to establish middle class schools to replace them, or establish 500 National schools of a higher order, giving a rough classical education, in addition to the elementary education now given, and which should be day schools, 11229–11233.—In doing this, the expense of the system would not be increased, and the teachers would gain an accession to their incomes, 11336–11338.—Or, if they were residentary schools (that is, boarding schools), there is no reason (although the contrary opinion is generally entertained) why Protestants and Catholics should not live together in them in harmony, thousands having been so educated without religious quarrels; at the same time conscientious objections must be respected, 11239–11242, 11248. With regard to the introduction of classics, there is sufficient protection against their undue prominence in the system of inspection, more so if the principle of payment by results be applied, 11330, 11331.

Denominational training establishments, if carried out in accordance with Mr. Fortescue's letter on the subject, would be approved of, and would probably give satisfaction to the Roman Catholic clergy; but neither that nor anything else would get over all the objections the Roman Catholic Church entertains against mixed education; in England the whole system of education is carried on upon the denominational principle, in Ireland upon the united, and the endeavour is to save that united principle, which is essential to the peace and prosperity of the country; if Protestants or Roman Catholics object to lodge together during the night, the point must be yielded; separate lodging need not interfere with united education in the day time, 11243–11249.—The practice in Scotland of teachers

boarding where they please is objectionable; security should be required that the place where they lodge at night be properly conducted; the religious minister under whom a teacher placed himself might be made responsible, and might without difficulty be paid for his supervision, 11250–11253.

No payment has ever been made by the Board for religious instruction to the pupils in Marlborough-street, of any persuasion; such payments might and should be made; there is nothing opposed to the principle of the Board in doing so; the duty has been hitherto well done by the Protestant clergy, and, till the Roman Catholic Church objected to the model schools, by Dr. Power, the Roman Catholic chaplain, 11254–11261.

If teachers attend the training establishment notwithstanding the interdict, it shows that they are willing to exercise liberty of conscience; so also with respect to Roman Catholic children, many of whom attend schools objected to by the prelates, and as was the case with regard to the Presbyterians; when the Board made certain arrangements with the Presbyterian clergy there was a great influx of them into the Board's schools; and the same thing would take place with the Roman Catholics if some reasonable concessions were made to them; the Board has never made concessions in the matter of principle to any church, 11261–11272.

The parties who have conscientious objections to remaining together with teachers of other denominations are the Roman Catholics; the objection proceeds from their pastors; the teachers who come to us come because they are anxious to obtain a training, which if they could have in a way acceptable to their church they would infinitely prefer, 11273–11278.

The attendance of Roman Catholics at the model schools in Marlborough-street has never been positively interdicted, the number therefore continues large; so in other parts of Ireland; the opposition to model schools has mostly been a mere expression of opinion, and no ecclesiastical action has been taken to enforce that opinion except in a few instances, 11279–11286. —There is a tolerable attendance of Roman Cathoilcs at the model schools at Cork, and one still better at Dunmanway; these schools are not interdicted, which cannot be explained, 11287–11290.—This plea of conscientious objection can apply to the entire system, and must be allowed; many Roman Catholic prelates approved of the concurrent training, but whether they would approve of the teachers' domestic life being concurrent also, does not appear; it is to be supposed they would not, although the thing has been accomplished with much satisfaction, 11291–11295.

The Government having established a system of united training for the teachers of Ireland, so long as that gave satisfaction it was supported generously and effectively; now it is found to have failed, and the Roman Catholic teachers, four-fifths in number, are excluded from the benefits of education; a good plan has been proposed to overcome this difficulty, it is for the Government to consider of it; all the Roman Catholic teachers would come here to be trained, if it were not for the interdict of their spiritual advisers, 11296–11301.

The clerical certificate has not been dispensed with by the Board, but has not been for some time absolutely enforced; the Board would be content with a certificate from some respectable person, 11302–11305.

Separate training institutions would be quite compatible with united education; and if teachers cannot be trained together, it would be better to train them separately than not at all; a passage quoted from the report of 1812 applies to day National schools, not to training of teachers; but supposing it did so, if after thirty years' experience it was found the recommendation was not wise and proper, it should be changed, 11306–11311.—A further passage on the training of teachers quoted, 11335.

A modification of the Board's rules regarding training institutions might be made, but to abandon the present National system and establish a denominational one would be ruinous to the welfare of the country, 11339–11341. Right Hon. Alexander Macdonnell.

As a matter of fact the teachers in the central training establishment, both Catholic and Protestant, have bestowed the greatest attention on the religious education of their respective churches, and live in perfect harmony together; the non-sectarian system is the best, but if four-fifths of the people take a different view, it is right to take their objections into consideration, to the extent of allowing the teachers in Dublin to be lodged in houses approved of by their spiritual superiors and their parents, the training in the literary department to be as united as it was ever intended to be, 11312–11319, 11342, 11343.

Any training establishment carried on upon purely denominational principles would not be desirable; it is possible a teacher brought up in such a one might be an impartial man; but not so certainly as if trained under us or at such an establishment as is contemplated by Mr. Fortescue's letter, 11320–11322, 11346–11351.

It is perfectly safe, as is proved by thirty-six years' experience, for children of different religious denominations to be altogether in the same school, and adults may be trained together in the day departments of the schools with the same result, 11323–11325.

A large amount of united education exists, notwithstanding the great number of schools with very small minorities; the smaller the minority the greater the necessity for its protection; and one great good is done in teaching the majority not to oppress; united education consists in being instructed in the same system, by the same teachers, under the same inspection, and reading the same books, 11332.—If the united system be done away with, you must fall back on the denominational system, and then these small minorities are practically shut out of school altogether; one good effect caused by bringing large numbers of children together is the emulation caused thereby, 11333, 11334.

The great advantage of the combined system of training consists in teaching people that they can live and be taught together in perfect harmony without suspicion of proselytism, as was proved during the political riots in Belfast, the children of both parties living in harmony in the National schools; good education is the primary object of the Board, to which united education is subordinate, 11344, 11345–11353, 11354.

If in spite of all the improvements that have taken place during the last fifty years in Ireland, including improved education, bitter hostile feelings exist in the north of Ireland, what would the effect have been without them; the north of Ireland is peculiarly situated as regards the Roman Catholic population, they have no natural aristocracy, 11352.

Further Examination.

The consultative and representative element in the Board is absolutely necessary; the number of members at first was seven, which was increased in 1838, the present number being twenty, 23572–23579, 23590. In the summer the Board meets fortnightly, and in the winter every week, about ten of the members attending pretty regularly; the rules being now so well understood, no practical inconvenience would arise if the meetings were all fortnightly, 23580–23586. The Resident Commissioner is greatly relieved by being able to obtain the decision of the Board on important questions; witness has constantly felt bound to give up his first impressions in deference to the sounder judgment of the Commissioners, 23587–23589.—Practically, the Committees are composed of the Resident Commissioner and the officers in Dublin, but the other Commissioners can know what has been done, 23591, 23592.—No doubt some pressure is brought to bear upon the representatives of religious denominations, but no case of a single job has been proved against the Board. The great majority of the Protestants approve thoroughly of the system, and nine-tenths of the Roman Catholics look upon it as the greatest

Right Hon. Alexander Macdonnell.

blessing England ever conferred upon Ireland. In its administration there has been as great justice and fairness as is possible in any human affair, 23593–23598, 23746.—Parliament is not the proper place for discussing changes in the rules. The great majority of the country do not wish to have the system stereotyped, but to have it expanded with the growing circumstances of the age and of Ireland, 23599–23601.

Many of the Commissioners know a great deal of the practical working of the system, but not near so much as the Chiefs of Inspection, or the Secretaries, or the Resident Commissioner, who carry out the routine administration, 23602–23605, 23611, 23612.—No proposal was made to do away with a representative Board until the question arose as to the removal of Archbishop Whately's book on "Christian Evidences" from the list, 23606–23610, 23613–23616.—It is very desirable that a second paid Commissioner should be appointed, and he should be a Catholic; in a certain sense a third is desirable to represent the Presbyterians, but the country would never consent to this. The Protestant and Catholic members of the Board act together harmoniously. If there were three paid Commissioners, the present Board would still be indispensably necessary. The Board has fixed, but not stereotyped, rules, which have been and may be altered from time to time; the system is in a state of development and growth, 23617–23631, 23681–23683. In the early history of the Board all the Commissioners resided in or near Dublin, and a large number do so at the present time; it is of great importance that many of them should be connected with different parts of Ireland, as by that means the feelings and opinions of the people can be known, 23632–23637, 23684–23689.

If a Minister of Education were appointed, there should be a permanent Under Secretary, who should reside in Ireland, and whose appointment should be made without regard to politics. If a man in the prime of life, with a vigorous mind and great powers to perform the duties, were selected, he would be able, with the assistance of the Board, to carry on the business of education in Ireland without a second paid Commissioner. He would inform his chief upon all important matters, and thus all questions of moment would be brought before Parliament 23638–23643.—The distribution of patronage by the Board has never been interfered with by any Government; the Commissioners have never appointed a person in the most distant way connected with themselves, 23644.—Questions of dismissal of teachers come before the sub-Committee in the first instance, and are then reported to the Board; clerks and inspectors are dismissed by the Board after inquiry, and as some of the ablest judges are members, the cases are gone through with as much care as if they were before the Courts, 23645–23655. There would be no objection to pursue a similar course to that of the Committee of Council in laying a minute on the table of each House of Parliament before acting upon it; a contrary view is probably held by many persons, 23656–23662.

The question brought before Parliament by Sir Hugh Cairns related to an alteration in the monitorial system; much blame was endeavoured to be fixed on the Board, but after discussion Parliament decided in favour of the Commissioners, and all opposition ceased, 23663–23665, 23710–23713.—In bringing matters of detail before the Board, witness and the other officers have not sought to shelter themselves, 23668–23671.—The National system is working well, and, save the appointment of a second paid Commissioner, requires no change; there would be no objection to having twenty-two Commissioners, 23672–23674.—Vacancies in the Roman Catholic Inspectors must be filled by Roman Catholics, and Protestants by Protestants; this rule sometimes tends to prevent the selection of the best men; the Catholics would be quite able to hold their own even now in case of competition, but most of them think the time has not yet arrived; clerkships are filled up by competition, four Protestants and four Catholics being nominated, and chosen after examination by the Civil Service Commissioners; in the last six cases the Catholics obtained all the appointments, 23675–23680.—There is no chairman at meetings of the Board, 23690–23692.

The Roman Catholic hierarchy would prefer a denominational system, but the great majority of the people are satisfied with the present system. If a denominational system is to be established for Catholics, and another for Protestants, the present Board must be abolished, and two others created instead, one for Catholics, the other for Protestants, 23693–23702.—There would, also, probably be a third Board for those who conscientiously adhere to the mixed system, 23703–23705.—The introduction of denominationalism would tend to the absorption of education into the hands of the Government, which, on public grounds, and in the interests of education, is not desirable, 23707, 23708, 23714, 23715.—No alteration in the rules of the Board has ever been made without full consideration, and which has not in the end been approved by the public, 23709.

There is not a National school which is not strictly non-sectarian, 23716–23718.—Some of the schools may have become practically denominational in the case of Catholics, because they have none but Catholics attending them. While not a word of sectarian teaching can take place during secular instruction, the priest can impart religious instruction agreeable to the children's consciences, so that, in reality, the National system combines the advantages of denominationalism with the advantages of the united and non-sectarian system. The Board has contributed a good deal to this result by relaxing its rules, and allowing small schools to be established in places where Protestants could not conscientiously avail themselves of the existing schools; these children must have been cut off from all the advantages of State education if the rules had not been modified. The same concessions were made to Roman Catholics, 23718–23725.—The junction of the Presbyterians took place in 1840. Up to that time the rule was that managers should arrange for giving religious instruction, so that no child attended against the wish of the parents. Mr. Kelly's letter in the Temple Meeting-house case, in 1833, shows that the Board desired that no child should receive religious instruction objected to by the parents. The understanding in the case of the Presbyterians was that children should not be compelled to attend, so that in their case the rule was made more stringent, 23726–23731.

There is one Presbyterian minister and one clergyman of the Established Church on the Board; the last Roman Catholic ecclesiastical member was Dean Meyler, who died in 1864, since which time no other has been appointed; it is exceedingly desirable that there should be one, 23732–23739.—The action of the National Board should be very much confined to primary education, and under present circumstances it would be dangerous for it to interfere in the administration of middle-class education, 23740.—Superintendence of the Board might be extended to endowments for primary education, 23741–23745.

The model schools illustrate the system more than any others: the attendance of Roman Catholics at them has been much diminished from the opposition of their clergy, 23747, 23748.—System under which Government aid is given to Roman Catholics in England might be applicable to Ireland if the managers of schools were to give any religious instruction they please, 23749–23750.

Objects in establishing the model schools; the Board is very anxious that teachers of ordinary schools should visit them, but it does not supply any pecuniary means for doing so; it is very desirable that these visits should be encouraged, but, while the Roman Catholic clergy disapprove of the model schools, it will be extremely difficult to make any arrangement, 23751–23758, 23780, 23781.—Model schools formed a feature of the system from the first, 23782–23786.—There is no rule as to appointing the teachers in the model schools; the object should be to draw them

from the 8,300 teachers of ordinary schools; they have been drawn too much from particular districts. These appointments should be considered as the great prizes for the teachers, and should be open to competition without regard to religion or anything but merit. When a vacancy occurs it is filled up by the Board; the Head Inspector and the Inspector of the district agree together as to the party to be recommended, the matter is then submitted to the Resident Commissioner and Chiefs of Inspection in sub-committee, and finally the Board directs who shall be the teacher, 23759–23763, 23787–23796.

The admission of pupils to the practising schools in Marlborough-street is entirely under the control of the professors; the Catholic and Protestant masters and mistresses in training there lodge and board together, and perfect harmony exists; if Roman Catholics were to live by themselves, it would have no effect upon the efficiency of the teaching; as soon as it can be shown that this is their desire, it would be the duty of the Board, as men of sense, to give way, 23764–23769.—If separate boarding-houses were established, having model schools connected with them, carried on strictly in accordance with the principles of the National Board, the most entire satisfaction would be given to the great bulk of the Catholic clergy, the boarding-houses to be at the expense of the denomination requiring them; this is what was proposed in Mr. Fortescue's letter. The English system of training schools would hardly be applicable in Ireland, 23772–23779, 23799–23801.—The number of meritorious Catholic teachers must diminish under the prohibition, although many still apply, 23793-23795, 23909–23914.—The principle of competition as proposed for model school teachers should apply to the whole system; the more the denominational element is eliminated, the better for administering the system, 23797, 23798.

The Commissioners reserve to themselves the right of abridging the annual reports of the Inspectors; Mr. Keenan's report for 1858 was abridged [the unpublished portions are given in Appendix to Evidence, No. XVII.], 23802–23808.—The danger of management by the Board falling into the hands of a clique is not great; the eminent members attend pretty often, and the ten who generally attend are members of the three leading denominations, 23809–23811.

In case of the establishment of denominational residences, existing model schools would still be required; it would be a long time before there would be many of the new establishments created; the love of united education would become greater and greater as soon as the generous policy of the Fortescue letter would be carried into effect. Roman Catholic teachers would no doubt be lodged in religious houses provided by their own church. Mr. Fortescue's plan contemplates that the boarding-houses would be built by voluntary contributions of the local parties—not by compulsory rates, a similar grant to that at present allowed being contributed to the pupil for his support. Pupil-teachers would no doubt prefer the boarding-house belonging to their own denomination. The desire for the separate boarding-houses is a conscientious wish, and if a means can be devised to increase the training power it will be an immense blessing, seeing that out of 8,000 teachers nearly 5,000 are untrained. When the art of teaching is thoroughly understood by trained teachers the length of time taken to get through the First Book will be diminished one-half. If the objections to united training proceeded from the million and a quarter of Protestants instead of from the four and a quarter millions of Catholics, the Protestants of the empire would not listen to Mr. Fortescue's propositions, 23812–23827, 23915.

The Board cannot assist the Kildare-place Society's training school, as it is carried on upon denominational principles, 23828.—Teachers should be admitted to certificate on examination without regard to their place of training; if Roman Catholics were to set up a training school of their own, the Board could not subsidize it. Church Education schools have been placed under the Board, and where the teacher has been found qualified, he has been admitted and classed, 23829–23836.—A great number of Catholic teachers in the model schools find a difficulty in being admitted to confession and the sacraments. The masterships of model schools being civil employments, the civil Government ought to abstain from taking cognizance of religious penalties imposed on the fulfilment of civil duties; if the Roman Catholic Church would not admit teachers of model schools it would be a most lamentable state of things, and the temptation should not be placed before the teachers, 23844–23847. Right Hon. Alexander Macdonnell.

Persons trained in the new institutions would not be required to come to Dublin to finish their education; of course those who came would have an advantage over those who did not, 23848–23854.—The training in the proposed schools would take place as in the present normal schools in Dublin, and would be in the hands of the master of the elementary school, who, in the case of Roman Catholics, would probably be appointed by the bishop; the superintendence of the boarding-house would very likely be attended to by the manager of the school, who would appoint all the teachers as at present in vested and non-vested schools. There would be little fear of sufficient attendance not being secured in the school, 23855–23869.—The amount of money required to start the schools would not be much; the Board would sometimes build the school, sometimes not, according to circumstances, 23870–23874.

In the existing district model schools the female pupil-teachers live outside, for which they receive an allowance of £20 a-year. The application of this plan to the new institutions would much simplify the scheme, but it would hardly be acceptable to the Roman Catholic clergy; if this were their wish the Board would be happy to give the option, 23875–23879; 23893–23896.

The training of the female teachers is satisfactory; there is not so great a disadvantage in their case as there would be in that of males. There is a greater tendency among the females to follow the trade of teaching; the employment is far more grateful to them, and it is difficult for them to obtain other employment, 23880, 23881.

The proposed arrangement might not be a complete solution of the difficulty, but it would go far to reconcile the Roman Catholic Church to the system of united education; but the majority of the country would be opposed to grants of money for denominational training. The attendance at the proposed schools would become practically denominational, but they would be open to Christians of every denomination, and would be carried on with perfect security to both Catholics or Protestants who might attend, 23882–23889.—Any case of bad conduct at the present district model schools would be sure to be brought before the Board, but they very rarely occur, 23890–23892.—Model schools were intended to be of moderate size and of inexpensive character; they were first established in 1849, 23891–23897.

No pressure has been put upon the Board to raise the standard of education, nor to discourage the attendance of the poorer classes from the larger schools, where the teachers are better paid and of a higher description; but there has been a very great movement in Ireland in favour of engrafting classics and modern languages upon the National system, and it could easily be done, 23900–23905, 23908.—In the scheme originally drawn up middle schools were contemplated, 23906–23907.—Draft of an answer to the Catholic prelates, drawn up in reply to their memorial against model schools; it was not finally adopted by the Board, 23915.—There is a strong probability that nearly all the pupils in training will become teachers, though there is no security for their doing so, 23916–23918.—A great number of the Catholic teachers still in training could get schools under Protestant patrons in Catholic districts, and in schools under Catholic lay management, 23919–23923.

Right Hon. Alexander Macdonnell.

The present constitution of the Board does not fully carry out the plan of Lord Stanley's letter, that it should consist partly of ecclesiastics of high position. The Bishop of Derry was a member till his death; the Government did not appoint a bishop in his place, Mr. Jellett being appointed to represent the Established Church; there is no Roman Catholic ecclesiastic, although everything has been done by the Government to get a Catholic bishop to sit, but through the difference of opinion existing it was impossible. Dr. Henry succeeded Dr. Carlile (who withdrew in 1838), as representing the Presbyterians; he was paid £5 a visit after his appointment as President of Queen's College, Belfast, and a like sum was paid to Dr. Denvir, Roman Catholic Bishop of Belfast. The present representative of the Presbyterians is Dr. Morell, and his expenses are paid, 23924–23947, 23976–23979.—The Finance Committee is an open Committee, which any Commissioner who chooses may attend; generally speaking no one attends but the Resident Commissioner, 23948–23951.—Very much of the routine business is transacted by sub-committees, anything of importance being referred specially to the Board, 23952–23958, 23961.

Reprimands do not invariably issue from the Board, but where an Inspector is to be seriously punished it would go fully into all the circumstances, 23962.—Commissioners never expressed dissatisfaction at the mode of preparing the programme, the Resident Commissioner does his best to see that it is fairly arranged; a charge that the programme is arranged so as to meet particular cases would be utterly dishonest, 23963–23965.—Commissioners' names are entered according to the usual mode of entering names of members attending a Board, 23966–23968.—The representation of Roman Catholics on the Committee appointed in 1854 to recast the rules was not adequate, but Roman Catholic gentlemen could not be got to attend, 23969–23972.—Reason why there are so many Roman Catholic lawyers on the Board, 23973.—Responsibility of appointing Commissioners rests with the Government, 23974.—Protests by Presbyterian members, 23980, 23981.

Notwithstanding the evidence given before the House of Lords in 1854, the Board were agreed in principle as to carrying out the system of mixed education; Master Murphy referred to middle class education when he said he would not send his children to a Protestant school, but he did not imply that, he objected to a Catholic child attending a National school taught by an impartial Protestant teacher, 23982–23985.—The Commissioners held several meetings before sending their reply approving of Mr. Fortescue's plan. Lord Mayo was written to on the subject, but the Government did not include the Board's estimate in the estimates, and the matter dropped, 23986–23993.

The teacher of the normal school, Dublin, receives pay from the Science and Art Department, and some of the other teachers receive assistance. The Science and Art classes are for the improvement of the pupils, 23994–24001.—Salaries of teachers have been much increased of late years, but still fall short of what they should be; the first and second classes are tolerably well paid; the second of third should have at least £20 a-year, 24002–24008.

Agricultural education so far as it has gone has been beneficial; it would be a great thing to multiply the number of small agricultural schools. The holding a piece of land would not interfere with the literary instruction, and would in every way conduce to improvement in the habits of the teachers. There would be some difficulty about giving the teacher compensation on leaving his school; the Agricultural Inspector would be very useful in adjusting matters of that kind, 24009–24032.—The Protestant minority in National schools in the three Roman Catholic provinces is extremely small; in about half the schools a sprinkling of Protestants will be found, 24033–24040.—Proportion of Roman Catholic teachers in the model schools, 24041–24049.—It is desirable to have a Catholic teacher in each department of the model schools, 24051–24053.—The Roman Catholic Church was a great deal more favourable to the National system at the beginning than it is now. The institution of the Board followed on the report of the Committee of the House of Commons, 24055–24056.—Petition presented by Archbishop Murray in 1824 contains statements precisely conformable to the attitude now assumed by Roman Catholics, and in the abstract they preferred, both before and after the establishment of the National system, a notion of denominational education. Remonstrance of Bishop Haly in 1850; some of the concessions complained of Catholics would be sorry to see withdrawn, 24060–24073.—The present system of united education, as administered by the Board, ought to be maintained, 24075–24076.

M'Donnell, Brother P. D.

Brother P. D. M'Donnell.

Is director, member of the committee, one of the honorary secretaries, and principal manager of the affairs of the Deaf and Dumb Institute at Cabra, and is resident in the establishment, 14217–14219.

The institution receives no public aid, except from poor law guardians, who pay at present £15 a year for each child. Great need exists for assistance to deaf mutes, whose state is deplorable, 14220, 14221.—The establishment for boys holds about 200, that for girls 150; the institutions are about half a mile apart, 14222–14225.—According to the census of 1861 there were 5,653 deaf and dumb in Ireland, of whom 2,022 were under twenty years of age, 14227, 14228, 14230, 14231, 14281–14283.—Very few of the parents are able to support their deaf and dumb children, 14229.—They have no alternative but to keep the children at home, as the guardians in many instances will not defray the expenses, 14232, 14233.—All the children in the Cabra institutions are paupers, except seven, who are called boarders, 14234.—Children are sent from Scotland and England at same rate, in case of paupers, as in Ireland; the cost to the institution is £21 10*s.*, including food, clothing, and general expenses, 14235–14238, 14290–14293.—Every deaf and dumb child, whose parents are not able to pay for his education and support, should be deemed a pauper, without the necessity of being put into a workhouse, 14240–14243.

The children are in the institution too short a time; seven or eight years should be allowed, if possible; in America the period recommended is ten years, 14244–14247.—Children, in about twelve months, are able to write a pretty fair hand, and, if they enter at nine or ten, or from that to fourteen or fifteen, would be able to answer simple questions, 14248–14251.—The great aim of the children is ability to discharge their religious duties after leaving the institution, 14252, 14253.—Confession is taken in writing, not by signs, except in very rare cases, 14254, 14255.

Claremont, Moneymore, and Strabane institutions are supported by voluntary contributions, the children sent by the guardians being paid for; the pupils are brought up in the tenets of the Established Church, 14256–14263.—At the Belfast Deaf and Dumb Institution they are reared in the tenets of the Protestant Church, 14265–14268.

Where the guardians are unwilling to send the children, power should be vested in the Poor Law Commissioners, and their decision in disputed cases should be final; at present the Commissioners have no power, 14269–14273, 14332.—Trades taught to children at Cabra, 14270–14272.—The teachers are members of religious orders, and take an interest in their work as a religious duty; they are experienced teachers, 14274–14279.—One teacher is allowed to twenty-five children; one to sixteen would be a better number, 14280, 14387, 14388.—Every effort has been made to induce the Roman Catholic laity to support the institution, and they subscribe liberally, 14284–14286.—A great

Brother P. D. M'Donnell.

many of the boys, after leaving the school, are able to support themselves and their parents; they are generally most successful as shoemakers, 14287, 14288.—In a few cases the parents are reluctant to part with their children, but generally they have been prevailed upon by the parish clergyman to send them to the institution, 14289.

The income varies considerably; in 1858 it amounted to £889 0*s.* 1*d.*; in 1867 to £2,456 17*s.* 6*d.*, the subscriptions coming both from the north and south of Ireland, 14294–14296.—Addition about to be made to the buildings, 14297.—Union rating, or a rate in aid, might be the means of saving many of the children, and of having them taught, or some mode might be adopted without altering the system of rating, 14298–14301.—Almost invariably the dumb are inferior in intellect to those who are deaf and dumb; this arises from the latter having the free use of their intellect, the dumbness of the former being caused by some physical disorganization, 14302–14304.—The schools of the Christian Brothers in England are supported in the same way as those in Ireland—by voluntary contributions; they never were connected with the Privy Council, nor would it be easy under existing circumstances to become so, 14305–14311.

It is not desirable to receive boys above nine years of age; persons of twenty or twenty-one would derive but comparatively little advantage by coming; out of the 5,653 deaf mutes, about 2,500 are between nine and twenty, 14312–14316.

There are five institutions in Ireland for the deaf and dumb; in those for Protestants there are at least 250, and in that for Catholics 285, making 535 in all, leaving nearly 2,000 for whom no public provision is made, 14317–14323.—The number of children received at Cabra during the last twenty-two years from the several provinces was—From Ulster, 22; Connaught, 38; Munster, 183; Leinster, 152. The smallness of the number from Ulster arises from religious prejudices; instances of this at Armagh and Omagh, 14324–14331.—If the guardians were to contribute £18 or £20 per head, the remainder of the expense could be supplemented from the collections, 14334, 14335, 14349–14351.

It is the duty of the State to contribute to the education of the deaf and dumb; if not so afflicted it would have to pay for them in National schools, 14336, 14337, 14356.—The institution at Cabra is open to inspection by any person; Poor Law Inspectors do not inspect officially. If a larger measure for the education of the deaf and dumb were to be carried out there would be no objection to inspection by a public board, 14338–14346, 14357, 14358.—The present payment of £15 very nearly covers the cost of board and lodging, 14347, 14348.—Cost at Cabra is less than in the institutions of Great Britain and America, 14353.—Guardians influenced by charity would perform their duty to the ratepayers, as being better able to interpret the Act, 14354, 14355.—The reluctance of the guardians to send the children is on the score of expense, not from any religious feeling, 14359–14362.—Most of the children sent are not inmates of workhouses, 14363, 14364.

Reasons for declining to connect the Christian Brothers' schools in England with the Privy Council:—State systems are liable to change; the system in use in the schools was successful; Privy Council require teachers to hold certificates after examination, which is not desirable unless the superiors were invested with the right, &c., of an Inspector, and his certificate were to be sufficient, 14365–14367, 14395.—The public have decided in favour of the system of the Brothers' schools, notwithstanding the wealth and patronage of the National system, 14370. Those religious orders who submit to examination complain sadly of it, 14371–14373.

If all the deaf mutes who ought to be at school were sent, there would be no difficulty in obtaining teachers under the Christian Brothers' system; it takes six years to teach the deaf and dumb properly, 14374–14376.—It is difficult to say whether the deaf and dumb are on the increase, 14377.—State of bodily health of children when they arrive at Cabra, 14378–14384.—Low conditions of health increases cost of maintenance; the expense is also increased in consequence of the teaching staff required, 14385–14388.—Christian Brothers' system has not succeeded in England because it never got fair play; to attempt the schools under the provisions of the Privy Council would be destructive of the order in England and Ireland; the success of the system is not attributable to the influence of the bishops; their countenance depends in great measure on the satisfaction the schools give to the public, 14389–14394.—All who carry out the education of the poor should be able, under proper conditions, to participate in any aid given by the State; the rules of the National Board and the code of the Privy Council are highly objectionable to the Order, 14395–14403.—If the conditions were confined simply to inspection and payment by results there would be no great objection, 14404–14408.—Parish priests grant the privilege to the Christian Brothers of attending to religious teaching in the schools; the moral, literary, and religious education of the children depends upon the teachers of the schools, 14409–14415.

MACDONOUGH, Mr. DANIEL.

Mr. Daniel Macdonough.

A National school teacher for twenty-two years, and for eighteen years in a school in Naas; is the representative of the Association of Teachers for Leinster; the teachers complain of the insufficiency of their remuneration, which, on an average, including all classes and from all sources, amounts to about 12*s.* a week, 17609–17619.—An average payment of 1*s.* 1*d.* for each child on the rolls goes to make up the amount, 17623–17630.—4,753 male teachers and 3,209 female teachers receive an aggregate of £192,437 from the Commissioners of Education, an average of about £24 each, and £52,000 from local sources, 17631–17635, 17685–17695.—Witness, being classed in the highest grade of first, may be taken as a sample of a first-class teacher, enjoying the highest amount of emolument received from the Board; he receives £52 class salary, £13 for good service, and a varying allowance of £3 or £4 for teaching monitors; his school-fees amount to about £30 a year, 17636–17644, 17675–17684, 17760–17763.—When he first entered the service of the Board as probationer he received only £8 a year; at that time the highest classman received only £20; the Board has from time to time made very considerable additions to the payments made by the State to the teachers, 17648–17651.—The rate of payment depends on the classification, and it is theoretically in the power of any teacher to rise by proficiency to the higher class, but, practically, if he have not an average attendance of thirty-five scholars, he is not eligible for promotion to first class; this is a recent rule, and is complained of as being unjust to teachers of long standing; such an average is impossible in some places, 17652–17662.—There is also a rule that no man who has not graduated at Marlborough-street is eligible for first class, 17667–17669.—Has not known any departure from this rule, and is not aware it was not in force, 17671–17674.

The schoolmasters, although desirous of a retiring allowance, would not be content with its being provided by a rebate from their present salaries, which are already too low, 17696.—Although quarterly payments are not considered a grievance, teachers would prefer monthly payments, 17697–17700.—There are no complaints as to the absolute power of dismissal possessed by managers, and the want of right of appeal; the question was considered as not deserving attention, 17701–17703, 17873–17876.—Pro-

Mr. Daniel Macdonough.

viding a residence would be a benefit, but would not be in every case commensurate with the improvement in their status desired by teachers, who consider the worth of their labour to the State to be equal to that of a good carpenter or bricklayer; they do not all expect the same payment, but the lowest classed teacher, who conducts his school satisfactorily, ought to have £50 a year, and something additional should be given as a stimulus to deserving men; £5 or £10 of the £50 might be locally provided; a house and one or two acres of land may be valued at £10 more; this would leave £30 a year to be paid by the State; the lowest salary of a classed teacher is now £18, 17704-17723.—A first-class teacher ought to have £80—the second class a mean between these two; increase of salary in proportion to length of service would be satisfactory, 17724-17732.—The salaries of female teachers are less in amount than those of male teachers; very few female teachers have good service allowances, 17733-17735.

Every teacher discharging his duties faithfully, against whom no complaint is made, should receive "good service" pay; it is now restricted in number; it is grounded on the report of the Inspector, sanctioned by the Head Inspector, and lasts for only one year at a time; the formalities must be gone through every year to obtain it, 17736-17739.

Some teachers have extra allowances for teaching extra branches, such as drawing, and singing, and teaching monitors, 17740-17743.—Witness gets very little under the latter head; they do not stay long enough with him, but go away to other pursuits, 17743, 17765, 17766.

Many more parents could pay more for their children's schooling than they do; the teacher often refrains from enforcing payment of school-fees, because it might affect the average attendance on which his salary depends; the average attendance required might induce a teacher to receive a greater number of pauper pupils, but it diminishes his school-fees, 17744-17446.

Witness's school is nearly or altogether denominational—Roman Catholic; never felt any inconvenience in being visited by a Protestant Inspector; under the present rules of the Board there could not be, 17747-17753.

It would be very troublesome for a manager to see who should be admitted to the school free and who not; witness's peculiar position in Naas enables him to solve the question practically, 17754-17757.—In his experience the tendency of school-fees is to increase, 17758, 17759.—Has several children of respectable parents in his school, 17767-17770.

Whatever efforts are made to secure payment of school-fees to the teacher lie with the teacher himself; neither managers nor gentry make any, 17771-17778.

The desiderated increase to teachers' salaries might be provided by a local rate; parents able to pay certainly ought not to be exempted from any direct payment; it would not be easy to draw the line of the really poor, 17779-17784.

Managers generally endeavour to obtain the best teacher, not looking to class particularly; cannot imagine how anyone having a knowledge of education would, as a rule, prefer a teacher first of third to first class, 17785-17789.

Pensions should be paid by the State as an act of simple justice, on the ground that the salaries hitherto received were too small to enable teachers to make any provision for old age, 17790-17792.—Many schools are to an appreciable extent inefficient, through aged teachers holding on too long, a man having a natural repugnance to relinquish his salary, 17795-17797.—Teachers are most useful public servants; the constabulary, the soldiers, receive pensions after lengthened service, and intellectual exertion should be placed before physical exertion, 17798-17804.—As to amount of pension and age of superannuation, teachers would be quite willing to adopt any plan in existence in similar cases, 17822-17830.

There has been a great deal of discussion among the teachers as to payment by results; in some degree they are already paid by results, for unless there be a fair number of children well instructed in two or three fundamental subjects, the teacher is liable to be displaced or fined; in this way it has had a beneficial effect; but the system as it is understood in England, if applied to Ireland, would close five-sixths of the schools there, 17805-17814.—The Inspectors in Ireland apply the same standard in all the schools, giving numerical reasons, when it would be better to pass a school generally; it may be impossible for a teacher, from peculiarities in the neighbourhood or the season of the year, to pass children enough to entitle him to a fair grant; a modified system of payment by results might work in Ireland; of two supposed cases, one of a teacher with a fixed salary and a low payment per head, the other with no salary and a high payment per head, believes the teacher would prefer the plan including the fixed salary, 17816-17821.—Believes the teachers would have no objection to a small payment by results, according to the number of children passed without failure in subjects of primary instruction, in addition to the fixed salary now received, 17831.

As to the average earnings of day labourers in Ireland, 17832-17844.

A first-class master is not thrown away in a school with an average attendance of less than 30; 30 children well taught are a gain to the State, 17849.

Except for the introduction of the rule reducing a teacher's salary for smallness of attendance, it is believed the Board have done their duty fairly towards the teachers; the complaint of the latter is, that they do not receive a fair remuneration for their services, which, it is considered, ought to come from the State, 17854, 17855.

It used to be stated annually by the National Board that they were not authorized to give salaries to teachers except in augmentation of local contributions; the latter have gone down, but not so much so as is believed; the payment from the State bears on an average a proportion of four times as much as that from the locality; a large increase ought to come from the locality; it was originally anticipated that the school fees would be larger than they have proved to be, 17856-17861.

Practically, teachers must regard themselves as servants of the managers; this, with regard to retiring pensions from the State, has been mentioned as a difficulty, but it is one that might be easily overcome, 17862-17872, 17894-17899.

Supposing the offer were made of a house and ground on one hand, or £10 in cash on the other, the general body of teachers would prefer the £10 cash; witness individually would prefer the residence and ground, as being better calculated to improve his condition and status, 17878-17879.

As a general rule the gentry are not contributors to education, this neglect arising from indifference, the effect of absenteeism; believes there is a feeling on the part of the Roman Catholic hierarchy against the gentry being lay patrons to schools, but this does not extend to the latter taking an interest in the school in the way of giving annual donations, 17880-17886.—The teachers could not get on at all without the managers, 17887-17888.

Witness's idea of local aid points to a local rate, like the poor-rate or county-cess; the landlord to pay the larger amount in proportion to the tenant farmer, say two-thirds, 17889-17893, 17987.

The Commissioners have the power of dismissing and fining teachers; the power is not frequently exercised, and is not complained of as a grievance, 17900-17909.

It is a hardship on teachers to live at a distance from their schools; the improvement of having a residence provided applies equally to female teachers, 17910-17913.

The managers and teachers find no difficulty in arranging the relief of pupils from the payment of school fees; the manager is the final authority in case

of dispute, 17914–17918.—The average of the fees of all the teachers is £8, including the value of free residences and other local payments; the calculation is based on returns for 1866; excluding Ulster, the average would be considerably lower, 17919–17927.

The teachers say it is impossible to enforce payment of school fees; the best way to reach those who are able but will not pay would be by a tax, 17928–17932.—As a general rule, those who can pay, do pay, 17933.

There are very few private venture schools in the country; would be surprised to hear that where there are paying schools the National teachers cannot raise any fees at all from some class of children, 17937–17948.—It is sometimes said, but it is not a general impression, that the people are not bound to contribute anything towards education, but that the State ought to pay for it, 17949, 17950.

The Board never acted on the rule that they were not authorized to pay salaries to teachers except in aid of local contributions; in the years of the famine, school fees were levied exactly as they are now; the Board sent round a pound or two to the teachers at that time as an aid, 17951–17958.

Supposing the claim for pensions to be allowed, and the Board were to deal with masters as with ordinary civil servants in other branches of the public service, it would trench on the power enjoyed at present by managers, who are the only gentlemen at present in Ireland who take an interest in education; the analogy between the civil servant and the schoolmaster consists in this—that the Board's officers examine the latter, take him and train him, raise his salary, fine him, and expend Government money in preparing him for his business, and the better his preparedness the greater the advantage to the country in general, 17959–17965

Witness's school in Naas is a non-vested Roman Catholic school; on the 21st June, there were three Protestants (brothers) to 150 Catholics, a proportion higher than usual; there are two Church Education schools in Naas, and a small private school; none of the schools in Naas represent mixed education, so far as religion goes, 17966–17974.

It would be injudicious to interfere with the managers' present power of appointment; instances of abuse of power on their part are extremely rare; they devote much attention to the working of the schools very beneficially, 17975–17986.—The manager appoints the teacher, and certifies as to his conduct, serving as the Board's authority for payment of his salary, which comes to him through the manager's hands, 17989–17995. Mr. Daniel Macdonough.

In witness's school, the pupils by some means provide for the incidental expenses, such as pens, ink, fuel, &c.; the manager keeps the place in repair; there are two assistant teachers and three paid monitors in the school at present; does not suppose the school could be worked to better advantage than it is now made to do by the Board, 17996–18003.

A competent teacher might exercise some influence on the attendance; he would perhaps attract children from a greater distance than would otherwise come to the school; an objection the teachers have to payment by results is that it would induce a rivalry in country districts much to be deprecated, 18004–18006.

There are in the Constabulary district of Naas seven schools out of twenty-two with children of different denominations attending them; if from this fact these schools can be called "mixed," they are so; witness's school is one of the seven, but with his three Protestants he does not regard it as a mixed school, so also with Kilteel school, on the same ground; Rathmore school, with four Established Church and thirty-one Roman Catholic children, approaches nearer to be a mixed school, 18007–18018.

The religious instruction given in witness's school occupies half an hour each day, it is given by himself and his assistants; the parochial clergyman frequently looks in to see that it is going on; he gives direct instruction himself four or five times a year; the children are sent to chapel for religious instruction, it never interferes with the secular teaching, 18019–18038.

The rules of the Board are not interfered with; it has never happened that for a day, or five days, or a week nothing has been given but religious instruction in preparing for confirmation; in such cases the children go to church; the teacher is qualified to give the daily religious instruction, 18039–18046.

M'Ivor, Rev. Dr.

Rev. Dr. M'Ivor.

Is incumbent of a college living, at Ardstraw, County Tyrone, and has given particular attention to primary education, 13611–13615.

There is not enough teaching for the young children in National schools, and from the want of superior teaching, all the elder children leave the schools, 13618, 13619, 13623–13624, 13632.—About 6 per cent. of the children get into the Fourth Book; about 15 per cent. into the Third Book, 13625, 13741–13743.—The Sequel to the Second Book was a good book, but this has now been given up, 13744, 13745.—In industrial districts the age of National school children averages between eight and nine, 13620–13622.—The difficulty in the way of remedying the defects of the National system is the want of books unobjectionable to some section of the Irish people; the books of the National Board are very much liked throughout the country; they are extremely good so far as they go, 13627–13631.—The reason why the children do not remain at the schools is, that the National system leads to nothing. Classics and modern languages should be introduced; this would tend to improve the primary education, 13633–13636, 13679–13684.—There is a great want of something intermediate between the present National and higher schools, which want has been brought about by the action of the Board, and the general education of the country has suffered in consequence; this deficiency has been especially brought out by the Endowed Schools Commission, 13637–13642.—Witness proposed a scheme for remedying the defects, which was adopted by the Board and proposed to the Government; but they combined it with another plan with which the Board had no connexion, and the result was, the scheme was not adopted, 13643–13646, 13659–13661.

If the proposed scheme were successful, every decent village in Ireland would have one of the higher schools; the lower schools being made into mixed schools under a female teacher, and organized on the infant system; this would diminish the cost of the teaching staff, 13647–13658, 13729–13731, 13765, 13766.—The plan approved by the Board provided for a three-year course of classics, in schools where it was required, and where the parents were willing to pay for it, aid being given by the Board upon the results. No child to be allowed to commence Latin or Greek unless he were fit for the Board's Fourth Book, 13662–13664.—There would be no difficulty in obtaining the necessary teachers, as these modifications would increase their salaries and improve their social status, at present extremely low, nor would they neglect the lower English subjects, 13665–13668, 13677, 13678, 13760–13764.—There are no opportunities for boys of superior abilities to emerge from the lower to the higher ranks, as they were able to do before the Board cut up the previously existing schools, 13669–13674.—The number of present endowed schools is sufficient, but they are languishing for want of pupils, 13675, 13676.—Roman Catholic clergy have made great exertions to supply the schools required, 13685–13689.—Catholic population feel the want more than the Protestant, 13690.—Shallow teaching of the higher subjects tends to lift the lower classes out of their natural sphere, but substantial teaching tends to make them modest and thoughtful, 13691.

Rev. Dr. M'Ivor.

Night schools are a valuable means of keeping up the knowledge obtained in the primary school; it is very desirable that the National Board should give more encouragement to them; the Board at present only pay £5 a year to the teacher. In towns the teacher should be of a superior kind, and in country places of steady character and weight; females are not adapted as teachers of night schools, 13692–13700, 13740, 13771, 13772, 13776–13780, 13789, 13809, 13810.—Monitors and assistants could be obtained from the Latin classes, 13773.—Schools should be open five nights a week, and writing should be taught, 13774, 13775.—There is hardly one night school in Ardstraw now; applications for aid have lately been refused on the ground of the schools being open for only a few months of the year; it is only in the winter months the big boys and girls come to the schools, 13781–13786.—Evening schools should form a separate classification, 13787, 13788.—Dr. Livingstone's experience of the advantages of night schools, 13790.

The difficulties felt by members of the Church Education Society, in availing themselves of aid from the Board, might be removed, by establishing a fourth class, called "Denominational Schools, receiving State aid," applicable to the Christian Brothers' or any other schools where compliance with the fundamental rule is refused, 13701–13709, 13711, 13858–13860.—The adoption of this plan would strengthen the Board, as it would remove the misconception of many members of the society that if their schools were connected with the Board they must exclude the Bible, and nine-tenths of those who now object would consent to receive aid, 13710, 13712–13718, 13888, 13889.—One advantage of Church Education system is the use of the Bible as a reading book; with that exception the National is vastly preferable, 13791–13794.—The rule requiring every child, of any denomination, to read the Authorized Version is most un-catholic and un-Protestant, 13795.

Teaching power for proposed classical schools, 13719–13723, 13727, 13728, 13739.—The schools would be divided into three classes, viz., a Lucian and Horace class, a Virgil or Cæsar, and an elementary Latin class, 13724–13726.—The Irish would approximate to the Scotch system, where the rudimentary and classical instruction are combined, and the staff of teachers small; instance of a school at Keith, in Banffshire, where there are 242 in average attendance, with only two masters and three pupil-teachers, 13732–13736. Where the children are divided into different rooms the number of teachers must be increased; at present in the better class of schools there are too many masters, and too little payment for each, 13737. Where the young children attend, a female assistant might be added, 13738. Existing endowments are amply sufficient if well utilized, 13811–13813.

The children do not keep up their reading through life, for want of facilities; books are seldom found in the cottages. In Newtownstewart there is not a bookseller's shop, and attempts to found circulating libraries have failed, 13746–13749.—The library at Omagh contains good novels and books of travel, but their popularity is only middling, 13750–13757.—There are reading clubs amongst the upper classes, but not amongst the farmers, 13758, 13759.—There are about thirty schools in Ardstraw; four or five are still under the Church Education Society; until within a very few years there were ten or eleven, 13767–13770.

State aid to education is desirable as a matter of benevolence and public policy; the aid should come partly from endowments and partly from yearly grants, 13796–13798.—Secondary education is not obtainable, except by persons of £600 or £700 a year, unless it be placed in connexion with the village school, 13779, 13800.—The grant for classical instruction should be distinctly voted by Parliament, 13875–13878.—Instruction in infants' schools is rudimentary, and properly so; it is quite possible, however, to bring boys as far as Lucian and Virgil in company with infants, 13801–13805.—It takes about a year and a half for a child to get through the First Book; but the time depends upon the child's age. If it were commenced at seven or eight years old it might be got through in three months, 13806–13808.—Payment of fees by pupils has reached the maximum point, unless higher branches are taught, 13814.

Religious instruction in the school attached to Zion Flax Mills, near Ardstraw, is provided for as in non-vested schools, 13815–13822.—National system of non-sectarian education if not pressed beyond its natural action should be adhered to; it has been remarkably successful, and the prejudices of the laity of all denominations have given way for some time past, 13823–13831.—Christian Knowledge Society's books are generally used in Church Education schools, but they are very inferior to those of the National Board, 13832–13836.—The principle of interweaving religious instruction with the secular teaching pervades the Church Education system and that of the Christian Brothers'; it pervades the National system to a far greater extent (for instance, in the last lesson of the First Book)—not sectarian religious instruction, but catholic, in the sense of comprehensive, 13839–13843.—The Board should be very liberal in allowing use of books equivalent to its own; there would be no difficulty in inspecting schools using these books, 13844–13852.—It would not be fair to ask the Board to supply any books but their own. If a school asked for the Board's books let it have them gratis; if it wants others let it buy them, 13852–13855.—The Board's books are kept out of many schools from the clergy erroneously supposing that religion is excluded, 13856, 13857.

It is not desirable to introduce classics into the model schools, as they are generally situate in towns able to provide what is wanted, 13861–13862.—In the model schools in witness's district, up to 1866, classics and French were taught, but the Board formally stopped it, the effect being the disorganization of the school, 13863–13866.—Letter of Bishop Moriarty pointing out the usefulness of teaching classics in union with English, 13867–13869.—Many persons, Protestants and Catholics, were anxious to introduce classics into the model schools, but sectional jealousies have hindered this from being done, 13870–13874.—It is a great advantage for children of the higher classes mixing with those of the poorer, 13879–13882.—Average cost of educating a child at the middle class schools in Ireland, 13883–13887.

Where schools are equally accessible, parents prefer that of their own denomination, 13890.—Freedom of instruction, in the sense of a parent's liberty of choice, is now secured by the Board's fundamental rule, 13891–13893.—The object in proposing the establishment of a fourth class of schools is, as far as possible, to help everybody, 13894, 13895.—In National schools, the patrons do not insist on the parents buying school education at the cost of conscientious scruples, nor is it done so much in Church Education schools as is supposed, 13896.

M'Menamin, Rev. John, P.P.

Rev. John M'Menamin, P.P.

Is parish priest of Stranorlar, Donegal; has six schools under National Board; in three of these all are Roman Catholics, in the other about one-fourth are Protestants; there are some Protestant schools in the parish, but none near his own school that he has named as containing Protestants; the latter were taught Protestant Catechism and Bible by Roman Catholic master until about the time witness came—a year and four months ago; this is now discontinued. School was non-vested; the Protestant clergyman was three miles off; might have attended to give instruction if he had chosen, 21886–21898, 21970–21979.—Dislikes National system; only adopts it because without it the country would be almost without education; is de-

cidedly in favour of denominational system, as are all the priests in the diocese. Believes it would work if rule for compulsory absence of minorities were enforced, 21899–21902, 21980.—No difficulty in protecting minorities with a conscience clause properly enforced, 21981, 21982.—Is used to mixed populations; Protestants, especially Presbyterians, are joining Board more than formerly, and schools are acquiring a more denominational character; mixed education makes children indifferent to religion, and is unsafe; incident during an inspection in proof of this, showing also that present rules are insufficient to prevent proselytism; parents' certificates not a sufficient safeguard; teachers would not interfere much if left alone, 21903–21908.—Incident named above occurred at Drumfad; has it on good authority; does not know teacher's name, would rather not name Inspector's, 22063–22070.—Presbyterians, while insisting on united education, and denouncing Catholic bishops for asking for separate education, are continually getting up schools to be under their own management; instance at Letterkenny, 21909–21911.

Necessity for a training-school for Catholic teachers, and for extension of time of training, 21912, 21913.—Great objection to present school-books; they exclude everything bearing upon Catholicity or Catholic history, or history of Irish Catholics abroad, &c.; such negative training is highly injurious in after life, 21914.—A religious tone should imbue teaching; there would be a little difficulty in separating secular from religious. Teachers should not have the opportunity of interfering with children's religion, 21983–21985.—Difficulties in the way of Christian Brothers' schools. Catholics in Donegal are altogether of the poorer class, 21915–21918.—The teachers are very inadequately paid; many young men prefer to emigrate. Liability to dismissal, also, they consider a great grievance, though witness does not see justice of complaint. Cases showing necessity for this, sometimes even in the interest of the teachers themselves. Never knew a manager to dismiss one without notice, unless with good reason. Managers could not have necessary control without this power; school would be liable to be less efficient; knowledge of it makes teachers more attentive. Does not think power is abused, or that it is necessary there should be a month's notice or a month's salary paid, 21919–21928.

Difficulties in obtaining sites; some landlords refuse altogether, some will tacitly allow, but not grant a lease. Case of refusal in a mountainous part where a school was much wanted, which was eventually built on adjoining property of an absentee, without his knowledge, by permission of tenant. If the refuser's property had extended further, district must have remained without school. Government ought to look to such populations first. Patronage where landlord builds a school on his own property. Case under National Board where landlord is manager and patron, and Catholic parents are practically compelled to allow children to receive Protestant instruction, 21929–21937.—Protestant patrons are admitted with suspicion, even where under National Board and teacher a Roman Catholic; is not aware that this is a hindrance to obtaining sites; person building a school has some claim to be patron. There should be a law to compel granting sites at a fair rent, but landlord not necessarily to be the patron, 21938–21944.

Desirable that teachers should have a house and a piece of land; this would necessitate an agreement as to growing crops in case of dismissal. Tilling land need not interfere with school duties. Would be of no use for teaching agriculture. If rent-free farms were provided, and improved systems adopted, something of the kind might be done. Children leave school very early; are put to work too soon generally; has seen them at work under ten, but these would come to school again in the winter. Believes this early work injures them in after life, 21948–21968.—If education were compulsory, numbers would have to be fed and clothed, 21969.

Stranorlar is a mixed district; a good many Presbyterians in one part; no school under them in witness's parish, 21986–21991.—Denominations and other particulars of schools in Letterkenny; one now building by Presbyterians for the purpose of separate education, a mile and a half from any other National school; population is about half and half, 21909, 21992–22009.—Disapproves of National system; no National schools under Protestant management in his present parish; six under his own; in previous parish (Convoy) had seven, and Protestants two; one of the latter gives a fair sample of mixed education, but Catholic children left it when others were provided, 22011–22031.—In present and previous parish about one-third or one-fourth are Presbyterians, with seven Catholic and five Presbyterian schools, 22032–22041.—School mentioned as founded by Presbyterians in order to be under their own management, was established many years ago, 22042–22044.

Rev. John M'Menamin, P.P.

In Letterkenny about one-third are Presbyterians, with two ministers and one school; about the same in Stranorlar, with no National school under them; not unreasonable that they should want one. All witness's present schools but one are exclusively Roman Catholic; were not always so; schools named where Protestants who left probably now attend, 22045–22062.—In saying that Presbyterians "denounced" Catholic bishops for advocating denominational education, referred to speeches at Belfast, where very strong condemnatory language was used; regarding Presbyterians getting up schools in his district "*as fast as they can*," names two; cannot specify any others. They might have had more schools there had they begun earlier; is not aware that first schools under National system were there. Does not know an instance of Presbyterian or Roman Catholic managers employing teachers of opposite persuasion to themselves, 22071–22094.

Is dissatisfied with books of Board; exclusively Catholic books should be allowed where all the scholars are Catholics. Books of Board should give more historical information of what is passing in the Catholic world; the knowledge they impart at present is very limited. Provision for small Protestant minorities if books were more permeated with Catholic doctrine. Of course, if Protestants desired it, they should have books containing more Protestant doctrine. Doubtless it is the duty of the Church to give religious instruction; difficulties in the way of the poor attending church on Sundays. Though it may not be the duty of State to teach doctrine, it should afford facilities for doing it, 22095–22135.—Witness's charge is too poor and scattered to allow of all the children coming to church on Sunday, and religious instruction at present given in schools is not sufficient. State affords opportunities for religious instruction, but does not provide for it, or make it imperative. If rule regarding books altered as suggested, State would not thereby be undertaking to teach religion, 22136–22155.

No convent school in connexion with Board at Letterkenny; one, now conducted by a secular teacher, in which nuns formerly taught; Board would not pay them on account of its being vested; original trustees are dead, and no others have been appointed. If a non-vested school were built, no doubt Board would pay nuns. Details circumstances, endeavouring to show that treatment by Board has been unfair, and scarcely legal; original terms of lease should be adhered to, and new rules not made retrospective, 22156–22178.—Terms quoted to show that nuns are unfairly paid. Some objection to examination of religious orders for classification, but if they could be brought under same rules as other teachers in this respect it would simplify matters, and all could be paid according to one scale. Objection as to leaving convents, &c., for the purpose, could be got over by having visiting examiners, 22179–22191.—If some nuns teach for a short time only daily, they do it very efficiently; capitation grant paid to them is niggardly. Does not consider their advantages in the matter of monitresses, or in payments for cleanliness, order, &c., are greater than those of other schools; the number of monitresses they have is a proof of efficiency; case in illustration of preceding, 22209–22220

Rev. John M'Menamin, P.P.

In the Letterkenny school the nuns had taught for a year, but Board insisted on their leaving; it is still used by Board as a boys' and girls' school. Witness believes he had a good case, but gives reasons for not going to law, 22192–22200.—Would not have objected to carry out present rule as to religious minorities while nuns taught; in a non-vested school would give same privilege if asked; cannot say whether bishops and clergy generally would do so, but believes that under ordinary circumstances they would, 22201–22208.—Does not know any instance of Roman Catholic clergymen giving instruction in a Protestant school, of *vice versâ*, 22221, 22222.

Knows only of one school under the Robertson bequest in connexion with Board; thinks it is exclusively Protestant, 22223–22225.

Rev. Gibson M'Millen.

M'MILLEN, Rev. GIBSON.

Is of the Wesleyan Methodists, who are in connexion with the English body, and represented at the English Conference; about half of the Wesleyan Methodists' schools are under the Board, the rest are not, because the rules of the Board cannot be complied with, not from any difference in their class or management; there is one small training establishment for male teachers only, in connexion with it are a boys' and an infants' school, the children in which are of different denominations, except Roman Catholics; there is no distinction made in the appointments of the trained teachers, 14416–14441.—Witness is General Inspector of Wesleyan Schools in Ireland, 14519.

The quality of religious instruction given in the schools under the Board is very good, 14442.

The Wesleyan Methodists joined the National Board in 1860, partly because non-vested schools had been some time admitted, but chiefly through a general change of feeling among the congregations in favour of the Board; there was no special difficulty affecting non-vested schools previously existing, 14443–14448, 14633–14638.—Disapproves of non-vested schools because the religious instruction is wholly under the care of the patron, 14702.

The Marlborough-street institution is admirably adapted to its purpose, the teachers therefrom are well conducted and well trained, 14449–14451, 14518.

The body of Wesleyan Methodists are favourable to the system of National education, but not to the mode of administration; they would prefer three paid Commissioners, or even one, under the Government, purely administrative, acting under fixed rules, on the fairness and impartiality of whom dependence could be placed; if the Wesleyans were in a majority instead of a small minority their views would be the same, 14452–14459, 14539, 14540, 14684, 14685.—The practical working of the present system is in effect throwing the administration into the hands of the Resident Commissioner and subordinate officers, 14582–14586.

The general feeling of the body is in favour of all schools supported by or receiving aid from the State being purely secular schools, that is, that the Government should have nothing to do with the religion of the pupils; and if all schools were so managed, that the schoolmasters be appointed by Government, as in all model schools at present; in such a case there would be no objection to either Presbyterian, Roman Catholic, or Established Church teachers, 14460–14465.—The parents must be chargeable with religious instruction, 14505.

There are very few teachers in our schools under the Board not belonging to our own body; no instance is known of a Roman Catholic teacher being appointed by Wesleyan managers, nor to any schools directly under the management of a Protestant Church of any denomination before the National Board came into existence; some private schools there were, with Roman Catholic masters and Protestant pupils, 14466–14475.—Has never known Roman Catholic managers appointing Wesleyan teachers; no religious body in any country would appoint a teacher not of their own persuasion unless in case of necessity, 14476–14480.

There are two classes of Methodists; the Primitive Methodists adhere more to the Established Church; they have their own conference and president; witness's answers do not apply to them, 14481–14488.

The principal objection formerly held by the Wesleyans to the National Board was because of the exclusion of the Bible as a class book, 14492, 14493.

There are fifty-one schools belonging to the body in connexion with the Board, scattered over the kingdom, but chiefly in the north, 14492–14491.—There are many Roman Catholic children in these schools whose religious education is left entirely to their parents or others connected with them; the religious instruction of the other children is as defined by the instructions of the Board itself, and is given generally by the master, 14494–14504.—There are no Roman Catholic teachers in these fifty-one schools; they do not supply all the education required by the body, 14512–14514.

The Wesleyans would be satisfied with a system of Government appointment of teachers, leaving out religious teaching, but not under the present administration, which is drifting into denominationalism; they complain that teachers and assistants are taken exclusively from Church of England men, Roman Catholics, and Presbyterians; the Wesleyan Methodists are entirely ignored, although in some places more in number than the two latter; no practical mischief to the children has resulted, but if denominational appointments are made, let them have their share, they have teachers fully competent, 14506–14511.—It is not known that any Wesleyan children receive instruction from Roman Catholic teachers except in the model schools, 14515–14517.

Visits all the Wesleyan schools in turn, with very few exceptions; makes reports to the Conference and Committee; but the secular instruction being examined into by the Board's Inspectors, less attention is paid to it by witness; his reports are not published, 14519–14522.

In 1861 the Wesleyan Methodists in Ireland numbered 45,890; they took an important part in the matter of education before the National Board was established; as a rule they contribute liberally in support of education, 14531.

The number of scholars on the roll of schools under the Board is 3,547, with a fair average attendance of 2,082; the managers are mostly clerical, 14533–14538.

No interference is used with the Roman Catholic children attending Wesleyan schools, whether connected with the Board or not; no religious instruction is given to any child without the consent of its parents; the schools are mixed, not two-thirds of the children being Wesleyan Methodists; Protestants of all denominations never make any objection to the religious teaching in Wesleyan schools, 14546–14556.

Statement of the circumstances under which the Wesleyan Methodists first placed their schools under the National Board; programme submitted to the Commissioners on that occasion, to which Mr. Macdonnell, Resident Commissioner, gave his full consent, it being in perfect conformity with the then rules of the Board, 14557, 14558, 14668.—Previously many of the people were opposed to the principles of the Board on religious grounds, the Bible not being used in the schools, being then under misapprehension, 14559–14563.

It would be regarded by the Wesleyans as a breach of faith on the part of the State or Commissioners to fall back on the denominational system of education; it was only on the supposition of the maintenance of a system of united secular and separate religious instruction that the body joined, 14566–14568, 14669.

A great many of the poorer classes of children attend the schools, of which six are middle-class; the schools are only partially supported by the children's pay-

ments; fees are asked for but not enforced; the remuneration of the teachers is supplemented from the general education collection; even then they are not sufficiently paid; teachers are always appointed by the pastor or manager; their payment varies from £6 to £12 a year, 14569-14581.

The body would without hesitation prefer a strictly secular system as the alternative to that to which they believe the Board to be drifting, *i.e.*, denominational; the National system would be preferred, if it were administered non-denominationally; it is the best system in the world if administered as at first intended, 14587–14590, 14678–14683. In a secular system religious instruction would be looked after by parents and ministers, 14591, 14592. Wesleyans are in favour of mixed education; that is, that all denominations should receive their secular education together; having the Commissioners or Government for patron to every school, thus doing without local patrons, 14593–14598.

Would prefer of course a child of his own community attending a teacher of his own persuasion, would not like him to receive absolutely instruction in a school under Catholic patronage and a Catholic teacher, but would not object to him attending the model schools under the Board's management, whatever the denomination of the master might be; distinctly objects to his children attending a vested school under the present administration of the Board if the patron were a Roman Catholic, 14599–14689.

The preference for mixed education among the Wesleyans and others means the training of children of different denominations of Protestants in Protestant schools; practically the schools are divided into Protestant and Roman Catholic; they have become denominational in that sense, not by law, but by natural selection, 14610, 14613.

The Wesleyans have lately at a great expense erected a college in Belfast for the purpose of giving a strictly religious education to young men, to be carried on exclusively by their own funds; that college is not regarded as occupying the position of an ordinary National school, but as a high class intermediate school and college, as a feeder virtually but not formally to the Queen's College, where the education is not separate; when the pupils enter the Queen's College they will continue to board in the new college and receive there the religious education and supervision with which the governors and managers of Queen's College have nothing to do; the principle of the Board is carried out, secular instruction is furnished in schools supported by State aid, and religion is taught without State aid according to our own views, 14614–14633.

Approves of pupil-teachers being boarded under the principal teacher, as in the model school in Marlborough-street, because it is known that he has nothing to do with the religious instruction of those under his care, that being given by our own ministers or others appointed by them, 14642–14645.

There is no town in which there is a model school where there is not a Wesleyan minister; if not, a minister would be sent, or some one to visit it, 14646–14649. Rev. Gibson M'Millen.

Knows of no instance where Wesleyan children are at school under Roman Catholic patrons or masters except in model schools; such a thing would not be desired in ordinary schools, but would not be forbidden if it were necessary; knows of no place where Protestant schools are not within reach of Protestant children, 14650–14654.

To a small extent Roman Catholic children attend schools under Wesleyan teachers, 14655–14662.

If any changes have been made in the original rules of the Board, those only affected by those changes have cause to complain, 14670–14671.

It is an objection that there is no representative of the Wesleyans among the Commissioners, seeing that the Board is denominational; if denominations be regarded they consider they ought to have a voice; but would prefer the principle of the Government (of any religion) appointing and paying, and therefore having control over, the teachers, for secular education only; the religious instruction to be provided for by the parents and ministers; they are opposed to State aid being given to denominational schools; a combination of secular and religious instruction, as a matter of principle, looking at the different denominations in the country, could not be carried out, 14686–14701.

The Wesleyans in England have adopted the denominational system, but we believe they are coming round to our opinion, who think differently; Wesleyan schools might not suffer by the substitution of a denominational system, but the education of the country would suffer; children taught together in public schools have a tendency to fraternise; denominational schools would divide them, and prevent the social union so desirable in a country like Ireland, 14704–14708.

The real meaning of the movements among Protestants for mixed education is *not* a mixture of pupils and a careful selection of teachers, excluding Roman Catholics, 14709–14712.

Referring to the Provost-house Declaration, witness is not aware of anything in the principles of the Queen's Colleges requiring the teachers to be of one denomination more than another; Sir Robert Kane is at the head of one, and a president of a college ought to have something to do with teaching; the administrator of a system should have a considerable influence on the education under that system, 14713–14720.

Cannot see how any change in the administration of such a Board as the Senate of the Queen's University would favour one denomination to the prejudice of others, 14721, 14722.

Very few schools are under chapels, and very few bear the inscription "Wesley," 14723–14727.

Is not aware, and it does not appear that any changes were made in the principles and rules of the Board in 1840 to induce the Synod of Ulster to join it; witness's idea is that they, like the Wesleyans, were not aware of their position with regard to the Board, 14728–14737.

MAHONY, CORNELIUS, Esq.

Cornelius Mahony, esq.

Has been a National school Inspector fourteen years; has had to do officially with every province in Ireland; is at present acting in counties of Cork and Waterford, 16965, 16966.

Necessity for supplementing work of Assistant Commissioners by a written examination of the various descriptions of schools, in order to ascertain extent and quality of education given; manner of carrying this out:—printed questions to be delivered on a given day, under seal, at certain schools selected as samples from each of the different classes of schools in the country, and a proportion of the children, to be chosen by ballot, examined upon them, the results to be tabulated and reported on; believes effect would be to corroborate reports of Assistant Commissioners; the Duke of Newcastle's Commission in England acted on this plan, taking sample districts, but sample schools would be better here; details as to impartiality, insuring honesty of returns, &c., 16967–16977.—Does not see how managers could refuse consent to such a test; prevention of personation, 16978–16980.—Examinations should be by classes, not by age; if done fairly, it would give precise amount of knowledge in the several classes of schools, and precise amount throughout the country, and would show comparatively the education given in the different kinds of schools, 16981–16984.—Considers such an inquiry quite within scope of Commission, 16990, 16991.

Education given in National schools is almost as good as it could be; its two chief defects are,—not sufficiently teaching to think and reason, and not implanting a taste for reading, 16985, 16986.

No special difficulties are encountered by Inspectors, and no alteration desirable in their position as regards

Cornelius Mahony, esq.

Central Board; the latter deal fairly with reports presented, 16987–16989.—No model schools in witness's district, 16992.—Suggestions for developing taste for reading; should commence with teachers; too much science at present; there should be one course of instruction for all up to a certain point; beyond that a certain amount of science, or a certain amount of literature, 16993–16996.

Best schools in witness's district; few children in Fifth Book; reading is not good; writing, arithmetic, and grammar fair; dictation excellent; geography not sufficiently taught; great want of understanding what is read; arithmetic sufficiently taught to remain with them in after life; many become clerks, 16997–17003.

Examination of teachers is defective; they should not be classed on literary attainments only; state of schools should be more taken into account; not much mathematics required; lessons on reasoning should be taught; masters weak in algebra, &c., should have weakness supplemented by enlarged course of literature, 17004–17009.—Payment for knowledge merely is bad; practical efficiency should reckon for one-half; State pays teachers for knowledge, and for communicating it; objection to their being paid more according to attainments than to numbers taught; those teaching greatest number get most school-fees; desirability of payment by results, 17010–17016.—Third-class are often more efficient as teachers than first-class; neither are always sufficiently remunerated; advantages to State of having teachers of superior qualifications, 17017–17023.

Desirability of residences for teachers near schools, but not too near; reason; pensions also necessary, 17024–17028.—Salaries are too small; this causes inferior teachers to be retained; sometimes have to pay rent, &c., of school-houses, 17029–17031.—School-fees; bad method of payment; respectable parents generally pay; average, 1*s.* or 1*s.* 6*d.* per quarter; sometimes pay weekly; advantage of this, 17032–17036.—Particulars showing bad results of education in convent schools being gratuitous; parents should pay more than they do, 17037, 17038.—Weekly payments are generally in advance, but not quarterly, nor could they be made so; sometimes parents give work in lieu of fees; not desirable to abolish quarterly payments; where less is paid than is nominally charged it is usually by arrangement; as to professing to charge more than is actually expected, 17045–17054.

Children remain too long in lower classes; time is wasted in mere spelling; earlier books should be larger; if payment by results adopted, proficiency should be measured by amount of attendance, 17039–17041.—Regarding remark that some first-class teachers are less efficient than some third-class; particulars showing that present system of examination is a fair one; all should pass in essentials, with opportunity of supplementing defects, 17042–17044.—Teachers having land for their own private use are apt to neglect school; occasionally they are as efficient as others, but generally it is the other way; agricultural schools in witness's district; quality of teaching; agricultural teaching in rural schools; advantage of a piece of land attached to these; speaking generally, the proportion of schools in which boys work is few; in some model agricultural schools boys never work on farm, 17055–17069.

Present most prominent defect is children not understanding what they read; this arises from character of books used; Board's reading books are all defective; lessons should be extracts from higher authors, not compilations, as these, from their language, generally induce poverty of thought; teachers' definitions also are generally too high sounding for children to understand, 17070–17079.

Present classification does not correctly measure teachers' qualifications; objection to its abolition, and suggestions for its improvement; teachers should be rewarded separately for efficiency and acquirements, 17080–17084.—Power of managers to dismiss teachers, though objectionable in principle, is not a practical grievance; without it some managers would not act, 17085–17091.

Has had charge of one model school—Newtownstewart; limits of present inspection district; contains 107 National schools, no model schools, two Christian Brothers', and some convent schools; no National schools in Youghal or Dungarvan now, but there are Christian Brothers' and convent schools; these are, generally speaking, good; teaching in the latter highly satisfactory, except in technical subjects; have monitresses trained in their own schools; particulars of their stipends, examination, &c.; ages from fourteen to twenty or upwards; they assist teachers, who are bound to instruct them in and out of school hours; they correspond precisely to monitresses in National schools; religious ladies stand in position of principal teachers; one generally has chief superintendence, and she is assisted by others; some are very competent; others less so, consequently technical teaching is unequal, 17092–17115.—They would not submit to classification, but their schools might be examined and paid according to results, 17116.—In England examination of nuns as teachers commenced with system—not so here; it is now too late—it would be objected to as an innovation on present system; some Orders cannot go outside—therefore, if examination took place, it must be within convents; the principle of testing fitness before payment is sound, but there would be a great outcry, 17117–17122.—In Youghal and Dungarvan, where there are no National schools, education has become denominational; cannot say whether primary education is sufficiently provided for; in Dungarvan, at last census, only about one-third could read and write; from calculations regarding part of Wexford, illiteracy appeared in proportion to fewness of National schools, 17123–17127.

Witness finds National schools generally attended by different denominations; quotation from an unpublished report by himself, showing that differences in religion do not seem to place the slightest obstacle in the way of united education; numerous cases cited, as for instance, Elphin, where there is a large majority of Roman Catholics in Protestant schools, though there are Roman Catholic schools, and Boyle, where Protestant children attend Roman Catholic schools, though there are Protestant schools; "In the face of such facts, none but the wilfully blind can be led astray by the delusion that National education has failed as an united system," 17128.—This admixture of denominations is attributable to excellence of teachers; other instances in Wicklow, Tyrone, and Donegal—all showing that where schools are efficiently conducted, denominations are fairly represented according to population, 17129, 17130.

Proportion of mixture of denominations in National schools is increasing; statistics in proof, drawn from Parliamentary returns; in 1837 per-centage of Protestants was 12, of Roman Catholics 70·3; in 1866, Protestants, &c., 18, Roman Catholics, 81, 17131, 17132.—Return of the "numbers of the several religious denominations taught in Irish National schools," from which foregoing numbers are quoted, *page* 763.—In Church Education schools there is a considerable number of Roman Catholics; in the Society's tenth report (1848) they return 120,202 Episcopalians, 15,713 Dissenters, and 46,367 Roman Catholics, 17133.—Return of religious denominations in schools of Church Education Society from 1839 to 1867, *page* 763.—In 1824, in five different kinds of Protestant schools, 60,000 Roman Catholic children were receiving their education, 17134.—Table (from which foregoing is drawn) of numbers of different denominations attending schools of Society for Discouraging Vice, Erasmus Smith, Education of Poor, London Hibernian Society, and Baptist Society, *page* 763.—Last statement refers to time preceding establishment of National system; the only Society then receiving direct State aid was Kildare-place, and they had 29,827 Roman Catholics under instruction, although priests had been endeavouring to withdraw their children from Protestant schools, 17135, 17136.

Does not believe that if schools were all under strictly denominational management, the attendance would be strictly denominational, 17137.—Quotation from Appendix to Duke of Newcastle's Commission, showing that in England children of all denominations attend same schools, and Protestant children attend Roman Catholic schools in considerable numbers, in many cases under the express condition of receiving same instruction as Roman Catholic children, 17138, 17139.—The essence of a denominational school is that all attending should be considered to belong to the religion of the school; Church Education Society's must be considered proselytizing schools; if assisted by State, this or any kindred society would have their means of proselytizing increased, 17140–17145.

Proselytism caused breaking up of Kildare-place system; if a denominational system were now established same results would follow; proselytism might, indeed, become the main object of such schools, as it already has been of some, 17146–17148.—If religious body be bound to take only children of its own denomination, proselytism could not follow, but none in Ireland would submit to such restriction; reasons; it would often involve putting children under inferior teachers, or no teachers at all, 17149–17154.—Denominational education has always been attended by proselytism; present provision of Board is a sufficient safeguard against it; original rule was ambiguous, and was modified, but did not work well; then the notice system was adopted, which effectually excludes proselytism, 17155–17157.—For State to aid a mere secular system without any religious teaching would be injurious; National system gives secular instruction, and leaves religious to discretion of managers; they may give none at all if they think fit, 17158–17162.—If State only assisted secular instruction, and took no cognizance of religious instruction, the National system might, and probably would, become proselytizing, 17163–17166.

A system of partial payment by results might be an improvement, but classification should be retained; religious question, or proselytism, would not be affected by it; if a restriction preventing proselytizing is enforced, it is no matter how the teacher is paid, 17167–17170.—Does not think it possible, under denominational system, to prevent proselytism and consequent contention, 17171–17173.—Denominational, if practicable, preferable to secular system, as latter excludes religion, but there is no choice as to proselytism between it and the denominational system as understood in the present controversy, 17174–17181.—Present practice is that parent of a different denomination may enter in a book his consent to child receiving religious instruction of the school; managers' discretion as to books and religious teaching, 17182–17185.

No case of proselytizing in school under Roman Catholic patrons in witness's experience; at Youghal it was alleged that Protestant children had learned an essentially Roman Catholic prayer from hearing it repeated, 17186–17188.—Knows of no actual instance of proselytizing in Church Education schools, 17189–17191.—Repeats that where National schools were superior to denominational, children deserted the latter for them; instances given are in witness's own experience, made out from teachers' returns; is satisfied these were substantially correct; report quoted, impeaching witness's notes, contains false statements; if portion read were true, it has nothing to do with what has just been stated; never inspected a school at midnight; has been sometimes obliged to work late hours, investigating accounts, &c., after children were sent home; inspections sometimes averaged two and a half schools a day; examinations, and returns given as the results, witness can put before the country as accurate and to be depended on, 17192–17205. Cornelius Mahony, esq.

State has no right to prevent a voluntary change of religion; definition of "proselytism;" as to when denominational schools may be considered proselytizing; if, in a Church of England school, a Roman Catholic attends and hears Scriptures read and commented upon, it is proselytism, 17206–17209.—At time of Kildare-street Society no other primary schools were aided by State, but there was a great number of Roman Catholic schools maintained wholly or in part by subscriptions; question of a denominational or secular system with aid given in proportion to numbers, 17210–17216.—Report stating that witness had described Roman Catholic children as deserting their schools for Protestant schools, &c., is a misrepresentation; adheres to certain opinions expressed in a book written years ago regarding opposition to National system; cannot tell why his initial has been altered in 2nd edition of this work; never saw the book till this moment, nor was even aware of its publication, [*see Mr. Duffy's evidence, Q.* 23310–23340, *for an explanation of this*], 17217–17230.

People at Dungarvan are to a great extent an Irish-speaking population; in saying a majority were unable to read and write, merely stated a fact in connexion with boast made that there is no National school there; stated the sum total; did not say they were retrograding; stated simple facts, which cannot be gainsaid; people can draw what inference they please from them, 17231–17249.—Object has been to state facts as they existed; may have inspected a day school up to 6 P.M.; it is a usual thing for Inspectors to examine two schools in a day, such as a male and female school adjoining; explanation as to visiting two and a half schools a day, and as to returns from teachers named above, 17263–17271.—Among the Irish-speaking populations great use might be made of that language in making children understand what they read, &c.; has often found great advantage in using it when examining schools; could be used as a medium of making them understand English words and sentences, 17250–17253.—The exclusively Irish-speaking population among the rising generation is very much diminished; few localities where it is spoken exclusively, 17254.

Tendency of reading is not checked for want of books; people do not sufficiently avail themselves of what there are; there are large districts and towns without any booksellers' shops; National schoolmasters are allowed 25 per cent. on books sold to pupils; would not pay to keep other books for sale; never knew managers take the per-centage, 17255–17262.

Further Examination.

In correction of former evidence [*Q.* 17214, &c.], considers secular system referred to even more objectionable than that of Church Education Society, for the reason, among others, that teachers, not being restricted as to religious instruction, might introduce it at various times, and Inspector would examine only as to secular. Thinks a National school might be conducted in accordance with Church Education Society's time-tables. Confirms previous evidence [*Q.* 17196, &c.] as to sufficiency of his notes taken during inspections; and, having more carefully examined report referred to, can state most positively that it contains at least eight mis-statements concerning himself, 25685.

MATTHEWS, MR. CHARLES. Mr. C. Matthews.

Is teacher of Strabane National School; has been a teacher twenty-five years; is classed first of first class; is a member of the Established Church, and has taught in schools in different parts of the country, the schools containing generally a fair admixture of religious denominations, 18258–18266, 18476–18478.—Is deputed to give evidence by a congress of the teachers of Ulster, excepting Belfast, 18416–18420, 18505–18508.

Reads a statement based on certain resolutions passed at the meeting of teachers, complaining, first, that the salaries are disproportional to the qualifica-

Mr. C. Matthews.

tions and duties; secondly, that a portion of the salary is sometimes withheld in consequence of low average attendance, not attributable to the teacher, that the true way to keep up a sufficient attendance is not to establish too many schools, and that teachers' salaries should be made to depend upon their qualifications and efficiency, and not upon average attendance; thirdly, that the distribution of good service or supplemental salary is illiberal, invidious, and unjust; fourthly, that National teachers should be treated with regard to superannuation the same as civil servants of the Crown; fifthly, that the payment of stipends should be made direct to the teachers; sixthly, that augmentation of teachers' incomes from local sources is very precarious; seventhly, that from the unpopularity of the service many teachers are leaving, and an inferior class of men are taking their place. The statement suggests also that all teachers should be examined, the scale of qualifications raised, the managers' power of dismissal modified or abolished, school buildings improved, residences provided for the teachers, and that the State should provide school requisites, 18268.

Income of Irish teachers is only about a third of that of English teachers, 18269–18274.—Salary is not proportionate to their qualifications as compared with that of the excise and constabulary, 18402–18406.—Teachers of Belfast memorialized the Board for an increase of salary, but were refused, 18275–18277.—Good service premiums, 18278.—Payment of salary frequently delayed through non-adjustment of accounts, or the absence of managers; the Post-office order should be sent to the teacher direct, or the Inspector might pay him, 18279–18284, 18387, 18388.—In some cases teachers are kept without their money, although managers may not be absent, 18414, 18415.—Many teachers use the profession as a stepping-stone for better employment, 18285–18289.—All teachers should be examined before being placed in charge of schools, after having served as monitors for a time, 18290–18293.—Teachers, if reported incompetent, receive probationers' salary for the time they have been in the school; there should be no probationers, 18294–18296.

There are very few ordinary schools in which classics or modern languages are taught; requiring masters to possess a knowledge of them would not restrict the numbers; the pupils would like to learn the languages, 18297–18302.—Managers are generally reluctant to agree for three months' notice to leave; they want to act in a very despotic manner, 18303–18307.—A register of candidates for employment should be kept at Dublin, where managers should apply for teachers; the teachers should be selected by the Board, the managers having a veto on the appointment, 18308, 18309.—There are many cases where teachers have to pay rent for their residences; instances at Strabane, Moville, Tyrone, Fermanagh, &c.; if residences were provided it would be a convenience to the masters, and for the good of the school, by saving the teacher from walking long distances, and thereby keeping the children waiting before the school was opened, 18310–18325.

Teachers' salaries should not depend upon average attendance; the present rule may have the effect of inducing the teachers to look after their pupils, but where the Board establish rival schools no exertion can keep up the required numbers, 18326–18329, 18407, 18408.—Salaries have been increased from time to time, and it is desirable that inducements should be held out for the teachers to rise to higher grades as at present, 18330–18332, 18541–18543.—None but classed teachers should be employed; the third class should consist of one division only, each teacher of that class receiving not less than £36, which a common labourer in towns can earn, 18333–18337, 18453–18455.—In the second class there should be two divisions, with £42 and £48 as salary, 18338–18340.—The first class should also consist of two divisions, with £54 and £60 a year, 18341–18343.—Advancement to model schools is open to ordinary teachers, but practically they are never appointed to them; teachers of model schools form comparatively a very small class, 18344–18352.—If the Commissioners made the situation of schoolmaster as good as any other teachers would not leave; they are generally attached to the profession, 18353–18356.—The police is more popular than school-keeping, as shown by many masters leaving to enter the force, 18357, 18358.

Some restraint should be put upon the Board as to the establishment of schools in places where others are in existence; the opinion of the manager might be taken, but not that he should give his assent, as patrons generally object to other schools being near their own, 18359–18362.—The conditions on which the good service salary is held is a reflection on the character of the teachers; as it is said to be given to encourage efficient teachers, there being only 7 per cent. receiving this pay, it would appear there are but few deserving teachers; an increase of salary should be given after the end of seven years, then again at twelve, and again at fifteen or sixteen years, 18363–18369.

School appointments are made by the managers, who have also the power of dismissal, 18372–18374.—Payment of school fees has a very beneficial effect; if the teachers obtained the salaries they ask for with half as much again from local sources, they would not be too highly paid, 18375–18378.—Parents are paying better than they did in former times, 18379.—The cost of education should be contributed by the State or by local taxation, 18381–18383.

It is very difficult to teach history, especially English and Irish history; a text book might be got, though it is hard to devise one, 18384–18386.—One instead of three testing examinations a year by the Inspectors would suffice, the object being only to test the amount of knowledge imparted in the school, 18389–18391.—Patrons take but little interest in the progress of their schools, 18392, 18409–18413.—Many instances in the north of Ireland of young men becoming teachers to qualify themselves for admission to the ministry or to college, 18393, 18394.—National schools of Strabane district are fair specimens of mixed education, 18395–18401.—Teachers at a public meeting in Dublin expressed their opinion that the power of the managers should be curtailed, but the Roman Catholic portion of them have since been more reserved on this point, 18421–18425, 18430. Some teachers are called on to teach Catechism and hold Sunday schools, and do other things which it is not their duty to do, 18426–18429.—Teachers regard the teaching of Catechism an infringement of the Board's rules; many would not report it to the Inspector, 18431–18434.—Managers generally do not give religious instruction; it is shoved on the teachers' shoulders, 18435, 18436.—Employment of incompetent teachers by the Board, 18437.—Means of raising tone and status of teachers, 18438.—Good service salary should be paid to all deserving teachers irrespective of districts; many teachers feel that they have been unjustly passed over; if attendance is below thirty-five the good service salary is withdrawn, 18439–18444.

Promotion should depend upon examination, which should be based on a uniform standard; a Board similar to the examiners of the Science and Art Department should hold the examinations, 18445.—Parents could pay higher school fees than they do at present; the Board laid down a rule as to payment of fees, but they never saw to its being carried out; if the managers were to co-operate with the teachers parents might be induced to pay, 18446–18452.

Summary of witness's opinions, 18464–18466.—Teachers in many cases have to find school requisites; witness did so at Moville, and when he left was not allowed to take away what he had purchased, 18466–18475.—Income as master of Strabane school £120 per annum, £75 of which is paid by the Board; hours devoted to secular and religious teaching, 18479–18488.—Vacations at Strabane school; there are four Roman Catholic pupils on the roll, 18490–18498,

18500.—Average attendance; there are no paid monitors, 18532–18534.

If teachers are obliged to give religious instruction they should be paid for it; men engaged in secular instruction can hardly bring to bear that earnestness of mind necessary for religious instruction; they begin very soon to teach it like any other lesson, without making religious impressions on the child, 18489, 18509, 18510, 18518–18523, 18531.—Managers when they are clergymen should give the religious instruction; in the case of lay managers facilities should be afforded to clergymen to give instruction to children of their respective denominations, 18499.—If a Roman Catholic priest wished to visit Strabane school he would be admitted, but as it is a non-vested school it is doubtful if he would be allowed to give religious instruction, 18501–18503.—Cases of tyrannical and arbitrary conduct are met with in the case of clerical as well as lay managers, 18504, 18505.—Means for imparting religious instruction in large parishes; the clergy are the best qualified persons, 18511–18517.—In America the teacher is free of the duty in regard to religious instruction; practice in England, Prussia, and France, 18524–18527.—Ireland in this respect is peculiarly situated in consequence of differences of religious opinion, which are the cause of many evil things in the country, 18527–18530. Mr. C. Matthews.

The elementary books of the Board are a fair set of lesson books, but they are not properly graduated, 18535–18539.—Teachers should be allowed to select their books for teaching; the difficulty in the way is requiring the teachers to answer upon them at their examination; this, however, might be obviated, 18540, 18552–18555, 18561.—Thirty children would provide sufficient work for a teacher; the children, however small in number, must be educated, 18544–18545.—Agriculture should be taught more generally than at present, 18546–18551.—Children in towns fluctuate from one school to another, 18556–18558.—Teaching in primary schools does not afford a suitable career for ambitious men; it requires highly energetic men to teach schools properly, 18559–18560.

NEWELL, WILLIAM HOMAN, Esq., LL.D. Wm. Homan Newell, esq., LL.D.

Was appointed one of the Secretaries to the Board of National Education in February, 1867, 2284, 2285.—Between November, 1837, and above date held successively the offices of Clerk, Superintendent of Schools, Head Inspector, and Chief of Inspection, 2286, 2287.

Estimates for ensuing year are prepared in November and December, and are sent to the Treasury through the Lord Lieutenant, who has power to prevent introduction of new matter, 2288–2291.—The Lord Lieutenant's sanction is usually obtained previously to sitting of Board on the estimates; if approved by His Excellency are forwarded to the Treasury, if not, are returned, 2292–2300, 2541.—Instance of an item objected to by Chief Secretary being struck out, 2295, 2301, 2542.—If Treasury disapprove estimates, they communicate with the Commissioners, 2302.—Board submit their report annually to Lord Lieutenant, but are not controlled by him or Chief Secretary, 2302.—No other control than Board of Audit and Treasury when estimates are passed, 2304.

Witness believes the reason for having two secretaries to be to give confidence to the various religious bodies, 2305, 2469.—The duties are divided between the Secretaries, but one acts for the other in his absence, 2306.—Witness deals with inspection and much of the correspondence, 2307.—Both Secretaries should sign important documents, but one may sign for self and colleague, 2308, 2309.—Orders of the Board need only one signature, letters to the public require both, 2310.—Secretaries are co-ordinate, but act very much together, 2311, 2312.—Their power over organization, discipline, &c., of office; leave of absence granted by them, but reported to the Board, 2313–2318.—Their actual authority is limited to the internal arrangements of the office, 2318.—They can direct action of Inspectors, but subject to approval of Board, 2319, 2320.—Witness attends the meetings of the Board at present; both Secretaries might be ordered to attend; does not think the object in having two Secretaries would be better attained by his colleague attending instead of himself, 2525–2529.—Particulars of attendance of previous Secretaries, 2601–2604.

There is no rule fixing which of the Secretaries shall attend the Board; either or both must attend if required; it has generally been a private arrangement between themselves; Mr. Cross liked to attend, and did so; the Roman Catholic Secretary has not been excluded; Mr. Kelly attended for two years; after some time he asked witness to attend, and he has done so; probably it was because of the labour and responsibility involved that Mr. Kelly wished this; any prejudice out of doors that it was from another cause is unfounded, 2819–2830.

There is no reason why a Protestant rather than a Roman Catholic Secretary should attend the Board, and it is impossible the Commissioners could have any object to serve in the matter; witness would be happy if Mr. Kelly attended; it is quite a private arrangement between themselves, 2836–2838.

Method of dealing with correspondence in witness's section of the office, 2321.

Chiefs of Inspection may take questions to Secretary or direct to Resident Commissioner, but no serious action can be taken without Secretary's knowledge, as he must sign any letter on the subject, 2322–2328.—Matters not settled by secretary or Resident Commissioner are brought before Board, 2329, 2330.—Previous notice is always given to each member of all matters coming on, 2331–2335.—No doubtful case has ever been decided in witness's time without all the Commissioners having received notice that it would come on, 2336.

There are three standing committees, the finance, the agricultural (which is divided into ordinary and special), and the sub-committee, 2337.—Constitution and duties of Finance Committee, 2338–2340.—Practically, the Resident Commissioner is the Finance Committee, 2341, 2342, 2393, 2394.—Constitution and objects of ordinary Agricultural Committee; has often consisted only of Resident Commissioner, but not so much so latterly; meets weekly, 2343–2349.

Special agricultural committee meets only occasionally; witness is not aware of its ever having transacted any business; consists of seven members, 2350–2352.—Constitution of sub-committee; deals with applications for aid, cases arising out of Inspectors' reports, fines, suspensions, &c., 2353.—Proceedings of committees are laid before Board weekly; Board passes them as a matter of course, unless anything is specially brought under their notice, 2354–2358, 2573, 2574.

There is no record of the discussions which take place at the meetings of the Board; a minute is made of the order of the Commissioners, which in important cases is written down verbatim. A protest made by a member would be recorded, should he desire it, and copies can be had, 2359–2363, 2402, 2403.—Objections of absent members to course likely to be taken by Board are read by secretary, and entered at length on the minutes, 2363, 2364.—One Secretary is always present at Board meetings; minutes are kept by Secretary; no other officers present, 2365–2367.

Resolutions of Board are never interfered with by Government, 2368–2372.—Reconsideration of questions very seldom necessary, 2369–2371.—No proposed alteration of rules or important question is ever brought on without previous notice, 2373–2376, 2378–2380, 2392.

Complaint by Archbishop Whately of removal of his books from the schools, 2377.—Secretary very seldom has occasion to refuse to sign letters of clerks, 2381.—Location and removal of Inspectors, 2382, 2383.—Unimportant letters not submitted to Board, 2384.—Board is summoned and programme of proceedings issued on Friday for following Tuesday, 2385–2391.—

Wm. Homan Newell, esq., LL.D.

Nothing of importance is brought on without previous notice, 2392.

Reports from sub-committees of their proceedings, &c., are invariably laid on the table for information of Board, but are seldom inspected, 2395-2399.—Payments for books, 2400, 2401.—No second edition of Board's annual reports, 2404.—"B.O." on official letters means Board's order, and "R.C.O." Resident Commissioner's order, but these initials are not now used, 2405-2412.

The efficiency or otherwise of an Inspector has a most potential and marked effect upon a school; the duties of an Inspector or Chief of Inspection are very laborious, and require special aptness and ability; teachers often make good inspectors, 2413-2419, 2426.—Witness can give a list of Inspectors who have resigned or been dismissed, 2420-2422.—As a body the Inspectors are more efficient now than in 1854, 2423-2425.

The principal duties of a Chief of Inspection are to read all reports involving action, to prepare special letters, and to consider applications for aid; any case of a difficult nature he reserves for the Resident Commissioner, 2427, 2428.—There are two of these officers; their duties are alike, 2429-2431.—Witness cannot understand the statement that one "from the variety of his occupations has never been able to do so much work as his colleague." One has been often selected for special duties, but he must still do his own ordinary work, 2432-2437.—Cannot say that his colleague did less work than himself when he held the office, 2438-2440.—A second chief was appointed to give increased confidence to the public, and to bring up arrears; not much work in arrear now; is kept up pretty regularly, 2441-2444. It is exceptional if an Inspector's report be not acted on promptly, 2445-2447.—An exact return can be given of number of schools inspected and time spent, 2448.

A District Inspector does not, as part of his duty, report to Head Inspector as to state of schools in his district; the latter would communicate to the former any defects he might himself have observed, 2449-2451.—Subordination of District Inspector to Head Inspector is not well defined; he cannot order him without sanction of Commissioners, 2452, 2453.—Reports are made annually by Head Inspectors; these have sometimes been published with omissions (but not latterly), sometimes not published at all, 2454-2460.

Witness disapproves of the fees of model schools being transmitted to the Board; the Commissioners do not wish it; it is done by order of the Treasury, 2461-2464; the entire fees should go to the teachers, 2465-2467.

Under present arrangements two Secretaries are necessary; one reason is to avoid suspicion of partiality in religious matters, 2468-2471.

Appeal against decision of Secretary, Chief of Inspection, or Resident Commissioner can always be freely made to the Board; Secretaries correspond in their own name and in that of the Board, 2472-2476.—Routine business is performed by Resident Commissioner, doubtful cases are taken to the Board, 2477-2479, 2571, 2572.

Witness is not aware of any control exercised by Government; the Board have occasionally deferred to their wishes, in one case reversed a decision, and in another altered an important rule at their instance, 2480-2489. Alterations in rules are not specially notified; they can be ascertained by comparing new editions with old; if any very important changes were made circulars would be issued to managers of schools, but the general public would not be informed, 2490-2495.

Reports of Board are chiefly statistical; discussion of educational matters in them has long been abandoned; witness does not draw up report, but is responsible for what it contains, 2496-2501.—Commissioners are responsible for annual report; they would not report anything unworthy of credit; witness would place reliance upon matters of fact reported by District Inspectors, 2514-2517.

Discussion of the manner in which the Board "*afford* combined literary and moral and separate religious instruction;" "there are facilities for literary and moral instruction at certain hours, and facilities for separate religious instruction at certain hours," 2502-2513.

Further discussion of same point. Witness contends that when the State provides facilities for separate religious instruction it "affords" it, although it pays for the combined literary and moral instruction; if there is ambiguity in the expression, it does not touch the principle, 2967-2970.

The efficiency of a school depends more on the teacher than the Inspector. Power of Board to remedy defects in teachers and schools; failing abuses being remedied, they can strike a school off the roll, but this is very reluctantly resorted to, 2518-2524.—Teachers must be examined by an Inspector before Board recognises their appointment; practice in this respect, and in promotion from one class to another, 2530-2535.—Inspectors' examination is a more severe test of literary acquirements than passing through the training school, but the advantages of the latter are the efficiency and skill in teaching acquired there, 2536-2540.—Further explanation on this subject, and as to promotion, 2617, 2618.

Teachers must be examined and pronounced competent by an Inspector before they can receive any salary from the Board, 2654-2657.

In a district where the state of education is very low, and good teachers could not be found, the Commissioners have carried out their rules leniently and allowed inferior teachers to pass, 2679-2683.

One half of the Commissioners, Secretaries, Chiefs of Inspection, and Inspectors, are Protestants, the other half, Roman Catholics, 2543-2550.—Office clerks are of any denomination; from four to ten are nominated by Commissioners to supply a vacancy, and are sent to the Civil Service Commissioners for competitive examination, 2551-2553.—Four generally compete for an Inspectorship, 2554.—Commissioners generally nominate Inspectors of their own persuasion, but not invariably—eligibility being the desideratum; sometimes a Protestant nominates a Roman Catholic, or a Roman Catholic a Protestant, 2554-2560.

Attendance at the Board is very fluctuating; patronage and other important questions will bring a large attendance; three form a quorum, but two can confirm minutes; often only three are present, 2561-2570.—From the nature of their callings, many members find it very difficult to attend, 2597-2600.—Formerly one Tuesday in the month was considered the important day, and drew a larger attendance; witness considers this a convenient arrangement for many, but it has lapsed, 2620-2623.

Serious business is discharged by Resident Commissioner, assisted by Secretaries, &c., routine business by the latter, 2571, 2572.

At the weekly Board meetings there is often but little to bring on, sometimes there is more than can be got through, 2573.—Secretaries write in the name of the Commissioners generally in communicating acts of Resident Commissioner, 2575, 2576.

Model schools are generally established at desire of locality, 2577, 2578.—Applications are very carefully considered, 2582.—There are twenty-seven in Ireland, 2583.—Fees are from 1*d.* a week to 20*s.* and sometimes 30*s.* a year; head master receives one half, his staff the remainder, 2579-2581.—Security against abuse in appropriating extra fees or neglecting those who pay the lower sums, 2632-2636.—The poor cannot be excluded, as 50 per cent. must be admitted at 1*d.* per week. Persons able to afford the higher fees are generally ready to pay the sum they ought, 2584-2589.—Some complain that the instruction given is too good; witness believes they drive private schools of an inferior class out of the field; has not heard of any of the good schools in the south and west being so driven out, 2590-2596, 2649, 2650.

One advantage of a model school is that it brings together children of different classes, and acts as a good middle school; it also has the advantage of

pupil teachers and paid monitors, 2624–2627.—Pupil teachers are boarded with the masters, and receive 30*s.* at the end of the first year, and £6 at the end of the second; witness would not hesitate to dismiss one for a sufficient cause, but has never had any complaints, 2628–2631.—New model schools involve Board in great expense; they are not therefore likely to be established unnecessarily, 2637–2640.

Rules are so framed that there is always room for the proper proportion of the poorer classes; pupils are received in the order of their application; District Inspector resides on the spot and visits model school weekly, when he examines lists of applicants, and sees that parents pay according to their means, 2641–2648.

Cost to country of pupils in model schools is £1 a head; witness thinks this class should have the opportunity of receiving such an education as here given if the poor are equally well provided for, 2673, 2674.—Numbers attending model schools have in some cases been much reduced, but none have ever been empty, 2675–2678.

Rule as to teaching needlework to girls in National schools is now strictly enforced, 2605.—Definition of "teacher" referred to in Section IV. of Rules, No. 14; and explanation of certain circumstances under which religious instruction may be given, 2606–2609.—No case in witness's experience of Lord Lieutenant being requested to cause alterations in school books, 2610.

Measures taken by witness to prevent work of office getting into arrear, 2611.—Ready means of ascertaining that letters are attended to, 2612, 2613.—Witness has curtailed and simplified some of the office work, 2614.

During the last year several circulars have been issued prescribing changes and giving instructions to Inspectors, especially on the new rule as to religious instruction; circulars have to be issued on almost every new rule, 2615, 2616, 2651–2653.

Government does not fill up appointments in witness's office, 2619.

Reports of Head and District Inspectors are revised by Chiefs of Inspection, 2658.—A teacher occasionally passes from third to first grade without going through second, but he must remain one year in each; certain number of pupils required in each grade to entitle teacher to salary, 2659–2663.

In promotion of Inspectors, denominational principle not so strictly observed as formerly; witness thinks that it should be wholly by merit and seniority, 2664–2672.

Where National school teachers are qualified, they should be allowed to teach Latin and Greek to boys of a certain proficiency in other subjects, but not so as to hinder the ordinary work; Commissioners have drawn up a scheme on the subject, 2684–2687.

Conduct of business at Board meetings; important matters in reports from sub-committees are particularized; the remainder are merely laid upon the table, 2688–2691.

Fines upon teachers are decided upon by Resident Commissioner, after careful consultation with Chiefs of Inspection, &c.; process of investigation, 2692–2699.—They usually are from 10*s.* to £2; causes for which inflicted; the number is about four or five a month. 2700–2703.

Office books in central institution, and method of keeping them, 2704.—In order to carry out consolidation of salary and registry offices, books costing £300 were prepared by order of the then Secretary before obtaining the direction of the Board. The understanding at present is that the Secretary should not order anything above £5 without previous sanction of Commissioners. Witness will produce one of the above-named books to the Commission, 2705–2717.

Witness afterwards gave in the following memorandum:—"The ninety large books were ordered by the late Secretary, Mr. M'Creedy. The cost can only be ascertained on application to the Stationery Department. This department does not furnish details of cost to the Commissioners of National Education of office books or forms furnished. The large books have been gradually utilized into registry-books—that is, so far as the columns suit our registration," 2935.

As a rule, first class clerks are appointed to superintend the several departments (not necessarily in order of seniority), but one from the second class is taken if thought better adapted to the work, 2719–2723.—Appointments of late years have been and in future will be according to merit and service combined, 2724, 2725, 2729.—In one case where a difference of opinion existed as to ability the senior was appointed; in another, a clerk was appointed solely for fitness, irrespective of seniority, 2726–2728.

Present division of labour in the different departments witness considers necessary, except the correspondence, which should be confined to one department, 2730–2732.—A proposed plan of the late Secretary, Mr. M'Creedy, to consolidate management of accounts, inspection, books, &c., witness deems impracticable, 2732, 2733.—Chief part of business connected with schools is in the registry office, which should be consolidated with correspondence office; cannot say whether Mr. M'Creedy contemplated consolidating accountant's department with the others, but he wished that one man should note receipt of particular reports, and deal fully with them, as far as witness understands, but he is not thoroughly conversant with Mr. M'Creedy's plan, 2734–2738.—Present books can be used if the system of payment by results is adopted, 2739.

Printing for Board is done by Mr. Falconer, Mr. Thom, and Dr. Sullivan; the two former bind what they print, the Stationery Office binds Dr. Sullivan's, 2740–2744. Since the printing was taken from the Stationery Office the Commissioners can contract with whom they please. When a book is to be printed they obtain an estimate from Mr. Thom, which is examined by their own officer and by Stationery Office before the contract is made. The Board would readily employ anyone else who would do it much cheaper, but witness is of opinion that no one in Dublin could do this, 2745–2752.

The contracts are made at so much per thousand copies, 2753–2754.—New books are subject to the correction of each Commissioner and of the "Book Committee;" the estimate for printing is irrespective of corrections; witness considers Mr. Thom deals very liberally with the Board, as the type is kept locked up so long, for which no charge is made; Stationery Office check the accounts, 2755–2762.

Board have no contract with any engraver, they have only recently attempted illustrating lesson books; engraver's account is merely passed through the Finance Committee, 2763–2764.

Two books, written specially for the Board—one an agricultural treatise by Mr. Baldwin, principal Inspector of the agricultural department, the other by a gentleman on trigonometry—have been corrected by the authors whilst passing through the press, but the latter have nothing to do with cost of corrections; Mr. Baldwin's is illustrated, and witness cannot say who certified as to cost. The vouchers are with the Audit Office, and the Board have duplicates of some of them, 2765–2775.—Witness will make inquiries about them, 2831.

Mr. Thom makes no charge for keeping type of Board's works standing; witness cannot say he charges for resetting it, but the same price is paid for subsequent as for first copies; sometimes a second 10,000 is required within three months; of some books 200,000 may be ordered at once, 2776–2780.—Witness does not consider that the printer is paid for resetting the type, because the same price per 1,000 copies is paid for other orders after the first; if he did not expect further orders he would charge more for the first, 2780.—No doubt he has a monopoly now, but he got it at first by open competition, 2782, 2783.

In the case of Mr. Baldwin's book, 3,000 were ordered, but Mr. Thom printed a larger number, expecting more to be required, or he would have lost by it, he said, 2784–2788.—Ordinarily the Board ask the printer what he will produce a book for, but they did not do this in Mr. Baldwin's case; they offered so

Wm. Homan Newell, esq., LL.D.

much for the first edition, intending a small further sum if a second were required, but nothing beyond, 2789, 2790.—Mr. Thom's monopoly is really only of the first edition, any one may print and sell after that; witness does not consider the author deprived of his pay by this arrangement; Mr. Thom first prints for the Commissioners, and then for his own sale to the public, 2791–2801.—As the author is paid by the Commissioners, he cannot be said to be deprived of his money; Mr. Baldwin cannot print his book, he being a servant of the Board, but the public can, 2801–2803.—The object of the Commissioners is not to oblige Mr. Thom, but to produce a work at the cheapest rate; he might be underbid in an open competition, but witness thinks it unlikely, 2804, 2805.

The Board have recently brought out a second edition of the Fourth Book of Lessons; after considerable discussion, modifications have been adopted, and witness thinks this edition is final. It is only considered a new edition when alterations are made, 2806–2816.

In 1861 witness wrote on the subject of payment by results; the paper has not been printed, 2831–2835.

Books used in the schools have not been frequently revised, 2839, 2840.—Previous to the appointment of the parties engaged in the late revision there was a committee for the purpose, 2841–2844.—Two officers of the Board were appointed to this duty, but whether by the committee or not witness cannot say; nor can he say whether Mr. M'Creedy ceased to act on account of his health, 2845–2850.—Commissioners approved of revision when under two Inspectors, and a literary assistant; some of the leading members of the Board were supposed to be on the committee, and attended; witness and some others also, but they were never asked to attend, 2851–2856.—Considerable discussion among the Commissioners about the revision, 2857.—Denominational and other grounds for selection of revisers. Witness has heard two of them praised for their experience and literary taste.—Instance of bad grammar in the Fourth Book, 2858–2864.

Witness thinks the first series of books issued by Board were admirable, the second good, but inferior to the former; the new series he is not acquainted with, 2915–2917.—When the first series was issued, there were no suitable books in Ireland. Is not much acquainted with present English and Scotch books; knows something of Chambers' and Laurie's; they have one advantage over those of the Commissioners, in containing more scientific lessons; books for advanced scholars should contain science, 2918–2921.

Practically, Commissioners' books are compulsory, as the examinations are based upon them, 2922–2926.—They are well suited for their purpose, and the rule directing teachers to classify children according to them and to study them is a proper one, 2927–2931.

In praising the early editions, witness would not depreciate the later ones; they are perhaps in some respects inferior, but in others superior, 2932, 2933.—The scientific portions have not been increased proportionately to the other additions, 2934, 2935.

Some managers are indifferent about having qualified or trained teachers; they vary greatly as to the interest they take in schools; generally they do not exert themselves to get parents to pay, but would like to see the schools full, and the State paying the teachers, 2865–2871.—Managers have taken no direct step to ameliorate condition of teachers; advantages which would accrue if they did so, 2872–2875.—Improved local payments would cause greater efficiency, 2876.—Managers cannot be dispensed with unless State takes the schools, 2877.—For purposes of communication with Board managers are useful, even when they do not attend much to the school, 2981, 2982.

Many more schools under laity of Established Church than under the clergy, because originally the clergy would not join the Board, 2878.—Reason for the contrary state of things among the Roman Catholics may be that the priests take the education into their own hands and are jealous of the laity, 2879–2881.—Reason of a larger proportion among the Presbyterian laymen probably is that they get up schools without reference to the clergy, 2882, 2883, 2974, 2975.—Witness's opinion is that the Presbyterian laity in the northern counties, as a class, are more competent to manage schools than the Roman Catholic laity; is not aware that the numbers receiving higher class education would indicate the reverse, 2977–2980.

The heads of the three leading Churches have endeavoured to make themselves heard on the education question, but the clergy have not done what might be expected; the laity are more liberal pecuniarily, 2884–2887, 2976.

The Commissioners have not done much to induce localities to contribute; a letter and circular have been issued; some parts being so poor, Commissioners have asked for a relaxation of Lord Stanley's letter insisting on local funds being provided, 2888–2894.

To a large extent the State aid pays teachers where parents are too poor to do so, but this was not the original intention; time-table does not now contain a paragraph directing that each child should pay 6*d.* per quarter, 2895–2898.

Lord Stanley's circular was attempted to be acted on at first, and is now in building cases, but not in endowment or payment of teachers; local aid could not now be insisted on without checking the spread of education, 2971–2973.

The only change witness would suggest between managers and central authority is to pay the teachers quarterly or monthly, more expeditiously than at present, by paymasters specially appointed, or through the district inspectors, 2899–2903.

Monthly payments might cause a slight loss of time to teachers, but they would willingly incur the extra trouble, as they complain that three months is too long an interval; payments might be made through the police, but they would not like the duty; monthly payments would not cause a large extra expense to the office; quarterly payments on proposed plan would be quicker than at present, and might perhaps satisfy the teachers; most of the payments are now made within a month of the quarter, 2998–3004, 3020, 3021.

If proposed system adopted, paymasters would be necessary for monthly payments, but present inspectors could do it if quarterly; the office could be clear of one month before it began another, 3005.—The cause of delay in paying is the number of documents to be made out in the office, and that it is done by post office orders, of which only a limited number can be obtained each day; payments might be made in three days through inspectors and bankers, 3006–3008, 3025.

Formerly the payments were half-yearly; with present staff they could not be oftener than quarterly, 3021.—Even if Post Office would issue more orders daily, the office work could not be done in much less time, 3022, 3023.—Pupil-teachers and monitors are paid monthly by local inspectors; witness would extend this to all teachers, 3024.—Master and assistant each have a separate post-office order; this complicates office business, 3025–3027.—Witness explains that whilst board have only their present salary staff, the limit of post-office orders is not a serious impediment, but if they would issue more orders daily, witness would order clerks back to work in the evening, 3028–3031.

The plan suggested would be an advantage to the teachers, and simpler, cheaper, and more satisfactory; the post-office orders cost £1,200 a year, and it could be done for less; witness has not entertained the question of that money coming back to the country; he merely looks at it as lost to the National Board, 3032–3035.—Witness has only thought of this scheme recently, and has not brought it before the Board, 3036.

Reasons for introducing organizing teachers; their salaries; the system is not carried on to the same extent as formerly, as many schools are now organized, and it has hardly answered expectations; if carried on and managers would co-operate, it might be made useful; it might supplement inspection,

2904–2910.—Complaint of immorality against one of the organizing teachers, 2911.—Witness will furnish a copy of the circular for appointment of organizers; it has not been strictly adhered to, 2912–2914. The system was introduced in 1854, 3009.

If objections now entertained by some to National Board were removed perhaps 100,000 more children now attending the Christian Brothers' and other schools might be added, which would bring the number on the rolls over a million, 2936–2939.

Cost of education to the State in the colonies averages £3 a head; in the Irish National schools about 14*s.*; witness does not look at it as a mere question of money; the first duty of the State is to educate the child and make him a good subject; teachers should be well paid, and the State only can do this; parliament might be disposed to act liberally, 2940–2942.

Witness believes children could be educated in Ireland at a maximum of £1 5*s.* 11*d.* a head, including all expenses; £2,000,000 a year would be well spent in the cause, but £500,000 would be a liberal grant; the various Churches should take care of the religious part of the education; the Board do not pay anything for religious education, but as a matter of fact it is almost universally given, 2943–2949.

Pupil-teachers sometimes reside in the houses of masters of a different religion from their own; no distinct provision is made for such cases, but there is generally a Protestant teacher to take charge of Protestant pupils, and the head master must see that children attend their respective places of worship, and must look after pupil-teachers of his own denomination, 2950–2954.

Commissioners are not exactly *in loco parentis* to pupil-teachers, but they see that their morals and religion are attended to, 2955.

Eligible lads are usually selected for pupil-teachers without much competition; £20 a year is paid to the master with him; this is a liberal sum as regards the boy, but not so to the master, 2956–2959.—Head masters receive £75 to £100 a year, and £20 each for pupil-teachers; a good model school is worth £180 to £200; two, Belfast and Cork, are worth double that, 2960, 2961.—The £20 a year and travelling expenses are always paid, as well as gratuities where conduct is satisfactory, but nothing for religious instruction, 2962–2966.

Neither Commissioners nor managers undertake to provide residences; married teachers often find great difficulty in this matter; more local effort should be made, and managers and Commissioners would do well to pay more attention to it; teachers have often complained to witness on the subject when an Inspector, 2983–2987.—About 43 per cent. of male teachers and 24 per cent. of female teachers are married, 2984.

Local contributions to teachers' stipends are often very small; witness hands in a report on the subject; a total amount of subscriptions of £12,000 includes the local endowments, 2988, 2989.—Subscriptions generally go in aid of teachers' salaries, but occasionally for books or repairs; they are largely hindered by a prevailing feeling (not among the thinking classes) that teachers' stipends are sufficient, 2990–2993.—Teachers should never have less than £40 a year, good men from £60 to £70; reasons, 2994, 2995.—Local subscriptions often die out after school is established; this does not lead to withdrawal of Board's aid, 2996, 2997.

Untrained masters still enter the service, because of opposition maintained to training schools; most of them have been educated in National schools, and are therefore vastly superior to the untrained masters of twenty years ago, 3010–3012.

Since 1861, 183 members of Established Church and 41 Wesleyans have become managers of about 300 schools; many of their teachers probably were educated in Church of England schools, 3013.

Few men educated in monastic schools offer themselves, but many young women from convent schools do; witness knows of some from Christian Brothers' schools. The young women from the convents take a fair average classification, 3014–3019. Wm. Homan Newell, esq., LL.D.

The scheme for payment by results and the new rates of salary is a different one from that for monthly payments; witness will lay it before the Commission, 3036–3039.

Contents of the paper referred to above, entitled, "Heads of a scheme for the future payment of National teachers."

I. The teachers in Ireland are insufficiently paid; this causes the best to leave the service, and keeps the supply unequal to the demand; increased pay would produce increased efficiency. Yearly stipends average £25; school fees, subscriptions, &c., £7.—Page 132.

II. State payments to teachers should be,—(1.) according to attainments, and (2.) according to results, and every inducement should be held out to make him efficient. Payment by results should not be limited to elementary subjects. No minimum of attendance should be fixed to qualify for examinations.—Page 132.

III. Teachers should be classed in only three ranks; all now in Board's service should be recognised; probationers should be abolished. Personal salaries proposed for the three ranks—£40, £30, and £20, for males, and £30, £24, and £18, for females. Further, schools should be arranged in three grades according to proficiency, and paid—to males, £25, £20, and £15, and to females, £20, £15, and £10, with a per-centage according to number of pupils. Assistant teachers should receive salaries of second or third rank, with £2, £3, or £4 additional, according to grade of school.—Pages 132, 133.

IV. Payment by results should be classified under the following eight obligatory, and twelve optional subjects.

Obligatory:—1. Reading. 2. Explanation, and subject matter of Lesson Book. 3. Spelling and dictation. 4. Penmanship. 5. Arithmetic. 6. Plain needlework. 7. House and premises. 8. Method and organization.

Optional:—1. Grammar. 2. Geography. 3. Geometry, *or* mensuration. 4. Algebra. 5. Book-keeping. 6. Navigation. 7. Agriculture. 8. Singing, 9. Drawing. 10. Physical science (one branch only at each examination). 11. Knitting. 12. Fancy work.

Particulars of proficiency expected under Nos. 7 and 8 of the obligatory subjects.—Page 133.

V. Conditions on which schools would be placed in the several grades according to "Proficiency" and "Attendance." Teacher failing three consecutive times to obtain a grade for his school corresponding to his personal qualification should be depressed. Inspection and examination should be twice a year, besides casual inspections. Salaries to be paid quarterly. Estimated increased expenditure to carry out foregoing, £50,000 per annum.—Page 133.

VI. Model schools. Same grade payment but higher personal salaries.—Page 134.

VII. Convent schools. Present capitation allowance in lieu of salary, grade payments same as National schools, and one paid monitor for every twenty-five pupils. This would increase expenditure in these schools by about £10,000.—Page 134.

By this scheme the total annual grant would be raised to about £400,000, and would never be likely to exceed £500,000. The total average cost of each child about 25*s.* £400,000 is about $\frac{1}{2\frac{1}{3}}$ part of the taxes and revenue of Ireland. In the canton of Zurich, $\frac{1}{3}$ of the public expenditure is devoted to education. In the colony of Victoria, each child's education costs the State £3 4*s.* 6*d.*, and the mixed or Irish system has superseded the denominational.—Page 134.

Remarks explanatory of the mode of calculating the value of pupil's proficiency, and grading schools.—Page 134.

Proposed programme of proficiency in six of the obligatory and the whole of the optional subjects—Pages 135, 136.

Sketch in detail of a proposed programme of Physical sciences.—Page 136.

Wm. Homan Newell, esq., LL.D.

Observations on the scheme, and comparison of it with the working of the Revised Code in England.—Pages 136 to 138.

Further Examination.

Witness, as Secretary, exercises a certain amount of control over the model schools throughout the country, with the exception of Marlborough-street. The model schools are intended as preliminary training schools for pupil-teachers, and as specimens of first-class ordinary schools; some of the very best teachers in the country have been produced in them, 24504–24510, 24640–24645, 24646.—Pupil-teachers in the model schools are selected from the paid monitors, but are drawn more generally from the children of the ordinary schools; sixteen is about the age when the children become pupil-teachers, and the period of instruction is about two years. As a rule, pupil-teachers are not allowed to go to Marlborough-street until they have charge of schools, which they may leave for six months' training. The training in the district model schools is very effective, and six months in Marlborough-street are quite sufficient for those who have passed through them, 24511–24528.—Students do not go to Marlborough-street to acquire literary instruction, but practice in school-keeping. The time devoted to practice in the schools is not sufficient, and the teaching is too professional; the students should receive more personal instruction from a humbler class of teachers, similar to the French "masters of study," 24526–24536, 24562, 24563.—The model schools in Marlborough-street are under the two professors, who are selected as representing two religions; this is a bad system, there should be only one head, 24537–24542.

The model schools are connected with the Science and Art Department; the remuneration the masters receive is according to the scale laid down by the Department, the amount depending on the results. As a Board the Commissioners have nothing to do with the Department, all communications passing through a committee chosen by the teachers; the Board can obtain information as to what is doing in the Science and Art classes if desired. The relations of the Department with the district model schools and with the ordinary National schools are the same as with Marlborough-street, 24543–24561.—Mathematics, physical science, drawing, &c., are taught in the model schools; if the subject is taught satisfactorily, the teacher is entitled to a gratuity of £10, which is sufficient for the object in view. The Commissioners have nothing to say to the remuneration the teachers derive from the Science and Art Department—it is quite outside the instruction given in their schools. Mr. Joyce received £80 5*s.* last year from the Department, and he stated that he considered part of it was scarcely fairly earned, as auxiliary subjects were taught in the schools daily. Teachers of ordinary schools would obtain the same gratuity as in the case of model schools, if they taught physical science. If teachers perform the same labours for the Department as they do for the Board, they should be paid for it, but the rate is excessive, and the whole scheme faulty. In one case, where the Board refused its gratuity, the teacher received something like £100 from the Department, 24752–24797.—There is a navigation school in Dublin at the central department, 24798, 24799.—The conduct of the examinations under the Science and Art Department is faulty and dishonest. Some teachers have been dismissed in consequence, others have resigned to avoid dismissal, and one teacher has been deprived of his certificate for three years; the dishonesty is chiefly in Belfast, 24800–24813.

Teachers of model schools are often selected from the ordinary schools, and not so much from the model schools; the appointments are given to the most deserving teachers. Most of the head teachers have had five years' experience, but if they had had only two years, and were trained in the special class for two years, they would be competent to take charge of a model school. Appointment and qualifications of teachers. Many of the female teachers have been appointed at twenty-three years of age, but the qualification is not here set aside; some have been appointed younger, 24564–24583, 24862–24878.—The English system of payment by results, somewhat modified, might be beneficially applied in Ireland; a personal salary must be retained or the condition of Irish teachers would be worse than at present. The plan suggested by witness has been tested by some of the Inspectors, and in every case they have reported favourably as to its practicability. The immediate increase in expense would be from the present vote of £370,000 to £400,000, and, finally, as a maximum, about £500,000. According to the estimate, with the improved conditions of the teacher, the plan would cost about 4*s.* per child more. The Board could administer a system of partial payment by results, 24584–24594, 24973–24975.

The system proposed by one of the witnesses of paying by results, with a partial salary, and leaving the managers to have or have not religious teaching, would not be advantageous. Any system in Ireland must be undenominational, such as the present one, and that should be applied to the three countries. In England the conscience clause approaches to it, and in Scotland non-compulsion has been the practice from time immemorial, 24595–24598, 24601.

The establishment of schools for each religious denomination would be difficult, as where the minority was small it would be practically excluded; and as it would lead to the multiplication of schools, would be financially disadvantageous, and the probability of proselytizing would be much increased, 24599–24602, 24609–24615.—A system with a conscience clause is preferable to one recognizing secular instruction only; the National system is one great conscience clause—in abstract and practice it is best as it is now. The duty of the State is to give secular instruction, leaving religious instruction free; practically general religious instruction is given from the Board's books. There are a few National schools in which no religious teaching is given except what may be gained from the books, 24606–24608.

In the earlier times of the Board, the number of Commissioners being smaller, the pressure brought to bear upon them was less than upon the larger number; the larger the number the more is heard of the wants and feelings of the people. There are many schools under patrons of different religious persuasions where there is sufficient attendance, which gives the schools the appearance of being denominational; but the rules of the Board are complied with, and the rights of conscience of the minority are protected, 24616–24628.—Inspectors are promoted according to religious denomination; witness recommended, on the ground of seniority and merit, two Roman Catholics to fill the vacancies of one Catholic and one Protestant Inspectorship, but the Board appointed one of each religion, 24629–24632.

Model schools were contemplated from the first; the Commissioners, in their second report, recommended thirty-two, 24639.—If a teacher of a National school were trained in a model school it would be irregular; the Commissioners do not carry out the rule requiring teachers to attend at Dublin or at the model schools. The testimony of Mr. Cross and Dean Meyler was favourable to the model schools, of which, training of teachers was the main object. About 900 trained teachers are required annually; this number will go on increasing unless the teachers' pay is increased. The present model schools should turn out 152 trained teachers a year, 24646–24670.

First-class monitorships were established, it is said, to supply a want between the senior paid monitors and the teachers, but this want did not exist; the only excuse for it would be that it was found that paid monitors did not obtain schools when they had served their four years, and it was desirable to retain their services, 24671–24674, 24681–24689.—Fourteen is the age at which senior monitors ought to be appointed, so that at the end of their term they might be twenty

—they must be eighteen—when eligible to take charge of a school, 24675–24680.—The same year in which these first-class monitors were introduced there was a reduction of the staff in the model schools; this reduction was not the result of any pressure of the Government, it was done by the Committee who prepared the estimates. The reduction took place contemporaneously with the Commissioners' statement that the model schools could not supply the demand for trained teachers. Only a few pupil-teachers were sent away before the expiration of their time as a consequence of the reduction; it is not a fact that a good many were sent away. The Inspectors, Protestant and Catholic, remonstrated against the reduction, some of them stating that the efficiency of the model schools, even as ordinary schools, was interfered with, and that further reduction could not be made without detriment, 24690–24728.

The report of Mr. Keenan, of which portions were not published, was for the year 1858; it refers to the establishment of model schools on a plan similar to the present schools, but that they should be non-vested, supported by the State, and that they should train teachers; this plan is somewhat similar to that of Mr. Fortescue. The Commissioners ordered this part to be expunged as it involved an organic change in the system. The action of the Board in objecting to Mr. Keenan's scheme and approving that of Mr. Fortescue is contradictory, 24732–24751.

In case of a teacher with such a salary as £10 a year the Commissioners would not object to his carrying on trade or keeping a shop, so long as it was not a public house, 24814, 24815.—Payment of rent for the school-house by the teachers is very general, and is a great hardship; it is much to be regretted that the Board have not a rule to forbid it. At the beginning of the system the managers were compelled to contribute to the maintenance of the schools, but the Board does not now enforce that rule. In the case of a school in County Roscommon, the rent being excessive and the master in great poverty, the Board proceeded to enforce their rule as to local contributions; the case is still *sub judice*, 24816–24831.—The minimum salary for teachers of the third class should be—for males, £35; for females, £28, exclusive of residence, &c., which should be supplemented by local support. It is very desirable that teachers should be elevated above the position of those they are in daily intercourse with, 24832–24838.—Local support in Ireland averages about £4 per teacher; so that on the salary proposed a third-class teacher would have about £40 a year, out of which he might have to provide a dwelling-house and pay the repairs of the school-house. Teachers do not have to supply the children with books; if he purchase any he is allowed a discount of twenty-five per cent. The Board does not now supply free stock except when a school is taken into connexion. The children purchase their own copy-books; if they do not, and the writing is bad, the penalty falls on the master, so that there is a certain obligation upon them to provide these books; it is a hardship, but teachers labour under many similar to it, 24839–24849.

The country generally ought to contribute one-third of the amount paid by the State, but it could not be got except by a local rate; managers should be compelled to contribute more largely, the difficulty is how to compel them without making the poor suffer, 24850, 24854, 24855.—A penny a week would not be too much as a school-fee; taking the average attendance at 316,000, this would give £66,000 per annum, 24851–24853.—As a rule managers, including the parish priests, throughout Ireland approve of the system, and not merely tolerate it, 24856.—A local rate, levied in a similar manner to the poor rate, is very desirable; it would induce the locality to form a committee and take some interest in the schools, though practically they would be left in the hands of the clergy, 24857–24861.—The rate should be collected as an addendum to the county rate, to be disposed of by a local committee or a central board. The imposing of a rate should not interfere with the managers' power of removing the teachers, 24857–24861, 24914–24921.

Wm. Homan Newell, esq., LL.D.

The model schools are not over staffed; where the children are few, there is a disposition among the pupil-teachers to be idle. Some complaints have been made of the principal teachers leaving their work to be done by the pupil-teachers, but these complaints are not frequent. As a rule, teachers are not brought to the central establishment to be trained till they are nominated to or are in charge of a National school, 24879–24895. The teachers of model schools hold office at the will of the Commissioners; the Board always give a month's notice, but the teachers are free to leave any day they please, and so also may pupil-teachers. There would be no objection to apprenticing the latter as in England, 24933–24943.—There are one or two cases of model school female teachers living apart from their husbands, who were very depraved; this cannot reflect on the character of the wives, and it would be very hard to visit the fault on them. Very few marriages between teachers of model schools; love-making is of very rare occurrence; if it occur, it should be checked at once. Surveillance over these schools is very rigid, 24947–24951.

Teachers seldom leave the position of schoolmasters until they have been some time in the Board's service, and have raised their qualifications. In 1867, 159 trained teachers possessing high qualifications left the service, all having schools; this is one fact which clearly shows they are underpaid. Some leave for the constabulary and metropolitan police, some for mercantile establishments, and many emigrate. The position of a sub-constable is decidedly better than that of a teacher; the pay is higher than the average pay of all the teachers in Ireland. It may not be undesirable that the successful teaching of a National school should be an avenue to better employment, but it shows that the teachers are not satisfied with their condition, 24896–24910, 24944–24946.—There is no instance of a National teacher, while in the service of the Board, having been convicted of Fenianism, but there was one who had been removed some years before, 24911–24913.

Very few cases have arisen where managers have removed teachers from whim or caprice, nor have any instances occurred where the managers have expected menial services to be done; teachers have complained of having to go to the Catholic church to teach catechism for two or three hours on Sundays. Some have been dismissed for coming up for training, 24922–24927.—Several cases have arisen of differences between the resident officers of model schools, but they are not of frequent occurrence, 24928, 24929.

The rule requiring teachers to be trained has lapsed into disuse, the Commissioners finding that the system would not work, as applications came pouring in from schools already in existence. The difficulty of providing trained teachers has increased latterly, 24952–24956.—It is very desirable for teachers to attend the model schools, and, as a rule, they are pretty well acquainted with the working of them. An official recognition of their attendance would be very judicious, and an allowance to untrained teachers of the expenses of locomotion, &c., would not be money thrown away; a week would be sufficient to enable them to see how the school was conducted. The practising schools at Marlborough-street practically exemplify what ordinary schools ought to try to arrive at, 24957–24965.

The District Inspectors are very fairly paid; if a slight increase were made in the expenses of locomotion no complaint would be made; all the Inspectors receive the same allowance; amount of salary and travelling allowance. Compared with England, the cost of inspection in Ireland is much less, so also are the office expenses. The English Inspectors are higher paid, but they have a large area to go over. The Irish Inspectors have frequently complained of inadequate payment, and their complaints have generally been responded to. It is quite undesirable to either diminish their number or raise their qualifications. The present number of Inspectors is sufficient to secure two

Wm. Homan Newell, esq., LL.D.

inspections of each school in the year, with frequent incidental visits, which is all that is required, 24966–24972, 24998–25001.—The Resident Commissioner receives the same salary as the Assistant Secretaries to the Education Department in England, with apartments, &c., in addition; this would have been increased, but Mr. Macdonnell declined it, 24992–24995.—Classification of Inspectors must be retained, although their duties are of an equally responsible character, 24996, 24997, 25002–25005.—Promotion is about as quick as in other departments; the six Head Inspectorships are the prizes. Promotion should be by length of service and proficiency, not according to religion, 25006–25010.—Statement as to the manuscript of the unpublished portions of Mr. Kavanagh's report on Clonmel Model School and model schools generally, 24976–24991, 25056–25058.

As a rule National schools are attended by children of all persuasions. In the South and West the mixture is small because the Protestant element is very small. The small Protestant minorities partake freely of the education given in schools under Roman Catholics. Irrespective of the National schools, there is very little provision for the education of the humbler classes of Protestants, 25011–25020.—Model schools were generally approved of at first, applications for their erection having been sanctioned by Roman Catholic bishops. No change has taken place in the rules and regulations, but the Catholic hierarchy and clergy now actively oppose them by withholding the sacraments from the teachers; the laity, however, still largely support them. Roman Catholic children have been considerably withdrawn; the schools are still well attended by the humbler classes, 25021–25055, 25065–25069.—Teachers trained elsewhere than in the model schools should have certificates of competency and classification after examination by the Board; teachers in convent schools are treated exceptionally—they are not subject to examination, 25059, 25060.

Explanation as to certain papers asked for by the Commission and moved for by Mr. Kavanagh, 25070–25082.—As to Section 11, No. 5, of papers called for by the Royal Commissioners, viz., "Number of reports of violation of the rules of the Board relating to religious instruction," &c. This return was taken from the county books, and not from the Inspectors' reports, as the former show all cases in which action was taken; which would be nearly identical with the number of reports, 25083–25094.—As to Section 14, paragraph 11, "Number of female teachers now in office," &c. This return, as it stands, is confined to teachers who were trained in convent schools under the Board, as this was conceived to be the meaning of the Royal Commission, 25095–25108.—Referring to previous evidence of witness, it is explained that on reports the word *nil* signifies no action required; the clerk never fines a teacher—he merely notes the antecedents and history of him if unfavourable, and if favourable, writes *nil*, which in this case means that there is nothing against him. In cases of applications for aid the Chief of Inspection looks over all the conditions set down in the report, and writes "grant" or "reject," according to the fulfilment or non-fulfilment of the conditions, 25109–25120.

The Secretary has no power to get a clerk fined or dismissed without offence being charged; every case is brought before the Board, and the Commissioners inflict the punishment; there is an exception with regard to fines for late attendance, for which there is a rule. The system of fines has had a most wholesome effect in making the clerks attend regularly. Cannot account for the fact that all the clerks whose fines are low are Protestants; it makes no difference whether Catholics or Protestants, they are all the same as clerks, 25121–25146, 25153–25163, 25203–25207.—The representations to the Post Office for further facilities in making the quarterly payments was made in conversation with one of the clerks in the cash office; this, however, would not support a general conclusion that a good deal of serious business was done by the Board's officers without official correspondence, 25147–25152.—With regard to the second edition of the Appendix to the Board's report, published in 1865, witness knows nothing of it, as he was not Secretary at the time, 25164–25168.—It has never been objected that the Secretaries have misdescribed subjects in the programme. The description in the programme of the joint letter of the Head Inspectors was very imperfect; as a rule the subjects upon the programme are taken in the order they are placed upon it, unless where a subject was important, when its consideration would probably be postponed for a fuller attendance of Commissioners. In the case of the joint letter the Board admonished all the Head Inspectors who signed it. If the Secretaries were dishonest men they might so arrange the details of business as to take into account the habits of attendance of certain members of the Board, 25169–25188.

With regard to the Kilflynn applicant case (which was within witness's district as Head-Inspector), an application for aid was made on 3rd February, 1854. The Inspector, Mr. Hickey, who had not long been in the district, was advised of the application on 30th March. He visited the school on 22nd May, subsequently to an application from Dr. Meehan, requesting aid for Ballyorgan School, which is within a stone's-throw of the school at Kilflynn. The Inspector could not know *officially* of the Ballyorgan application till the 3rd of June. It is the duty of Inspectors to consult the clergy of respective persuasions whether they object or not, or will co-operate, and to ascertain their opinions as to proposed schools. Mr. Hickey should have reported before 22nd May, but his report did not reach the Board until the 6th July. Witness reported (the matter having been referred to him by the Board) that the Inspector had not visited the case within three weeks, as required by a rule or instruction of the Commissioners (which instruction witness believed to be in existence, but cannot be found). The Inspector was fined £5 for his delay; he has now left the service. He appealed for a reconsideration of his case, challenging the production of the instruction. The negotiation as to the two schools in which Mr. Hickey was engaged was not accepted by the Board as an excuse for the delay; the facts of the case were laid before the Commissioners. Inspector's letter of 22nd December 1854; this was referred to Mr. Newell, who replied on 20th January, 1855; correspondence relating to this case; instances similar to this are rather uncommon, 25189–25202, 26887–26983.

The number of letters that come into the correspondence office annually is from 10,000 to 12,000, a large proportion of which would be sent to the registry office, most of them arising out of inspection business; process of dealing with this correspondence. Does not understand Mr. M'Creedy's plan; he proposes to group the schools by districts; the objection to this is that the districts are frequently altered. The county basis is a permanent one, and the only one on which business can be conducted. The course at present pursued appears more complicated in description than it is in reality, 25208–25251.—The amalgamation of the registry, inspection, and correspondence offices, giving each district to one set of clerks, would produce confusion; each clerk's work should, as far as possible, be homogeneous. If the processes could be shortened without interfering with the accuracy of official business, a great boon would be conferred upon the office; the desire of the Board is to simplify everything. Complaints of delay have been very few of late; in a great department like the Education Office there must be some complaints, 25252–25261.

The programme for examination of teachers is drawn up by the Head-Inspectors in conference, in connexion with the Chief of Inspection, and on consultation with the professors; it is a very common thing for the professors to recommend their own books to be taken. The programmes are to be looked on as the official acts of the Board, and they are responsible for the selection of the books of their own professors, 25262–25273.—The questions for answering are drawn up by the Head Inspectors; natural history

and chemistry form part of the subjects for classification of first-class teachers. The last professor of natural philosophy (Dr. Clarke) gave lectures on chemistry; the apparatus and objects for illustrating the lectures were selected by him. The return of subjects taught at the central training establishment was made by the professors. The distribution of apparatus and materials to the model schools is now made by the inspector; no collection has been made for geology or mineralogy since Dr. Clarke's death, nor has the present professor taken up these subjects. If per-centages on articles were allowed by the sellers to officers of the Board, it was done without the Commissioners' knowledge. The articles in the district model schools are in a very fair condition; those in the central department are very likely lying by in rust and dirt, 25274–25312.

Wm. Homan Newell, esq., LL.D.

Witness has never been accused of partiality to clerks on ground of their religion; has treated every man according to his deserts; of the eight clerks who have been punished by the Board at his suggestion five were Protestants and three Roman Catholics, the latter forming the majority of the staff, 26984, 26985. —Newtown-Stacpoole School, near Ennis, was a vested school, and has now passed into the hands of the Christian Brothers, 26986–26990.

O'Callaghan, Mr. Patrick.

Mr. Patrick O'Callaghan.

Has been master of Ovens National school, county Cork, for thirty years; is classed first of first class, 19742–19747.—The attendance is much affected by the different seasons, the parish being entirely agricultural, 19748–19752.

Witness is deputed by the teachers of Munster to lay before the Commission a statement embodying their views; the principal grievances are insufficient salaries and the want of retiring pensions. The teachers almost unanimously regard payment by results as a measure likely to render their position more miserable than it is at present; the irregularity of attendance arises from circumstances over which the teacher has no control, and for which it would be unjust to make him responsible, 19753–19757, 19795–19806, 19829–19853.

Teachers desire the present system to be continued, provided their salaries be increased, 19758–19761.—A great many of the teachers have to pay rent for the school-house and for their residence; if they were relieved of this it would materially add to their comfort, 19762–19773.—Supply of masters is not in excess of the demand, 19774–19776.—Assistants and monitors in Ovens school; difficulty in obtaining monitors, 19777–19783.—As a rule managers encourage the payment of a school-fee; those children who pay are more regular in their attendance; teachers, however, cannot look to local fees for any increase to their income, 19784–19791.—Uniformity of books desirable, 19794–19827, 19828.—Witness never knew of an instance of oppression on the part of the managers, but the teachers complain of the arbitrary power of dismissal, 19807–19809, 19854–19857, 19877–19879. —There should only be three classes of teachers, their salaries being increased to £40, £60, and £80 respectively, with school-fees in addition, the good service allowance not to be diminished, 19810–19821.—The power of the managers should only be limited to the extent of giving a month's notice before dismissal, and an appeal to lie to the Board where the teacher thought himself unjustly dealt by; there are cases where it would be better for the teacher that the reasons for dismissal should not be brought to the light, 19858–19874, 19925–19939, 19990–19992, 20057–20059.—If a probationer fails his salary is withdrawn at the end of three months, 19875, 19876.

Number and age of children on the roll of Ovens school, the average attendance, amount of school-fees, and master's emoluments, 19880–19890, 19912–19915, 19951–19953, 20036–20042.—Children in Munster do not fluctuate from school to school, except in cases where the teacher will not receive children who have not paid their school-fees, 19891–19894, 19909–19911.—The desire for better education is increasing among the Irish people, 19896–19900.—The amount of the retiring allowance should be about two-thirds of the augmented salaries, and should be granted in cases of infirmity after twenty-one years' service; at present teachers have only the workhouse to look to, 19901–19908, 19916–19918.—The teachers in Munster have no complaint of delay in payment by the managers, but it would be better to send the salary direct to the masters, 19919–19924, 20060–20061.

Never heard a master object to inspection. Ovens school has frequently been inspected by Protestant Inspectors, and no difficulty was experienced in consequence, 19940–19945.—If repairs were left in the hands of the teacher they would be more quickly done, 19946–19950.—Teachers as a rule do not leave their schools without giving notice, 19954–19955.—Generally children stay at school till they have got to the Third Book; where they leave in the Second Book they can hardly read with fluency, and do not keep up a love of reading after they go home; there are cases of children who left about twelve years of age, entirely forgetting how to read; those, however, who pass through the third, fourth, and fifth classes don't forget it, 19956–19969, 20113–20115.—The literary education of the peasantry is wonderfully increasing; the priests supply them with religious novels, lives of saints, and such like books, in order to encourage reading, 19970–19985, 20062, 20063.—Roman Catholic bishops have asked for a denominational system, 19986–19989.

Inquiries by Board's officers are satisfactory, 19993–19997.—Teachers are partly the servants of the manager; though somewhat remotely, he is in the employment of the Board, 19998–20006.—To a certain extent the payment of teachers should be regulated by their success, 20007.—Condition of masters contrasted with stonemasons, 20008–20022.—A master is bound to give secular instruction for four hours every week day except Saturday, 20023–20035.—Religious instruction may be given on any day after the secular instruction, 20043.—The managers of schools in Munster are generally the Roman Catholic clergy; some of the complaints which have been made are against Roman Catholic clergymen, 20044–20055.—The decreasing population is one of the causes of diminished numbers in the schools, 20056.—Teachers think that there are too many subdivisions of the classes; they would prefer to return to the old system of a fewer number of grades, 20064–20068.—The grievance with regard to model schools is that their teachers get a pension whilst the ordinary master gets none, 20069–20073.—Exemption from school-fees is generally granted by the master rather than make himself unpopular by enforcing payment at the sessions, 20074–20082.—Landlords as a rule do not subscribe to the schools, 20083.—Managers and teachers work well together in witness's district, 20084–20086.—Managers as a rule visit the schools frequently, and notice the progress of the children, 20105–20108.

A house and about two acres of land would be preferable to an increase in money; this would be a great advantage both to the schools as well as the teachers, as it would allow of practical agriculture being taught; the lodgings of the teachers are very bad, 20087–20104.—The new Agricultural Reading Book will improve the views of the agricultural population greatly, and the use of it will not at all interfere with teaching reading to the children, 20109–20112, 20129–20132.—The old class books are better graduated than the newer ones, 20116–20118.—Catechism taught by witness to the children, 20119–20126.—The manager gives religious instruction in the chapel on Sunday generally, 20127–20128.—When the local statistics were numerous the teachers thought they ought not to be compelled to fill them up without compensation, but as the forms are now much simplified, the amount of labour is not too great, 20133–20140.

Frederick O'Carroll, esq.

O'CARROLL, FREDERICK, Esq.

Has been Inspector under the National Board thirty years; his present district is the South Dublin District; had been, previously in about eight others, 3978-3980.—Was not under the Board before acting as Inspector, 3981.

The districts before mentioned were chiefly rural, and showed a great diversity of character; the South Dublin District extends about seven miles from Dublin up to the mountains; the schools in it are chiefly town schools, or nearly half-and-half, 3982-3984.

In the city there are many schools with attendances exceeding 100; the Baggot-street convent school has an average attendance of 750; the Warrenmount and Golden-bridge convent schools have between 200 and 300 average daily pupils; the rural schools vary very much, 30, 40, 60, 80, 100; schools of about 50 are generally the most efficient, 3985-3987.—There are eight convent schools altogether with large attendances, 4023.—Schools nearer the minimum figure of the Board are fairly efficient; it greatly depends upon the teacher; an average teacher can manage 30 single-handed very fairly, 3988-3990.

There are no probationers in the status of principal teachers in the district; there are some assistant probationers who have been allowed to continue in their schools, although not succeeding in getting into the third class, 3991-3994.

There are a great many schools in the Liberties of Dublin where the people are very poor; there is not so much poverty in the country portions of the district, 3995, 3996.

It is not necessary for the Inspector to report on the number of children receiving gratuitous instruction; that point is left generally to the managers, who have power to admit as many free as they like; in some places the managers take the fees and pay the teachers, in others they lay out the fees upon the schools, 3997-4000.—School-pence do not form a large item in this district; the largest schools are convent schools, where most of the children are admitted free, 4001, 4002.—About one-fourth of the children in this district attend convent schools, where there are no classed teachers, 4006, 4023.

Very few masters in the district are of the lower grades in the third class; they are mostly rather highly classed, 4003.

Teachers in this district generally come from other schools; in examining teachers for their first classification they are very rarely placed higher than the third class; third-class teachers often apply, and are examined for, promotion; most of those who so offer succeed, 4004-4009.

There is not much difference in the several counties of Ireland in the attendance as compared with the numbers on the rolls; the school-houses in Dublin are bad and crowded; it is impossible to have order or discipline in them, 4010-4012.—The average attendance is better in well-conducted schools, where the teachers are attentive; teachers have a great deal to do with good or bad attendance, especially in the city and suburbs, but poverty is a great cause of irregular attendance, 4012-4015.—Children of small landholders are often kept from school to assist in the farm labour, or to earn anything from anybody; the causes of irregular attendance are distributed pretty evenly, 4016-4019.

There are other schools besides convent schools, conducted by lay teachers, where nuns generally attend too; the lay teachers are recognised and classed by the Board; the Loretto school is such a one; the manager is the superioress of the convent, but the school is not counted as a convent school because the teacher is classed and paid according to her class, 4024-4029.

Convent schools are those in which the nuns themselves are teachers, who are paid by a capitation grant, and not by any classification; there are now eight of such schools in this district; there is another class of schools administered by nuns inspecting the school, attending to the children, and overlooking the teacher, who is a lay person, examined and classified by the Board, and paid according to the classification, 4030-4034.

Those convent schools taught by nuns who have themselves been trained to teach are the best; it is usual in such schools to provide a superior order of monitors, who practically become the teachers; these are often kept beyond their ordinary time of probation, four years; being very useful, they are kept on for a length of time, still paid as monitors; latterly, however, arrangements are made not to give gratuities for the fifth year, 4035-4041.

In the South Dublin District the average attendance of all the schools taken together is 6,500; of that number there is an average of no more than 200 or 300 Protestants, and there are some schools almost exclusively Protestant; no exception whatever was ever taken by Protestants at the inspection of witness, a Roman Catholic, 4042-4046.

No inconvenience has arisen in any part of the country from an Inspector being of a different religion from the schools he inspected; some of the clergymen have seemed to wish that convent schools should have Catholic Inspectors; witness thinks that the nuns themselves wish so, from natural religious sympathy, 4047-4049; they have not stated so to him, and some have said they were quite satisfied with the Protestant Inspectors who visited their school, 4131-4132.

Some of the religious orders of ladies are more especially fitted for teaching than others, as having had a professional training, such are pre-eminently the Sisters of Mercy, the Sisters of Charity, and the Presentation Order, 4051-4053.—The various other orders have not been professionally trained, but their bishop wishes them to have schools for the poor, for example, the Loretto Order, which is more for the education of young ladies, 4054, 4055.—Girls that have been trained in the convent schools frequently become schoolmistresses afterwards, chiefly because of the prohibition against the training institute; their capacity as teachers is examined, and they are classed; monitors must undergo a yearly examination, and are indeed subjected to similar tests as if they had been trained at Marlborough-street; convent schools are in fact supplemental model schools, 4056-4060.

In the South Dublin District there are no schools kept by monks; there are Christian Brothers' schools, but they are not connected with the Board, 4061-4064.

There are schools at Clondalkin kept by monks, but Clondalkin is not in the district; that school is connected with the body called Josephians, who are monks; two or three of them teach, and they have got a lay classed teacher, recognised by the Board; the brethren are assistants, 4065-4071.—The prior of the convent is manager, who corresponds with the Board and appoints the teacher; they have a large boarding school, which is their chief object; in the poor school the average attendance is from 100 to 120, 4072-4075.—The Board paid two teachers—a head teacher and a probationer; the latter was anxious to be examined privately for classification (their rule not permitting a public examination), but he never regularly applied, and was never classed, 4076-4078.—Throughout Ireland there are very few monks' schools connected with the Board, 4079, 4080.—There are none in witness's district, 4393, 4420.

In his report for 1865, witness spoke much about the mischiefs that might arise from the resolution of the Roman Catholic bishops not to receive trained teachers; and recommended the removal of the impediment; his present impression is that it is not likely to be removed; part of the objection has been removed; still, there is no proper place for training Catholic teachers; female teachers may be got from the convents, but male teachers cannot be got; the thing lowers the tone of education, 4081-4085.

The state of ordinary National schools in the southern district, as described by witness in his report for 1866, as to the inattention of the children and the indiffer-

ence of the teachers and monitors, is changed a little for the better, for the Board took action on it, and wrote to the managers of the schools, and in some cases fined the teachers and monitors; but the children are late and irregular, and the parents too poor or indifferent to exert themselves to prevent it; these remarks apply chiefly to the city schools, 4086–4088, 4101.—There is a great deal of national indifference as to time, 4089.—In the observations in the same report, as to number of children leaving the school unable to read or write, the witness still referred to the South Dublin District; out of the average attendance of 6,500, more than half were in the First Book, and of them 1,600 were in the alphabet, 4090–4094, 4145.

The state of things with regard to infant schools, that the din was intolerable, the programme ambitious, and the children not aware of its existence, is amended in part, for now there is no programme; the attempt to teach grammer and geography to those only in the First Book was a complete failure, 4095, 4096.

Further, as to the assertion that gratuities are given to teachers who have given very few extra hours to instruction of their pupils, there are twelve or thirteen who put in claims for teaching in after hours, but the Inspectors do not visit in extra hours, and on examination of the fourth class no great excellence is found in it; on these teachers' returns as to the attendance of the children reliance has to be placed; there are some checks, but seldom direct proof; they can only be suspected of being unfaithful, 4097–4100.

A building is in progress for the James's-street schools; when the manager got the money for his old school he intended to build a National school, but at the Cardinal's desire it is to be a Christian Brothers' school, 4101, 4102, 4293, 4294, 4320–4322, 4390–4392.

The Harold's-cross and St. Clair's schools are substantially superintended by nuns, but not ranked as convent schools; at a school in Ranelagh a nun only attends for spiritual instruction, 4103–4105.

In Baggot-street school there are twenty-four monitors, who are preparing for and fit to be schoolmistresses, assisting Sisters of Mercy, who are well trained and skilled in the science of education, averaging about twenty in the different rooms, teaching an average attendance of 750 children, a great disproportion; but the nuns do not remain in school the whole day, they have other duties to attend to, such as visiting the poor, &c.; the monitors in convent schools are, as a rule, superior to those in other schools; they receive instruction for an hour before and an hour after school time, and at less cost than in model schools; the place is a great training institution for female teachers, and many come from it to the Board; so that the female teachers trained in Marlborough-street by the Board are rejected by the clergy, and those trained in Baggot-street school are taken by the Board, and the Government system so far completely neutralized, 4106–4114, 4323, 4324.

The needlework in Ringsend school is very good and well attended to; latterly the Board has set a high value on needlework, and given high marks for it; the Inspectors are not obliged to be judges of it, they get persons to assist in judging; there were complaints formerly that teachers were tempted to take the girls away from needlework, because proficiency at books only was rewarded, but such is not the case now; much more attention is paid to needlework than formerly; it is of great importance to teach girls needlework, 4115–4122.

Inspectors cannot of themselves depress masters, 4123, 4124.—Inspectors keep books of the districts, which are to be shown to the Head Inspector, who generally require once a year to see them, 4125–4127.

If an untrained man obtains a situation the time he remains in the third class depends on his examination; a District Inspector cannot promote without consent of the Head Inspector, 4128–4130.

With respect to the action of the Commissioners in rescinding the rule as to enabling teachers to get first class, something was necessary to be done, the bishops seeming determined not to allow teachers to go to a training institution, 4133, 4134. Frederick O'Carroll, esq.

The irregularity of attendance and negligence at school is caused in a great measure by poverty; free education may have some influence in producing that result; there might be better attendance and more attention if the children paid school-fees, 4136–4138.

The children formerly mentioned as being in the alphabet may be of any age up to nine or ten; irregularity of attendance must be the cause; they stay away four or five months, forget all they have learned, and of course have to begin again, 4139–4144.

There are eleven or twelve infant schools in witness's district, chiefly under the management of clergymen; most of the teachers in these schools have not been trained by the Board; they were trained as monitors, and then appointed as teachers, 4146–4152.—Much more time is spent in teaching monitors in convent schools than in ordinary schools, 4158.

The rules of the Board are observed in convent schools; easy access can be had to these schools by knocking at the door, but there is considerable delay in getting admission, 4153–4156.

The lowest age of children beginning school in this district is from three years old upward, 4159, 4160.

School accounts are, as a rule, regularly kept; the teachers' books (3) must correspond; and they keep an account of moneys received, 4161–4165.

There is a great improvement in reading, writing, and arithmetic in National schools; the improvement in writing has been largely owing to Mr. Vere Foster's copybooks; the attention of the Commissioners was frequently called to the deficiency in writing by the Inspectors; witness cannot say that they took any active steps in the matter till constrained by Mr. Foster's zealous action, 4166–4177.—There is an excellent writing-master in Marlborough-street Model School; it is therefore supposed that the teachers are taught the best method of teaching; in teaching writing one great want is good pens and good ink, 4178–4184.

The gradation of the books is very good; they have been lately much changed, 4185, 4186.

The District Inspectors are under the Head Inspectors, of whom there are ten under one Chief of Inspection; the latter has charge of half the country; the Inspectors send their reports to the office; if there be anything requiring the attention of the Chief of Inspection, it is marked by the clerk and laid before the Chief, who orders action to be taken on it; the Chief of Inspection or the Head Inspector may have power to direct District Inspectors as to the arrangement of their visits, but if so they very rarely exercise it; the District Inspectors send their weekly returns, as well as their annual report, to the office, 4190–4200. If action is necessary, the Inspectors suggest what should be done whether as to repairs of school-houses, want of attention, reprimands or fines, or other punishments of teachers; full statements are made in all such cases, 4201–4202. The power of fining teachers is rarely exercised, and when exercised the amount of the fine is generally left to the office, 4211–4213.

In visiting schools the Inspector makes his entries in two books, the Report Book and the Observation Book; the latter is designed for the Head Inspector, manager, teacher, and District Inspector, not for the public; a stranger in asking for it would be asking a very unusual thing, 4203–4210.

There is an improvement in the teachers of ordinary schools in this district; first class teachers are numerous, there are seventy-one schools in the district, and there are ten male and fourteen or fifteen female first-class teachers; there are only twenty-four male principal teachers in these schools, the rest are conducted by females; infant schools for boys are conducted by females; the pay of first class teachers is adequate, the low class teachers are not well paid, 4214–4221.—The amount of salary should depend on the attention paid to the children, the number taught and the progress made; if that were done they would be more anxious about the schools and the schools would be better

Frederick O'Carroll, esq.

attended, 4222. The teachers may have to whitewash the rooms or to mend a pane at their own cost, nothing further, 4223.

The managers pay attention to the school by deputy; the priest, who is the actual manager, visits it very seldom, but his curates do it for him, and some very frequently; they take great interest in their teachers, 4224, 4225.—In some schools they are liberally paid, in others not so, by the children's fees; it depends on the manager, who receives the fees, and gives more or less to the teacher, 4226-4228.—The curates give religious instruction in the schools, and in female schools the nuns; they rarely give secular instruction; managers may take part in their schools with regard to secular instruction, there is no rule against it, 4229–4232.

It depends on the nature of the inspection whether all the children present are examined; some children, if qualified, might be examined immediately on admission, and their examination would go towards making up the report; in city schools it is possible a boy, by passing from one school to another, might be examined five or six times a year, 4233–4241.

Examination is always made in reading, writing, and arithmetic, geography and grammar; the last is a subject not much appreciated; when a school is reported to be good, it is for general proficiency in its programme, 4242–4251.—Singing is taught in some schools; most of the female schools teach it, 4252, 4253.—Witness is in favour of payment by results 4254.

On the rolls of the ordinary schools there are 335 Protestants, and on the rolls of Baggot-street schools 1,120 Roman Catholics; the Protestants are—in Irishtown female school, 63 Protestants and no Roman Catholics; at Ringsend female school, 15 Protestants and 132 Roman Catholics—in the male school, 1 Protestant and 188 Roman Catholics, 4255–4263.

In the convent schools there are no Protestants, but two or three Jewesses; the education in the convent schools is better than that of others, the teachers there are trained on a system of their own; there is greater proficiency, more attention, more order, more discipline, and all that is necessary to constitute a good school; the attendance is larger and more regular, 4264-4271.

In other schools the teachers are adequate to teach, but they do not exert themselves as they ought; finding fault in 1866 with the attendance of the scholars, the teachers are to blame in not setting a good example; this, if represented to the Board, will draw a reprimand to the teacher through the manager, and a fine for irregular attendance; the conclusion from which is, that if the teachers were paid in proportion to the attendance and proficiency of their pupils ("payment by results") the result would be different; in the last report (for 1866) allusion was made to the deficiency in all classes of learning; witness had been then but few months in the district, the report for 1867 is better; geography is a failure, it is now left out, 4272–4280.

About a fourth of the Catholic children in the National schools in witness's district are taught by religious orders; this proportion is increasing, the clergymen being anxious to send all the Catholic children they can to the convent schools, as being considered the better schools and the children better taught, especially in religion; it is the poorest class who attend the convent schools; there may be some better off than others, but very few; the age of the children in convent schools is higher than in others; they are kept to be monitors; the girls excel the boys in attainments, 4281–4287.

The lower portion of the middle class send their children to the convent schools in preference; the attractions being that they are better taught, and the nuns are kind to them, and are interested in their welfare, 4288–4291.

The fact of a teacher being first class is only a proof of his having passed a good examination; a low-classed teacher, or probationer even, may be a better teacher than a man of high literary attainments, 4292.

The system of training of nuns is in serving two years as probationers or novices, being taught by the elder sisters; their teaching is superior, being proved by the result; the greater attention given by them is to be attributed certainly to the higher motive, 4296–4298.

[Further details (partly repetitions) as to the numbers of Protestants and Roman Catholics attending mixed schools in witness's district, 4299–4313.]

As a general rule a new school (of either denomination) attracts scholars from older schools, 4314-4318.

There is frightful overcrowding in the infant schools; in John-street female school, John-street infant school, Leeson-lane school, Townsend-street infant school, the attendance is twice, and sometimes three times, the number the rooms are calculated to hold; schools so overcrowded are not clean; they have nearly all boarded floors, but some are not warmed in winter time, 4325–4332.

With reference to payments by results, the teachers should get something for classification, and for the attendance and attainments of the children, 4333–4336.—There should be very little deduction made from the teachers under the head of classification, on bringing in the other system, because they, except the first class teachers, are badly paid, 4337.

Few teachers reside on the school premises, except in conventual cases, when they all do, 4338.—Some teachers live in Dublin, and go to their schools by train; some married teachers have to go some distance to their schools; the addition of residences near the school, not communicating with it, would be a great boon to the teachers, 4339-4344.

All the schools in this district under religious orders, such as nuns, and under the patronage of Roman Catholic clergymen, are denominational; the parents are all Roman Catholics, and wish their children to go there; the same thing may be said of male schools, the managers of which are parish priests or curates, 4345–4348.—Schools formerly under parish priests, and practically denominational, have been withdrawn, and put under the Christian Brothers, whose schools are overflowing, 4349–4353.

Witness has never heard any complaint from the nuns teaching convent schools that the programme of the Board they had to teach was too ambitious, or that they were obliged to teach things unsuited to the girls' capacities or their chances in life, or that they had to take them away from needlework to teach them higher branches of education, 4354-4359.

Drawing is not usually taught in schools in Dublin; in some of the convent schools it is; in a school at Harold's-cross an assistant teaches drawing and music, and in the John-street schools drawing is taught; the Board supplies the models; the teachers supply drawing books or paper, which they get cheap from the office; the time devoted to drawing depends on the arrangement of the time-table; some, not many, drawings are sent in for competition under the Science and Art Department, 4360–4370.—Singing is more taught than drawing; the best singing is in Baggot-street schools; boys like it, and it is useful in the girls' schools, they being taught to sing in the choir, 4360, 4369, 4371.

Inchicore school was perfectly clean, offices and yard, when visited; there had been some complaint about a sewer, but the fault could not be pointed out; it is a common result of a school built under the Board of Works to have the sewerage getting wrong, 4372–4377.

In the ordinary schools in this district there are no children in the Fifth Book, and a very small proportion in the Fourth, 4378–4381.—Ordinary schools in this district are as a rule inferior to those in other districts, which is to be attributed greatly in some cases to their bad accommodation; in other cases the teachers have not their heart in the work; they have not proper wages, and they will never earnestly work unless they are paid by results; the wretched school in James's-street is dying out; when the new school is finished, the male school will be closed, 4382–4392.

In visiting convent schools comparison is always made of the number of children with the area; eight square feet are allowed to each child; in some cases these schools are much overcrowded, 4394–4396.

It would be a dangerous experiment to attempt in Dublin to limit the number of children who are paid by capitation fee to the area of the school, because of the proselytizing in the city; the poor might go to the proselytizing schools, where they would be fed and clothed, the parents disregarding everything but food and clothes; the population is sufficient for the National schools, the Christian Brothers' schools, and a great deal more; 600 children were going last February to the proselytizing schools in the South Dublin District who would go to Roman Catholic schools if they had not food and clothes given to them; these are the Irish Church Mission and Church Education schools, 4397–4400.—Protestant children go generally to the parochial schools, as do also many Catholic children, 4401, 4402.

The Irishtown school, three schools in Bride's, the Ringsend schools, and two in Glanasmet are the only schools under Protestant patronage in the district, 4403–4406.

Teachers of the third class are better than they were, but they do not pay the attention they ought, 4409.—There is latterly a difficulty in schools getting assistants; in Rathmines they cannot get one at all; assistants will not engage without £10 or £15 additional to the Board's salary; the scarcity arises from the pay being too low, and from an objection to the training establishment in Marlborough-street, 4410, 4411.

The Christian Brothers do not use the monitorial system much; there is not a sufficient number of teachers or brothers; they have not teaching power sufficient, 4412, 4413. Frederick O'Carroll, esq.

In examining a school notice is taken if the children are too highly classed, 4414.—It depends on the attendance, but if that were regular, two years would be too long for a child to remain in the First Book; a child from the beginning would be in it about a year, it depends on his ability, 4415, 4416.—It is unusual for a boy of fifteen to remain in school, unless preparing to be monitors or teachers; but it is a thing that seldom or never occurs; there are 120 female monitors to 17 boys, 4417–4419.

The nonproduction of monitors, &c., from the Christian Brothers' schools arises chiefly from their nonconnexion with the general teaching of the country; their schools are mostly fed by the infant schools, 4421, 4422.

There is one workhouse school in the district, conducted on the denominational principle; 510 is the average attendance, of which thirty-seven are Protestants; there are five Roman Catholic teachers and two Protestant, 4423–4425. The average attendance at workhouse schools is represented as 7,000 or 8,000, the number on the rolls at 17,000 or 18,000; the latter numbers represent the children passing through in a year, 4426.

The state of the repairs of school-houses was noticed in witness's report for 1866, after first coming into the district; the state of repair must be mentioned every year; the repairs of schools vested in trustees must be paid for by the managers or local parties, those of schools vested in the Commissioners, two-thirds by them, the other third by the localities, 4427–4431.

O'Hara, Thomas, Esq. Thomas O'Hara, esq.

Has been for six years Inspector under National Board; present district is Clonmel. Population is Catholic, with a very small admixture of Protestants. In about one-half the schools there are a few Protestants, who attend because most convenient, 26684–26689.—Of 84 schools visited, 44 had Protestants. Others had mixed attendance, but not at time of visit; number was from 1 to 10, except in Clonmel, where, as also in Cahir, proportion is larger. Believes Protestants and lay Catholics of district are opposed to a change from mixed system. Most of the schools are managed by priests, 26690–26695.—A few Church Education schools in district; Protestants have left these for National schools, because the education is better, 26696–26698.—Enough Protestants in Clonmel to have a school of their own if they wish. In Clogheen (population 2,000) Episcopalians attend National in preference to local Protestant school. Roman Catholics, where free to choose, prefer National under Roman Catholic management to denominational school; Protestants the same; by "free to choose," means where no penalty is attached, as in places named, where teachers and children have been refused sacraments for years, 26699–26711.—No proselytism can be alleged, no feud between priests and landlord; but bishop has prohibited sacraments to those attending vested schools and schools under Protestant management, 26712, 26713.

Attendance at schools in Cahir quoted to show that National school under Catholic management is preferred to convent school; attendance at the former is frequently in excess of accommodation, which manager (the priest) would not improve; will not say it was to drive children to convent school, 26714–26725.—Priest was very anxious to get convent school under Board, but a stone cross being built into wall he was refused, until it was covered. At same time a wooden cross stood on gable of National school, to which the Board did not object. This school was originally built by Kildare-place Society with cross upon it, which remained there when it became a National school. People of Cahir considered Board's conduct an insult to the convent school. Question as to cross not being an exclusively Catholic emblem. Teacher of ordinary National school has been there some years, 26726–26747.

Two Christian Brothers' and two convent schools in Clonmel, neither under National Board; has heard they are largely attended. Children would attend model schools in preference to any if permitted; nothing but refusal of sacraments can drive them away. No ordinary National school in the town, but one four miles off, for which 25 children left Christian Brothers' school, because as was said, they were not well taught. Knows other similar cases, 26748–26759.—Brothers' schools attended by all classes, same as model schools; knows parents prefer the latter because of superior education, though accommodation is inferior; larger attendance at Brothers' school is because children are prevented attending model school. Of average attendance of 110 at the latter, rather over one-fourth are Roman Catholics, 26760–26778.—Parents and teachers are actually deprived of sacraments, not merely threatened; some parents temporarily withdraw children at confession times, to ensure receiving sacraments; those who attend are not less respectable than others; many respectable people consider it a great grievance that they cannot use schools. No proportionate diminution since 1867; disabilities were effective then and now; has heard a Roman Catholic clergyman deplore that they cannot have trained teachers; objection is not to the training, nor to their character being thought inferior, but simply because of the bishop's prohibition. Believes priests look upon it as a hardship; some who have gone up for training could not be employed on return by same managers, others were obliged to be sent away, 26779–26792.

Boarding pupil-teachers should be given up; believes many come to get a free education, not intending to follow it up; a larger proportion of those not boarded remain than of the others. Monitors should be paid something more, and not be boarded and lodged; their training is more effective and cheaper than that of pupil-teachers, and more calculated to keep them in the service, 26793–26798.—Has been Inspector in Ros-

Thomas O'Hara, esq.

common and Ballina. Had management of Templemoyle Agricultural seminary, 26799–26804.—Modified system of payment by results most desirable. Very little difference between trained and untrained teachers; better curriculum required in training schools. Many teachers receive a higher salary from classification than their efficiency warrants. Case supposed, showing superiority of payment by results over payment by classification. A less trained man sometimes makes a better teacher. Schoolmastership and physical science should be better attended to in training school. Rural school teachers should always have a knowledge of agriculture. Time in training school is quite inadequate; proportion of marks to subjects taught, 26799–26817.

Qualifications of teachers in Ballina district exceedingly low; somewhat so in Clonmel; causes,—low standard, small local aid, prohibition against training, too many schools. In Ballina teachers falsify accounts to get better salaries; remedy for this, not to allow very small schools. Causes of undue multiplication of schools. Inspectors' reports against unnecessary schools being taken into connexion not always attended to; strong case in point, 26818–26833.—In Ballina district managers take scarcely any interest in schools; paid no attention to either secular or religious instruction, 26834–26838.—In Clonmel district clergy give religious instruction. Educational wants are fairly met; only one additional school required. Difficulty sometimes in obtaining sites. Many Catholics consider National system a good one, but capable of improvement, 26839–26847.—Believes teacher in Protestant school is an exceptionally good one, but people prefer National school. Model school is not frequented chiefly by middle class children; to some extent it is. Erasmus Smith's school has not affected model school, 26848–26857.

Lower class indifferent, but middle class decidedly prefer mixed system. There is not a Protestant school in every parish. None out of towns. Convent schools in district; priests are satisfied with them, and with those who conduct them, 26864–26867.—Protestant bishop and rector are opposed to National education. Inspector's report for 1864 speaks of opposition of prelates of Established Church as well as of Roman Catholics, 26868–26870.—Has heard that beneficed clergy are bound by law to maintain a school; impossibility of this in Clonmel district; would not meet objection against State for not providing such schools; reasons. The few Protestants are chiefly Episcopalians. Very few schools with as many as 10; two with from 20 to 30, 26871–26882.—Anomaly in payment of teachers named above would be corrected by payment by results; advantages of this system, 26883–26886.

Oranmore, Right Hon. Lord.

Right Hon. Lord Oranmore.

Has acted for many years as patron or manager of National schools in that part of county Mayo adjoining Galway. The elementary education given in them is efficient. The schools under him are mixed, but the Protestant element is extremely small. The religious instruction is carried on according to the rules of the Board; what the Protestant children get is from outside, 13334–13341, 13349.—The masters of the schools with which witness is connected have been mostly trained in Marlborough-street; they are Roman Catholics. Trained teachers are much more up to their work than the untrained, and better educated; being brought up on system, they are more improved. The state of training in the model schools under the Board is excellent, 13344–13348, 13352, 13398.—No better feeling can exist between different religious communities than does now in the district witness is connected with, owing necessarily to the children being taught together in a common school. No complaints or objections have been made by the priests as to the religious teaching, 13348–13357, or by the Board, 13364.—The Protestants in the district being so few, they would have no schooling if it were not for the National schools, 13358–13361.—The hour for religious instruction is at the end of the day, when all who do not choose to stay are at liberty to go. No inquiries are made, so that no sort of compulsion may seem to be imposed, 13365–13369, 13374, 13375.

In the Ballindine school there are no Protestants, and not more than five or six in the Crossboyne school, 13370, 13371, 13373.

The religious instruction consists of a prayer, a collect, the Lord's prayer, and a chapter of the Douay Bible read every day, 13338, 13354.—The prayer, added to the Lord's prayer, was composed by a lady from some Roman Catholic collects. As a patron of schools, it is competent for witness to draw up any suitable prayer for use in the schools; there is no rule of the Board forbidding it; neither is it antagonistic to the spirit of the National system, every person being at liberty to withdraw if the religious teaching is not agreeable to his conscience. No ill feeling was ever manifested or ever existed against the prayer under discussion. Prayers written by one denomination are constantly used by others, if appropriate, 13376–13397.—The prayer itself is written and put on the time-table, so that all may see what it is, 13365.

In agricultural districts the average of the year is not a fair criterion of the attendance at school, 13399, 13400.

No objection or opposition has ever been made to the witness, as patron of the schools under him, by either people or parish priests; the general objection comes only from the Roman Catholic bishops, who claim to spend the State's money as they please on education. It is not to be expected but that the person who builds (in part at least) a school should have a voice in the patronage. Nowhere, except, perhaps, in Spain and Rome, does a proprietor build a school and hand it over in fee to another person, 13401–13408.

The National system is a decided success. Of the total numbers attending the model schools, there is 50 per cent. of teachers, and 38 per cent. of pupils Roman Catholics, showing that it is approved of by them. To change this from a National to a denominational system, would be for the State to enforce the authority of the Roman Catholic bishops where they cannot do it themselves. The model schools have been interdicted by the bishops in Dublin and Belfast again and again, but the penalties may not have been inflicted, 13409–13415.

The ordinary National schools are necessarily mixed schools, if the minority be only one, inasmuch as the system provides for that one's attendance and instruction. Although all the scholars are of one religion, the schools cannot be called denominational for that reason. The number of really denominational schools is diminishing. The number of children on the books last year in all Ireland is 900,000; this represents an average attendance of one-third. The average attendance could not be improved, the children being engaged in agricultural operations, when it is impossible to keep them at school. Witness's calculations are based on the National Board's returns, 13416–13431.

The statement of Bishop Dorrian, that the Roman Catholic bishops tolerated the common schools under the Catholic clergy only because they were in fact denominational, whatever they were in theory, was grounded probably on statements made by those dependent on him, who were not likely to colour them disagreeably; witness quotes from returns made by Government officers, who are better authorities than any Roman Catholic bishop, 13432–13436.—The denominational system is claimed as a matter of justice because it exists in England, where the circumstances and the results are very different; the almost universal opinion among Roman Catholic gentlemen and middle class people, is against the denominational system; the choice is whether the state, which is responsible to Parliament through its officers, or the Roman Catholic

hierarchy (not the laymen or the priests), who are responsible to nobody, are to have the guidance of the whole education of the country, a power not given to them in any country in Europe; observations on the evil animus in every pastoral emanating from the Roman Catholic bishops; if the education of the country were given over to the Roman Catholics it would be carried on through monasteries and convents; the National system or something like it exists in France, Belgium, Prussia, Austria, Australia, Scotland, and all the colonies; it is called the Irish system, and is probably the only Irish thing that has ever been adopted, 13437.

Further references to statistics, 13348–13442.—Of course, where there are no Protestants or Catholics there can be no attendance of one or the other, 13445–13447.

The teachers get at present a sort of payment by results in the shape of premiums, 13443, 13444.

The testimony before the House of Lords of Sir Thomas Redington, a Roman Catholic Commissioner of Education, of Mr. John Carlile, Inspector, in his reports, and of pars. 58 and 59 of the Board's report for 1846, quoted as to the true meaning of "mixed education;" that is, the system is so framed, that it does not *exclude*, that it *admits*, children of any denomination without doing violence to the consciences of any, and this, although there may be in a school children of only one denomination; the strength of the system is proved in there being no case of proselytism ever established against it, 13448–13459.—The rules as to not making the sign of the cross, &c., should be always enforced, otherwise a school would become denominational, 13461, 13469, 13470.—There is no compulsion in witness's schools to attend the reading of the Douay version; the classification of his teachers is second; if he gets a good teacher, she is taken away, 13462–13468.

Right Hon. Lord Oranmore.

The system works well in its details, 13471, 13472.—A large representative Board was expedient at first, but for the future a small paid Board would be preferable, its action would be more prompt and uniform than that of a large Board subject to popular influences, 13473–13486.

O'Reilly, Myles, Esq., M.P.

Myles O'Reilly, esq. M.P.

His personal experience of the working of National schools is small. His knowledge is mostly derived from reports and public documents and writings. In the schools with which he is acquainted the admixture of religious belief among the children is more technical than practical; in one school for twenty years two Protestant children have at different intervals attended; the other schools are nearly similarly circumstanced; the teachers in these schools have been entirely Roman Catholic, 14865–14867.

In the main the education given is satisfactory; some details might be amended; the religious instruction is generally given by the teachers, 14868, 14869.

The great difficulty in ordinary rural schools in Ireland, as in England, is to secure an adequate attendance of children; the teachers are poorly paid, not inadequately as to numbers, because the average payment is about £1 per head per annum, but inadequately as to the teacher; a supplemental payment by results would stimulate a teacher to obtain a better attendance; the only persons interested in the prosperity of schools in remote districts are the clergymen; on them in a great measure schools depend for their efficiency, 14870.

The deficiency in attendance is due chiefly to the indifference and negligence of the parents; an enforced payment might cause a greater interest in the schools, but the attendance depends more than anything else on the personal exertions and influence of the Catholic clergy; an instance cited, 14871, 14872.

Is acquainted with one second-class agricultural school in Galway; it is not popular with the neighbouring small occupiers, and, after twenty years' experience, has caused some disappointment; it serves a good purpose in setting a good example, and the teacher's position in a pecuniary point of view is greatly improved, 14874–14881.

Two schools on witness's property have residences attached; the position of rural schoolmasters would be greatly improved if they were assured of a residence and a bit of land, 14882.

In stating what changes should be made in the present system of National education, it is necessary to consider the principles on which the system ought to be founded; they are—1st, the duty of the Legislature to give the Irish people the education they require; 2nd, to protect the rights of minorities. The system of National education, as originally founded, proposed to afford united secular and separate religious education. The complete abandonment of the latter part of the programme is proved by the attempts to show that it is retained. The first part has also in great part been given up. That the schools might be "mixed," the original rule was, there should be only one National school in a locality; now in any school districts where there is a substantial mixture of religions, there are separate National schools for each. It may be taken as proved by statistics, that the great bulk of the population desire to have schools wherein the teaching is religious, and to a great extent the National schools have been so converted; such are the convent schools, attended by 73,000 Catholics and 73 Protestants; such are the numerous schools throughout the country with Catholic patrons, teachers, and pupils; such are the National schools with Protestant rector or Presbyterian minister for patron, with Protestant teachers and pupils; admitting a very few exceptions in the last two classes. There being, however, some cases where the schools are really mixed, the rights of conscience of the minority must be protected. It would be proposed then, firstly, that those schools which are at present substantially denominational should be permitted to be so, the consciences of minorities being protected, because under the present system immense majorities are deprived of what they wish for, on the ground of it being displeasing to a few. Secondly, some schools, such as workhouse schools, must remain mixed; in these the present system is least open to objection. Thirdly, as to model schools. These must be considered in two lights; 1st, as training schools for masters; 2nd, as ordinary day schools of a superior class. Training schools must be denominational. There is no difficulty in making the provincial training schools so. One for Episcopalian Protestants might be established in each province; those for Presbyterians would be in Ulster; all others for Catholics. The question remains how to make them denominational. Being State schools, they must be governed differently from English schools, which are merely assisted by the State; and the right of Catholic bishops to control all their educational establishments must be considered. This may be provided for, theoretically and practically, by ascertaining and defining the exact extent of those rights, and providing for their exercise by express stipulations; or practically only, as by giving the parish priest a veto on the appointment of a schoolmaster, on the ground of immorality. This, however, would not be so satisfactory; and the principle of assisted training schools, as in England, might be adopted, 14883, 14888.

The conscience clause, protecting the rights of the minorities, must be strongly enforced. It would be desirable, and perhaps necessary, to make a distinction between the hours of secular and religious instruction, which would be no grievance, whereas it would be a grievance to prevent a whole school commencing with prayer for the sake of a theoretical minority of one, 14884–14886. The introduction of a conscience clause is a matter of principle, and the restriction of the books

Myles O'Reilly, esq., M.P.

to a general character is to be used only where the minority has no school of their own, 14930, 14931.

It would depend on the number of pupils in the Dublin training schools whether they could supply a sufficient proportion of teachers; but the suggestion made is preferable—*i.e.*, to have provincial training schools, 14887.

Catholics consider their bishops have a right to control both teachers and teaching in all points relating to faith and morals, involving the prohibition of books; the provincial Catholic training schools suggested might be under the management of a local committee, with the bishop for chairman; and a portion of the cost should depend on contributions other than from the State; the model of the English training schools might be followed, 14889–14892.—The teaching in them and mode of conducting them could be guaranteed by inspection, and tested by results, 15045.

It would be a grievance for the State to maintain, under the management of the Board, training schools in Dublin; the Commissioners might for a time maintain some mixed schools, to prove whether they were popular or not; but it would be unfair permanently to patronize one class of schools more than another, inasmuch as the taxpayers would have in great measure to support them, while they contributed also to their own schools; the objection cannot be waived, even on the ground of keeping up a fixed standard of education, 14893–14895.

Has no desire to make any change in the constitution of the Board; is fully satisfied of the desire of the members to act impartially, 14896, 14897.

A conscience clause can never make the school of one religion as good for a child of a different religion as one of its own; it must be to some extent an imperfect protection; the question is, whether hypothetical minorities shall have a less protection, or one substantially sufficient in having their own schools, which in the majority of cases in Ireland they have, or can have; the conscience clause to be preferred is such a one as is contained in Messrs. Bruce and Foster's Bill for England, which is, that no child shall attend any portion of the teaching objected to by its parents, 14898, 14899, 14908–14913.—The Fourth Book of the Christian Brothers is so impregnated with their religious spirit that it cannot be used by Protestants; therefore Presbyterian children must withdraw when they come to that; but there is no necessity for a Presbyterian child to be deprived of education for that reason. It comes back to a question of practical use. It is better to legislate for the majorities, and do the best you can for the minorities. A poor parent cannot be expected to know what would be objectionable, but if he be conscientious, and need exists, he will speak to the master and manager, or to his own clergyman, to learn what steps should be taken to protect his child, 14900–14902.

There is nothing undesirable in mixed schools for boys and girls; some of the best schools known by witness have been small rural schools of that sort under female teachers; female teachers cannot always be procured; and it does not follow as a matter of course that they would be cheaper than male teachers, 14903–14907.

The improvement of the schools suggested, that is, making them denominational, would not necessarily bring about a diminished attendance; if, hypothetically, there was but one school in a district, and all the children, Catholics and Protestants, attended it, the division into two schools would of course diminish the attendance one-half; but such a case does not exist; and in 99 cases in 100 in Ireland, insufficient attendance at schools arises not from want of numbers but from negligence, 14914–14916. Complaints have been made of too many schools, but not in any district with which witness is acquainted; if in the South of Ireland, where the great majority are Catholics, there are too many schools, it is not through the application of the suggested principle, because a school instituted for Protestant children would diminish in a very infinitesimal degree the attendance at these Roman Catholic schools, 14917–14919.

Witness's plan is based on the desire to secure the sympathy of the clergy for the education of the people, which already exists, but not for the present so-called National system; this is proved by the fact that a very large proportion of the National schools of the country are under the patronage of Roman Catholic priests, showing that they prefer the present system to going without education altogether, 14920, 14921. A man naturally enters more warmly into promoting a system of education of which he approves than one he dislikes; this is proved largely in England, where if education is desired to be extended, the sympathies of the clergy of the Established Church must be enlisted, 14922, 14923.

The Roman Catholic clergy do not to any great extent visit schools even under their own management for the purpose of religious teaching, partly because they give that instruction in church on Sundays after service, and partly because they do not like the present system of National education, 14924, 14925.

The State, as represented by the Legislature, which is composed mainly of representatives of English Protestants, cannot be taken to represent accurately the wishes of the Irish, who are mainly Catholic; it is true, historically, that the present system of education was introduced to meet the wishes of the Roman Catholics of Ireland, but it is also the fact that they or their leaders were not previously formally consulted, and it was never formally accepted by any of their representatives, secular or religious; they accepted it, and to a certain extent approved it, as being a great improvement on any previously existing system of education, 14926–14929.

The conscience clause advocated by witness could be reconciled practically with the dictum of the bishops that religious instruction should go *pari passu* with secular; the assertion that minorities would be without a school of their own, in Ireland, is authorized by the statement of Archbishop Trench, 14933.

If by simply paying the salary of a schoolmaster whose main duty is to impart secular instruction, but who incidentally conveys religious instruction, it is meant that the State pays for religious teaching, so far it is true, but it is true equally with regard to the present system in any school; in any other sense the proposition is not admitted, 14934–14937. Reference to a statement by Mr. Gladstone in 1856 as to the State standing apart from all responsibility as to religious teaching in schools aided from National funds, 14938, 14939.

The model schools of the National Board have, except in a few cases, proved substantially a failure; it was believed their main design was to train teachers, but the representative of the Board, then in Parliament, pointed out that one great object was to afford an example of superior teaching; if they have proved a failure, it is the fault of the Board so far only in having instituted a system which is not successful; the Board has done its best in endeavouring to get teachers to go and be trained there, 14940–14946.

The Catholic bishops are determinedly opposed to the model schools, and though there is no difference in principle between them and Archbishop Murray and others who originally accepted seats on the Education Board, there is not the slightest chance of a change in their present line of conduct with regard to those schools, 14947–14949.

It was not said that the Catholic laity recognised the right of their bishops to control educational establishments generally, but only with regard to faith and morals, 14950. It is desirable the bishop should have a power of control by being a member of the local Board, 14951.

The general opinion of the Roman Catholic clergy on the National system of education is, that it is a great improvement on all former systems; disbelieves that a great number of the clergy are opposed to any changes, especially such as are now advocated by the bishops, 14952, 14953. The Catholic laity have in

many ways expressed their opinion, praying for changes in the direction advocated by witness, 14954. The bishops specifically object to training institutions for teachers which are not religious, that is, denominational, 14956.

Every facility is given to Roman Catholic bishops and clergy to visit the model schools for the purpose of imparting religious instruction, but the mere access to such schools does not remove the objections entertained against them; Catholics claim control only over institutions founded for their benefit; and a school, although supported by the State, if intended for Catholics should be under Catholic control; taken generally, all schools in Ireland are intended for all classes and denominations; taken in a particular district, a school is not available for all by being made objectionable to some, 14957–14961. Those who administer them have made the model schools not available for all classes, 14963. The doors are open, so are the doors of every Episcopalian and Presbyterian chapel in the country, but not in a practical sense for Catholics; the State abstractedly is not entitled to exercise control over schools built by any church; but the State, considered as all the people who form it, has a right to control its schools; the majority of the Government have no right, merely as a majority, to fashion at will all the schools of the nation, 14962–14969.

Is willing to accept any statement made by Archbishop Cullen as to the reasons for the opposition to model schools, and to admit the propriety of any steps taken by the clergy to enforce their views, 14970–14975.

The expense of maintaining ordinary schools might be provided for by a voluntary school rate; a twopenny rate would be much opposed, as are all taxes; but assuming it to be optional with the ratepayers to impose it, such a rate would be carried in most districts, if the ratepayers are allowed to choose the school they prefer; but if for the maintenance of a stereotyped form of National school, it would be universally opposed, 14976–14980.

A system of secular instruction instituted and paid for by the State would not adapt itself to the requirements of the country; a satisfactory line cannot be drawn between secular and religious teaching; a purely secular education is practically atheistical; it would drift into the denominational system; the State might pay, as it does in England, for secular instruction only, without giving itself concern as to how that instruction was imparted, which would be perfectly adapted to the wants of the Irish people; the difficulty remains, whether payment by results alone would be able to maintain the system, 14981–14984.

Model schools have not been adequately or largely useful in training teachers; the number of teachers training in them is diminishing; that of those who afterwards follow other pursuits is increasing. The majority of teachers wanted in Ireland must be Roman Catholics, and if model-school teachers are objected to by Catholic managers, Catholics will not go to model schools to be trained. They are a mistake; they are not good examples of what a common school should be; they are more like middle-class schools, and one practical objection is that they educate largely a class who ought to pay for their own education; statement of the station in life of fifty persons whose children went to the model school in Galway at a time when there were hardly any poor children at all in the school. The highest payment in any model school is £1 per annum; it is always understood that the money voted by Parliament is for the education of the poor, and the expenditure of it in supporting model schools is most unreasonable, 14985–14990, 15043.

The complaints of teachers as to being subject to dismissal at will can only be met by depriving patrons of their reasonable power, as being practically the founder of the school, a step which would cause the whole system to fall into the hands of the State, against which witness is strongly opposed; a teacher ought not to be deprived of his residence if he had one, without fair notice, irrespective of the school, 14991–14996.—Is opposed on principle to State education in all countries, or to purely secular education, 15001. Myles O'Reilly, esq., M.P.

Compulsory education could not be introduced in Ireland, either in town or country; nothing would make education so unpopular in Ireland as enforcing it by law; by the Irish Industrial Schools Bill magistrates have the power to subject "street Arabs" to compulsory education; there should be power to detain the children of vagrants in workhouse schools, which are good, 14997–15000.

The change of opinion with regard to the National system which has taken place among Catholics has been caused by several steps taken at different times diminishing the confidence that should be placed in it; first, school-houses were required to be vested in trustees; then to be vested in the Board; then the Stopford rule, the purport of which was that children should not be *forced* to attend religious instruction objected to, whereas the original rule stated they should not be *permitted* to do so; but by nothing so much as the correspondence, lately published, of Archbishop Whately, who for thirty years is found to have considered it as a means of "weaning the Irish from the abuses of Popery," 15001.

The particular points in which ordinary National schools, where both teachers and pupils are Roman Catholic, differ from such schools if purely denominational, consist of a great number of small and perhaps insignificant details; and it is a matter for consideration whether it is worth while for the Government, or as it is commonly called, the executive, to show itself as a hostile power in convent and other Catholic schools, where these details are observed, and to which, though seeming more or less trivial, much importance is attached by the Catholic clergy and laity; sympathy shown by the Government to the feelings of the people is more likely to stimulate their good-will and loyalty, 15002–15004.

The objections to model schools as they at present exist are, that practically they educate a class for which they were not intended; that they have destroyed the free schools in almost all the towns in which they have been established; and that they cost a large amount of money compared with the results, the annual cost ranging from £4 to £8 a head, while the same results are obtained in the Christian Brothers' schools for 6*s*. a head; another objection is, though not so generally entertained, that they are a step towards monopolizing the entire education of the country in the hands of the State, 15005–15007.—The schools being in existence, the question as to what is to be done with them must be decided by practical considerations at the moment; witness would recommend their being sold to public bodies in the localities, to be made denominational schools, with an ordinary amount of assistance from the State, 15008–15012.—In such a case any book might be used, the authorities retaining the right to object to any book not sufficient for its purpose; if there were any deficiency of good school-books, the Board might pay for the compilation of some good text-books, giving the copyright to the public, and letting the competition of the booksellers determine the price, 15013, 15014.

The promises of candidates to Catholic constituencies, to procure some material change in the system of National education, arises from no dictation, but from the belief that such a profession will catch votes, 15015–15018.

Teachers' salaries should be increased by payments depending on results, a principle that has worked well in England; retiring pensions would probably make the teachers more contented, but the thing cannot be done, a teacher is not altogether a servant of the State; the retention of a portion of salary to form a superannuation fund would not be popular, 15019–15025.—A free house and garden would improve the position of teachers in agricultural districts more than anything else; any educational rate that might be levied could be devoted towards such purpose, and in many parishes the ratepayers would be willing to pay for it when they would refuse a rate for the maintenance of a

Myles O'Reilly, esq., M.P.

schoolhouse; backwardness of landowners generally in furnishing houses and gardens; most of the existing schoolhouses have been built by occupiers; it is most desirable to give a teacher a piece of land, even at a rent; instance of the success attending such a course; the attention bestowed on a farm of twenty acres need not interfere with school business; it should be made a sort of model farm, 15028–15032.

No line can be drawn between those for whose education the State should pay and those who should pay for it themselves, it is a question of degree; it is not possible to establish pauper schools; so that the principle is admitted of the State paying something for the education of people who have some means of living; there is no absolute objection to State contributions to particular classes of schools; the objection is, that such contributions destroy to a great extent voluntary charitable effort, and they monopolize in the State's hands the control of education; money for the education of the upper and middle classes should be voted specially by Parliament, and not taken out of the money intended for the education of the poor, 15033–15043.

The education rate proposed would not, at least in many cases, have the same fate as the permissive rate for libraries and museums; it might be inoperative for the maintenance of schools, but not for their erection; the people now very frequently tax themselves for the purpose, and if the schools were satisfactory to the Catholic authorities, this voluntary rate would become general and compulsory, 15044.

The Prussian system might be applied to good effect in Ireland, but only to schools supported by rate; in Prussia the schoolmaster is an officer of the State, and may be pensioned; here he is not, if I erect a school and pay part of his salary; the school committee might be so organized as to have to get the money for building a schoolhouse and keeping it in repair, thereby obviating the present grievance of the schoolmaster, who has to pay the rent and do the repairs of his schoolhouse, 15046–15051.

It is decidedly undesirable to have one set of books for all the schools of the country; the books of the National Board, in the desire to make them unobjectionable to every class, have been made so colourless and flavourless as to make people go to perhaps very objectionable books to get their impressions of history; this has to some extent kept up the feeling of opposition to the Government, although the Government had nothing to do with the Board of National Education; but as the majority of the people identify any administrative body with the Government, it is a reason why it is undesirable that the latter should appear as an antagonistic body, 15052–15056.

As to the constitution of the Board, the present Board is preferable to that of three paid Commissioners, as proposed; it is composed of persons eminent in position and attainments, well chosen for the post, although their other avocations prevent the entire devotion of their time to it; three paid Commissioners may devote their entire attention to the business, but they will be more removed from the contact of public opinion, and will be likely to fall into an administrative rut, neither will they be of the same standing as the present Commissioners; also the Roman Catholic element would be in a minority of one to two, whereas the Catholic element in the schools is about 80 per cent.; if there were six paid Commissioners, although the proportion of Catholics and Protestants would be more equal, the payment of, say, £800 a year to each would be an inadequately large payment relatively to funds to be administered; also, under a small Board, the tendency would be to place education more under the control of the State; on the whole the present system is preferable, 15057–15063.

With respect to the assertion that "the parish priest ought to have a negative on the appointment of a schoolmaster, on the ground of immorality," and that "the bishop has a right to prohibit a teacher if he teaches erroneous doctrine, or teaches or practices immorality," it must be qualified to this extent, that as there is no legal tribunal in this country to enforce such negative or prohibition, and to whom the aggrieved teacher could appeal, the decision of the priest or the bishop can only be of force so far as it is respected by the Catholics of the parish or diocese; the schoolmaster could appeal to the bishop, who must be guided by the canon law; but all these proceedings are outside any legal recognition in this country, 15064–15067.

In stating the opinion that payment by results, pure and simple, is inapplicable to this country, it is hard to state the grounds on which that opinion is formed; substantially, the rate of payment by results would be higher than the State would be willing to afford; it would give more than would be liked in a school with a large attendance, if it gave an adequate payment in one with a small attendance; and in small country parishes it would be very difficult to obtain anything but a very low class of schoolmaster unless part of his payment depended on his own classification; in providing schoolmasters large reliance must be placed on mercenary motives; there was reason in the reply of the teacher who, when asked how he would like to be paid by results, answered, he would have no objection if education was made compulsory, but every objection without it, 15068–15075.

Too much time is taken up in common rural schools in teaching details of grammar and geography; if a child who leaves school about twelve is taught simple reading, writing, and arithmetic, it is as much as can be expected, 15076.

The rule of the National Board is theoretically sufficient to prevent illicit religious teaching; statement of an alleged instance of its failure, in a school in county Tyrone, where five Catholic children were receiving Protestant religious instruction; but, of four of the number, two were children of a parent who had signed a written request that they should do so, and two others were his nephews, for whom he had also signed; the fifth was a child of five years of age; two Royal Commissioners had visited the schools and made no remarks, 15077–15083.

Does not doubt there are "many" cases in which there is a desire to press religious instruction on children of an adverse creed; a proof of this is the use made of the Authorized Version of the Scriptures in schools, the indiscriminate use of which, especially of the Old Testament, being objected to by Catholics; the New Testament is, however, extensively circulated and read among Catholics; this reading of the Bible may arise from the feeling that all children ought to read the Scriptures, it may also arise from the desire of proselytism; when this reading takes place it is during the hours of separate religious instruction, 15084–15088.

A general or extensive attempt to influence Roman Catholic children with a view of making them change their convictions would be impossible; pressure has been brought to bear on Catholic parents to send their children to Protestant schools, nothing more, 15089. [A portion of the evidence of Mr. Kelly, one of the secretaries of the Board, in which he denies any cases of proselytism taking place in the schools, (with a confirmation of such assertion by Judge O'Hagan,) and asserts that the suspicion of such a thing existing would be unfounded and unjust, is read to the witness.] The statement that cases of proselytism had occurred was made by witness himself; Justice O'Hagan explained that what he meant by "proselytism" was the change of a child from one religion to another; what witness understood, and what most people understand by it, is the conveying religious instruction differing from that of the child's parents, with a view of influencing his religious convictions; such was clearly the meaning of Lord Stanley's original letter; a very voluminous return on the question was laid before Parliament; from this witness cites many cases in which Protestant or Presbyterian religious instruction is shown to have been given to Roman Catholic children, and in only one instance is it stated to be with the sanction of the parents; all the cases justify the statement that there is proselytism in schools, 15090,

15108–15116.—The original rule of the Board on the point was imperfect; the state of things has to some extent been remedied by the change in the rule, but the new rule has been violated, and so far has failed, 15091, 15092.—There is not much proselytism going on at present in National schools, but the reason very largely is, because Roman Catholics have their own National schools and teachers, 15093.

Is prepared to admit that in 1824 210,000 Roman Catholic children, and in 1831 300,000, were daily receiving religious instruction, and voluntarily reading the Authorized Version of the Scriptures, because then there was no other education to be obtained; it is analogous to the fact of a man in the west of Ireland during the famine, who was offered food and sustenance if he abandoned the Catholic religion, 15094,15095.

In reference to Roman Catholic children attending the prayer at the opening of school, witness asserts that it is unlikely and "incredible" that they so attended with the perfect will and cognizance of their parents, 15096–15100.—The evidence of Rev. D. Curoe, of Randalstown, in 1837, as to the reading of the Scriptures in school by Roman Catholics, and the desire of the clergy to render the Scriptures accessible to all, and that the Authorized Version was the one used in his schools, is not surprising, since it does not appear that the schools were under Protestant management, but his own; it only proves that, as before stated, the use of the New Testament is a constant, authorized, and laudable practice in all Catholic schools in Ireland and elsewhere; but witness is not prepared to accept the reverend gentleman's opinion in opposition to higher and more competent authorities, 15101–15105. Myles O'Reilly, esq., M.P.

The duty of the State is merely to enforce the prohibition of proselytism, on the ground of securing the freedom of the individual, 15106, 15107.

"Proselytism," as popularly used, as used by witness, and as used in Lord Stanley's original letter, refers more to the attempt on the part of the person who does it than to the result obtained; a "proselyte" is a person converted; it is impossible to show a case of a change of religion in consequence of instruction received in a school; attempts at proselytism would be less successful in a satisfactory system of denominational education; practically there is not much change of religion either way in Ireland; the objections to the system on the score of proselytism are more against the attempts made than the results obtained, 15108–15116.

Ossory, The Lord Bishop of.

The Lord Bishop of Ossory.

Was one of the founders, and has always taken a lively interest in Church Education Society; formerly there were many more Roman Catholics in their schools than now; this is not from any change in their rules; rules of branches similar to those of parent society, 20521–20524.—Fundamental rule was to give a good Scriptural and Church education; a relaxation was made as to Church formularies where desired, but all must read the Scriptures daily; this point chiefly kept schools from National Board. As well as witness remembers, there has been no modification of fundamental rule, 20525–20527.—Has but little expectation of rule which keeps them from National Board being relaxed; if rule as to reading Scriptures were the only objection, there might possibly be a modification. Society make no requirement on Roman Catholic children to receive instruction which parents disapprove, they simply do not relax a rule made for the benefit of their own for the sake of those who object. Teaching Roman Catholics is a secondary obligation, teaching the truth a primary one; further, they cannot abandon liberty to read or refer to Scripture whenever incidentally necessary in the course of ordinary school duties, or when clergymen visit, 20528–20535.

The only modification that occurs to witness by which schools might join National Board is, that they inspect and examine in secular instruction only, and give assistance according to results; mode of meeting cases of very small minorities, 20536–20538, 20547, 20548.—If State willing to aid Church Education schools according to results of secular teaching without interfering with religious part, they must devise means of making them acceptable to Roman Catholics; a good deal has already been done to render National schools acceptable to them; preceding is only suggested as best under the circumstances. It would involve abandonment of present stipulation that Roman Catholics shall receive secular without religious instruction; it would be keeping schools on present footing, but only paying for secular teaching; this might make schools denominational in one sense, 20539–20544.

Preceding is suggested, knowing that others might claim the same for their schools, 20545, 20546.—Some landlords assist both National and Church schools; number of the latter is not diminished, but the scholars, especially the Roman Catholics, have considerably; one great cause is the decrease of population; other causes, 20549–20552, 20554, 20555.—Primary object of Society was Church of England education, but they have shown their desire to benefit others by modifying rules, 20553.—State aid would enable schools to be conducted more energetically, and obtain more pupils, as their great want is an increase of funds, 20556–20558.—More influence is used to keep Roman Catholic children away from schools than is used by Society to obtain them, 20559, 20560.—If State aid obtained for secular teaching, no doubt more Roman Catholics would attend, 20561.

Church Education schools were originally established because Churchmen could not conscientiously adopt National system; a rule was laid down which they could not subscribe to, whatever the other advantages were; they found numbers of schools needing support for want of concerted action, and on taking counsel they determined to make a united effort. The Society was then formed to assist schools already existing, and to establish new ones to teach Scriptures and principles of Church of England. Society provided that masters should be properly qualified to teach under direction of clergy, and they made the concession to Roman Catholics of not requiring them to be instructed in formularies; teaching Scripture as well as reading it, is part of school business, 20562–20565. Clergymen should visit and give moral and religious instruction, but schools cannot be considered essentially doctrinal; example of the instruction clergymen might be expected to give. Moral atmosphere not necessarily antagonistic to other denominations, 20566–20569. As to whether suggested arrangements would make schools more acceptable to Roman Catholics. Does not estimate advantage of different denominations being educated together as highly as some. Commissioners of 1824 advocated united education, but considered that Church Scriptural schools in existence should be maintained, 20570–20572.

In one view mixed system might be calculated to lead to wider divisions in after life than separate education of creeds. Is not aware that the bishops and clergy of the Establishment, or the Church Education Society, claim or have claimed to be the appointed guardians of the education of the country. Complains that not only were the Church schools not the State schools, but that when they sought for a portion of the aid given, they were refused, 20574–20581. Society consider reading Authorized Version as essential. Clergymen have superintendence of religious teaching, and instruction in the Scriptures is given in accordance with principles of Church, but it is taught non-controversially; instruction in the formularies is constantly given, but not obtruded unnecessarily. Restriction in using the Bible is a

The Lord Bishop of Ossory.

grievance which clergy will not submit to, 20582–20586.—View of manner in which a parochial clergyman's oversight may be said to extend to all his parishioners, 20587, 20588.—When a clergyman is instituted, all in the parish are committed to him, but this does not convey right to exercise pastoral care where subjects refuse it, 20640.

Chief objection to National system is that under it clergy cannot instruct their own children in the way they conscientiously consider right. Their wish to extend the benefits of their schools to others is not as a result of their position; they would desire it as much if Church ceased to be National to-morrow, 20589–20596.—Society considers it a duty to teach Scripture, but not to interfere with faith of others; has no proselytizing designs; National Society prohibit reference to Scripture during secular instruction if any object; a lesson is suspended on walls containing reference to Scripture, but instruction in Scripture is forbidden. In 1862 the Bishop of Down applied, through Lord Lieutenant (who was understood to be favourable) for "permission to make such reference to the Word of God as occasion might demand;" this was refused. The Bishop explained that he did not ask a modification of rule as to *reading* the Scriptures, but only occasional reference in the just right of imparting "combined literary and moral instruction" as required by Board, but refusal was persevered in; reference to use of the Ten Commandments, 20597–20610.

Church Education Society does not require religious teaching of a peculiar denominational character. Scripture instruction is compulsory as any other part of the daily work is; no child can attend the schools without complying with that as well as all the other rules, and in that sense religious education may be said to be compulsory, but children come with perfect knowledge of the rules; "compulsory" suggests a state of things which is not true, 20611–20615.—Society claim to reject children coming, or to insist upon their receiving Scripture instruction; the effect is to render it voluntary, 20616.—In many places congregations, and consequently schools, are very small, and small schools are inefficient, but it is as much a duty to look after them as others, even if clergy themselves teach. Protestant population in witness's diocese is limited, but cannot give statistics, 20617–20621.—Claim of small schools; some with only four or six scholars; few places having Protestants are without a Protestant school, 20622–20626.

Cannot answer questions as to Kilkenny model schools, but does not believe that "indifferentism to an immense extent" exists there, 20627–20633.—Would not consent, nor would clergy or Church Education Society, to arrange not to receive Roman Catholics; would give all publicity to their own principles, and admit all who come, taking care that they know what is taught, 20634, 20635.—Explanation of a statement published by witness in 1845 that principle of Church Education Society is to abstain from all attempts to influence or disturb the belief of any dissenting children; the meaning was, that no attempt was to be made with the object of disturbing the religious belief of any child in the schools; that there should be no attempt to inform or guide the mind in a way that might possibly disturb its belief was never meant, but that Scripture was taught non-controversially, &c., 20636–20639, 20641.

Obligations on lay-patrons as to religious instruction not equal to that on clerical; some, taking a lax view, are patrons of National as well as Church schools; moral responsibility must depend much on individual views of duty, 20642, 20643.

Printed rules of Church Education Society may be considered to comprise all their views, wishes, &c., 20644–20647.—Advantage to schools of Government inspection; speaking in the abstract, would not object to Roman Catholic Inspectors for secular education, but would not like them to preponderate, 20648–20652.—System for training, if plan above suggested were adopted, 20652, 20653.—Difficulty of admitting to secular without giving religious instruction does not rest upon any territorial claim, 20654, 20655.—Is sure that all Roman Catholic parents who have sent children have been fully aware that Bible is read; there is hardly a parish in which lower orders do not well know what is taught; for the future, would have an unmistakable announcement of all that is taught; objects to making parents sign a book saying they understood rules, &c.; reasons. Would agree to anything which should acquaint parents with system, unless something objectionable in mode of doing it, 20656–20659.

If Roman Catholics are more in want of schools in proportion to numbers than Protestants, want should be supplied; but never heard that such was the case, 20660–20663.—Oath taken by beneficed clergymen to keep a school did not mean a school for the poor; it is under an old enactment, to spread the English language, 20664, 20665.—Church would readily throw what school endowments they have into a common stock if other denominations would do the same; some Erasmus Smith's schools in witness's diocese, 20666–20668.—Some large Roman Catholic districts held by Protestant proprietors; practically they could hardly exclude Catholic schools if they wished. State has shown itself interested in education of all without violating religious freedom, 20669–20672.—On account of sparse population, Church schools should receive more aid than others. Objection to aid them founded upon idea that rules prevent Roman Catholics from attending does not exclude Roman Catholic schools from aid in England. They agreed to take other children, and to allow them to be absent from religious instruction, but said they would not escape a Catholic education, as religious pervaded all the secular teaching. Church Education Society also think religion should permeate their teaching, and that they should not thereby be deprived of State aid. Is aware that denominational system obtains in England, but that does not affect principle, 20673–20675.

Church schools cannot escape from present disadvantageous position without involving some difficulty; if aided, it must be denominationally in one sense; would not interfere with other schools; Government should continue control over school books. Would extend to all others same advantages that might be conceded to Church schools, 20676–20682.—Evil of small schools, but necessary sometimes, 20683, 20684.

Believes Church Education Society would fall in with foregoing scheme. Hopes they would be able to support small schools that Government aid would not reach; there would be some difficulty, but it might be overcome, 20685–20687.—Cannot look to system ever becoming denominational from what is proposed above; some Church people would, as now, approve of National system. Witness's plan leaves religious instruction optional to the child; under Church Education Society it would not be so. Would not carry out system with a conscience clause, 20688–20692.—Would have no objection to a certificate annually that no child had been excluded on religious grounds, or received instruction objected to by parent, but would prefer form to be that parent had full means of knowing instruction given and that child was not detained a day longer than he approved of, 20693–20696.

O'SULLIVAN, DANIEL, Esq. D. O'Sullivan, esq.

Is assistant professor or junior lecturer under Mr. Butler in the Science Department, Marlborough-street, has been head master of the Central Model school, and has acted as Inspector in the North of Ireland, 7705–7708.—Is also superintendent of the George's-street training establishment, 7717.

The subjects taught by witness are arithmetic and algebra, which occupy 2½ hours on four days of the week. Each teacher in the course of his practice in teaching comes about ten times under the supervision of the assistant professor; they are engaged in teaching twelve at the time, the assistant professor taking notes of their method, and correcting their errors privately or at the time, where it can be done judiciously, 7709–7717.

There are 58 boarders in George's-street; the conduct of the teachers is excellent; superintendent has the power of inflicting fines for trifling offences, but cases of serious irregularity must be brought before the Board; a record of each offence is kept; very seldom a case arises for punishment, 7718–7724, 7764.

Average age of teachers in training in 1837, 1847, 1857, and 1867, 7725.—It is difficult to fix a maximum age for admission of candidates to the training school; circumstances must govern in most cases, 7726–7730.—From 18 to 25 is the preferable age, 7904–7906.

Protestant teachers are well looked after as regards religious superintendence; Catholics have not the advantage of supervision by a clergyman of their own Church, none having been appointed since Dr. Power, 7731–7742, 7757, 7917, 7918.—The Protestant clergymen who attend do so voluntarily, and are not paid for their services, 7907–7916.

The time students are in training is not sufficient; under present circumstances the session could not be extended over a longer period than twelve months, 7743–7745, 7802.—The number of subjects is too large for the time, 7746.—The great defect in training is the insufficiency of the time devoted to the practice of teaching. Theoretically, the candidates on reception are supposed to possess a certain amount of scholarship, and when discharged, are looked upon as more or less efficient teachers; but practically they require improvement as scholars as well as teachers; instead of being mere visitors in the practising school, they should take part in the actual work, 7940–7958.

Teachers who come up at an advanced age are not so well grounded as pupil-teachers and monitors, 7747–7749.—Division of teachers into two classes, 7750.—There would be no difficulty in carrying out an arrangement for a yearly session if the Board thought fit to order it, 7751–7757.—An attempt was made in 1855 to pass from a half-yearly to a yearly course, but for some reason or another was abandoned, 7877.

Since the prohibition of the Roman Catholic bishops against teachers attending the training school the number of Catholic teachers has diminished and that of Protestants has increased; through this the Board have taken more non-teachers (persons who at the time of training are not in charge of schools as principals or assistants), 7758–7763, 7777–7783, 7895, 7896, 7900–7903.—As a class the non-teachers are of inferior intellectual qualities than the teachers were before the prohibition; out of 8,172 teachers under the Board only 3,320 have been trained, 7765–7768, 7893, 7936–7939.—Although the arrangements for training are imperfect, the teachers are benefited by the course, 7769–7771.—Many of the non-teachers do not become schoolmasters; there is no register kept of teachers after training, except of those who are in the special class; a great number of the non-teachers, such as pupil-teachers, monitors, &c., come up on the recommendation of the Inspectors, 7772–7776, 7784, 7855–7863.

Number of Catholic and Protestant teachers who have been summoned to the training institution, and of those who declined to come, 7785–7787.—Cannot give reasons why the Protestant teachers decline, 7963–7967.—The cause of Catholics refusing to enter the school is chiefly the unpopularity of the department with the managers, which might be overcome to some extent by relaxing the rule requiring all the teachers to reside in official boarding houses, 7778–7790, 7794, 7992–8014.

The training department in Merrion-street was opened on the 10th February 1834, and the first boarding establishment in 1838; between these two dates the teachers lived out in the city, being allowed 12*s.* per week for their board. If this plan were again resorted to, 15*s.* should be the minimum and £1 the maximum per week. The present cost to the Commissioners is about 10*d.* to a shilling per head per day, exclusive of rent, taxes, expenses of staff, &c., 7791–7793, 7826–7839, 7850–7854. Great advantages attach to young persons of different demominations living together, but no one should be coerced into the boarding houses, 7840–7849.—If the teachers were allowed to board out of the establishment it would afford facilities for instructing a larger number of teachers, 7864–7866.

Five meat dinners a week were allowed in the boarding houses, but have been reduced to four, a rice dinner being substituted on one day; the alteration originated with the professors; it was made against the wish of the superintendent, 7795–7801.

Commissioners in 1835 proposed to appoint five professors, but they were not able to carry this out; the wonder is that they have been able to effect so much good in the face of the difficulties they have had to contend with, 7803, 7804.—A yearly instead of a half-yearly course should be substituted, with four professors, each professor being responsible for his own set of duties, 7805–7809.—The oath of allegiance has not been administered to the teachers since 1843, 7810–7812.

No lectures on experimental science have been delivered since the death of Dr. Clarke, who used to attend about eight weeks each session, lecturing in the country model schools as well; there is no provision for instruction in physical science, except from those head masters taught by Dr. Clarke, 7813–7820.

The old evening school in Marlborough-street was opened in 1847 and closed in 1851; a new one was opened in 1866, and so far has been a great success, the object was to afford an opportunity of improvement to young men engaged in business during the day; the teaching is conducted by some of the junior masters under Mr. Cahill, 7821–7825.

According to a paragraph in Lord Stanley's letter, it appears to have been intended to train teachers before appointment, but this has not been carried out from its impracticability; the Commissioners in 1835 expressed their intention to take special steps for training young persons who had not been in charge of schools, 7867–7873, 7959–7962.—Monitors were instituted at a very early period of the system, the object being to lay the foundation for an efficient staff of teachers, 7874–7876.

The rule is that teachers must be in charge of a school to be eligible for training, 7878, 7879.—Schools under trained teachers, with few exceptions, are better than those under untrained masters, 7880–7886.—The success of united education, as exhibited in the training department, has not been so conspicuous as previously, 7887–7890.—The training institution continues to be efficiently conducted, and the inmates to be correct in their conduct, and careful in observance of their religious duties, 7891, 7892.

The Commissioners decided some time ago that teachers who proved qualified could enter the first class without training; this is a direct departure from the fundamental rule laid down in Lord Stanley's letter, 7897–7899.—Per-centage of non-teachers in training for ten years ending December, 1867, 7919–7926.—In-

D. O'Sullivan, esq.

feriority of non-teachers is not attributable to Cardinal Cullen's prohibition; the non-attendance of *bonâ fide* Catholic teachers in the usual numbers is so attributable, 7927–7930.—Cases where teachers of forty-two years of age come up for training are very exceptional, 7931–7935.

Per-centage of Catholic teachers who come up for training is not large, conidering the prohibition; some managers appear dispose to relax the rule, 7968–7972, 8017.—The prohibition prevents clerical managers from employing teachers trained in Marlborough-street, and directs them not to allow untrained teachers to go to that institution for training, 8015.—There is no prohibition in the case of Protestants, 8016.—A large and influential number of Catholic managers are in favour of denominational rather than mixed education, 7976–7989.

The objection to the boarding houses comes from numerous managers, 7990.—Facilities exist for clerical supervision of Catholic teachers, but are not availed of, 7991.—The absorption of the non-teacher class into the National system would be a slow process, 8018–8020, 8030.—Probable cost of boarding and lodging teachers as compared with English towns, 8021–8029.—Objects of many non-teachers in coming to Dublin, 8030–8033.—The non-teachers are recommended by various gentlemen; there is no pledge given that they will become teachers; a very good plan would be to require a deposit to be paid after certain period of service in a school, 8034–8044.

James H. Owen, esq.

Owen, James H., Esq.

Has been architect to Board of Works thirteen or fourteen years, and was in their employment seven years previously. Designed most of the existing model schools. Clerks of works report to him monthly what they have inspected; is responsible for their performing their duties properly, though many directions go to them from Secretary's department, of which he is not cognizant, but there are checks upon them. They are responsible for all the schools in their districts, and may visit without special orders. Can get information if desirous of checking their travelling expenses, &c., but this is not part of routine; they may receive and act upon notice of repairs, &c., from local officers, but would always report to witness anything of importance, 27468–27483.—Cannot say what works are incomplete; it is often advantageous to spread them over a considerable time; Board's duty is only to see them properly executed, 27484, 27485.—Thought that Board usually provided two-thirds of cost of vested schools; cannot explain why it is sometimes less. A saving on the estimate occasionally occurs; benefit of this is generally given to patrons; reasons. Amount is paid to patrons by Board of Works on report of completion, 27486–27495.

Work is fairly done; Board might do it better themselves. Practically, there are no estimates for new vested schools; plans are obliged to be simplified to get the work done for the money. Cannot have separate estimate for each school, 27496–27501.—On application for aid, particulars are sent, clerk of works inspects proposed site, and then a certain grant is offered; local circumstances which might affect cost are not taken into account. Contractors cannot ordinarily build schools at rates paid. Board are now simplifying plans to reduce the cost. When patron deposits his third, Board proceed with the work, 27502–27509.—After application for a school, plans are issued as soon as Education Board notify that case is complete. When manager has got in foundations, and at certain other stages, clerk of works inspects and reports it; cannot always inspect immediately, but no undue delay; demand for inspection is sent direct to Board of Works; would retard rather than facilitate it if sent to witness. Outstanding repairs, 27510–27520.

If staff increased, repairs of non-vested schools could be done by Board more economically than by local authorities. Staff at present is overworked. Number of schools annually repaired by Board, 27521–27524, 27561–27563.—Sub-division of districts of clerks of works, 27525–27530.—Reports are now made of works in arrear; also annual reports on state of district. Applications for and reports upon small repairs; local tradesmen generally employed. Is not aware why proposition to allow teachers a small sum to attend to these was not adopted; such a plan might conduce to economy, 27532–27545.—Reports by clerks on disrepair. Cannot say anything as to complaint of want of privy accommodation at Dunmanway model school; great difference of opinion as to real wants. Always endeavours that extensive repairs shall be done during vacation, 27546–27549.

New plans prepared by witness not yet decided upon by Education Board; have been referred back, but cannot now be found. Intends to have a new set made, 27550–27554.—School Inspectors often report repairs required, 27555.—Board could easily undertake repair of non-vested schools, 27556.—Could not employ county surveyors, 27557.—Supply of gas to Glasnevin school, 27558–27560.

Thinks one or two of the £100 schools have been built, 27564.—Building of non-vested schools is usually carried on by local parties; patron's third is invariably lodged before work is commenced; where lodged, and to whose account. Advantage of local parties building school. Payment in kind; system works well, 27565–27576.—£3,000 a year for building vested schools; average grant £200 to £230 each, 27577–27581.—Designed model schools under Board's instructions; nature of instructions; there are none as to expense. Is paid wholly by salary; no officers benefited by large expenditure, 27582–27588.—Reason for greater cost of recent model schools. Was never directed to design them as models for ordinary schools, except as to certain points; very few directions about them. Nothing suggested restricting expenditure. Board of Works are directly responsible to Treasury for cost; have consultations with Education Board. Rule of Board of Works whenever building for another department, 27589–27601.

Doubts if recent model schools are more expensive than previous ones; particulars of several; taking accommodation, &c., they are not proportionally dearer; workmanship and materials are 20 per cent. higher now than nineteen years ago, 27602–27609. Internal arrangements; knows of no remonstrance from National Board as to fitting up infant schools. Defects are pointed out by Inspectors when observed. Communications between officers of the two Boards on such matters. Is positive that no remonstrance against plan of placing gallery of infants' schools under window has ever been made to him, 27610–27618.

Has had no instructions to separate masters' domestic portion from pupil teachers' department; considers that Education Board properly criticise plans for model schools, and that internal arrangements are approved by them; though appearance has been improved, they have not been too expensive. Plans for that at Newtownards were sent ready made, 27619–27628.—Board of Works do not usually send specification of cost to Education Board; they receive an intimation of what is wanted, and suggest a sum to Treasury, and are responsible to them; Education Board do not inquire into it, 27629–27633.

Permanent officers of Board of Works; apportionment of duties and time; insufficiency of staff. Have charge of all Crown buildings except those under War Department. What additional assistance is required. Powers of clerks of works as to repairs. Large increase of staff would be necessary if schools were doubled in number, but they could be managed. It might be desirable to have a special organization for schools outside Board of Works, 27634–27648.

PETTICREW, Rev. FRANCIS.

Rev. Francis Petticrew.

Is minister of the Presbyterian congregation at Faughanvale, Londonderry, and manager of two National schools; is well acquainted with National system in the North, 16447–16450. From ignorance, poverty, &c., lower classes, including small farmers, do not avail themselves of education as they might do; children do not remain long enough, but there is a decided improvement latterly, 16451–16455.—Better attendance might be secured by a more general payment of school fees, in advance where possible, and premiums for daily attendance; favourable experience of the latter. Compulsory education, 16456–16465.—United education is desirable in a country containing thinly inhabited districts, and to teach people forbearance; National system has this effect to some extent, 16466–16470.—Where population is mixed there are mixed schools. Has made frequent inquiries, but never heard of religious dissension between pupils, 16471–16475.—United education is essential; reasons. Laity are strongly in favour of it. Denominational system trains pupils up to be rivals, 16476–16480.

Many districts in the North where number of Roman Catholics is far too small for a school; mixed system, with a conscience clause, necessary to protect their religion; other religious minorities similarly circumstanced elsewhere. Necessity for schools within a reasonable distance of children's homes. Districts named where it is impossible to have a school for Roman Catholics exclusively, 16481–16489.—For many miles round where witness lives all the schools but one are mixed. At one, Gortnessy, there are sixty-nine Presbyterians, seventeen Roman Catholics, and ten Episcopalians; the two latter would have to go four miles for schools of their own denominations; particulars of other similar cases, all showing the advantage to minorities of mixed system. Cases could be multiplied to a considerable extent elsewhere, 16490–16504.

Duty of State to provide schools suited for all. Some non-vested are attended by only one denomination, but they are not denominational. Excellence of non-sectarian schools is that they are capable of a mixed attendance, though they do not always obtain it; in some cases it is physically impossible, 16505–16511.—Mixed system is chiefly important for small minorities, 16512, 16513.—A school is not denominational unless sectarian teaching is enforced on all; unfairness of sectarian system. Non-vested cannot be denominational if rules are observed; a conscience clause is the essence of the system. Parents care little about denomination of teacher, 16514–16517.

Witness's schools are non-vested and mixed; Presbyterians and Roman Catholics attend in almost equal numbers, with some Episcopalians; there are Church schools and a Roman Catholic mixed school near; attendance at the latter, 16518–16529.—Witness has no objection to Presbyterians attending school under Roman Catholic managers, believing that rules are honourably observed; objected to situation of the one named, as it would have been more useful elsewhere; children mix cordially together; witness lives on perfectly amicable terms with priest and the neighbours, 16530–16539.

Never knew opposition to mixed system originate with parents; no other system so well suited to country; evils which must result if abandoned; migration of children, 16540–16545.—Other denominations to be considered besides the three leading ones, 16515, 16546, 16547.—Hardship of denominational system causing children to go an unnecessary distance; more costly and less effective than mixed system, 16548–16551.—State should make good citizens irrespective of creed; should not attempt religious instruction, 16552–16554.

Roman Catholic Bishops desire State to pay and themselves to have control; the people are not opposed to mixed education; a strictly secular system is not desirable; National system is popular; present difficulty is caused by position taken by Roman Catholic bishops, and want of firmness on the part of Commissioners; priests will not openly oppose bishops, but many have expressed themselves favourable to National system, 16555–16561.—Grounds for latter statement; it is not all hearsay; has heard priests advocate system; cannot answer for their inner thoughts; has heard direct praise of system from Roman Catholic laity; the avidity of the people has shown their preference for it; of course they would take a better system if they could get it, 16562–16576.

Many Presbyterian congregations having no schools of their own readily use others; Presbyterian managers often employ Roman Catholic teachers; will take the best they can find, 16577–16582.—School-fees are paid pretty generally in the north, but not sufficiently; none but poorest should be excused; most could afford something, and teachers would be better paid, which is necessary; demoralizing tendency of gratuitous education; those who pay attend best, 16583–16591.—Attendance of clergy at schools in general but slight, 16592–16595.

Dissatisfaction with present National Board; three paid Commissioners representing the three denominations, with administrative power only, would be better; not desirable to have all of one denomination; would not be unfair to Catholics that two of the three should be Protestants, as duties would be fixed; present Board has too much discretionary power, 16596–16606.

Children should be educated in the way parents approve, but if a large number desire a thing wrong in itself State should not grant it; parents have shown that they dislike mixed system; laity of Establishment have not held nearly such strong views as clergy; parents objecting to mixed system and those who think with them should work out their ideas at their own expense, 16607–16611.—Mixed system keeps youth of country in friendly intercourse, produces lasting friendships, and prevents proselytism; in some parts of the north different denominations live on better terms than in the south; probably most religious feuds take place where Protestant minorities are largest, or where numbers approximate; during Belfast riots children of National schools kept aloof; when they grow up they will probably be different from present generation; some engaged in riots might have been educated in them, 16611–16621.—If a very considerable majority desired denominational system, State might grant it; as it is, they should pay for secular and moral instruction, and leave religion to denominations, 16622–16624.—Disadvantages of ordinary system of payment by results; it degrades the teacher, tempts him to neglect dull boys, &c.; it places conscientious teachers at a disadvantage; present plan of State salary is better; difference of opinion on the subject in England, 16625–16628.—As a body, the teachers are meritorious and deserving men, but are very badly paid; residences for them very desirable, 16629–16633.

National system is a good one if well administered, but the new rule respecting religious instruction is very objectionable. No other specific alterations desirable, except in regard to position of teachers; they are liable to immediate dismissal, but they must themselves give a month's notice; this is protecting the strong against the weak, and not protecting the weak against the strong. It is not to be taken for granted that teachers will abuse their powers more than others. Some managers voluntarily give a month's notice; this should be compulsory on all, 16634–16644. Another objection to Board was their stopping building model schools, 16765, 16766.—It is also spoken of as an objection that some of the Commissioners themselves are believed to be lukewarm as to united education, 16645–16647.—Explanation regarding the schools at Faughanvale, 16648–16651. Cannot name any non-vested schools under Presbyterian patrons open to priests to give religious instruc-

Rev. Francis Petticrew.

tion; is not aware of any requests to this effect; if made, would in some cases be granted, in others not; disputes as to use of schools. Both Roman Catholics and Presbyterians are desirous of having schools in their own hands, 16652–16656.

No provision for Catholic teaching in school under witness's management, though half the children are Catholics; the priest does not give religious instruction in his own school, nor does the master, who is a Catholic. In first-named school the master, a Presbyterian, instructs Presbyterians only in religion. Episcopalians probably attend reading the scriptures. Thinks Church Catechism is not used in Presbyterian schools, 16657–16674.—Case of a Roman Catholic teacher employed by Presbyterian managers; cannot state practice as to religious instruction; in another similar case, master teaches Roman Catholic Catechism to Roman Catholics, and many of the Protestant parents allow him to instruct their children in Presbyterian principles, but there is no blending of the two, 16675–16685.—Public schools should be so constituted that parents could select, and not be obliged to use a school merely on ground of ecclesiastical connexion; denominational system really ignores parental authority, 16686–16688.

Age of children leaving school, 16689–16691.—Many of the schools referred to above are for boys and girls mixed; the system answers very well; is also in use in Scotland; female teachers are competent to manage them, and are cheaper than men. Would hardly like to see the schools of the country generally committed to females, 16692–16700.

Believes that National system is calculated to allay sectarian animosity and dissension; harmony exists among school boys, which is likely to continue in after life; districts named where old animosities are dying out, presumably from this cause among others; those who have learned toleration in school are likely to practice it afterwards; has talked with many who have expressed these views, and can also speak from experience, 16701–16705.—In Connaught schools are almost exclusively denominational; absence of religious and political feuds may be due to small number of Protestants, 16706–16710.

No jealousy on the part of Episcopalians as to Bible-teaching of Presbyterians; in witness's school the religious instruction of the latter consists of the Bible and the Westminster Shorter Catechism; Episcopalians generally receive same teaching; time of religious instruction is from 10 to 10.30, A.M.; no other except such as contained in books of Board; teachers would not introduce any contrary to the spirit of the system; have no definite directions from managers on the subject, 16711–16724.—Roman Catholic children receive religious instruction under their priest on Sunday, but none in school, except what is conveyed in ordinary lessons, 16725–16729.—Many Protestant parents are anxious for Bible in schools, but would not enforce it where not desired; many such will themselves teach it at home; four Presbyterian children in witness's neighbourhood who attend a Roman Catholic school, living nearer to it than to the Protestant school; these receive no special religious instruction in school, but may be in witness's Sabbath classes, and may receive religious instruction at home; reason for not obtaining their names; cannot speak more particularly in regard to every individual in an extended congregation, 16730–16748, 16757.

Object of State being to make good citizens, if they could make good Christians the other would follow, but as conflicting opinions are held by different sects, some must be teaching error; all teach leading truths of Christianity to extent contained in National school books, 16749–16751.—Social intercourse within witness's own knowledge from attendance at National schools; good relations between himself and priest; cannot say whether he could allow him to come into school to teach; some Presbyterians would, some would not, 16751–16756.

Witness's congregation consists of 300 families, extending over seven square miles; visits them all constantly; there is a false impression as to amount of responsibility for religious teaching resting on schoolmaster; duty is primarily with parents, 16758–16763.—In Catholic school named above Protestants would not be exposed to Catholic teaching, 16764.—Many cases in witness's neighbourhood of Protestants attending Roman Catholic schools, and *vice versâ*; it depends greatly on efficiency of master and proximity of school; minorities would not be greater if religion of school differed; even where there may be a school for each of the three denominations there is a mixture; causes, 16767–16772.—Roman Catholic teachers of Presbyterian schools; Reasons why witness could hardly appoint such to his; as a rule, teachers should be of same religion as community; Catholic children in his school get religious teaching elsewhere; this is such a school as should be subsidized by State, 16773–16782.—The Roman Catholic school recently established is a mile and a half off; has had no appreciable effect on witness's, 16783–16787.

Would object to religious element in books of Board being eliminated; never heard of parents disliking it. A conscientious master of an opposite persuasion may teach moral subjects unobjectionably, 16788–16791.—Teachers should be paid by scholars; no objection to payment regulated according to parents' circumstances, 16792–16794.

Reiteration of opinion that National Board should now be mainly executive; arrangements have not been made specially to suit Presbyterians; some modifications have been made; non-vested schools existed previously to their joining; reasons for altering system as to these, 16795–16799.—Some Presbyterians joined in 1833; in 1834 a majority of Synod were in its favour, but they did not join as a body till 1840. Did not know that so many as 160 had joined previous to 1840, 16800–16804.—Parental rights over child's education; he may bring him up without having him taught religion. Authority is violated if he is obliged to send him to a school determined by ecclesiastical connexion and not by his authority as parent, 16805–16810.

Much of the strife in the North is inherited from the past; how mixed education will modify this, 16811–16813.—A scheme of education for a people should be good and in harmony with general feelings; anything desired by a section contrary to general welfare should be denied. Presbyterians are satisfied with fundamental principles of National system; they receive no more advantages than others. Commissioners do not allow that changes made in 1840 were concessions; misapprehensions existing were then cleared away, 16816–16821, 16828.—Propositions (quoted) for modifying system, made by Synod of Ulster in 1833 were withdrawn, and others adopted, which Commissioners declared "do not contain anything inconsistent with principles of system committed to their charge," 16822–16827.—Denomination is not quite satisfied with way system is carried out; all have same advantages; no practical injustice in schools being used for praying and preaching; full religious observances of all are excluded; if rule is violated it could not be persevered in; never heard of an instance; Inspectors could find it out without visiting on Sundays, 16829–16840.

Presbyterians now generally build their own schools; they are non-vested, denomination wishing to have them under their own control and management; conflict of opinion as to admission of different ministers, 16842–16847.—Some districts still in want of schools, but non-vested are the best for Ireland. Wants are getting gradually supplied, 16848–16850.—Schools vested in local trustees; pecuniary advantages in schools being vested in Board. Is not aware that subject of vested or non-vested schools has been before Presbyterian body, 16851–16854.

It is not the business of the State to make Christians of conflicting creeds, but to make good citizens; the Church should make good Christians; there is this distinction between making good Christians and good Catholics, Presbyterians, &c., that they hold important

doctrines absolutely contradictory to each other, 16855–16862.—As to distinction in the case of Jews, they would no doubt object to religious instruction in National school books; one reason why State cannot interfere to remedy this is, that we are a Christian country, and as such books and system are in the main suitable for all; Jews are not compelled to receive the instruction, or prohibited from providing schools for themselves, 16863–16877.—A Christian State cannot cease to be Christian unless it return to Paganism or Judaism; difficulty can only be met as above stated, 16878–16880.

A system of "united education" should be one mainly supported by State, so conducted that all may use it, without sectarian teaching being forced upon any; National system fairly fulfils these conditions; its principles, as well as those of Presbyterians, are same as before 1837, though there is a change in practice as to religious instruction; this was caused by pressure from Roman Catholics; similar pressure put a stop to building model schools, these, as well as vested schools, were originally an essential part of system; reasons for permitting non-vested schools; allowing these is not a departure from fundamental principles of system; Commissioners promoted education by aiding schools already in existence where managers were willing to conform; non-vested schools built since are an extension of the system; system being now well understood, more rigid rules might be adopted, 16881–16904.

Before 1835 religious instruction had to be given before or after school hours; in 1833 Presbyterians wanted part of school-hours for the purpose, and Government would not then consent, but in 1837 they gave way; this was not a departure from original system, which only laid down that with consent of manager opportunities should be afforded at certain hours for all, but that it should not be enforced on any whose parents objected, 16905–16911.—Quotations to show that as regards non-vested schools provision was made in 1833 that dissentient children should have the time allowed for receiving religious instruction elsewhere; where building grant required, provision had to be made for religious instruction in the school, but not where grant was only for salary or books; rule that liberty shall be secured to pastors to assemble children of their respective flocks in school-room for religious instruction did not apply to non-vested schools; Commissioners never required to have religious instruction provided in non-vested schools contrary to wish of patron, 16912–16935.—The Government granting to the Presbyterians in 1837 what they refused in 1833—viz., "That patrons of schools, on making application for aid, shall fix the ordinary period of school-hours, and shall have the right of setting apart such portion or portions of said school-hours as they may deem sufficient for reading the Holy Scriptures," was not an alteration from fundamental rules of system, though some change might have come over their minds during the interval; an ordinary principle of the system may change, but not a fundamental principle; definition of the latter, 16936–16950.—No reason to believe that the country is dissatisfied with National system, 16951, 16952. Rev. Francis Petticrew.

Opinion expressed by Dr. Cooke that Presbyterians obtained "modifications" does not import much; no real concession was made. Majority of ministers of Synod of Ulster in 1834 were in favour of receiving aid from National system. Other denominations have the same privileges as Presbyterians; letter from Dr. Doyle in proof, recommending applications for aid to schools already existing. Recognition of such by Commissioners was the origin of non-vested schools, 16953–16961.—Case of Jews has been met in a mutually satisfactory manner, 16962, 16963.—Two instances of Roman Catholic teachers (one named above) giving religious instruction to Presbyterian children; have not incurred displeasure of priests by so doing, 16964.

PILKINGTON, H. M., Esq. H. M. Pilkington, esq.

Is Honorary Secretary of the Sunday School Society for Ireland. The Society was formed in 1809 for promoting the establishment and conducting of Sunday schools without regard to the denomination of Protestants requiring assistance. The assistance given takes the shape of gratuitous grants of books and appliances, or at reduced prices, and the Society derives its support from voluntary contributions; travelling agents report on the state of the schools. Income for 1868. Number of schools in connexion with the Society, and number of children attending them; decrease in number is attributable partly to emigration, and partly to the establishment of the Sunday School Society connected with the Presbyterian Church. Beneficial effects of the Sunday School system is shown by habits of order and cleanliness. Nearly 50,000 Protestant children under fifteen years of age have no means of instruction except through the Sunday schools, 23502, 23503, 23535–23537, 23542, 23543, 23558.

Writing was taught in some of the schools, but not now; nor is arithmetic taught, the schools being entirely for religious instruction, 23504–23506.—Large demand for alphabets and other elementary books, 23510, 23511.—Ready means of obtaining employment is the cause of absence of children from day-schools in the north of Ireland, 23507–23509, 23512.

In the other provinces the numbers at Sunday school are very small; the schools being for Protestants, the demand for them is of course greater in Ulster, 23513–23516.—The Committee is appointed annually from the subscribers, without regard to the Protestant denomination they belong to, 23517–23520. A Presbyterian was on the Committee, but having become a member of the National Board the Committee decided he should not be re-elected; the feeling for and against the National system runs strong, 23521–23529.

As far as can be ascertained there were eighty Sunday schools in existence before the Society, 23530, 23531. Everyone applying for aid must refer to some one known to the Committee; the religion of the applicants is not asked, nor is any note made of the denomination to which the children belong, 23533, 23538, 23544–23546.—Committee publish a report annually, 23539, 23540.—There are a great many Sunday schools not connected with the Society, 23540, 23541.—There are a great many buildings connected with the Society which are used exclusively as Sunday schools; some Sunday schools are held in buildings belonging to the Church Education Society, 23547–23549.—Books published by the Society, 23550–23553.—It is difficult to institute comparison between the Society's books and those of National Board; the Society's schools being for religious instruction, the Bible is taken as the reading book; a large proportion of the children cannot read, 23554–23557, 23560–23562.—There are no means of knowing whether Roman Catholics attend the Sunday schools, 23559.

Poverty of parents to some extent accounts for inability to read; in other cases, carelessness; number of children in the Society's schools able or unable to read the Bible, 1st January, 1869, distinguished under the several provinces, 23563–23565.—If landlords in the north of Ireland will not grant sites for schools, the lack of reading may be accounted for, in that province, 23568–23571.

Rev. James Porter.

PORTER, Rev. JAMES.

Is Presbyterian clergyman of the General Assembly, and regular visitor of Kilkenny Model School, attending once a week to give religious instruction, 18562–18569.

Witness objected to the use of the Second, Third, and Fourth Books (Edition 1867) by writing a note in the Visitors' Book of the boys' school and one in that of the infants' school, but never had any conversation with the teachers upon the subject, considering that they were there simply to discharge their duty as servants of the Board, and that they were not responsible for the books; the objectionable passages are, in the Second Book, the second stanza of Lover's song of the "Angel's Whisper;" in the Third Book, Sterne's story of the "Dead Ass;" in the Fourth Book, the statement that Queen Phillippa made the sign of the cross, 18570–18585, 18588, 18590–18592, 18630–18632, 18649–18657.—Did not know who compiled the books; the knowledge of who were the compilers would have no effect on the objection, 18586–18588, 18620–18626.

An investigation took place by order of the Board into charges arising out of the report of the District Inspector on letters received by him from the teachers; the minutes were made on the 6th February, and on the 7th they were reported by the District Inspector, together with a letter from the head teacher of the school; the Head Inspector, at the request of witness, forwarded a statement of the specific charges [a copy is handed in, also a copy of head teacher's letter]. The charge that several pupils were present when the observations were made is not the fact, nor is the charge that the business of the school was interrupted, and so the Board decided, the Commissioners adding their regret that observations were made in the Visitors' Book which should have been addressed to them only, 18589, 18590, 18593–18612.—The Board's decision was not full enough; they did not decide on the charge of speaking in the hearing of Roman Catholic pupils or Roman Catholic teachers; witness asked for a fuller decision, but the Board declined to re-open the case, 18613 *and note*, 18689–18691.

Visitors are requested to record their observations of the state of the school; the school cannot be considered in a satisfactory state if the books are improper; an objection to the books does not imply an objection to the system, 18614–18618, 18627.—The books up to 1867 were satisfactory; the edition of that year should not have contained the passages objected to; it was a violation of faith with the public, 18619.—If the Board profess not to interfere with the creed of any party, and depart from the principle, they must be brought back again to it; there is sufficient literature in the world for general purposes without interfering with the peculiar views of anyone, 18628, 18629, 18633, 18634, 18643.—If witness were to go over the same course again experience would lead him to address the Board of Education, directly in the first place; his object in calling attention to the objections in the Visitors' Book was that it would come under the observation of its officers, whose duty it was to prosecute the matter, and that the action taken would be more prompt, 18635–18642, 18644.

If reference in the books to Roman Catholic customs or history trench upon the views of other Christians the works should not be used; there is not enough history taught in the schools, 18645–18648.—The attempt to compile a history that would be acceptable has never been made; it is possible to give the leading facts of history without offending the prejudices of anyone; an account of the battle of the Boyne ought not to offend—it is a historic fact, 18658–18668.—History should be founded on facts, and consists also of inferences from the facts; the inferences, however, in the case of history, as in other sciences, might not be correct, 18669–18680.—History is a very important part of the education of the young, 18681, 18682.

Action of witness in respect to the books was justified by the result, as the Commissioners withdrew the books and substituted others; other books have been removed from the list from time to time, 18683–18688.—There is not very much mixed education in Kilkenny; all the Presbyterian children within a convenient distance attend the model school; some coming four or five miles; they are the children of farmers, shopkeepers, &c.; some of them are above the class which the State intend to benefit out of the public funds, and some are able to pay more than the fee required, 18695–18701, 18706–18709.—The model school is acceptable to the people, and a good education is given there, 18704, 18705.—Does not concur in the opinion of a former witness, "That the tone of the people has altered very much, that there is an independent liberalism, that Fenianism would not have had a footing in the country but for the influence of the system of education, and that it is a system opposed to all religion," 18712.

Rev. John Scott Porter.

PORTER, Rev. JOHN SCOTT.

Is one of the Non-Subscribing Presbyterians in Ireland, a body theologically and ecclesiastically distinct from the General Assembly of Presbyterians in Ireland; is himself a Unitarian; is one of the professors to superintend the theological education of young men preparing for the ministry; the Non-Subscribing Church contains 41 congregations, 18047–18050.

All the schools of the body intended for the class for whom the National system is designed are in connexion with the National Board, and have been so from the first; almost all were built and are maintained by the congregations of the chapels to which attached, but they are not generally appendages to the buildings or grounds, 18051–18054.

In the five schools under witness's management the average attendance is large—60, 60, 50, and two of 200 each; there is a large mixture of religions, except Roman Catholics; formerly they were more numerous, 18055, 18056.

Non-subscribing Presbyterian body is favourable to the system of united education; but the system under the National Board is drifting into denominationalism, therefore they are opposed to it, 18057.—Has a very high sense of the value of Marlborough-street model schools, 18059.—The teachers trained in Belfast are as efficient as those trained in Dublin, 18060.

A manager would, *cæteris paribus*, prefer having a teacher of his own persuasion, but many schools are most satisfactorily conducted under non-subscribing ministers by teachers of other churches, 18061, 18062.—Beyond all comparison trained teachers are the most efficient, 18063, 18064.

Some teachers remain long in the service, some male teachers get better employment in commercial establishments; the females who leave usually do so to get married; there have been difficulties in filling up vacancies, 18065–18067.

The head teachers in witness's school get more than the Government salary, 18068.—The proportion of children in his five schools who do not make any weekly payment must be infinitesimal; the sums demanded are very small, 18068, 18069.—A fixed residence adds much to the comfort of a teacher; the present salaries of teachers are not sufficient, which is proved by the numbers of young men of good attainments going off to other employments, 18070, 18071.—It may be desirable to get rid of a man who begins to be unequal to his work, but on the other hand it is

a pity that when a man has learned his business well and has become a good manager of a school, that he should leave it, sometimes at very short notice, 18072.

The increase in teachers' salaries should be made dependant on results; the result should not be confined, as in England, to two or three branches—the paying branches—but should comprehend the whole of the teaching, 18073–18075.

The inspection, as conducted by the Government Inspectors, is of great value, it is one of the best parts of the system; managers are not always able to obtain from the local committees a sufficiency of school requisites; when the Inspector comes and says such things are necessary, a very useful stimulus is put on; in speaking so favourably of Inspectors, all of all religious denominations are included; their number might be multiplied with advantage, 18076–18079.

The desired increase of teachers' pay would be best met by a payment for results, something additional from school fees and other sources, and if possible a house; the present salaries might then remain as they are; having a fixed residence for the teacher would be a great convenience also to the manager; the residence, especially in the country, should form part and parcel of the school, 18080–18086.

The opinion that the system of the Board has been drifting into denominationalism is grounded on several reasons: first, a statement by the Resident Commissioner, as taken from Parliamentary paper 473, 1867, p. 3; second, the great number of non-vested schools, generally built in close connexion with churches or chapels, and usually managed by the clergymen of those churches or chapels, are practically denominational schools, for they are attended by scarcely any but members of the connexion to which they are attached; third, the encouragement given by the Board to these denominational schools, see the Inspector's report on the Antrim district for 1865, Appendix to 32nd Report of the Commissioners, vol. 1, p. 205; the unnecessary multiplication of schools, in order to give to each denomination its own school, thus keeping the children as distinct from one another as if separated by the sea; the encouragement given to convent schools, which are and can be nothing else but denominational schools, although they use the same books and receive the same instruction as Protestant children in mixed schools, 18087–18089.

In the early history of the Board, Protestant landlords refused to allow National schools to be built on their property; they were therefore built on the only available sites, places connected with chapels; under these circumstances the Board was not to be blamed; but the complaint is that where no necessity exists, schools have been so built, and a spur to denominationalism given thereby, 18090–18093.

Witness's schools are non-vested, and are in connexion with the Board, being so placed at his request, although the system had at the time drifted into denominationalism; but a privilege having been granted to others, he availed himself of it also, although the practice was not approved by him; now, the reason does not exist, 18094–18098.—In non-vested schools the patrons have always claimed the right to use the schools on Sunday for Sunday-school teaching, and witness has so used his schools, 18099–18101.

Denominationalism is not the result of any religious feeling amongst the community at large; it proceeds from ecclesiastical persons, who exercise a great deal of influence; there has never been found the slightest objection to the united system on the part of any class or denomination of the poor whatever, 18102.

Witness's experience shows that parents are not more disposed to send their children to schools of their own persuasion, with one exception, the Roman Catholics; at first there were many Roman Catholics in his schools, but in consequence of Bishop Dorrian's denunciation a very great reduction in their number took place; a Roman Catholic clergyman inspected the register of one of the schools, and immediately afterwards the Catholic children left; several of those taken away went to no other school; they would have come and their parents would have let them, without hesitation, if they had been let alone, 18103, 18104.—Many children of a different class of Presbyterians frequent witness's school, 18105.—It is the attention shown to the children, and to their improvement in learning, that parents look to in the choice of a school, not the church of the teacher, 18106. Rev. John Scott Porter.

All denominational schools should be swept away, there should be no such thing as a Catholic school, a Protestant school, a Wesleyan, or Unitarian school; they should be on the same footing as the model schools, of which the National Board is the patron and proprietor. Taking the schools in Belfast,—some Roman Catholic, attended by Roman Catholics, some Episcopalians, attended by Episcopalians, the like with Presbyterians, —these schools, although conducted on the principles of the National Board, are distinctly and absolutely denominational schools, and an end should be put to the whole system; it is the character of the patronage and management and the attendance taken together that makes a school denominational, dividing children into sects and parties from their earliest years, 18107–18112.

A school with a Protestant patron and Roman Catholic scholars is not denominational; the whole system of private managers and local patrons ought to be swept away, and the schools placed under the management of paid or unpaid Commissioners of Education as the model schools are; if a gentleman builds a school on his property and chooses to hand it over to the Commissioners, let him do so; if he retains the management, let him support it; there should be local inspection, but no local authority; this is the state of things now existing, and the wish is that it should not be altered, 18113–18119.

There are one or two model schools attended exclusively by one denomination; as to Dunmanway model school, there is no local patron there; it is entirely under the authority of the Board, 18120, 18121.

Disapproves of the constitution of the present Board, and of the principle on which it is constituted; it consists of twenty members, and there is no Board in the kingdom consisting of that number; four, or at most five, members would be quite sufficient to do the duty, who ought to devote their whole time to it, and be well paid for it; £2,000 each a year would not be too little, 18122–18125.

The action of the Commissioners generally has been the reverse of uniform; the constitution of the Board being half Protestant and half Roman Catholic, is a disqualification that ought to be swept away; disagrees with Mr. Stanley's letter on this point; a small Board appointed at the option of the Government, no matter of what religion, being chosen as most suitable for their duty, would inspire more confidence; the result of the present constitution has been frequent discussions and differences of opinion with considerable asperity, and with repeated violations of its own rules; instances cited, 18126–18147, 18177–18179, 18183–18186.

The character of the small Board suggested should be administrative, with its powers and functions strictly fixed by Act of Parliament; at present the Board is partly administrative, partly legislative, and the legislation is carried on in the worst possible way —namely, in private, without public debate or discussion, without right of petition, and the parties affected, that is, the teachers and the country, in utter ignorance of what concerns their welfare; the principle of the suggested Board should be strictly non-sectarian, a principle best exemplified in the National model schools, 18148–18150, 18180–18182.—All the religious denominations are thoroughly represented in those schools—for examples, the Clonmel district model school, the Kilkenny District model school, the Waterford, Enniscorthy, Parsonstown schools, and several others, 18151.

The model schools are especially valuable for show-

Rev. John Scott Porter.

ing, in the first place, how a good, well regulated school should be conducted, what building, furniture, &c., and organization of classes are necessary; secondly, as an illustration of the success with which the united principle can be carried into practical operation, as proved by the annual reports of the District and Head Inspectors; and, thirdly, for their usefulness as training places for teachers, 18152.—The statement in the "explanatory paper" of the Commissioners to Government, that "district model schools were never intended to be training establishments for teachers," is singularly incorrect; quotations from official documents showing that they were so intended, 18153–18160.—A large diminution in the attendance of Roman Catholic children at the model schools has taken place lately, 18161.—The Commissioners have not upheld these institutions as they should have done, 18162.

The advantage of the non-sectarian system over the denominational system consists in its bringing children of different sects into friendly contact, whereby they form friendships which often continue in afterlife, to the great advantage of the community in promoting peace and order; in all the schools under witness's charge the most perfect harmony on the subject of religion has prevailed, 18163–18165.—Inspectors and persons in society speak of the excellence of the non-denominational system; there is a growing conviction of its importance and reality, 18166, 18167.—The establishment of two denominational schools, one for Catholics, the other for all Protestants, would tend to disastrous consequences, 18168.—The Ulster National Education Association is composed of parties of all religious denominations except Roman Catholics; they were decidedly opposed in 1864 to such a denominational system, and it is fair to assume they have not changed their minds, 18169–18172.

Whichever system is considered to be the best, let it be established and carried out, but it would be absurd to have one system in one part of the country and another elsewhere; instead of one good non-sectarian school there would often be three expensive and inefficient denominational schools, and the poor of a small sect would be neglected, 18173–18176.

The State is not bound to provide religious education for the people; it is good for the State to provide secular education for those who cannot otherwise obtain it, and as it is the duty of the State to do what is good for the people, the State is bound to provide it for every child in the land; it should provide and pay for secular instruction only, and take care that the institutions erected for that purpose are not applied to any other; it is the duty of the parents and the parents' Church to supply religious education, 18187–18195.—The managers of a school receiving aid from the public funds should be strictly bound to apply their school exclusively to the object for which the money was granted; the introduction of what is called religious instruction, but which is rather polemical instruction or controversial theology, is a great disadvantage; if dogmatic instruction is wanted, let it be provided by those who need it, 18196–18199.

There would be no objection to religious instruction being given in the schools if it be so given that it shall not appear, either by time, place, or person, to be connected with the National system, 18200.

It is the common rule of freedom that the majority shall decide; the denominational system would not prevail if the unbiassed opinion of the majority were taken, 18206–18209.

The Roman Catholics demand denominational education, but they take the non-sectarian system freely notwithstanding, 320 Catholics attending the Belfast model school, out of a total of 1,485, in the last quarter of 1866; this is submitted as a specimen of the way the people refuse to submit to their clergy in particular cases; the numbers quoted are those on the roll, 18210–18216.—Under the guidance of their clergy the Roman Catholics demand denominational education; the only anxiety they feel on the question is that of pleasing their clergy, 18217–18219.

A plan for the education of the poor of the country, with funds granted by Parliament, *must* be in accordance with the wishes of the majority, 18223.

Utterly disapproves of the distinction between vested and non-vested schools; would desire the Board to withdraw aid immediately from non-vested schools, and from schools taught by nuns and brothers and the clergymen of any Church, 18225–18229.

Cleanliness, order, and habits of decorum in schools are considered by witness of vital importance; children coming to his schools were negligent at first, but afterwards the parents thought attention to such matters to be good, and were glad it was done, 18237, 18238.

Morality is one of those matters parents should look to, and they would be justified in removing their children from a school where immorality was permitted or countenanced; it is the duty of the patron to see after such things; does not know anything as to the condition of the *offices* attached to Larne model school; such a matter would be for the Inspector to set right if there had been anything of the kind; never heard of it before, and cannot believe the facts to be correctly reported, 18239–18254.

A local tax in aid of schools is desirable; it would take off the appearance of an elemosynary education, of which there is too much in the country both for rich and poor, 18255–18257.

Richardson, John G., Esq.

John G. Richardson, esq.

Is a member of Society of Friends, 25705.—Is a landed proprietor; also a linen merchant, flax-spinner, &c., at Bessbrook, near Newry; commenced in 1846, 25686–25693.—Has a large united school for boys, girls, and infants, which is under National Board; admits no clergy of any denomination, and believes they are the better satisfied; never permits interference with children's religion, 25694–25699.—A statement was made against school by Mr. Kavanagh in 1854, but parish priest, after inquiry by direction of bishop, reported it to be groundless. Population of about 3,000; endeavours to keep it equally divided between Roman Catholics and Protestants, which has the effect of promoting peace, 25700–25703, 25707–25738.—Has done nothing to cause Roman Catholics to attend when Bible is read; religious instruction from 9 A.M. to 9.30 A.M., from which any can absent themselves. To prevent jealousy, now employs a Roman Catholic master, 25704–25706.—Denies Mr. Kavanagh's statement, that pressure is brought to bear on Roman Catholics to make them attend Bible-class; all are compelled to attend school, but only to receive instruction authorized by National Board, 25707–25710.

Statements showing that he has always endeavoured to deal fairly and honourably, and has never had one complaint among his 3,000 people; has letters from his late partners confirming this; concern is entirely his own now. Reads a letter from his late manager distinctly denying coercion, and one from teacher to same effect, and denying Mr. Kavanagh's statement, that majority of children were Catholics, 25711–25719.—A Roman Catholic chapel is now building; priest has expressed himself satisfied with impartiality in schools. Roman Catholic teacher says he knows of no improper influence; manager does not know a single instance since he came (1857) of Catholic child receiving religious instruction from a Protestant teacher; a case or two occurred previously, but parent was immediately informed; give parents notice, but do not turn children out if they come. Roman Catholic teacher now gives instruction to Roman Catholics, who come from 9.30 to 10; if any came before 10 previous to 1854 parent was immediately informed,

25720–25737.—Has similar schools where he lives at Moyallen, 25738.

Mixed system faithfully carried out is the best for harmony of the country; after-life results have proved this. No case of a child from witness's school changing his religion; this shows absence of proselytism. No police, pawnbrokers, or publicans, and but little quarrelling in the place, 25740–25746.—Knows several Roman Catholic gentlemen who are favourable to mixed system; one, Mr. Brady, of Newry, a late Member of Parliament, strongly so; cannot say some of the middle class and gentry may not be opposed to it; knows many act under clerical orders, and do not think much for themselves, 25747–25754.—Society of Friends' private schools for the better classes are ordinarily strictly denominational, but those at Bessbrook attend same school as others. Society have boarding schools for assisting their poor to a good education, and a charitable institution for supporting and educating orphans, children of those who have forfeited membership, and are in want, &c.; these are all educated in the tenets of the Society. Those who can afford it send their children to England, 25755–25763. John G. Richardson, esq.

Cannot say whether Mr. Brady publicly stated what he stated to witness named above, which was at an election committee; he advocated National system in Parliament many years ago, and is still strongly favourable to it; other Roman Catholic gentlemen present wished the question left out for reasons named. Roman Catholic Bishop of Belfast, 25 years ago, was a supporter of National system, 25764–25780.

RINTOUL, JOHN, Esq., M.A. John Rintoul, esq., M.A.

Has been in service of National Board nearly thirty-five years; professor in training department at Marlborough-street since July, 1868; was the late Dr. Sullivan's assistant. Takes the literary department; has no assistant, 26012–26018.—Has been teaching and examining in reading and grammar since 15th January a set who will leave on 15th June; other subjects to be introduced within that time.

Description of instruction of teachers in "the practice of teaching," 26019–26022.—Teachers' criticisms of each other; amount of practice in teaching which they get during the six months; they are partly engaged in teaching, and partly in observing how schools are conducted. There are five small schools in twelve sections; teachers move frequently from section to section; professors note the teaching and give a familiar lecture on the notes; attaches great importance to this. Cannot do it fully at present for want of assistance; does not know whether this will be granted; has not made any formal representation on the subject. Practice of and instruction in teaching require increasing at Marlborough-street, 26023–26035.

Great difference in attainments of teachers; some are very deficient in reading. Inquiry is made as to position occupied by them at school; third class is highest in many schools; cannot say how many have been beyond this, 26036–26040.—Supervision of morals; particulars. Subjects taught by the other professor; time-table is made out between the two professors. Weekly examinations. Teachers are in two divisions the whole time according to proficiency on arrival. Seventy-nine males, and seventy-five females in present general class; not more than three of these are above first of third; nearly half are below that when they come up, 26041–26053.—One head for training and model schools would be best were it not necessary to have two on religious grounds, 26054–26056.—Punishment for misconduct; serious matters are reported to Board, 26057, 26058.—Desirability of pupil-teachers, &c., remaining a longer time than at present in training schools; arrangements suggested for accomplishing this object. Time given to instruction in the practice of teaching should be extended to at least one hour a week in each class. Description of method adopted of imparting instruction by familiar lectures, 26059–26065.

Teachers who come up are better grounded in grammar than formerly; many who come from model schools are so, some very much the reverse, 26066, 26067.—Arrangement of Dr. Sullivan's work during illness preceding his death. Witness was assistant professor previous to his appointment, and his assistant from that time till his death. Has no assistant, and has therefore, as far as able, been doing work of both since; necessity for an assistant, 26068–26078.—Particulars of arrangement into two classes, the general and the special, of teachers in training; in placing them the classification of the Inspectors is taken for granted. How recommended for schools, comparatively few applications now for teachers, 26079–26095.—During witness's time, upwards of 8,000 have passed through general class, and nearly 1,000 through special class. Believes those who come desire to be teachers. Should be trained after having charge of a school for a short time. Preparatory training desirable, eighteen or nineteen quite young enough to commence. Difference in qualifications of those who come, 26096–26107.—Number of National school teachers required to fill up vacancies by death, &c. Have no means of following up those who leave establishment. Thinks most who come intend to be teachers. About 8,000 at present employed in National schools; only about 3,000 or 4,000 of these were trained at Marlborough-street; cannot tell what has become of the others trained there. Many abandon teaching because of the miserable pay, 26108–26123.

The two professors are the heads of the establishment; arrangement of their own duties, and those of their two assistants; the professors only are responsible for domestic establishments. Head masters of model schools are responsible for pupil-teachers; professors are as managers towards masters, but do not examine pupil-teachers and monitors; anything wrong is reported by masters to them. Drawing up of time-tables, 26124–26144.—If anything prevented one professor from attending, he would communicate it to the other, 26145–26148.—Professors have no authority over head master, but are higher in rank. Do not formally inspect model schools, being fully acquainted with their condition by daily observation. Check weekly accounts and visit boarding schools, 26149–26159.—Witness lectures in logic; subject enters slightly into classification. Cannot say anything as to District Inspectors; presumes answers to their questions will be found in text-books. Believes the five months' training at Marlborough-street is of great value, 26160–26169.

Pupil-teachers from model schools are superior to monitors from ordinary schools; does not think if the latter stayed a little longer it would make them equal. Three grades in training—monitors, pupil-teachers, and teachers; as to usefulness of pupil-teachers, and whether they are unduly favoured and worth extra cost, 26170–26182.—Pay of pupil-teachers, monitors, &c.; the former receive less in Dublin than in the country; probable reason. None receive more than £20 a-year in Dublin. Is not acquainted with district model schools, but here monitor class is selected from pupils by competition; only monitors can become pupil-teachers; occasionally some from ordinary schools have competed for central model schools, 26183–26194.—Repeats that no pupil-teacher receives more than £20 a-year in Dublin; there are twelve in model school, but they live at home, 26242–26245.—Commissioners through their officers select teachers of model schools; some assistants have been appointed direct from special class at Marlborough-street. Advantage to young persons to have experience of teaching before being trained; monitors and pupil-teachers have some of this, but it is better ordinarily that they should have had responsibility of a school, 26195–26204.—Qualification and position of an assistant

John Rintoul, esq., M.A.

teacher; should be equal to second of third, 26205-26211.

Is employed 12½ hours a week in teaching; has about 1,200 exercises a year to correct. About 200 students generally in training. Time occupied over exercises; would give more if he had an assistant, 26212-26219.—Examines all the exercises at home, and keeps a record, but they do not go back to writers; reads them and explains corrections in class, 26228-26232.—Uses maps in teaching geography, but map-drawing is not practised.

Teaches physical geography from a text book, 26220-26227.—Uses Epitome of Geography but little, for want of time and because it is not quite suitable, 26233-26238.—To a small extent pupils draw maps on black board; use atlases freely, 26239-26240.

Henry Robinson, esq.

Robinson, Henry, Esq.

Has acted as an Inspector of Poor Law Unions for more than twenty years; present district comprises 17 unions, all contain workhouse schools. Boys' and girls' schools separate, except in smaller unions. Largest has 550 on rolls and 483 in daily attendance, smallest 22 on rolls and 16 in daily attendance; one teacher gives all the secular instruction in the latter, 10372-10377.

Inspects schools every six months, and reports to Poor Law Commissioners; 13 under National Board, are inspected annually by them; Poor Law Inspectors see reports, which sometimes contain suggestions; if unfavourable, guardians communicate with teacher. Majority of these are certificated, 10378-10387, 10410.

Salaries of masters average £31, mistresses, £22, and everything found. Commissioners can regulate them, 10388-10390.—Guardians cannot pay more than Commissioners approve, 10691.—North and South Dublin Unions are in witness's district; none in district have yet combined into "district schools." Number of chidren has not varied much latterly, 10391-10394.—Guardians are generally ready to appoint sufficient school assistants, 10395-10398.—The principle as to religious instruction is that children shall be brought up as registered; arrangements for carrying this out, 10399-10405.

In consequence of their youth, few children reach third or fourth classes; any at school a sufficient time learn to read, 10406-10408.—No jealousy through suggestions coming from National Board. No necessity for official relations between Inspectors of the two Boards, 10409-10412.

Guardians can suspend schoolmasters, Commissioners can remove them. Care is taken, by previous examination, to appoint competent teachers. If a school is inefficiently carried on, teacher is warned, and if no improvement by next visit, dismissed, 10413-10416.

One hundred and sixty-three unions in Ireland; one Inspector could not examine all the schools in six months. Children come in grossly ignorant; most are under ten years of age, and have never been to school. Never met with any who spoke English with difficulty. No undue delay by guardians in appointing new teacher where Board have dismissed one, 10417-10427.

Error of keeping names three months produces the disparity between rolls and average attendance; attendance is sufficiently regular, 10428, 10429.—Children are taught trades or work on land in nearly all the schools, 10430, 10431.—Paupers in Donaghmore Union are exceptionally few, 10432-10436.—Nine schools with over 100 on rolls are satisfactorily conducted, or teachers would be removed. Advantage to schools where guardians take an interest, 10437-10440.—Difficulties often arise (not in the schools) where religion of deceased parent cannot be ascertained; law on the subject, 10441-10443.

Educational staff is sufficient; forty-six Protestants in South Dublin Union boys' and girls' schools. For Roman Catholics there are two boys', two girls', and an infants' school; each has one teacher; this plan preferred to one large school with several teachers; number of Protestants has not altered much lately, 10447-10453.—The separation of creeds out of school hours only extends to dormitories. The arrangement of having separate schools works satisfactorily, though Protestant school is small, 10651-10656.—Adults are separated according to creed, 10669-10671.

No prejudice now against girls or boys from workhouses; they obtain places freely; only fourteen per cent. of those hired out from Dublin unions return; their ages about twelve to fourteen; tabular return for three years on this subject, 10454-10463.

Most union schools are connected with National Board; advantages of connexion; guardians stand in relation of patrons, and pay salaries. Duties of teachers out of school; no class salary paid, 10464-10469.—South Dublin Union withdrew from connexion with National Board, but not in consequence of anything that occurred in the workhouse, 10470.—Schools are purely denominational, 10471.

Farms are attached to all the unions; good instruction is given to the boys; special agricultural officer kept in some, 10472-10475.—Attendance at school compulsory; difference between number on rolls and average attendance caused chiefly by sickness, 10476-10479.—Training of masters in some country unions, 10480, 10481.—Reports of National Board Inspectors are useful, 10482, 10483.

In South Dublin Union all the senior children are together to facilitate industrial education. The youth of the children is the cause of the majority being in the junior classes, 10484-10487.—Great number of illegitimate children, 10488.—Children go out at from twelve to fourteen; guardians satisfy themselves as to character of employers; most can read properly before they go out, though not fluently; most would be in third or fourth class when hired out, 10489-10498.

Where National Board Inspector is dissatisfied with a teacher, guardians will sometimes deal with him; the latter generally do their best to get good teachers or increase an insufficient staff, 10501-10505.—Some chaplains are irregular in making reports; they give *bonâ fide* instruction to the children generally, 10506-10508.—Guardians are obliged to advertise for every teacher required; manner of appointment; generally several candidates; best usually successful; statement as to inferiority of teachers incorrect; schools are fairly supplied with requisites, 10509-10515.—Secular instruction is given to all together, except in South Dublin Union, 10516, 10517.—Children of two and a half to three years on rolls; fifteen is legal age for leaving, but in Dublin they sometimes remain beyond and continue in the school, but not if they go out and return again, 10518-10522.—Guardians sometimes give outfits, but can only pay a premium when apprenticing to the sea, 10692-10695.

Visits of National School Inspectors, 10523-10525. At half-yearly examination Poor Law Inspector receives statistics and personally examines senior classes. He reports results to Board, giving number, age, attendance, nature and extent of industrial employment, &c. of scholars, and number of monitors; form of reports, 10526-10531.—Secular, industrial, and religious education of pauper children is sufficient, 10532-10537.—Stimulus to teachers; in most cases, salaries are sufficient, 10538-10540.—Children have no intercourse with adults; can see their mothers. Moral character of girls equal to those educated elsewhere, 10542-10544.—Sufficient opportunities for intercourse between parents and children; those under two years may remain with their mothers, 10635-10637.—Statistics showing that large majority of lads and girls remain in their situations, and that not many return to workhouses; few leave the country, 10545-10549.

School farms vary from twenty-five to two acres; some children are taught from Agricultural Class Book

in school; where there is no agriculturist, schoolmaster teaches on land as well as in school. 10550–10559.—Fluctuations, from children going out and in with parents; orphans and deserted children are the permanent scholars; proportions of permanent and casual children could be given; discrepancy between numbers on rolls and those in average attendance greatly caused by keeping names too long; returns include those on at commencement of year and those admitted since, though discharged; no means of knowing whether they receive instruction when out of workhouse, 10560–10580.

Superintendence in dormitories; masters and mistresses have charge of children out of as well as in school hours. Children in industrial classes occasionally have prizes, 10581–10585, 10633, 10634.—Workhouse teachers with National Board classification would not receive a higher salary on obtaining a higher class, 10586–10588.—Parliamentary grant has had little effect upon teachers' salaries yet. The grant is the actual salary paid, together with a portion of the medical expenses, and is a distinct vote. Guardians, with consent of Poor Law Board, may raise salaries; same superannuation rules apply to teachers as to other workhouse officers, 10590–10604, 10688–10690.—Few cases of children endeavouring to leave without parents by misrepresenting age, 10605–10607.—Blind and deaf and dumb children are sent to asylums to be educated; no indisposition on part of guardians to send them; Poor Law Board can advise but not compel their removal, 10608–10619.

Little difference between ordinary compulsory dismissal and dismissal by sealed order; most of the latter cases are where guardians are disinclined to act. Few now leave or are dismissed; great care is exercised before appointment; National Board classification is taken as evidence of literary knowledge, 10620–10627.—Sufficient school requisites; no books for reading but school-books, 10628–10631.—Every workhouse must have a school, and every child be taught for at least three hours a day, 10632.—Boys, girls, and infants are generally taught in separate schools; no provision for adults, and no power to compel their receiving instruction, 10638–10641, 10650.—Experiment of district schools not successful; great dislike of parents to children leaving workhouse whilst they remained, 10642–10645.—Prostitutes are usually kept entirely separate. Intercourse of mothers with illegitimate children, 10646–10649. Henry Robinson, esq.

Schoolmasters often remain a long time; some are made masters of workhouses; salaries. Married teachers not usually allowed to have their families in the workhouse; reasons; no extra allowance in consequence. Many very efficient unmarried teachers; some instances of immorality among this class; but little danger of such cases, as a strict watch is kept, 10657–10668.—Non-attendance at school from eye disease, 10672–10677.—Guardians may assist emigration, 10678.—Any competent person may be agriculturalist; sometimes office is combined with that of schoolmaster; it is so at Tullamore, and master receives £50 a year for the two duties, 10679–10684.

Paupers quitting workhouse must take children with them, unless under medical treatment, 10685–10687.—Advantages and disadvantages of separating inspection of schools from ordinary Poor Law inspection, as in England. Each school should be inspected at least twice a year, 10697–10699.

Ross, David, Esq.

David Ross, esq.

Is a barrister-at-law, and author of a paper on the nature and advantage of the non-vested system under the National Board, for some time Assistant Secretary to the Endowed Schools' Commission, and afterwards Secretary to the Queen's Colleges' Commission, 17408–17413.—The system of primary education under the National Board in Ireland is better than any other, speaking generally; originally religion was intended to be taught by that system; afterwards, by a radical change, the non-vested system was put in connexion with it; secular and moral instruction should be left to the State, the patron to look after the religious instruction; it is the best solution of the religious difficulty in education, 17415–17418.

Does not agree with the opinion of Mr. Vere Foster—that the religious difficulty is a myth, but it depends on the action of the clergy of the Roman Catholic and Established Churches; the prevalent opinion of the laity is that every public school should be open to every child, 17419–17425.—Has not had much social intercourse with Catholic laity in the north of Ireland, because Protestants and Catholics do not mix much together, and because there is not a large proportion of the better classes of society; the bar is not to be taken as an exponent of the opinion of the people, the majority and the leading members being considerably influenced by what happens to be the popular idea of the time, 17426–17430.

The non-vested system gives to persons with strong feelings in favour of religious education all the liberty men can fairly demand in a system of State-paid education; it is calculated to diminish religious animosity; it tends to teach that the conscience of every child is a sacred thing, not to be violated, and, as put by the Resident Commissioner, it protects the minority, and prevents the majority from being oppressors, 17431–17433.

Under the present system of the Board religion is not ignored, but is committed to local patrons or district teachers of religion; the right of the parent to direct the education of his child is indefeasible, 17434, 17435.

The real object of National education ought to be to educate, in the most extensive sense, the masses of the people; the carrying out of the system originally proposed was interfered with by the adoption of the non-vested system—a valuable part of it; so far as the education of the poorer classes of the community is concerned, the National system must be considered a success; the original object was for combined literary and moral, *and* separate religious instruction; under the non-vested system separate religious teaching has ceased to be an object of the State; considering the difficulties to be encountered, the Commissioners have fairly carried out the trusts committed to them, 17436–17439.

The Church Education Society originated in consequence of an opinion entertained by the clergy of the Established Church that they had a right to superintend the education of the entire people, that no public education was to be afforded except as approved by them—a right that cannot be sanctioned in any State-paid school, 17440, 17441.—Modification of this statement, 17553–17555.

The teachers of National schools generally are not so well paid as they ought to be; a house and garden should be provided, and part of the pay depend on the way in which they were kept, as they ought to serve as a model for the parish, 17442, 17443.—Witness is in favour of a partial system of payment by results, but a teacher's bread ought not to depend on the efficiency of his teaching, as ascertained by examination, in the merely elementary courses of instruction, 17444–17446.—Does not agree in the statement that Fenianism is the result of the National system of education; it depends on other causes altogether, 17446–17449.

Does not approve the present constitution of the Board; the principle of having on it representatives of the different religious bodies in the country is injurious; a small paid Commission, even if all Catholics, more administrative in its functions, under definite rules, is preferable, and would be more popular; men of ability and position cannot be expected to attend to such duties gratuitously, they must necessarily be at the mercy of their subordinates, who

David Ross, esq.

ought never, however able or honest, to be in the position of principals, 17450, 17451, 17458–17461.—Any change in the rules should be first approved by the Executive Council for the time being, before being submitted to Parliament, as in England, 17453–17456.—There is a general feeling of distrust of the present Board, 17457.

Primary education should be regarded—not as many people regard the National system, as one for the instruction of paupers or demi-paupers, but as a system of education of all the children of the country together, rich and poor, and of all religions; richer children so taught will in afterlife have more regard for the sacred rights of the poor, 17462, 17463.

The demand is now for denominational schools, but the question is reduced to a contest, whether, in education paid for by the State, the ecclesiastical or civil authorities are to be supreme, 17464.—It is stated that the present system is denominational, but the word so used is ambiguous; a denominational school is one where the patron or master has a right to impose religious instruction on every child, and if he do not receive it to exclude him, 17465.

As to training schools, and residences for the pupils in them, the education must be united or in common—otherwise how could the men teach in common all the classes who would come to them? but it is proper and right that the pupils, young men from the country, should be placed under the charge of persons who would naturally have an interest in their morals and religion; separate boarding-houses, therefore, are highly desirable, but only *boarding* houses, and the principals, lay or clerical, of these ought to be generally favourable to united education; this opinion applies only to a system recognised and paid for by the State; private boarding schools are out of the question, 17466–17471.

It is said that the large exclusion of history from the books used in the education of the young of this country is a difficulty, but it is a difficulty easily overcome; past facts, the most adverse, might now be taught, if people were at the same time taught that we now live under a system of perfect equality, and that every man, irrespective of his religion, is as good as his neighbour, 17472, 17473.

Although religious instruction may be best given when teachers have freedom to impart it in the way they think best, they ought not to do it as a part of regular school business, 17474–17478.

Every attempt should be made to conciliate those who wish for a denominational system, consistently with the principle of united education, but nothing ought to be yielded to any body of men, however influential, who demand what they want, irrespective of obligation to show that it is *right;* otherwise we fall into the sin of Herod, who, having killed James with the sword, because it pleased the Jews, proceeded to take Peter also; the principle of the National Board is sound—it protects the conscience and rights of every child who wishes to take advantage of what the State pays for, secular education, which principle is not imaginary, it is the first rule of the National Board, and on it the Irish system has been conducted successfully since 1831, and which only requires patience, time, and the absence of meddling of rival inconsistent systems to be carried successfully into England, and possibly throughout the world; the Irish system, so far as it is recognised and inspected, and paid for by the Government, is only secular, 17479–17501.—It would be highly undesirable, and productive of very evil result, to remove all restrictions on managers; if what is called denominational education is tolerated on mere demand, it will be impossible to continue a system of free Government education in this country, 17502–17507.—If, however, the majority of the empire demand the denominational or any other system of education, we must go with it, 17508–17511.

The concession made to the Presbyterians in 1840 was made avowedly because it was no interference with the principle of united education, and the change of one word alone, "elsewhere," commended the National Board to the Catholic body more than any other, the Presbyterian schools' rule running thus—"No obstruction shall be offered to the children of such parents receiving such instruction *elsewhere* as they may think proper," 17512–17520.

It cannot be admitted that any school, be the patron, the manager, the teachers, the religious instruction given in the school what they may, can be called a denominational school if the children of other denominations are put out while the peculiar religious instruction is imparted; the conscience clause, whatever the precise nature of it may be, hinders the favouring of any one denomination; and the patron and teacher, if they do what they are bound to do, that is, impart the secular instruction paid for by the State, do but carry out honestly the rule of the Board; such a school is not a denominational school, 17521–17530, 17549.—In England such a rule is not applied to State-paid schools; there temptations are put in the way to exclude the minority from the school, and exclusive schools are recognised, which the Government of a country like England is not justified in doing, because, for example, the Jewish religion may be taught, which teaches that our Saviour is an impostor; there is no difference in principle between this and teaching indiscriminately all religions in churches and chapels to older people; the system in Ireland is practically one the Jews could take advantage of, the responsibility of teaching their peculiar tenets being relegated to private individuals, 17531, 17532.

The idea of the original, or, at least, all the elder members of the Board, was that the system should embrace the common principles of Christianity, and a large number of people think so still, and this would exclude the Jews; but inasmuch as any manager is at liberty to submit any books to the Board he may think fit for the education to be given in his school, there is nothing to exclude Jews from receiving instruction under the National Board, which is liberal to the last degree in providing for the reasonable requirements of every citizen irrespective entirely of his religious belief; a Mahommedan or a Hindoo might set up a school and place it under the Board without any violation of his religious opinions, except so far as English literature and learning might interfere with them; this is the secular system, pure and simple, which, so far as regards the action of the State, is what is recognised, paid for, and required, and if people all agreed that such and nothing else were to be had in every public school, would be by no means an evil change, 17533–17546.

A denominational school is one where the patron or manager claims the right to impose any religion on every child irrespective or in despite of its father's wish, or where he may refuse to teach religion altogether, a State-supported school not open as of right to all; no system could be better fitted to keep people permanently estranged from each other; and it would be an unfortunate thing for religion itself if such a system should be practically introduced into this country, 17549–17552.

The very great importance attached by witness to the principle of united education is founded on the rule of Christian morality, "Do unto others as you would they should do unto you;" no one should be permitted to hinder a child from getting any privilege supplied by the State in State-paid institutions; the State does not pay for the religious education given by the teachers; it simply allows such to be given in a school depending for its existence on the aid given by the State; but it says it wont allow secular instruction, for which alone it pays, to be shut out from any child by any rule of a local patron; the action of the State with regard to religious teaching is in reality negative to both majorities and minorities; the principle advocated is the only one that can be considered fair in a country like this, regarding reasonably the rights of conscience; and the Government, as father to its children, has to con-

sider what it does for them, and must take care that the benefits it professes to afford to all shall not be withheld from any, because some persons say they have a conscientious feeling about teaching religion to every child in attendance, 17556–17575.

The influence from association of a majority of school children on the religion of a small minority is not so potent as is supposed, 17576.

The system at work in England, where in Roman Catholic schools the Inspector makes no inquiries whatever as to the religious instruction given, would not be submitted to here, so it is alleged, though nothing is asked from them but to adopt what is virtually a conscience clause; if the non-vested system amounts to this, as it is understood it does, and if that is the system in England, they have the same here, 17577–17582.

The Ten Commandments and the general lesson on love being hung up in most of the National schools, a child can be corrected in things contrary to moral law during school hours without any reference to distinctive religious tenets; if as much zeal and talent were used in such teaching as is used in disagreeing, an enormous amount of civilization, both civil and religious, would be spread abroad in Ireland, 17583–17588. David Ross, esq.

The history of the Redemption, as brought before us in the Old Testament Scriptures, may be to some extent set out in the books of the National Board, 17585; this does not constitute religious teaching, being merely historical; the minority of even one in a million, and he a non-Christian, if by that term is meant an infidel, has no right to be taught anything but combined literary and moral instruction, and moral law embodies what is common to all; but in every case of objection a line must be drawn between what is reasonable and what is unreasonable; an objection is not to be admitted merely because it is made, 17594–17608.

It was never clearly brought out in the rules of Board until the application in 1840, that people had a right to exclude other clergy or persons from giving religious instruction in the schools; there is a distinct reference in the rules of 1842 to the right of children not of the religion of the patron to an opportunity for religious instruction "elsewhere," 17589–17593.

Rudkin, William Henry, Esq.

W. H. Rudkin esq.

Is sole Inspector of Erasmus Smith's schools, and was principal of a large private school, 13487–13490, 13589, 13590, 13981.

Each school is inspected twice a year; on one occasion notice of the inspection is given to the superintendents and teachers, on the other the schools are visited unexpectedly. Every child is subject to examination, the youngest as well as the oldest, 13491, 13508, 13527, 13528, 13602, 13603.—Mode of keeping attendance rolls, 13492.—Accuracy of them is satisfactory, 13600, 13601.—In the majority of the schools the children pay a school fee, generally about a penny a week; there is a difficulty in enforcing continuous attendance, which cannot be surmounted so long as the people are poor, 13493–13495.—Division of schools into classes, 13496.—Children are promoted from one class to another according to their proficiency on inspection, 13498–13500.

Books of the Christian Knowledge Society are generally used; in a large number of schools the National books are in use, which are well adapted for education, 13947.—The Governors pay half the cost of the books and the children the other half, the books then becoming the property of the scholars, 13548.—The clergy as a rule attend the schools very regularly; there is great benefit from their visits, 13501, 13502, 13549–13552, 13561–13563.—Governors withdraw grants from schools where the attendance declines, 13503.

A large number of masters have been dismissed during the last nine years for inefficiency; efficiency of masters has increased during that period, 13504, 13506, 13511.—Several of the best teachers have been trained by the National Board, some by the Church Education Society; some of the best have not been trained, 13507.—Erasmus Smith's schools will bear comparison with any other English schools of the same class, 13509, 13510.

The Bible is not allowed to be used as a book for teaching reading, but every child that can read fluently must read the Scriptures; any exposition involving controversial or abstruse matter is absolutely excluded, the examination in Scripture being confined to the plain text. No question would be put to a Roman Catholic child which would be in any way offensive to him. Never heard any complaints from parents of Roman Catholic children as to matters connected with religion, 13512–13520, 13524–13526, 13530–13535, 13564–13570.—None but members of the Established Church are required to learn the catechism, 13523, 13529.—Number of children of each sect attending schools is returned to the governors, 13521, 13522.—Roman Catholic children answer in Scripture better than Protestant; probably the Bible being in some degree a new book to the former may account for this, 13536–13539, 13586–13588.

Children who distinguish themselves have opportunities of going to the various branches of the Incorporated Society and to other institutions, 13540–13545.—Examination of candidate teachers, 13546–13548.

About £25 per annum, with £5 gratuity, is the fixed salary for teachers, and the Governors always expect an additional sum to be made up from local sources; the teacher also has what he can get from the pupils; some of the schools have a dwelling-house and three acres of land attached, 13553–13577.—Governors give a premium of a pound's worth of books to a certain number of the best teachers, 13559, 13560.—Agricultural instruction is not given in the schools, 13558.

About five years ago a case occurred at Eglinton, county Derry, where the Roman Catholic clergymen withdrew most of the Catholic children, and sent them to the National school; however, after an interview with witness, and visiting the school, he allowed them to return, 13571–13583.—Roman Catholic families do not object to send their children to Erasmus Smith's schools, 13585.

Expenses of inspection of Erasmus Smith's schools are paid out of the funds of that Board, 13591–13593.—The inspection of these schools and those of National Board and of Church Education Society could not be combined in one officer, 13594–13598.—Out of the 150 schools not half a dozen were badly supplied with requisites, 13604–13607.—One of the great difficulties to contend with is the procuring efficient teachers; in about 47 schools paid monitors are employed, one-half the salaries being paid by the Governors and the other by the local patron, 13608–13610.

Further Examination.

Is desirous of making a few alterations and additions to his previous evidence, 13968–13969.

Several children from Erasmus Smith's schools at the last examination were admitted to the Incorporated Society's Institution at Dundalk. The system introduced by witness for teaching spelling, writing, and reading has been the cause of the rapid progress made by the children in these subjects; principles of the system, 13970.

With regard to the statement in answer to question 13572, as to the school at Eglinton, he wishes to add that the priest attended the inspection on the following day, and heard the examination in secular subjects, and, witness believes, also in the Scriptures. The

W. H. Rudkin, esq.

Roman Catholic children "gradually" returned after that; the number of Catholic children attending the school have always exceeded that of Protestants, 13970.—Instance of the general confidence that there is no tampering with the religion of Roman Catholic children in Erasmus Smith's schools, 13970, 13971.

Presumably, the parents are aware of the rule forbidding the introduction of controversial subjects in the school teaching, and that the Scriptures are read and expounded; if children object to questions in Scripture, they are of an age to state the objections to the master, who would bring it before the inspector, 13972–13978.—Grammar schools are not inspected, 13982.—Erasmus Smith's school in Galway was given up in consequence of the small attendance, 13983–13996.—The school at Enniskillen, which has only been under the Governors during the last two years, had 74 in attendance at the last inspection; special circumstances probably caused the attendance to be smaller when visited by members of the Commission; to take a day at random is not the right way to ascertain the general attendance of the children, 13997–14009–14018.—It is the duty of the inpector to insist on the application of the money granted being applied in obtaining school requisites if wanted, 14009.—The school at Lurgan is a well managed school; the children are mostly very young, and attend for a short time only, from facilities of obtaining employment in the factories, 14010, 14011–14015.—Subjects taught in Erasmus Smith's schools, 14011–14013.—The school in Brunswick-street, Dublin, and that at Bandon, are very good schools, 14014.—Enniscorthy school is a good one—of the second class, 14020–14021.

The number of schools in connexion with Erasmus Smith's Board is 150; cannot say how many were founded before 1839, nor whether the leases at that time contained provisions as to teaching the Church catechism on Sundays; there are no Sunday schools in connexion with the Board, 14022–14029.—The schools under the Governors are not connected with any other societies, nor are they inspected by officers other than those of the Board, 14030–14033, 14038, 14039.—Governors apply their surplus funds in aiding schools already existing, 14034–14037.

The average salaries of the teachers is good, but many are underpaid; the average is about £44 a year, generally with a house, and in some cases two or three acres of land, 14040–14042, 14052–14054.—As a body the teachers are satisfied with their condition, 14053.—Governors occasionally grant pensions, but there is no rule, 14044.—Managers have no power to dismiss teachers except in cases of gross immorality or misconduct; no inconvenience has arisen from want of the power, 14045–14049.—The office of superintendent is distinctly recognized by the rules of the Board, 14050–14051.

Sheehy, Edward, Esq.

Edward Sheehy, esq.

Is first-class District Inspector of North Dublin under National Board; was for three years assistant to professors in training department (scientific) at Marlborough-street; subjects handled during this time, 26246–26253.—Attention of those in training should be mainly directed to practice of teaching; used to teach it there; criticised defects, and had class criticise one another; never found this give annoyance, 26254–26265.—Had supervision whilst they were teaching classes, saw that they attended to evening studies and that they kept time evening and morning, 26266–26272.—Thinks Marlborough-street institution is better under two heads, 26273–26275.—Young men should pass a strict examination and be better prepared before coming up, and then be mainly occupied in practice of teaching; should remain longer than six months if necessary; as to absence from their schools during this time; should have actual school experience before coming up; this will apply to monitors and pupil-teachers also, 26276–26283.

Had no difficulty with class; desirability of a museum for students; lending library unnecessary; has examined teachers before and after training (but not lately, on account of prohibition of bishops), and did not find them much improved; inspectors, not professors, should examine them for classification; those deserving it could bring a certificate from Marlborough-street to get them a step in promotion; professors could examine for this, if it had no reference to classification; certificate would show that they had been well-conducted, and had made every effort to improve themselves, 26284–26301.—Sixty District Inspectors; these and Head-inspectors should classify teachers after leaving Marlborough-street; as to uniformity in classification; Inspectors examine and send them up for training; examinations are founded on Board's books; Inspectors now can give first class for efficiency and scholarship; professors have sent out incompetent teachers; school work should be the great test; teachers should continue to study; some first-class men get indolent, 26302–26318.—Inspectors must certify efficiency, &c., of schools annually; teacher wishing to improve his classification must have his school thoroughly efficient; school work more important than literary qualification, 26319–26328.

Instance of neglecting school to study for examination; where assistants are employed head master is sometimes neglectful; plan for testing this; thinks description by Mr. M'Creedy in 1850 of great neglect of school work by unpunctuality, waste of time, &c., is not true in the main as regards his own district; believes want of punctuality in the morning is prevalent; attendance book, 26329–26334.—Proposed examination by Inspectors after teacher's return to school on results produced in school, &c.; ample time to study for this without trenching upon school duties; Inspectors are a sufficient check upon one another without professors checking them, 26335–26343.—Believes Inspectors have different standards; should all undergo a course of practical schoolmastership as well as competitive examination; many have been teachers; as to who should train them, 26344–26351.—Is a Roman Catholic; is not aware that some of the questions for examination of Inspectors are from books prohibited by his Church, 26352–26355.

Has frequently complained of incompetency and inefficiency of teachers in present district; in report for 1867 instances a classed female who was "only fit to be a nurse," a classed male very ignorant of geography of Ireland, &c., and states that while many are efficient some who are classed and trained are very incompetent—that it is doubtful whether training establishment has done more harm or good, &c.; teachers in Dublin are poor; return made for Commission embodying preceding is from report for Board on 101 trained and 56 untrained teachers; reads particulars; general result is that there is a greater proportion of the trained teachers bad than of the untrained, 26356–26378.—Map drawing, 26363.—Sometimes calls manager's attention to faults instead of reporting officially; thinks this is more judicious and kind, 26379.—Training institution should be kept on, but greatly improved; laboured to improve it when there, but professors opposed him, 26380–26382.—Teachers should be better prepared before coming; does not condemn training institution; is determined to examine every teacher, trained or untrained, who comes to his district; Dublin schools are some of the worst in Ireland; classifying is one cause; this would not apply to all districts; reason why Dublin especially suffers, 26383–26387.—Is not opposed to training, but classification should be by professors and Inspectors, and according to Inspectors' standard; advantage of Inspectors over professors in acquaintance with efficiency of schools; Inspectors who pass examination are well qualified for classifying teachers; believes Inspectors

consider they are the right parties for this work, 26388–26398.

Central training and practising schools are not under any effective superintendence; should be under Inspectors; pending this, should be examined by professors. Similar schools in England, and others in Ireland, are examined by Inspectors. Weekly reports do not show progress made. Have only been examined once by professors. Board have no means of giving information about their progress; short visits useless for ascertaining condition; Commissioners do not inspect them; witness has frequently examined them; did so on the Queen's visit; has recommended formal inspection, 26399–26417.

Two schools taken into connexion in 1867 established by Sisters of Charity, who give the religious instruction; the teacher of one is the most efficient in the district, and is untrained, 26418–26422.—Manner in which public examinations may be made useful, 26423, 26424.—Examinations for classification are on an uniform system; numbers examined in 1867, and other particulars; others besides those in charge of National schools come, but ordinarily only such as are engaged in teaching under the Board, 26425–26437. —Has examined a few Church Education Society's teachers; found some very inefficient, one very competent; has one now who has never been classed, 26438–26440.—Another instance of incompetency in a trained teacher, 26441, 26442.—Nuns very efficient teachers; one nuns' school produced 29 teachers in a year; from another, monitors became the best teachers under the Board, 26443–26446.—At Cork Model Farm, from divided mastership between literary and agricultural heads, very unpleasant differences arose. Examined pupils on literary subjects three times a year; they did very fairly, 26447–26454.—In Cork model schools about one-fourth were of class usually found in National schools. At Carmichael School, Cork, mixed attendance, but no Roman Catholics; rather high fees, 26455–26466.—Cork and West Dublin model schools being under ban of bishops, teachers from them cannot get schools unless from lay patrons; practically, supply of teachers from model schools is almost cut off, many trained since 1862 are worse off than beggars, 26467–26471.

When at Marlborough-street about three-fourths in training were Roman Catholics; nearly all were real teachers. Of male teachers in general class in 1867, 49 were *bonâ fide* teachers; 10 others had been trained before; second training was not formerly allowed; no reason was assigned, 26472–26477.—During 1867 and 1868 recommended 14 teachers for training, but only 2 came up; others were summoned direct, lest managers might not convey summons to them, but they did not come. Circulars recently sent to Inspectors asking them to recommend pupil-teachers to fill up vacancies in class. [*Copies of these circulars will be found at page* 1176.] Managers complained of teachers being summoned direct, 26477–26484.—Has no teachers receiving money from Science and Art Department. Superiority of teachers trained in convent schools; remain under Board as long as others.

Edward Sheehy, esq.

Summary of results of examination of some of these, 26485–26490.—Few lectures at Marlborough-street in witness's time; subjects of these; there were philosophical instruments, and a physical cabinet. Suggested a museum, and a room was set apart. Professor's lectures are chiefly verbal, 26491–26500.

Head Inspectors draw up programme of questions for annual examination of teachers; teachers in training use "Board's Book on Natural Philosophy." If a correct answer were given outside this book would receive it, 26501–26511.—Museum at Albert Training School, Glasnevin, 26507.—Does not think ordinary schools in Dublin are neglected in order to drive children to central schools; gives reasons, 26512.—Time occupied by monitresses' examinations; they are necessarily away from home one night that all may be examined together, which takes at least two days; never found mischief arise from this; could not be examined at their own schools, 26513–26518.—Bishop denouncing Cork Model School caused more Protestants to come in; this gave it respectable appearance named above; pupil-teachers were of a humbler class; this did not damage their authority; training should take place in same kind of schools they are likely to go to. Has only had experience in three model schools. Better to train pupil-teachers in ordinary schools; they could be made quite competent for central training establishment, 26519–26527.

Was stationed in Cork from 1858 to 1867; Carmichael schools drew pupils away from Presbyterian school; did not know there was a Presbyterian school not under Board. Is surprised to hear that St. Nicholas' Established Church school contained 18 Roman Catholics, which would represent 6 in attendance. Question whether this is a correct inference. Other mixed schools in Cork, 26528–26544.—Knows schools of Spike Island and Haulbowline; pupils are mixed; cannot give proportions; managers were Protestants; are Government schools; no argument from mixed attendance in such a case. Approves of mixed schools, if they have safeguards against proselytism, 26545–26555.—Believes rules of Board properly carried out are a sufficient safeguard against proselytism, but cases do occur; instance in Presbyterian school of Episcopalian children being present during teaching in Westminster Catechism; considers that in absence of parents' certificate, they should have been excluded; question whether this is a correct interpretation of Board's rule; also whether above is strictly Presbyterian teaching, 26556–26568.

Has always reported favourably on convent schools; improvement in female education is largely owing to them, 26569–25573.—Census tables show that increase of females who could read in Cork (where there are two convent schools) between 1841 and 1861 was 7 per cent., and in Dublin 10 per cent. Cannot say anything as to other places named where increase was 13 and 21, and no convent schools; can only speak of parts he is acquainted with. Believes they attract a much greater number of children than ordinary female schools, 26574–26586.

Sheridan, John Edward, Esq.

John Edward Sheridan, esq.

Was appointed Sub-Inspector under National Board (for Clare and Galway) in 1852, District Inspector (Galway and Cork) in 1854, and Head Inspector in 1858; is principally engaged in Cork, Kerry, Tipperary, Limerick, and Waterford, 4731–4736, 5244, 5245.

Principal duties are to visit districts frequently, and to see Inspectors under him as to examinations, appointment of monitors, management, &c.; head quarters at Dublin. Visits districts, and sees Inspectors three or four times a year. Most communications with them are personal, 4737–4743.—Last year visited 370 schools; their progress latterly is marvellous, 4744, 4745.—Proportion of children in higher classes greater now than in any other part of Ireland; attendances also have increased; daily average of those on rolls 60 per cent.; might be further improved; public misapprehension on this point. 74 per cent. in first two books, which is too large a proportion, 4746–4753.

Payment by results desirable; would cause improved teaching, 4754, 4755.—Teacher's salary should not be based entirely on instruction in school; reasons, 4756.—Payment by results would get the children into the higher classes more quickly. In England they are expected to be presented in a higher standard every year, but this is not realized; this would be too strict for Ireland, but principle would do, with modifications, 4757–4760.—Teachers should be paid partly according to proficiency of children, 5121–5123; *see further* 5130–5133.

John Edward Sheridan, esq.

Boys' education in primary schools should be finished by fifteen. Under exceptional circumstances only should a teacher receive payment for boys over fifteen in lower standards, 4761–4764.—Has had no unhappy relations with Inspectors, 4765.—Has seldom detected intentional miscalculations in attendance books. Inspectors' system precludes any general falsification of registers. As a rule, accounts are accurately kept, 4766–4769.

Quarterly payments to teachers satisfactory. Monthly payments unnecessary and impracticable, 4770, 4771.—Might be convenient for the teachers, but impossible; difficulties stated. Could not be done through the Inspectors, 5405–5412.—Witness pays teachers' travelling expenses on the spot. Board gives an imprest for a year, and as soon as district is paid account is sent up. Teachers sign a pay-sheet, 4772–4778.—Teachers are allowed 2½*d.* a mile each way, and 2*s.* a night; this covers outlay, 4779, 4780.

Head Inspectors draw up examination papers; same questions used in the different districts. Chiefs of Inspection seldom make any corrections in them, 4781–4785.

Teachers are badly paid and discontented, especially the lower class ones. Any efficient teacher of the lowest class should be able to earn mechanics' wages, at least £1 a week, 4786–4792, 4794, 5197–5201.—A slight improvement latterly, 5009, 5010.

At present there is a large number of schools attended by very few pupils; under a system of payment by results this could not be, 4793.—Many efficient teachers in the third class, 4795.—Supply of male teachers is getting deficient. Conditions of promotion. Increase of salary in higher classes is a fair inducement to endeavour to rise, 4796–4799.—Best schools as regards attendance and proficiency are in the rural districts, 4800.

Convent schools are now fully as efficient as ordinary National schools, 4801–4803.—Some of them are very extensive, but these are really unions of four or five schools, amalgamated and held in one building; as a rule the Board will only allow a convent to have one school. What in an ordinary school is a class, here becomes practically a school in classes and divisions. This works beneficially in one way, by attracting many who would not otherwise attend, but is on the whole illogical and prejudicial to education. If convents were allowed to open auxiliary schools in crowded districts it would be a better arrangement, 4828–4838.—They are only overcrowded in large towns. In many beside convent schools the allowance of eight square feet per child is not carried out. Even some model schools have been reported for violating this rule, 4839, 4840.—If convent schools were allowed freely in cities they would interfere disadvantageously with lay schools. As between the two, convent schools are to be preferred, as they educate so large a number, but people should have a choice, many preferring the former, 4841, 4842.

Schools of moderate efficiency, and some of the highest order, are conducted both by Sisters of Mercy and Presentation nuns. The latter being cloistered, it might be supposed would be less efficient, but this is not the case, 4843–4845.—As a rule, the only lay teachers in convent schools are those for needlework and paid monitresses, as no others would be paid by Board, 4846, 4847.—Cloistered nuns cannot teach outside the convents. Ursulines and Presentation nuns are cloistered; Sisters of Mercy and Charity are not, 4851–4856.

Convent schools are impatient of competition, and will not permit a rival school if it can be extinguished. In many small towns convent schools are the only ones; co-existent lay schools are to be found, but these are exceptions. They were the first to join the Board, and therefore forestalled lay schools, 4866–4872.—Witness qualifies drift of a report written by him in 1860 as to children who are not attending school because there are none but convent schools, 4873.—Dislike towards them is caused by the restraint, and because the indigent classes attend them and they are gratuitous, 4874, 4875, 5690.—By gratuitous is meant not refusing a pupil who cannot pay; the vast majority do not pay; Presentation nuns cannot take fees; Sisters of Mercy do; accounts are kept with substantial accuracy, though small sums may be sometimes forgotten, as they may in other schools, 5691–5703.

Witness states from his own knowledge that many Catholic children prefer not to attend convent or monastic schools, 5436, 5437.—Restraints which cause dislike; same in model schools, except as to religious duties, 5688, 5689.

Explanatory statement as to places where no lay schools co-exist with convent schools, but female National schools only were meant; of course there are private schools, 4876–4879.—There were forty-two convent schools in witness's late circuit, 5026.—Parish priest is generally manager; he cannot appoint or remove teachers; nuns generally appoint him, 5215, 5216.

Nuns vary greatly in their capacity as teachers, but Board admit all as such without examination; examination unnecessary, 5217–5221; 5716–5724. In England, at least one member of a community must be certificated, but they do not approve of it, 5725.—Reasons for this opinion. Christian Brothers in France do not object to an examination. English examination conducted in writing; same might be done here. If a certificated teacher were required in every convent, means could be found of having one, 5809–5817.

The report referred to pointed out serious defects in convent schools, being written specially for their improvement; similar defects could have been shown to exist in other schools, but they were not in question. Defects referred to were chiefly impatience of competition, and inadequate accommodation and teaching power, producing extremely slow progress, and leaving school before completing course. Now, accommodation is increased, and teaching power is at least equal to other schools, 4880–4886.—The great majority here, and in England and America, leave school too early, 4887, 4888.

Many teachers of superior qualifications in convent schools, though a few years ago they were deficient in improved methods of teaching and organization; in this there has been great improvement; progress of children not satisfactory, but not inferior to that in other schools, 5038–5048.—Junior classes are as well attended as senior. Progress in higher classes more rapid than in lower. Fully equal now to National schools. Few scholars reach highest class in any schools. Better education to be had than in ordinary schools, 5049–5056.—Comparisons between convent, National, and ordinary schools; as between them, convent schools preferable, but they should co-exist. Convent schools are generally in towns. Attendance at model schools more regular than at convent schools, and at the latter more than at National schools. Convent schools the most useful in connexion with the Board, 5057–5068.—Literary classification of pupils lower than in first or second class schools; amount of teaching power paid by the Board not larger than in other schools, but considerable extra help provided by nuns, ladies, &c., 5069–5075.—Nuns not being trained should be paid by results rather than by capitation, 5321.

Explanation of observations as to difference between cloistered nuns and non-cloistered nuns. Persons who devote themselves entirely to education likely to be most efficient. The National school under the Ursulines is only of moderate efficiency, but this is well accounted for, 5470–5478.

In Kenmare, prior to convent school, there was one National school, conducted by a very skilful teacher, with under 100 scholars; in present convent school there are 400; the instruction is of the highest order; the nuns are cloistered; education of the poor is more likely to be successful in hands of educated persons than teachers drawn from an inferior class, 5479–5487.

Children of the better class attend some convent schools, though others are exclusively for the poor; persons able, but not paying school-fees, would give a subscription, 5704–5709.—Unlikely that a Protestant with £200 a year would take his children from a

model school, to save a few shillings a quarter, and send them to a convent school, 5710.—Nuns, as well as other teachers, receive a gratuity for instructing monitors; do not charge monitors for instruction given, 5711, 5712.—Money paid by Commissioners is all spent in promoting efficiency of schools, 5713–5715.—Convent schools not considered denominational; Protestants sometimes attend them; rule of Commissioners against any direct internal communication between school and place of worship is observed, as is also rule not to allow children of other denominations to be present during religious teaching, 5726–5736.

Access is as easy to convent as to other schools; doors are sometimes locked to enforce punctuality, 5738–5740.—Children come younger than to National schools; capitation grant does not cause this; reasons for pupils sometimes staying beyond school age, 5742–5746.—In 1866 witness had forty-two under his inspection, 5747.—For inspection, some good and some of a lower standard are chosen, 5751.—Considerable improvement in late years in all schools, including convent schools, 5753.—Average daily attendance at convent schools in 1858, 1859, and 1860, 5780.

Report by witness in 1860 on convent schools suppressed, but subsequently published by order of the House of Commons; in consequence of great misrepresentations of drift of this, he afterwards published an explanation of his views, and now reads it, 5818–5824.

Daily attendance at convent and monastic schools about 50,000, being about one-tenth of the whole attendance of children, and one-fifth of the female attendance, 5635–5638.—Convent schools do not require more supervision than others, 5835–5838.—Special reports by witness, showing that only incidental visits were paid to some, more being unnecessary, as nuns discharge their duties so faithfully, 5839–5845.

No check necessary to prevent overcrowding in convent or monastic more than in other schools; are inspected three times a year, 5868, 5869.—The only schools connected with Board that attempt to obtain situations for their grown-up girls are convent schools; but in any schools, convent or lay, conducted by a good teacher, *grown* children will be found, 5938, 5939.

Monastic schools are inferior, but they teach the very poorest. The majority of those in the southern district are in connexion with Board, 4804, 4805, 4823–4827.—Monks' schools were very early connected with Board; number has not increased, Board having passed a rule not to accept any more, 4848–4850.—No reason for their exclusion from State aid. Commissioners' rules are faithfully observed, and they are as efficient as other schools, 5829.—Christian Brothers do not connect themselves with Government, 4857.—Preference of theirs to lay schools by poorer classes, 5320.

Two monastic National schools in Cork, and two in Kerry. Another was built in Cork at enormous expense on site given by Treasury on condition of its being a National school, and when finished and conditions fulfilled, Board would not have the school, 5413–5416. The amount of education received by pupils in above-named schools is probably lower than in a National school, because a lower class attend, who are more ignorant and difficult to teach, but the instruction imparted is infinitely superior to that in a National school. The same would apply to convent schools, 5417–5435. Numbers of Roman Catholic children dislike monastic and prefer National schools; particulars of one case in Cork, where a new National school was opened near a Christian Brothers', and was rapidly filled by pupils, many of whom came from Christian Brothers', 5436–5459.—In no part of Cork are there sufficient schools; the Christian Brothers are well attended. Another instance, 5460–5469.

Extreme poverty of parents makes them indifferent about education, 4806, 4807.—Diminution of people unable to speak English, as children now habitually use it, though in some parts Irish is still spoken in schools; Board publish no books in Irish, but have no rule against its use in schools; though speaking English, some children have a better knowledge of Irish, 4808–4812.—Children generally like attending school, but quickly discover if a teacher is inefficient, and then become irregular, 4813.—Schools are fully examined at least twice a year, and often visited casually, when Inspector will check accounts, attendance of teachers, &c.; some few are visited ten or twenty times a year; teacher is not previously aware of these visits, 4814–4822.

A large number of the non-vested school-houses, and some of the vested class, are very unsuitable; many formerly vested in trustees are in ruins, and others in a discreditable state, 4859–4863.

Standards adopted by Inspectors were so unequal as to render statistics founded on them almost valueless; this has been to a great extent corrected; an endeavour has been made to establish a common definition of "satisfactory," "fair," &c., 4864, 4865, 5006, 5007.

The needlework teaching has been improved, but there is great room for further amendment, especially in rural schools; it is never likely to be entirely remedied; Board can supply materials for knitting only, 4889, 4890.—In convent and city National schools needlework is well attended to, but not in rural schools; work is taken in only where workmistresses are employed, 5544, 5545.—In rural schools children never bring their own or parents' clothes to be mended; in very few cases have they a second suit, 4891–4893.—Great room for improvement in monitors, 4894, 4895.

Until lately only 18 or 19 per cent. of the National school children have reached the higher classes, giving an attendance of about two years; this is almost useless, as nearly all they have learned is forgotten in a few years; the number now may be 24 per cent., 4896–4900.—Children are too long in passing from class to class; payment by results would correct this, 4901–4903.—System of promotion by Inspector at annual examinations not desirable; reasons; the case of the Church Education schools (where this is done) is different, 4904–4909.

The recent rule of the Board as to promotion to first class of teachers who have not been trained, acts injuriously, 4910–4913.—Schools should consist of not less than thirty-five or more than 140 scholars, 4914–4916, 4970–4972, 5614.

The general opinion of the Inspectors is that managers do not attend sufficiently to their duties; witness is of an entirely different opinion; thinks they exercise very salutary influence and supervision, and do much more than they get credit for; they are not calculated to act as Inspectors; Inspectors' reports do not now pass through Head Inspector's hands before publication; when they did, witness always struck out anything reflecting upon managers, 4917–4920.—Managers who visit often frequently omit to record visit; Inspectors judge by the number of entries they find; instances of managers who visit frequently producing a very salutary effect; some visit every day or two; one named has a conference of teachers every month, 4921–4925.—A statement that managers at Newcastle West seldom visit, and another that managers' visits confer no advantage, are incorrect; they fulfil their duties very fairly; they are not expected to examine pupils, nor is it desirable they should do so; under system of payment by results managers might to some extent be useful in examining in periods between Inspectors' visits, 4926–4930, 5298–5301.—It is a voluntary act of anyone to become a manager, but having done so, he is morally bound to the Board to attend diligently to his duties; duties stated, 5222–5225.

Clergy of all denominations make the best managers; lay managers seldom do more than sign official documents; would be better if laity took more interest in education, but they would not make better managers than clergy, 5604–5608.—It is unreasonable for a landowner who gives a site to expect whole management of school; influence of local gentry could be brought to bear without their having exclusive management. Teachers are generally better under clerical than under lay managers, 5609, 5610.—Clergymen are

John Edward Sheridan, esq.

generally poor, and landlords should keep school-houses in repair, whether they are managers or not, 5611–5613.

National schools tend to displace private schools, 4931.—A Head Inspector should fully visit 200, and incidentally visit 200 more, every year; witness has not quite done this yet, but hopes to accomplish it. Incidental visits of Head Inspector not so valuable as those of District Inspector; the latter would be more serviceable if not so short, 4933–4938.—Primary inspections are for detailed information, secondary for numerical results and general statement. Improvement or the reverse soon results from efficient or non-efficient inspection, 4939–4943.—District Inspectors have not an unnecessary amount of writing to do, or of returns to make out; their chief writing is the reports they prepare, 4944–4948.

Witness's relationship to central office; 4949.—Inspectors often think their complaints are not sufficiently attended to, but perhaps their judgment is partial, 4950.—If payment by results adopted, Inspector would only have to visit each school once a year; he could then pay incidental visits at the rate of fourteen a day; places where this could be done, 4951–4959.

Sometimes grants have been made to opposition schools. Never knew convent schools taken into connexion for the sake of getting children from other schools, 4960–4965.—Commissioners should not refuse to aid any school fulfilling required conditions, 4966–4969.

Schools were vested in trustees until Commissioners were incorporated; managers are disinclined to vest schools in Commissioners; good results anticipated not always realised. Suggested conditions giving control to Commissioners never yet acted on, 4973–4984.—Schools are built by contractors and repaired by Board of Works, but the latter are very inattentive. Local parties sometimes pay part of their third in labour. Cases have occurred where contractor has agreed with local parties to do the work for the Board's two-thirds, 4985–4991, 4997.—Buildings are generally good, but expensive; some of the vested school-houses are damp; difficult to make trustees keep them in repair; all should be repaired by public funds, 4992–4996.—Undue delay of Board of Works in effecting repairs, 5542, 5543.—Rule as to whitewashing non-vested schools not always observed, 4998, 4999.

Number of vested schools in Kerry has increased enormously since 1860, 5000–5003.—State of education in Munster better than in any other part of Ireland, 5004, 5005.—Many imperfectly qualified teachers admitted latterly, 5008.—Residences for teachers very desirable; should be near, but not in juxtaposition to schools, 5011–5013.—Too many grades of teachers at present, 5014.—A teacher single-handed cannot efficiently instruct more than thirty-five to forty pupils; none should be admitted who cannot do this; some Inspectors consider they should be able to teach seventy, 5015–5020.

Probationers should only be employed as assistants; various descriptions of them; some are equal to second class teachers. They do not answer very well, but they are strictly dealt with; 5021–5026.—As soon as practicable after appointment they are examined by District Inspector, and if certified efficient, receive payment from time of appointment. If inconvenient to Inspector to examine at once they are paid on manager's recommendation until examined, 5027–5037, 5109.—Further particulars on this point and account of origin of practice, 5358–5363.

Great lack of properly qualified teachers; causes. Many abandon the pursuit, 5076–5080.—507 paid monitors in witness's district, of whom senior class females preponderate; junior monitors not now overworked, 5081–5089.—Owing to rules of Commissioners, paid monitors cannot always be employed where wanted, 5090, 5091.—Monitorial system most valuable for promoting efficiency of schools and rearing up teachers; their services exceed their cost to the State. As all do not become teachers, there is sometimes an excess in numbers; they are selected by District Inspector, managers having a veto, 5110–5120.—If payment of teachers by results adopted, a plan should be devised by which monitorial system should be left untouched, 5124–5128.

Statistics of monitors; a large increase, especially female, since 1860; first class paid female monitors chiefly in convent National schools, as they can only be in large schools, 5655–5671.—In 971 ordinary National schools in witness's late district, there was only one first class paid monitor, 5672–5675.—Advantages to schools of monitors, 5676–5678.—Reasons why more of the 971 schools named have not availed themselves of monitors; only certain class teachers can have them; many will not undertake such laborious work for the small remuneration, &c., 5679–5684.—In a few schools, Commissioners have sanctioned more monitors than required for teaching, so as to rear up assistants, 5685–5687.

Number of mixed schools has somewhat decreased in witness's district since 1860. National education is administered so as to fairly protect Protestant minorities, 5092–5100.—Dislike of Protestants to mixed schools under management of Roman Catholics. Wherever possible they get up schools for themselves in preference. Whatever united education exists is to a great extent from acceptance of principle by Roman Catholics. No other system desirable for Ireland, 5101–5108.—If attendance at all the National schools were restricted to sixty, present staff of teachers would not be required, 5109.

Annual examination might be made a fair test of teacher's work by requiring all the children to be present and examined by Inspector at time of annual inspection, 5130–5133.—Securities taken that State shall get an equivalent for its contribution—proper school-houses well supplied, and qualified teachers, 5134, 5135.—Board endeavour that school-houses shall be kept in repair, but some localities are so poor that it cannot be done; non-vested school-houses are fairly kept; State should repair properly vested ones. Those built with public money should be placed under county authorities, who should be bound to keep them in repair; reasons, 5136–5139.—Difficulty in obtaining sites; State should assist. Locality should contribute towards building and working school, but a rate-in-aid would not be just. Landed proprietors should be made to take a greater interest than they do in education. On the whole, education should be provided for out of Consolidated Fund, 5140–5145.

There is nothing to prevent persons trained at the public expense from leaving the service; not many leave, 5146.—Large number of adventure schools in Cork for children which the National system does not reach, 5148–5151.—All parents able should be made to pay something, 5152, 5153.—Few night schools in Ireland, 5154.

There are very few schools where children do not all get efficient religious instruction in their own denomination. Generally, the minority do not get it in the school, but it is provided elsewhere, 5155–5160.—Few complaints of disregard of Board's rules as to religious instruction; particulars of one, a very trivial case, 5161–5163.—One more serious recently investigated, where proselytizing has been shown to be carried on; no doubt the Board will refuse further aid, 5164–5168.—By present rules of Board managers of non-vested schools can prevent religious instruction being given; under Lord Stanley's letter parish clergymen could enter any school, 5309–5316.

Children who attend schools aided by State are mostly of the poorer classes; some attend whose parents could pay; any may attend. Poorer classes so predominate that it would not be worth while to make a limit, 5169–5174.—Convent schools teach more subjects than National schools; model schools give a first-class English education at expense of State, 5175–5179.—Advantage or otherwise of teaching children what they are likely to forget, 5180–5185.—Any National system should give an education that will enable poor, talented children to rise above their original position; it benefits the State as well as the individual, 5186, 5187, 5499, 5570–5576, 5859.—

Danger to State in allowing talented children to remain uncultivated, 5857, 5858.

Children cannot now get through the course of instruction in the first class in less than two years, as the First Lesson Book is much longer than it was. Nothing in first class can be called a higher subject, 5188–5196.—Position of a teacher as compared with that of a skilled mechanic; the former is assisted by the State, the latter is not. Including preparing lessons, the teacher has to work as many hours as the mechanic, and often in great discomfort, 5197–5203.—School hours are usually from ten to half-past three or four, 5204–5208.—Inspector's incidental visits are made any time between 9·30 and four, 5209–5211. Number present must be marked on the rolls by twelve o'clock, 5212–5214.

Conditions under which Inspectors sometimes recommend grants in cases where school-houses do not quite meet Commissioners' requirements; *e.g.* many do not come up to ideal of what they should be, yet they may be suitable to locality and its means, and the Inspector is not precluded from recommending grant, 5226–5234.—A very small per-centage of children attending schools in South of Ireland where managers and teachers are of a different religion from them, 5235–5237.—Not practicable to board minority children in schools of their own religion away from home, 5238, 5239.—A minority of three in a parish has as much right to its share of State education, and to have its wishes consulted, as the majority of 3,000, 5240–5243.

Above 1,000 schools in witness's late district; visited 280 some years, and 370 last year; visited some three times, but others not once; his function was to visit casually here and there, and see that District Inspectors did their duty, 5245–5252.—Accommodation in school buildings fairly sufficient. The larger number are non-vested; these are built without State aid. A chief reason of majority being non-vested is the difficulty of procuring sites; State will not grant money for building unless secured for a number of years rent free, &c.; on the whole, State conditions are satisfactory, 5253–5259.—Vested schools are usually built according to plans of Board of Works; these are generally unsatisfactory, and can only be set aside by vigorous protest. Non-vested school-buildings seldom as good as vested, 5260-5266.—Boys and girls should have separate rooms, if more than forty; this would add materially to the expense, 5267–5274.

Southern district is chiefly Roman Catholic, but where there is a fair Protestant population they establish a school in connexion with Board. Very few Roman Catholics found in Protestant schools, and *vice versâ*. Where there is a rector a Protestant school is usually found, but people rather prefer National schools; they are consequently small, and small schools are rarely efficient, 5275-5283.—Both religions are seldom taught in schools; an exception quoted, 5284.—What constitutes a mixed school; religion in non-vested schools, 5285–5288.

In paying by results teachers should not be paid for mere regular attendance of children, 5289–5291.—Same pupil should not be paid for twice in same standard, but failing one year he should be allowed to try again the following year in same standard. The objection to fixing a period for preparation of pupils, and not allowing anything if they failed to pass is that sufficient time must be allowed for the dull ones, which would be unjust to the more intelligent; if time only sufficient for latter the former would never pass, 5292–5297.

Most National schoolmasters get some payment from pupils; many pay irregularly, many pay nothing; amount varies from £5 to £30 a year. Town schools are the worst paying, 5302–5308.—Payments throughout the country are slightly increasing, 5531, 5532.

Difficulties in procuring sites; proprietors might be bound to provide one, on proper payment, 5317,5318. Difficulties often arise from dislike or indifference of landowners, occasionally from limited interest in property; some do not like the close investigation of title which Commissioners deem necessary; some would grant sites if they could have appointment and dismissal of teachers, but local clergy would not accept on these terms, as it would give the direction of the education to gentlemen of a different religion from the majority, 5560–5563, 5602-5604.—Additional legislative facilities needed, 5564. John Edward Sheridan, esq.

Children's names are always struck off after an absence of thirteen weeks, but teacher often knows in a much less time that child has left, and will then at once take the name off; in consulting statistics, therefore, no very large per-centage need be allowed for children who appear on the rolls but have left, though in returns for 1865 a difference of 165,514 appears between numbers and rolls and those in attendance, 5322–5339.—By returns, 64 per cent. only appear to have reached the First and Second Book, but there is a larger proportion in the advanced classes now than in 1852, and under the new programme the education is more efficient, both in respect to teachers and pupils, 5339–5349.—Very few trained teachers leave the service, 5350–5353.—Not a very large per-centage of paid monitors follow up the occupation of teaching—many are without sufficient aptitude, many obtain situations as clerks, &c., 5354-5357.

Code of instructions for Inspectors does not contain all the rules laid down by Commissioners; many minor points are communicated to Inspectors by circular, 5363–5372.—Inspectors have never refused to carry out instructions; they have protested against a rule; Commissioners leave them full liberty to represent inexpediency of carrying out a rule, and are always ready to listen to their representations, 5373–5380.—The great majority of present Inspectors are well able to estimate teachers' qualifications; no complaints from teachers prevented from going in for higher classification from Inspector's want of qualification, 5381–5383.

Obstacles to teachers are very great, and not sufficiently felt by Inspectors or public; irregular attendance and imperfect acquaintance of children with English; little encouragement given by those above them, &c.; it would conduce much to the success of education if gentry took an interest in it, 5384–5388.—Premiums only given to pupils in model schools, 5389.—Want of fuel is much felt, but schools are generally more comfortable than children's homes; they should be as comfortable as possible, 5389–5394.—Many teachers are fined and depressed, but not by witness's recommendation—disapproves the principle; it is not done so much as formerly; practice of Board in the matter is in accordance with Lord Stanley's letter, 5395–5404.

Inspectors' inquiries are not ordinarily public, 5488–5490; model schools are attended by children of all classes; that at Clonmel has now a small attendance, but in its palmy days all classes were represented in it; attendance at Cork model school, 5491–5496; great want of middle schools throughout Ireland; 5497, 5498; as to teaching classics in National schools, 5499–5501.

Patrons vest now more freely than formerly; chief obstacle to vesting is difficulty of obtaining sites under Commissioners' new rule, but rule not unpopular; one whole district without schools because two proprietors will not grant sites; other causes besides difficulties as to sites operating against vesting schools, 5504–5514.—Vested schools in ruins; one quoted was in operation when Catholic Archbishop denounced them; children were withdrawn, and the place is now in ruins, 5515–5517.—The great majority are now vested in trustees; when vested exclusively in Board it greatly prevented extension; Board never take measures for getting sites; landed proprietors were more ready to give sites when schools were vested in Commissioners; foregoing does not prove that chief obstacle to vesting is relations between the Board and the public, 5518–5530.

Model schools have driven out many of the better class private schools. Facilities for classical instruction have disappeared since introduction of National system,

John Edward Sheridan, esq.

5533–5535.—Children who leave while in the lower classes soon lose their grammar, 5536, 5537.—A few instances of undue multiplication of schools; if Church Education Society joined Board there would probably be an increase of small schools, 5338–5540.

If payments by results adopted, examinations more than once a year desirable, but not feasible, 5541.—Teachers only should be responsible for results, not monitors, 5557.—Payments to monitors do not afford a maintenance, 5558.—Examinations would show whether teacher devoted sufficient attention to instruction of monitors, 5559.

Many workhouse schools are insufficiently supplied with teaching power; some of the teachers are very inefficient. Those in large towns generally have trained teachers, 5546–5549.—All National school teachers (workhouse included) should receive salary from Board. Inspections by Poor Law Inspectors inferior to those by Board's Inspectors. Inspectors complain of guardians, 5550–5556.

No State provision higher than National schools for children of parents who can afford to pay well; it is an advantage to the poorer children for such to attend. For advanced children of middle class there are Trinity Colleges, Queen's Colleges, and Maynooth, 5567–5569.—In order to give clever poor children a chance of raising themselves instruction should not be confined to reading, writing, and arithmetic. Instances of several who have risen to good positions through education received at National schools, which otherwise they could not have attained, 5570–5576.

Schools on Erasmus Smith's foundation would not satisfy requirements of Protestant minorities in the south, 5577–5580.—Protestant children may occasionally be found in schools managed by Roman Catholics where there are Protestant schools near at hand; instances of Roman Catholic minorities, 5581–5586.—One case in the south of Protestant children receiving Catholic instruction, 5825.—In many cases Roman Catholics have been got to receive Protestant instruction. This is remedied now, but it brought great unpopularity on the system, 5825–5827.

Second class teachers at present equal to first class teachers in 1848, when system of examination introduced, 5587.—Poor not excluded from model schools to make room for rich; latter are not sent to save expense, but for the superior education, 5588–5591.

Great fluctuation of attendance in workhouse schools; relative proportion in printed tables does not, therefore, give fair idea of attendance; names are kept thirteen weeks on rolls; should be struck off as soon as parties leave the house. In ordinary schools name is struck off as soon as teacher is satisfied that child has left; reason of the thirteen weeks' rule in ordinary schools, 5592–5601.

In Irish National schools the daily average attendance is forty-nine; in 15 per cent. of schools in county Cork only thirty-five, 5615, 5616, 5830.—Commissioners have sometimes made grants for distinct schools for sectarian minorities; one instance where this has occasioned bad feeling, 5617–5620.—Mixed education has been somewhat neutralized by Protestant children not attending schools managed by Catholics, and *vice versâ*, 5621–5625.

Instance of Catholic priest entering a school and insisting on seeing rolls, in order to prevent children attending. Witness still adheres to his statement that "whatever of united education exists in Ireland exists mainly in consequence of acceptance of principle of united education by the Catholics;" reasons, 5626–5634.—When Protestant minorities have not children enough to obtain a grant for a separate school they will use the National school, 5635, 5636.—Case very unusual of a Presbyterian appointing a Catholic teacher where Catholic children were a very small minority, 5639, 5640.—Handsome Presbyterian schools in Cork, the gift of one private gentleman; attended by all denominations of Protestants; many attend who did not previously attend National schools; no doubt this supplied a real want, as Cork is not even now sufficiently supplied with schools, 5641–5654.—Managers of all denominations observe rule prohibiting presence of children of other denominations during religious teaching, 5737.

Great improvement in all schools in late years. Model schools have improved in instruction given, in proficiency of pupils, and in classification of pupils; not so satisfactory in promotion from class to class; statistics showing preceding, and means taken to obtain them, 5753–5763.—Improvement in attendance at small schools; French and classics are taught in some, and should be in all, but not to the junior classes, 5764–5772.—Attendance most regular in model schools, next in convent schools, and least in ordinary National schools; improvement from 1858 to 1860, 5773, 5774.—Saturdays are reckoned days in model but not in convent schools, 5777, 5778.

Large proportion of Catholics at Dunmanway model school, as the Bishop has not prohibited it; small number at Cork model school, owing to his "unceasing hostility;" reason for the prohibition in one and not in the other; both are conducted on same principles; Bishop is not favourable to model schools, 5781–5797.—Six teachers in Dunmanway school, of whom four are Catholics, besides monitors and pupil teachers; the school was established in 1849. Personal character of teachers has nothing to do with schools being prohibited, 5881–5888.—Superior class of children at the Cork school, as others stepped in when the Catholics were prohibited, but classification rather low; many of these superior children were lamentably deficient when they came, 5889–5897.

Catholic Bishops have desired clergy to visit National schools more frequently; they are conducted on same system and use same books, &c., as model schools, 5798–5804.—Witness adheres to a report made by him in 1860 (quoted) defending model schools from attacks, and explaining their objects, &c.; their beneficial effects on other schools, 5805–5808.

Daily attendance in the various schools, 5830–5836.—Influence of managers over efficiency, &c., of teachers is very salutary, and to some extent meets want of more frequent inspection; still, under payment by results, more than one examination a year would be necessary, 5846–5850.—An efficient Inspector should examine 10,000 children a year; inspection need only ascertain that school is regularly and efficiently conducted, 5851–5855.—Geography is taught to the children of the first-class in the schools, 5856.

Functions of model schools are to afford good training for teachers, good examples for surrounding schools, and opportunities for poor talented children to rise. Desirable that National school teachers should be acquainted with Latin and Greek; reasons; but their most important work is to teach the masses reading, writing, &c., 5859–5865.—Monitors ought to be best trained in model schools. When monitors are examined as probationers, there is not any marked difference between those trained in model schools, and those trained in ordinary schools; but when they come to be examined for second class, those trained in model schools show a superiority over the others, 5866, 5867.

Opposition of Catholic ecclesiastics to Protestant managers; exceptions. They will not admit any teacher trained since 1862; this must have the effect of diminishing efficiency of Catholic teachers, 5869–5877.—It is not true that religious instruction to both denominations is given in training schools by one person and at the same time, 5877–5879.—Very few gentry are managers in west of Ireland, 5880.

Extra subjects in National schools are drawing, vocal music, and physical sciences, 5898.—Training of model school teachers in science; character of books and apparatus employed; desirability or otherwise of professing to teach young children science; they may get an idea of matters such as will give them a taste for following it up in after life, 5899–5923.—Teachers receive instruction in natural history, &c., at Marlborough-street, and in model schools where trained. A teacher cannot be trained in six months, or in two seasons, in scientific subjects referred to, unless he has

had previous instruction. Natural and physical science are taught; a very bad text book is used; it does not agree with lectures given, which is a grievous defect; teachers can consult other books, 5924–5937.

Further Examination.

Explains that, in answer to question 5417, classification, not instruction, was meant to be described as low, 13897.—Fuller explanation as to his suppressed report of 1860 (referred to at question 5819). Being censured by Board for writing to a newspaper, wished to place on record in a more legitimate form his judgment on the merits of convent schools, and therefore inserted in his report for 1864 certain remarks in reference to them. These remarks (given at length), were to the effect that having pointed out in report for 1860 certain defects, he never intended or expected to be understood that they were universal, but that they were incidental to system, and hoped that pointing them out would be a means to their removal, but was astonished and mortified to find that after four years these remarks were brought forward to condemn them as "intolerant, inefficient," &c. Protested that this was grossly misrepresenting him, that there was no class of National schools doing such good service or so well obeying rules of Board, &c., and quoting high opinion of them from a London newspaper, certainly not prejudiced in their favour, who had sent over a special correspondent to visit them. Report was returned with an official letter calling attention to these passages. Believes that had he returned the report unaltered the Board would have published it, but thinking it was their opinion that if published it would raise irritating discussions, wrote another omitting these passages. Has ever since regretted this course, as he has from that time been held up before the public as an enemy to the convent system. Is very glad of present opportunity of publishing what his real opinions were while being grossly misrepresented in Parliament and the public press, 13898.

John Edward Sheridan, esq.

STACK, WILLIAM, esq.

William Stack, esq.

Is Chief Clerk under the Board of Works; duties are wholly in Dublin; has been in office of Board thirty years, 14055–14057.

For purposes of Board the country is divided into six districts, each having a resident clerk of works, whose duty it is, by constant inspection and informing Board, to see that all National school buildings are kept in perfect repair. Accounts are kept distinct from others. Notices of want of repair generally come from National Board; glad to receive these, being a check upon their own officers; do not decline or diminish what is asked for; report completion of new buildings to National Board, but not of repairs, 14058–14062.

Number of schools now in charge of Board is 574; in course of building, 62; some of which have been in progress since 1865, but these are not being built by Board of Works; the latter simply notify local parties that Education Board has granted two-thirds of cost, and send particulars; and there is often delay in raising the other third, 14063–14066.—Contractor for a new school is under control of managers; schools would not be built better or more quickly by Board of Works taking supervision, 14067–14069.—Has heard of schools being built for the two-thirds, and local parties thereby saving their third; but this has been from locally favourable circumstances, gratuitous assistance, &c., of which Board could not have availed themselves had they performed the work, and was therefore quite legitimate, 14070–14073.—Commissioners only get the third where managers ask them to do the work; this is not often done, 14080, 14081.

Fixed estimates of prices for the different classes of schools; chiefly rural prices; home-grown timber allowed to be used in farm offices only, 14074–14079.

Particulars of three unfinished schools commenced in 1865; not being built by Board. Three building by them, in which there has been no delay, 14082–14084, 14109.—Particulars of supervision exercised by Board over schools building by local parties, and of time necessarily occupied by such supervision, 14085–14090.

No repairs, commenced by Board prior to 1868, remain unfinished. Contracts made by Board from January to October, 1868, amount to £5,480; average from £15 to £20; about 200 applications for repairs annually, 14091–14093.—No avoidable delay in making contracts; no cases outstanding from before 1868. Delay is sometimes caused by Education Board not acquainting Board of Works that grant has been made, though they may have informed local parties; sometimes apparent delay is caused by necessary preliminaries, and in the south there has been delay for want of another officer, who is, however, now appointed, 14093–14099.

Board chiefly rely on number of specifications sent up to know whether district clerks are doing their duty. Board undertake to keep everything in order. For small repairs, district clerk can employ a neighbouring tradesman, without waiting for special authority, but must report what he has done; beyond this, he must send a regular specification, that Board may obtain tenders, 14100–14106.

Complaints within the last year of small repairs a long time unattended to; this was in the south, where clerk was overworked and inefficient; now remedied, as named above, 14107, 14108.—He has now a smaller district and an assistant, 14133–14135.

Managers cannot themselves order small repairs; must apply to Dublin,—to National Board or Board of Works. Preceding refers to vested schools, 14109–14117.—Do not take cognizance of schools vested only in trustees without special instructions. Some delay must take place in repairs, as clerks have often so far to travel to reach the spot, but it would not do to allow managers to order them; reasons. County surveyors might perhaps be employed, but they are not always architects, and an architect is required. Resident manager might be intrusted with slight urgent repairs; the time it takes clerk of works to visit such cases is the weak point of the system, 14117–14127.

Windows are frequently broken; this might be prevented if teachers lived nearer. Officers go round their districts at least twice a year, when they report schools badly kept, and attend to complaints, 14128–14131.—Proposition to allow teacher a small sum to keep place in repair, 14136–14138.—Board repair agricultural schools. Cannot account for neglect of some named, where teacher is said to have applied several times. Some delay is unavoidable, as matter must be reported, specifications put out, tenders given, &c., 14139–14144.—Course of proceeding where addition to farm buildings desired, 14145.—Remote schools may sometimes be neglected, but Board are often unfairly blamed. Means for remedying defective arrangements in model schools. Repairs are effected as far as possible during vacation, 14146–14151.

Cannot account for absence of vested schools in Carlow. Do not build schools for less than sixty children. Plans 30 years old are still used; better and less expensive ones lately made are not yet adopted, 14152–14158.—Are always glad to hear from school Inspectors of repairs needed, 14159, 14160.—Responsibility for plans for model schools; list of those built by Board; cost of some; bad drainage at Newry, 14161–14167. Unadvisable to repair National schools at public expense, or to throw small repairs on county officers; the latter should be attended to by local parties, and model schools by Board. Board allow masters of model schools to get certain repairs done by a builder on the spot authorized by themselves, 14168–14176.

Total estimate for National schools last year was £16,546, including £3,500 for building. Board has had charge of model schools since April, 1857. Expenditure since that period will be found in sec. iv., pars. 1 and 2, of returns furnished by National Board, 14177–14187.—A year ago Board sanctioned a plan of

William Stack, esq.

a school for very poor districts, to cost only £100, but none have yet been built, 14188–14192. Delay in supplying Glasnevin model school with gas was caused by Board endeavouring to obtain it from city company instead of manufacturing it themselves, 14193–14204. —Repairs of, say £500, cannot be executed until Parliament passes grant; small ones are done at once. 14206, 14207:—Six clerks of works in all Ireland; more required in districts where delays have arisen. Do not repair military buildings, 14208–14212.

Return (given in) of amount voted by Parliament for last four years; it averages £14,000 a year. Also of number of National schools (103) built by Board, 14213.—Clerks of works should visit districts, note repairs required, and report to Board twice a year; repairs to be executed the next year; something more localized might be more effective, 14214–14216.

List, according to counties, of the 574 National schools in charge for repairs of Board of Works, referred to in answer to Q. 14064; (A.) *page* 611.

List of National school-houses for which grants have been made, and which are either in course of construction, or the necessary plans not yet issued, but in preparation; referred to in answer to Q. 14065; (B.) *page* 611.

Schedule of extended grants for ordinary school-houses, dated December 13, 1858; referred to in answer to Q. 14074; (C.) *page* 612.

Conditions on which Board of National Education will make grants in aid of building school-houses in poor localities, at total cost of £100; referred to in answer to Q. 14188; (D.) *page* 612.

List of National school-houses for which grants were made by the Board of National Education, and notified to Board of works since July 1857, and which have been built by the latter, or the manager under their direction; referred to in answer to Q. 14213; (E.) *page* 612.

List of Parliamentary votes for National schools 1865–6, 1866–7, 1867–8, 1868–9; referred to in answer to Q. 14213; (F.) *page* 613.

Thorp, Eustace, Esq.

Eustace Thorp, esq.

Is registrar of Erasmus Smith's schools; his duties; does not inspect; pays the schoolmasters; the schools were founded in the reign of Charles II.; up to May, 1868, the number of schools was 146, two have been since withdrawn; in 1809–12 there were only three or four English schools, they were augmented between that time and 1820; the Governors take a conveyance of land from landowners, and contribute three-fourths and sometimes all of the amount of building the premises; the Governors are connected by ownership of property with about 70 of the schools; there are very few schools which the Governors hold as their own, 12688–12700.

Since the report of the Endowed Schools (Ireland) Commission, there has been a separate Inspector, Mr. W. H. Rudkin, 12701, 12702.—Previously the offices of Registrar and Inspector were united, 12848.

The rules enforce the reading of the Bible, with an explanation in plain language, not entering into controversial or abstruse matters; there is no connexion with any other society; the teachers must be members of the Established Church; Roman Catholic children attend the schools, who must abide by the rules; their numbers are low; National schools affect the attendance at our schools, 12703–12714.—Notwithstanding appearances no case of proselytism has ever been established or attempted, 12715–12719.—In most cases repairs are defrayed one-half by the governors and one-half from local sources, 12720.—There is no training establishment; many of the masters come from the Church Education schools; the patron has the right of nomination, 12722, 12723.—Statement of the rules and principles upon which salaries and allowances to schoolmasters and mistresses are made; the amounts paid to schools at Lombard-street, Bandon, Sligo, Enniscorthy, Derry, Newtownards, and Galway; the latter is a classical and very successful school; the English school there failed; the children of tenants on the estate are entitled to free education in the Galway school, 12724–12749.—No other provision is made for the education of these children, 12802–12804.

Is not aware that the original grant of Erasmus Smith to trustees was in the time of the Protectorate, or that the original indenture is now in Dublin Castle; according to this indenture the classical languages were meant to form part of the teaching in all the schools, 12750–12758.

The rules require the reading of the Bible and teaching the catechism of the Church of England; all the children must read the Bible, but those of other denominations may withdraw from the catechism, 12759–12766.—The original rule that Archbishop Usher's catechism should be used, is not enforced, 12767–12770.—There is no reason to think but that the third rule is carried out distinctly for children of all denominations, 12894–12896.—The rules have been made about forty years, 12832, 12833.

Schoolmasters are appointed during the pleasure of the Governors; with very few exceptions the Governors are satisfied with the efficiency of the schools; the Inspector does not examine the classical schools, their progress is known by the result of exhibitions, &c., 12771–12775, 12849, 12851–12853.

The expenditure under the charity is nearly £9,000 a year; about 4,650 children are in attendance at the schools; items of expenditure stated, 12776–12782.

The Inspector has £500 a year and travelling expenses; he is not allowed to do anything else; his time is fully occupied; visits 146 schools twice annually; has to note the time occupied by each inspection, 12783–12789, 12980.

There is an accumulation in bank of about £20,000, including the price of land sold to railway companies, 12790–12793.

Lands are let on lease at very moderate rents; part of the property in Galway is worth more than it is let for; the leases are for forty-one years, renewable every seven years at a stated fine, 12794–12800.—A large portion of Galway town is built on the Governors' property, 12801.

There are seven *ex-officio* members, the remainder are elected as vacancies occur by the other Governors, except the *ex-officio* members; they are all of the Established Church, 12805–12809.

Very few school-houses have been built since 1838; in building a new school the Governors would not unite with any other body, 12810–12813.

The instruction given in the primary schools comprises reading, writing, arithmetic, catechism, English grammar, geography, and in some very few cases, algebra, geometry, book-keeping, mensuration; the books used are those of the National schools, 12815–12816. There has been a difficulty of late years in obtaining teachers; some in our schools have been trained under the National Board; there is no objection to them, 12819–12821. Retiring allowances are very seldom given, only in peculiar circumstances; it is entirely at the Governors' pleasure; teachers used to remain a long time in the service; there is more shifting of late than there used to be, 12822–12828.

Instance of a school withdrawn and put under the National Board, 12829–12831.

Most likely Roman Catholics or Presbyterians preponderate in almost all the schools. A register is kept of the religion of all scholars, 12834–12836.

Generally there are about sixteen meetings of the Governors per annum; out of thirty-six, the full number, twenty sometimes attend; a standing committee, three for a quorum, do the general business. Certain matters are retained for the general Board. Witness is the only officer of the institution, with an assistant book-keeper; the Chairman is the treasurer. Vacancies on the Board are filled up by the general

Board; witness summons the meetings by direction of the committee, 12837–12845, 12860–12867.

The master may invite inspection of a grammar school, but it is irrespective of the knowledge or order of the Governors; the schools are quite independent of the Education Commissioners of Clare-street, 12849–12855. The whole establishment consists of four grammar schools, and 144 primary schools. £4,500 a year is spent on the English grammar schools and £4,000 on the others, 12856–12859.

The property of the Board in Galway is mostly town property, in other parts of the country mostly rural; some of the tenants do not hold by lease; they are always dealt with in the most liberal manner, 12868–12880.

The number of Roman Catholic children attending the schools is small, and is decreasing. No inquiry is made as to a tenant's religion. About four-fifths of the tenants are Roman Catholics, 12881–12886.

There is no connexion with any other society; some time ago some schools were inspected in apparent connexion with the Church Education Society, but the error was discovered and rectified, 12887, 12888. There is no reason to think that the masters get gratuities from any other society, 12891–12893.

There is no system of promotion from the English schools to the grammar schools; there are no means of keeping up the twenty free pupils in each grammar school provided for by the charter. The masters are anxious to fill up vacancies if pupils could be found, 12899–12902. Eustace Thorp, esq.

Reasons for the closure of the Galway school, 12903–12906.

Thinks a Roman Catholic child may be fairly treated in a school in which he is compelled to read the Protestant version of the Bible daily, 12907–12913.

Return of teachers employed by the Board trained by the Church Education Society, by the National Board in sundry places in England and Ireland, and not trained, 12914–12917, *and foot note.*

Application from the Church Education Society for a contribution to their training establishment, on the ground that the Erasmus Smith schools carried off so large a proportion of their trained teachers, 12918–12923.

The teachers in our schools must be members of the Established Church; it is quite practicable for a teacher of judgment to explain the chapters read in school (according to the rules), without raising a controverted topic, 12927–12934.

Tobias, Rev. James.

Rev. James Tobias.

Has been Secretary of Wesleyan Conference seven years, and is chaplain of Dublin garrison. Wesleyans have primary schools in connexion with Board, and others not so, 22733–22739.—Represents opinions generally of clergy and laity. Does not approve of National system; it was accepted as the best extant, and hoping it would be better. Disapproves specially of tendency to denominationalism to which, perhaps, Commissioners have been driven, and to which constitution of Board tends, 22740–22754, 22794.—State education should be purely secular, managed by a small Government staff with fixed rules. Religion should be excluded during hours of National instruction; Churches should see to that. Believes that in a good system the religious can be altogether severed from the secular element, 22755–22767.—Some Wesleyan schools contain mixture of creeds. Desire for secular education is growing among educated Wesleyans. Understanding upon which society joined Board in 1860. Many poor attend their schools; they are conducted so as not to interfere with belief of pupils, 22768–22781.—Puts in correspondence between Chairman of Education Committee and Board, containing terms on which arrangements were made; will adhere to these as long as Board is true to them, 22782–22787.—Hopes English Wesleyans will give up denominationalism; different position of the body there and here. If secular system adopted, no matter who has charge of school. Clergy should not give secular education, and books should be free from religious bias, 22788–22797.

No objection to religious instruction in school-house at separate times; protection of minority; does not approve of teacher being compelled to have sanction of parent; duty of latter to watch over child, 22798–22802.—Mission schools not under Board; catechism is taught in them; would soon be given up if State established good secular schools, 22803–22807.—Objects to constitution of Board; having various creeds represented on it to watch over particular interests was well intended, but has not succeeded; objects to their being unpaid, as thereby they are uncontrolled. Would have a small Board of paid Government officers; believes these would gain the public confidence; Wesleyans would be satisfied with them. Their creed should not enter into the question, 22808–22822.—National system is more denominational than formerly; does not impede free action in schools, but gives advantage to larger Churches; some changes have been prejudicial. Does not know that Wesleyans have suffered from want of a representative on Board. Number of Wesleyans in Ireland; localities; many are of the poorer classes, 22823–22837.

As to Churches doing their duty if secular system adopted. Would treat others as he would wish to be treated, but not as others might wish. Board have let others do what they would not permit Wesleyans to do. Have not been refused anything, as they have not asked much. Is aware that Government appoint Commissioners, 22838–22848.—Schools are chiefly non-vested under Wesleyan patrons. Meaning of denominationalism. No doubt, Board consider such schools as the Wesleyans' denominational, 22849–22856.—Objects to his own religion being taught in schools; it would be a great gain to all if none were, 22857–22861.—Teachers are principally of their own body; means by which they are trained in model schools and elsewhere, 22862–22869.—In original constitution of Board religious elements were not so nicely balanced as now; this and many other alterations for the worse have been made. A smaller Board seems to have been originally intended; representing Churches on Board is a mistake, especially in the light of the discussions and protests which are believed frequently to occur, 22870–22878.

Letter from witness to Chairman, dated February 23, 1869, justifies opinions expressing disapproval of necessity for teacher having written authority of parent to give religious instruction; corroborating opinion that others were allowed to do what Wesleyans were not; and retracting statement that Board had granted all they had asked, *page* 996.

Very Rev. Laurence Toole.

TOOLE, Very Rev. LAURENCE.

Is connected with the Roman Catholic Diocese of Salford, and is manager of St. Wilfrid's and St. Alphonsus' schools, Manchester, 21170–21173, 21191, 21192.

The number on the books of both schools is 900; average attendance and number presented for examination and passed in 1867; the children are those of the poorest, all paying school-fees, or having the fees paid for them, 21174–21181, 21241–21245.—The teachers in the boys' schools are certificated by the Committee of Council; of the girls' and infants', they are members of a religious community, also certificated, 21182–21187.—School-fees are charged in order to obtain the Council's grants, but a National scheme of education for the poor should be entirely free, 21188–21190.—The Catholic Poor School Committee do not exercise any control over the schools; there are a few Protestant children attending them, and a few Catholic children go to Protestant schools, 21193–21196, 21208–21211. The regulations of the Committee of Council do not interfere with the religious teaching; the Inspectors examine in secular subjects only, 21197, 21198.—No disputes have ever arisen as to interference with religious belief, 21199–21203.—Protestant children are present during religious instruction, but are not required to learn the catechism, 21204–21207.—No active opposition has been made to Catholic parents sending their children to Protestant schools; the prevalent idea (drawn from the National or mixed system) amongst Irish people who are in England is, that so long as there are schools where no direct religious teaching is given, temporal advantage is the only thing to be looked for; this has produced a great stratum of insincerity. True religious teaching should pervade the atmosphere of the school, 21212, 21213.—Witness took part in the discussions on an Educational Bill for Manchester and Salford proposed some years ago; ground of Catholic objections to it, 21215–21217.

Under the old Code the Committee of Council supplemented the salaries of the masters, and paid the pupil-teachers; under the Revised Code, the school is aided by payment for average attendance and upon the number of passes obtained. The system introduced by the Revised Code is certainly preferable; it has had the effect of arousing greater activity in the schools, secures a more regular attendance, and is, financially as well, if not better than the former, 21218–21231.—St. Wilfrid's schools contain a boys', girls', and infants' departments; teaching-staff, 21232–21236.—The headmaster is a man of considerable ability, and of respectability of character besides. Would not like to have teachers from the training schools in Ireland; the unreligious system must have its effect on the masters. The assistant-master is a good example of the usefulness of the English system, 21237–21240, 21313–21327.—The school has been examined by two Inspectors, and the results have been the same in both cases, 21246–21254.—The nuns teach only in St. Wilfrid's and St. Alphonsus' schools; they belong to the same community; the rule of the National Board which compels nuns of one community to teach only in one school is objectionable, 21255–21263.—So long as persons fulfil the conditions required for efficiency, the State has nothing to do with their private religious position, 21264–21271.—Religious instruction in the schools; time-tables, 21272–21277, 21328, and *see* page 946.—Freedom in the choice of books is of great value; it is necessary at times to have a variety of books; the books in use are much better in composition than those of the National Board; from the form of the examination, Inspectors can find no difficulty from non-uniformity of books, 21278–21284.—No form of register is obligatory; so long as the school registers the facts required by the Privy Council, any form of book may be used; to entitle children to be presented for examination, they must make 200 attendances of half a day each, 21285–21295.

The Privy Council system, although efficient and good as regards the schools to which it has extended, does not reach the lowest stratum; the ragged school system is an attempt to supply a defect by evasion of the conditions of the Committee of Council, and relieving heedless parents of the education of their children by throwing the cost upon the State; to remedy this the Committee should extend the means of providing schools in certain localities, and admit teachers of a lower grade, who would not expect such high salaries as certificated teachers, 21296–21302.—In very poor parishes the system may not have entered, 21352.—Teachers from the English training-schools are highly satisfactory, 21303–21306.—Children who pay are more punctual in attendance; in a scheme for gratuitous education attendance should be compulsory. In schools in very poor neighbourhoods sufficient money cannot be got to satisfy the requirements of the Privy Council, thus making their poverty greater, 21307–21312.

Religion pervades the whole teaching in witness's schools; the presence of Protestants is left entirely out of the question, they come of their own voluntary act; course of instruction, 21329–21341.—Estimated proportion of Catholic population of Manchester, 21342–21343.—Education in Manchester is very fair; there is school accommodation for a larger number than attend. The argument that numbers do not go to school because religion is taught, and that the schools are denominational, is most illogical; denominational education in England has been a success, and should be more widely extended, 21344–21347, 21351.—Mr. Vere Foster's reasoning, that the English system is not so popular with Roman Catholics as the National system is in Ireland, is most fallacious, 21350–21383, 21387.

The system under the Revised Code awakens the intelligence and draws out the understanding of the children; they may know a little less of the analysis of sentences or parts of speech, but beyond this there is no other drawback; the dull children, who were previously left behind, must now be worked up to a point. The amount of education which a poor man's child may obtain in 200 half days in a year must necessarily be very small, and much of it may be lost afterwards, but those to whom it is profitable will apply it to further attainments, 21353–21358.—Teachers (except the nuns) in witness's schools do not give direct dogmatic religious instruction; that is imparted by clergymen for an hour daily, 21359–21370.—Nuns in the English schools are upon exactly the same footing as other teachers, 21371–21381.—French system of *la crèche* is very beneficent, 21382.—Children must be six years of age for examination; requirements of Privy Council as to cubic space for each child, 21388–21390.

In England the great bulk of the people are indifferent as to the religious element in education, 21391–21393.—The proposal in the Report of Lord Taunton's Commission, that the religious difficulty might be overcome by defining the rights of the parent on the one hand and of the schoolmaster on the other, would be most disadvantageous, 21394–21396.—The parent, not the State, has the right of prescribing religious instruction for his children; where there is a necessity for a conscience clause the teacher should compel the absence of the child during religious instruction, 21397–21399.—A conscience clause is not required except in cases where professors of any form of religion are so few or so poor that they cannot provide for themselves; where required, it should be incumbent on the teacher to exempt the child from direct religious instruction, 21400–21402, 21414–21425.—Witness did not object to admit the Assistant Commissioner under the Duke of Newcastle's Commission to inspect his schools, 21403–21413.—It is the duty of the State not to interfere with religion, but to protect children of parents of various religions from indirect religious teaching is impossible, 21426.—There is a difficulty so far as indirect religious teaching is concerned from the school-books, but there is no way of remedying it without doing injury to the greater number; in Rhenish Prussia, for instance, the great majority of the population are Catholics, the schools are under Catholic

management and Catholic teachers, but Protestants are exempt by law from religious teaching; the same thing exists in Protestant Prussia; religion should not be shut out from the majority for sake of the minority, 21427–21429, 21477, 21478.

There is no conscience clause applied in England, except to the Established Church; it would be advisable to adopt one in a great National system; a system of united education is objectionable, as there can be no principle to protect fairly religious denominations, 21430–21436, 21469–21470.—In workhouse schools the conscience clause is really in existence; the books there are impregnated with Protestant doctrines, and the Catholic children are in danger of proselytism, 21437–21440.—The consequence of mixed education is indifference to religious doctrine and religious dogma; it underrates the basis of all religion. Indifferentism will be produced by setting apart portions of the week for secular teaching only, and others for religious instruction, 21441–21442.

Salaries of teachers are paid by the managers; the amount obtained from the Privy Council depends upon the examination results; if the amount produced by examination falls short the teacher does not suffer, but if the result is bad the teacher is discharged; the Committee of Council require a certain teaching staff, and a room of certain dimensions. In schools taught by nuns the mode of payment is the same; the Council recognise the nuns simply as teachers, 21443–21453.—Book grants are not now allowed, 21454.—The religious practices in witness's schools are the same as in the Catholic colleges; Protestant children do not join in making the sign of the cross, 21455–21457.

Conditions on which building grants are made by the Privy Council, 21458–21464.—Perfect religious freedom is enjoyed in the schools; the Council have no fixed rules as to religious instruction, nor do the Inspectors make any inquiries upon the subject, 21465–21468.—With regard to the argument, that religious instruction is the parent's duty—in the case of the poor, the daily employments so much engross their cares that it is impossible for the parents to give what is required; the wealthier classes do not depend upon the school for religious teaching, and yet they are unwilling to subject their children to the mixed system; the passions of the poor child are the same as of the rich one—the temptations greater: the devotion of half an hour a day is not sufficient to govern and direct them, 21469–21472.—It is not desirable to separate dogmatic religious teaching from moral teaching, 21473.

In a system of National free education the same line of demarcation between those who can and who cannot pay should be drawn as at present; those who can pay ninepence a week can easily provide a school—not so in the case of those who can pay only a penny; to assist the latter there should be a national rate, 21474–21476, 21530–21535.—Education of priests as to school matters is very desirable, 21479–21480.—A uniform set of books is a great disadvantage; it is the most effective way of limiting the intellect and of preventing improvement in the methods of teaching, 21481–21485.—The National Board's books are dry and uninteresting, and, as a rule, are above the intellectual status of children eleven years of age, 21485–21490.—Under the Revised Code every child, on leaving school, can read, according to the standard he is in, 21492–21496.

The circumstances of Irish and English Catholics are so different that no comparisons can be drawn as to average attendance; the number of schools in England is constantly on the increase, 21497–21507.—Catholic schools in England are open to inspection by Roman Catholic Inspectors appointed by the Privy Council, and approved by the bishop; denominational Inspectors are necessary for Catholic interests—they are more strict, and show less mercy than other officers of the same class, 21510–21526.—The Christian Brothers will not submit to examination, consequently cannot be very extensively employed in England; there is a Belgian Brotherhood, some of whom have lately taken certificates, 21527–21529.—Examination of nuns and members of religious orders could be done very satisfactorily; it would be easy to obtain a dispensation for assembling a number of each religious order for examination, as in England, 21540–21548. Very Rev. Laurence Toole.

Payment by results does not lead to cramming; nothing but constant training and hard work can make the children up for it, 21536–21539.—Schoolmasters are satisfied with the system of payment by results, 21549, 21550.—The Presentation Nuns are extensively devoted to the poor; in their teaching the religious and the secular element are both taught effectively, 21551, 21552.

Further Examination.

Class-tests used in witness's schools; boys often remain longer at school than girls, 21799–21805.—The children who leave these schools are able to read with facility, and write and cypher; those in the sixth standard could take up a newspaper and read it, 21806–21809.—The practice is to bring forward all the children for examination—not the clever ones only; if a child fails he becomes an unprofitable article in the school, 21810–21814.—The children who have left school retain but very little general taste for reading; under the Revised Code they must attain greater positiveness in the results of reading than under the old system, 21815, 21816.—Children in the night-school are over thirteen years of age; those in the day-school are under that age, 21817.—There is a lending library attached to the schools, which is used by those who have a taste for reading, 21818–21821.—Moral and religious training is attended to very early, so as to make a good impression on the children, and to strengthen them against the temptations of a large town, 21822, 21823.—The Protestants in the schools are not recognised—they read all the same lessons as the others, 21824–21828.—The schools are under no other control than that of the Committee of Council, nor are they in any way connected with the Jesuits, 21829–22832, 21852–21858.—The ladies who teach (belonging to the Institute of the Blessed Virgin for the Education of Youth) are not at all connected with the Jesuits; the General at Rome may have conferred some special spiritual privilege on their order, but beyond that there is no connexion or communication whatever, 21833–21838.

The Committee of Council look only to the managers having sole power in the school; the nuns who teach are under the same control as other teachers, and may be removed by the manager at his will, the Privy Council only requiring that the teachers shall be certificated, 21839–21844.—It is exceedingly desirable that the State should be relieved from all responsibility of inquiring about religious persons; better teachers would be had, and greater good effected, 21845.—If the Privy Council made payments direct to the teachers, the education of the people of England would not be conducted with equally good results, as the independent position of the local manager would be lost, 21846.—In England the manager must find funds equal to the amount of the grant, 21847–21851.—The Inspectors of Catholic schools in England are all Roman Catholics; they are selected and appointed by the Privy Council, with the agreement of the Catholic Poor School Committee, not of the bishops, as previously stated; a continuance of this system is exceedingly desirable, 21859–21863, 21866–21870.—The functions of the Inspectors are exclusively limited to the secular instruction; so it is in the schools of certain Protestant denominations, 21864, 21865.

The second order of Roman Catholic clergy can establish schools without the previous permission of the bishop; as a matter of discipline, the bishop can say to his clergy that schools are not to be built without his assent, 21871–21875.—Clerical managers are accountable to the bishop in the exercise of their ecclesiastical functions, and the bishop at his visitation could raise and sift the question of education as far as he might deem advisable, 21876–21885.

Brother Paul Townsend.

TOWNSEND, Brother PAUL.

Is Superior of the Presentation Monastery in Cork belonging to the Presentation Order of Brothers for the charitable instruction of poor boys; order was established about 1803; the members have always been engaged in education; have five schools; three under witness, and two in Kerry; Brothers are subject only to ordinary of diocese; two schools under witness are in connexion with National Board; this does not interfere with secular or religious teaching; no difficulty with Protestant children; not allowed to remain during religious instruction, 17272–17285.—Board refused to aid one school after lease was sanctioned by Treasury, as it was to be conducted by religious; schools conform strictly to rules of Board; religious instruction is kept distinct from secular, 17286–17293.

Between 2,000 and 3,000 pupils in Cork; monitors; 14 Brothers; payment from National Board; distances which children come; could not get grant for any new schools under Board's present rules; cannot tell why; use their books, which are unobjectionable, and greatly improved lately; no objection to the religious element in them, 17294–17307.—No other complaint against National system; advantage of their help for school requisites for poor children; monitors brought up in their own schools; their after success; generally harmonious relations with Inspectors, 13708–13711.

Schools in Cork occupy three large buildings; the one Board refuses to aid supplies a poor and dense population; has 500 on roll, with net attendance of over 250; Corporation, with sanction of Treasury, gave a lease for 500 years, at a fair rental; cost £2,000, and an orphanage attached cost £2,000 more; all the money expended for school purposes, 17312–17332.—Particulars of Board's refusal to aid; no difference between these schools and convent schools; account of difference between witness and Board as to capitation fee; over 400 were in actual attendance, coming and going, and there were all the means for teaching them, but Board would only pay for 305; ought to pay for at least 450, being the average each quarter on the rolls; extract from letter of witness to Commissioners on the subject, 17333–17346.

No school fees; cannot take money without consent of bishop; any taken must be applied to schools, 17347, 17348.—The Order would object to examination for certificates; would think it derogatory; the equitable way would be to pay by results; first-class teachers not needed for country schools; if Brothers were paid by results they would receive three times as much as they do now, 17347–17352.

The Very Rev. William Warburton, D.D.

WARBURTON, The Very Rev. WILLIAM, D.D., Dean of Elphin.

Has a parish attached to deanery; is manager of a boys' National school there; 80 to 100 on the roll, of whom about eight are Protestants. There is another under parish priest, but fewer attend that, 20824–20834.—Witness's school was mildly denounced by Roman Catholic bishop on account of the master being a Protestant; no children left in consequence, as they know and admit that he carries out system honourably, 20835–20837, 20926, 20927.—Has never supported Church Education Society, 20838.—Has always been a friend of National system, and is quite satisfied with its working; inspection is excellent; system produces a vast number of well educated young men. Far superior to English system, 20839–20841, 20883, 20884.—Thinks payment by results would lead to cramming; masters discharge their duties efficiently; they and the pupils want a stimulus; attendance is very irregular, 20842–20846.

Very few pay school-fees; reasons for this. Suggests scheme of a compulsory education rate in every union, Government to make a grant of equal amount; a committee to be chosen from guardians to inspect frequently and report annually, it being most desirable to get laity to take an interest in the schools; this not to interfere with inspection by National Board, 20847–20850, 20913, 20877–20880.—A rate of 2*d.* in the pound would produce £100,000; would immensely improve the education of the country; there should be a superior school in every union, and some Government situations might be open to them, 20886–20888.—Further details as to constitution, duties, &c., of the committees, and as to administration, &c., of rate, 20902–20909.—Guardians would act as visitors and be the patrons; does not contemplate any practical difficulties as to appointment or removal of masters; believes guardians would act fairly, notwithstanding dissensions that often arise in such matters, 20932–20938.—Would always have a fair proportion of Roman Catholics on school committees above suggested, 20948–20950.

A bequest formerly made by Bishop Hodson is about to be utilized, under the authority of Chancery, to establish a first-class English school, with a classical class, in Elphin; instruction gratuitous to the poor; £4 a year for the classical class to those who can pay. The bishop, and dean and chapter, are the trustees. The building is erected and paid for, and a master about to be appointed, who is to be a layman of the Established Church. Witness hopes to get it under the National Board (in which case it would probably absorb present school), but if not, their rule as to absence of dissentients during religious teaching will be acted on. Hands in a copy of the rules [*see Appendix, No. XIV.*] Is in the habit of appointing a Roman Catholic as assistant where head master is a Protestant, 20851–20873. Salaries of teachers should be augmented by local contributions, &c.; house and garden desirable, 20874–20876. No necessity for paid chaplains in model schools, 20881–20883. Recently gave a lecture as to means of promoting the prosperity of Ireland, in which the advantages of a National system of education were strongly pressed. About 200 attended, of whom 180 were Roman Catholics; all were greatly pleased, and it has been published at their request, 20889–20891. Is in favour of National system as at present administered. Has had mixed schools upwards of 20 years without any religious dissension; had a little difficulty at first with his own people. Has given religious instruction to children of his own flock, for 20 years, and never had any trouble, 20892–20898. Religious instruction should be distinct from secular; the books of Board must improve moral tone. Success of National system much depends on its being carried out fairly and judiciously, 20899–20901. Is not in favour of mixed schools for boys and girls. Had a female school until a convent school was opened, which absorbed it, as these usually do all within reach; believes they are generally efficient; thinks school named is under Board. As to rooms and staff necessary for large schools, 20910–20923.

Witness's school is non-vested; had a Protestant master and a Roman Catholic assistant; particulars of accidental causes which led to the latter having charge for a considerable time, about which some misapprehension existed, 20924, 20925. If religion not interfered with, people will use schools where best education is given, 20927, 20928. Has never been asked to allow priest to give religious instruction in his school, 20929–20931. Always has a Protestant master and a Roman Catholic assistant; though four-fifths are Roman Catholics, never has had any difficulty; definition of a "mixed" school. Denomination of patrons indifferent if religion not interfered with, 20939–20947, 20951. Doubts accuracy of numbers reported as attending Church Education schools; rolls not so reliable as those of National schools; best possible means are adopted for ensuring correctness of the latter, 20952–20954.

WARREN, Right Hon. ROBERT R., M.P., Her Majesty's Attorney-General for Ireland. Right Hon. Robert R. Warren, M.P.

Is Vice-President of Church Education Society, 15117.—*Has always been opposed to system of* National Board. In 1867 drew up heads of a scheme of National education, the objects of which were—First, to secure for all the poor children of Ireland a uniform system of sound secular instruction; secondly, to provide religious instruction for every child; thirdly, to vindicate for every man who deemed religious education a matter of importance, liberty of religious teaching; and fourthly, to present no obstacle to a religious man, of whatever creed, from becoming the patron of a school. Reads "Scheme" and "Rules." The latter propose three paid and three unpaid Commissioners, training schools, catechists, inspection, authorized books and other requisites, grants by Commissioners, public notice as to religious instruction, &c., 15118–15121.

Paid Commissioners to be chosen so as to provide for religious equality. Secular books to be confined to a copious list, to be drawn up by Commissioners, 15122–15128.—Further particulars as to books to be used, 15253–15258.—Payments should be by results. Patrons to decide when religious instruction should be given, 15129–15132.—Provision for minorities; very small schools should have inspection and school requisites provided; they would generally be supported by their own denomination. Inspection should be confined to secular part, 15133–15137.

Funds contributed to schools in connexion with Church Education Society have exceeded £40,000 a year for many years; under above scheme half this from voluntary sources would provide Protestants of Ireland with superior schools. Restrictions should be taken off monastic schools. Denominational training schools to be maintained entirely by Government, 15137–15140.—Present model schools should have chaplains to instruct at separate hours, 15141–15143. —Unpaid Commissioners to be Chief Secretary and two Judges. Not to be representatives of religious opinions, like the paid Commissioners. A large Board is practically irresponsible, 15144–15146, 15312–15315. —No objection to a rate in aid; would cause more school fees to be paid. Source of payment of teachers. Five-sixths of teachers' salaries not too much to be paid by State, though two schools were set up in each locality. Two parishes might unite. Scheme does not involve an unnecessary number of schools, though it may inferior teachers. Advantages and disadvantages of small schools; sometimes masters may get languid and indifferent. In some parts hardly ten Protestant children in a parish. Scheme is denominational in one sense, but undenominational in regard to grants not being made to any denomination, 15147–15170.

Meaning of "united" and "mixed" education. Opinion that National system is a failure is founded mainly on Parliamentary returns obtained by Mr. Butt in 1864. Neither National nor Church Education schools are fair specimens of united education. Believes proportion of Roman Catholics in Church Education schools in last ten years is 9,000 to 70,000 Protestants; the number is greatly diminishing, 15171–15188.—In many parts materials for united education exist, though it is not to be found. If 83 per cent. of the schools in Ulster, where the population of Roman Catholics and Protestants is pretty equal, are mixed schools, attendance of opposite party in some is very small. Should not be surprised if mixed schools have increased in every province in Ireland, 15189–15204.

Though National system has failed to attract Established clergy, opposition is somewhat lessening, and Church managers are increasing. Defective constitution of National Board; should contain some bishops and fewer politicians. Suggestion of judges not an essential part of above scheme; reasons for proposing them; did not contemplate their constant attendance, but rather as referees in difficult matters, 15205–15219.

Under the scheme Inspectors would be obtained from different denominations according to merit, and perform duties irrespective of creed. Roman Catholic Inspectors should occasionally inspect Protestant schools, and *vice versâ;* this would not give unfair amount of patronage to Protestants, 15220–15222, 15339, 15340.

Position of Scotland attributed by some to schools; these are supported by a rate in every parish, 15223–15227.

State should provide schools accessible to all to enter free from interference with religious views; sects should take care of their own children; clergy regard religious interests as inseparable from primary education. Under National system clergy have not sufficient opportunities for their distinctive religious teaching; some do not avail themselves of what they have, 15228–15236.—Whoever supports schoolmaster, Government should supply Inspector; many who ought do not contribute; rate in aid would not be violently opposed; patrons should apply rate; duty of State and patrons as to religious instruction; would not assist merely secular schools, 15237–15252.

Scheme approved by a majority of Church Education Society; a small section would prefer a State system as to members of Establishment, that should recognise teaching of Scripture, Catechism, and Articles, where patron thought fit, 15259–15266.—Scheme would provide at least two schools wherever there is a mixed population, with ample notice of what is taught; does not contemplate a district without sufficient minority for a school; at present no child need go to a National school for want of a Protestant school; scheme has reference mainly to the poor; would not meet case of a minority of three, 15267–15275.—Opposition to Kildare-place Society was by Protestants as well as Roman Catholics, 15276, 15277.

Neither books nor exhibition of Ten Commandments in National schools can be said to give religious instruction, 15278, 15279.—State should stop grant if prescribed books not used; attendance not to be compulsory; reason for limiting choice of books, and for statement of religious rules on applying for aid; these not to be changed, 15280–15286.—Aid towards building new schools; choice of religious instruction; accounts to be kept, 15287–15290.—State ought not to pay anyone who is wilfully violating the law; this answer is given without knowing whether Christian Brothers are doing so or not, 15291–15297.—If they come within the operation of secs. 33 and 34 of 10 Geo. IV., c. 7, it would be necessary to change law or exclude them from State aid, 15316, 15317.

Under scheme any religious body might prepare books they thought unobjectionable, and get Commissioners to place them on list if approved; all approved books to be supplied at a reduced price, 15298–15305.—Would not allow particular books for individual schools, though a religious body might be permitted to suggest some for all their own schools, 15331, 15332.

Building grants for convent as for all other schools should be entirely in discretion of Commissioners, with security for continuing their use for education, 15306–15310.—No doubt religious instruction is given in National schools where clergy are patrons, 15311.—Rate in aid should be applied according to wants of district, without reference to creed of parties paying; suggestion that each denomination should contribute to its own schools might be desirable if other plan not adopted, but would sometimes be unjust; cannot see how a conscience clause could be worked here or how a minority of four or five can be provided for; under scheme they would not be worse off than now; conscience clause cannot and does not protect such a minority under present system, 15318–15330.

Rate should be paid in equal portions by landlord and tenant; it could be collected with poor rate, 15333–15337.—As to probability of objection by Roman Catholic bishops to priests becoming chaplains in training schools under scheme; they ought to be as free to accept the office as Protestant clergy, 15341–15346.—A preferable plan would be to give each denomination a training school, and send teachers before a central Board for certificates. State should have

Right Hon. Robert R. Warren, M.P.

entire control of secular education. Desirable that teachers should have authority of their clergy. But few difficulties have occurred in regard to chaplains of gaols, &c., 15347–15350.—Believes scheme would satisfy Roman Catholic laity; many differences of opinion between them and their clergy on educational questions; the bishops want to get all the education into their own hands. Reasons for believing that feelings of Roman Catholic laity and bishops are opposed. Laity will not submit to bishops having exclusive control, 15351–15356.—Quite possible to carry on scheme though not fully approved by Roman Catholic bishops; reasons why it could not be made entirely acceptable to them, 15357–15360.—No difficulty if reading, writing, and arithmetic only were taught, but majority get beyond that, 15361–15363.—Present system highly unsatisfactory to nearly everybody, especially to Roman Catholic hierarchy, who wish for a religious system. Under scheme they would be to some extent consulted, 15364–15368.

Teachers wherever trained should be allowed to come up for classification, 15369.—Present system is denominational with a conscience clause. Cannot give any cases of proselytising. Division of proposed rate in aid where there are Unitarians, Methodists, &c. To a certain extent proposed system involves indiscriminate endowments and support by State of opposing religious systems. One Protestant and one Roman Catholic school in each parish would generally be sufficient, 15370–15387.—Explanation as to the three proposed paid Commissioners being of three denominations; believes they would work fairly and harmoniously together, 15388–15391.

WHITTLE, J. LOWRY, Esq.

J. Lowry Whittle, esq.

Is a barrister and a Roman Catholic; is conversant with opinions of laity. They consider National system a great boon, and that it is most desirable to maintain it in its integrity, if priests can be conciliated so as to get rid of unreasonable objections, 24077–24082.—Opposition comes from bishops and clergy,—who want to grasp the whole control of education, and who take advantage of everything to secure their own power,—and from some public men; National anti-State feeling has strengthened opposition. Letter from bishops to Mr. Cardwell in 1860 proves foregoing charge. Some put it as controlling matters affecting faith and morals, but the more outspoken demand absolute and exclusive authority over all teaching, 24083–24085.—No such power belongs to them anywhere, though bishops have expressed desire for a foreign system to satisfy what they assume to be wants of people. Help of clergy to work system desirable; recommendations of system so many that they must co-operate. Necessity for State aid is freely admitted, question as to terms. Tendency of above-named opposition is so mischievous that it should be resisted, 24086, 24087.

Is aware that a good deal of the system is now practically denominational, but still it is well that it is even theoretically National and beyond control of bishops. Great advantage of undenominational inspection free from such control, 24088–24089.—Some advantage in religious surroundings, but not so great as at first sight appears; prominence given to them by their advocates shows they are a dangerous body to commit education to; rather apt to breed formality, 24090.—Present claims of episcopacy are of recent introduction. Former opposition, which was a minority, was from something of a national feeling, but since 1852 there has been a marked change in the character of the episcopacy; it has been more distinctively Papal and ultramontane, 24091.

Supposing (which is not admitted) that Irish people support the bishops' view, British Parliament cannot abdicate its functions to them, it would not be bound to concede what it believes to be wrong. As to political power bishops and clergy are likely to bring to bear, no doubt it is great, but it is likely to diminish; their anxiety to take advantage of it shows they fear this. The great source of danger is that Parliament may grant what is asked for in name of Irish people, but what they do not themselves ask for or want. Means by which Parliament may ascertain their wishes, 24093–24095.—Distinction between duty of Church and of State. Though Church base their intervention in education on impossibility of separating secular from religious instruction, they endeavour to carry same authority into purely political matters. They want to rid themselves of State control in every respect, and to lead people into the most extreme views of Continental ultramontane party, 24096–24102.—Nomination of bishops of late direct from Rome. Tendency of pastorals to confound civil and pontifical jurisdiction of Pope together; there is a certain constitutional liberty within the Church abroad which is wanting here. Present tendency of episcopacy is to make people forget there are any safeguards against clerical authority, 24091, 24103–24106.

Effect of mixed system in mitigating religious and political discord. Believes denominationalism would raise up communities with antagonistic feelings and interests, and that this result is desired by its advocates, who feel they are losing ground all over the world, and want to make Ireland an ultramontane nursery, from which to send forth missionaries to recover their lost position, 24107–24109.—There cannot be freedom of education where parents are coerced. Danger of State giving clergy power to interfere with parents' free choice. State paying largely ought to judge for themselves as to proper system, 24110–24114.

As to tacit consent of people to clergy's demand for denominational education, they do not understand what is going on; they distrust anything coming from the State, and have an old feeling of standing by their clergy. Priests do not enter into remote ultramontane designs, 24115–24119.—Decline of political power of priesthood. Reasons for present indisposition of laity to break with clergy. Reads from a paper written by himself, showing necessity but present impossibility of laity resisting priesthood, as only the thinking few can appreciate the position, while the ignorant mass are priest-led. Desire of the former for union with other creeds, and necessity for it, 24120–24124.

In Naples, with the richest endowments and the clergy "free" to educate, 80 per cent. of the people could neither read nor write, 24125, 24126.—Clergy first made present claims about 1850. Witness does not recognize Church's claim to "royal rights," they practically accepted system from 1839 to 1852. People are more opposed to it from its connexion with Government than as a mixed system, 24127–24134.—If demand of bishops be granted, people's liberty will be altogether ignored. They are already paving the way for extreme measures, 24135.—Predominant party are anxious to keep Roman Catholics separated from Protestants; clergy should attend to religious education; their exertions of late. Present design of Christian Brothers is to oppose church views to National system. Sufficient field for them and nuns in religious education, 24136–24146.—Number of intelligent laity opposed to bishops is increasing. State should make some provision for religious education; ministers should teach it in schools; proselytism should be prevented, 24147–24151.

Number of schools under priests. State need not come more between them and people, as they are known to be under its control. Denominational inspection would be a retrogression, though bishop and clergy demand it, 24152–24159.—Objection to secular education. If State maintains position, people will follow. Though so many schools are practically denominational, State control through inspection is bene-

ficial, but clergy are hoping it will be abandoned, 24160–24163.—Present protection to minorities most useful; this would be lost under denominational system, 24164–24167.—Is not delegated, but expresses opinions of many educated Roman Catholics, 24168–24170.—The main difference between demand here and what is done in England, is that State is asked to bear whole cost; besides, there the Roman Catholics are a small body, and State does not enter into official communication with bishops. Incorrect popular view of foreign system of education, 24171–24177. J. Lowry Whittle, esq.

Wilkinson, William Thomas, Esq. W. T. Wilkinson, esq.

Is training master of the Church Education Society's training school, and is occasionally employed as inspector; was previously head master of the Kildare-place model schools, 7110–7112.

Instruction of the students in the organization and management of schools, mathematics, &c., is the duty of the training master, 7113, 7114.—Time set apart for religious instruction in the training schools, 7115–7120.—A certain portion of the training time is devoted to lectures on teaching and also to practice of teaching under the supervision of the training master; the teachers are present while model lessons are being given, and after that a class is committed to them under supervision and criticism, and finally each student in turn takes the entire charge of the practising school, previous to appointment to a school, 7115–7126.

Last year witness inspected four schools in Dublin and sixteen in Limerick; the reports as to their efficiency were favourable for the most part; some were well supplied with school requisites, 7127–7131.—The attendance at the schools was good, and the school-rolls were well kept and trustworthy, 7132–7141, 7179–7182.—There is only one paid inspector, 7303–7305.

In the country schools religious instruction occupies its place in the time-table; it also more or less pervades the teaching of all subjects, 7142–7148.—The time-tables for the country schools and for the training school to some extent differ, but in principle they are the same; in the former there is a discretionary power left to the teacher or the clergyman, 7161–7168.—Doctrinal or controversial matters may be introduced if they do not infringe on the time, or lead away from the subject of the lesson, 7171–7178.—Reading Scripture forms a portion of each day's school-work for all the children; any exposition would be given according to Protestant views, 7210–7218.

Certificates of teachers depend on their skill in teaching, including ability to intersperse religious instruction over the secular subjects, 7149.—Schools are generally carefully superintended by the clergy, 7150.

There is no difficulty in obtaining places for the teachers, the demand is greater than the supply, 7151, 7152.—Ages of the teachers in training vary from eighteen to thirty, 7153, 7154.—Teachers have come from National Board to be trained in Kildare-place; they had been members of the Catholic Church, but had changed their religion before joining the Society's schools, 7155–7157, 7183–7196, 7223–7228.—Some years ago two or three persons entered as Church of England Protestants, but turned out to be Roman Catholics; they were reported to the committee, and removed from the institution, 7197, 7198.

Various books are used, some of the National Board, some English, some Scotch, 7158–7160.

Church Education Society's schools follow the custom of the National schools in meeting five days a week, 7169, 7170.

In 1866 there were 67,227 pupils on the roll; daily attendance 77 per cent.; average attendance 50·66 per cent., 7199–7205.—In the diocese of Dublin the total number on the rolls was 5,158, 7206–7209.

Average salaries of teachers; residences are generally provided, and occasionally a piece of land; sometimes they act as parish clerks, 7218–7220, 7289–7293, 7302, 7507, 7508, 7521–7531.—In some cases teachers receive school fees, but there is no general rule; where parents are well to do they should pay for the instruction of their children, 7294–7301.

The parochial clergy take a deep interest in the schools; in many cases they visit the school daily, and check the number in attendance as entered by the master in the daily report; there is no fixed hour at which the roll should be called, 7229–7235, 7335–7340.

Before students are admitted to the training school they undergo an examination, and must come up to a certain scale of proficiency; there not being room enough for all who apply, a selection is necessary, 7236–7243.—Those who come up are generally well prepared, and they make considerable progress while in training, 7249–7255.

There are two sessions of five months, which each student must attend in order to get a certificate. A larger proportion of females than males attend the two sessions, in consequence of the great demand for masters, 7256, 7257.—In the case of mistresses supply and demand are about equal, 7278, 7279.—Per-centage of teachers returning for second sesssion, 7258, 7259.—Each candidate pays an entrance fee of £6, 7260, 7261.

Subjects of instruction for male teachers, and the proportion of time devoted to the various branches, 7262–7264.—Extent of training in mathematics, 7265; in social science, 7266.—There are papers given at the end of each session, set specially for the students of that session. The students are expected to answer these in writing, and the papers are intended to give an idea of the extent to which they had received instruction in each subject, 7267–7271.—Since August 1862, 24·8 per cent. obtained first class certificates; 21·7 the highest grade of second class; 6·2 the superior grade of second class; 15·5 the lowest grade of second class; 31·8 did not obtain certificates, 7272, 7273.

Course of instruction for female teachers includes the greater number of the subjects for the males, except mathematics, 7274, 7275.—Since August, 1862, 16·8 of them obtained the first class certificate; 30 per cent. the highest grade second class; 14·3 per cent. the superior grade second class; 15·5 per cent. the lowest grade of second; those that did not obtain certificates were 23·4 per cent. 7276, 7277.

The practice of teaching is taught, in the first place, by lectures on the science of education; secondly, by model lessons in the presence of the students; thirdly, each student in turn gives lessons, subject to criticism; fourthly, instruction of a class by each of the students; fifthly, a section of the model school is given in charge to each student; sixthly, each student in turn conducts a practising school, 7280.

Supervision of teachers in training as to their religious duties; attendance at public worship, 7281–7284, 7288.—All teachers are boarded on the premises; they are allowed four hours for dinner and recreation daily, 7285–7287.

Witness is not acquainted with the financial department of the society, 7306–7309.—There is an entry in the report for 1866 of a grant of £26 10s. to a school at Kilmurry, where the number on the rolls is 13, and the average attendance 9; the grant may include school requisites, repairs, &c., 7310–7321.—At Kilmallock the number on the roll is 23, the number in attendance 19; the roll was satisfactorily kept. The education in this school is inferior; if children of the Established Church go to the National school they go probably on account of the superiority of the teaching, 7322–7334, 7341–7365.—There are three Church Education schools in Broughshane, county Antrim, male, female, and infant, having in the united boys and girls' school 80 on the roll, with an average attendance of 26; in the infants there were 93 on the roll, with an average attendance of 25. The probable reason of these small averages is that the schools had been under unskilful

W. T. Wilkinson, esq.

teachers, 7366–7383.—Cannot account for closing of certain schools mentioned in the report, 7384–7398.

Constitution of Erasmus Smith's Board, 7399–7407.

The National Board's books are not used to any great extent in the society's schools; they are not good educational books; moral and religious instruction as conveyed by the Board's books, 7408–7419.

Punishment used is chiefly moral; the teachers are in the habit of opening the Bible and reading by chapter and verse, in order to bring religious principles to bear on the offending children, 7420–7427.

All the children read the Authorized Version, but they are not compelled to attend lessons in catechism and the formularies of the Church; it is quite competent for teachers to instruct Catholic and Protestant children in the doctrines and principles of the Established Church, and to enter on the controversial points involved in various passages, 7428–7444.—There is a fixed time for giving religious instruction, and it is also given incidentally with the literary instruction, 7445–7447, 7464–7469.—Teachers think their work would be very imperfectly done but for interspersing the religious teaching over the secular subjects, 7470–7473.—The rule was not adopted by the society in consequence of the prohibition of the National Board; it always was a matter of principle, 7474, 7475, 7480.—The Kildare-place Society allowed the Roman Catholic version to be read; comments were not allowed to be made during the reading of Scriptures, 7476–7479, 7481, 7482.

Generally speaking the Church Education Society's schools are better than those under the Board, 7448, 7449.—The average attendance in the model schools at Kildare-place is about 50 per cent. of those on the roll, 7450–7457.—Candidates for training come from all parts of the country; there is no pupil-teacher or monitor system; it was tried some years ago, but given up as it did not work well, 7458–7463.

Some schools previously under the Church Education Society have been placed under the National Board, 7483–7486.—It is a fundamental principle of the society that in all its schools the Scriptures should be used in the daily instruction of every child capable of reading, and that the teachers should be at liberty on all suitable occasions to refer to them; the teaching would be very incomplete without this, 7487–7493.—Children cannot be withdrawn during the reading of the Bible, but they may during the teaching of the Catechism, &c., 7494–7497, 7501–7506.

The creed of the children is ascertained on admission, 7498–7500.

System of taking the roll in the ordinary schools, 7510–7520.—If a child attend for a day only, he would be counted as a member of the school for the year, 7532–7537.—Every school is provided with a uniform class-book, report-book, and register, 7538, 7539.

In the training school 42 hours a week are devoted to teaching the various subjects, and 21 for private study; the work is severe, but the health of the teachers has never broken down; it would be more conducive to real instruction if fewer subjects were taught, 7542–7554.

The "Dublin Reading Book" is very rarely used now; the books generally in use are those of the Society for Promoting Christian Knowledge, corresponding to the standard of the Revised Code, 7555–7558.—Uniformity of books is not important, 7559–7562.—The books used for direct religious instruction are the Bible, Catechism, and Prayer-book, 7563–7565.—The "English History" of the Christian Knowledge Society is used for secular teaching in many of the schools; it is difficult to say whether portions of this book are offensive to Roman Catholics, 7566–7602.—Reading book No. 3, of "Nelson's School Series" is in use for children from six to eight years of age; it contains nothing that a well informed Roman Catholic could object to; whatever doctrine it contains the teacher should open out, 7603–7611.—The "Ecclesiastical Primer" is only used by the students in training, and is not compulsory, 7612, 7613.

The children are divided into six classes corresponding to the series of Christian Knowledge Society's books; the per-centage of children in the first, second, and third classes is 48·32, 24·74, and 16·74; the remaining classes would contain altogether about 10 per cent., 7614–7628.

The teaching of one religious doctrine on week days, and another on Sundays, as must be the case with regard to Catholic children, tends to leave the child's mind in doubt, 7629, 7630.—The system of the Society is rather a national than a church system; it has maintained one and the same principle all through; if left alone Catholics would avail themselves of the scriptural teaching, 7631–7655.

The rule of the Kildare-place Society quite excluded reference to controverted points; it has been stated that the grant was withdrawn because the teachers had, contrary to this rule, enforced doctrinal views, 7656–7660.—The object of admitting children of parents not belonging to the Established Church is to educate them and instruct them on the subjects taught there, not with any proselytizing purpose, 7661–7667.—The system does not interfere with the peculiar tenets of any section of the community, 7668–7672.

The responsibility of the parent devolves upon the teacher, and he should respect the religious feelings of the parent; the rule of the society's schools is known, and if application were made to impart secular instruction only, it would be refused, 7673–7699.—Roman Catholic children might pass through the schools without any change of faith, 7700–7704.

Richard Williamson, esq.

Williamson, Richard, Esq.

Is surveyor and architect to Irish Society; self and partner design their schools; all but two are under National Board; these are the Coleraine Academical Institution and Foyle College, Londonderry; contributions by Society towards them. The first-named was started by locality; is a place for high-class classical education, and is flourishing. Foyle College was originally a high-class school; many eminent men have been educated there; was not set up by Society, 20955–20971.—Subscribe to over 100 schools not on their estates. Have recently erected new buildings at Coleraine, at an expense of £5,000, to accommodate over 500 pupils, 20972–20976.—First subscription was in 1613; amounts now given; some are to schools out of Derry, though all their property is in Derry. Constitution, officers, official name, &c., of Society, 20977–20981.—Is managed by a body of London citizens who, except the Governor, are constantly changing. Officers are elected annually, but some are practically permanent. Agent, who lives in Londonderry, is the Local Executive; the Governor has most weight in the management, 20982–20998.

Property of Society, and tenure upon which held; neither Society nor London Corporation now claim any beneficial interest in it. Has no personal knowledge of definition of trusts; Society may be considered a charitable endowment for part of North of Ireland; is not aware that they admit their trusteeship beyond their own estates; they have other duties nearly as important as education; does not remember terms of Charter, 20999–21014.—Ordinary annual income of Society is about £14,000; some particulars of income, expenses of management, &c.; £631 4*s.* 3*d.* paid to members of Society for attendance during the year. Full particulars in a table handed in. Grant to city of Londonderry is voted annually, 21015–21025.—"A general statement of moneys received on account of the Honorable the Irish Society, being the produce of their estates, fisheries, &c.; together with the expenditure of the same, from February 5th, 1867, to

February 4th, 1868," (the table referred to) *pages* 945, 946.—None of the revenue is spent on elections. Has no knowledge of the past, but is certain not a farthing would now be spent for any political purpose. These matters are not in his sphere of duty; understood he came before Commission to give evidence about schools, 21026–21033.

Society expend surplus in assisting schools, public works, and Protestant denominations; cannot say why Roman Catholics are not assisted, but it may be from terms of Charter, 21034–21043; 21145–21147.—List given in shows name of each school and amount of grant; £5 is usually the lowest given; original grant is generally adhered to, 21044–21047; 21052.—Knows nothing of schools receiving Society's grants after being struck off National Board for inefficiency. A new commodious school at Ballougry; some difficulty with former school, 21048–21051.—Society rarely inspect schools. Statistics from a report made in 1864. Primary schools are scattered over Derry, and two or three in Donegal; description of schools to which grants are made, 21053–21059.—Difficulty as to religious instruction in Coleraine school when put under National Board, rector being strongly opposed to system; the school has six teachers, who, it is believed, are Presbyterians. Description of school given by Mr. M'Creedy in 1854 would still apply generally; has considerably increased latterly, owing to being under National Board; new buildings recently erected not unnecessary, 21060–21065.

Society contemplate increasing expenditure on more advanced education; have completed arrangements for establishing a purely commercial school in connexion with Foyle College, under the classical teacher, who is one of the best masters in Ireland. Have converted head master's residence into a commercial school and library. Think of making Foyle College their own school. As to question whether two townlands belong of right to Foyle College, 21066–21070.—Grants towards Magee Institute; which is managed by Presbyterians, and is for the purpose of educating their ministers, 21071–21073.—Christian Brothers' and model schools at Derry. It is matter of notoriety that Roman Catholics are forbidden to use latter. Society hold funds in trust for benefit of estate, not specially for education; trust includes education of inhabitants, but (as witness believes) to exclusion of Roman Catholics, 21074–21083.

Has no special knowledge of proposals to dissolve Irish Society and sell property. When complained against as to supervision of schools, remedy was attempted by putting them under National Board. If property were sold, it would realise a large sum; cannot say how much, 21084–21088.—If sold, money should go to lands and tenants of Society. Society should have control of everything of this kind on their own estate. Their aid should not exclude aid from National Board. Inspection not very efficient; should be done men whose sole business it is, 21089–21096.—Grants are not exclusively to National schools. Society take entire charge of those on their own estate; secular education given is of a very high character. Presbyterians, Episcopalians, and some Roman Catholics attend; local management; trustees of Foyle College (bishop, &c.) have lately been exerting themselves more; primary education now given here, 21097–21107. Richard Williamson, esq.

Roman Catholic teachers in Derry model school; prize of £50 given by Society to this school; spend all their income, which rises from year to year; contribute to Sunday schools of all Protestant denominations, 21108–21115.—Religious creeds of Society's tenants. Independents do not require aid; probably Roman Catholics would not accept it. Expenditure of money given to schools is not controlled by Society. Never offer money; grant it on application. If found that Charter contained nothing to the contrary, would entertain applications from Roman Catholics, but have never had any such, 21126–21124.—Thinks Roman Catholics would not apply for aid, because they will not accept it from National Board, 21125–21129, 21141.—In Coleraine 420 attend Society's school. If true that there are no schools at Coleraine attended by Roman Catholics except those under National Board, this would alter previous opinion. Believes the impression exists that if they applied they would be refused, but is sure Society would make grants if they have the power, 21130–21144.—As to scandal caused by removal of teachers from Coleraine Model School. Understands Roman Catholic hierarchy condemn model schools generally, 21148–21153.—Counties to which Society's operations extend; division of estates. There are Royal schools for secondary instruction; Dungannon Royal School. More given by Society for education in Londonderry than in any other county; amounts granted in 1867, 21154–21165.—Is not aware of Society making a grant for a Presbyterian meeting-house in county of Antrim. If not precluded by Charter, would gladly see them contribute to Roman Catholic charities, 21169.

Wilson, James, Esq., Barrister-at-Law. J. Wilson, esq.

Graduated at Queen's University in 1852, was appointed Inspector under National Board in 1854, and resigned in 1857; district of inspection included counties of Kildare, Galway, Cork, and Queen's, containing principally schools managed by Roman Catholics, 15931–15936, 16022–16026, 16222–16228.

The National system, if carried out on the principle laid down in Lord Stanley's letter, is the only system of education for Ireland; it is the greatest boon ever England conferred on that country, 15937–15939, 15993–16293.—The principle has been departed from by admitting monks' and nuns' schools, which are essentially denominational schools, 15940.—Teachers are anxious to carry out the rules of the Board as regards religious instruction; instance of this at a school near Drimoleague, under a Catholic teacher, where more than one-seventh of the pupils in attendance were Protestants, 15941–15944.

Proportion of Protestants in mixed schools varies very much; in some schools considerable numbers attend, in others none, especially where Church Education Society's schools are scattered in the district; clergy of the Church of England are advocates of denominational teaching. In a district comprising an area of between 500 and 600 miles there was only one school (at Clonakilty) managed by a clergyman of the Established Church, 15945–15947.—The Clonakilty convent school was taken into connexion with the Board, notwithstanding a report of the Head and District Inspector, suggesting the allowance of a qualified grant to meet the peculiar difficulties of the case, or the non-admission of the school; grounds on which the report was based, 15948–15952, 16229–16243, 16331–16334.—Present state of education in Clonakilty; the old school has now on its roll 114 boys and 249 girls, with an average attendance of 128 only; the convent school has 605 girls on the roll, with an average attendance of 358. The result of admitting the latter school is that the Commissioners are supporting two rival schools out of the public purse, the locality contributing nothing to the support of either, 15953–15959, 16244–16254, 16287–16289.—The average attendance of the two schools is higher than in the old one, but the convent school has drained the National schools for three miles round; there was no necessity for establishing so large a school, whether a convent school or not, 15960–15967.—The avowed object of forming the convent school was to absorb the attendance of the existing schools, and beyond the desire to introduce the convent into Clonakilty, there was no reason why the old school should be disagreeable to the Roman Catholic clergy, Miss Donovan (the patron) and all her teachers being members of that Church, 15968–15970.

J. Wilson, esq.

Since witness left the district the Board has established in Clonakilty a school under Presbyterian and one under Wesleyan management, the former with an average attendance of 58, and the latter of 21, consequently there is in Clonakilty denominationalism pure and simple; possibly there are children of other religious denominations attending these schools, as the teacher or manager cannot refuse admission, 15970–15985.—The Board contributes to the erection and repair of vested schools only, 15986–15989.—There are many cases similar to Clonakilty; the Commissioners have been unnecessarily indulgent in allowing the establishment of a large number of small schools, 15990–15992.

A united system of education does not exclude any child from participating in secular instruction; it gives ample opportunities to the different religious persuasions to teach their own peculiar tenets, 15994.—Parents are satisfied with the National system; it is only the extreme parties in the Protestant and Roman Catholic Churches who are anxious to uproot it; it is not the duty of the State to pay for the education of a stubborn minority, 15995–15998.—The National Board should not have yielded to any pressure; they are the trustees of the public purse, 15999.—Lord Stanley originally intended that all the National schools should be vested schools, but this was not carried out, because there were schools already built; had it been carried out the minister of each denomination would have had ample access to the schools; the admission of the clergy is not essential to the success of united education, but is very desirable, 16000–16005.—Witness is not aware whether the Synod of Ulster passed a resolution against the admission of the clergy to their school; had the schools been vested the Synod could not have done so, 16006-16010, 16018–16021.

If the proposals in Mr. Fortescue's letter (viz., the establishment of denominational training schools, appointing chaplains, &c.) had been carried out it would have been a departure from the system of united education; the Board were willing to adopt the scheme, but the Government declined to carry it out, 16011–16017.—The tendency of the Board, from the desire to conciliate two or three influential gentlemen, has been towards denominational education, 16175–16181.—Witness throughout his experience never heard a complaint from Roman Catholics, lay or clerical, against the National system, nor of the inspection of their schools by Protestants; as far as circumstances admitted, there was mixed attendance of Protestants and Roman Catholics; the opposition given by the Church Education Society was the cause of the attendance not being more mixed than it was; mixed education is on the increase, 16027–16031, 16181–16187.—In Connaught 50·5 per cent. of the schools are attended by children of different denominations; in Munster 40·5 per cent.; in Leinster 48 per cent.; in Ulster 83·9 per cent., 16188–16190, 16319.

The National system has succeeded to a great extent in mitigating the sectarian feelings which are the curse of Ireland, 16032.—Schools supported by the State should be open to all children without interfering with religious scruples, and the State should also protect minorities from interference with their religious views, 16033–16035.—Roman Catholic laity are satisfied with the mixed system, and would deplore the introduction of a denominational system, 16036–16043.—They have not given any general public expression of their opinion, not wishing to put themselves in opposition to their clergy, 16196, 16197, 16306–16330.—Candidates at a Parliamentary election would probably adapt their addresses on the subject of education to the constituencies; they would be very glad to get the approval of Roman Catholic bishops, in Roman Catholic localities, as practically they and the priests rule elections in Ireland, 16198–16204, 16298, 16211–16216.—There has been great diversity of opinion with regard to university education; at Queen's University the graduates (Roman Catholic as well as Protestant) were not anxious that the supplemental charter should be carried into effect; some twelve or thirteen left the room while the charter was under debate in Convocation, but a very considerable number remained and voted against it, 16205–16210.—It is generally supposed that Mr. Fortescue's letter did not emanate from him, it having been said that it was prepared in the office of the Commissioners of National Education; the letter, the Supplemental Charter, and the patent appointing the six senators to pass the charter, were issued under the advice of Earl Russell's Government, 16294–16305.

Convent schools are open to children of all denominations; however, no Protestant child could attend with safety to its creed, not that the nuns would break any confidence reposed in them, but all the concomitants are denominational. These schools have special advantages under the Board; firstly, there is no examination of teachers; then they have an advantage in the mode of payment, they have the capitation grant, and monitors to aid the teachers; instances of these advantages in the county of Dublin, 16044–16056.—The average payment per head is about 10*s.*; in the ordinary schools it is higher, but they are better schools, 16057–16062.—The cost of convent schools has increased since 1856, so also in the case of ordinary schools, but not in the same ratio; this ratio is not the result of guess work, but is founded on witness' knowledge of the present and former mode of paying teachers, 16063–16080.—The increase of cost in ordinary schools is 22 per cent., whilst in convent schools it is three times as much, 16264–16268.—At Oughterard, county Galway, a convent school was taken into connexion with the Board, there being already a vested school, which was afterwards shut up, 16081–16084.—The majority of the Inspectors will agree that convent schools are inferior, 16191–16195. In matters of reading, writing, and cleanliness convent schools are superior to all other schools, but with regard to arithmetic, grammar, and geography they are inferior to ordinary National schools, 16255–16263.

The Commissioners have made grants to new schools, thereby injuring existing schools; at Oranmore a vested female school was shut up, and in Antrim a Presbyterian school was much injured by the establishment of another school under Presbyterian management; it is very undesirable that a Board desirous of promoting an efficient system of education should act thus, 16081–16095, 16127–16129.

The Presbyterians never got any favour extended to them; the usual charge is that they were the cause of the introduction of non-vested schools, but in the Report for 1840 the Commissioners stated that their line of action was in accordance with their previous principles, which, as regards non-vested schools, were the same, whether under Presbyterian, Episcopalian, or Roman Catholic management, 16096–16103.

The position of teachers under the National system ought to be greatly improved; a teacher may now be dismissed without any communication with the Board; that is a power which should not be vested in the local managers, and of which the teachers complain very much, 16104–16107, 16221.—A case occurred at the Darrary school, near Clonakilty, where the teacher was obliged to break a rule of the Board, and was dismissed by the Commissioners for doing so; the Board having prohibited him from acting as teacher within fifteen miles of Clonakilty, he was appointed head-master of a reformatory school in England. This case shows that the teachers should not be liable to dismissal at the mere motion of the local managers, 16108–16119, 16217–16221.—Dunmanway model school was and is well attended by children of Protestants and Roman Catholics of about the same social class as attend the National school; there are children of a few shopkeepers in attendance, but the public have no right to complain, as the establishing such schools as this has the effect of extinguishing middle class schools in the place, 16120–16126.

The number of Commissioners of the National

Board is decidedly too large; a paid body of two or three directly responsible to Parliament, or to a Minister of Education, if there were one, a mere executive body having no discretion as to alteration of rules, would be better; it is impossible for men who are appointed as Commissioners on account of their creed to forget the Church to which they belong when any question of creed arises; at present the Commissioners assume the right of spending the public money as they think fit, 16130–16135, 16144, 16145.—Mr. Fortescue's letter being written on the day the Government resigned, is a clear indication that the system of education may be used for political purposes, 16135–16143, 16297.—The Lord Lieutenant should not have the power to change a fundamental principle; rule as to sanction of new books, 16145–16148.

Sources whence witness has derived his information since 1857, 16149–16153.—The present system of mixed education should be carried out, if properly managed, 16154, 16155.—The present rules are chiefly objectionable on the ground of the advantage they give to convent schools, 16156–16165.—Payment by results as testing efficiency of convent schools, 16166–16169.

Local aid should be provided; if made payable by a rate on the people of the parish, it is much the same thing as giving it from the public purse; more attention should be paid to school fees, as parents in many cases are well able to pay a small sum, 16170–16174. J. Wilson, esq.

The pressure on the Board has been strongest from the Roman Catholic clergy, and where a sufficient average attendance can be shown it is easy to get a grant, 16269–16273.—Evidence of Mr. M'Creedy before the House of Lords as to changes insisted on by Presbyterians; this evidence is doubtful on the face of it, 16274–16277, 16285, 16286.

If the clergy were excluded from management of schools, the number of inspectors should be increased, the inspectors becoming managers; the Board should take more of the local management, but the clergy would not submit to it, 16278–16280.—A plan allowing parents to take part in the election of a committee of management would answer in some places; no one has a right to direct the education of a child except the parent, 16281–16284.—Parliament should be very slow in introducing changes into the present system of united education, 16290–16293.

INDEX

TO THE

MINUTES OF EVIDENCE AND APPENDICES.

ACCOUNTS :

No loss has arisen from the transmission or appropriation of money by teachers ; *Macdonnell* 161–164.

School accounts are kept by teacher, certified by manager, and transmitted to Board ; *ib.* 157–160. Prescribed forms of accounts ; if return is properly made, the disposal of surplus fees would appear ; *ib.* 189–191. School accounts are examined by Inspectors ; *ib.* 216–222. Examination of, by Inspectors, the ground on which Government grant is made ; are, as a rule, accurately kept ; *ib.* 422.

School accounts are merely accounts of receipts by teachers ; managers' accounts are as to the amount of fees paid to teachers ; *Kelly* 3099–3103.

Not many cases of irregularities in teachers' accounts ; none of misappropriating money ; in the model schools there have been cases of misappropriation of fees ; *Hunter* 3176, 3177.

As a rule, teachers' accounts are accurately kept ; *Macdonnell* 422 ; *O'Carroll* 4161–4165 ; *Sheridan* 4769.

Letter to Resident Commissioner on fallacious nature of school accounts; *Kavanagh* 10781, 10782.

See also RETURNS. TEACHERS.

ADVENTURE SCHOOLS. *See* HEDGE SCHOOLS. PRIVATE ADVENTURE SCHOOLS.

AGE

At which children, boys especially, might leave school ; average age of children at school in Ireland higher than in England ; *Kavanagh* 11068, 11069.

Age of children at leaving school ; *Petticrew* 16689–16691.

Age at which children leave school ; *Toole* 21329. 21331, 21332. 21383.

Return of ages of pupils in King's Inns-street National (convent) school, and in the Central Model school ; *Keenan, page* 87.

Requirements of Privy Council as to age of children for examination, &c. ; *Toole* 21388–21390.

Age of monitors. *See* MONITORS, &c.

See also ATTENDANCE. TEACHERS.

AGRICULTURAL INSPECTOR

Could settle compensation in case of outgoing master of agricultural model school ; *Macdonnell* 24017–24020.

AGRICULTURAL INSTRUCTION

Not given in Erasmus Smith's schools, *Rudkin* 13558.

AGRICULTURAL READING BOOK :

A teacher having land attached to residence could teach the Board's manual, to the great improvement of a country like Ireland ; *Macdonnell* 419–421.

Reading it a lesson both in agriculture and in reading ; good especially for girls ; *Baldwin* 13034–13038. Reading in, should be compulsory ; *ib.* 13072.

Very good for a farming population, and serves as a good reading book ; *O'Callaghan* 20109–20112. 20129–20132.

AGRICULTURAL SCHOOLS AND MODEL FARMS :

There are 121 model farms in three grades ; 20 managed by the National Board, 18 by local parties, and 83 attached to ordinary schools ; duties of superintendent in respect to the farms of the Board ; *Baldwin* 4462–4466. 4475–4488. The 83 school farms vary from half an acre to upwards of twenty acres ; the superintendent visits them, but does not interfere in the management unless in cases of violation of rules ; *ib.* 4496–4498. 4511. The model farms are worked at cost and responsibility of Commissioners ; experiments are discouraged, and established principles of farming illustrated ; they are properly restricted to ordinary farming well carried out ; *ib.* 4524–4530.

Description of the different classes of agricultural schools, and the dates and circumstances under which they were established, commencing with 1837 ; *ib.* 4656.

Cost of a school-farm to the Commissioners is £5 a year for salary, exclusive of small grants of books ; *ib.* 4621, 4622.

The steward is head of the farm ; the local manager is called the *agriculturist* ; the literary teacher has superintendence over the boarders ; agriculturists are paid from £3 10*s.* a month, with rooms, to £120 a year ; *ib.* 4473, 4474.

None of the farms are cultivated wholly by the school boys ; agricultural is never allowed to interfere with school instruction ; *ib.* 4499–4503.

The teachers seem more intelligent than ordinary school teachers ; the Board's farms are supplied with pupils from smaller farms ; *ib.* 4504–4508.

Pupils generally do not seem willing to avail themselves of agricultural instruction ; causes of such unwillingness ; *ib.* 4613–4619.

Distinction between the small agricultural schools and school gardens ; teacher arranges the rotation of crops ; boys work over-hours, for which they are paid ; *ib.* 4509–4512. Principles on which the profits are calculated ; *ib.* 4514–4517. Agricultural schools differ but little from ordinary farms ; *ib.* 4518–4523.

The only model farm in Ireland unconnected with the Board is at Oldcastle ; detail of the farming there ; and comparison of results of the small tillage farm, taking Oldcastle on one hand, and a large grazing farm on the other ; *ib.* 4140–4144. 4678–4689. 4697–4704.

Athy agricultural school is managed with great skill ; *ib.* 4602. The greater number of agricultural pupils are in Limerick, the Commissioners having given a larger number of free scholarships to that than to any other school ; *ib.* 4605, 4606. Cork and Belfast are the two largest schools ; *ib.* 4607. Thirty scholars are in the Derrycastle school ; *ib.* 4608–4612.

Letters written by Lord Monteagle in 1847, strongly urging the establishment of agricultural schools ; *ib.* 4649, 4650.

Agricultural teaching can be adopted in the National schools without injuring their literary efficiency ; no subject likely to be more useful ; *ib.* 4651–4655.

Prejudice in Ireland against small farms ; *ib.* 4662–4673.

AGRICULTURAL SCHOOLS AND MODEL FARMS—*cont.*

The system of agricultural schools was first established in Ireland by the Commissioners; it is a system *sui generis*; *Baldwin* 13087, 13088.

Difference between model agricultural schools and ordinary school farms; Government contributes £10 a year to model agricultural schools; *ib.* 13091–13097. Managers of these schools differ in no respect from managers of ordinary vested schools; local management not so efficient as that of the Board; the position of the teacher is a grade higher than that of ordinary teachers, also their literary proficiency; *ib.* 13098–13107.

Reasons for the failure of attempts to establish agricultural schools and classes, and why agricultural instruction in primary schools has not more extended; *ib.* 12935–12948.

Validity and advantage of the addition of farms to National schools, and of teaching small farmers the value of land; the principles of agriculture can be taught as well upon one acre as upon 100; the better an educated farmer cultivates, the more capital he will have to buy with; *ib.* 12972–12978.

Number of hours given to indoor instruction; sometimes the play hour is occupied with agricultural teaching, and the boys like it; *ib.* 13032, 13033. Reading the Agricultural Class Book is a lesson both in agriculture and reading, good especially for girls; all girls ought to learn the rules of dairy husbandry; *ib.* 13034–13038. 13072.

Payments for agricultural instruction to the teacher and to a few children by the Board and by the teacher, and sometimes the patron, to the children for their labour, *ib.* 13039–13049.

Principle of valuation carried out in these schools same as in the model schools; the managers, as a rule, take an interest in these farms, especially those who are priests, *ib.* 13050–13053.

A good class of boarding pupils in the Kilkenny agricultural school; the want of success in the boarding class there and at Limerick and Cork not so great as appears, the pupils leaving their schools for the Glasnevin establishment, *ib.* 13223.

Failure of the boarding establishments from their too rapid increase; existing provincial schools quite adequate, to bring out the most deserving lads as skilled agriculturists; their support advocated, *ib.* 13213–13217. There was no demand for the young men first educated, they had to emigrate, *ib.* 13218.

Inadequate remuneration offered to persons so educated, *ib.* 13219–13222.

The number of applicants at these schools increasing, except at Belfast, *ib.* 13224–13227.

The minor model schools vested in the Board correspond to schools vested in trustees; the literary department should be made first-rate, and the farm made a real model of skilful cultivation; boarding might be continued in the district model schools, *ib.* 13228–13237.

Rent of the spade labour farm £3 19*s.* 3*d.* per acre; if it were in Sligo the land would not be worth more than 35*s.* per acre; the Glasnevin system might be carried out in any part of Ireland with profit, *ib.* 13166–13173. Glasnevin farm is worked as a normal representative of the farming of the country, *ib.* 13188–13191. The value of pupils' labour cannot be estimated; it is of little value; the only estimate can be made of the labour that would require to be paid for; profit that might be made by a man working 5½ acres in the neighbourhood of Dublin efficiently, *ib.* 13174–13187. *See also* GLASNEVIN.

The fact that teachers can improve their incomes by means of school-farms, and by qualifying themselves for agricultural teachers, ought to be an inducement to patrons to give land for the purpose; the schoolmasters fear that, in taking up agriculture, they would lose their literary status; no legal difficulty in establishing 500 schools in accordance with these views; a moderate distance between the

AGRICULTURAL SCHOOLS AND MODEL FARMS—*cont.*

school and the farm no objection; *Baldwin* 12990–12995.

The present system of payment should be changed; payment should be by results, both in agriculture and literature; the teaching of agriculture should be on a par with arithmetic, *ib.* 12996–13010.

Generally the teachers of National schools in rural districts are under-paid; the addition of teaching agriculture to a school has brought an average addition to a teacher's income of nearly £20; an example cited of a really successful agricultural school, *ib.* 13011–13031.

General prejudice in Ireland against model farms; the feeling is diminishing; suspicion by tenants of any move of landlords; *ib.* 13196, 13197. 13266–13272.

Average number of pupils, boys and girls, attending schools with farms; average age of boys capable of earning 1*d.* per hour at the outdoor labour; reading the class book should be compulsory, working on the farm must be voluntary; *ib.* 13058–13078.

One at Clonkeenkerril in Galway not popular with neighbouring occupiers; serves as a good example; its teacher has succeeded in a pecuniary point of view; *O'Reilly* 14874–14881.

Advantages of; *Malony* 17056–17069.

The minor agricultural schools and the system of boarding in them have proved a failure, and should be got rid of as soon as possible; scientific agricultural training to be confined to two or three colleges, and useful spade husbandry taught to the poor; *De Vere* 20231–20234. 20280–20284. 20415–20420.

The minor schools were too small to teach scientific agriculture, and too small in proportion to capital expended; *De Vere* 20182–20189.

Failure of; *M'Menamin* 21946. 21955–21957. Might be useful to teachers but not as schools for the general management of farms; *ib.* 21959.

Desirability of multiplying small agricultural schools; they would be a means of improving the income and status of the teachers; as to compensation for crop in case of teacher leaving; the system is working much better now than it did at first; circumstances of Belfast model farm; *Macdonnell* 24009–24036.

Farra agricultural school. *See* FARRA SCHOOL.

Useless and expensive; are accompanied by evils of mixed system; *Card. Cullen* 26611, 26612.

A good training agricultural school would be useful; cost of such; *ib.* 27048.

AGRICULTURE:

Desirability of having schoolboys taught agriculture; elements of success in such teaching; *Baldwin* 12979–12989. 13034–13038.

Should be taught practically in schools more generally than is done; *Matthews* 18546–18551.

Might be often taught, if schoolmasters had residences with a piece of land attached; *O'Callaghan* 20098–20104.

Failure of Incorporated Society in teaching; *Hackett* 25883, 25884.

See also AGRICULTURAL SCHOOLS AND MODEL FARMS.

AGRICULTURIST. *See* AGRICULTURAL SCHOOLS AND MODEL FARMS.

ALBERT INSTITUTION. *See* GLASNEVIN.

ALLIES, THOMAS W., Esq., M.A., Secretary to Catholic Poor School Committee of Great Britain, evidence of, *pages* 1126–1141.

ALLOWANCES:

Are paid to aged teachers on retirement; a system of pensions would be better and more economical, *Hunter* 3596-3601.

AMERICA:

Great number of Protestants in, are educated by nuns, and retain their faith, *Card. Cullen* 27238.

ANDREWS, Rev. WILLIAM, Vicar Choral of St. Canice, Kilkenny, and Deputation Secretary of Church Missionary Society, evidence of, *pages* 625–632.

"ANGELS' WHISPER:"

Objections to book containing Lover's song, by a Presbyterian minister; *Bp. Keane* 15589. 15909–15922.

Passage in, objected to by witness as improper to be used in a mixed school; *J. Porter* 18570. 18583–18585. 18593. 18652, 18653.

APPENDIX (entries in). *See* RETURNS, TABLES, &c. *Appendices.*

ARDSTRAW:

Schools in, under the Church Education Society; *M'Ivor* 13767–13769.

ASSOCIATION, INFLUENCE OF. *See* MINORITIES.

ATHY AGRICULTURAL SCHOOL. *See* AGRICULTURAL SCHOOLS AND MODEL FARMS.

ATHY MODEL SCHOOL:

Reasons for withdrawing Catholic children from; *Card. Cullen* 27443–27445.

ATKINS, Very Rev. WILLIAM, D.D., Dean of Ferns, evidence of, *pages* 906–912.

ATTENDANCE OF CLERGY TO GIVE RELIGIOUS INSTRUCTION. *See* CLERGY. RELIGIOUS INSTRUCTION.

ATTENDANCE OF TEACHERS:

Checks as to regularity or otherwise of; *Hunter* 3180–3184. 3275–3277.

See also TEACHERS.

ATTENDANCE AT SCHOOL:

If attendance were regular, two years would be too long for a child to remain in the First Book; a child from the beginning would be in it about a year; *O'Carroll* 4415, 4416. It is unusual for boys of fifteen to remain in school, unless preparing to be monitors or teachers; there are 120 female monitors to 17 boys, *ib.* 4417–4419.

Best schools, as regards attendance and proficiency, are in the rural districts; *Sheridan* 4800.

Daily, at monastic schools; *ib.* 5385, 5386.

Of children at school is influenced by change of teachers, and lowered reputation and undue multiplication of schools; *Kavanagh* 10173–10185. Proportions of children according to the population attending State schools in Ireland and Great Britain, *ib.* 10265–10281.

Particulars of fluctuations of attendance in various districts; *ib.* 10232–10286.

At night schools; *ib.* 10287–10296.

Fallacious nature of Board's returns as to attendance of children at school; *ib.* 10297–10304. 10310–10318.

Average daily attendance about one-third of number on roll; *ib.* 10327–10332. Irregularity of attendance extends over all ages; *ib.* 10333–10335.

Time required, according to average attendance, for passing from First Book to Fourth Book; *ib.* 10336.

Average school age is 9½ years; average attendance a little over a day a week; theoretically, seven years of age and under represent First Book, eight and nine Second Book, &c.; actual returns show nine in First Book, and nine, ten, and eleven in Second Book, &c.; *ib.* 10337–10343. Children leaving while in First Book soon forget all they have learned; to retain some knowledge of reading, they must reach the Third Book; not more than 25 per cent. in Third Book and above; *ib.* 10344–10349.

Proportion of, to numbers on roll, of children who remain to enter Fifth Book; only 19·8 per cent. able to read a verse at sight; *ib.* 10739. Numbers on roll, numbers admitted, and numbers at close of each year, from 1861 to 1865; *Kavanagh* 10745–10750.

Most irregular in the best part of Ireland; *ib.* 10758, 10760.

No uniformity as to maximum or minimum attendance throughout the country; *ib.* 10762–10766.

Letter showing the fallacious nature of returns relating to school attendance, time spent in, and efficiency of instruction, &c.; *ib.* 10781, 10782.

Instance of premium paid by lay patron to induce; *ib.* 11035.

Compulsory, of a few Catholic children at Protestant schools; *ib.* 22706–22732.

The number of children on the books represents an average attendance of one-third; this average could not be improved, the children being engaged in agricultural operations, when they cannot attend school; *Lord Oranmore* 13416–13424.

Difficulty of procuring adequate attendance of children same in Ireland as in England; payment by results would stimulate teachers to obtain better; *O'Reilly* 14870.

Deficiency in attendance chiefly owing to parents; much depends on personal influence and exertions of Catholic clergy; *ib.* 14871, 14872.

The system of aiding schools in proportion to attendance is defective; where attendance is small is where aid is most required; in default of funds the rating system must be resorted to; *Andrews* 14744–14750. 14801–14808.

Would not necessarily be diminished by making schools denominational; insufficient attendance arises from negligence; *O'Reilly* 14914–14916.

Attendance of Protestants in the National schools varies; in districts where Church Education schools abound none attend the National schools; *Wilson* 15945.

Children do not remain long enough at school, chiefly through ignorance and poverty of parents; *Petticrew* 16451–16455.

Better attendance might be secured by more general payment of school fees, payments in advance, premiums for daily attendance, &c.; *ib.* 16456–16465.

Mixed attendance in all witness's schools, and in some denominational schools near; children in all mix cordially together; *ib.* 16518–16529. 16537.

Depends more on the efficiency of the master and proximity of the school than on denomination; *ib.* 16767–16772.

Children remain too long in lower classes; time wasted in mere spelling; lessons learnt by rote from too often repetition; *Mahony* 17039. Payment by results not a remedy for this; *ib.* 17041.

Might be affected by teacher enforcing payment of school fees, and so endangering his salary; *Macdonough* 17744–17746.

Salary of teacher depends partly on average attendance of 35 children, which is sometimes impossible; *ib.* 17657–17662.

Attendance of children at school seldom long enough to enable them to read fluently; *O'Callaghan* 19956–19970. 20113–20115.

Should not be *solicited* by teachers; *Gallagher* 19305.

Diminished numbers in schools owing to decrease in population; *O'Callaghan* 20056.

Generally very irregular; *Warburton* 20844, 20845. Best means are adopted by National Board for insuring correct returns of; *ib.* 20953.

Better promoted by the Revised Code; *Toole* 21225–21231.

Attendance necessary to entitle children to personal examination (in England); *ib.* 21289–21295.

In a system of gratuitous National education should be made compulsory; children paying school fees are generally more punctual in attendance; *ib.* 21309, 21310.

ATTENDANCE AT SCHOOL—*continued.*

Difference in what is understood as attendance in England and Ireland; *Toole* 21384.

No comparison can be drawn between Irish and English Catholics as to average attendance, circumstances are so different; *ib.* 21497–21504.

Age at which children leave school too early; they are put to hard work too soon; compulsory education would not do, unless Government fed and clothed the children as well; *M'Menamin* 21960–21969.

Depends greatly on opportunities of children getting casual employment; *Forde* 22978.

Complaint that salary depends upon average attendance of children at school, a thing not depending on the teacher; *Matthews* 28268.

Salaries of teachers should not depend on average attendance of children, over which teachers have no power; *ib.* 18326–18329. 18407, 18408.

If reduced, teachers suffer, though not by their fault; *ib.* 18441–18444.

Per-centage of, in Dundrum, Booterstown, and Blackrock schools; *Forde* 22977. In school conducted by ladies of the Sacred Heart attendance is rigidly enforced; *ib.* 22979.

Would depend on character of the population; in some districts payment of school fees would reduce attendance two-thirds; *ib.* 22986.

Number of children at Sunday schools in Ireland; *Pilkington* 23503. Reasons for their non-attendance at day schools; *ib.* 23507-23509. 23512.

Average attendance in aided schools, in England, Scotland, and Ireland; *Kavanagh* 12063–12071.

Average attendance is only 49 per cent. of numbers on the roll; *Bp. Keane* 15668.

Average; three pupils on the roll are taken to represent one in attendance; *Kavanagh* 23472.

Average attendance in some schools of Non-subscribing Presbyterians; *J. S. Porter* 18055.

Average daily attendance at Christian Brothers' schools. *See* CHRISTIAN BROTHERS' SCHOOLS.

Fictitious nature of returns of, in reference to Shankill or Belfast; *Kavanagh* 10700-10719.

Of Roman Catholic children on prayer at opening of school, disbelief of; *O'Reilly* 15096–15099.

Mixed attendance was diminished by the opposition of the Church Education Society; *Wilson* 16030.

Per-centage of mixed attendance in the National schools, in the four provinces; *ib.* 16188–16190 16319.

Attendance at model schools more regular than at convent schools; *Fitzgerald* 12221, 12243. Explanation of this; *ib.* 12244–12248. Means taken to ensure regularity of attendance at model schools; *ib.* 12249–12255. Surprise at Mr. Keenan's statement that attendance was better in convent schools than in model schools; *ib.* 12262, 12263.

Number on books and average attendance at St. Wilfrid and St. Alphonsus' Roman Catholic schools, Manchester; *Toole* 21171–21175. 21241–21243.

In schools at Clonakilty; *Wilson* 15954 *et seq.* 15970 *et seq.*

At Drumkeerin school (witness's); *Gallagher* 19177–19189. 19279.

In Ovens National school much affected by the seasons, the district being agricultural; *O'Callaghan* 19748–19752. *See also* OVENS NATIONAL SCHOOL.

Table of highest and lowest periods of attendance in National schools in 1865 and part of 1866; *Kavanagh, page* 430.

Attendance and grant per pupil in model, ordinary, and convent female schools, 1862; *ib., page* 974.

See also NATIONAL SCHOOLS: 3. *Attendance at.*

AUSTRIA:

Education system of, is denominational; *Bp. Keane* 15604.

Denominational system in; *Card. Cullen* 26630.

AUSTRIA—*continued.*

Certain sort of recognition of rights of Catholic clergy; *Card. Cullen* 27119–27125.

AUTHORIZED VERSION. *See* SCRIPTURES.

BAILIEBORO' MODEL SCHOOL:

Number of pupils on roll, and average attendance; *Fitzgerald* 8308, 8309.

BALDWIN, THOMAS, Esq., Superintendent of Agricultural schools under National Board; evidence of, *pages* 193–205. 547–564.

BALLINA:

One of the Connaught Mission schools; orphanage at, in connexion with; *Kavanagh* 11074. 11087–11094.

BALLINDINE SCHOOL:

As to the religious instruction in; *Lord Oranmore* 13354 *et seq.*

BALLOUGRY:

New schools erected at, by the Irish Society; *Williamson* 21051.

BALLYMENA DISTRICT

Contains much manufacturing industry; many small farmers, who also carry on weaving; schools in; effect of weaving on the education of the children; *Hunter* 3140-3146. 3153, 3154.

In the Ballymena district, out of nine schools not under Roman Catholic management, seven may be attended by Catholics, who may have been forced to attend by the employers of their parents; *Bp. Dorrian* 9100–9106. 9258–9260.

Witness agrees with sentiments expressed in a letter read as to evil effects of mixed education in neighbourhood of; *Kavanagh* 22667–22669.

Excellent condition of Mr. Lynch's and the Presbyterian schools at; mixed education is disappearing in; eight out of thirteen schools in, are of mixed Protestants only; compulsory attendance of a few Catholics at Protestant schools; *Kavanagh* 22706–22732.

BANDON:

Erasmus Smith's school at, very good; *Rudkin* 14014.

BAR:

Members of, not exponents of the opinions of the people; *Ross* 17429, 17430.

BELFAST:

As to nuns' schools in; *Bp. Dorrian* 8734–8753.

Fictitious nature of returns of attendance at school in reference to Shankill or Belfast; *Kavanagh* 10700–10719.

Dishonesty in conducting examinations under Science and Art Department, chiefly in Belfast; *Newell* 24811–24813.

BELFAST ACADEMIC INSTITUTE:

Complaints of proselytism at; although some distinguished men have been educated there, it is a dangerous place; *Card. Cullen* 26633. 27126–27132.

BELFAST AGRICULTURAL SCHOOL. *See* AGRICULTURAL SCHOOLS AND MODEL FARMS.

BELFAST CATHOLIC INSTITUTE. *See* YOUNG MEN'S ASSOCIATION.

BELFAST DEAF AND DUMB INSTITUTE:

Pupils in, are reared in tenets of Protestant Church; *M'Donnell* 14264.

BELFAST MODEL FARM:

Circumstances of; *Macdonnell* 24023–24030.

BELFAST MODEL SCHOOL:

Travestie in, of a rite of the Roman Catholic Church; *Bp. Dorrian* 8692–8694. 9009–9018. Other abuses connected with; *ib.* 8695–8711. 9009–9029.

Inutility of a Roman Catholic chaplain in; *ib.* 8864–8871.

Fees paid in; *ib.* 9035–9045.

A time for religious instruction is set apart in, but religion is not to be taught by a set process; *ib.* 9116.

The Belfast model school at its opening was largely attended by Roman Catholics; notwithstanding some favourable circumstances the Catholic authorities saw that the system was leading to an erroneous idea as to its safety, and they withdrew the nuns and priests; *ib.* 8993–9005.

Number of Roman Catholics who continue to attend, notwithstanding the opposition of their clergy; *J. S. Porter* 18211–18214.

BELFAST RIOTS:

Notwithstanding Mr. Keenan's report, the pupils of the model school, outside the precincts, were like other rioters; *Bp. Dorrian* 9006–9008.

Good effect of National system shown by good conduct of pupils during; *Macdonnell* 11354. *Petticrew* 16620.

BELFAST WESLEYAN COLLEGE:

Established for giving a strictly religious education; *M'Millen* 14614, 14615. Does not occupy the position of an ordinary National school; it is more of an intermediate school; *ib.* 14617, 14618. It is virtually a feeder for Queen's College; *ib.* 14619. Expense of, entirely provided out of Wesleyan funds; *ib.* 14620.

Students at Queen's College board at, under supervision of their own ministers; *ib.* 14624.

BELGIUM:

Superiority of management of the small farms in Belgium to those of Ireland; *Baldwin* 13273–13302.

Superior production of flax in Belgium; *ib.* 13303–13320. 13328–13330.

Complete course of technical instruction on flax-growing at school of Ghent; *ib.* 13331–13333.

Upper systems of education in Belgium are governed by lay authority, to the detriment of the peace of the country; *Bp. Keane* 15603.

Liberty of education in Belgium; *Card. Cullen* 26630.

Parish priests in Belgium occupy similar position to priests in Ireland; *ib.* 26679–26683.

State of religion and education in Belgium; *ib.* 27079–27086.

BEQUESTS:

To the Incorporated Society, their number and objects; *Hackett* 25831–25840. 25877.

BERKELEY, Rev. LOWRY E., Presbyterian minister at Lurgan, Armagh, and convener of Committee on Elementary Education in General Assembly, &c., evidence of; *pages* 473–488. 589.

BESSBROOK SCHOOL:

A large united school for boys, girls, and infants, under a member of the Society of Friends, in connexion with the National Board; no clergy of any denomination admitted; no interference allowed with children's religion; Mr. Kavanagh's accusation against the school contradicted; religious instruction between 9.30 and 10, from which anyone may be absent; a Roman Catholic teacher appointed in, to prevent jealousy; no pressure on Catholic children to make them attend Bible class; all are compelled to attend school, to receive instruction authorized by National Board; *Richardson* 25686–25710.

BIBLE. *See* SCRIPTURES.

BLACKER, STEWART, Esq., patron of Church Education Society schools, evidence of; *pages* 713–718.

BLACKROCK CONVENT SCHOOL:

As to its connexion with Booterstown convent; *J. S. Porter* 18130–18137.

Attendance at; *Forde* 22977. Poor populace in neighbourhood of; *ib.* 22986. As to teaching by nuns in; *ib.* 23125, 23126.

See also BOOTERSTOWN CONVENT SCHOOL.

BOARD OF WORKS:

Action of, with respect to building schools, &c.; *Keenan* 1589–1597. 1897–1900.

Complaints of delay by, in repairing schools in south-west of Ireland; *ib.* 1868, 1869. Are informed by their own officers and by the National Board of repairs required; *ib.* 1870–1874. 1907, 1908.

Repair of school-houses by; *Sheridan* 4985, 4986. Dilatoriness of, in executing repairs; *ib.* 4997. 5542, 5543.

Amount paid to, by National Board; now paid by a separate grant, of amount of which the public is ignorant; detail of expenditure of, from 1857 to 1869; *Kavanagh* 10862–10866.

As to means of, and delays in, repairing schools by; *Macdonnell* 11159–11168.

Division of the country into six districts for purposes of; six clerks of works; their duties; accounts; notice to act comes generally from National Board; action thereupon; *Stack* 14058–14062. 14209.

Number of schools now in charge of Board and in course of building; *ib.* 14063–14066. 14083, 14084.

Practice of, with respect to repairs; *ib.* 14100–14106. 14125–14129. 14139–14151.

Take no cognizance of schools vested in trustees only without special instructions; *ib.* 14117–14120.

Estimate and expenditure of, last year, on National schools; *ib.* 14177–14187.

As to execution of projected gas works at Glasnevin model school; *ib.* 14193–14204.

Complaints of delay by, in repairing, &c., vested schools; *De Vere* 20460–20470. 20479–20481.

The inspection under, by clerks of works, of buildings and works; manner of, in a great degree discretionary; *Owen* 27471–27483.

Delay in completion of works begun by, not always dependent on the Board; *ib.* 27484, 27485. 27510, 27511.

Proportion paid by, for vested schools; *ib.* 27486–27496.

As to estimates by, for new schools; *ib.* 27497–27507.

Plans and procedure of, on application to build new schools; *ib.* 27508–27511.

Inspection of school buildings under, by clerks of works; *ib.* 27513–27519.

Alteration of districts of clerks of works under; *ib.* 27525–27530.

New plans for ordinary schools submitted by, not yet settled; the plans are lost; *ib.* 27550–27554.

As to its action with regard to supply of gas at Glasnevin; *ib.* 27558–27560.

Inadequate staff of; *ib.* 27521. 27561–27563.

Vote annually taken by, for building vested schools; number built; *ib.* 27577–27581.

As to designing and building of model schools and infant schools by; *ib.* 27582–27618. 27622, *et seq.*

Number of officers in department of; architect of; the staff is inadequate; *ib.* 27634–27641. 27646.

Organization of, is suitable to undertake the repairs of all the schools in Ireland; but it would be worth while to have an organization for the schools outside the Board of Works; *ib.* 27647, 27648.

BOARDING HOUSES:

Objections to, on the part of numerous managers; *O'Sullivan* 7990. Cost of boarding and lodging teachers as compared with some English towns; *ib.* 8021–8029.

Separate from training schools desirable; they need not be under Government; *Ross* 17467–17470.

For teachers in training, *see* MARLBOROUGH-STREET TRAINING ESTABLISHMENT.

BOARDING HOUSES, DENOMINATIONAL. *See* DENOMINATIONAL BOARDING HOUSES.

BOARDING SCHOOLS :

Establishment of, for the poor, proposed ; *Andrews* 14863, 14864.

Of Incorporated Society ; their number, course of instruction, number of children, and payments in ; *Hackett* 25788. 25793. 25865–25870. Advantages of, in themselves, and over the old charter schools ; *ib.* 25885–25894.

BOARDS OF GUARDIANS. *See* GUARDIANS, BOARDS OF.

BOARDS, LOCAL. *See* LOCAL BOARDS.

BOOKS :

Suitable for libraries for the use of those who have left school might be supplied if demanded ; *Fitzgerald* 8616–8622.

Managers should have the choice of books, but they must be amenable to the heads of their religious denomination ; Christian Brothers' books unobjectionable to Roman Catholics ; it cannot be conceived that one book would please parties of various religions ; *Bp. Dorrian* 8681–8684. The books of the Society for the Diffusion of Useful Knowledge, though unobjectionable in themselves, would not be sufficient for Roman Catholics ; *ib.* 8686, 8687.

The choice of, should be left entirely to the manager ; objections to passages in the Fourth Book ; *ib.* 8678. 8964–8967.

Objectionable to Catholics ; one instanced ; impossible to produce a book that will be unobjectionable to both Catholics and Protestants ; *ib.* 8918–8925. 8964–8968. A prohibition of a book is never withdrawn ; young persons might be allowed to read neutral books if they received sufficient Catholic instruction *pari passu* ; *ib.* 8926–8928.

Use of Board's, not nominally, but actually compulsory, as they will not sell any but their own at reduced price, and expense of books is an important item ; *ib.* 8835–8837.

Books alone cannot teach religion ; *ib.* 8830. Books used in a Roman Catholic system must be approved by Catholic authorities ; *ib.* 8969.

To be used in training schools must be approved of by Roman Catholic bishops ; *ib.* 8946.

Of the Church Education Society very good ; those of the National Board have been framed upon them ; *Kavanagh* 10882, 10883.

Of Christian Knowledge Society are used in Irish Church Mission Schools ; *Cory* 11910.

No book of a moral or general character could be written to be satisfactory to all denominations ; in the ordinary occurrences of a school religious allusions are unavoidable ; *Kavanagh* 12303, 12304.

Of Christian Knowledge Society generally used in Erasmus Smith's schools ; in many, the National Board's books ; *Rudkin* 13947 ; *Thorp* 12815. Half the expense paid by governors, half by the children, who retain them ; *Rudkin* 13548.

Of a general character should only be used, for protection of minorities ; *O'Reilly* 14930, 14931.

Decidedly undesirable to have one set of books for all the schools of the country ; *ib.* 15052.

The National Board's books, in the desire to make them unobjectionable to all, have been made colourless and flavourless ; the effect has been to make the Government unpopular ; *ib.* 15053–15055.

If model schools were turned into denominational schools any books might be used ; in case of deficiency the National Board should procure the compilation of good ones, giving the copyright to the public, and letting competition determine the price ; *ib.* 15013, 15014.

For a uniform system of secular education books might be selected which would be found acceptable to all classes ; should be chosen by officers appointed for the purpose ; *Warren* 15253–15258.

BOOKS—*continued.*

Neither books of Board nor Ten Commandments give religious instruction ; State should prescribe certain books, and if they be not used stop the grant ; *Warren* 15278–15280. Any religious body might prepare books, but they must be fit for general use ; all approved books to be supplied at reduced prices ; *ib.* 15298–15302. 15305, 15331.

If objectionable the bishops would claim the right of putting them out of the school ; *Bp. Keane* 15573–15576.

If a book contained matter dangerous to the State, the question of its expulsion should be referred to the bishops ; *ib.* 15581.

Roman Catholic bishops do not insist on decisive authority as to secular books ; *ib.* 15570.

Used in Church Education Society's schools contain matters offensive to Catholics ; *ib.* 15614.

If the State were dissatisfied with books used it should complain to the bishops ; if the complaint were not attended to the State would find its own remedy by closing the purse strings ; *ib.* 15692–15697.

Tendency of reading not checked for want of ; people do not avail themselves of what there are ; the per-centage allowed to teachers on sale of, one means of keeping up supply in schools ; managers never take the per-centage ; *Mahony* 17255–17262.

As to the alleged exclusion of history from the present school books, it is a difficulty easily overcome ; *Ross* 17472, 17473.

Used in schools in Canada formerly those of the Irish National Board, were considered satisfactory ; *Gordon* 18764–18766.

In witness's suggested secular system no secular books could be considered objectionable, therefore any might be used ; *Bp. of Down and Connor* 19617. No denominational books should be allowed ; *ib.* 19630–19634.

Common law should punish introduction of sedition into school books ; *ib.* 19715.

The State cannot give up all control over books to be used in a National system of education ; *ib.* 19738–19741.

Uniformity of, desirable ; *O'Callaghan* 19794. 19827, 19828.

Used in Roman Catholic schools in Manchester ; are much better than the National Board's books ; variety in, desirable, which would be no difficulty to Inspector ; *Toole* 21278–21284.

The books used in workhouse schools are impregnated with Protestant principles ; Catholic children in the minority must take their chance ; *ib.* 21437–21440.

Disadvantages of having one uniform set of, all over the country ; the National Board's (Irish) books are uninteresting and dry, and above the intellectual standing of children ; *ib.* 21481–21490.

Passages in Burns' "Standard Reading Book," unfit for Protestant children ; *Byrne* 21743–21748. 21761, 21762.

Published by Sunday School Society ; *Pilkington* 23550–23555.

There should be free trade in ; in denominational schools any books might be used ; people go where they get the best article ; *Forde* 23128–23130.

Managers of Catholic schools in England use any books they please ; *Allies* 25430–25439.

Great importance of good books ; every manager should select his own ; Board should have authority to prohibit anything treasonable or illegal ; ecclesiastical authorities should look to religious part ; National books are in reality forced on the people, and compilation and sale of other books are prevented by free grants and selling at reduced rates ; Board's books compiled by strangers to Ireland, no Catholic being employed except on Third Book ; value of Board's books very trifling ; if all were thrown into the sea it would be no great loss ; *Card. Cullen* 26619.

BOOKS—*continued.*

Haughton and Elrington's Mathematics used in Catholic schools; *Card. Cullen* 27192.

See also CHRISTIAN BROTHERS: 2. *Books.* CHURCH EDUCATION SOCIETY: 5. *Books.* NATIONAL EDUCATION, BOARD OF: 4. *Books.*

BOOTERSTOWN CONVENT SCHOOL:

As to its connexion with Baggot-street and Blackrock school; *J. S. Porter* 18130–18137.

Attendance at; *Forde* 22977. Monitors taught by nuns at; *ib.* 23110 *et seq.*

BROUGHSHANE SCHOOL:

Witness, in visiting, did not represent himself in any way as a Commissioner of Inquiry; denies the truth of an affidavit by teacher of the school that he did so; as to certain other matters connected with his visit to; *Kavanagh* 22603–22616. 22626–22633.

Denial of Rev. A. Robinson, patron of the school, that any interference was ever attempted with the religion of Roman Catholic pupils; *ib.* 22639–22645.

BRUNSWICK-STREET, DUBLIN:

Erasmus Smith's school at, very good; *Rudkin* 14014.

BUILDING GRANTS:

Conditions on which made by Privy Council in England; *Toole* 21458–21464.

Amount of Building Grants received by Catholic schools in England from Privy Council, 1858–1867; *Allies* 25584.

CABRA. *See* DEAF AND DUMB INSTITUTE AT CABRA.

CANADA:

Information as to schools in; *Gordon* 18923, *et passim.*

Points of difference as to management between Canadian and Irish schools; the Canadian system is preferable; *ib.* 18972–18974.

System in Upper Canada; protection of minorities; *Card. Cullen* 26633.

Education is denominational in Lower Canada; *ib.* 26633.

See also SEPARATE SCHOOLS.

"CANVASSING":

Complaints that parents were "canvassed" to sign certificate book, so that their Catholic children might be present at Protestant religious instruction; *Kavanagh* 22329–22340. 22380–22407. 22411.

CAPITATION FEE:

Presentation Brothers paid by; difference between the Brothers and National Board concerning; *Townsend* 17297. 17335–17346.

Payment of nuns by. *See* CONVENT SCHOOLS: 2.

CAPPAGH SCHOOLS, co. Tyrone:

Numbers and admixture of children attending without inconvenience or indifference to religion; *Byrne* 21555–21566. 21587–21590. Small amount of school fees paid in; landowners subscribe to; two of the schools have free residences attached; *Byrne* 21572–21575. Model school in the parish; children of higher classes attending, ought to pay higher fees; *ib.* 21576, 21577. 21582–21584. 21619.

The Protestant schools are non-vested; therefore no religious instruction is given to the Roman Catholic children; the Roman Catholic school is vested, and witness's curate instructs the Protestants there; *ib.* 21591–21599. 21605–21611. Catholic children attend the Protestant school on account of its superiority; *ib.* 21601–21604. 21680–21682.

CARDWELL, Mr., LETTER OF:

Reply of Roman Catholic bishops to; *Bp. Keane* 15565.

CARLILE, Mr. JOHN:

His report quoted as to the true meaning of "mixed education;" *Lord Oranmore* 13454.

CARLILE, Rev. JAMES:

Extract from evidence of, respecting convent schools; *Kavanagh* 23450.

CARMICHAEL SCHOOL, CORK:

Attached to Presbyterian church, a mixed school of Established Church and Presbyterian children, is not attended by Roman Catholics; *Sheehy* 26460–26466.

CASTLEWELLAN DISTRICT:

Manufactures and mills give extensive employment in; religious character very much mixed; Cookstown district similar; *Hunter* 3150–3152. 3529.

CASTLEKNOCK:

As to schools at, and the action of the National Board with regard to; *Macdonnell* 23726, 23727.

"CATHOLIC CASE STATED":

Correspondence between Archdeacon Stopford and J. W. Kavanagh, esq., in the *Morning News*, in reference to a pamphlet by the former upon the "Catholic Case Stated;" *App.* xviii., *pages* 1312–1315.

CATHOLIC EMANCIPATION:

Impetus given to education by; *Card. Cullen* 27230.

CATHOLIC INSTITUTE. *See* YOUNG MEN'S ASSOCIATION.

CATHOLIC POOR SCHOOL COMMITTEE, ENGLAND:

Members of; committee meets once a year in London, business is managed in the interim by a sub-committee; committee is nominated absolutely by the bishops, who consequently do not sit on it. Catholic schools were brought into union with Privy Council through the committee, the arrangements for admission being contained in minute of 18th Dec. 1847. A school committee regulates the teaching and discipline in ordinary schools, the priest or clergy managing the religious part. Sixty-four schools have received building grants, all of these being vested in trustees. Inspectors examine in secular subjects only; *Allies* 25313–25339. 25413–25419. 25448–25459.

Committee find a difficulty in obtaining a supply of good male teachers; some of the schools are under teachers trained by the National Board; their classification would not hold in England, but they would have to undergo same examination as other teachers; *ib.* 25359–25363. 25534–25536. No disputes have arisen with the Privy Council; *ib.* 25379, 25392. 25578.

Very few Protestants attend the Committee's

CATHOLIC POOR SCHOOL COMMITTEE, ENGLAND—*cont.*

schools; no difficulty in making arrangements for children to receive secular instruction only. Catholics had no objection to a conscience clause enabling children to withdraw during religious instruction, though there is none in the model deed; *Allies* 25420–25427. 25542–25546. 25630, 25631.

Committee would not accept the National Board's rule as to religious instruction, it would interfere with the general teaching of its schools. The management of local schools is left to the managers; *ib.* 25397–25412. Character of history taught in the schools; managers are free to choose their own books; *ib.* 25428–25439.

Committee has full freedom in matters of primary education; both clerical and lay members have power to act as they think best; *ib.* 25454, 25459.

All the religious bodies in England have the right of veto on appointment of Inspectors; *ib.* 25463.

Privy Council give no salaries to teachers in holy orders; Catholics under the Council stand in just the same position as all other religious bodies; *ib.* 25460–25473.

Committee's schools are all denominational; a conscience clause cannot protect the children except from direct religious teaching, whether the school be denominational or not; *ib.* 25492–25504. 25516.

Relations of Committee with school managers; annual collections for Committee's fund; as to appointment of managers; building and support grants; communications with local committees are satisfactory; *ib.* 25571–25577.

Committee contemplate establishing separate schools for the destitute poor under the Poor Law Board, and would desire Catholic Inspectors; *ib.* 25625–25628.

Great difficulty in some places in getting sites for schools; *ib.* 25664–25673.

Appointment of teachers; salaries of teachers; *ib.* 25674–25684.

Reasons for adoption of national books by; *Card. Cullen* 27111–27118.

CENTRAL MODEL and PRACTISING SCHOOLS of NATIONAL BOARD. *See* MARLBOROUGH-STREET TRAINING ESTABLISHMENT, &c. 3. *Model and Practising Schools.*

CENSUS, EDUCATIONAL:

As to best time for taking; *Fitzgerald* 8570–8572.

CERTIFICATES:

Teachers were and are expected to produce certificates from officiating clergyman, not as a *sine qua non*; these certificates are given to those who register the teachers on their arrival in Dublin; *Butler* 6387–6393.

The clerical certificate has not been dispensed with, but has not been enforced; other would suffice; *Macdonnell* 11302–11305.

On refusal of Roman Catholic clergy to grant certificate of character for admission to model schools, the Board cancelled the rule; *Kavanagh* 12420–12423.

As to cancellation of a certificate by an Inspector, and his right to do so; *ib.* 22530–22554. Made out in anticipation, but parents refused to sign; *ib.* 22582–22584.

Witness would not give a certificate that no child had been excluded on account of his religion; uselessness of certificates under a denominational system; *Forde* 23276–23282.

Are not necessary; *Card. Cullen* 26668.

Licences to teach not necessary; care to be used to secure good teachers; certificates of competency could be granted by training schools; granting of, should be a private matter, not a State affair; *ib.* 27142–27153.

Certification of teachers is a matter of economy, not of religion; *Card. Cullen* 27426–27431. 27435.

CHAIRMAN:

None, at meetings of National Board; *Macdonnell* 23690–23692.

CHAPLAINS:

Desirability of appointment of, in Marlborough-street training establishment, Protestant as well as Catholic; *Joyce* 6500–6502. 6656–6658. 6667–6670.

To model schools, want of success of a plan for providing; *Bp. Dorrian* 8720–8726. 9055.

In such a school as Belfast model school, with the working of the machinery, a chaplain could not do much good; he would not be of any use unless his supervision penetrated every branch of education; if permitted only to give religious instruction, he is out of place, his presence would be giving a false security; *ib.* 8864–8871.

There should be chaplains for the religious instruction of teachers of various denominations; *Warren* 15341–15345.

Gaols and poor-houses throughout Ireland have chaplains; very few cases of difficulties arising in consequence; *ib.* 15350.

Doubts as to the desirability of appointing paid chaplains; *De Vere* 20273–20277.

For model schools, objected to; *Forde* 23053–23055.

CHARITABLE BEQUESTS:

Statements and objections as to the law regarding clerical trusts and charitable bequests; *Bp. Dorrian* 9242–9251.

CHECKS:

In the National system are many; Chiefs of Inspection superintend all below them; District Inspectors report not to Head Inspectors but directly to the office; *Hunter* 3739–3744.

CHEMISTRY:

Lectures on, by the late Dr. Clarke in Marlborough-street Training Establishment; *Newell* 25280.

See also EXPERIMENTAL SCIENCE.

CHIEFS OF INSPECTION:

As officers of the Board; *see* NATIONAL EDUCATION, BOARD OF; 2. *Officers.*

CHRISTIAN BROTHERS:

1. *Schools.*
2. *Books.*
3. *Generally.*

1. *Schools.*

Christian Brothers' schools in South Dublin District not in connexion with the Board; *O'Carroll* 4061–4064. James's-street school, intended for a National school, will be a Christian Brothers' school; *ib.* 4101. 4293. 4320. 4390.

Schools are overflowing, owing to the withdrawal of some schools formerly under parish priests; *ib.* 4352.

Schools at Cork most efficient of the kind in Ireland; are well attended; *Sheridan* 5441. 5463.

Teach the elements of mechanics; *Bp. Dorrian* 9231.

Inspection of schools by superiors at least once a year; *Grace* 9399–9403. Eight school-rooms in Richmond-street establishment, and four branches elsewhere. Particulars of management of classes, &c.; a drawing school is in preparation; *ib.* 9404–9419. Any distinction in admission is in favour of destitute children (temporally or spiritually); *ib.* 9421–9422.

Some former pupils have entered the order; there is no accommodation now for teaching school organization to others; *ib.* 9423–9427.

In teaching history, comments are made according to tenor of class book; *ib.* 9431–9434.

CHRISTIAN BROTHERS—*continued.*

1. *Schools*— continued.

Silence, order, and regularity in schools achieved mainly by moral means; teachers being religious men have great influence; little corporal punishment; *Grace* 9441–9446.

No Brothers' school was ever set up in opposition to a National school; locality might have got one up, and asked Brothers to superintend it; *ib.* 9547–9551.

Christian Brothers' schools are decidedly Catholic schools, and could not dispense with use of emblems, &c., for sake of State aid; *ib.* 9564–9568.

Devotional arrangements could not be altered to suit Protestant children; *ib.* 9569–9573.

Many children are taught free, none pay above a penny a week; fees are expended solely on schools; *ib.* 9285–9287. 9303, 9304.

English course taught at all the schools; Latin is taught in one or two, but classics objected to, the main object being instruction of the poor; *ib.* 9288–9292. 9354–9420.

The object of the society being to give a Catholic education, connexion with National Board could not be continued; no present desire for State aid; *ib.* 9293–9296. 9556–9563.

No children of other persuasions in schools at present; when there were, they were always sent out during religious instruction, and every care taken to avoid suspicion of proselytizing; *ib.* 9305–9311.

Emblems in schools; books are of a Catholic tendency, and are supplied gratis to those who cannot pay; prices; some go to India, Australia, &c.; *ib.* 9313–9324.

Society has 60 establishments and 225 school-rooms; *ib.* 9325–9327. Average daily attendance 18,000, number on rolls 25,000; names kept on rolls 13 weeks; no food given to induce attendance; *ib.* 9328–9337. In Dublin there are 9 district school buildings, containing 31 school-rooms; *ib.* 9362–9369. Eighteen schools and 4 establishments in Limerick; *ib.* 9542–9546.

Daily school work described; *ib.* 9377–9391. Main object of schools is primary instruction, but any highly-gifted boy is encouraged to continue, and is taught advanced subjects; *ib* 9392, 9393.

Literary instruction in, is perfect; more attention paid to science than in National schools; nothing to prevent these schools coming under the Board but the substitution of one system for another; *Keane* 15538.

If brought under the National Board, they would furnish some of the best and most efficient model schools; *ib.* 15562.

Children have left, and gone to National schools, because of better instruction at latter; in Clonmel are attended by all classes, ragged and otherwise; are filled, because sacraments are refused to those who attend model school; *O'Hara* 26751–26769.

Number of establishments, schools, and children on the roll; efficiency of schools, which are conducted on religious principles; attendance at; should not be excluded from the National Board; *Card. Cullen* 27051, 27071 *et seq.*

Tables showing increase of attendance, &c., in Westland-row schools since taught by Christian Brothers; *ib. page* 1232.

2. *Books.*

The books of the Christian Brothers are unobjectionable, being approved of by episcopal authority; *Bp. Dorrian* 8912–8917.

Catholic tendency of those used by Christian Brothers; are supplied gratis to those who cannot pay; *Grace* 9314–9320. Sanctioned and supervised by bishops; *ib.* 9447–9449. 9627–9629. 13965.

Defence of certain passages in historical and poetical books; *ib.* 9467. 13952–13957.

Distrust of books of National Society; their neutral tint acts in the opposite direction to that

CHRISTIAN BROTHERS—*continued.*

2. *Books*—continued.

intended; *Grace* 13962–13964. Submission of books to approval before adoption; *ib.* 13965–13967.

Contain some passages to which probably Protestants would object; the parts relating the past history of Ireland show the importance of the faith which was persecuted; the whole tendency of them is to make Catholic children value their faith. The books are very good; they would not be used *in toto* under a denominational system; *Bp. Keane* 15607–15619. 15639–15641.

If there be anything objectionable in the books, the bishops will take care to correct it; the newspapers give in greater profusion the facts of the past history of Ireland than these books do; *ib.* 15620–15623.

Favourable opinion of; *Forde* 23109. Are used by monitors at Cross-avenue, and in school at Mount Annville; *ib.* 23110–23117.

3. *Generally.*

Training of, more fruitful of good consequences to the country than the National system; *Bp. Dorrian* 9205.

Christian Brothers do not much adopt the monitorial system; not sufficient number of teachers or Brothers; have not teaching power sufficient; *O'Carroll* 4412, 4413. 4421, 4422.

Do not connect themselves with Government; *Sheridan* 4857. Preference of their schools by poorer classes; *ib.* 5320.

Order founded at Waterford in 1802; head is styled Superior-General; each house is managed by a Brother director; routine of management further described; *Grace* 9267–9284. 9351, 9352. 9500, 9501. Houses are supported chiefly by annual subscriptions and collections; funds of one house cannot be applied to another; *ib.* 9730–9736.

Have no objection on principle to State aid, but distrust Government; could not submit to rules under which nuns receive aid; their system probably acquiesced in; *ib.* 9574–9577. Nothing but want of means and members prevents spread of organization all over the land; to live in harmony with other denominations is systematically inculcated; *ib.* 9578–9583.

Legal disabilities under which Christian Brothers labour; *ib.* 9584–9592. 9715–9720; *Warren* 15291–15296.

Christian Brothers' training is equal to any outside, they will not therefore submit to external training and classification; results are the best test of competency; would object to be paid by capitation and results only; pay should be equal to others if equal results are produced; *ib.* 9698–9714.

Numbers of establishments under, and of children attending; great increase in number of schools of; bit by bit, National schools fall into the hands of; *Kavanagh* 10955.

Schools of, in England, are supported by voluntary contributions; never were, and cannot be, in connexion with Privy Council; *M'Donnell* 14305–14311. Reasons for declining such connexion; *ib.* 14365. 14395.

Public decision in favour of the Brothers' schools; *ib.* 14370.

Their system has never had fair play in England, therefore has never succeeded there; their success in Ireland is not attributable to the bishops, whose countenance depends in great measure on the satisfaction the schools give the public; *ib.* 14389–14394.

Are not anxious for connexion with the National Board; its rules, and the code of the Privy Council in England, are highly objectionable to them; *ib.* 14395–14403.

Payment by results, and inspection to ascertain those results, might be admitted; *ib.* 14404–14408.

Have the privilege of imparting religious instruction in school; *M'Donnell* 14409, 14410. The

CHRISTIAN BROTHERS—*continued.*

3. *Generally*—continued.

whole education of children, moral, literary, and religious, is in their hands; *M'Donnell* 14411.

Their Fourth Book cannot be used by Protestants; *O'Reilly* 14900–14902.

State ought not to pay salaries to any violating the law; whether the Christian Brothers violate the law or not witness cannot say; *Warren* 15296. 15316, 15317.

Will not submit to examination; they cannot therefore be extensively employed in England; *Toole* 21527.

As to their status under a denominational system; *Forde* 23234–23237.

If Christian Brothers teach in English schools they would be regarded simply as teachers; two associations of Brothers (Xaverians and Marists), have come into connexion with the Privy Council as teachers; *Allies* 25478–25482. 25486.

French Christian Brothers have branches in England, but they do not manage poor schools; Irish Christian Brothers have schools in England; they refused aid; *ib.* 25483–25485. 25489–25491.

The best teachers in the country; were allowed to get grants for their schools till 1855, now they are excluded; *Card. Cullen* 27045. Number of establishments, schools, and children on the roll; receive no State support; efficiency of schools, which are conducted on religious principles; means taken by superior to prevent spread of Fenianism; attendance at schools; should not be excluded by the Board; results show the superiority of the teaching; book of history is taken from Fredet, and is very good; reasons for its contents; *ib.* 27051. 27071, 27072. 27133. 27401–27414.

Have no objection to inspection in financial and literary matters; *ib.* 27454–27456.

CHRISTIAN KNOWLEDGE SOCIETY:

Books of, used in Erasmus Smith's schools; *Rudkin* 13947.

CHURCH EDUCATION SOCIETY:

1. *Constitution, organization, objects,* &c.
2. *Training and model schools.*
3. *Ordinary schools, instruction,* &c.
4. *Teachers, and their salaries,* &c.
5. *Books.*
6. *Inspection.*
7. *Miscellaneous.*

1. *Constitution, organization, objects,* &c.

Organization and funds of the Society; *Leeper* 6706–6708.

Established to assist schools existing, and to found new ones on an improved principle for affording instruction in the Scriptures and in formularies of Established Church to children of its members; *ib.* 6808–6810. 7072–7074.

Probable meaning of "on an improved principle;" *ib.* 6811–6816. The rule of the Kildare-place Society as to religious instruction was that the children should be taught the text of Scripture without note or comment; *ib.* 6817–6824; *Wilkinson* 7656–7660. Number of schools 1,404, containing 44,378 Church children, 12,300 Dissenters, and 6,871 Catholics, all of whom, according to rule, should receive a daily lesson in Scripture; *Leeper* 6828–6832.

It is a fundamental principle of the Society that the Scriptures should be used in the daily instruction of every child capable of reading, and that teachers should be at liberty on all suitable occasions to refer to them; *Wilkinson* 7487.

Scripture must be taught to every child that comes into the school; *Irwin* 10000; witness holds to the strict rules of the Society, so also do most of the members; *ib.* 10010–10015.

Rule of National Board with reference to use of Scriptures as a part of religious instruction operates as a preventive to the Society joining the

CHURCH EDUCATION SOCIETY—*continued.*

1. *Constitution, organization,* &c.—continued.

National Board; *Irwin* 9742–9746. Explanation of a passage in Scripture as to teaching the Scriptures; *ib.* 9755–9799.

2. *Training and model schools.*

Teaching staff in the training and model schools; *Leeper* 6799.

Two hundred and fifty children of various religious denominations in model and training schools, the Scriptures being read by all; Presbyterians and Catholics are not taught the formularies, nor on controversial questions unless the matter turns up; *ib.* 6740–6744. 6764. 6765–6785, 6786.

The training schools are situated, one in Dublin, the other at Bandon; 16 men and 41 women in training at Dublin; *ib.* 6709–6747. Each candidate pays an entrance fee of £6; *ib.* 6772. The course is divided into sessions, each lasting five months; the women remain for three, the men for two sessions; no difficulty in obtaining places for teachers; they cannot be supplied quick enough; *ib.* 6711–6900; *Wilkinson* 7151, 7152. 7256, 7257.

Subjects of instruction in; public examination at close of each session; *Leeper* 6716, 6717. 6906, 6907; *Wilkinson* 7262–7277. No restriction as to when or how religious instruction shall be given; it is more or less mixed up with all the branches; *Leeper* 6718; *Wilkinson* 7115–7120.

The teaching of model and practising schools is carried on by those who come up for training, under the supervision of training master and mistress; *Leeper* 6720–6725. 6800–6806. 6911–6914. Teachers are classified at end of course of training, there being a first class and three orders of second; *ib.* 6726, 6727–6730, 6731.

The practice of teaching is taught by lectures on the science of education; by model lessons in the presence of the students; by every student in turn giving lessons, subject to criticism; by instruction of a class by each of the students; by a section of the model school being given in charge to each student; and by each student in turn conducting a practising school; *Wilkinson* 7115–7126. 7280.

Candidates for training come from all parts of the country; *ib.* 7458 *et seq.*

Hours devoted to teaching and private study in training school; the work is severe; health of the teachers has never broken down; more conducive to real instruction if fewer subjects taught; *ib.* 7542–7554.

3. *Ordinary schools, instruction,* &c.

Religious instruction is carried on *pari passu* with every subject; special religious instruction in the Scriptures and Catechism every day; *Leeper* 6750–6784.

Scientific instruction given; *ib.* 6759. No model time table, managers can use any one they please; *ib.* 6773, 6774.

Parents know their children will be required to read the Authorized Version of the Bible; no means taken to ascertain whether they desire it or not; *ib.* 6928–6932, 7030.

Children are expected to reach a scale of proficiency both in secular and religious instruction; *ib.* 6872–6878.

In the country schools religious instruction occupies its place in the time table, and pervades all teaching; *Wilkinson* 7142–7148. Doctrinal or controversial matters may be introduced if they do not infringe on the time or subject of the lesson; *ib.* 7171–7178. Reading Scripture forms a portion of each day's school-work; any exposition would be according to Protestant views; *ib.* 7210–7218.

All the children read the Authorized Version, but they are not compelled to attend lessons in catechism and Church formularies; there is a fixed time for religious instruction, and it is also given incidentally with the literary instruction; *ib.* 7428–7480. 7494–7497. 7501–7506.

CHURCH EDUCATION SOCIETY—*continued.*

3. *Ordinary schools, instruction,* &c.—cont.

A portion of each day is devoted to religious instruction; secular teaching is quite sufficient to occupy the teacher's time; *Hamilton,* 8094–8097. Secular instruction should be illustrated by reference to Scripture; *ib.* 8108. 8010. 8111.

Classics are not taught; *ib.* 8109.

Many boys in the schools over fifteen years of age; *ib.* 8112–8116. Scale of proficiency and mode of working it; *ib.* 8117, 8118. 8149. Clergymen and subscribers take part in the instruction; *ib.* 8125–8127.

The number of Catholics in the schools is decreasing every year; *Leeper,* 6933–6937. Difficult to account for the number of Catholic children on the rolls, but pressure from the landlords is not the cause; *ib.* 6964–6967. 7049. 7051–7053. 7057, 7058. Catholic children are excused instruction in the formularies just the same as Protestants; there are a few in the three schools in Dublin; Catholic parents and children do not object to the reading of the Scriptures; *ib.* 6968–6991. 7036–7041.

Attendance at the schools in Dublin and Limerick last year was good, and the school rolls well kept and trustworthy; *Wilkinson* 7132–7141. 7179.

67,227 pupils on the roll in 1866; daily attendance 77 per cent.; average attendance 50·66 per cent. In the diocese of Dublin the total number on the rolls was 5,158; *ib.* 7199–7209. The parochial clergy in many cases visit the school daily, and check the number in attendance; there is no fixed hour at which the roll should be called; *ib.* 7229–7235. 7335–7340. Particulars of numbers on roll and average attendances of schools at Kilmurry, Kilmallock, and Broughshane; *ib.* 7310–7383.

Generally the Church Education Society's schools are better than the Board's; *ib.* 7448, 7449. Average attendance in the model schools at Kildare-place about 50 per cent. of those on the roll; *ib.* 7450–7457.

Candidates for training come from all parts of the country; no pupil-teacher or monitor system; it was tried some years ago, but given up; *ib.* 7458–7463.

System of taking the roll in the ordinary schools; *ib.* 7510–7520. If a child attend for a day only, he would be counted as a member of the school for the year. Every school is provided with a uniform class-book, report-book, and register; *ib.* 7532–7539. Children are divided into six classes corresponding to the series of Christian Knowledge Society's books; the per-centage of children in the first, second, and third classes is 48·32, 24·74, and 16·74; the remaining classes would contain altogether about 10 per cent.; *ib.* 7614–7628.

Number of ordinary schools under inspection in the three dioceses—Dublin, 76; Kildare, 27; Glandelagh, 21. Number of scholars on the roll varied from 100 to 10. Twenty children would be sufficient to keep a school alive; *Hamilton* 8046–8053. 8167–8170. Number of schools has diminished within the last few years; *ib.* 8054, 8055. 8141–8144. 8171–8184. 8187–8190. Loss of pupils caused rather by emigration than by establishment of National schools; *ib.* 8056, 8057.

Causes which attract Catholics to the Society's schools; *ib.* 8090–8093. Not many attend the schools in the diocese of Dublin; *ib.* 8139. Attendance at Clonkeen school; *ib.* 8233–8247.

Averages are deceptive; taking averages is not the way of judging of a school; *ib.* 8158–8163. Low average attendance in Kildare and Dublin which cannot be accounted for; *ib.* 8164–8166.

Fourth class a fair specimen of what a school should be; teaching is as good in, as in National schools; *ib.* 8266–8268.

Not much fluctuation within last three years in number of schools in the Armagh district; the tendency has been rather to decrease; some schools

CHURCH EDUCATION SOCIETY—*continued.*

3. *Ordinary schools, instruction,* &c.—cont.

have been transferred to the Board of Erasmus Smith, some to the National Board, and some have ceased from want of funds; *Irwin* 9734–9738. 9911–9913.

The connexion of the clergyman with the school is to afford religious instruction; the presence of a child whose parent forbids religious instruction would suspend the whole operation of the school; *ib.* 9795–9804.

Two large endowments in Armagh—the Drelincourt school and the Mall school—are connected with the Church Education Society; *ib.* 9845–9848.

In the schools of the Armagh diocesan district there is a great deal of united education, both in the junior and the advanced classes; *ib.* 9852–9855.

Per-centage of children remaining for intellectual instruction in the various classes; *ib.* 9856–9862.

Comparison of the schools of the Church Education Society with those of the National Board; *ib.* 9887–9889. 9908–9910.

Witness's definition of the terms "Scriptural school" (one of the designations of the Church Education schools), as being a school in which the Bible is read either in the Authorized or the Douay version; *ib.* 9972–9978. National schools, generally speaking, are not entitled to the designation; *ib.* 9979, 9980.

Average attendance of children at the Church Education schools very small; *ib.* 9926–9938. Established Church children in Armagh district attend National schools, which might account for such small attendance; *ib.* 9935–9940. Number of Roman Catholic pupils has fallen off of late; *ib.* 10027.

Extremely efficient, but have peculiar advantages; some of the Society's schools are as good as any of the National schools; *Kavanagh* 10873–10880. Are eminently deserving State support; *ib.* 10884. Their books are very good, those of the National Board have been framed upon them; *ib.* 10882, 10883.

Returns of, accurate, but not so well kept as formerly; *ib.* 10885–10887.

Four or five of the thirty schools in Ardstraw are still under the Church Education Society; until within a very few years there were ten or eleven; *M'Ivor* 13767–13769.

Are better specimens of united education than National schools; numbers of Roman Catholics in, who are greatly diminishing; *Warren* 15186–15188.

Schools are fairly efficient, but crippled for want of means; *Blacker* 16337, 16338.

Schools are strictly denominational; Society will not be satisfied with division between secular and religious instruction, or have the Bible shut up at any time; *ib.* 16373–16384.

Society would welcome State inspection of its schools; *ib.* 16386–16389.

No instance of direct proselytizing known in the schools; *ib.* 16390, 16391. Controversial matters not taught; *ib.* 16392.

Must be considered proselytizing schools; and if they, or any kindred body (Roman Catholics, for example), be assisted by the State, the State so far aids in proselytizing; *Mahony* 17141–17145.

Society's schools are as numerous as ever, but the number of pupils is less; *Bp. of Ossory* 20550–20555. Schools cannot be considered essentially doctrinal; clergymen are expected to visit them and give instruction; *ib.* 20567–20570. They are under the parochial clergyman, to whom is confided the religious instruction of the children; *ib.* 20581–20586.

An arrangement to exclude Roman Catholic children from the schools would not be agreed to; but all publicity should be given as to its rules; as a rule, the character of Church Education schools is

CHURCH EDUCATION SOCIETY—*continued.*

3. *Ordinary schools, instruction,* &c.—cont.

well known; *Bp. of Ossory* 20634, 20635. 20656–20659. Explanation as to a statement regarding the Society with respect to "influencing" and "disturbing" the religious belief of others; *ib.* 20636–20641.

Society's schools should receive greater aid than others on account of sparse population; *ib.* 20673.

Society thinks, with the Roman Catholics, that religious instruction should permeate the secular teaching; *ib.* 20674.

Disadvantageous position of Society's schools; if aided by State, they must be considered as denominational, and books must be under control of State; *ib.* 20676–20682.

Society might assist small schools in localities where Government would not; *ib.* 20686, 20687.

Voluntary attendance of Roman Catholics at; no unpleasantness arising therefrom; *Atkins* 20721–20725.

Roman Catholic children are taken away from schools of, earlier than from National schools; *ib.* 20768, 20769.

Remain strictly denominational; doubt as to accuracy of numbers reported attending; *Warburton* 20952–20954.

Ill success of, in parish of Cappagh, Tyrone; *Byrne* 21622–21625. 21672.

Cause of their success in some cases lies in the zeal of local patrons; *ib.* 21777–21781.

Not known that extra inducements have been held out to induce attendance at; *ib.* 21784, 21785.

Number of children in; as the Bible is read in, the sooner the children leave the better; *Card. Cullen* 26644–26650.

4. *Teachers, and their salaries,* &c.

Teachers have greatly improved of late years; efficiency is not only tested by inspection, but by examination; *Leeper* 6837–6840. Salaries; *ib.* 6841–6850. 6897–6899. A residence generally provided; *ib.* 6851–6854. In general they receive the school fees; these vary in amount, according to circumstances; *ib.* 6855–6860. The number of teachers is about the same as the number of schools, and all are members of the Established Church; *ib.* 6865–6884.

Certificates of teachers depend on their skill in teaching, including ability to intersperse religious instruction over the secular subjects; schools are generally carefully superintended by the clergy; *Wilkinson* 7149, 7150.

Average salaries; residences are generally provided; sometimes teachers act as parish clerks; *ib.* 7218–7220. 7289–7293. 7302. 7507, 7508. 7521–7531. In some cases they receive school fees; *ib.* 7294–7301.

Moral and religious effect of training school on teachers decided and remarkable; all teachers attend a place of worship on Sundays under supervision of a teacher; *Leeper* 6788–6791; *Wilkinson* 7281–7284. 7288.

All teachers are boarded on the premises; four hours for dinner and recreation daily; *Wilkinson* 7285–7287.

Salaries are rather low; masters often complain; *Hamilton* 8069. 8248–8252.

Teachers fairly acquire subjects taught; *ib.* 8076–8079. Residences and gardens are in most cases attached to schools; masters generally remain in the service; *ib.* 8098–8107. A few teachers take holy orders; *ib.* 8119–8122. They are often parish clerks; *ib.* 8128–8137. 8262–8265. About nine out of ten have been trained in Church Education schools; *ib.* 8278–8279.

Schoolmasters are paid by gratuities, not by salary; *Irwin* 9726–9729. 9824, 9825. The incomes of the teachers vary very much; 9828–9831. The greater proportion of the masters are not thoroughly

CHURCH EDUCATION SOCIETY—*continued.*

4. *Teachers, and their Salaries,* &c.—cont.

well qualified; *Irwin* 9731. 9807. Schoolmasters have been for the most part trained in Kildare-street; some from Marlborough-street, and are generally good teachers; *ib.* 9752–9754.

Female teachers from the training school in Dublin are generally efficient; *ib.* 9832–9840.

Most of the teachers in Erasmus Smith's schools come from Society's schools; *Thorp* 12722.

5. *Books.*

Books used are those published by Christian Knowledge Society, some of the National Board's books, and the reading and spelling books of the Kildare-place Society; Church Education Society never publish books; *Hamilton* 8218–8223.

The books used answer the purpose very well; the schools have the Bible, the finest classical book in the world; *ib.* 8270.

The books for the Church Education schools are procured from the depository connected with the old Kildare-place Society; *Irwin* 9864–9867. Some of the books of the National Society are used; *ib.* 9868–9870. But those mostly used are the new series of the Christian Knowledge Society; *ib.* 10050–10059.

Christian Knowledge Society's books are generally used in Church Education schools, but they are inferior to those of the National Board; *M'Ivor* 13832–13836.

The books of the National Board are not used by Society to any great extent; they are not good educational books; *Wilkinson* 7408–7419.

The books generally in use are those of the Christian Knowledge Society; uniformity is not important; *ib.* 7555–7562. Those used for direct religious instruction are the Bible, Catechism, and Prayer-Book; *ib.* 7563–7565. The "English History" of the Christian Knowledge Society is used for secular teaching in many of the schools; *ib.* 7566–7602. Reading-book No. 3 of "Nelson's School Series" is in use for children from six to eight years of age; *ib.* 7603–7611. The "Ecclesiastical Primer" is only used by the students in training, and is not compulsory; *ib.* 7612, 7613.

There is a rule that only the books in the catalogue or those approved by the Diocesan Committee shall be used; the Dublin Committee never formally object to those of the National Board, though their opinion of them is not high; the English books are generally used; *Leeper* 6879–6882. 6901–6905.

6. *Inspection.*

There are sixteen Inspectors (generally unpaid), who visit the schools sometimes twice a year; *Leeper* 6833, 6834. 6877. Inspectors are appointed by the Diocesan Committees; *ib.* 6908, 6909. Reports of Inspectors are not published on account of the cost; *ib.* 7026, 7027. The Committee have no means of knowing whether teachers carry out the rule but from Inspectors and clergy; *ib.* 6835, 6836.

There was a board of eight or nine paid Inspectors, but the funds failed, and this had to be given up; there is now only one paid Inspector; *ib.* 7067, 7068.

The reports, last year, of four schools in Dublin and sixteen in Limerick, as to their efficiency, were favourable for the most part; *Wilkinson* 7127–7131. The attendance at the schools was good, and the school-rolls were well kept and trustworthy; 7132–7141. 7179–7182.

Schools in the diocese of Armagh are inspected by ten clergymen of the diocese; *Irwin* 9730.

7. *Miscellaneous.*

It is hardly possible a school could be in union with the National Board and the Society; *Leeper* 6915–6918. Some of the Society's teachers have joined the Board; many of the Board's teachers

CHURCH EDUCATION SOCIETY—*continued.*

7. *Miscellaneous*—continued.

have come to the Society's training school; their ignorance of Scripture and in secular subjects; *Leeper* 6919–6924. 7028, 7029.

If a system of payment by results in secular subjects were established the Society's schools might be able to receive aid from the Board; plan of Bishop of Ossory and the Attorney-General; *ib.* 6925–6927. 7069–7071; *Warren* 15118–15157.

Comparison of number of children educated by the Society and by the National Board; hard to compare the two systems; *Leeper* 6996–7020. Income of Society gives about £27 per school; National Board receives about £50; *ib.* 7084–7091.

System of the Society rather National than Church; if left alone Catholics would avail themselves of the Scriptural teaching; *Wilkinson* 7631–7655.

The object of admitting children of parents not belonging to the Established Church is to educate them and instruct them; *ib.* 7661–7667. The system does not interfere with the peculiar tenets of any section of the community; *ib.* 7668–7672.

The responsibility of the parent devolves upon the teacher, and he should respect the religious feelings of the parent; the rule of the Society's schools is known, and if application were made to impart secular instruction only, it would be refused; *ib.* 7673–7699.

Stimulus given to pupils in Church Education Society's schools through the Dundalk Institution; *Irvin* 9871, 9872.

The Church Education Society is strictly denominational, that is, of the Established Church, and all the officers are members of that Church; *ib.* 9943–9951. A child need not receive religious instruction according to the system of the Church Education Society as a condition of receiving education in any branch; *ib.* 9964–9967. But the same principle would not be approved as applied to Roman Catholics; *ib.* 9968–9971.

Witness's views of the conditions on which the Church Education Society could accept State aid for its schools; *ib.* 10020–10024. 10060–10062.

Advice given by the late Primate to his clergy, in reference to the Church Education schools, declined by the great body of the clergy who had schools under the Society; *ib.* 10063–10066.

Objection of, to the original principle of vesting schools in trustees; *Kavanagh* 10358–10359.

Means suggested of removing the difficulties felt by the Church Education Society, in availing itself of aid from the Board; *M'Ivor* 13701–13709. 13711. 13858–13860. Advantages of adoption of plan proposed; *ib.* 13710. 13712–13718. 13888, 13889. One advantage of Church Education system is the use of the Bible as a reading book; with that exception the National is preferable; *ib.* 13791–13794. The rule requiring every child, of any denomination, to read the Authorized Version is un-catholic and un-protestant; *ib.* 13795.

Requires that school lessons should be based on Scripture; *Andrews* 14760, 14761.

Allows only the Authorized Version to be read; the Kildare-place Society allowed the Douay Version; *ib.* 14809–14813.

Scheme of National Education drawn up by the Right Hon. R. Warren, Attorney-General for Ireland, and approved of by a majority of the Church Education Society; *Warren* 15118–15157.

A minority of, would desire the State to adopt Church education, even in Roman Catholic schools; *ib.* 15263, 15264.

Has only its own income (about £10,000) to depend upon; with this, by supporting only superior schools, more good is done than when it was aided by Government; *Blacker* 16350.

Insistance of the Society on reading of Scripture in school by all, its fundamental rule and difficulty; *Blacker* 16357–16361. 16364. 16367, 16368. 16372. 16420–16422.

The party holding to the distinctive rules of, is not diminishing, and the funds are well kept up; *ib.* 16370, 16371.

Would be glad of State aid if restrictions were withdrawn; *ib.* 16398.

The law requiring Church ministers to provide a parochial school is carried out, but funds are often not provided; *ib.* 16402–16406.

All who come to Society's schools must abide by its rules; its design is to give an ordinary parish education based on the Word of God; *ib.* 16413–16416. 16426, 16427.

Society cannot receive State aid so long as exclusion of Scripture from school is the condition; an agreement might be come to by Government paying for secular education only; *ib.* 16347–16349. 16418, 16419. 16420–16422.

Does not pretend to judge what is best for Roman Catholics; only insists that no shackle shall be put on the Bible; *ib.* 16438, 16439.

The rules of the Presbyterians would not meet its views; its fundamental rule is that every child who goes to its schools must read the Bible; *ib.* 16441–16446.

Alleged origin of; *Ross* 17440, 17441; statement corrected; *ib.* 17553–17555.

Many more Roman Catholic children were in its schools than now; the decrease is not from any change of rules; there is a slight difference in the rules of diocesan branches from those of parent society; *Bp. of Ossory* 20522–20524.

Its fundamental rule was to give a good Scriptural and Church education, and instruction in Scripture to be given daily to all children capable of reading; *ib.* 20525–20527. 20553.

No expectation that the rule excluding the Society from connexion with the National Board will ever be relaxed; *ib.* 20530.

If the only objection to the Society was the rule as to reading the Scriptures, it might be modified; *ib.* 20531.

Its primary object is to teach the truth to its own children; if Catholics come to it they must abide by what the children's parents know to be the rule; neither can Society abandon the liberty to refer on all necessary occasions to the Scriptures; *ib.* 20532–20535. 20539.

If State be willing to assist the Society according to results of secular teaching, State must devise some means of protecting adverse minorities, but the Society's rule as to reading Scriptures will not be changed; *ib.* 20538–20548.

Suggestion of a modification by which the Society might be enabled to join the National system; *ib.* 20536–20548. 20556–20558. 20561.

More influence is used to make Roman Catholics stay away from schools of, than is used by Society to obtain them; *ib.* 20559, 20560.

Reasons for establishment of the Society, and its objects; *ib.* 20562–20565.

Does not claim to be the guardian of the education of the country; claims only support for its own schools, which are under the parochial clergyman, and to him is confided the religious instruction of the children, according to the principles of the Church, not controversially, and not obtruded unnecessarily; *ib.* 20581–20586.

Conscientious objections of, and of many of the clergy, to the National system of education; *ib.* 20589–20596.

Considers its duty is to teach Scripture, but not to interfere with the faith of others; has no proselytizing designs; *ib.* 20597–20599. 20636–20641.

Does not require any religious teaching of peculiar denominational character; it makes reading of Scripture as compulsory as any other part of daily

CHURCH EDUCATION SOCIETY—*continued.*

7. *Miscellaneous*—continued.

work, to children who come to the schools with a full knowledge of what the rules require ; *Bp. of Ossory* 20611–20616.

Its printed rules may be taken as expressing all its views, wishes, &c. ; *ib.* 20644–20647.

Advantage to schools of Government inspection ; *ib.* 20648–20651.

Society might assist small schools in localities where Government would not ; *ib.* 20686, 20687.

Proportion of clergy supporting National and Church Education systems about equal ; *Atkins* 20783–20786.

Is dissatisfied because it cannot teach its religion as it likes ; *ib.* 20800, 20801.

The system of, is a denominational system ; *Byrne* 21661.

Petition for aid to schools of, rejected, Government not engaging to say that children might be compelled to receive or be present at religious instruction to which their parents, &c., object ; *Kavanagh* 23390.

CIRCULAR LETTER

Relating to organization of teachers, drawn up by Mr. Keenan, has not been strictly adhered to ; *Keenan* 1646 ; *Newell* 2914.

"CITY ARABS :"

Subject to compulsory education in Ireland ; *O'Reilly*, 14998.

CLAREMONT INSTITUTION FOR THE DEAF AND DUMB :

Supported by voluntary contributions ; pupils are brought up in tenets of Established Church ; *M'Donnell* 14256 *et seq.*

CLARE-STREET COMMISSIONERS :

1. *Their style, property, objects, powers, &c.*
2. *Royal Free Schools.*
3. *Diocesan Free Schools.*
4. *Miscellaneous.*

1. *Their style, property, objects, powers, &c. :*

Official title of, is Commissioners of Education in Ireland ; *Kyle* 15393. A corporate body ; *ib.* 15394. Property consists of land endowments ; *ib.* 15396. The principal estates belong to the seven Royal schools, which are similar to the large grammar schools in England ; *ib.* 15397, 15398.

Commissioners, as landlords, have primary schools on their estates, some of which are connected with the National Board ; *ib.* 15399–15409. Nothing in trust deed as to primary education ; *ib.* 15417.

Estates of, are now better managed ; *ib.* 15423–15425.

Whether the endowed schools of, were intended for the poor is a question of law ; Endowed Schools Commissioners were not unanimous in their report ; *ib.* 15426.

Board makes an annual report, which is presented to Parliament ; *ib.* 15420–15422.

Powers of, are from Acts of Parliament ; *ib.* 15453–15454.

Expenses of the Board are voted annually by Parliament ; *ib.* 15458, 15459.

Every step taken is with the advice of the Law Officers of the Crown ; *ib.* 15471.

Income and expenditure in 1867 ; *ib. page* 669.

2. *Royal Free Schools :*

Are grammar schools, seven in number ; *Kyle* 15397, 15398. Are open to children of all religions ; *ib.* 15433. Surplus of funds of one school may be devoted to repairs of others ; *ib.* 15457. Each school has its own patent, granted by Charles II. ; *ib.* 15461. 15464. Part of surplus funds is devoted to exhibitions in the University ; *ib.* 15471.

CLARE-STREET COMMISSIONERS—*continued.*

2. *Royal Free Schools*—continued.

Teachers in, are appointed by Government ; nothing to limit the masterships to members of Established Church ; *Kyle* 15473.

Nothing in the charters to show that the schools should be exclusively Catholic ; *ib.* 15520.

Enniskillen Royal Free School is the most successful school in Ireland ; *ib.* 15431, 15432.

All the Royal schools are open to children of every religious denomination ; *ib.* 15433.

School at Clonmel in very unsatisfactory condition ; *ib.* 15437–15439. Was originally founded for children of Protestant freemen, but is not confined to them ; *ib.* 15440.

3. *Diocesan Free Schools :*

Are not in a satisfactory condition. Improvements have been suggested, but the Commissioners are powerless, and there are no funds ; *Kyle* 15427–15429. The whole system is completely rotten ; *ib.* 15467.

Are not adapted for training primary teachers ; *ib.* 15443.

Number of children in primary schools, and religious persuasion of the scholars ; *ib.* 15494, 15495, and *page* 670.

Expenses of the primary schools are paid out of the rents of the estate they are on ; *ib.* 15460.

4. *Miscellaneous :*

There is no system of inspection for the schools ; *Kyle* 15410.

Commissioners are desirous of connecting all their schools with the Board ; it is difficult to get any one to act as joint manager of non-vested schools ; *ib.* 15411.

Commissioners appoint masters of schools not connected with the National Board ; *ib.* 15414. Masters make a return half-yearly of work done, &c. ; *ib.* 15415.

Commissioners have no power to effect improvements in the schools ; *ib.* 15525. They should have the power of appointing and dismissing masters ; *ib.* 15533.

Tabular statement of income and expenditure of each school having funds under Clare-street Commissioners for 1867 ; *ib. page* 669.

Return of number of children at the primary schools on estates of Clare-street Commissioners, or under their patronage, showing numbers in attendance at each school separately, and religious persuasion of children ; *ib. page* 670.

CLARIDGE, JAMES, Esq., Accountant to National Board, evidence of ; *pages* 167–179.

CLASS BOOKS. *See* BOOKS. NATIONAL EDUCATION, BOARD OF : 4. *Books.*

CLASSICS :

The introduction of, into National schools, though in some few cases advantageous, would not be on the whole desirable ; *Keenan* 1236–1241.

Managers should have the option of introducing classics into the ordinary schools as an extra subject, but so as not to interfere with the general teaching ; *ib.* 1915–1921. Ability of present masters to teach classics ; *ib.* 1929, 1930, *and note.*

Teaching Latin in ordinary schools advocated ; *Hunter* 3488, 3489. 3502–3505.

Desirability of teaching classics and French in National schools ; *Sheridan* 5499–5501. 5764–5772. *Berkeley* 11429–11436. 11636.

Facilities for classical instruction have disappeared since the introduction of National system ; *Sheridan* 5534, 5535.

Latin and Greek should be admitted into the programme of National schools ; *Kavanagh* 10992–10995.

CLASSICS—*continued.*

The system of inspection provides sufficient protection against their undue prominence, the more so with payment by results; *Macdonnell* 11330, 11331.

Classics and modern languages should be introduced into National schools; this would tend to improve the primary education; *M'Ivor* 13633–13636. 13679–13684.

Teaching power for, and division into classes of, proposed classical schools; *ib.* 13719–13728. 13739. The Irish system would then approximate to the Scotch; *ib.* 13732–13736.

It is not desirable to introduce classics into model schools, they being generally situate in towns able to provide what is wanted; *ib.* 13861, 13862. In the model schools in witness's district, up to 1866, classics and French were taught, but the Board formally stopped such teaching, the effect being the disorganization of the school; *ib.* 13863–13866.

Letter of Bishop Moriarty pointing out the usefulness of teaching classics in union with English; *ib.* 13867–13869.

Many persons, Protestants and Catholics, are anxious to introduce classics into the model schools; *ib.* 13870–13874.

The grant for classical instruction should be distinctly voted by Parliament; *ib.* 13875–13878. Boys may be brought as far as Lucian and Virgil in company with infants; *ib.* 13801–13805.

Teaching of classics would be popular; *Matthews* 18297–18302.

Great movement in favour of ingrafting classics and languages on the National system; *Macdonnell* 23903, 23904. 23908.

CLASSIFICATION

Of children in school, as to; *O'Carroll* 4414–4419.

The increase of salary, which can be obtained by classification from training, ultimately compensates for the loss of salary while training; teachers are not compelled to come up for training; *Butler* 6394–6399.

The mode of classification of teachers depends greatly on the mode of instruction; examination is carried on concurrently with instruction. At the end of the course the professors, their assistants, and the head master form a Board for classification; *ib.* 6167, 6168.

Some Inspectors think very little of classification; *ib.* 6169.

Difference of opinion whether the system of classification by professors is bad or good; in the training establishment not only the literary acquirements but the mode of teaching in the school decides the classification; *ib.* 6170–6172.

Suggestions for amending the present classification of teachers; there should be one course of instruction up to a certain point, afterwards either science or literature; *Mahony* 16993–16996.

Arguments in support of the principle of payment by classification; *ib.* 17010–17016.

Does not correctly measure teachers' qualifications; suggestions for its improvement; *ib.* 17080–17084.

As to non-classification of nuns as teachers, and their objections to it; *Macdonnell* 212, 371–373; *Bp. Dorrian* 9210–9217. 9263; *Mahony* 17116–17122.

Too many grades in; *O'Callaghan* 20064–20068.

Teachers should be examined for classification by Inspectors, not by professors; the latter know nothing of teachers' efficiency; the meritorious receive a certificate entitling them to a step in promotion; *Sheehy* 26293–26301. 26390–26398.

As to uniformity in classification; *ib.* 26302–26307. Present power of Inspectors in awarding; *ib.* 26308–26312.

Efficiency in teaching should be the chief test for classification, with continuance of study; first class men often sleep on their oars; *ib.* 26314–26318. 26328.

CLASSIFICATION—*continued.*

Examinations for, are on a uniform system; as to making out particulars on which to ground classification; other persons besides those engaged under the Board are allowed to come to be examined, but not in a formal manner; *Sheehy* 26425–26442.

Many teachers receive salaries by virtue of their classification higher than they would be entitled to for their services; being based on examination, which does not notice working power, the remuneration of teachers becomes unequal to their merits; *O'Hara* 26806–26811.

CLERGY:

Attendance of, at schools, to give religious instruction but slight; *Petticrew* 16592–16595.

The sympathies of the clergy of any denomination must be enlisted, if extension of education is desired; *O'Reilly* 14921–14923.

Clergymen in England act as professors and as Inspectors; *Card. Cullen* 27071.

See CHURCH EDUCATION SOCIETY. NATIONAL SCHOOLS. PRESBYTERIANS. RELIGIOUS INSTRUCTION. ROMAN CATHOLIC CLERGY. SCHOOLS.

CLERKS OF WORKS:

Under Board of Works, their number and duties, &c.; *Stack* 14059. 14209. 14214–14216; *Owen* 27471–27483. 27538 *et seq.* 27642, &c. Are overworked; *ib.* 27521. 27561–27563.

Inspection of school buildings by; *ib.* 27513–27519.

Increase in number of; *ib.* 27525–27530.

Reports, estimates, &c., of, to Board of Works; *ib.* 27473. 27533. 27541.

Powers of, in getting repairs executed; *ib.* 27642–27644.

See also BOARD OF WORKS.

CLONAKILTY:

Denominational schools at present time in, Catholic, Episcopalian, Presbyterian, Wesleyan; attendances at these schools; *Wilson* 15970–15985.

Case of a teacher at Darray school, near Clonakilty, who had been compelled by his manager to break the rules of the Board, and was dismissed in consequence; *ib.* 16108–16119.

CLONAKILTY CONVENT SCHOOL:

Grounds on which it was taken into connexion with the National Board; *Wilson* 15948. 16229. 16331.

Attendance at; *ib.* 15956. 16244. 16247. Established in opposition to Miss Donovan's school; *ib.* 15950. It was not required; *ib.* 15967. Established solely for the purpose of absorbing the attendance of existing schools; *ib.* 15968.

CLONAKILTY FEMALE SCHOOL:

Established by Miss Donovan; its efficiency; convent school established in opposition to; *Wilson* 15950. Salaries and gratuities to teachers, and attendance at; *ib.* 15954. Ample accommodation at, for many more children than attended; *ib.* 15965. An excellent school; no reason known for the opposition to it, but the desire to introduce the convent into Clonakilty; *ib.* 15969.

CLONKEENEKRRIL AGRICULTURAL SCHOOL. *See* AGRICULTURAL SCHOOLS AND MODEL FARMS.

CLONMEL DISTRICT:

About half of National schools in, have mixed attendance, the number of Protestants being small; National schools are preferred to, and more frequented than, denominational schools, by both Protestants and lay Catholics; *O'Hara* 26693–26701. 26714 *et seq.* 26750. Religious instruction fairly attended to in; *ib.* 26839–26841. One additional

CLONMEL DISTRICT—*continued.*

school would satisfy all the educational wants of the district; *O'Hara* 26842–26845.

CLONMEL GRAMMAR SCHOOL:

Under Clare-street Commissioners, unsatisfactory condition of; was originally founded for gratuitous education of children of Protestant freemen; *Kyle* 15437–15440.

CLONMEL MODEL SCHOOL:

Excellent character of, formerly, as a specimen of a mixed school; is now deteriorated into a mere Protestant parish school; *Kavanagh* 10221–10224. Its first success and subsequent failure as a united school; *ib.* 12018, 12019. Favourable opinion of, in 1850, has since considerably changed; *ib.* 12592–12617. 12631–12635.

Secession of Dr. Whately and others from the National Board, because of non-introduction of certain books into; *ib.* 12086. Explanation of evidence given in 1854, as to exclusion of Archbishop Whately's books from; *ib.* 12438, 12439.

Favourable character of Clonmel Model School as to mixture of classes, in 1850; *ib.* 10988.

Complaint that suppressed portion of report on, and other documents, have been produced to the Royal Commissioners informally; *ib.* 19328.

Reference to suppressed portion of a report on, with regard to opinion of Dr. Doyle as to model schools for teachers; *ib.* 22253–22263. The passage was omitted by National Board for reasons of their own, being another example of the mutilation of reports; *ib.* 22280–22286.

Its inferior accommodation; the first established model school in Ireland; about one-fourth of children attending are still Roman Catholics; *O'Hara* 26767–26778. Attendance at, of Catholics varies according to times of confession; when the latter pass, attendance increases; *ib.* 26780–26783. Protestants of better class attend, in preference to Protestant denominational school; *ib.* 26848–26857.

Statement as to unpublished portions of Mr. Kavanagh's report on; *Newell* 24976–24991. 25056–25058.

Report of J. W. Kavanagh, esq., (formerly) Head Inspector of National schools, on Clonmel Model School, for the year 1851; *App.* xvi., *pages* 1304–1311.

CLOYNE, ROMAN CATHOLIC DIOCESE OF:

Schools in, are exclusively Catholic; *Bp. Keane* 15560. 15563.

CODE OF INSTRUCTIONS FOR INSPECTORS

Does not contain all the rules laid down by the Board; many minor points are communicated by circular; *Sheridan* 5363–5372.

COLERAINE:

Non-vested schools at, new buildings for, erected by Irish Society; *Williamson* 20972–20976.

COLERAINE ACADEMICAL INSTITUTION:

A place for high-class classical and commercial education; receives £200 a year from the Irish Society; *Williamson* 20963. 20965. 20967.

COLERAINE NATIONAL SCHOOLS:

Circumstances and connexion of, with the Irish Society; *Williamson* 21060–21065.

COMBER PAROCHIAL SCHOOLS:

Subscriptions to, by Irish Society, dating from 1613; *Williamson* 20979.

COMMISSIONERS OF EDUCATION IN IRELAND. *See* CLARE-STREET COMMISSIONERS.

COMPETITION:

Admission by, into schools of Incorporated Society; *Hackett* 25851–25859.

COMPULSORY EDUCATION

Would be most unpopular in Ireland; partial compulsory education has been adopted for "City Arabs;" it should be adopted for vagrant children in workhouses; *O'Reilly* 14997–15000.

Would not do, unless Government fed and clothed the children as well; *M'Menamin* 21969.

Would interfere with liberty of the subject; *Card. Cullen* 27457.

CONDEMNED PROPOSITIONS

By Pius IX., statement as to; *Card. Cullen* 27389–27396.

CONNAUGHT:

In Connaught the desire for education is spreading; backwardness of the province; the Roman Catholic clergy not so favourable as in other parts to the National system; grants should be given more liberally to Connaught, and to the mountainous, insular, and peninsular districts; *Macdonnell* 50–52.

Connaught not well supplied with schools, and those it has are not so good as in richer parts; *ib.* 664, 665. Many vested schools in Connaught have fallen out of repair; *ib.* 710–712.

Absence of religious and political feuds may be due to small number of Protestants in the province; *Petticrew* 16706–16710.

CONNAUGHT MISSION SCHOOLS:

Instruction in, very indifferent; children in, at Ballina, of neglected class, during the famine, were sold by their mothers like pigs; *Kavanagh* 11072–11074. 11087, 11088. Orphanage at Ballina in connexion with; *ib.* 11074. 11089–11094.

CONSCIENCE CLAUSE:

In trust deed, objected to by Presbyterians, Episcopalians, and Church Education Society; *Kavanagh* 10354 *et seq.*

The conscience clause in England is only a rough protection, and would not work satisfactorily there or here; *ib.* 12307.

Must be, to some extent, an imperfect protection; that form to be preferred which is contained in Bruce and Forster's Bill for England; *O'Reilly* 14898. 14899. 14908–14913.

The protection of minorities is a question for practical action; *ib.* 14900–14902. It must be enforced; *ib.* 14884–14930.

The conscience clause suggested could be made to suit religious instruction *pari passu* with secular; *ib.* 14933.

A conscience clause cannot be worked satisfactorily in this country; it is only an apparent, not a real protection, and not worth while keeping up; *Warren* 15325–15328.

Should be a matter of course for the protection of all; *Bp. Keane* 15605.

Benefit of conscience clause to a minority; *ib.* 15626–15628.

The conscience clause is the essence of the National system; *Petticrew* 16516.

Nothing is asked from Catholics in Ireland but to adopt a conscience clause; which it is alleged they will not submit to; *Ross* 17581, 17582.

Objection to; *Bp. of Ossory* 20691, 20692. A parent who sends his child to a school must be taken as acquiescing in the religious instruction the child would receive there; *ib.* 20696.

Necessity of, for the protection of poor minorities; not wanted except in such cases, neither wanted for middle class education, the middle classes can take

CONSCIENCE CLAUSE—*continued.*

care of themselves; *Toole* 21398–21402. 21414–21425.

The existing conscience clause in England does not interfere with the efficiency of religious teaching; *ib.* 21203.

None in England, except as applied to Established Church; reason why it is not applied to other denominations; would be approved of in a great national scheme, except in large towns; *ib.* 21430–21438. 21469, 21470.

The conscience clause is really in existence in workhouses; *ib.* 21439.

Desirability of, and of enforcing it; *M'Menamin* 21981, 21982.

Catholics in England did not object to a conscience clause, enabling children to withdraw during religious instruction; *Allies* 25389. 25420–25427.

Definition of; *ib.* 25507–25514.

CONSTABULARY:

Teachers leave the Board's service to enter; pay and position of sub-constable is better than that of teachers; *Newell* 24890–24892.

As to Protestant or Roman Catholic in various localities; *Forde* 23274–23278.

CONVENT SCHOOLS:

1. *Character of, Attendance and Instruction in, Status of, &c.*
2. *Payments in, and to.*
3. *Monitors, Teachers, and Training in.*

1. *Character of, Attendance and Instruction in, Status of, &c.*

No case of a convent school in connexion with the Board being taught gratuitously; *Macdonnell* 185–188. 215. The nuns expend all they receive; they get £20 for 100 scholars; *ib.* 209–211. Nuns are not examined for classification, and they cannot teach more than one school connected with a convent; *ib.* 212–214. 371–373. Payments to nuns are on the principle of capitation grants; there is no payment by results, *ib.* 226–230. 424. Nuns should be paid by results rather than by capitation; *Sheridan* 5321.

The nuns do not exclude any children from their schools; very few Protestant children go to them; *Macdonnell* 374; *Keenan* 1563, 1564. Number of children attending convent schools; *ib.* 1563, 1564. 1686. 1947–1950. 2038–2040. *Sheridan* 5780. 5835, 5836.

Form an important class of schools in connexion with the National Board, the schools being subject to the same rules as other National schools; the value of the teachers' services is estimated by the number of children taught; *Macdonnell* 153–156. No difference between convent and ordinary schools as to observance of Board's rules; *Keenan* 1578.

The higher descriptions of needlework as well as the humbler are taught, which gives an advantage in the results; *ib.* 1575–1577.

Special attractions of convent schools are—respect for the conductors, superiority of teachers, their fame in bringing on the children, excellent provision for religious education, and supervision of scholars by heads of school after leaving; in some cases the children are clothed, in others fed, which are attractions to the more destitute. Industrial instruction is given in all convent schools, and where work is done payment is made; *ib.* 1969–1979.

Some convent schools include children just able to walk, up to others nineteen years of age; *ib.* 1795. 1801.

St. Finbar's Convent National school, Cork, has 120 young persons in the highest classes whose ages average 19·9; and it is better that these people should be at school, there being but little employment for females in Cork, *ib.* 1802–1805. 1824.

The poorer and lower portion of middle class Roman Catholic families generally prefer convent schools if within a reasonable distance; *Hunter* 3669-3671; the attractions being that the children are better taught, the nuns are kind to them, and are interested in their welfare; *ib.* 3669–3671; *O'Carroll* 4288–4291.

In South Dublin district there are eight very large convent schools with large attendances; *ib.* 3985–3987. 4023. Some of the religious orders are more especially fitted for teaching than others, as having had a professional training, such as the Sisters of Mercy, the Sisters of Charity, and the Presentation Order; *ib.* 4051–4053.

About a fourth of the Catholic children in National schools in South Dublin district are taught by religious orders; this proportion is increasing; it is the poorest class who for the most part attend convent schools; girls excel boys in attainments; *ib.* 4281–4287. All the schools under religious orders, and under the patronage of Roman Catholic clergymen, are denominational; *ib.* 4345–4348.

There are other schools, conducted by lay teachers, where nuns superintend, which are not ranked as convent schools; the lay teachers are recognised and classed by the Board; the Loretto, the Harold's-cross, the St. Clair, and the Ranelagh schools are such; *ib.* 4024–4034. 4103–4105.

Explanation of report on convent schools, in 1860, suppressed, and subsequently published by order of the House of Commons; *Sheridan* 4873. 5818–5824. 13898.

Education in convent schools is better than that of others, the teachers being trained on a system of their own; there is greater proficiency, more attention, order, and discipline; the attendance is larger and more regular; *Keenan* 1569, 1570; *O'Carroll* 4264–4271.

Convent schools are now fully as efficient as ordinary National schools; *Sheridan* 4801–4803. Parish priest is generally manager; he cannot appoint or remove teachers; nuns generally appoint the manager; *ib.* 5215, 5216. If convents were allowed to open auxiliary schools in crowded districts it would be a better arrangement than the present; *ib.* 4828–4838.

Schools, some of the highest order, are conducted both by Sisters of Mercy and Presentation nuns; *ib.* 4843–4847. 5470–5478. Cloistered nuns cannot teach outside the convents; Ursulines and Presentation nuns are cloistered, Sisters of Mercy and Sisters of Charity are not; *ib.* 4851–4856. Presentation nuns cannot take fees, Sisters of Mercy do; *ib.* 5691–5703.

Convent schools are impatient of competition, and will not permit a rival school if it can be extinguished; they were the first to join the Board, and therefore forestalled day schools; *ib.* 4866–4872. 4876–4879.

Many teachers of superior qualifications in convent schools; there has been great improvement in the methods of teaching and organization; *ib.* 5038–5048.

Fully equal now to National schools; better education to be had in, than in ordinary schools; *ib.* 5049–5056. Comparisons between convent, National, and ordinary schools; as between them, convent schools preferable, but they should co-exist; convent schools are generally in towns, and are the most useful in connexion with the Board; *ib.* 5057–5068.

Literary classification of pupils low; amount of teaching power paid by the Board not larger than in other schools, but considerable extra help provided by nuns, ladies, &c.; *ib.* 5069–5075.

Convent schools teach more subjects than National schools; *ib.* 5175. 5177–5179. Instruction and education given in them is superior to that in ordinary National schools; *ib.* 5432–5434.

CONVENT SCHOOLS—*continued.*

1. *Character of, Attendance, &c.*—continued.

Access is as easy to convent as to other schools; *O'Carroll* 4153–4156; *Sheridan* 5738–5740.

Convent schools do not require more supervision than others; *Sheridan* 5834–5838. Only incidental visits paid to some, more being unnecessary, as nuns discharge their duties so faithfully; *ib.* 5839–5845.

In visiting, comparison is always made of the number of children with the area; eight square feet are allowed to each child; some of the schools are much overcrowded; *O'Carroll* 4394–4396. The operation of the Board's rule (No. 4) is to overcrowd the schools; *Hunter* 3669–3671. Only overcrowded in large towns; *Sheridan* 4839, 4840. No check necessary to prevent overcrowding in convent more than in other schools; they are inspected three times a year; *ib.* 5868, 5869.

Effect of opening of, at Trim, on attendance at model school, especially as regards girls and infants; *Fitzgerald* 8311–8314. 8384–8388. Opening of, at Trim, completely emptied the model school there; *Kavanagh* 12030.

Children in convent schools are too young to gain much knowledge, but they acquire good habits; *Fitzgerald* 8487, 8488.

Are included in the number of the largest schools in Ireland; *ib.* 8489-8491. Are not generally overcrowded; *ib.* 8632.

Most convent schools have two departments, one under National Board, the other for the better classes; *ib.* 8503, 8504. Rich and poor are kept entirely apart in convent schools; *ib.* 8637.

Two in Belfast, one in Downpatrick; excellent character and good success of; dissatisfaction with the small assistance granted to, by the Board; *Bp. Dorrian* 8734–8736. 8742–8753.

Are practically denominational schools, but are open to all, according to the rules of the Board; the superioress is the manager; *ib.* 9057–9062.

The principle of payment by results should be applied in; no objection to application of the Board's rules to convent schools, if fairly applied; Board's regulation, confining nuns to teach in one locality, should be removed; all the nuns in witness's diocese take aid from the National Board; *ib.* 9180–9184.

No Protestant girls attend the nuns' evening schools; they are not induced to attend, but are not excluded; otherwise the schools could not be connected with the Board; *ib.* 9185–9188.

Get no assistance for the evening training of 500 pupils; nuns should at least receive an equal remuneration to secular teachers for the same work; *ib.* 9206–9209. Nuns cannot be classified; they ought to be paid by results; *ib.* 9206–9214. 9263.

Aided by Kildare-place Society; excellent character and efficiency of; amount spent on; particulars of, which are being all withdrawn from the Board; best in Ireland for general comfort; no deficiency of school requisites in; *Kavanagh* 10945–10959.

Intermediate; no real distinction between, and the higher boarding schools; *ib.* 10975–10980.

Objections to; *Berkeley* 11588, 11589.

Attendance at, not so regular as at model schools; *Fitzgerald* 12221 *et seq.*

Building grants might be made for, to satisfaction of Commissioners, on due security given, and being subjected to State inspection; *Warren* 15306–15310.

If brought within the action of the Board would furnish the best and most efficient model schools; *Bp. Keane* 15562.

Are open to children of all denominations, but no Protestant children could attend them; have special advantages under the Board; *Wilson* 16044–16056. Average payment per head in; *ib.* 16058. Average in ordinary schools is higher, but they are better schools; *ib.* 16061, 16062. The cost has increased since 1856, also that of ordinary schools, but not in the same ratio; *Wilson* 16063–16080. 16264–16268.

A convent school at Oughterard was taken into connexion with the Board, there being already a vested school which was afterwards closed; *ib.* 16081–16084.

The majority of Inspectors will agree that convent schools are inferior; *ib.* 16191.

In reading, writing, and cleanliness are superior to all others, but in arithmetic, grammar, and geography are inferior to ordinary National schools; *ib.* 16255–16263.

In witness's district give a highly satisfactory education, except in technical subjects, train their own monitresses; examination, stipends, &c., of the latter; other particulars respecting; *Mahony* 17104–17115.

Nuns would object to classification in Ireland, though they do not in England; *ib.* 17116, 17117.

Might be paid for by results; *ib.* 17116.

Lately established in Elphin; it absorbed witness's female school; convent schools absorb all other schools in the neighbourhood; they are said to be very efficient; *Warburton* 20910–20923.

The rule restricting nuns from teaching in more than one school is objectionable; *Toole* 21260–21263.

At Letterkenny, want of success of; *M'Menamin* 22156–22178. 22192–22195.

Aided by Board from commencement, rules of Board are in the main observed in; *Forde* 23118–23126.

Extract from evidence of Rev. J. Carlile respecting; *Kavanagh* 23450.

Are among the best schools in Ireland. It was a destructive thing to strike off any of them. *Longfield* 24214–24219.

Board allows nuns to have as many schools as they can teach judiciously; lay teachers could compete with nuns successfully if there were no superior influence at work; *ib.* 24427–24431.

Privy Council make no building grants to convent schools as such; *Allies* 25326. 25331.

Reported on favourably by witness; female education, in connexion with, is greatly improved; witness will only speak of districts he is acquainted with; convent schools attract a greater number of children than ordinary female schools; *Sheehy* 26570–26586.

In Clonmel district do their work satisfactorily; *O'Hara* 26864–26867.

Received grants on same footing as others; rate of present payment; *Card. Cullen* 27045. Are rendering great service; some are connected with the Board, many are not; teachers are generally highly educated; they feed and clothe destitute children; efficiency; nuns should receive same salaries as other teachers; number of convent schools, of children on the rolls, and in attendance; advantage of increase in numbers of these schools; *ib.* 27051–27358.

In the North are few in proportion to other provinces; they are excellent; *ib.* 27355–27362.

Motives which induce children to attend; *ib.* 27466.

Average daily attendance in convent schools in a certain district during 1858, 1859, and 1860; *Sheridan, page* 247.

Letter, dated May 1864, from Mr. Inspector Sheridan, on convent and monastic schools; *ib.* 5824.

Number of convent schools, average daily attendance, and detail of grants from National Board, 1860, 1863; *Kavanagh, page* 974.

2. *Payments in and to.*

Average amount of school fees per head in, is only 8¼*d.*, compared with 2*s.* 7½*d.* in schools of Ireland generally; the average from subscriptions, per pupil, is 4¼*d.* per pupil, compared with 9½*d.* in

CONVENT SCHOOLS—*continued.*

2. *Payments in and to*—continued.

schools generally; *Keenan* 1683. In ordinary schools the Board pays 13*s.* 7*d.* per head as teachers' salaries, and in convent schools 4*s.* 3½*d.*; the average of premiums and gratuities paid to the ordinary schools is 5¼*d.* per head, and to the convent schools 1*s.* 1½*d.*; *ib.* 1684, 1685.

Nuns expend all they receive; they get £20 for 100 scholars; *Macdonnell* 209–211. Payments to, are on the principle of capitation grants; *ib.* 226 *et seq.*

Convent schools not altogether gratuitous; some charge considerably more than others; superioress is frequently manager; *Fitzgerald* 8494–8502.

Inadequacy of payments to, can be remedied by payments by results; *Macdonnell,* 11158. Increased allowances to, an act of justice; *ib.* 11205–11207.

Grievance as to payment by capitation in; *Kavanagh* 12682–12687.

Comparative cost for a child in, and in a model school; *ib.* 12686.

Average payment per head in; *Wilson,* 16058.

Received grants on same footing as others; rate of present payment; *Card. Cullen* 27045.

3. *Monitors, Teachers, and Training in.*

Many first-class monitors in; *Macdonnell* 353.

In convent schools there are not monitors for every thirty pupils; *Keenan* 1523. The amount paid for monitorial teaching has increased; *ib.* 1984, 1985. Monitors in convent schools are superior to monitors in ordinary schools; *ib.* 1987–1998; and are trained at much less cost than in model schools; *O'Carroll* 4323, 4324. Nuns receive a gratuity for instructing monitors; they do not charge monitors for instruction given; *Sheridan* 5711, 5712.

It is usual in convent schools to provide a superior order of monitors, who practically become the teachers, and who are often kept beyond their ordinary time of probation; *Keenan* 1989–1999; *Hunter* 3649–3660; *O'Carroll* 4035–4041.

System of training of nuns, and superiority of teaching in; *ib.* 4296–4298. Number and training of monitors in Baggot-street school; the place is a great training institution for female teachers, and many come from it to the Board; the female teachers trained in Marlborough-street by the Board are rejected by the clergy, and those trained in Baggot-street school are accepted by the Board, and the Government system so far completely neutralized; *ib.* 4106–4114.

Large proportion of female monitors to be found in; *Hunter* 3642, 3643.

First-class paid female monitors chiefly in; *Sheridan* 5670.

Less proficiency of pupil teachers and monitors in, than in model schools; length of time monitors are allowed to remain in convent schools; *Fitzgerald* 8471–8486.

Superiority of teachers trained in; *Sheehy* 26486–26490.

See also CLONAKILTY CONVENT SCHOOL. MONITORS AND MONITRESSES. NUNS' SCHOOLS. TEACHERS.

CONVOY:

National schools in parish of, seven under Roman Catholic management, two under Presbyterian; *M'Menamin* 22013–22029.

COOKING:

Desirability of teaching, as a means of preventing waste of food; *De Vere* 20211–20214. 20375–20377.

COOKE, Dr.:

Examination of, before Committee of House of Commons, on the action of Presbyterians in regard to the National system; *Kavanagh* 12338.

Evidence quoted, as to the non-adherence of the Presbyterian body to the projected system of National education; difference between his individual opinion and his vicarious expressions insisted on; *ib.* 12496–12511. 12513–12523.

COOKSTOWN DISTRICT:

Religious character very mixed; similar to Castlewellan; *Hunter* 3152. 3529.

CORK:

Not 10 per cent. of pupils in the model school are Catholics; *Kavanagh* 12076.

Schools at, previous to 1830; *Atkins* 20802–20812.

CORK AGRICULTURAL SCHOOL. *See* AGRICULTURAL SCHOOLS AND MODEL FARMS.

CORK, MIXED SCHOOLS IN:

Carmichael (Presbyterian) schools; St. Nicholas (Established Church) schools; Blackrock convent school; Spike Island (uncertain); and Haulbowline Island; *Sheehy* 26528–26553.

CORK MODEL FARM:

Inconveniences attending divided mastership at; literary acquirements at, very fair; *Sheehy* 26448–26454.

CORK MODEL SCHOOL:

Large proportion of superior class children attending, who stepped in when Catholic children were forbidden to go there; *Sheridan* 5889–5897.

Attendance of Roman Catholics at; *M'Donnell* 11287.

About one-fourth of scholars were of the class usually found in National schools; *Sheehy* 26455–26459.

No teachers produced at, because it is opposed by Roman Catholic bishop; a teacher trained in, would have no chance of employment unless he got a lay patron; *ib.* 26467–26469.

The respectability of its appearance was the effect of the denunciation of it by the Roman Catholic bishop, which caused more Protestants to come to it; the pupil-teachers in, were of humbler class than the pupils; they maintained their authority; *ib.* 26520–26522. Is an exceptional case; *ib.* 26524.

CORPORAL PUNISHMENT:

No prohibition of, in National schools; it is very seldom inflicted, and never in model schools; *M'Donnell* 245–247; *Keenan* 1400–1404. Inspector would note undue infliction in his report as a serious blemish on the character of the teacher; in every instance of excessive chastisement a fine is inflicted on the teacher; *Keenan* 1400–1404.

Not more than three cases of punishment of teachers for inflicting improper corporal punishment have occurred in one half of Ireland; *Hunter* 3222–3225.

Very little, in Christian Brothers' schools; *Grace* 9446.

CORREEN SCHOOL:

Reference to case of, as to compulsion or permission to be absent of children at time of religious instruction; *Kavanagh* 19435–19449.

Circumstances of the visit of witness and Rev. Mr. Lynch to school at; *ib.* 22646–22666. Other circumstances connected with the school; *ib.* 22671–22703.

Application of Presbyterians for aid to, taken as the "model application;" rule as to religious instruction in the case; *ib.* 23361–23370. 23387–23390.

CORRYVADY SCHOOL, NEAR DONEGAL:

Letter from Rev. O. Leitch to Rev. Dr. Wilson, dated Feb. 23, 1869, respecting establishment of school at Corryvady; *App.* xv., *page* 1303.

CORY, Rev. HENRY C., Missionary Secretary of Irish Church Missions, evidence of, *pages* 488–494.

COST:

Average, of schools and scholars, has been gradu-

COST—*continued.*

ally increasing; statements of amounts; *Kavanagh* 12047–12050.

Average, of a child in convent schools and in model schools; *ib.* 12686.

See also CONVENT SCHOOLS: 2. *Payments in and to.* EDUCATION.

COUNCIL OF THURLES:

Decree of, tolerating, but not approving, mixed education; *Kavanagh* 19348–19351.

See also THURLES, SYNOD OF.

COUNTY SURVEYORS:

Not suitable men for supervising small repairs of schools; *Owen* 27557.

CRAIG, THOMAS H., Esq., Clerk in the Education Office, Marlborough-street, evidence of, *pages* 1217–1219.

CRAIGBRACK:

As to attendance of four Presbyterian children at Roman Catholic school at; *Petticrew* 16733 *et seq.*

CREED REGISTER:

Circumstances under which the creed register was drawn up; *Kavanagh* 23447, 23448.

CROSS, Mr.:

His evidence as to the effect of change of rule respecting joint management of schools; *Kavanagh* 23467–23470.

CROSSBOYNE SCHOOL:

As to the religious instruction in; *Lord Oranmore* 13353 *et seq.*

CROSSES:

Refusal of National Board to admit a convent school into connexion, on account of a cross being built in wall; generally as to use of crosses; *O'Hara* 26726–26747.

See also EMBLEMS, RELIGIOUS.

CULLEN, HIS EMINENCE CARDINAL, evidence of, *pages* 1177–1203. 1219–1266.

Active opposition of Cardinal Cullen to establishment of model school at Drogheda; *Kavanagh* 12074.

CUROE, Rev. D. *See* SCRIPTURES.

DARRAY SCHOOL. *See* CLONAKILTY.

DAY LABOURERS:

Comparison of earnings of, with pay of school teachers; *Macdonough* 17832–17844.

"DEAD ASS:"

Sterne's story of, objected to, as a reading lesson; *J. Porter* 18590. 18632. 18654.

DEAF AND DUMB:

Number of, in Ireland, adults and children; *M'Donnell* 14227–14231. 1428–114283. Anxiety of parents to send their deaf mute children to the institution at Cabra; *ib.* 14232, 14233.

Success generally of children taught at Cabra in getting their living afterwards; *ib.* 14287, 14288. Means wanted of compelling children into the schools for them; *ib.* 14298–14301.

The dumb generally inferior in intellect to the deaf and dumb; *ib.* 14302–14304.

Out of 5,653 in Ireland, 2,500 are between 9 and 20 years of age; *ib.* 14315.

Five institutions for, in Ireland; numbers contained in them; *ib.* 14317–14323. Should be educated at expense of state, who would have to pay for them in National schools if not so afflicted; *ib.* 14336, 14337. 14356.

If all who ought to be at school were sent to Cabra, there would be no difficulty in obtaining teachers; six years are required to teach deaf mutes properly; *ib.* 14374–14376. Not being allowed to emigrate, it cannot be told whether their proportion increases or decreases; *M'Donnell* 14377.

See also BELFAST DEAF AND DUMB INSTITUTE. CLAREMONT INSTITUTION FOR THE DEAF AND DUMB. DEAF AND DUMB INSTITUTE AT CABRA. MONEYMORE INSTITUTE FOR DEAF AND DUMB. STRABANE.

DEAF AND DUMB INSTITUTE AT CABRA:

Receives no public aid, except £15 from the Poor Law Guardians for each child they send there, which does not cover the cost of board and lodging; *M'Donnell* 14220, 14221. 14347, 14348. Establishment for boys holds 200, for girls 150, about half a mile apart; *ib.* 14222–14225. All the children in the institute are paupers except seven; *ib.* 14234. What is understood as a pauper; *ib.* 14240.

Children are sent to, from Scotland and England, because there is no Catholic institute in England; cost of each pauper child in Ireland and in London; *ib.* 14235–14238. 14290–14293. Time for children in the institute too short; *ib.* 14244–14247. Progress of children in learning; ability to discharge religious duties their great aim; *ib.* 14248–14255.

Trades taught to children at; *ib.* 14270–14272.

Teachers at, are members of religious bodies; are experienced teachers; *ib.* 14274–14279. Proportion of teachers to children; *ib.* 14280. 14387, 14388.

Supported liberally by the Roman Catholic laity; *ib.* 14284–14286.

General success of the children after leaving, in getting their living; *ib.* 14287, 14288.

Varying amount of income; *ib.* 14294–14296.

Boys above nine not willingly received at; *ib.* 14312. Some persons up to twenty-one or twenty-two are received, but with little advantage to them; *M'Donnell* 14313, 14314.

Number of children received at, during last 22 years; *ib.* 14324–14331. Most of the children sent there are not inmates of workhouses; *ib.* 14363, 14364.

Is open to inspection by any person; not inspected officially; no objection to inspection by a public Board, on a larger measure for deaf and dumb education being carried out; *ib.* 14338–14346. 14357, 14358.

Cost at, less than in institutions of Great Britain and America; *ib.* 14353.

State of bodily health of children on their arrival at; *ib.* 14378–14384. Cost of maintenance increased by low conditions of health; *ib.* 14385, 14386.

DELAY:

As to instances of, in completing works undertaken by Board of Works; the Board not always accountable for it; *Owen* 27484, 27485. 27510, 27511. 27531, 27532.

See also BOARD OF WORKS.

DENOMINATIONAL BOARDING HOUSES:

If separate boarding houses for Roman Catholics be seriously desired, they should be conceded; they would not affect the efficiency of the teaching; *Macdonnell* 23768, 23769. 23825; and if established, with model schools attached, and carried on in accordance with rules of National Board, would give satisfaction to bulk of Roman Catholic clergy; the boarding houses to be supported at expense of denomination; *ib.* 23772–23779. 23799, 23801.

The establishment of, generally advocated, without putting an end to the present system of united teaching; *ib.* 23812–23825.

If they serve as a means to increase the training power, they will be a blessing; *ib.* 23826.

Under Mr. Fortescue's letter; *Macdonnell* 23772, 23773. 23812–23816. 23828. 23848–23873. 23896.

See also FORTESCUE'S, Mr., LETTER.

DENOMINATIONAL EDUCATION. *See* DENOMINATIONAL SYSTEM.

DENOMINATIONAL SCHOOLS:

All common schools in the country are virtually denominational; *Bp. Dorrian* 8947.

A school always open to introduction of the religious element is denominational strictly; help bestowed on such destroys the National system; *Macdonnell* 11175–11180.

A system of, where population is sufficient, and mixed schools where not, though with strongest possible safeguards, would not be satisfactory; it would not work; *Kavanagh* 12291, 12292.

Advocated; *Andrews* 14829–14831. In cases of very small minorities, some constraint should be put upon parents to make them send their children to school; *ib.* 14833.

The establishment of, would not of necessity cause a diminished attendance of children; *O'Reilly* 14914–14916.

Points of difference between, and ordinary National schools; the religious practices in, may be trivial, but they are regarded as important by the people; inadvisability of estranging sympathy from the Government; *ib.* 15002–15004.

All schools should be denominational, Protestant, Presbyterian, and Catholic; *Bp. Keane* 15547, 15548. 15561, 15562. Advantages of such; *ib.* 15549.

Schools are practically denominational; *ib.* 15554.

If denominational schools be established, they should be under Government control; *ib.* 15562.

Denominational Inspectors should be appointed for; *ib.* 15582–15585. 15593.

Church Education schools are strictly denominational in principles of Church of England; *Blacker* 16374–16377.

Violate the fundamental principles of civil and religious liberty, and ignore parental authority; *Petticrew* 16686–16688.

Recognition of existing denominational schools was the origin of non-vested schools; *ib.* 16957–16961.

What is the essence of a denominational school; *Mahony* 17140. Denominational schools, if established or permitted, would produce proselytism; *ib.* 17147.

Are deserted for National schools if the latter are superior schools; *ib.* 17192 *et seq.*

Demand now for; the real question is whether ecclesiastical or civil authorities are to be supreme; *Ross* 17464.

What are not; *ib.* 17521–17530. What are the evils that would arise from introduction of; *ib.* 17465. 17549–17552.

Should be all swept away; all schools should be on the same footing as model schools, of which National Board is patron and proprietor; *J. S. Porter* 18107–18112.

So far as religion is concerned, may be considered "seminaries of particular views," but not exclusively so, as all give secular instruction; *Forde* 23067–23069.

In denominational schools a conscience clause may protect a child from direct dogmatic teaching, but not from the general religious teaching; in undenominational schools the same thing would exist; *Allies* 25504–25515.

DENOMINATIONAL SYSTEM:

A large number of Catholic managers are in favour of denominational education, against mixed education; *O'Sullivan* 7976–7989.

In case of establishment of, as advocated, Roman Catholic minorities must do the best they can; *Bp. Dorrian* 9063–9090.

Explanation by Board of denominational principle; *Kavanagh* 10948. Explanation of; *Mahony* 17215.

Is the only remedy for the protection of small minorities; *Kavanagh* 11070, 11071. 11079. 11085.

If adopted practically shuts small minorities out from school altogether; *Macdonnell* 11333.

DENOMINATIONAL SYSTEM—*continued.*

Preference of Presbyterians for denominational training; *Kavanagh* 12313–12320.

Although all the scholars are of one religion, schools cannot be called denominational for that reason. The number of really denominational schools is diminishing; *Lord Oranmore* 13420.

Observations on the statement of Bishop Dorrian, as to the toleration by Roman Catholic bishops of common schools; witness quotes from returns made by Government officers, who are better authorities than any Roman Catholic bishop; *ib.* 13432–13436.

The denominational system is claimed as a matter of justice because it exists in England; the almost universal opinion among Roman Catholic gentlemen and middle-class people is against it; the choice is whether the State or the Roman Catholic hierarchy is to have the guidance of the whole education of the country; the National system, or something like it, exists in France, Belgium, Prussia, Austria, Australia, Scotland, and all the colonies; it is called the Irish system, and is probably the only Irish thing that has ever been adopted; *ib.* 13437.

Wesleyan schools would not suffer under a denominational system, but the education of the country would; *M'Millen* 14706–14708.

Would prevent social union, so desirable in Ireland; *ib.* 14708.

The existence of minorities has not prevented the introduction of the denominational system into England, where it has given satisfaction; there might be in Ireland some inconvenience to individuals, but whether Catholic or Protestant they must put up with it; *Bp. Keane* 15678, 15679.

There is not a Catholic bishop who does not desire the denominational system; *ib.* 15838–15841.

Church of England clergy advocates of denominational teaching; *Wilson* 15945. One school only in a district of 500 or 600 miles area managed by a clergyman of Established Church; *ib.* 15945.

Denominational training schools, suggested in Mr. Fortescue's letter, not agreed to by Government; *ib.* 16014–16017.

Tendency of the National Board to; *ib.* 16175–16181.

Inconveniences of; would compel children to go long distances to school; more expensive and less effective than mixed system; *Petticrew* 16543–16551.

No parties would be bound by a condition to receive no other children but their own; such a condition would compel the children to go to inferior schools or to none at all; *Mahony* 17149–17154.

Proselytism the invariable result of; *ib.* 17143. 17155.

Must not be yielded to a body of men, however influential, without the obligation for them to show their demand to be right; *Ross* 17479 *et seq.* If what is called denominational education is tolerated on mere demand, free Government education is impossible in Ireland; *ib.* 17502–17507. Must be conceded if the majority of the empire demand it; *ib.* 17508–17511.

Would not prevail if unbiassed opinion of majority were taken; *J. S. Porter* 18206–18209.

Demanded by Roman Catholics only at the instance of their priests; *ib.* 18210–18219.

Would be injurious to the peace and prosperity of Ireland; *Bp. of Down and Connor* 19585.

No denominational school of any sort should have assistance from the State; *ib.* 19595. 19598, 19599.

No doubt desired by Roman Catholics; approval by State of any denominational system should be guarded against; *ib.* 19609–19612.

Keeps up a religious antagonism; may not be a waste of money, but causes undue multiplication of schools; *ib.* 19642–19645. Under such a system the State must wholly support schools for small minorities; *ib.* 19646–19648.

Denominational training schools are objectionable so far as the State is concerned; *ib.* 19722.

DENOMINATIONAL SYSTEM—*continued.*

Objections to; present National system fast drifting into denominationalism, a process favoured by National Board; *Bp. of Down and Connor* 19719–19726.

A success in England, and should be extended; *Toole* 21345–21352.

Evils of, for Ireland, and preference for present system; *Byrne* 21627–21630. 21661–21669.

Would require denominational Inspectors; notwithstanding desire of Roman Catholics for, the present system is preferable and practicable; *ib.* 21691–21696. 21707.

There would be a greater amount of religious teaching under, than under the present system; *ib.* 21706.

The demand for, is a clerical idea; if it arose from the laity it ought to be more respected; *ib.* 21763. Laity would prefer teachers of their own belief, but would have others rather than none at all, therefore desire retention of conscience clause; *ib.* 21765–21769. 21782.

Decidedly in favour of, for primary schools, *M'Menamin* 21900. 21980.

Schools in many places are acquiring a more denominational character; *ib.* 21903, 21904.

Under a denominational system there are few localities where a sufficient number of Roman Catholic children could not be found to support a school; if not, the few may be safely left to the zeal of clergy and laity; *Forde* 22995–22300.

Denominational training more important for teachers than for pupils; upheld altogether, and conscientiously; *ib.* 22953. 22956.

More promotive of kindly social feeling in after-life than mixed education; *ib.* 23057.

Catholic training schools under, should be given in charge to Christian Brothers and nuns; no objection to co-existent secular training schools; *ib.* 23164-23168. Circumstances would determine whether denominational schools would be under jurisdiction of bishop; State should contribute to foundation of schools in sufficient number for the wants of the country, but only in supplying funds and seeing they were properly spent; *ib.* 23175-23177.

Under, Catholic religious bodies would work for themselves and raise their own buildings; in Ireland any system must be dependent for some time to come upon the public purse; *ib.* 23180. 23189.

As a rule the Roman Catholic laity always send their children to Roman Catholic schools; *ib.* 23207–23210.

General feeling of Catholics in favour of denominational education, notwithstanding their tolerance of National system; *ib.* 23207–23217.

Desirability of denominational Inspectors, even for secular subjects, who must be approved of by the bishops, by whomsoever appointed; *ib.* 23225–23233.

As to the status of Christian Brothers under a denominational system; *ib.* 23234–23237.

The laity in Ireland would, with a fair option, greatly prefer the denominational system; *ib.* 23264, 23265.

Protestant minorities under, must put up with the inconvenience of minor religious observances in a Catholic school, the elimination of which would never be contemplated; *ib.* 23266–23268.

If one be established, there must be two or three denominational Boards instituted to carry it out; *Macdonnell* 23695–23705.

The introduction of a denominational system would result in the absorption of all administration in the hands of Government; *ib.* 23707, 23708.

Majority of the country would be opposed to grants of money for the denominational education of any portion of the people; *ib.* 23885–23887.

Would raise up antagonistic feelings and interests; those seeking to establish one, desire such a result as being necessary for their particular views; they feel they are losing ground all over the world, and hope to make Ireland the nursery of Ultramontane action; *Whittle* 24107–24109.

The demand for, is only tacitly acquiesced in by the Irish people, who do not understand the views of the bishops; *ib.* 24115–24119.

The present useful and beneficial protection of minorities would be lost under a denominational system; *ib.* 24164–24167.

Would cause majority to get a good education, and minority to do without; *Longfield* 24232–24236.

The better educated Protestants and Roman Catholics prefer the denominational system for their children, so would every man; but in the present state of Ireland it is impracticable; *ib.* 24368, 24369.

A scheme of separate schools for denominations where more than one, and present system with a conscience clause where only one, might be worked in large towns, but in country places would be quite impracticable; these schools would not interfere with exercise of parental authority; *ib.* 24423–24425. 24464–24483. 24496, 24497.

Roman Catholics might be allowed denominational training schools under the control of the bishops, subject to inspection; *ib.* 24484–24490. 24498–24503. A conscience clause in these schools would not work; *ib.* 24501.

Establishment of denominational schools would be difficult, and financially disadvantageous; *Newell* 24595.

Might be managed by mixed Board; functions of Board should be confined to financial and secular matters, with right of inspection; no confidence in paid boards; *Card. Cullen* 26592.

Catholic bishops have always been in favour of; *ib.* 26598. Is the only remedy for defects of National system; *ib.* 26601.

Recognized in England by law, and in several foreign countries; *ib.* 26630–26683.

Desirability of; as to minorities under; *ib.* 26588–26591. 26620.

There should be none but denominational schools; *ib.* 26633.

Each class of schools under, could fairly claim a grant; if proselytism attempted, grant should be withdrawn; *ib.* 26652, 26653.

Rule in gaols as to religion should apply; pastors to have right of visiting schools where children of different religious persuasions attend; appointment of teachers should remain with managers; teachers should be better trained and instructed in history; clergy should have right to exclude irreligious teachers; training schools should be denominational; Inspectors should be denominational; right of religious body to dismiss; each school to choose its own books; Board to provide means for purchasing; religious books to be approved by clergy; proposed constitution of Board; no Resident Commissioner wanted on it, only secretaries; *ib.* 27052–27066.

Reasons in favour of; education need not necessarily fall into the hands of clergy; managers would have control; bishops would be judges of conducting schools and books; *ib.* 27169-27183.

Dr. Whately mistaken in his views as to; *ib.* 27265.

Catholics do not ask for separate grant; priests and people are favourable to; *ib.* 27366–27376.

Not opposed to proper management of public funds; Government interference should be merely financial and inspectional; *ib.* 27439.

See also DENOMINATIONALISM.

DENOMINATIONAL TEACHING. } *See* DENOMINATIONAL
DENOMINATIONAL TRAINING. } SYSTEM.

DENOMINATIONALISM:

Proofs of the National Board's drifting into; *J. S. Porter* 18087-18089. Not the fault of the Board; *ib.* 18093.

DENOMINATIONALISM—*continued.*

Spur given to, where no necessity exists; *J. S. Porter* 18093.

Not the result of religious feeling among the community at large; it proceeds from ecclesiastical persons; *ib.* 18102. Evil effects of; *ib.* 18112.

Special tendency of National Board to; disapproved of by Wesleyans; the Board has been driven towards, because in its constitution it is composed of active members of denominational Churches; *Tobias* 22744–22754.

DERRYCASTLE AGRICULTURAL SCHOOL. *See* AGRICULTURAL SCHOOLS AND MODEL FARMS.

DERRY MODEL SCHOOL:

Roman Catholics forbidden to attend; the secular teaching in, could not be condemned; subscriptions of Irish Society to; *Williamson* 21076–21081. 21110.

DESTITUTE CHILDREN:

Catholic Poor School Committee, England, contemplate establishing separate schools for, under Poor Law Board; *Allies* 25625–25628.

DE VERE, STEPHEN, Esq., County Magistrate, Chairman of Guardians, and Manager of National schools, evidence of; *pages* 871–891.

DIET:

Allowed in boarding-houses in some respects injudicious; *O'Sullivan* 7795–7801.

DIOCESAN FREE SCHOOLS. *See* CLARE-STREET COMMISSIONERS, 3.

"DIRECTED:"

Use of the word "directed" in proviso as to continuance of children in school during religious instruction; *Kavanagh* 23419–23435.

DISMISSAL OF SCHOOLMASTER:

Theoretical right but practical difficulty of parish priest as to; *O'Reilly* 14888.

See ROMAN CATHOLIC CLERGY.

DIVINE WORSHIP:

Register of attendance at, could not be kept under mixed system; under a denominational system would be useful and proper; *Card. Cullen* 27067.

See also RELIGIOUS WORSHIP.

DOCUMENTS put in by witness; *Kavanagh* 22226–22232. *See* RETURNS, &c.

DONOVAN'S, Miss, SCHOOL AT CLONAKILTY. *See* CLONAKILTY FEMALE SCHOOL.

DORMITORIES:

In Glasnevin or George's-street establishment worse than in a roadside barrack; *Kavanagh* 12417.

DORRIAN, Most Rev. Dr., Roman Catholic Bishop of Belfast, evidence of; *pages* 341–370.

Observations on his statement as to the toleration of common schools by Roman Catholic bishops; returns by Government officers are better authorities; *Lord Oranmore* 13432–13436.

His denunciation of mixed schools; its effect; *J. S. Porter* 18103, 18104.

DOUAY VERSION. *See* SCRIPTURES.

DOWN AND CONNOR, LORD BISHOP of, evidence of; *pages* 852–860.

DOYLE, Dr.:

His opinions, letter, and rules and regulations for schools, on the National system of education as at first put forth; *Kavanagh* 12284–12290. 12308, 12309.

Extracts from works of, showing his opinion against mixed education previous to establishment of National Board; tried the National system as an experiment; *ib.* 22233–22245.

Approved of a training school, not of district model schools; *ib.* 22246–22250. Reference to opinion of, as to trained teachers, in suppressed portion of a report on Clonmel model school; *Kavanagh* 22253–22263.

DOYLE, Dr.—*continued.*

DRAWING:

Not usually taught in schools in South Dublin district; in some convent schools it is, and in Harold's-cross and John-street schools; very few drawings sent in for competition under Science and Art Department; *O'Carroll* 4360–4370.

Any school with an average of 100 pupils could get up a drawing class; payments for such should be made through Commissioners of National Education; *Hunter* 3526–3528.

DRELINCOURT:

Large endowed school at, connected with Church Education Society; *Irwin* 9845–9848.

DRUMKEERIN SCHOOL:

Circumstances of; rent of, paid by teacher; *Gallagher* 19154–19171. Attendance at; *ib.* 19177–19188. Religious denominations in; no differences as to religious instruction in; *ib.* 19189, 19190. 19252.

Has never received any assistance from managers or landlords; *ib.* 19271.

DUBLIN:

Some of the Dublin schools are better looked after than schools in the country, but the ordinary ones are the worst specimens of National schools; *Hunter* 3356–3363.

Low character of schools and teachers in; *Sheehy* 26512.

No difficulty in obtaining school sites in diocese of; no anxiety on part of landowners to become patrons in; *Card. Cullen* 27277.

Protestant parochial schools in, purely denominational; schools in, generally not much mixed; *ib.* 27046, 27047.

See also SOUTH DUBLIN DISTRICT. SOUTH DUBLIN UNION SCHOOL.

DUFFY, JAMES, Esq., Publisher, evidence of; *pages* 1027, 1028.

DUNDALK INSTITUTION:

Stimulus given to pupils in the Church Education Society's schools by means of; *Irwin* 9871, 9872.

DUNGANNON DISTRICT:

Schools in (120 to 130), described; *Hunter* 3136–3139.

DUNGANNON ROYAL SCHOOL:

Order of Clare-street Commissioners as to religious instruction was issued in consequence of events occurring at; *Kyle* 15481–15485.

DUNGARVAN:

Population of, mainly Irish speaking; in stating the number unable to read and write, in connexion with the boast of there being no National school in the place, witness used those figures only that were necessary to establish his assertion; *Mahony* 17231–17249, 17263.

DUNMANWAY MODEL SCHOOL:

Large proportion of Catholics in; is not prohibited by the Roman Catholic bishops; number and creed of teachers in; *Sheridan* 5781–5797. 5881–5888.

Attendance of Roman Catholics at; *Macdonnell* 11289.

Well attended by children of Protestants and Roman Catholics; *Wilson* 16120–16126.

No local patrons at; *J. S. Porter* 18121.

As to assertion of want of privy accommodation at; *Owen* 27547.

EDENDERRY SCHOOL, PORTADOWN:

Infringement of rule at, in that two Roman Catholic children were allowed to remain in the school room and move about while Protestant religious instruction was going on; *Kavanagh* 22288–22317.

EDUCATION:

No apathy in Ireland with regard to; *Macdonnell* 50, 51.

Cost of Education to the State in the Colonies averages £3 a head, in the Irish National schools about 14*s.*; teachers should be well paid, and the State only can do this; *Newell* 2940–2942. Children could be educated in Ireland at a maximum of £1 5*s.* 11*d.* a head; £2,000,000 a year would be well spent, but £500,000 would be a liberal grant; *ib.* 2943–2946.

A National system should be such as to enable poor talented children to rise above their original position; *Sheridan* 5187. 5499. 5570–5576. 5859.

Given in monastic schools superior to that in ordinary National schools; *ib.* 5432–5434.

In Ireland superior to that in Prussia; *Fitzgerald* 8573.

April and May not so suitable for education census as February and March, or June and July; *ib.* 8570–8572.

It would be difficult now to make people pay for schooling; gratuitous education has demoralized the people; assessments for education should be made on localities; the idea is new, and not generally acceptable; *ib.* 8577–8584.

Per-centage of persons able to write in England, Scotland, Ireland, and France; *Kavanagh* 10722–10732.

Good education the primary object of the National Board, to which united education is subordinate; *Macdonnell* 11345.

State aid to education desirable as a matter of benevolence and public policy. The aid should come partly from endowments and partly from yearly grants; *M'Ivor* 13796–13798.

Secondary education is not obtainable, except by persons of £600 or £700 a year, unless it be in connexion with the village school; *ib.* 13779. 13800.

Time required for a child to get through the First Book depends upon the child's age; *ib.* 13806–13808.

For the extension of education the sympathies of the clergy must be enlisted; *O'Reilly* 14921–14923.

Practically, the right which the bishops assert to direct religious education, from its being interwoven with secular instruction, amounts to a control of education in its entirety; it is allowed to Catholic bishops in England, though they have only a veto on the appointment of Inspectors; *Bp. Keane* 15686–15692. 15698–15708. 15751–15756.

Distinction between education and instruction; *ib.* 15632.

The Church in Ireland has always been anxious to promote the cause of education; if the standard of literary instruction could be raised, a great service would be done to the people and the country; *ib.* 15638.

It is natural for the clergy of every Church to try to have the control of education; *Wilson* 16276.

The great object of, is to make good citizens; if children are made good Christians the other will follow; the cardinal truths of Christianity are taught or implied in the books of the National Board; *Petticrew* 16749–16751.

Parent's right over his child as to education is recognized as a civil right; *ib.* 16805–16810.

In National schools as good as it can be; its two chief defects; *Mahony* 16985, 16986.

Character of, in schools in witness's district; *ib.* 16999–17003.

State of, in Youghal and Dungarvan, has become denominational; backwardness of population in ability to read and write; *ib.* 17123–17127.

Unsatisfactory state of, generally, to be attributed very much to insufficient remuneration of teachers; *Macdonough* 17771, 17772.

Indifference of gentry to; *ib.* 17880–17882.

EDUCATION—*continued.*

It is not a general impression that the State ought to pay for, and the people nothing; *Macdonough* 17949, 17950.

Cost of, should be defrayed by State or by local taxation; *Matthews* 18380–18383.

Increasing desire of the Irish people for better; *O'Callaghan* 19896–19900. Greater spread of, among the peasantry; *ib.* 19971–19985. 20062, 20063.

A local rate in aid of, unadvisable, *De Vere* 20205–20210.

A scheme for a local rate in aid of, suggested and advocated; *Warburton* 20847–20850. 20913. 20877–20880. 20885–20888. 20902–20909. 20932–20935. 20948.

Lecture in favour of, by witness; *ib.* 20889–20891.

Duty of the State to provide education for the Irish people, who are too poor to procure it for themselves; State might make existing endowments available for the purpose; *Forde* 23163.

The standard of education has not been unduly raised; the poorer classes have not been discouraged in their attendance; great movement in Ireland in favour of engrafting classics and languages on the National system; it could be easily done; *Macdonnell* 23900–23905. 23908.

Demand of Roman Catholic clergy for exclusive authority over all teaching; *Whittle* 24083–24085.

The scope of education is to train the intellect and energies; the religious surroundings advocated by some would necessarily interfere with the proper business of school education; *ib.* 24090.

Cannot be free where parents are coerced; danger of allowing clergy to interfere with parents' free choice; the State paying largely ought to judge for itself as to the proper system; *ib.* 24110–24114.

If the demand of the Catholic bishops for a denominational system be granted, freedom of education will be altogether ignored; *ib.* 24135.

It is impossible to carry on any system to which Catholic bishops object; *Longfield* 24370, 24371. 24454–24459.

Only two systems of education are possible in Ireland—that of the National Board, and one partially denominational; *ib.* 24503.

Of boys at twelve years of age is barely sufficient to enable them to begin the work of life; *Hackett* 26006–26008.

Great improvement in the matter of female education in Ireland; more, according to the census, in the North than elsewhere; *Sheehy* 26572–26585.

Each class should be educated for the sphere in which they have to move; *Card. Cullen* 27155.

Return, from reports of Registrar-General, for years 1845 to 1867, of persons who signed marriage registers with their mark; *Kavanagh, page* 426.

See also DENOMINATIONAL EDUCATION. MIXED EDUCATION. RELIGIOUS INSTRUCTION.

EDUCATIONAL GRANTS:

Should be administered under a code sanctioned by Parliament; *ib.* 19517–19520.

EDUCATION RATE:

Might be inoperative for the maintenance of schools, but not for their erection; people frequently tax themselves for the latter purpose; if schools were satisfactory to Catholics this voluntary rate would become general and compulsory; *O'Reilly* 15044.

Local aid should be provided; if by a parish rate it is the same as if given from the public purse; *Wilson* 16170–16174.

See also LOCAL RATE. RATE IN AID.

ELPHIN GRAMMAR SCHOOL:

Particulars of a school about to be established, under a bequest of Bishop Hodson, for the benefit of the inhabitants generally; it will absorb the present school; *Warburton* 20851–20873.

ELPHIN GRAMMAR SCHOOL—*continued.*

Rules and Directions for the Regulation of the Grammar School in the town of Elphin, Roscommon, established in pursuance of trusts of Bishop Hodson's will, as settled and approved by order of Court of Chancery, dated February 18, 1867. *Appendix* xiv., *pages* 1301, 1302.

ELPHIN NATIONAL PAROCHIAL SCHOOL:

Numbers on roll at, with about eight Protestants; *ib.* 20827, 20828. Was mildly denounced by Roman Catholic bishop; no children left in consequence, *ib.* 20835–20837. 20926, 20927. There is another National school in Elphin under Roman Catholic management, but with less attendance; *ib.* 20829–20834.

Is non-vested; *ib.* 20924. As to a Roman Catholic assistant officiating as master; *ib.* 20925, 20926. Always had Protestant master and Roman Catholic assistant; never any difficulty; *ib.* 20939–20947.

EMBLEMS, RELIGIOUS:

Necessary for the religious instruction of Roman Catholics; *Bp. Dorrian* 8685.

Should be always before children; *ib.* 8973.

See also CHRISTIAN BROTHERS' SCHOOLS. CONVENT SCHOOLS. CROSSES. NUNS.

EMIGRATION

Of teachers to America; *Keenan* 1538, 1539.

Young men first educated at agricultural farms had to emigrate; there was no demand for them; *Baldwin* 13218.

Stated to be a cause of decreased attendance in Sunday schools; *Pilkington* 23535.

ENDOWED SCHOOLS COMMISSION:

Comment on some of the statements in the report of the Commission; *Hamilton* 8259–8261. 8274–8277; *M'Ivor* 13640–13642.

ENDOWED SCHOOLS (of Clare-street Commissioners). *See* CLARE-STREET COMMISSIONERS.

ENDOWMENTS

For primary education, the Church would give up its so-called monopoly of, if endowments of other denominations were added to common stock; *Bp. of Ossory* 20667.

See also NATIONAL SCHOOLS; *Income.*

ENGLAND:

State paid schools in; temptations to exclude minority from them; exclusive schools in, recognized by Government, which is not justified in doing so; *Ross* 17531.

ENGLISH SYSTEM OF EDUCATION:

Has been found to work satisfactorily, and should be applied to Ireland; *Bp. Keane* 15549, 15550.

Instance of the great usefulness of embracing the training system; *Toole* 21237, 21238.

Financial arrangements of, not suited to Ireland; of training schools should be extended to Ireland; *Card. Cullen* 26603–26607.

Clergymen act as professors and as inspectors; *ib.* 27071, 27072.

ENNISCORTHY:

Opposition to establishment of model school at; *Kavanagh* 12033–12037. 12041. Attendance at, and cost of, model school; *ib.* 12043–12045.

Erasmus Smith's school at, very good of its class (second); *Rudkin* 14020, 14021.

Projected erection of model school in, letter remonstrating against, produced and read; *Kavanagh* 19326, 19327. How a copy of the letter was procured, it having been wanting on previous examination; *ib.* 19393–19399.

Explanation as to letter relating to model school at, with reference to extracts read from it, and its production; it was dishonourable in the parties who supplied it to the Commissioners; *Kavanagh* 23341–23357.

As to execution of repairs at; *Owen* 27548.

ENNISKILLEN:

Model school, numbers in attendance at, and cost of; *Kavanagh* 12045.

Erasmus Smith's school at, only two years under governors; number in attendance at last inspection 74; general attendance cannot be ascertained by a random visit; *ib.* 13997–14018.

ENNISKILLEN ROYAL FREE SCHOOL

Under Clare-street Commissioners, the largest, most flourishing and successful school in Ireland; extension of its course of instruction; *Kyle* 15431–15436.

EPITOME OF GENERAL GEOGRAPHY:

Alleged errors in; *Keenan* 1706; *Hunter* 3529; *Kavanagh* 12364–12372.

ERASMUS SMITH'S SCHOOLS:

The schools of Erasmus Smith are not under the Board; *Macdonnell* 745. They would not satisfy requirements of Protestant minorities in the South; *Sheridan* 5577–5580.

The original grant of Erasmus Smith to trustees was in the time of the Protectorate, in 1657; *Thorp* 12750–12758. The Governors' estates are in Limerick, Tipperary, Galway, Sligo, and Westmeath. A large portion of the town of Galway is built on the Board's property; *ib.* 12755, 12801. They have also an accumulation in bank of about £20,000; *ib.* 12790–12793.

In May 1868 the number of schools was 146, two have been since withdrawn; in 1809–12 there were only three or four English schools; the Governors take a conveyance of land from landowners, and contribute towards building the premises; the Governors are connected by ownership of property with about 70 schools; *Thorp* 12688–12700. The whole establishment consists of four grammar schools and 144 primary schools. £4,500 a year is spent on the English grammar schools, and £4,000 on the others; *ib.* 12856–12859. About 4,650 children are in attendance; *ib.* 12776–12782.

There are seven *ex-officio* members, the remainder are elected as vacancies occur by the other Governors, except *ex-officio* members; are all of the Established Church; *ib.* 12805–12809. About sixteen meetings of the Governors per annum; out of thirty-six, the full number, twenty sometimes attend; a standing Committee do the general business. Certain matters are retained for general Board. Witness is the only officer of the institution, with an assistant book-keeper; the Chairman is treasurer; *ib.* 12837–12845. 12860–12867.

The rules require reading the Bible and teaching Catechism of Church of England; all the children must read the Bible, but those of other denominations may withdraw from the catechism. The original rule that Archbishop Usher's catechism should be used is not enforced; *ib.* 12759–12770. The rules have been made about forty years; *ib.* 12832, 12833.

Quality of instruction given in the primary schools; the books used are those of the National schools; *ib.* 12815, 12816.

Difficulty of late years in obtaining teachers; some have been trained under the National Board; there is no objection to them. Retiring allowances seldom given, only in peculiar circumstances; *ib.* 12819–12828.

No connexion with any other society; the teachers must be members of Established Church; Roman Catholic children who attend must abide by the rules; their numbers are low; *ib.* 12703–12714.

No case of proselytism has ever been attempted; *ib.* 12715–12719.

No training establishment; many of the masters

ERASMUS SMITH'S SCHOOLS—*continued.*

come from the Church Education schools; the patron has the right of nomination; *Thorp* 12722, 12723.

Rules upon which salaries, &c., to schoolmasters and mistresses are made; *ib.* 12724–12729.

A register is kept of religion of the scholars; number of Roman Catholic children attending the schools small, and decreasing; *ib.* 12834–12836. 12881–12886. A Roman Catholic child may be fairly treated in a school in which he is compelled to read the Protestant version of the Bible daily; quite practicable for a teacher to explain the chapters read in school, without raising a controverted topic; *ib.* 12907–12913. 12927–12934.

The Inspector has £500 a year and travelling expenses; is not allowed to do anything else; visits 146 schools twice annually; has to note the time occupied by each inspection; *ib.* 12783–12789. 12980. Does not examine the grammar schools; *ib.* 12851–12853.

Schoolmasters are appointed during pleasure of the governors, who with few exceptions are satisfied with the efficiency of the schools; the progress of the classical schools is known by the result of exhibitions, &c.; *ib.* 12771–12775. 12849. 12851–12853. No reason to believe that the masters get gratuities from any other society; *ib.* 12891–12893. Return of teachers employed by the Board trained by Church Education Society, by National Board, in other places, and of those not trained; *ib.* 12914–12917, *and foot note.*

Each school inspected twice a year; every child subject to examination; *Rudkin* 13491. 13508. 13527, 13528. 13602, 13603. Mode of keeping attendance rolls; *ib.* 13492. Accuracy of them satisfactory; *ib.* 13600, 13601. In majority of schools children pay a school fee, generally about a penny a week; difficulty in enforcing continuous attendance; *ib.* 13493–13495. Division of schools into classes, and promotion of children; *ib.* 13496–13500.

Books of Christian Knowledge Society generally used; in many schools the National books are in use; *ib.* 13947. Governors pay half the cost of the books, and children the other half, the books then becoming the property of the scholars; *ib.* 13548.

Many masters have been dismissed during last nine years for inefficiency; efficiency has increased during that period; *ib.* 13504. 13506. 13511. Several of the best teachers have been trained by National Board and by Church Education Society; some of the best have not been trained; *ib.* 13507. Erasmus Smith's schools will bear comparison with any other English schools of same class; *ib.* 13509, 13510.

The Bible not used as a book for teaching; every child that can read fluently must read the Scriptures; expositions involving controversial matter absolutely excluded. Never heard complaints from parents of Roman Catholic children as to matters connected with religion; *ib.* 13512–13520. 13524–13526. 13530–13535. 13564–13570. None but members of the Established Church required to learn catechism; *ib.* 13523. 13529. Number of children of each sect attending schools is returned to the Governors; *ib.* 13521, 13522. Roman Catholic children answer in Scripture better than Protestant; probably the Bible being in some degree a new book to the former may account for this; *ib.* 13536–13539. 13586–13588.

Children who distinguish themselves have opportunities of going to various branches of Incorporated Society and other institutions; *ib.* 13540–13545. Examination of candidate teachers; *ib.* 13546–13548.

About £25 per annum, with £5 gratuity, the fixed salary for teachers, the Governors always expecting an additional sum from local sources; teachers have also what can be got from pupils; some of the schools have dwelling house and land

ERASMUS SMITH'S SCHOOLS—*continued.*

attached; *Rudkin* 13553–13577. Governors give a premium of a pound's worth of books to a certain number of best teachers; *ib.* 13559, 13560. Agricultural instruction is not given in the schools; *ib.* 13558.

Case of withdrawal of Roman Catholic children from an Erasmus Smith school, and their return afterwards; *ib.* 13571–13583. 13970. Roman Catholic families do not object to send their children to the schools; *ib.* 13585.

Expenses of inspection of, are paid out of funds of Board; *ib.* 13591–13593. The inspection of, and of those of National Board and Church Education Society, could not be combined in one officer; *ib.* 13594–13598. Not half a dozen badly supplied with requisites; *ib.* 13604–13607. Difficulty in procuring efficient teachers; in about 47 schools paid monitors are employed, one half of salaries being paid by Governors and the other by local patron; *ib.* 13608–13610.

School in Galway was given up in consequence of the small attendance; *ib.* 13983–13996. The school at Enniskillen, only under the Governors during the last two years, had 74 in attendance at the last inspection; *ib.* 13997. It is the duty of the Inspector to insist on the application of money granted being applied in obtaining school requisites if wanted; *ib.* 14009. School at Lurgan is well managed; the children are mostly young, and attend for a short time only, from facilities of obtaining employment in the factories; *ib.* 14010, 14011. 14015. Subjects taught in schools; *ib.* 14011–14013. The schools in Brunswick-street, Dublin, and at Bandon, are very good schools; *ib.* 14014. Enniscorthy school is a good one—of the second class; *ib.* 14020, 14021.

One hundred and fifty schools are in connexion with Erasmus Smith's Board; no Sunday schools in connexion with it; *ib.* 14022–14029. Schools under the Governors are not connected with other societies, nor inspected by other officers than those of the Board; *ib.* 14030–14033. 14038, 14039.

Average salaries of teachers good, but many teachers are underpaid; average about £44 a year, generally with a house, and in some cases two or three acres of land; *ib.* 14040–14042. 14052–14054. As a body the teachers are satisfied with their condition; *ib.* 14053. Governors occasionally grant pensions, but there is no rule; *ib.* 14044. Managers have no power to dismiss teachers except in cases of gross misconduct; no inconvenience from want of the power; *ib.* 14045–14049.

The office of superintendent recognized by the rules of the Board; *ib.* 14050, 14051.

Presumably parents are aware of rule forbidding introduction of controversial subjects in school teaching; if children object they would state objections to the master, who would bring the matter before the Inspector; *ib.* 13972–13978. Grammar schools are not inspected; *ib.* 13982.

Should be made available for the intermediate education of the country; *De Vere* 20357, 20358.

Seven in Ferns, two in Leighlin; *Bp. of Ossory* 20668.

In witness's parish, chiefly supported by Lord Courtown; numbers attending it; not equal to National schools; religious instruction in; suggestions for better efficiency of; *Atkins* 20703–20711.

Copy of the original indenture made 1st December, 1657, between Erasmus Smith, esq., on the one part, and Dr. Jones, Dr. Winter, and others on the other part; *Thorp* 12754.

See also INSPECTORS.

ESTABLISHED CHURCH:

Teachers of Erasmus Smith's schools must be members of; *Thorp* 12706.

As to claim of bishops and clergy of, to control the religious education of the country; *Bp. of Ossory* 20576–20580.

ESTIMATES:

Estimates and expenditure by Board of Works for National schools last year; *Stack* 14177–14187.

Of cost of maintaining schools, &c., by clerks of works; *Owen* 27535–27537. Preparation of, for Parliament; *ib.* 27630–27633.

See also BOARD OF WORKS.

EVENING CLASSES:

Teachers in training at Marlborough-street are not instructed in mode of conducting evening classes; *Joyce* 6625, 6626.

EVENING SCHOOL:

The old evening school in Marlborough-street was opened in 1847 and closed in 1851; a new one was opened in 1866 with success; the teaching is conducted by some of the junior masters under Mr. Cahill; *O'Sullivan* 7821–7825.

EVIDENCE:

Explanation of, given by witness before Lords Committee in 1854, about proselytism, observance of rules, confidence in Board, &c.; *Kavanagh* 12435–12451.

EXAMINATION:

Necessity for supplemental examination of schools; suggestions as to manner of carrying it out; reference to Duke of Newcastle's commission in England; should be by classes, not by age; knowledge to be arrived at by; quite within the scope of present Commission; *Mahony* 16967–16984. 16990, 16991.

Examinations of nuns and other members of religious orders could be conducted satisfactorily; some suggestions thereupon; *Toole* 21540–21548.

Of teachers with a view to classification should be by inspectors, not by professors, the meritorious receiving a certificate entitling them to a step in promotion; *Sheehy* 26293–26301.

Uniformity of standard in examinations of teachers by Inspectors; steps taken by Inspectors after examination; *ib.* 26302–26313.

Uniformity of system of examinations for classification; *ib.* 26425–26430. Persons not engaged under the National Board are sometimes allowed to come to, and receive certificates, but not in a formal manner; *ib.* 26431–26440.

At the annual examinations of teachers by Inspectors the questions are drawn up by the Head Inspectors; the teachers use "Board's Book of Natural Philosophy;" an answer given outside that book would be taken; *ib.* 26501–26511.

Of teachers not necessary in a system of paying personal salaries; if conducted in writing there would be no difficulty in examining Christian Brothers and nuns; law of Canada should be applied as to exemption of members of religious orders from; *Card. Cullen* 27458–27465.

See also TEACHERS.

EXPENSE OF EDUCATION:

Per head in a model school, in a common school, in a Christian Brothers' school, and in a nuns' school; *Bp. Dorrian* 9045, 9046.

See also COST. EDUCATION.

EXPERIMENTAL SCIENCE:

Teaching of physical science at Marlborough-street training establishment; *Butler* 6262–6296. 6445–6450.

Discontinuance of lectures on, since death of Dr. Clarke; no provision for instruction in physical science, except from the head masters taught by Dr. Clarke; *O'Sullivan* 7813–7820.

Lectures on chemistry, by the late Dr. Clarke; *Newell* 25280.

Few in connexion with, at Marlborough-street; *Sheehy* 26491–26493.

See also GEOLOGY AND MINERALOGY.

FARMS:

Held by ecclesiastical persons are generally better managed than the land around them; *De Vere* 20368.

Comparison between Irish and Belgian small farms; superiority of the Belgian; *Baldwin* 13273–13302.

Small farms as against large not advocated, but as there are 300,000 small farms in Ireland, it is desirable to teach the best means of cultivation; aptitude of small farmers for erecting their own buildings; *ib.* 4595.

FARRA SCHOOL:

Belonging to the Incorporated Society; the failure of, as an agricultural school, was owing to superiority of Government agricultural schools; the land is now let to the master, who makes a profit of it, in supplying vegetables and milk to the pupils; he is not allowed to neglect his school duties while managing the farm; *Hackett* 25944–25963.

FAUGHANVALE SCHOOLS:

Explanations regarding; *Petticrew* 16521. 16648, 16649.

FEES:

Mode of payment of school-fees in model schools; *Keenan* 1056–1061.

Transmission of, to Inspector, and distribution of, by him; *ib.* 1062–1064.

School-fees a necessary element of the National system; Commissioners have endeavoured to secure as much as they could legitimately venture on; *ib.* 1133–1135. No fixed rate of; *ib.* 1248, 1249.

Relation between school-fees paid and classification of teachers; *ib.* 1687–1690.

As to "Inspectors' results fees" dependent on a system of payment by results proposed by witness; *ib.* 2077–2082. 2116–2119.

Paid at model schools in Ireland, amount of; they are transmitted to the Board, by order of the Treasury; they should all go to the teachers; *Newell* 2461–2467. 2577–2583.

Better attendance and more attention at school might be expected if children had to pay school-fees; *O'Carroll* 4136–4138.

Paid by pupils in Marlborough-street model school; *Joyce* 6591–6594.

School-fees at model schools and at Christian Brothers' and nuns' schools, disparity of; *Bp. Dorrian* 8855–8863. 9041–9046.

School-fees are rarely paid, even in Dublin; *Cory* 11916–11920.

School-fees are too low; landlords should give more; demand on State should be moderate; *Kavanagh* 12434.

In majority of Erasmus Smith's schools children pay school-fees; *Rudkin* 13493.

School-fees have reached their maximum point, unless higher branches are taught; *M'Ivor* 13814.

School-fees are very low in Wesleyan schools; *M'Millen* 14571. Total amount of; *ib.* 14573. Fees are asked, but not enforced; *ib.* 14576.

Priests do everything they can to induce the children to pay school fees; it is for the benefit of both teachers and pupils; those who pay attend more regularly; *Bp. Keane* 15645.

More attention should be paid to school-fees; many parents are well able to pay who do not; where there is competition no fees whatever are paid; *Wilson* 16172–16174.

School-fees are paid pretty generally in the North, but not sufficiently; none but the absolutely poor should be excused; those who pay attend best; *Petticrew* 16583–16591. Incomes of teachers should be increased more directly from; *ib.* 16589.

Bad method of payment; irregular amount of; advantage of weekly payment of; *Mahony* 17032–17036. 17045–17047. Ought to be paid in convent schools; *ib.* 17037. Parents ought to pay more; *ib.* 17038.

FEES—*continued.*

Sometimes made quarterly; not advisable to abolish quarterly payments, though often less than expected; balance mostly dispensed with by compromise; smaller fees punctually paid better for the teacher; *Mahony* 17048–17054.

Many more parents could pay school-fees than do; teachers often refrain from enforcing, as it might affect average attendance, and so diminish his income; *Macdonough* 17744–17746.

Tendency of fees to increase; *ib.* 17758, 17759.

Manager cannot know who should be admitted free and who not; in Naas the question rests practically with witness (the teacher); *ib.* 17754–17757.

Whatever efforts are made to enforce school-fees are made by the teachers; neither managers nor gentry make any; *ib.* 17771–17778.

Managers and teachers arrange for relief of pupils from payment of fees; teachers say it is impossible to enforce payment; *ib.* 17914–17918. 17928, 17929.

Average of, to all teachers in Ireland; *ib.* 17919–17927.

As a general rule, those who can pay, do; *ib.* 17933.

School-fees were levied in the years of the famine as they are now; *ib.* 17955.

School-fees paid in witness's Non-Subscribing Presbyterian schools; *J. S. Porter* 18068, 18069.

Enforcement of payment of school-fees has a good effect; *Matthews* 18375–18379.

Many are able to pay who do not; if managers and teachers pulled together amount of, might be largely increased; *ib.* 18446–18450.

School-fees in Canada; *Gordon* 18917, 18918.

Managers and teachers always encourage payment of school-fees; *Gallagher* 19176, 19177. 19257, 19258.

Attempt to enforce payment of school-fees would injure education, and make the teacher unpopular; *O'Callaghan* 20074–20082.

Very few paid in Elphin; reasons for this; compulsory payment of, might have an ill effect; *Warburton* 20847, 20848.

School-fees charged in St. Wilfrid's and St. Alphonsus' schools, Manchester; *Toole* 21177–21181. Should not be dispensed with, except under a great National scheme for education of the poor; *ib.* 21188–21190.

School-fees should not be required in a system of National education, but attendance should be compulsory; children who pay are generally more punctual in attendance; in Manchester schools are about one third of the grant; *ib.* 21307–21312.

Small amount of school-fees paid in Cappagh schools; children of higher classes in model schools should pay higher fees; *Byrne* 21572. 21581–21584. 21619.

School-fees are badly paid; to enforce payment of, would affect attendance; *Forde* 22945. 22975. 22986. Rigidly enforced in school conducted by ladies of the Sacred Heart; *ib.* 22979.

Teachers allowed to keep school-fees as an encouragement; not insisted on in cases of difficulty; the majority pay none; *ib.* 22992–22994.

A penny a week would not be too much; *Newell* 24851–24853.

See also NATIONAL SCHOOLS: 2. *Cost, Income, &c.*

FENIANISM:

A teacher accused of, who had resumed his duties, dismissed by Board at instance of Government; *Kelly* 3053–3055.

Christian Brothers' boys did not go in procession in honour of the men executed in Manchester; *Grace* 9502–9506.

The attempt to exclude all references to the history and literature of Ireland has contributed to the rise of; 75 per cent. of those implicated in, had been National school pupils; *Kavanagh* 12398–12406.

FENIANISM—*continued.*

An effect of the model schools; *Andrews* 14771.

Is not the result of the National system; *Ross* 17446–17449; *J. Porter* 18712.

No National teachers have been convicted of; *Newell* 24911–24913.

Means taken by Superior of Christian Brothers to prevent spread of; *Card. Cullen* 27051.

FINES:

On teachers for misconduct, amount of, and means of checking, &c.; *Macdonnell* 578–581. 586–588.

Fines, depression, &c., recommended by Inspectors after inspection of school; *Keenan* 1100–1103.

Upon teachers are decided upon by Resident Commissioner on consultation with Chiefs of Inspection; amount of; late attendance one cause of; are avoided as much as possible; average number about four or five a month; *Newell* 2692–2703; *Hunter* 3171–3176.

Power of superintendent of inflicting fines for trifling offences; cases of serious irregularity must be brought before the Board; *O'Sullivan* 7722.

FINGLAS NATIONAL SCHOOL:

Inefficiency of trained and classed teacher at; *Sheehy* 26358–26362.

FITZGERALD, MICHAEL, Esq., Head Inspector under National Board, evidence of; *pages* 328–340. 511–513.

FLAX-GROWING:

An Irishman does not produce such good samples of flax as a Belgian; instruction is more wanted in its treatment than in its cultivation; the gross produce of the raw material is rather more in Ireland than in Belgium; the erection of small scutch mills at convenient distances desirable; but in Belgium the average produce of hand-scutched flax is above that of mill-scutched; *Baldwin* 13303–13320.

Farmers are wrong in their objection to grow flax; it is one of the most ancient agricultural pursuits of the country; *ib.* 13321–13327. The soil in Belgium being alluvial is more easily prepared, and the flax is better; it is hopeless to expect to grow flax without perfect tillage; *ib.* 13328–13330.

Instruction in growing flax has been attempted on a small scale at Glasnevin; a complete course of technical instruction is afforded in the school at Ghent; *ib.* 13331–13333.

FORDE, Very Rev. Monsignor LAURENCE, parish priest, and vicar-general of diocese of Dublin, evidence of; *pages* 999–1027.

FORTESCUE, Mr.:

His restoration of original rule as to exclusion of children of different faith, during religious instruction, has not removed the objections of Roman Catholic bishops; *Kavanagh* 12098–12101.

FORTESCUE'S, Mr., LETTER:

References to; *Macdonnell* 11243. 11348. 11350; *Berkeley* 11562–11573; *Macdonnell* 23772, 23773. 23812–23816. 23828. 23848–23873. 23882–23889. 23896.

The proposals in, if adopted, would have been a departure from the system of united education; the Board was willing to adopt them but the Government refused; *Wilson* 16011–16017.

Was written on the day the Government resigned, a clear indication of the system of education being used for political purposes; *ib.* 16135–16143. 16297.

So called, generally supposed not to have emanated from him; *ib.* 16294.

His plan of denominational boarding-houses, to be supported by localities, objected to, as being a concession to the Roman Catholic party; *Macdonnell* 23812–23828.

Approval by National Board of the plan suggested

FORTESCUE'S, Mr., LETTER—*continued.*

by; estimate submitted to Government; matter dropped, no notice being taken by the latter; *Macdonnell* 23986–23993.

Scheme of model schools proposed in, somewhat similar to that of Mr. Keenan; Board approved of Mr. Fortescue's after having objected to Mr. Keenan's; *Newell* 24732–24751.

Proposal of, unsatisfactory; would retain evils of mixed system; proposal as to establishing model schools by private persons of great importance; *Card. Cullen* 26610.

See also DENOMINATIONAL BOARDING HOUSES.

FOYLE COLLEGE, LONDONDERRY:

Originally a high-class classical school, with a commercial department recently added; eminent men educated at; subscribed to by the Irish Society; *Williamson* 20963. 20970, 20971. 21067, 21068. Its management; *ib.* 21106.

FRANCE:

System of education in, not to be taken as a model; *Bp. Keane* 15601, 15602.

Denominational schools have spread throughout the Empire; *Card. Cullen* 26630.

Higher schools in, tainted with infidelity; schoolmasters, how appointed; communal councils, priest always a member of, and has control of all matters affecting religion; he may visit schools; training schools in the hands of religious; privileges are same for Catholics and Calvinists and Lutherans; matters regarding education are not perfect, they are improving; Inspectors, how appointed; are appointed according to religion of school; schoolmasters must hold a certificate of capacity; this would not be tolerated in free countries; French system is opposed to English ideas of liberty; not desirable to introduce it; protection of minorities; so far as the system is denominational it works well; *ib.* 26658–26669.

Students must attend training schools three years before they teach; *ib.* 27048.

FRASER'S MAGAZINE:

Extract from article in, showing the necessity but present impossibility of educated Catholic laity resisting the clergy; *Whittle* 24123.

FRASER, Rev. J., M.A.:

References to report of, on systems of education in United States and Canada; *Gordon* 18886–18888; 18991–18993; 19046 *et seq.*; *Card. Cullen* 26630, 26633. 27050. 27458.

FRENCH:

Teaching of, in ordinary schools, advocated; *Hunter* 3488, 3489. 3502–3505.

Desirability of teaching classics and French in National schools; *Sheridan* 5499–5501. 5764–5772; *Berkeley* 11429–11436. 11636.

Desirability of teaching; *Matthews* 18298, 18299.

See also CLASSICS.

FRIENDS, SOCIETY OF:

School of a member of, at Bessbrook. *See* BESSBROOK SCHOOL.

The better classes, like any others, send their children to their own schools, but the poorer children attend Bessbrook school like any others; a boarding school is maintained for neglected children of former Friends, who are strictly educated in their religion; Friends who can afford it send their children to England; *Richardson* 25755–25763.

GALLAGHER, Mr. PATRICK, National school teacher, evidence of; *pages* 830-836.

GALLOWSGREEN SCHOOL, CORK:

Under the Presentation Order of Brothers; circumstances concerning; *Townsend* 17286–17288.

GALWAY:

Erasmus Smith's school in, given up on account of small attendance; *Rudkin* 13996.

GALWAY MODEL SCHOOL:

Considerable diminution in numbers of Roman Catholics at; *Keenan* 1581–1583.

Frequented by a class of pupils for whom model schools were not intended; the public money was therefore misapplied; *O'Reilly* 14987–14989.

GAYNOR, Brother PATRICK A., of the Presentation Order for the education of poor boys, evidence of; *pages* 761, 762.

GENERAL ASSEMBLY IN DUBLIN:

Resolutions of, in 1855, as to use of non-vested schools for religious worship; *Kavanagh* 10924.

GEOGRAPHY:

Taught in first class of schools; *Sheridan* 5856.

Too much attention given to details of geography, &c., in common schools; *O'Reilly* 15076.

How taught in the central training establishment; the pupils never make maps; *Rintoul* 26220–26228. 26233–26240.

GEOGRAPHY, EPITOME OF:

Alleged errors in; *Hunter* 3529; *Kavanagh* 12364–12372.

GEOLOGY:

Not taught in training establishment at Marlborough-street; *Butler* 6307–6309.

GEOLOGY AND MINERALOGY:

No collection made for teaching since Dr. Clarke's death; these subjects not now taken up; *Newell* 25296–25298.

See also EXPERIMENTAL SCIENCE.

GLASNEVIN:

The horticultural department at, is for training men as steward and gardener combined; experiments there undesirable; Glasnevin will best perform its functions by practising the proved best systems; *Baldwin* 4535–4544. 4719–4730.

The smaller farms at Glasnevin most useful for instruction; the land is very productive; the five-acre farm keeps four cows and employs as much labour as some twenty-acre farms with poor soil; *ib.* 4573-4585. 4624-4632.

Young men from Glasnevin become good stewards; *ib.* 4596, 4597. The pupils come chiefly from other agricultural schools; there are some free scholarships, filled by competitive examination; for paying pupils there is only a pass examination; the yearly fee of £8 not an obstruction; *ib.* 4598–4601. 4604.

Griffith's valuation, made about twenty years ago, of Glasnevin farm; the value of the land is £369 15*s.*; the original size has been repeatedly increased; *ib.* 4637–4648.

The physical capacity of candidates is tested for about four days; out of 878 trained, 500 are engaged in agriculture at home; of the remainder many are employed in offices in which their knowledge of agriculture is useful, or whose employments are more or less connected with agriculture; *ib.* 13150–13165.

Glasnevin is going on well, is capable of great development; teaching staff not adequate; there should be a professor of veterinary surgery; the training there should be completed by the establishment of a rearing farm, and by instruction in reclaiming land; calves and sheep now reared are so done at a loss. Admission to Glasnevin is at present obtained by competitive examination; *Baldwin* 13238-13266.

As to projected execution of gas works at model school at; *Stack* 14293–14204.

GLASNEVIN—*continued.*

As to supply of gas at, in connexion with Board of Works; *Owen* 27558–27560.

Albert institution rather successful; objectionable while on the mixed system; *Card. Cullen* 27048.

Museum at Albert training school, Glasnevin; *Sheehy* 26507.

Programme of preliminary examination for admission to the Albert Institution, Glasnevin, conducted by the District Inspectors, May 29, 1868; *App.* xii., *pages* 1300, 1301.

See also BOARD OF WORKS.

GLENMAQUIN OR GLENNAQUIN:

A Presbyterian school established at, said to be unnecessary; *M'Menamin* 22079–22084.

Letter from Rev. R. M'Morris to Rev. Dr. Wilson, dated February 22, 1869, respecting establishment of Glennaquin National school; *App.* xv., *page* 1303.

GOOD BEHAVIOUR,

Cleanliness, order, and habits of decorum in schools are of vital importance; *J. S. Porter* 18237, 18238.

GOOD SERVICE PAY:

Unjust distribution of, a complaint of the teachers of Ulster; suggestions for its extension; *Matthews* 18268. 18278. 18363–18369.

Due to all deserving teachers irrespective of other considerations; *ib.* 18439, 18440.

Every teacher faithfully discharging his duties should receive; restriction of; *Macdonough* 17736–17739.

Additional pay for long service; *Gallagher* 19316–19318.

GORDON, JOHN, esq., District Inspector under National Board, evidence of; *pages* 818–830.

GRACE, Brother JOHN AUGUSTIN, head of establishment of Christian Brothers, Richmond-street, Dublin, evidence of; *pages* 370-385; 591, 592.

"GRACE" ALLOWANCE:

Explanation of, and practice in connexion with; *Keenan* 1075–1078. 1227–1229.

GRAMMAR:

Too much attention given to details of grammar, &c., in common schools; *O'Reilly* 15076.

Imperfect knowledge of, by children in lower classes; *Sheridan* 5536, 5537.

Is unnecessary for junior children in National schools; it would be a serious thing to exclude it; the Board is responsible as to its retention or removal; *Keenan* 1285. 1290–1292. 1295. 1316.

GRATUITOUS EDUCATION:

Demoralizing effects of; *Petticrew* 16588.

See also FEES.

GRATUITIES

To teachers for instruction in extra hours; *O'Carroll* 4097.

GRAY, Sir JOHN:

His condemnation of Dr. Whately's opinions; *Kavanagh* 12090.

GUARDIANS, BOARDS OF:

Payments of, for deaf and dumb pauper children at Cabra; occasional reluctance of, to sending children there; *M'Donnell* 14220. 14269. 14273. 14334. 14349. 14354–14359.

HACKETT, Rev. JOHN WINTHROP, Secretary of Incorporated Society, evidence of; *pages* 1146–1155.

HALL, Dr.:

His connexion with the National Presbyterian school in King's Inns-street, Dublin, as to means of proselytism; *Kavanagh* 10889-10906.

HALY, BISHOP:

Remonstrance of, in 1850, against non-vested schools, as affording facilities for proselytizing; *Macdonnell* 24061, 24062.

HAMILTON, Rev. HUGH, Inspector under Church Education Society, evidence of; *pages* 322–328.

HAMMERSMITH ROMAN CATHOLIC MALE TRAINING COLLEGE:

Was established in 1852, and was put in connexion with Committee of Council at the commencement; was originally intended for a religious teaching order; the teachers now are mainly secular; number of teachers in training; length of course; income; Superior is an Oratorian priest, with a Vice-President in holy orders, a secular priest, and a number of lay teachers; *Allies* 25340–25358.

HEDGE SCHOOLS:

A considerable number, 500 or 600 at least, of what are called hedge schools, still exist in Ireland; *Macdonnell* 702–704.

Number of, diminished by the National system; *De Vere* 20285.

See also PRIVATE ADVENTURE SCHOOLS.

HENRY, Rev. Dr.:

Disagreement with his opinion as to the meaning of the Board's rule as to exclusion; *Kavanagh* 23416–23418.

As to payment of his expenses in attending the National Board; *Macdonnell* 23937–23943.

HISTORY:

Exclusion of the history of Ireland from the Board's books has not had the effect intended; it was felt as an insult to the Irish nation. If it could be written in a certain spirit, there would be less appetite for the food supplied by newspapers; *Bp. Keane* 15640, 15641.

Difficulty in teaching, in Ireland; *Matthews* 18384–18386.

Is not sufficiently taught in the schools; *J. Porter* 18648. A history of Ireland might be compiled that would be acceptable to all parties; *ib.* 18666.

An important part in the education of the young; *ib.* 18681.

Suggestions as to the teaching of; *De Vere* 20236.

A school which would not teach history is no school at all; *Allies* 25400-25405. Character of history taught in Catholic Poor School Committee's Schools; managers use any historical text-books they please; *ib.* 25428–25439.

Teaching of history involves the most important facts which concern the human race for eighteen centuries; it is impossible to exclude the grand point of contention between Catholics and Protestants; *ib.* 25617.

Irish history omitted from Board's books; knowledge of, possessed by masters very limited; *Card. Cullen* 27048.

The history used by Christian Brothers is from Fredet; *ib.* 27133.

A great advantage in teaching history is having good teachers. History must be a witness of the truth; if a man write history, he must tell the truth; *ib.* 27406–27412.

HODSON, BISHOP:

Particulars of a school about to be established in Elphin under a bequest of, for the benefit of the inhabitants generally; *Warburton* 20851–20873.

HOLIDAYS:

Are excluded in taking the average attendance at school; *Hunter* 3279-3288.

HOLLAND:

System similar to that in Ireland exists in; evils of the system; *Card. Cullen* 26630.

HOSTILE FEELINGS IN NORTH OF IRELAND:

Bitterness of, in spite of the improvements during the last fifty years; *Macdonnell* 11352.

HUNTER, WILLIAM ADAMS, Esq., one of the Chiefs of Inspection under National Board, evidence of; *pages* 143–167.

INCORPORATED SOCIETY FOR PROMOTING ENGLISH PROTESTANT SCHOOLS IN IRELAND:

1. *Constitution, Management, Funds, Objects, and Trusts.*
2. *Schools, Teachers, &c.*

1. *Constitution, Management, Funds, Objects, and Trusts:*

Its *management* is by a General Board and Executive Committee of fifteen, chosen out of the members at large; Lord Lieutenant is patron, Archbishop of Armagh vice-patron; all the Bishops, the Chief Judges, and some others are *ex-officio* members; the number of general members limited to 112, besides 25 *ex officio; Hackett* 25793–25796.

Objects of, as specified in charter; to hold a limited amount of property for the maintenance of schools, in which masters and mistresses were to teach the children of Papists and poor natives in the English tongue and fundamental principles of true religion, and in industrial occupations; *ib.* 25801–25812. 25902–25907. Trusts upon which the Society holds its property; *ib.* 25824–25827.

Originally incorporated for the children of "Popish and other poor natives of Ireland," to bring them up as members of Established Church. A change took place in 1832, in withdrawal of Government grant; Protestants now chiefly admitted; *ib.* 25845–25850.

One object of, is to promote loyalty. The obligation to Church of England teaching does not necessarily encourage disloyalty to the Queen among Roman Catholics; *ib.* 25896–25901.

As to *committees* and sub-committees, and their reports; *ib.* 25911–25915.

Are bound by charter to bring up Roman Catholics and other natives as Protestants. Catholics did come to the old charter schools; often placed there in infancy, and nurses appointed for them; but now, as Catholics do not come, Protestants are educated. No failure of trust in this; *ib.* 25970–25981. 25986, 25987.

Area of operation is restricted by want of funds; desire of Society to enlarge it; *ib.* 25982–25985.

The trusts being for the promotion of Protestantism, if Roman Catholics will not come to be so educated, the trusts are fulfilled by the education of Protestants, which view is confirmed by a Chancery decision, quoted; *ib.* 25992–25997.

The system of, does not exclude poor children; the good education given tends to draw them out of their own class of life, which is not undesirable; *ib.* 26006–26011.

Funds of, and their sources; property held by, and trusts for which held; *ib.* 25813–25827. 25902.

Special bequests to; the Pococke estate, Dean Stewart's estates, the Ranelagh estates, and the Conolly estate; *ib.* 25831–25840. 25877.

Farra Agricultural School belonging to. *See* FARRA SCHOOL.

2. *Schools, Teachers, &c.:*

Society has eight boarding institutions and thirteen day schools wholly or in part supported by it; the training institution is at Santry; *ib.* 25785–25789.

Number of children in these institutions about 1,000, 246 foundation pupils, 700 others; course of instruction given; high distinctions gained by pupils in competitive examinations; free pupils elected by competition; sound scriptural and useful English education given in day schools; *Hackett* 25793.

INCORPORATED SOCIETY—*continued.*

Admit children of various classes, and of different religions, the condition of *poor* being observed; all must be taught as members of Established Church; *Hackett* 25878. 25882.

Failure of attempts of, to teach trades and husbandry; *ib.* 25883, 25884.

Admission to schools of, by competition; and on conditions stated; *ib.* 25851–25859.

Middle-class day school of, in Aungier-street; *ib.* 25860–25864. Payments made in boarding schools of, and at Santry; *ib.* 25865–25870.

System of inspection in schools of; *ib.* 25908–25910.

Local management of schools is by catechist and local committee; catechist is generally the clergyman of the parish, who is paid; other duties performed by him; *ib.* 25916–25923. 25998, 25999.

Difficulties in the way of bringing the schools of, into connexion with National Board, having regard to the terms of charter; of three propositions for change of system, that preferred which leaves boarding schools as they are, preference being given to children from privileged parts, where the small minority cannot support a school; this can be done, and has been done, without new powers; *ib.* 25928–25933.

Girls in boarding schools of, how provided for; *ib.* 25964–25969.

Age of admission of boys and girls into foundation schools, which are very similar to English boarding schools; *ib.* 25988–25991.

Appointment, examination, and salaries of teachers of; *ib.* 25924–25927.

INDIA:

Effect of mixed education in; *Card. Cullen* 26633.

INDIFFERENTISM:

Mixed education has no effect in producing; *De Vere* 20249–20252.

Does not exist to an unusual extent; *Bp. of Ossory* 20633.

Indifference to religious doctrine and dogma a consequence of mixed education; *Toole* 21441, 21442; *M'Menamin* 21905.

INDUSTRIAL TRAINING

Recommended only to the extent of agricultural operations on a kitchen garden as illustrating literary instruction; *De Vere* 20378–20381.

INFANT SCHOOLS:

As to objectionable fittings of; *Owen* 27611–27613. 27628.

INFIDELITY:

The effect of the mixed system in India; *Card. Cullen* 26633.

Higher schools of France tainted with; *ib.* 26658.

INSPECTION:

The Head Inspector and District Inspector do not visit schools together; the Head Inspector being a check on the former; *Macdonnell* 521–526.

The Inspector is required to visit his schools unexpectedly, and it is his duty to visit the school as soon in the day after the opening as possible; *ib.* 592–596.

Every school is inspected three times a year by the District Inspector, if possible; *ib.* 115–122.

If an Inspector be bound to examine his schools three times a year he ought not to have more than seventy under his charge; *ib.* 551, 552. 565.

System of inspection is very efficient; no alteration of a fundamental character can be suggested; *Keenan* 1031.

In consequence of arrears the department was first placed under Chiefs of Inspection in 1855; *ib.* 1070–1073.

Practice of, in connexion with the "grace" allowance; *ib.* 1075–1078. 1227–1229.

INSPECTION—*continued.*

As to accounting for discrepancies between numbers on roll and numbers actually present; Inspectors examine children to test their proficiency; *Keenan* 1818–1822.

Examination of a school in Scripture history is entirely within Inspector's discretion; *ib.* 1888–1894. Inspectors are prohibited from examining in any secular subject not laid down in the programme for National schools; *ib.* 1895, 1896. They would not deliberately pass over the Scripture history lessons, but the lessons would not probably be selected; *ib.* 1951–1954.

A school before it is admitted in connexion with the Board is always inspected; *Hunter* 3684, 3685.

No objection was ever made at the inspection of Protestant schools in South Dublin district by a Roman Catholic Inspector; *O'Carroll* 4046. In visiting schools the Inspector makes his entries in the Report Book and Observation Book; the latter is not designed for the public; a stranger in asking for it would be asking a very unusual thing; *ib.* 4203–4210. It depends on the nature of the inspection whether all the children present are examined; in city schools a boy, by passing from one school to another, might be examined five or six times a year; *ib.* 4233–4241.

Examination is always made in reading, writing, and arithmetic, geography and grammar; when a school is reported to be good, it is for general proficiency in its programme; *ib.* 4242–4251. Notice is taken if children are too highly classed; *ib.* 4414.

Primary inspections are for detailed information; secondary for numerical results and general statement; *Sheridan* 4939–4943.

Of Christian Brothers' schools, by the superiors, once a year; *Grace* 9399–9403.

Inspection districts recast in 1855. Recasting of districts and equalization of Inspectors' work was done under superintendence of witness and other Head Inspectors; fair distribution of districts; *Kavanagh* 12008–12017.

Erasmus Smith's schools are inspected twice a year; every child is examined; *Rudkin* 13491. 13508. 13527. 13602. Grammar schools not under inspection; *ib.* 13982. Expenses of inspection of Erasmus Smith's schools are paid by that Board; *ib.* 13591–13593.

Of Erasmus Smith's, of National Board's, and of Church Education Society's schools could not be combined in one officer; *ib.* 13594–13598.

The system of inspection of schools must be recognized by the State; *Warren* 15359.

Of schools under witness's proposed scheme for National Education; *ib.* 15220–15222.

Interference of the State should be confined to finance, inspection, and administration; *Bp. Keane* 15859–15862.

In England is confined to secular subjects; it is not contemplated by the Catholic bishops to include inspection of religious matters in Ireland; *ib.* 15928–15930.

The State should ascertain through its Inspectors the state of proficiency in secular matters, leaving religious teaching to managers, &c., and this for all sects; *Blacker* 16428, 16429.

Scheme for a general examination of schools, similar to Duke of Newcastle's Commission in England; knowledge to be derived from it; quite within scope of present commission; *Mahony* 16967–16984. 16990, 16991.

Explanation as to witness's inspection of certain schools; *ib.* 17196 *et seq.* 17218, 17219. Further personal explanations; *ib.* 17221 *et seq.*

Of schools, generally two a day; of what the inspection consists; *ib.* 17264–17271.

Of Roman Catholic school by Protestant Inspector occasions no inconvenience; under present rules of the Board it could not; *Macdonough* 17747–17753.

In the inspection of schools, mostly the same standard is applied throughout Ireland; *ib.* 17816.

INSPECTION—*continued.*

Of schools by Government Inspectors of great value; one of the best parts of the system; assistance rendered to schools by; no objection whatever to religious denomination of Inspector; *J. S. Porter* 18076–18079.

Less inspection would be sufficient; *Matthews* 18389–18391.

No difficulty known, from inspection of Catholic school by Protestant Inspector; *O'Callaghan* 19940–19945.

The present system of, efficient and proper; *De Vere* 20215, 20216.

Of vested and non-vested schools the same; *ib.* 20306.

Advantage to schools of Government inspection; *Bp. of Ossory* 20648–20651.

Objection to denominational inspection; *ib.* 20688, 20689.

Denominational inspection not required; *Atkins* 20728–20730.

An important element in prosperity of schools; as made by National Board's inspectors really efficient; *Byrne* 21770–21776.

By local patrons sometimes of avail; *ib.* 21777–21781.

Does not always afford protection to minorities; *Kavanagh* 22523. 22529. 22561.

Should be confined entirely to secular teaching, as in England; *Forde* 22955, 22962–22965.

Preference for a denominational system of; Catholic observances likely to be misinterpreted, and the feelings of the pupils hurt by Inspectors not fully understanding them; *ib.* 23096–23101. 23106.

Denominational inspection would be retrogression, although demanded by bishops and clergy; *Whittle* 24155–24159.

As to sufficiency of notes taken during; notes must be taken of statistics; the actual state of instruction may be left to memory; misstatements in a report relating to witness; *Mahony* 25685.

Of schools of Incorporated Society; *Hackett* 25908–25910.

Under English system is altogether denominational, and in Roman Catholic schools is confined to secular subjects; *Allies* 25556–25569.

There can be no good schools without denominational inspection; inspection of reformatories is not denominational; *ib.* 25604–25614.

Undenominational inspection in England would be objected to by the Catholic bishops, and would be felt as a great grievance; "unsectarian" education and "unsectarian" inspection mean the same thing; *ib.* 25615–25620. If inspection did not include history it would not extend to the most important points taught; *ib.* 25641–25651.

Of school buildings under Board of Works by clerks of works; *Owen* 27513–27518.

Code of instructions for District and Sub-Inspectors of National schools; *App.* iv., *pages* 1281–1287.

See also ERASMUS SMITH'S SCHOOLS. MIXED SCHOOLS. NATIONAL SCHOOLS.

INSPECTION DISTRICTS:

Recast in 1855; are fairly distributed; *Kavanagh* 12008–12017. Area in square miles, and number of schools in Castlewellan and four other districts; *Hunter, page* 158.

INSPECTORS:

Inspectors have power of appeal, but it is rarely exercised; *Macdonnell* 490–492. The Inspector is bound to examine and class every child once a year, and on other occasions as far as time will permit; *ib.* 493.

Primary and secondary reports of; primary made every fourth year; secondary once or twice a year; no uniform practice as to these reports; *ib.* 494–504.

Cannot always make three inspections of all the schools in a year; if an Inspector be bound to do so, he ought not to have more than seventy under his charge; *ib.* 551, 552. 565.

INSPECTORS—*continued.*

The Inspector writes a report in the school observation book, which is open to the public, and sends a report to Dublin not intended for publicity; *Macdonnell* 572–577.

His duty is to visit a school as soon in the day after the opening as possible; *ib.* 596.

The reports of Head Inspectors published yearly are generally given without omissions, and are remarkably candid; *ib.* 636–638.

Their business is to check undue multiplication of monitors and teachers; *Keenan* 1047. 1074.

Code of instructions to Inspectors; *ib.* 1104, 1105. 1259, 1260.

Name, religious denomination, and district of each of the sixty Inspectors of National schools, from report of 1866; *ib.* 1266, 1267.

The work of, under witness's proposed plan of payment by results, will be largely increased; *ib.* 2276–2282.

Promotion by, of children at annual examinations, not desirable; *Sheridan* 4904-4909.

Inexpediency of putting the decision as to payments by parents and of teachers upon them; *Fitzgerald* 8372–8380.

The efficiency of, is shown in the schools inspected; *ib.* 8539, 8540.

No Protestant Inspector for Dublin; Belfast and Derry have Roman Catholic Inspectors; *ib.* 8539–8551.

Protestant Inspectors not objected to by Roman Catholics, but Catholics preferred; *Bp. Dorrian* 8937–8939.

Examinations of children on roll, as to ability to read, by Inspectors; poor results; *Kavanagh* 10751–10755.

Joint letter or "round robin" of five Head Inspectors to the Commissioners touching their grievances; history of; *ib.* 10769–10780; *pages* 453–457.

Letter of witness on school accounts to Resident Commissioner; *ib.* 10781, 10782.

Inspection districts recast in 1855. Predominance of Protestant Inspectors in Ulster; Inspectors do not select their own districts. Parish of Shankhill has two Inspectors. Recasting of districts and equalization of Inspectors' work was done under superintendence of witness and other Head Inspectors; distribution of districts very fair; no desire to exile Protestant Inspectors from Ulster; *ib.* 12008–12017.

Are seldom consulted about the establishment of model schools; *ib.* 12037–12040.

Of Erasmus Smith's schools; his duties and emoluments; *Thorp* 12783–12789. 12980. Does not examine the grammar schools; *ib.* 12851–12853; *Rudkin* 13982.

Secular instruction is inspected by; *M'Millen* 14521.

General Inspector of Wesleyan schools visits all schools in turn; *ib.* 14519. Reports to Conference and Committee; *ib.* 14520. Does not examine in secular subjects; *ib.* 14521. Reports of, not published; *ib.* 14522.

Desirability of Protestants inspecting Roman Catholic schools, and *vice versâ*, occasionally; *Warren* 15339, 15340.

Zealous lay Inspectors, Presbyterian or Protestant, might unpleasantly interfere in the schools of a different persuasion; Roman Catholic Inspectors have visited Protestant National schools, and Protestant Inspectors Catholic schools; *Bp. Keane* 15586–15588.

Should be denominational for denominational schools; Presbyterian and Protestant Inspectors should be appointed by the heads of their Church; *ib.* 15582–15585. 15591–15595.

Catholic bishops would be satisfied with a veto on appointment of Inspectors, as in England; *ib.* 15691. 15924–15926.

Denomination of, quite immaterial; *Blacker* 16430–16432. 16440.

INSPECTORS—*continued.*

No special difficulties encountered by; no alteration desirable in their position as regards central Board; *Mahony* 16987–16989.

Mostly apply the same standard of inspection throughout Ireland; *Macdonough* 17816.

Of great use in stimulating necessary supplies to schools; no objection whatever to religious denomination of; the number of, might be multiplied with advantage; *J. S. Porter* 18076–18079.

Testimony of, in favour of the non-denominational system; *ib.* 18166, 18167.

Often make objectionable and offensive inquiries; should be confined to secular teaching; *Forde* 22955. 22962–22965.

Inspectors' reports may be so framed as to show schools mixed which are really not so; *ib.* 23044.

Objection to the employment of Protestant Inspectors in National schools where Roman Catholic observances are allowed; *ib.* 23096–23101. 23106. 23127.

Desirability of denominational Inspectors, even for secular subjects, who must be approved of by the bishops, by whomsoever appointed; *ib.* 23225–23233.

Roman Catholic vacancies must be filled by Roman Catholics, and Protestant vacancies by Protestants; clerkships are filled by competition, an equal number of Catholics and Protestants being nominated, after examination by Civil Service Commissioners; *Macdonnell* 23675–23680.

The Commissioners reserve the right of abridging the reports of; abridgment of Mr. Keenan's report for 1858; omitted portions supplied; *Macdonnell* 23802–23807. *App. No.* 17, *page* 1311.

Important advantage in having Inspectors appointed irrespective of religion; *Whittle* 24089.

Are promoted according to religious denomination; *Newell* 24629–24632. District Inspectors are very fairly paid; amount of salary and travelling allowances; cost, as compared with England, is much less; have frequently complained of inadequate pay; complaints generally responded to. It is quite undesirable to diminish their number or raise their qualifications; present number is sufficient to secure the inspection required. Classification must be retained. Promotion of, is as quick as in other departments; should be by length of service and proficiency, not by religion; the six Head Inspectorships are the prizes; *ib.* 24966–24972. 24998–25010.

Have different standards, so far as oral examination is concerned; the training of, should be considered before that of teachers; should undergo a course of schoolmastership in model schools; many have done so; *Sheehy* 26344–26351.

In France are appointed according to the denomination of the school; *Card. Cullen* 26665.

Clergymen act as in England; *ib.* 27071.

Reasons for necessity of having denominational Inspectors; *ib.* 27415–27425.

Joint letter from the Head Inspectors to the Commissioners of National Education, dated June 6, 1856, and order of Commissioners thereupon; *Kavanagh, pages* 453–457.

As officers of the National Board. *See* NATIONAL EDUCATION, BOARD OF: 2. *Officers.*

INSPECTORS OF ROMAN CATHOLIC SCHOOLS IN ENGLAND

Are always Roman Catholics, and must be approved by the Catholic Poor School Committee; are often more strict and show less mercy than others; their functions are limited exclusively to secular education; *Toole* 21510–21516. 21523–21526. 21859–21870.

INSTITUTE OF THE BLESSED VIRGIN FOR THE EDUCATION OF YOUTH. *See* LORETTO NUNS.

INTERMEDIATE SCHOOLS:

Examination of, as a means of improving the character of education, advocated; *De Vere* 20266.

IRELAND:

Not mentioned in the geography of the Third Book, and only twice in the history; *Card. Cullen* 27048.

Great improvement in, since establishment of National Board, partially attributable to it; other causes of improvement; *Card. Cullen* 27272.

People of, now enjoy the greatest protection; people of England are most anxious to protect interests of; *ib.* 27410.

IRISH CHURCH MISSION SCHOOLS:

Proselytizing carried on in, by means of food and clothes; *O'Carroll* 4397–4400.

IRISH CHURCH MISSION SOCIETY:

Constitution and management of; number of schools, and number and attendance of scholars; *Cory* 11780–11792. 11816–11821. 11870–11879. 11889. 11944–11947. 11966–11968. Object of the Society is the dissemination of Protestant principles and the conversion of Roman Catholics; *ib.* 11851–11854.

Description of education given; training schools; *ib.* 11793–11797. Religious instruction in schools of, very prominent; *ib.* 11798. About two-fifths of the scholars are children of Roman Catholics; *ib.* 11799–11814, *and note*, 11822–11824. 11891–11898. Inspection of schools; *ib.* 11826, 11827. 11839–11841.

Number of teachers; *ib.* 11886–11890. Class from which they are drawn; *ib.* 11974–11983. They are all Irish, many Irish-speaking; *ib.* 12004–12007. Salary of teachers; *ib.* 11904–11909. 11913–11915. They are not allowed to follow other occupations; *ib.* 11921–11923. They come up for training at about seventeen, and remain for about two years; teaching is practised in the two model schools; *ib.* 11828–11838. 11865–11867.

Two-thirds of the scholars can read a little; *ib.* 11842–11845. Children come to schools as early as three or four years of age, and generally remain till fourteen or fifteen; *ib.* 11846–11850. In some schools they receive food and clothing; *ib.* 11825. 11930–11936. 11969, 11970.

The catechism is not taught to all the children, but the religious element pervades all the teaching; *ib.* 11868, 11869. 11924–11928.

Christian Knowledge Society's books are used in the schools, also some few historical books and the Bible; *ib.* 11910. 11991. 11994. School-fees are very rarely paid, even in Dublin; *ib.* 11916–11920. Results of Society's operations; *ib.* 11855–11864. 11971–11973.

Income and expenditure of the Society; *ib.* 11900–11903. 11937–11943, *and note.* Society would be glad to receive aid from the State, but has not asked for it; *ib.* 11929. 11962–11965.

Hostility to the schools is very rare; *ib.* 11992. 11995–12001.

Is proselytizing and aggressive in its character; no confidence in members of, as patrons of Catholic schools; *Card. Cullen* 27278–27283.

Statement of parentage of children attending schools of Irish Church Missions; *Cory, page* 489.

Abstract of returns for 1867-8 of number of Irish Church Mission schools, number of pupils on roll, average attendance, and number present on a given day; *ib. page* 494.

IRISH IN ENGLAND:

Opinion of, as to National schools wherein no direct religious teaching is given, has produced a great stratum of insincerity; *Toole* 21212, 21213.

IRISH LANGUAGE:

Per-centages of population speaking, in Galway, Mayo, Kerry, West Riding of Cork, Waterford, Clare, and Donegal; the total of the Irish-speaking population is 1,105,536, or 19·1 per cent. of the whole; *Keenan* 1653–1657. No provision has ever been made for teaching these people through the medium of Irish; it is next to impossible to teach the Irish-speaking population by the ordinary process; if they were taught to read Irish first they would more readily learn to read English; *ib.* 1658–1660. 1662, 1663. 1736–1738, *and note.* 2018–2021. Witness has several times drawn the attention of the Commissioners to the subject, but his project was not favourably received; *ib.* 1666–1669.

Still spoken in some schools; no books in Irish published by Board, but no rule against it; children often understand it better than English; *Sheridan* 4808–4812.

Only one parish (Rathlin) in the diocese where Irish is spoken; the National schools have been ancillary to spreading a grammatical knowledge of English, but if they had never been established all the people would speak English now; *Bp. Dorrian* 8674, 8675.

Use that might be made of, in imparting knowledge to children, and in examining their acquired knowledge of English; *Mahony* 17250–17253. The use of, much diminished among the rising generation; few localities where it is spoken exclusively; *ib.* 17254.

Not much spoken by the rising generation; *De Vere* 20155. Desirability of preserving; *ib.* 20159. 20260–20262.

Desirability of measures being taken for cultivation of; *ib.* 20260–20262.

IRISH SOCIETY OF LONDON (Society of the Governor and Assistants in London of the New Plantation of Ulster in Ireland):

All the schools of, except two, are under the National Board; *Williamson* 20958. Subscribe to more than 100 schools not on their estates; *ib.* 20972.

Subscriptions of, to schools; *ib.* 20977–20980.

Officers of the Society, their powers and election; *ib.* 20982–20998.

Property and trusts of the Society; *ib.* 20999–21014. 21082–21097.

Revenue and expenses of Society; *ib.* 21015–21025. 21033–21035.

No payment ever made by Society towards a political election; *ib.* 21026–21032.

As to grants to schools made by Society; *ib.* 21036–21052. 21058, 21059. 21110–21115. 21125–21129.

No control exercised over schools aided by Society; *ib.* 21153–21157.

As to religious instruction given by, in its schools; *ib.* 21160–21162.

Connexion of, with Foyle College and Magee Institute; *ib.* 21167–21173.

Character of schools in connexion with Society; *ib.* 21098–21108.

Indisposition of Roman Catholics to accept grants from; *ib.* 21127–21146.

General statement of moneys received on account of the Hon. Irish Society, being the produce of their estates, fisheries, &c.; together with the expenditure of the same; for year ending 4th February, 1868; *Williamson, pages* 945, 946.

IRWIN, Rev. ALEXANDER, honorary secretary of Diocesan Church Education Society of Armagh, evidence of; *pages* 386–394.

JEWS:

Duty of the State with regard to, on the question of State education; *Petticrew* 16863–16880.

An instance of a Jew attending Marlborough-street school was met in a satisfactory manner; *ib.* 16962, 16963.

Nothing in the National system to exclude them from partaking of its education; *Ross* 17531, 17532. 17539–17543.

JOINT LETTER:

Or "round robin" of five Head Inspectors to Commissioners, on their grievances; *Kavanagh* 10769–10780; *pages* 453–457.

JOINT MANAGEMENT:

Preference originally given in aid to schools under; alteration of rule respecting; schools under, give more trouble than others; fallacy of the system of; *Kavanagh* 23461–23471.

JOSEPHIANS:

Schools kept by, at Clondalkin; *O'Carroll* 4068, 4069.

JOYCE, P. W., esq., A.M., Head Master of boys' central model school, No. 1, Marlborough-street, evidence of; *pages* 272–282.

KAVANAGH, JAMES WILLIAM, Esq., Professor of the Catholic University, formerly Head Inspector under National Board, evidence of; *pages* 395–411. 424–457. 495–511. 513–538. 589–591. 836–851. 973–991. 996–999. 1028–1042.

His statement that pressure is put upon Catholic children to make them attend a Bible class at Bessbrook school contradicted; *Richardson* 23700, 23701. 23707–23738.

Statement as to unpublished portions of his report concerning Clonmel model schools, and model schools generally; *Newell* 24976–24991. 25056–25058.

Knows the statistics and general bearing of National system; was not sent to the north as agent of any Catholic bishop; *Card. Cullen* 27397–27400.

KEANE, Right Rev. Dr., Roman Catholic Bishop of Cloyne, evidence of; *pages* 670–694.

KEENAN, PATRICK JOSEPH, Esq., one of the Chiefs of Inspection under National Board, evidence of; *pages* 30–105.

Report by, in 1855, on working of the Board's rule as to religious instruction; part omitted from printed Report of Board in 1855; the suppressed portion quoted; *Kavanagh* 12160.

Report of, was suppressed, until a motion was made in Parliament for its production; *Bp. Keane* 15867.

As to abridgment of report of; omitted portions supplied; *Macdonnell* 23802–23808; *App. No.* xvii., *page* 1311.

Portions of report of, as to establishment of model schools, were expunged by the Board as involving an organic change in the system; *Newell* 24732–24751.

KELLY, JAMES, Esq., one of the Secretaries of the National Board, evidence of; *pages* 139–142.

KEOGH'S ACT:

For enabling landlords to grant sites for schools; *Bp. Dorrian* 8649–8652.

KERRY:

Great increase in number of vested schools in, since 1860; *Sheridan* 5002, 5003.

KIERAN, Dr., Catholic Primate of Ireland:

Objected to separate system, such as schools of Irish Church Missions; he has changed his opinions, and can give good reasons for the change; schools under his control are virtually denominational; *Card. Cullen* 27377–27388.

KILCORNAN NATIONAL SCHOOL:

Mixture of religions in, without ill effect; *De Vere* 20146–20151. 20237–20248.

Extract from letter of Secretary of Public Works Board, dated Dec. 10, 1868, respecting delay in preparing to erect Kilcornan National school, and in some other works in same district; *App.* xiii., *page* 1301.

KILDARE-PLACE SOCIETY:

Action of, with respect to formation of school libraries; *Keenan* 1434.

Nuns' and monks' schools aided by; *Kavanagh* 10945, 10946.

Allowed the Douay Version to be read; the Church Education Society allows only the Authorized Version; *Andrews* 14809–14813.

Reason for the attendance of Roman Catholic children at schools of; *ib.* 14814–14816.

Opposition to Kildare-place Society by Protestants as well as Roman Catholics; *Warren* 15276, 15277.

Requirements of, as to appointment of teachers, objectionable to Roman Catholics; *Andrews* 14759.

Proselytism the cause of its breaking up; *Mahony* 17146.

KILDARE-PLACE MODEL SCHOOL:

Children attending, are very much mixed; *Wilkinson* 7457.

KILDARE-PLACE TRAINING SCHOOL:

National Board cannot assist, it being carried on upon denominational principles; *Macdonnell* 23828.

KILFLYN APPLICANT CASE:

Statement of circumstances in connexion with which led to Inspector's dismissal; *Newell* 25189–25202. 26887–26983.

KILKENNY:

Not much mixed education in; *J. Porter* 18695.

Model school at, satisfactory; *ib.* 18704, 18705.

KILKENNY AGRICULTURAL SCHOOL. *See* AGRICULTURAL SCHOOLS AND MODEL FARMS.

KILLARNEY:

Schools of Presentation Order at; cost, dimensions, and accommodation of; *Gaynor* 17353–17362. 17404–17406.

Two convent National schools at; *ib.* 14707.

KING'S INNS-STREET PRESBYTERIAN SCHOOL:

Attraction at, of giving away soup as a means of proselytism; *Kavanagh* 10889.

KINSEALY NATIONAL SCHOOL:

Inefficiency of teacher of; *Sheehy* 26357, 26358.

KITCHEN GARDEN:

Desirability of, attached to residence, as a means of improving status of teachers; cooking and prevention of waste of food could be then taught; *De Vere* 20211–20214. 20375–20377. 20380–20382.

KYLE, WILLIAM COTTER, Esq., LL.D., Secretary to "Commissioners of Education in Ireland," Clare-street, Dublin, evidence of; *pages* 664–670.

LABOURERS' WAGES:

In Strabane compared with the pay of teachers; *Matthews* 18453–18455.

"LA CRÈCHE":

French system of, very beneficial; desirability of introducing it here; *Toole* 21382.

LANDLORDS:

Their duty to promote the education of their tenantry and the people about them; *De Vere* 20455–20459.

Claims by tenants for compensation for improvements; disputes but rarely arise, as the Board make the improvements where necessary; it would be desirable to have a written agreement providing for arbitration, but landlords would hardly submit; *Longfield* 24372–24380.

LARNE MODEL SCHOOL:

As to condition of offices attached to; *J. S. Porter* 18242 *et seq.*

LATIN:

Teaching of, in ordinary schools, advocated; *Hunter* 3488, 3489. 3502–3505. *See also* CLASSICS.

LAWYERS;

Preponderance of, among Roman Catholic members of National Board; *Macdonnell* 23973.

LEASES:

Form of, by parties granting sites for vested schools, as to exclusion of children from adverse religious teaching: *Kavanagh* 19458–19461.

See also SCHOOLS; 2. *Vested and non-vested.* SITES.

LECTURES:

No lectures on experimental science delivered in Marlborough-street training establishment since death of Dr. Clarke; there is no provision for instruction in physical science, except from those head masters taught by Dr. Clarke; *O'Sullivan* 7813–7820; *Sheehy* 26491–26493.

Lectures on chemistry by the late Dr. Clarke; *Newell* 25280.

Lecture by witness in favour of education; *Warburton* 20889–20891.

See also MARLBOROUGH-STREET TRAINING ESTABLISHMENT, &c.: 2. *Training Establishment.*

LEEPER, Rev. ALEXANDER, D.D., assistant secretary and chaplain of Church Education Society, and general superintendent of training and model schools, evidence of; *pages* 282–294.

LENDING LIBRARIES:

For use of those who have left school most desirable; a demand for suitable books might create a supply; *Fitzgerald* 8616–8622.

Should be established in connexion with National system for loan of books to children of fourth and fifth classes; success of, under the Christian Brothers; *De Vere* 20227–20230.

In connexion with Roman Catholic schools in Manchester; *Toole* 21818–21822.

None in Marlborough-street training institution; not necessary for the general class; a small one accessible to the special class; *Sheehy* 26286, 26287.

LETTERKENNY:

Schools and population in; *M'Menamin* 21992–22009. 22045–22050.

"LIBERA SCHOLA":

Meaning of the term; *Kyle* 15487–15490.

LIMERICK:

Sufficient school provision for Protestant minorities in the county, so far as lies within witness's knowledge; *De Vere* 20322–20339.

LIMERICK AGRICULTURAL SCHOOL. *See* AGRICULTURAL SCHOOLS AND MODEL FARMS.

LITERARY INSTRUCTION

In Christian Brothers' schools is perfection, and there is more attention paid to science than in National schools; *Bp. Keane* 15538.

See also BOOKS. NATIONAL BOARD: 4. *Books.*

LIVERPOOL ROMAN CATHOLIC FEMALE TRAINING SCHOOL:

The number in training is generally about seventy; the school is under the management of the Sisters of Notre Dame, the Poor School Committee being cognizant of all that goes on. No building grant was received, as the ladies preferred to use buildings of their own. Period of training; no difficulty in finding places for teachers; proportion of expense borne by Privy Council grant; entrance fee; *Allies* 25364–25378.

Account of income and expenditure for 1867, showing amount actually received and disbursed during the year; *ib.* 25376.

LOCAL BOARDS

Would practically be of no advantage; there would be no objection to a local committee aiding the patron in looking after the attendance, but the people themselves would rather have nothing to do with it; *Bp. Keane* 15661–15669.

As a rule do not work well in Ireland; the business would mostly fall into the hands of the parish priest; *Forde* 23203–23206.

LOCAL COMMITTEES:

Suggestion for handing over model schools to; *Bp. of Down and Connor* 19598. 19603–19605. 19660–19665.

LOCAL PATRONS

Should be done away with; *J. S. Porter* 18113. None at Dunmanway model school; *ib.* 18121.

LOCAL RATE:

Would be objectionable; Parliament, if left to pay all, will come on the absentee landlords; landlords in the case of a vested school have now to contribute a third; the people also give aid in labour and so on, but would shrink from anything like local taxation; *Bp. Keane* 15645–15650. 15653.

Desirable as a source of increase to teachers' salaries; *Macdonough* 17779–17784.

In aid of schools, something like the poor rate or county cess; the landlord to pay the larger amount; *ib.* 17889–17893. 17987.

In aid of education objected to; *Bp. of Down and Connor* 19620.

For education would make the system unpopular; the peculiar circumstances of Ireland render unadvisable any extraordinary pressure for the purpose; *De Vere* 20205–20210.

A scheme for a compulsory rate for education suggested and advocated; *Warburton* 20847–20850. 20913. 20877–20880. 20885–20888. 20902–20909. 20932–20935. 20948.

For schools, favourably considered, as being part of local government; it matters little who pays it primarily, it is sure to come out of the land or personal industry; *Forde* 22948, 22949.

Country generally ought to contribute one-third of the amount paid by the State; this could not be got except by local rate; *Newell* 24850. 24854, 24855. Local rate is very desirable; should be levied similarly to the poor rate, and collected as an addendum to the county rate, and disposed of by a local committee; *ib.* 24857–24861. 24914–24921.

Doubtful operation of; might be unequally levied; *Card. Cullen* 26618.

See also LOCAL TAXATION. RATE IN AID OF EDUCATION. RATING, UNIFORM.

LOCAL SUBSCRIPTIONS:

Regulation as to, contained in Lord Stanley's letter, never carried out, from its impracticability; *Keenan* 1159.

Original intention was to make local contributions furnish chief part of teacher's income; decrease of, latterly; ought to be largely increased; *Macdonough* 17856–17861.

Local contributions to schools, unsatisfactory; *Forde* 22947.

LOCAL TAXATION:

Desirable in aiding teachers' pay; cost of education should be defrayed by State or by local taxation; *Matthews* 18380–18383.

LOCAL VESTING:

Changes in principle of; disastrous effects of the changes; want of confidence in the Board produced by; *Kavanagh* 10812–10816. 10833, 10834.

LONDONDERRY:

Londonderry is the best county in Ireland with respect to local subscriptions; they are high, and the fees paid by pupils also high; *Keenan* 1679–1681. The London companies are bound by their charters to subscribe to the local schools; *ib.* 1682.

LONDONDERRY FREE GRAMMAR SCHOOL, OR LOUGH FOYLE COLLEGE:

Subscription to, by Irish Society, dating from 1613; *Williamson* 20978.

LONDONDERRY MODEL SCHOOL:

Good place for training teachers; few Roman Catholics at, in consequence of opposition of Catholic bishop; impropriety of wealthy pupils at; *Atkins* 20787–20794.

LONGFIELD, Right Hon. MOUNTIFORT, Member of the National Board, evidence of; *pages* 1085–1098.

LONG SERVICE PAY. *See* GOOD SERVICE PAY.

LORD LIEUTENANT:

Should not have power to change a fundamental rule, or to sanction new books, not being a permanent officer; *Wilson* 16145–16148.

Is but rarely consulted by the Board; no material advantage would arise from referring questions to the Lord Lieutenant in Council, as the Council is larger than the Board; most of the members knowing nothing about the rules; *Longfield* 24196. 24340–24346.

LORD TAUNTON'S COMMISSION:

Opinions of Commissioners under, that the religious difficulty is more apparent than real, can only apply to the various shades of Protestantism; witness denies its applicability to Roman Catholics; *Toole* 21391–21396.

LORETTO NUNS:

The Institute of the Blessed Virgin for the education of youth, commonly so called, teach in witness's schools; are not connected with the Jesuits; *Toole* 21833–21838.

At Letterkenny, want of success of; *M'Menamin* 22157–22178. 22192–22195.

LOUGH FOYLE COLLEGE. *See* LONDONDERRY FREE GRAMMAR SCHOOL.

LOUGHINISLAND:

Backwardness of the National Board in granting assistance to the school at; *Bp. Dorrian* 8790–8817.

LOYALTY:

Promotion of, one object of Incorporated Society; teaching of Church of Englandism does not necessarily encourage disloyalty among Roman Catholics; *Hackett* 25896–25901.

LURGAN:

Erasmus Smith's school at, well managed; children attend but for a short time, because of facilities for obtaining employment in the factories; *Rudkin* 14010–14015.

LURGAN, QUEEN-STREET SCHOOL (PRESBYTERIAN):

Violation of rule at, in that parents are "canvassed" to sign certificate book; Roman Catholic children present at religious instruction; school formerly a ragged school; food, &c., given to Catholics to induce them to falsify their religion; *Kavanagh* 22318–22407.

LYNCH, Rev. Mr.:

His schools at Ballymena, excellence of; circumstances attending the visit of, with witness, to Broughshane and Correen schools; *Kavanagh* 22606 *et seq.*

M'AULEY, Mr.:

Was dismissed from his office as Inspector, and his case was reconsidered by the Board; *Longfield* 24253–24263.

M'CREEDY, Mr.:

Evidence of, quoted, as to the good effect of the mixed system of education in employment of Roman Catholic teachers by Presbyterians, &c.; *Kavanagh* 12567.

His scheme for amalgamating the offices would have saved nearly half the time now occupied; other advantages attending it; was approved of by heads of departments; no valid objection ever brought against it; description of his proposed book; *Craig* 26991–27019. 27036–27043.

MACDONNELL, Right Hon. ALEXANDER, Resident Commissioner of National Board, evidence of; *pages* 1–30. 458–472. 1046–1077.

M'DONNELL, Brother P. D., Director, &c., of Deaf and Dumb Institute at Cabra, evidence of; *pages* 603–611.

MACDONOUGH, Mr. DANIEL, National school-teacher, evidence of; *pages* 777–788.

M'IVOR, Rev. Dr., Rector of Ardstraw, Tyrone, evidence of; *pages* 577–587.

M'MENAMIN, Rev. JOHN, parish priest of Stranorlar, Donegal, evidence of; *pages* 960–973.

M'MILLEN, Rev. GIBSON, Wesleyan minister, manager of National and other schools, evidence of; *pages* 614–624.

MAGEE INSTITUTE:

Subscriptions of the Irish Society towards; *Williamson* 21071–21073.

MAHONY, CORNELIUS, Esq., District Inspector of National Schools, evidence of; *pages* 741–758. 763. 1142.

MALL SCHOOL:

A large endowment connected with the Church Education Society; *Irwin* 9845–9848.

MANAGERS AND PATRONS:

Communication between managers and Board is sometimes direct, sometimes through the Inspectors; very little difficulty arises from the Inspector communicating directly with the manager; *Macdonnell* 15–18, 19. Few managers write regularly to the Board; unless for special cause they are not expected to write oftener than once a quarter; *ib.* 105–107.

Management by a committee would be preferable to that by a single person; patrons and managers are not all so attentive as they might be; *ib.* 33–36. 87–90. Roman Catholic managers not more zealous than others; *ib.* 46–48. No recognition by Board of managers *ex officio*; *ib.* 37. Board has a veto on appointment of managers; no manager has been dismissed for neglect; *ib.* 38–40.

On death or removal of a manager the Board, as a rule, recognize his successor; *ib.* 53, 54.

Manager appoints the books to be used, the Board reserving right of control; out of 6,500 schools no other books are known to be used than those of the Board; *ib.* 71–75.

The manager or patron if a clergyman cannot be a teacher in a National school, but he may have to test the education given in the schools; *ib.* 109–113.

No instance of loss arising from the transmission or appropriation of money by managers; *ib.* 161–164.

Managers are improving in their supervision of teachers; they are the medium of communication with the Board; some, but very few, managers attend the schools daily to test accuracy of returns; the manager generally protects the teacher; *Keenan* 1000–1004.

MANAGERS AND PATRONS—*continued.*

Managers of vested and non-vested schools prescribe the course of religious instruction; no instance known in vested schools of parents availing themselves of the rule allowing clergymen of their own religion to give their children religious instruction; *Keenan* 995–996. 1124–1127. 1147, 1148–1150. It is contrary to rules of Board for patrons of non-vested schools not to admit clergyman to give instruction to children of his own communion; *ib.* 1324, 1325.

The manager, but no one else, has a right to take part in the business of the school; but very few managers take part in the ordinary literary instruction; there are instances where managers spend a portion of each day in the schools; *ib.* 1388, 1389.

Certificate of, as to attendance of teacher during quarter; *ib.* 1395, 1396.

No facilities for training, in Ireland; *ib.* 1552–1558.

No compulsory arrangement can be made as to specific proportion of contribution by, for schools; *ib.* 1835–1842.

Local duties of managers as to the school; their duty towards the Board; *ib.* 1956. Clerical and other managers should receive some instruction in the *technical parts* of educational affairs; *ib.* 1957–1961.

Objection of Roman Catholic clergy to laymen acting as managers of schools; more independent action of Episcopalians and Presbyterians in this respect; *Newell* 2878–2883.

Some managers are indifferent about having trained teachers; managers vary greatly as to the interest they take in schools and in the condition of teachers; but they cannot be dispensed with; *ib.* 2865–2877. For communication with the Board managers are useful even when they do not attend much to the school; *ib.* 2981, 2982.

Since 1861, 183 members of Established Church and 41 Wesleyans have become managers of about 300 schools; *ib.* 3013.

There have been a few instances of opposition on the part of local managers to the action of the Board; *Hunter* 3185–3187.

Have an absolute right to dismiss teachers; *ib.* 3250.

In majority of cases do not give the services required of them; *ib.* 3264–3266.

Some portions of Monaghan are well superintended by managers; *ib.* 3267–3269.

It has been said some managers have expressed their determination never to carry out the new rule; if so, the salary of the teacher would be at once stopped; *ib.* 3331, 3332. Some complaints have been made; action of the Board in such cases; the rule is honestly carried out at present; *ib.* 3333–3336.

Little difference as regards supervision between schools under single patrons and those under committees; *ib.* 3348–3350.

As to the activity or otherwise of managers in supervising schools; *ib.* 3351–3355.

In many parts of Ireland the local manager is in theory a valuable connecting link between the higher classes and the parents of the school children; whenever the gentry take an interest in the educational institutions of the country the schools show the advantage of it; *ib.* 3452–3456.

Every school, except a model school, must be under a manager; there might, by possibility, be exceptions; *ib.* 3457–3460.

Are best judges of, and should look after, the moral conduct and character of a teacher; they should also look after teacher's punctuality in school and regularity in keeping accounts, and should promote economy; *ib.* 3672–3679.

Take the fees, and sometimes pay the teachers with them, sometimes lay them out on the schools; *O'Carroll* 3997–4000.

Managers pay attention to the school by deputy; the priest, the actual manager, visits it very seldom, but his curates do it for him; *O'Carroll* 4224, 4225. The manager receives the fees, and gives more or less to the teacher; *ib.* 4227.

Managers may take part in schools with regard to secular instruction, there is no rule against it; *ib.* 4231, 4232.

Managers exercise very salutary influence and supervision, and do much more than they get credit for; *Sheridan* 4917. Salutary effect of managers' frequent visits; one named has a conference of teachers every month; *ib.* 4921–4925. Correction of statements as to managers at Newcastle West, that managers' visits confer no advantage; under system of payment by results managers might be useful in examining between Inspectors' visits; *ib.* 4926–4930. 5298–5301.

It is a voluntary act to become a manager, but having done so, a man is morally bound to attend diligently to his duties; *ib.* 5222–5225.

Clergy of all denominations make the best managers; lay managers seldom do more than sign official documents; *ib.* 5604–5608. Influence of local gentry could be brought to bear without their having exclusive management. Teachers are generally better under clerical than under lay managers; *ib.* 5609, 5610.

Landlords should keep school-houses in repair, whether they are managers or not; *ib.* 5611–5613.

Duties of, described; *ib.* 5223.

Managers of all denominations observe the rule as to exclusion of adverse children during religious teaching; *ib.* 5737.

Are the persons to settle the question of payment of school fees; *Fitzgerald* 8365. Roman Catholic managers, as a rule, do not press the payment of school pence; *ib.* 8366, 8367.

Disinclination of, to make payments; *ib.* 8373–8378.

Generally consult Inspectors on appointment of masters; *ib.* 8396–8400.

As a rule do not show much activity or efficiency in the supervision of schools; *ib.* 8414–8422.

As a rule, take an interest in agricultural schools; *Baldwin* 13053.

Cannot of themselves order small repairs, they must apply to National Board, or Board of Works; *Stack* 14111–14117.

Of Wesleyan schools are mostly clerical; *M'Millen* 14537.

Clergy should be excluded from management of schools, and more local management taken into the hands of the Board; *Wilson* 16278–16280. A committee of parents would answer in some places; *ib.* 16281.

Power of, as to choice of books, and time for religious teaching; *Mahony* 17185.

Generally endeavour to get the best teacher, irrespective of class; *Macdonough* 17785–17789.

Teachers could not get on at all without; *ib.* 17887, 17888.

The only gentlemen in Ireland who take an interest in education; *ib.* 17959.

Injudicious to interfere with their present power of appointment; seldom abuse their powers; devote attention to working of schools beneficially; *ib.* 17975–17986.

Appoint teachers, and certify as to conduct, which is Board's authority for payment of salary; *ib.* 17989–17995.

The whole system of private managers and local patrons should be swept away; *J. S. Porter* 18113.

Should be strictly bound to apply the school exclusively to the object for which money was granted; *ib.* 18196.

Reluctant to agree to three months' notice to teachers; *Matthews* 18303–18307.

Patrons and managers take but little interest in the progress of their schools; *ib.* 18392, 18409–18413.

MANAGERS AND PATRONS—*continued.*

Resolution of teachers in Dublin that power of, should be curtailed; Roman Catholic teachers have since receded from that position; *Matthews* 18421–18425. 18430.

Complaint of conduct of some towards their teachers; *ib.* 18426–18430.

Laxity of, in giving religious instruction; *ib.* 18435, 18436.

Encourage payment of school fees; *Gallagher* 19176. 19257, 19258.

Do not assist the teachers by special grants; *ib.* 19255. 19271.

Suggestions as to diminishing their power of dismissal; *O'Callaghan* 19866–19874, 19925–19939, 20057–20059.

Control of, necessary to ensure moral and religious results in a school; *ib.* 19990–19992. Managers of schools in Munster are generally the Roman Catholic clergy; *ib.* 20048–20050.

In witness's district managers and teachers work well together; *ib.* 20084–20086. As a rule managers visit the schools, and notice the progress of the children; *ib.* 20105–20108.

The office of, is not a mere office of honour; if a landlord is not prepared to do the duties, he should not be appointed; *De Vere* 20442.

Privy Council look only to; managers can remove nuns, like any other teachers, at will; *Toole* 21840–21844.

In England must find funds equal to amount of grant; *ib.* 21847–21851.

Landlord to be patron and manager is not always desirable; it is an arrangement liable to abuse; *M'Menamin* 21934–21941.

Protestant managers are admitted by Roman Catholics generally with great suspicion; *ib.* 21938–21941.

At the beginning managers were compelled to contribute to the support of their schools; Board does not enforce the rule; *Newell* 24822–24825. Managers should be compelled to contribute more largely; *ib.* 24850–24854. Power of removing teachers should not be interfered with; *ib.* 24921. Very few cases where managers have removed teachers from whim or caprice; *ib.* 24922–24927.

Of Catholic schools in England appoint and remove teachers; the chief manager is usually the clergyman; *Allies* 25674–25681.

Of National schools in Ballina district take scarcely any interest in them; *O'Hara* 26834–26838. In Clonmel district the Catholic clergy attend from time to time to give religious instruction; *ib.* 26839–26841.

See also PATRONS.

MANAGERS OF PRESBYTERIAN SCHOOLS. *See* PRESBYTERIAN SCHOOLS.

MANCHESTER:

Proposition to establish Bible schools in, defeated; *Toole* 21215–21216.

Estimated Catholic population in; state of education in; *ib.* 21342–21347.

MAP OF IRELAND:

As to predominance of, in Erasmus Smith's and some other schools; *Atkins* 20710. 20714–20717. 20731–20742.

MARLBOROUGH-STREET TRAINING ESTABLISHMENT, MODEL SCHOOLS, &c.:

1. *Offices of Commissioners of National Education.*
2. *Training Establishment.*
3. *Model and Practising Schools.*

1. *Offices of Commissioners of National Education. See* NATIONAL EDUCATION, BOARD OF: 1, 2, 3, and 5.

2. *Training Establishment.*

The Training Establishment at Marlborough-street is the only one for schoolmasters and schoolmistresses in connexion with the Board; *Keenan* 1017.

Catholic students in training schools receive no religious instruction from ministers of their own creed; Protestant clergymen attend; *ib.* 1152–1158.

Subjects on which instruction is given in the science department, Marlborough-street; *Butler* 5944.

Teachers in training are divided into two classes—general and special; the latter generally receive eighteen months training. Two courses during the year, the spring course lasting about five months, the autumn course four months and a half; *ib.* 5945–5953, 6070–6072. These two terms should be equalized, but the vacations prevent it; *ib.* 5954–5957.

Some teachers have gone through a second course in the general class; *ib.* 5972, 6100–6105. The special class consists of young teachers who in passing through the general class appear likely, with some additional training, to become very efficient; *ib.* 5973, 5974. 6093–6096. Numbers in the special class are limited; *ib.* 6097–6099.

Detail of professors' duties during the week; *ib.* 5975.

Number of teachers, male and female, Catholic and Protestant, in training at the spring course, 1868; *ib.* 5976–5978. Applications for teachers have of late decreased, owing to the better training monitors receive in ordinary schools, and to the opposition of the Roman Catholic clergy to teachers trained at Marlborough-street; *ib.* 5984–5986.

Statements as to the religious instruction of teachers in training, of each denomination; *ib.* 5987–5989. 6025–6038. 6060–6066. 6232–6247.

Witness is one of the general superintendents, Dr. Sullivan the other; he takes scientific branches of instruction, Dr. Sullivan literary subjects; *ib.* 5993–5997. Both departments have principal and assistant; *ib.* 6053–6059.

Apparatus for illustration of physical science very defective; at the death of Dr. Clarke it was spread about; no steps have been taken to remedy it; there is a difficulty in getting things done; *ib.* 5998–6001. 6003–6008. 6073–6076. 6079–6090. 6227–6229. 6287–6295. Extent of mathematical instruction; *ib.* 6002.

Capabilities of training establishment to meet the demand for teachers; *ib.* 6016–6019.

Pupils of the training establishment equal in mental power to those of former times; *ib.* 6122–6125.

Cases of violation of the rules of the establishment are very few. In cases of moral delinquency there is no means of bringing the influence of ministers of religion to bear on the conduct of the pupils; for Protestant teachers there is a clergyman who might be appealed to, but for Catholics there is not; *ib.* 6173–6182. 6185–6187.

Limit of age of male and female teachers in training; *ib.* 6183, 6184.

Instruction given at, in geometry, Euclid, trigonometry, algebra; *ib.* 6203–6207. Chemistry and physiology are read, but not taught; *ib.* 6208–6220. Description of the method pursued up to classification; *ib.* 6221–6225.

All the students in training at, are kept at the public expense; *ib.* 6226. Many teachers who come up for training have been for some time in their schools; *ib.* 6230, 6231. Training is not necessary in order to acquire high qualification and high pay; *ib.* 6232, 6233.

The arrangements in the model and training schools are the same as they were before the objections made by the Roman Catholic clergy; *ib.* 6248, 6249. Seventy-six per cent. of male teachers in training for five years preceding 1863, and seventy-three per cent. of females, were Catholics; these numbers are now reduced to fifty-three and forty-eight per cent.; *ib.* 6250–6253. Increase in number

MARLBOROUGH-STREET TRAINING ESTABLISHMENT, &c. —*continued.*

2. *Training Establishment*—continued.

of Protestant teachers attributable to increase of schools under Protestant management; *Butler* 6256.

Teaching of natural philosophy and physical science at, *ib.* 6262. 6296. 6445. 6450.

Number and duration of lessons given to the male and female classes at; *ib.* 6302–6305. The arrangement that one man should be professor of a variety of subjects not bad; *ib.* 6306. Geology is not taught in the training schools; *ib.* 6307–6309.

It is not the business of the Board to train teachers in the Science and Art Department; *ib.* 6314–6316. There are no means of teaching zoology; *ib.* 6317, 6318.

Students attend the model farm at Glasnevin for instruction in agriculture; *ib.* 6319–6322.

Is not a college; it is an institution for training teachers already in possession of schools; *ib.* 6322–6324.

The professor's assistant in the Science Department teaches arithmetic and algebra; *ib.* 6325–6327.

There is not time in the course to give instruction in all the branches supposed to be taught; *ib,* 6328–6336. 6340. Any reorganization of the departments must depend entirely on what kind of work the teachers in training come up to; *ib.* 6337–6339.

Superintendence of boarding-houses put upon the professors about four or five years ago; an addition of £50 was made to their salaries for the additional duties; *ib.* 6360–6371. The female establishments are visited five or six times a year; the male establishments at Glasnevin about twice a year; *ib.* 6372, 6373. 6384. All matters of discipline, dietaries, and internal arrangements of the houses, are brought before the professors as superintendents; *ib.* 6374–6376. 6384. Alteration in the dietary of the boarding-houses, to advantage of the teachers' health; *ib.* 6377–6383.

No provision for religious superintendence of students in; *ib.* 6407. Protestants receive it direct from their own clergymen; *ib.* 6408, 6409.

Superintendence of females in the training department; *ib.* 6422–6436. Three persons in authority —superintendent, matron, and assistant to the superintendent; their functions; *ib.* 6437–6444.

Those who have been pupil-teachers before coming up for training are better scholars and more intelligent than the teachers that used to come; those who most require training—teachers of ordinary country schools—come up in very small proportions; *Joyce* 6461–6463. 6503, 6504. Monitors of National schools are not so well prepared; both pupil-teachers and monitors stand in need of instruction in the methods of teaching; *ib.* 6464–6466.

Teachers in training attend four days a week to practise teaching; *ib.* 6469, 6470.

Heads of the school have no control out of school over general conduct of masters in training; *ib.* 6485, 6486. 6499.

Managers of schools apply to the professors at, for masters; *ib.* 6525, 6526.

One of the great wants of the institution is proper superintendence of religious instruction; *ib.* 6619–6624.

Teachers efficiently trained in, and many in schools in Belfast under Catholic management; no Roman Catholic teachers now allowed to go there; any who may be there are in opposition to their pastor's wish; *Bp. Dorrian* 8688–8691.

The clergy ceased to attend the training establishment for the reason that their presence implied a security which did not exist; *ib.* 8911.

No payment has ever been made at, for religious instruction, which has hitherto been done well; *Macdonnell* 11254–11261.

The present training institution should be maintained; all model schools are training schools; *Berkeley* 11698–11702.

MARLBOROUGH-STREET TRAINING ESTABLISHMENT, &c. —*continued.*

2. *Training Establishment*—continued.

Roman Catholic male teachers are not now allowed to go to Marlborough-street for training; *Bp. Keane* 15558.

Admirably adapted to its purpose; *M'Millen* 14450.

Teachers from, well conducted and trained; *ib.* 14451.

An efficient training establishment; teachers wherever trained should be examined and classed at; *Bp. of Down and Connor* 19592–19596. 19717.

Description of witness' duties in, as professor of literary department; *Rintoul* 26013–26035. 26212–26240.

Subjects on which witness, literary professor in training department, teaches and examines; *ib.* 26018–26021. Manner in which the practice of teaching is taught; teachers' criticism of each other's performance; division into classes for the practice; *ib.* 26022–26026. "Noting the teaching;" *ib.* 26027. 26031.

Witness supervises the moral conduct of teachers in; *ib.* 26041, 26042.

Subjects taught in scientific department of; *ib.* 26043, 26044.

Examinations as to progress of students are continuous; *ib.* 26045.

One head for training and model schools would be better, if it were not for the religious question; *ib.* 26054–26056.

Practice as to punishment for misconduct; serious cases are reported to the Board; *ib.* 26057, 26058.

Time for training could not be extended with good effect; the special class, which lasts twelve months, should be abolished, and the general class divided into two divisions of six months each; *ib.* 26059–26061.

Arrangement of business during Dr. Sullivan's illness and after his death; *ib.* 26068–26078.

Special class in, of what and whom composed; its purpose; *ib.* 26079–26085.

Senior and junior classes in, not much difference between; *ib.* 26086–26095.

Numbers who have passed through the establishment from February 1834, to December 1868; *ib.* 26096–26099.

Majority of those who come to, for training, intend to be teachers; *ib.* 26100.

None should come to, for training, under eighteen or nineteen years of age; great disparity in qualifications of those who come for training; *ib.* 26103–26107.

The two professors are the responsible heads, both for the scholastic and domestic departments; the head masters of the model schools being responsible for the pupil-teachers and monitors in them; *ib.* 26124–26142.

The time-table at, is drawn up by the professors and assistants; *ib.* 26143, 26144.

As to cases of illness of professors; *ib.* 26145–26148.

Professors are higher in rank than head masters; *ib.* 26149–26151.

Accounts are checked weekly by the professors; *ib.* 26156–26159.

Lectures upon logic, although not under that formal name; *ib.* 26160–26162.

A question as to distribution of languages in examination paper for 1867 unfit for National school teachers; *ib.* 26163–26169.

The five months' training at, is of great value; *ib.* 26167.

Pupil-teachers in, from other model schools, are superior in attainments to monitors from ordinary schools; their rates of pay; are selected exclusively from the monitors; in Dublin all reside at home; *ib* 26170–26245.

Teaching of teachers in; supervision of teachers after lecture hours; *Sheehy* 26254–26272. Is better under two heads of management than one; *ib.* 26273–26275.

MARLBOROUGH-STREET TRAINING ESTABLISHMENT, &c. —*continued.*

2. *Training Establishment*—continued.

Had no lending library for the general class, the special class had access to a small one; *Sheehy* 26286. Unless the training extended over more than five months a lending library is not wanted, *ib.* 26287.

Teachers did not seem to gather much good from their residence in; *ib.* 26288–26292.

At the time of witness' connexion with, about three-fourths of the class were Roman Catholics; nearly all real teachers; as to recommendation of teachers for second training; *ib.* 26472–26477.

Teachers summoned direct to, by Inspectors, lest managers might not transmit the summons; Inspectors asked to recommend pupil-teachers to fill up vacancies in training class; *ib.* 26478–26484.

Few lectures in connexion with physical science at; a collection of philosophical instruments there; projected museum of natural objects came to nothing; professors' instructions are merely verbal; *ib.* 26491–26500.

Training colleges on English system would diminish objections to, but religion of pupils in it would still be in danger; *Card. Cullen* 26608.

Objections to the training institution; *ib.* 27048.

Catholic chaplain cannot be allowed at, while the mixed system continues; *ib.* 27442.

Attaching separate boarding houses to, would not be a solution of the question as to mixed training institutions; *ib.* 27467.

3. *Model and Practising Schools.*

The model infant school is taught by a master, but all the assistants are females; *Hunter* 3215–3218.

Number of pupils in model school No. 1; *Joyce* 6467, 6468.

The children at model school No. 1 are of a mixed class; about one-third are children of parents paying income tax; *ib.* 6477, 6478. An evening department for adults of various ages attended by about 200, was at one time given up, but reopened two years ago; *ib.* 6479–6484.

The five months' course is not sufficient for training; teachers do not receive enough instruction in school management, too much of the five months being devoted to literary instruction; they are not sufficiently exercised in the practice of teaching; *ib.* 6489–6493. 6505–6519. 6528–6530. 6542. 6636–6640. Four of the model schools are small schools, differently organized to suit the purpose of localities, but the masters do not get sufficient time in them; *ib.* 6494, 6495. Teachers receive a lecture each morning on school management from the head master; *ib.* 6496–6498.

When the four small schools were established, a memorandum was prepared as to their organization; it would be useful to have one of them conducted altogether by teachers in training; *ib.* 6531–6535. A rule that all teachers should be trained before taking charge of a school cannot be adopted; *ib.* 6536–6540.

Difficulty experienced by Roman Catholic laymen as to giving religious instruction at; *ib.* 6551–6553.

The model school is not inspected by Inspectors, being under the superintendence of the professors; who have never formally examined it since witness has been head master; *ib.* 6554–6558. There are no prizes nor any examination; the proficiency of the pupils is indicated by promotion from class to class; *ib.* 6559–6565. 6571–6577.

Cost of central model school; number of pupils on the roll, and average attendance; *ib.* 6578–6587. 6641. Pupils in this school pay quarterly in advance, and as long as they pay the names are kept on the roll; *ib.* 6587.

Every pupil in the school pays, the lowest fee being 1*s.* per quarter, the highest 5*s.*; the rates are fixed by the professors according to the circumstances of the parents; *ib.* 6591–6594.

To a certain extent the model school is a practising school; *ib.* 6595, 6596. Arrangements for practising masters in teaching; classification of children; appointment of teachers to the various classes; lectures on method by head master; *Joyce* 6609 *et seq.*

Teachers in training are not instructed in mode of teaching evening classes; *ib.* 6625, 6626. Subjects of lectures by head master to teachers in training, and method of carrying them on; *ib.* 6627–6632. No instruction is given as to moral discipline of a school; *ib.* 6634, 6635.

The duties of the head mistress correspond with those of the head master; *ib.* 6678–6680.

Opportunities of Catholic teachers attending worship; there is no supervision over them on Sundays; *ib.* 6698–6702.

Evening schools in Marlborough-street, old and new, success of, *O'Sullivan* 7821–7825.

Teaching in schools at Marlborough-street most excellent; *Kavanagh* 10089–10091.

Attendance of Roman Catholics at; *Macdonnell* 11279–11286.

Are indispensable; *Kavanagh* 19608.

Admission to, entirely under control of professors; Protestants and Catholics are boarded together and live in harmony; some externs board themselves where they please; separate boarding houses would not affect efficiency of teaching, and if conscientiously desired should be conceded; *Macdonnell* 23764–23767. 23825.

Pupil-teachers are not allowed to go to Marlborough-street until they have charge of schools; six months there quite sufficient, for those who have passed through district model schools; *Newell* 24526. Students go there for practice in school-keeping; time is not sufficient, and teaching should be more personal; *ib.* 24523–24536. 24562, 24563.

Under two professors; there should only be one head; *ib.* 24537–24542.

Are in connexion with the Science and Art Department; *ib.* 24543, 24544.

Practising schools practically exemplify what ordinary schools should try to arrive at; *ib.* 24965.

The central model school, though not formally inspected, is under constant supervision of professors; *Rintoul* 26152–26155.

The central model and practising schools of the Board are under no effective superintendence; are never inspected; examined only on one occasion, and that at witness's instance; have been visited, but a visit is not an inspection; *Sheehy* 26399–26417. No value can be set on public examinations before visitors; *ib.* 26423, 26424.

Are exceedingly expensive; *Card. Cullen* 27048.

See also TRAINING INSTITUTIONS.

MASS:

Explanation of, as a reading lesson in Burns' Standard Reading Book, objected to; it is purely controversial and proselytizing, and what may be looked for under a denominational system; *Byrne* 21743–21748. 21761, 21762.

MATHEMATICS:

Not much knowledge of, required in National schools; *Mahony* 17006.

MATTHEWS, Mr. CHARLES:

National school teacher, evidence of; *pages* 800–812.

MIDDLE CLASS SCHOOLS:

Wesleyans have six; *M'Millen* 14570.

MIGRATION:

Of children from school to school often capricious; exists chiefly in towns and populous districts; has increased because of multiplicity of schools; would be checked by a system of payment by results; *Kavanagh* 10998–11006.

Of children from school to school; *Matthews* 18556–18558.

MIGRATION—*continued.*

Of children from school to school not much in Munster; *O'Callaghan* 19891–19894. 19909–19911.

MINERALOGY AND GEOLOGY:

No collection made for teaching, since Dr. Clarke's death; not now taken up; *Newell* 25296–25298.

See also EXPERIMENTAL SCIENCE.

MINISTER OF EDUCATION. *See* SECRETARY OF STATE FOR EDUCATION.

MINISTERS OF RELIGION:

Are more difficult to deal with than any other class; *Longfield* 24235, 24236.

See also CLERGY. ROMAN CATHOLIC CLERGY.

"MISSIONERS:"

Preaching and labours of, tended to put an end to Ribbonism; *Card. Cullen* 27272–27275.

MINORITIES:

Southern district is chiefly Roman Catholic, but where there is a fair Protestant population they establish a school in connexion with Board. Very few Roman Catholics found in Protestant schools, and *vice versâ*. Where there is a rector a Protestant school is usually found, but such schools are small and consequently inefficient; *Sheridan* 5275–5283. Both religions are seldom taught in schools; an exception quoted; *ib.* 5284.

Small in South of Ireland; cannot be boarded away from home; however small, have as much right to State aid, and their wishes consulted, as the majority; *ib.* 5235–5243.

Commissioners have sometimes made grants for schools with sectarian minorities; in one instance this occasioned bad feeling; *ib.* 5617–5620.

Protestant children may occasionally be found in schools managed by Roman Catholics, where there are Protestant schools near at hand; instances of Roman Catholic minorities; *ib.* 5581–5586. One case in the South of Protestant children receiving Catholic religious instruction; *ib.* 5825. In many cases Roman Catholics have been got to receive Protestant religious instruction. This is remedied now; *ib.* 5825–5827.

Where one school only can be maintained the State should secure to all its benefits, the minority being protected in its religious feelings; *Bp. Dorrian* 9154–9159.

Board should be compelled to resort to original system of putting out minorities at the time of religious instruction; patron and teacher to exercise the authority; *Kavanagh* 11061–11065.

Protestant minorities extremely few; the whole system of State education should not be affected for such; can be protected by mixed schools, if parties agree to have them; the denominational system is the proper remedy; and as Roman Catholics have declared for it, they must be left to provide for their own minorities; *ib.* 11070, 11071. 11079. 11084, 11085.

Must be protected by a conscience clause, and by use of books of general character; *O'Reilly* 14884. 14930, 14931.

The protection of, is a question for practical action; *ib.* 14900–14902.

Without a school of their own in the district would be a rare thing in Ireland; *ib.* 14933.

Schools will be everywhere found for the minority; they do now exist in all the parishes of Ireland; *Warren* 15267–15271. Or if there be a small minority without a school it is an evil without a remedy; *ib.* 15275.

Under a denominational system there might be individual inconvenience, which must be put up with; *Bp. Keane* 15679.

There are no large Protestant minorities in the South, except in towns; *ib.* 15832.

Where they exist they should be provided for, but without sacrificing the majority; *ib.* 15835, 15836.

As far as the South is concerned there is no district in which there are not Protestant schools accessible to a Protestant minority; *ib.* 15923.

MINORITIES—*continued.*

Must be protected in their religious scruples by the State; *Wilson* 16034.

A system with a conscience clause necessary to protect; *Petticrew* 16481.

Small Roman Catholic minorities in Ballymena and Antrim districts; no materials for Catholic schools; distances children would have to go to school in places cited; *Petticrew* 16486–16504.

As to religious instruction of, in certain schools; *ib.* 16657 *et seq.*

Whether Catholic, Protestant, or Jewish, are not compelled to admit any religious education, express or implied, provided by the State; *ib.* 16867–16880.

Effectually protected by the non-vested system; *Ross* 17431–17433.

Right of, to protection; *ib.* 17502 *et seq.* 17521 *et seq.*

Cannot be taught religion in National schools, but they have a right to what the State does pay for; *ib.* 17563.

The action of the State regarding teaching religion is negative to both minorities and majorities; *ib.* 17570–17572.

The minority of even one in a million must be protected; *ib.* 17594 *et seq.*

The influence from association of a majority of school children on the minority is not so great as is supposed; *ib.* 17576.

Original rule of Board for protection of, was by positive exclusion during religious instruction; *Kavanagh* 19329, 19330.

Under a denominational system the State must wholly maintain schools for small minorities; under a secular system they would not need protection; *Bp. of Down and Connor* 19646–19649.

Sufficient school provision for Protestant minorities in county Limerick, so far as lies within witness's knowledge; *De Vere* 20322–20339.

A system of reciprocity, by which minorities might be taught by their respective pastors, would be objected to by both sides; *ib.* 20519.

If State be willing to aid Church Education schools according to results of secular education, the State must devise some means for protection of minorities in religious teaching; *Bp. of Ossory*, 20538–20548.

In some parishes the Protestant minority is very small; small schools are inefficient, but the children must be taught; instance of a clergyman acting as schoolmaster; *ib.* 20617.

Must be protected, even by the adverse teacher; *Toole* 21398. 21402. 21414–21425.

Practice in Prussia with respect to; *ib.* 21428. 21477.

In many parishes Protestant minorities so small that efficient schools could not be maintained for them; small schools exercise a deteriorating influence on both master and school; *Byrne* 21670–21674.

Deserve protection of the State, which need not be carried to the prejudice of majorities; *ib.* 21709–21712.

That system might work well if compulsory absence of, were enforced; *M'Menamin* 21901. 21981, 21982.

As to protection of, in Catholic schools with books largely permeated with Catholic doctrine; *ib.* 22096–22105.

Are not always protected by inspection; *Kavanagh*, 22523. 22529. 22561.

If they must be protected, less oppressive means might be devised; but practically there is no necessity for such provision; *Forde*, 22956–22961. 23076.

There is no part where there is not a sufficient Roman Catholic population for a school of from 35 to 40 children, so as to entitle them to State aid; in cases of a smaller number, they may be fairly left to zeal of clergy and laity; *ib.* 22995–23001.

In the cases of very small Roman Catholic minorities in Down and Antrim some means could be devised to deal with them; *ib.* 23002–23007.

Examples of small minorities in Roman Catholic

MINORITIES—*continued.*

schools. Catholic religious observances were carried on, and schools were not hindered by their presence. Experience has taught how far Board would allow such observances; *Forde* 23076–23093.

No objection to a Protestant minority in a Catholic school, with a conscience clause, but every objection to a Catholic minority in a Protestant school; *ib.* 23252.

Protestant minorities in Catholic schools under a denominational system must put up with minor religious observances, the elimination of which would never be contemplated; *ib.* 23266–23268.

Parliament will doubtless protect the minorities, but it should be by aiding schools for denominations, not by the mixed system. Catholics are the poorer part of population, and therefore deserve more consideration; *ib.* 23269–23275.

Protestant minorities in schools in south and west very small; *Macdonnell* 24033–24040.

Protection of, under denominational system; *Card. Cullen* 26588–26591, 26620.

Protection of, under Canadian system; *ib.* 26633.

Protection of, in France and Prussia. Prussian system might be extended to Ireland; *ib.* 26675, 26676.

Alterations to be made to suit small minorities; *ib.* 27164, 27165.

Scattered Protestant minorities in Clonmel district, under a denominational system, would be left unprovided for, or must attend Catholic schools; *O'Hara* 26859–26863. The obligation of beneficed clergy to provide schools would not meet the case of; there cannot be a school without scholars; the minorities in the district are very small and scattered, except in the towns; *ib.* 26871–26882.

See also DENOMINATIONAL SYSTEM. MIXED EDUCATION.

MIXED EDUCATION:

Does not prevail when there is a sufficient population for two denominational schools; *Keenan* 1559–1562.

United education is not owing to Roman Catholic clergy; *Fitzgerald* 8552–8555.

Generally in Board's reports "school" means a department, boys and girls counting separately; *ib.* 8559–8563.

As generally understood, is an impossibility; *Bp. Dorrian* 8971, 8972.

No advantage to the country; does not produce reciprocity of good feeling; *ib.* 9140, 9141. 9197, 9198.

Definition of the duty of the State in educating the poor; in all Roman Catholic families, schools, and colleges, religious teaching is incorporated with secular; *ib.* 9193–9196.

Mixed education has prevailed in the north of Ireland more than in any other part; *ib.* 9197–9201.

Good effects resulting; *ib.* 11352–11354.

Perfectly safe; *Macdonnell* 11323–11325. A large amount exists, notwithstanding the many schools with small minorities; *ib.* 11332. One good effect of, is the emulation caused by large numbers; *ib.* 11333.

Opinion, &c., of Dr. Doyle against; *Kavanagh* 12285.

A scheme for a school for each denomination where numbers sufficient, and a mixed school where numbers insufficient, with strongest safeguards against proselytism, would not be satisfactory; it is impossible to exclude religion from class-books or history; the scheme would not work; *ib.* 12291, 12292. 12305, 12306.

In a mixed community primary schools must, like churches, be open to all, without compulsion to any to enter or remain; *ib.* 12306. The English conscience clause is only a rough attempt at protection, and would not work satisfactorily in England or here; *ib.* 12307.

Is impracticable, and has wholly failed; witness's

MIXED EDUCATION—*continued.*

favourable opinion as to, in 1854, referred only to that time; its success in Clonmel school only temporary; change of opinion took place about 1856; *Kavanagh* 12575–12585.

The testimony before the House of Lords of Sir Thomas Redington, of Mr. John Carlile, Inspector, in his reports, and of pars. 58 and 59 of the Board's Report for 1846, quoted as to the true meaning of "mixed education;" the strength of the system is proved in there being no case of proselytism ever established against it; *Lord Oranmore* 13448–13459. The rules as to not making the sign of the cross, &c., should be always enforced, otherwise a school would become denominational; *ib.* 13461. 13469, 13470.

Wesleyans are in favour of; *M'Millen* 14594. All denominations should receive their secular education together; *ib.* 14595.

Wesleyans understand by mixed education schools where children of different Protestant denominations may be instructed together; *ib.* 14611.

In the south of Ireland is owing in great measure to the refusal of Protestant clergy to have anything to do with the Board; *Bp. Keane* 15757–15762.

Opposed by Church Education Society; is on the increase; *Wilson* 16030, 16031.

Wherever there is a mixed population there are, with very few exceptions, mixed schools; no instance known of religious dissensions between pupils; *Petticrew* 16471–16475. 16512.

Never objected to by parents; a system of, the only one suited to the wants of the country; evil results that follow the abandonment of it; *ib.* 16540–16549.

Numbers of different denominations receiving instruction in mixed schools previous to establishment of National system; *Mahony* 17133–17136.

State of, in Kilkenny; *J. Porter* 18695 *et seq.*

Has no effect in diminishing strength of religious convictions or in producing indifferentism; *De Vere* 20249–20252.

Advantage of, not estimated so highly as by many persons, the division for religious instruction would lead to wider division in after life; *Bp. of Ossory* 20571–20575.

Recommendation of Commissioners in 1824 as to education in common, with separate religious instruction; *ib.* 20572–20575.

Proof of benefit of; *Atkins* 20782.

In schools in Cork previous to 1830; *ib.* 20802–20812.

An indifference to religious doctrine and religious dogma a consequence of; *Toole* 21441, 21442.

Declaration by members of Church of England and Ireland in favour of united secular education; *Byrne* 21798.

Has the effect of making children indifferent in religious matters; *M'Menamin* 21905.

Fast disappearing in Ballymena; *Kavanagh* 22707.

Decided opposition to, for teachers more even than for pupils; *Forde* 22952. 22956.

Involves the omission of a great deal of more important influence; *ib.* 23056.

Does not promote social intercourse in after life; denominational education does; *ib.* 23057.

Dislike of; every religious denomination should be untrammelled by admixture with any other; *ib.* 23196, 23197.

General objections to, either as practised abroad or here; no objection to a few Protestants in a Catholic school, with a conscience clause, but every objection to a Catholic minority in a Protestant school; *ib.* 23249–23252.

The objections to, do not so much apply to the middle classes, who send their children to boarding schools, which, if not denominational, are more efficient in other respects; *ib.* 23253–23255.

Statement, showing under the heads of joint patrons, joint teachers, joint pupils, and joint reli-

MIXED EDUCATION—*continued.*

gious instruction, that the system of mixed education is a failure; *Kavanagh* 23471.

No such thing practically in Ireland, and where it exists it is an unmixed evil; *ib.* 23480.

The amount of, in Ireland has almost attained its maximum; *Macdonnell* 23719–23721.

Agreement of National Board as to principle of; opinion of Master Murphy referred to middle-class education; *ib.* 23982–23985.

If faithfully carried out is best for the harmony of the country; some Roman Catholics are in favour of it, but those who do not think for themselves, and are led by their clergy, oppose it; *Richardson* 25740–25754.

Beneficial effects of, shown in Bessbrook by the absence of police, public-house, and pawnbroker's shop; *ib.* 25744.

The only system adapted to Ireland, and this should be extended to England and Scotland; *Newell* 24595–24598. 24601.

Of what it consists as established in Ireland; if the principle were carried out there would be very little religious teaching; feeling in Ireland against; condemned by Synod of Thurles; *Card. Cullen* 26598, 26599.

Evils of, in Holland and in United States; *ib.* 26630–26633.

Exposes all to danger; *ib.* 27238.

Effect of, in India; Pius IX. regards the system as fraught with great evils; *ib.* 2633.

Archbishop Murray and other Catholic Commissioners went astray when they consented to; *ib.* 27306.

Synod of Thurles commenced united action against, as far as concerned Queen's Colleges; *ib.* 27250–27254.

The Roman Catholic middle class would prefer mixed education to a concession to the views of the bishops; *O'Hara* 26858.

See also MIXED SCHOOLS. MIXED SYSTEM.

MIXED SCHOOLS:

Number of has somewhat decreased since 1860. National education is administered so as to fairly protect Protestant minorities; *Sheridan* 5092–5100. Dislike of Protestants to mixed schools under management of Roman Catholics. Whatever united education exists is to a great extent from acceptance of principle by Roman Catholics. No other system desirable for Ireland; *ib.* 5101–5108.

Roman Catholics may be forced to attend, as in Ballymena district; *Bp. Dorrian* 9100–9106. 9258–9260.

Ordinary National schools are necessarily mixed schools, though the minority be only one; *Lord Oranmore* 13419.

Where necessary, in consequence of small numbers, the best arrangements should be made; *Bp. Keane* 15549.

Letter of Roman Catholic Bishops, of January 1866, as to; *ib.* 15550.

Difficulty in case of Protestant minority in schools under Catholic management, how to be met; *ib.* 15551, 15552.

In most localities there would be no occasion to provide for minorities; where necessary, exclude Protestants while Catholic religious instruction is being given; *ib.* 15554.

Schools in Naas not regarded as such by witness; *Macdonough* 18007–18018.

Definition of; *Warburton* 20943–20947. 20951. Denomination of patron indifferent if religion be not interfered with; *ib.* 20939–20947.

As a general rule, it is wrong for parents to send their children to; *Forde* 23060–23066.

Where necessary, teacher not to give religious instruction to children not of his faith; *Card. Cullen* 27164, 27165. 27231–27237.

See also MIXED EDUCATION. MIXED SYSTEM.

MIXED SYSTEM:

Difficulty of combining the religious bodies in Ireland; *Bp. Keane* 15792.

There is no proof that parents in Ireland object to the mixed system; *Petticrew* 16609. For any other system to be established by the State would be unfair; *ib.* 16611.

General good effects of the system as at present in practice; *ib.* 16612, *et seq.*

A mixed system of education only can modify the strife and enmity in the north of Ireland; *Petticrew* 16811–16815.

Witness would not co-operate with; *Forde* 23276.

Only to be tolerated where it cannot be avoided; Dr. Doyle was opposed to; *Card. Cullen* 27087–27100.

See also NATIONAL SYSTEM.

MODEL FARMS. *See* AGRICULTURAL SCHOOLS AND MODEL FARMS.

MODEL SCHOOLS:

Chiefs of Inspection exercise control over finances of; *Keenan* 1054.

Model schools are inspected by a district Inspector, but more frequently than an ordinary school; *ib.* 1055.

Payment of fees in; *ib.* 1056–1061. 1063, 1064. Payments to teachers, &c., 1062. 1136, 1137. 1186–1190.

Printed rules for guidance of teachers in keeping the register, which assist the Inspector; *ib.* 1082–1084.

Are open to children of every class, with special care that the poor are not excluded; *ib.* 1298, 1299. 1317. The National system when started was pronounced to be a system of non-restriction and non-compulsion, and it remains so still; *ib.* 1303, 1304.

A model school, efficiently conducted and well supplied with teachers, would interfere with the prospects of a private school; the effect of the institution of every State system of education is, to some extent, to drive out private schools; *ib.* 1305–1307. The poor derive great advantage from mixing with the children of a better rank, and the rich are equally benefited by contact with the poor; *ib.* 1318.

Model schools are not an unwholesome interference with private enterprise; the establishment of any superior school improves the taste for education, and increases the number of good schools; *ib.* 1579.

Fees of, are transmitted to Board by order of the Treasury, but it is against the wish of the Commissioners; the entire fees should go to the teachers; *Newell* 2461–2467.

Are generally established at desire of locality; number of, in Ireland; fees paid at, half of which the master receives, the remainder goes to his staff; *ib.* 2577–2583.

The poor cannot be excluded, as fifty per cent. must be admitted at 1*d.* per week; those able to pay higher fees are generally ready to pay; complaint of the instruction in, being too good; they drive inferior private schools out of the field; *ib.* 2590–2596. 2649, 2650.

A model school acts as a good middle school, bringing together children of different classes and sects, and having the advantage of pupil-teachers and paid monitors; *ib.* 2624–2627.

Great expense of new model schools; they are not likely to be established unnecessarily; *ib.* 2637–2640.

Pupils are received in, in order of application; Inspectors visit the schools weekly, examine lists, revise admissions, and see that those able pay the higher rates; *ib.* 2641–2648. Number of pupils in some cases reduced, but no model school has ever been empty; *ib.* 2675–2678.

Better calculated to produce more efficient teachers than convent schools; *Hunter* 3644–3648.

Presbyterian pupil-teachers in, have no separate religious instruction; *ib.* 3665.

MODEL SCHOOLS—*continued.*

As to payments to pupil-teachers in; one or two small losses have accrued to the Board, not to the amount of £20 in thirty years; *Claridge* 3856–3861.

Good writing master in Marlborough-street; *O'Carroll* 4180.

A first-rate English education is or may be taught in, at expense of State; *Sheridan* 5175–5179.

Only in model schools are premiums given to pupils; *ib.* 5389.

Are attended by children of all classes; small attendance at Clonmel school; in its palmy days all classes were represented in it; attendance at Cork model schol; *ib.* 5491–5496.

Have driven out many of the better class private schools; *ib.* 5533.

Poor are not excluded from, to make room for rich; the latter are sent there because of the superior education; *ib.* 5588–5591.

Report in 1860 as to favourable character of, and in defence of, quoted, and supported; the repeated denunciations of model schools have made an unfavourable impression on the public mind; *ib.* 5805–5808.

Functions of, are to afford good training for teachers, good examples for surrounding schools, and opportunities for poor talented children to rise; *ib.* 5859. Monitors should be best trained in; *ib.* 5866, 5867.

Large proportion of Catholics at Dunmanway model school; the bishop has not prohibited it; small number at Cork model school, owing to his "unceasing hostility;" both are conducted on same principles; *ib.* 5781–5797. Six teachers in Dunmanway school, of whom four are Catholics; the school was established in 1849; *ib.* 5881–5888. Superior class of children at Cork school, as others stepped in when the Catholics were prohibited; *ib.* 5889–5897.

Only train pupil-teachers; *Butler* 6077, 6078.

Four model schools in North Dublin district—West Dublin, Trim, Newry, and Bailieboro'; no boarders, except pupil-teachers; number of pupils on rolls, and average attendance in West Dublin school; cause of diminution; *Fitzgerald* 8302–8304. Decrease in Newry school from same cause; *ib.* 8305–8307. Increase at Bailieboro'; *ib.* 8308–8309.

Training of pupil-teachers at; a fixed proportion of Catholics and Protestants always kept at; *ib.* 8320–8330. 8448–8451.

Needlework unnecessarily attended to in; *ib.* 8369.

Model schools were among the first classes of schools contemplated by Commissioners; their chief object was to train future teachers, and impart a good education to children of all ranks; *ib.* 8324–8441. District model schools are not training schools in the sense in which the central institution is; *ib.* 8446.

Diminished attendance of Roman Catholics at, is not from deterioration of schools; there is always at least one teacher of each denomination; clergy of all denominations have expressed themselves satisfied; *ib.* 8455–8463. No complaint of attempt to tamper with pupils' faith or morals; *ib.* 8464, 8465.

Attendance more regular in model than in convent or ordinary schools; statistics in proof; *ib.* 8466–8470. Proficiency greater in model than in convent schools, and pupil-teachers and monitors superior; *ib.* 8471–8473. All monitors in model schools and most in convent schools are senior monitors; *ib.* 8481–8486.

Disparity in point of expense between model schools and Christian Brothers' and nuns' schools; *Bp. Dorrian* 8855–8863. 9041–9046.

The abolition of, advocated, because persons who can well afford to send their children to superior schools send them to model schools to save expense; they are not suited to poor children; also because religious teaching is entirely excluded; *ib.* 8712–8719. 8725.

The fees in Belfast model school range from 1*d.* to 5*s.*; the same class who pay 2*s.* or 5*s.* pay at the Christian Brothers' or nuns' schools only 1*d.*; *Bp. Dorrian* 9035–9045.

MODEL SCHOOLS—*continued.*

Non-success of plan of attaching ministers of different persuasions to model schools; delusive implication arising from the presence of a clergyman; *ib.* 8720–8726. 9055.

The charges in, are apportioned to the parents' ability to pay, but extra expense lies in dress and associations; comparison of the expense of education per head in a model school, in a common school, in a Christian Brothers' school, and in the nuns' schools, the education imparted in the latter two being much superior; *ib.* 8855–8863, 9046–9054.

Are dangerous to both faith and morals; *ib.* 8889–8892. 8999, 8910.

Returns quoted by examiners showing an increase of Roman Catholics in the rolls of district model schools (in 1864, 4597; in 1867, 6581), disbelieved; *ib.* 9121–9124.

Bigotry perpetuated by; *ib.* 9136.

The only want is to make the present ones good training schools; *ib.* 9223.

Teaching in, and pupil-teachers from, very superior; the few poor who attend them derive great advantage; *Kavanagh* 10081–10084. Are all that can be wished; are too expensive, especially in buildings; *ib.* 10085–10088. Teaching in, at Marlborough-street most excellent; *ib.* 10089–10091.

Are attended by better class children; a testimony of the excellence of the instruction imparted in them; *ib.* 10199–10203. 10214. Not so praiseworthy as they were; *ib.* 10219–10221.

Good character formerly of Clonmel model school; it is now a mere Protestant parish school; *ib.* 10221–10224. The poor are excluded from, by the rule as to payment; no barefooted children at; *ib.* 10229–10234.

Design of central model schools was to train teachers; *ib.* 10250–10252.

Several of the Board's are "official fictions," though costing much money; all expenses of, were defrayed by the State; *ib.* 10836–10839. Proportion expended on, and on ordinary vested schools, *ib.* 10853, 10854.

Large proportion of, in north of Ireland; *ib.* 10857–10859.

Cost of 121 model schools of all classes, number of pupils, average attendance, &c.; complete change of idea with regard to their object; their cost an indefensible squandering of public money; *ib.* 10861.

Great increase in cost, and decrease in efficiency, since 1843; many ought to be struck off, being so ill attended; *ib.* 10867–10872.

State aid should not be given to, when attended by those able to pay for their education; *ib.* 10984–10986. Poor should always be admitted to, whether able to pay or not; advantage of having a mixture of classes in, exemplified by the Clonmel school in 1850, which has long ceased to be as it was then; *ib.* 10988–10995.

Attendance of Roman Catholics at, in Marlborough-street, at Cork, and at Dunmanway; *Macdonnell* 11279–11290.

Local model schools disapproved of by Presbyterian Assembly; *Berkeley* 11574. In the interests of one denomination would not be model schools; *ib.* 11782.

Objections to convent schools becoming model schools in any shape; *ib.* 11588, 11589.

Classics should be taught in; *ib.* 11636–11640.

Not interdicted in every diocese; names of those at which attendance is prohibited by Roman Catholic bishops; others are only tacitly disapproved of; withholding of Sacraments from parents whose children attend contrary to order; *Kavanagh* 12020–12026. 12031–12040.

Effect of convent schools at Trim on model school there; *ib.* 12030.

Per-centage of Roman Catholic population in towns containing; *ib.* 12027–12032.

MODEL SCHOOLS—*continued.*

Opposition to establishment of, at Enniscorthy; *Kavanagh* 12033–12037. 12041. Attendance at; its cost; *ib.* 12043, 12044.

Minimum attendance requisite to obtain a grant; Enniscorthy and Enniskillen both deficient; *ib.* 12045.

As schools, setting aside religious objections, are excellent; Ireland wants more of them; but that is no reason for forcing such an "educational fortress" into a town in opposition to local public opinion; *ib.* 12051–12053.

Inspectors seldom consulted about establishment of; *ib.* 12037–12040.

Those existing should be handed over to the several denominational bodies; on their present status, their total failure is only a question of time; *ib.* 12053–12058.

In small towns should be good secondary schools, in smaller towns primary schools; *ib.* 12057, 12060. In other places special grants might be given to ordinary schools; *ib.* 12061.

Demand for separate, by Roman Catholic bishops, in 1826; *ib.* 12075. First active opposition of the bishops to, was Cardinal Cullen's, in 1851, in Drogheda; opposition has increased since; *ib.* 12072–12076.

Not ten per cent. of Roman Catholic population of Cork on rolls of school in Cork; *ib.* 12076.

Official connexion never contemplated between Queen's Colleges and model schools; Roman Catholic bishops always looked unfavourably upon both; attempt to establish such, at Waterford; *ib.* 12077, 12078.

Attendance at, more regular than in convent schools; reasons for this; *Fitzgerald* 12221 *et seq.*

Introduction of physical science into, by witness and Dr. Clarke; defects of the books used in, for teaching physical science; *Kavanagh* 12392–12397.

Favourably considered when they were carrying out the end for which they were designed; witness is now strongly opposed to them; *ib.* 12627–12629.

Should be extended to town populations; *ib.* 12667, 12668.

Comparative cost of a child in, and in convent schools, *ib.* 12686.

Have been condemned repeatedly by the Catholic bishops, but the penalties may not have been inflicted; *Lord Oranmore* 13409–13415.

Wesleyans do not object to pupil-teachers at, being under Roman Catholic masters; *M'Millen* 14616.

Religious instruction of pupil-teachers in, is separate; *ib.* 14638, 14639. Approval of pupil-teachers being boarded under principal teachers of; *ib.* 14642. Religious education of Wesleyan pupil-teachers is looked after by their own ministers; *ib.* 14644–14649.

Evil effects of, are, indifference to religion, Fenianism, deism, infidelity; *Andrews* 14769–14772. Steps taken by Protestant clergy to counteract these evil effects; *ib.* 14777.

Provision made in, for religious instruction, but insufficient; *ib.* 14782–14787. 14790–14800. 14837–14841.

Have, except in a few cases, proved a failure, only so far as being part of a system which is not successful; the Board has done its best in endeavouring to attract teachers; *O'Reilly* 14940–14946.

Determined opposition of Roman Catholic bishops to them; *ib.* 14947–14949.

The facility given to Roman Catholic bishops and clergy to visit, does not remove objections entertained against them; *ib.* 14957. Are not made available for all classes; *ib.* 14962, 14963.

Their doors are not practically open to Roman Catholics; *O'Reilly* 14962–14969.

Have not been largely useful in training teachers; numbers in, are yearly diminishing; will not be frequented by Roman Catholic teachers, if they are objected to by Catholic managers; as models for country schools are a mistake; are frequented by a class of pupils for whom they were not intended; the money being voted for the education of the poor is misapplied when expended on model schools; *O'Reilly* 14985–14990. 15043.

Objections to, as they at present exist; they educate a class for which they were not intended; they extinguish free schools; they cost a large amount of money; they are a step towards monopolizing all the education of the country in the hands of the State; *ib.* 15005–15007. They should be sold to denominational bodies, with an ordinary amount of State assistance; *ib.* 15008–15012.

Christian Brothers' and convent schools would furnish the best and most efficient; *ib.* 15562.

Originally an essential part of the National system; stoppage put to building of, by pressure from without; so also the plan of vested schools was departed from through state of circumstances; *Petticrew* 16893–16898.

High value of, in Belfast and Dublin; *J. S. Porter* 18059, 18060.

All religious denominations are thoroughly represented in; *ib.* 18151.

Specially valuable for showing how a good school should be conducted; as an illustration how successfully united education can be carried into practical operation; and as training places for teachers; *ib.* 18152.

Quotations from official documents showing that model schools were intended as training schools for teachers; *ib.* 18155–18160.

Large diminution in attendance of Roman Catholics at, lately; *ib.* 18161. Not upheld by the Commissioners as they ought to be; *ib.* 18162.

Teachers of ordinary schools may be advanced to, but practically the advance is never made; *Matthews* 18344–18352.

At Kilkenny satisfactory; *J. S. Porter* 18704, 18705.

Preference for keeping up model schools, as retaining in its integrity the National system; *Bp. of Down and Connor* 19591. Marlborough-street an efficient training establishment; *ib.* 19593. Teachers wherever trained should be examined and classed at Marlborough-street; *ib.* 19592. 19594. 19596. Should be kept as they are; *ib.* 19604. 19659. 19664.

Country model schools are not efficient as training schools for teachers; are not so used because of the opposition of Roman Catholic clergy; *De Vere* 20162–20164.

The exceptional use of, by middle-class children, is highly beneficial; *ib.* 20267–20272.

The objections to the present, would be obviated by the suggested non-vested training schools; *ib.* 20432–20439.

At Londonderry, a good place for training teachers; not much mixed, in consequence of opposition of Roman Catholic bishop; impropriety of wealthy pupils at; *Atkins* 20787–20794.

Roman Catholics forbidden to attend, in Derry; the secular teaching in, could not be condemned; *Williamson* 21076–21081. Subscriptions of Irish Society to; *ib.* 21110.

Omagh model school suffers from irregular attendance; children of higher classes ought to pay higher fees; their presence is a great advantage to both teachers and pupils; *Byrne* 21576–21578. 21582–21584. 21619–21621. Further as to, and a teacher in it; *ib.* 21722–21728. 21749–21753. 21759, 21760.

Particulars of time spent in visiting, at Londonderry, Newtownards, and Belfast; *Kavanagh* 22449–22469.

Objected to by Roman Catholic authorities as being more immediately under the Board, and in the hands of the State, the ecclesiastical control over them being little or none, and the principle of mixed education coming into more real operation; also on account of unfair appointments in; *Forde* 22950, 22951. 23021–23024. 23027.

MODEL SCHOOLS—*continued.*

Are more immediately connected with the Board than ordinary schools; the evils attending them being that in mixed education religion cannot be recognized; the remedy is in making them denominational; *Forde* 23008–23012. 23015.

Chaplains for, objected to, *ib.* 23053–23055.

As to the position of Catholic teachers in, under the interdiction; *ib.* 23148–23151.

The propriety of permitting attendance at, depends on the choice of two evils; the Catholic prelates supported the National system as a lesser evil, and not from any approval of it; *ib.* 23160–23162.

False position of Catholic teachers attending, after condemnation of them by bishops; *ib.* 23289–23301.

Children had better stop away from school altogether than go to model schools; *ib.* 23312. Those who go to them do so by their own choice, and in opposition to advice; *ib.* 23318.

Are tolerated only until other schools are provided; this is being done rapidly, and then proper action will be taken; *ib.* 23319.

Illustrate the National system more than any other schools; *Macdonnell* 23747.

Diminished attendance of Roman Catholics at, in consequence of opposition of their clergy; *ib.* 23747.

The object of, is to show the most perfect way of carrying on popular education in Ireland—to exhibit specimens of mixed education—and to supply trained teachers for ordinary schools; no provision is made by the Board to enable teachers of common schools to visit them; *ib.* 23751–23758. 23780, 23781.

Were a feature of the system from the first; *ib.* 23782–23786.

There is no rule as to appointing the teachers in; vacancies are filled up by the Board on recommendation of Inspector; teachers have been drawn too much from particular districts; *ib.* 23759–23763. 23787–23792.

The number of meritorious Roman Catholic teachers in, must diminish in consequence of the prohibition, although many still apply; *ib.* 23793–23795.

The appointments in, should be open to public competition, irrespective of religious denomination; *ib.* 23795, 23796.

Any cases of improper conduct in district model schools would be certain to be brought before the Board, but they very rarely occur; *ib.* 23890–23892.

Were originally intended to be of moderate size and inexpensive character; they expanded with the notion of their nature; *ib.* 23897–23899.

Original intention was to found separate middle schools in connexion with; *ib.* 23906, 23907.

Draft of proposed reply to memorial of Catholic prelates against; *ib.* 23915.

Proportion of Roman Catholic teachers in, throughout Ireland; *ib.* 24041–24049. Desirability of a Catholic teacher in each department of; *ib.* 24050–24053.

Are intended as preliminary training schools, and as specimens of first-class schools; *Newell* 24504–24510. 24640–24646. Pupil-teachers in, are selected from paid monitors; age and period of instruction; *ib.* 24511–24521. Training in district model schools is very effective; *ib.* 24524. Are connected with Science and Art Department; remuneration; *ib.* 24543. Mathematics, physical science, &c., are taught; *ib.* 24753.

Teachers of model schools are often selected from ordinary schools; appointments are given to most deserving teachers. Most of the head teachers have had five years' experience; two years would be enough after going through the special class; appointment and qualification of teachers. Many of the female teachers have been appointed at twenty-three years of age, some younger; *ib.* 24564–24583. 24862–24878.

Model schools were contemplated from the first; *ib.* 24639.

MODEL SCHOOLS—*continued.*

Training of National school teachers at Dublin or at model schools is irregular; Board does not carry out the rule requiring them to attend; present model schools should turn out 152 trained teachers a year; *Newell* 24646–24670.

Reduction of staff in model schools the same year as introduction of first-class monitors; only a few pupil-teachers were sent away in consequence of the reduction; remonstrance by Inspectors; *ib.* 24690–24728.

The schools are not overstaffed; a few complaints have been made of principal teachers leaving their work to pupil-teachers; *ib.* 24879–24891. Board always gives a month's notice, but teachers and pupil-teachers are free to leave any day they please; *ib.* 24933–24941.

Cases of female teachers living apart from their husbands; very few marriages between the teachers; surveillance over schools is very rigid; *ib.* 24947–24951.

Differences between resident officers are of rare occurrence; *ib.* 24928, 24929.

Model schools were generally approved of at first, applications for erection having been sanctioned by Roman Catholic bishops; Catholic hierarchy now actively oppose them, the laity still largely support them; Catholic children have been considerably withdrawn; schools are still largely attended by humbler classes; *ib.* 25021–25055. 25065–25069.

Distribution of apparatus and materials to model schools is now made by the Inspector; articles in the schools are in very fair condition; *ib.* 25274–25312.

Subjects taught in model schools; *ib.* 25282.

Model schools founded by private persons are of importance and utility; *Card. Cullen*, 26610.

Catholic teachers at Clonmel model school are denied all sacraments except marriage; *O'Hara* 26779, 26780. Attendance of children at, varies with times of confession; when these pass attendance increases; immorality or inferiority of character is no element in the case; the prohibition against attending is considered, even by Catholic clergymen, a grievance; *ib.* 26780–26792.

Being opposed by both Roman Catholic and Protestant bishops, have double difficulties to encounter; *ib.* 26868–26870.

Objection to; training schools attached most objectionable; teaching in literary branches deficient; period of training too short; expense of, is a waste of money; children attend who can afford to pay, they should go to boarding schools; intelligent children are taken care of, remainder neglected; *Card. Cullen* 27048, 27049. 27154, 27155.

Reasons for withdrawing Catholic children from Athy model school; *ib.* 27443–27445.

Instructions supplied by National Board as to designing and building of; no instructions given of late years as to expense of; as to the increased cost of, latterly, and defects in; *Owen* 27582–27610. 27613. 27622 *et seq.*

Model school at Enniscorthy. *See* ENNISCORTHY MODEL SCHOOL.

Model school at Belfast. *See* BELFAST MODEL SCHOOL.

Model school as a school for practice. *See* MARLBOROUGH-STREET TRAINING ESTABLISHMENT, &c. 3. *Model and Practising Schools.*

Table showing Cost of Erection and Support, and Number and Creed of Pupils, in Model schools, 1866–7; *Kavanagh, page* 500.

Return of Attendance and Creed of Pupils in Model schools, 1849 to 1867; *ib., pages* 496, 497.

Summary of Model schools, of all classes, erected and supported exclusively by State, under direction of National Board; *ib., page* 439.

Table showing total expenditure, from Parliamentary grant, on works and repairs of schools, ordinary and model, by the National Board, 1831 to 1868; *ib. pages* 436, 437.

See also TRAINING INSTITUTIONS.

MODERN LANGUAGES :

Are taught in two of the Wesleyan middle class schools; *M'Millen* 14570. *See also* FRENCH.

MODIFIED GRANTS :

Aid granted to schools by Commissioners on the principle of; *Keenan* 1511 *et seq.*

MONAGHAN DISTRICT :

Generally agricultural; in the northern part farms large and farmers comfortable; *Hunter* 3147, 3148. 3529.

MONASTIC OR RELIGIOUS VOWS :

Persons bound by, violating the laws, ought not to receive salaries from the State; cannot say if the Christian Brothers so offend; *Warren* 15296. 15316, 15317.

MONASTIC SCHOOLS :

Few in number; those in connexion with National Board are subject to the same rules, and the teachers are paid at the same rate, as in other National schools; *Macdonnell* 153–156.

System of payment is the same as in the nuns' schools, and, like the latter, they are not classified; *ib.* 240–244; *Keenan* 2041–2048.

There were eighteen monks' schools in 1836; there are now only four; at first, all monks' schools were taken into connexion in the same way as convent schools, but in 1855 a rule was passed which prevents their multiplication; *Macdonnell* 249; *Sheridan* 4848–4850. No reason for their exclusion from State aid; the rules are faithfully observed, and they are as efficient as other schools; *ib.* 5829.

Rule against admission of monastic schools was made after the retirement of Archbishop Whately; *Macdonnell* 627.

Never found anything in schools of the monks calculated to deprive them of recognition and support; *Keenan* 1832.

Very few teachers come from monks' schools; *Newell* 3014, 3015; *Butler* 5965.

There are schools at Inchicore kept by the Oblates, and at Clondalkin by monks called Josephians; two or three of the latter teach, and have got a lay classed teacher, recognized by the Board; *O'Carroll* 4065–4071. The prior is the manager, who corresponds with the Board and appoints the teacher; they have a large boarding school; in the poor school the average attendance is from 100 to 120; the Board paid two teachers; *O'Carroll* 4072–4078.

Two monastic National schools in Cork, and two in Kerry. Another was built in Cork by the monks at an enormous expense on site given by Treasury on condition of its being a National school, and when finished and conditions fulfilled, Board would not have the school; *Sheridan* 5413–5416.

Many Catholic children prefer not to attend monastic schools; cases mentioned; *ib.* 5436–5439. 5460–5469.

Instruction and education given in monastic schools superior to that in ordinary National schools; *Sheridan* 5432–5434.

Daily attendance at monastic schools; *ib.* 5835, 5836.

Aided by Kildare-place Society; grants denied to, in 1855; numbers and extent of; as well spoken of by Protestants as by Catholics; none in diocese of Tuam connected with the Board; best in Ireland for general comfort; no deficiency in, of school requisites; *Kavanagh* 10945–10959.

Were excluded by the Board as being denominational; *Longfield* 24212–24214.

Were taken into connexion with the Board at its first institution; exclusion is a disadvantage, but not persecution; *ib.* 24432–24436.

No building grants are made to monastic schools, as such; *Allies* 25331, 25332.

MONEYMORE INSTITUTE FOR THE DEAF AND DUMB :

Supported by voluntary contributions; the pupils are brought up in tenets of Established Church; *Macdonnell* 14256 *et seq.*

MONKS' SCHOOLS. *See* MONASTIC SCHOOLS.

MONKS :

In England pass examination as teachers; *Card. Cullen* 27072.

MONITORS, MONITRESSES :
MONITORIAL SYSTEM :

Are recommended by Inspector, the Board reserves power of selection, and manager has a veto; teachers wish to increase the number of; no monitor is allowed to a school which has not an average daily attendance of 35, nor to teachers below a certain grade; *Macdonnell* 287–290. 297, 298. 300.

Age and promotion of monitors; *ib.* 291, 292. Senior monitors are usually elected at fourteen; not required to be juniors first; *ib.* 293–296.

Early establishment of; present number of; great development of the system within the last ten years; *ib.* 299, 300. Selection of monitors for teachers; *ib.* 302–305.

No difficulty in procuring a supply of; the number should be larger, as they form the future teachers; restrictions on the more numerous supply; the present rate of pay too low; if the Board had means it would give higher salaries; *ib.* 314–317. 352. 412, 413.

Remain longer in the service in the South of Ireland; in the North, where there is manufacturing occupation, they are difficult to be got; the 3,000 paid monitors are scattered all over the country; many first-class monitors are in convent schools; *ib.* 348–353.

Appointment of, by the Board, and of teachers by managers, appears inconsistent, but patrons submit to the Board's selection, with reservation; *ib.* 360.

No apprehension felt about increase in number of; *ib.* 361.

Are appointed to schools in proportion to number the school is capable of holding, not according to the numbers present; overcrowding always influences the treatment of a school; *ib.* 589–591.

The monitorial system a most popular element of the organization. In some parts there is great difficulty in finding monitors, they very rarely change from school to school; *Keenan* 1390–1393; *Hunter* 3211–3214.

Were first established in 1833; are much prized; *Keenan* 1494–1496. 1507, 1508. 1648. Number of, on the occasion of the last Report was 3,030; *ib.* 1497–1499. 1500–1504. Female monitors remain pretty much to the end of their term, especially in convent schools, but male monitors as a rule leave for more remunerative employment; *ib.* 1505, 1506.

No rule exists as to the proportion of monitors in a school, except that there must be an average of at least 35 pupils; *ib.* 1521, 1522. For special reasons monitors would be allowed with less average attendance; a monitor in addition is required with an average attendance of 50; *Hunter* 3631–3636.

In convent schools, after the 35 necessary for the first monitor, there should be at least 30 pupils for every other paid monitor; *Keenan* 1523.

The Board pay the salaries of paid monitors, besides the capitation grant; *ib.* 1524, 1525.

Pupil teachers are, generally speaking, monitors of four years' standing; *ib.* 1526–1528.

Monitors in convent schools have the advantage in education over those in ordinary schools; *ib.* 1571, 1572. 1980–1983.

History of the monitorial system in connexion with the organization; substance of the report on the subject; there are four classes of monitors. "First-class monitors" are engaged for two years; for the first year they get £15, for the second £17; *ib.* 1649–1652.

There are 140 first-class monitors; rather less

MONITORS, &c.—*continued.*

than half are in ordinary schools and the remainder in convent schools; *Keenan* 1881–1883.

The difficulty in the supply of, is chiefly in town schools and in the neighbourhood of manufactures, both in model and ordinary schools; *Hunter* 3246–3248.

Large increase in monitorial staff, especially female, since 1860; first-class paid female monitors chiefly in convent National schools; *Sheridan* 5655–5671.

Advantages resulting to schools from services of monitors; *ib.* 5676–5678.

Reasons why the schools in the district have not availed themselves of monitors, and why so few become monitors; *ib.* 5679–5684. In a few schools Commissioners have sanctioned more monitors than required for teaching, in order to rear up assistants; *ib.* 5685–5687.

Five hundred and seven paid monitors in witness's district, of whom senior class females preponderate; junior monitors not now overworked; *ib.* 5081–5089. Owing to rules of Commissioners, paid monitors cannot always be employed where wanted; *ib.* 5090, 5091.

Monitorial system valuable for promoting efficiency of schools and rearing up teachers; monitors sometimes in excess in numbers; *ib.* 5110–5120. If payment by results be adopted, a plan should be devised by which the monitorial system should be left untouched; *ib.* 5124–5128.

Amount paid for monitorial teaching in convent schools considerably increased during last five or six years; large proportion of female monitors to be found in those schools; *Hunter* 3641–3642.

Principal object of Commissioners is to train young persons to become teachers, not to supplement the teaching staff; *ib.* 3643.

Superiority of, in convent schools; *Keenan* 1989–1999; *Hunter* 3649–3660; *O'Carroll* 4035–4041.

In Baggot-street school, their number and training; *ib.* 4106–4114.

Attendance of, marked on the roll; *Keenan* 1050. Rules as to attendance of teachers do not apply to; *ib.* 1079.

There are 120 female monitors to 17 male; *O'Carroll* 4418, 4419.

Ought to be best trained in model schools; some of the best come from ordinary schools, and the very best from convent schools; *Sheridan* 5866, 5867.

Early institution of, with the object of laying a foundation for an efficient staff of teachers; *O'Sullivan* 7874–7876.

Appointment of, in English and Irish systems, contrasted; *Kavanagh* 11032–11034. Irish monitorial system in direct collision with Lord Stanley's letter, especially as regards convent schools; *ib.* 11034.

Employment of, in Erasmus Smith's schools; half their salaries paid by local patrons; *Rudkin* 13608–13610.

Nothing in Canada analogous to the monitorial or pupil-teacher system; *Gordon* 19123, 19124. 19130–19133.

Monitresses in convent schools; payment made directly to; *M'Menamin* 22213–22220.

Objection to appointment and reference to amount of pay of, in convent schools, by National Board; *Kavanagh* 22232.

The institution of first-class monitors was much opposed; deputation of Presbyterians from Ireland to resist it; Sir H. Cairns in Parliament supported the opposition; after Parliament decided in its favour the opposition ceased; *Macdonnell* 23663–23665.

Pupil-teachers are selected from paid monitors; *Newell* 24511–24521. Excuse for establishing first-class monitorships; *ib.* 24671–24674. 24681–24689. Age at which senior monitors ought to be appointed; age at which eligible to take a school; *ib.* 24675–24680.

MONITORS, &c.—*continued.*

Pay of, in central training department; pupil-teachers are selected exclusively from; some from ordinary schools have been admitted into competition; *Rintoul* 26184–26194. Advantage to them of knowing something of the management of a school before final training; *ib.* 26200–26204.

Time occupied in written examination of monitresses; they are necessarily kept in attendance two days for the purpose; *Sheehy* 26513–26518.

A greater proportion of, become teachers, than of pupil-teachers; training of, superior to that of pupil-teachers; should be encouraged; *O'Hara* 26793–26798.

Return showing distribution of 143 first-class monitors, 1866; *Keenan, page* 55.

Qualifications of candidates, general conditions as to appointment, &c., of senior and junior paid monitors under National Board; *App.* I., *page* 1277.

Return, by counties, showing the amount of gratuities awarded for training monitors beyond their usual period of service, 1861 to 1866; *App.* VII., *page* 1291.

See also PUPIL-TEACHERS.

MORALITY, "MORALS:"

Duty of parents to see to; *J. S. Porter* 18239 *et seq.*

A definition may be found in the regulations of the Board, and in Lord Stanley's letter; meaning of "morals," as understood by the bishops; *Bp. Keane* 15684, 15685.

MORTARA:

Reference to the case of the boy Mortara; it was an extreme case; *Bp. Dorrian* 9264, 9265.

MULTIPLICATION OF SCHOOLS:

Complaints of, not known to be well founded; *O'Reilly* 14917–14919.

MUNSTER:

State of education in, better than in any other part of Ireland; *Sheridan* 5004, 5005.

MURPHY, MASTER:

Reference to his opinion as to mixed education; *Macdonnell* 23982–23985.

MURRAY, ARCHBISHOP:

Petition of, in 1824, perfectly conformable with attitude now assumed by Catholic bishops; but a denominational system not being attainable, they accepted the National system; *Macdonnell* 24058, 24059.

His condemnation of Dr. Whately's opinions; *Kavanagh* 12090.

In one sense approved of "Scripture Extracts;" *ib.* 12182.

MUSIC:

Music no part of the school course, but where managers introduce it, the Board favours it by awarding premiums; *Keenan* 1308–1311. 1319. No complaints in reference to; an attractive feature in convent schools; *ib.* 1309, 1310. 1313. Instrumental music only taught to the senior children in extra hours; is taught to senior pupils and monitors in female model schools; *ib.* 1313–1315. Is not efficiently taught in National schools; the Manual issued by the Board not containing a single Irish tune has led to the conclusion that Irish music was excluded, little attention has consequently been paid to its cultivation; *ib.* 2032.

Is taught in two of the Wesleyan middle-class schools; *M'Millen* 14570.

MUTILATION OF REPORTS:

Many instances of, spoken to; *Kavanagh* 10305–10309. 22282, 22283.

NAAS :

Number and character of schools in ; *Macdonough* 17966–17974. 18007–18018. In witness's school pupils provide for incidental expenses ; manager repairs ; teachers and monitors in ; could not be worked to better advantage ; *ib.* 17996–18003. He does not regard it as a mixed school ; *ib.* 18008.

NATIONAL EDUCATION, BOARD OF :

1. *Its Constitution, Machinery, Functions, &c.*
2. *Officers.*
3. *Meetings.*
4. *Books (school), their character, cost, supply, and provision.*
5. *Office books, and Printing for the Board.*
6. *Rules.*
7. *Opinions and miscellaneous.*

1. *Its Constitution, Machinery, Functions, &c.*

The machinery of the Board may be thus described : the Board (consisting of twenty members), two Secretaries, two Chiefs of Inspection, the Accountant, and the clerks ; also six Head Inspectors, sixty District Inspectors, the organizers, and a manager and teacher or teachers to every school (of which about 6,500 are in operation) ; *Macdonnell* 4, 5 ; *Keenan*, 911.

The constitution of the Board facilitates the ends of justice in dealing with matters of complaint between different grades of officers, or between managers and the Board ; *Keenan* 1255.

Outline of the system of National education ; *Macdonnell* 705. It was at first supposed that 5,000 schools would cover the country ; they now number 6,500, and more are wanted ; *ib.* 706, 707. Mode of action of the Board in providing school accommodation for the whole population of a district ; *ib.* 648–654. 681.

The Board possesses a history of every school in connexion with it, from the time of the first application for a grant ; *Keenan* 903–905.

Board's system of organization is successful ; *ib.* 1129–1132.

The Board is appointed to administer the funds granted by Parliament for the education of the poor in Ireland, and practically its operation is limited to the education of the poor, but the model schools are frequented by children of the better classes, whose parents should share the cost ; *ib.* 1773, 1780.

There are three standing Committees of the Board—the finance, the agricultural, and the sub-committee ; *Newell* 2337. Constitution, powers, and duties of those Committees ; *ib.* 2338–2353. 2393, 2394. Proceedings of Committees are laid before the Board weekly, and passed as a matter of course, except in special cases ; *ib.* 2354–2358. 2573, 2574. Minutes of proceedings taken, but no record of discussions ; any protest would be recorded, and objections of absent members read, and entered on minutes ; *ib.* 2359–2364. 2402, 2403.

Practice of proceedings at meetings of the Board ; *ib.* 2385–2391, 2392. 2395–2399.

Resolutions of Board never interfered with by Government ; *ib.* 2368, 2372. Reconsideration of questions very seldom necessary ; *ib.* 2369–2371. No proposed alteration of rules on any important question is ever brought on without previous notice ; *ib.* 2373, 2376. 2378–2380. 2392.

Board has occasionally deferred to the wishes of the Government ; and in one case reversed a decision, in another altered an important rule, at their instance ; *ib.* 2480–2489.

Alterations in rules are not specially notified ; circulars would be issued to managers of schools if any important changes are made, but the general public would not be informed ; *ib.* 2490–2495.

Reports of the Board are chiefly statistical ; witness does not draw up report, but is responsible for its contents ; *ib.* 2496–2501. Commissioners are responsible for annual report ; *ib.* 2514, 2515.

One half of the Commissioners, Secretaries, Chiefs

NATIONAL EDUCATION, BOARD OF—*continued.*

1. *Its Constitution, Machinery, Functions, &c.*—continued.

of Inspection, and Inspectors are Protestants, the other half Roman Catholics ; *Newell* 2543–2550. Office clerks are of any denomination ; from four to ten are nominated by the Commissioners to supply a vacancy, and are sent to the Civil Service Commissioners for examination ; four generally compete for an inspectorship ; Commissioners generally nominate those of their own persuasion ; *ib.* 2551–2560.

Attendance at the Board is very fluctuating ; important questions will bring a large attendance ; three form a quorum, but two can confirm minutes ; *ib.* 2561–2570. Many members find it difficult to attend from the nature of their callings ; *ib.* 2597–2600. Serious routine business is discharged by Resident Commissioner, assisted by the Secretaries, ordinary routine business by the latter ; doubtful cases are taken to the Board ; *ib.* 2477–2479. 2571, 2572.

Estimates of the year's expenditure approved by the Lord Lieutenant are prepared and sent to the Treasury through his Excellency ; *ib.* 2288–2301. 2541, 2542. If Treasury disapprove, they communicate with the Commissioners ; no other control than Board of Audit and Treasury when estimates are passed ; *ib.* 2302–2304.

Estimates are made out with tolerable accuracy as far as possible ; on the item of teachers' salaries there may be an excess ; *Kelly* 3061. An abstract is sent at the end of each year to the Audit Office ; *ib.* 3062–3069.

Appeal against decision of Secretary, Chief of Inspection, or Resident Commissioner, can always be made to the Board ; *Newell* 2472–2476.

As to power of Secretary in ordering office books and forms for use of the office ; *ib.* 2704–2717.

Appointments in the office of late years have been, and in future will be, according to merit and length of service combined ; *ib.* 2719–2729.

The present division of labour in the different departments is necessary, except the correspondence, which should be confined to one department ; *ib.* 2730–2732.

A proposed plan of the late secretary, Mr. M'Creedy, to consolidate management of accounts, inspection, books, &c., witness deems impracticable, but is not thoroughly conversant with the plan ; *ib.* 2732–2738.

Explanation of the manner in which the Board affords combined literary and moral and separate religious instruction ; it "affords" facilities for separate religious instruction, but does not pay for it ; *ib.* 2502–2513. 2967–2970. If objections now entertained by some to National Board were removed, perhaps 100,000 more children might be added, which would bring the number on the rolls to over a million ; *ib.* 2936–2939.

No communications have passed from the Executive Government to the Board showing a desire to use the Board for political purposes ; *Kelly* 3094, 3095.

No modifications of the National Board of Education would satisfy the Roman Catholic hierarchy that did not afford ample security for the education of Catholic children in a Catholic spirit ; *Bp. Dorrian* 8934–8936.

The constitution of a National Board of Education is of little importance if it had unobjectionable rules to guide it ; if the Board be a permanent paid Board, appointed by the Crown, the Crown must act on the advice of the bishops so far as respects Roman Catholics ; a removable Board would be merely a political Board ; the members need not be Roman Catholics, so that they have the confidence of the Catholic bishops ; *ib.* 8879–8888. A Board appointed with the confidence of the bishops, serving gratuitously, would give most satisfaction ; *ib.* 9202, 9203.

Increase in numbers of ; reasons for such increase ;

NATIONAL EDUCATION, BOARD OF—*continued.*

1. *Its Constitution, Machinery, Functions, &c.* —continued.

Macdonnell 11095–11102. Equality in numbers of Protestants and Catholics necessary to the working of the system; *ib.* 11105–11107. 11110–11114. 11141. A smaller Board not desirable; a Board of three—a Catholic, a Presbyterian, and an Episcopalian—would be fatal to the system; *ib.* 11139–11142.

The present decidedly desirable; *ib.* 11115–11117.

If the present system is to be maintained by Government, there must be a paid Commissioner and paid officers under him; *ib.* 11143–11147. The present Board represents the interests of every part of the public; *ib.* 11148–11150.

The majority of the people would prefer the present system; if a denominational one be established, it must be administered by a paid Board; *ib.* 11143–11147.

The division into Protestants and Roman Catholics does not interfere with promotion; two secretaries necessary; *ib.* 11195–11204.

Requires modification; smaller Board more efficient; paid Commission preferable to present one; members need not represent their church although of high position in it, as required by Lord Stanley's letter; Roman Catholic members have the confidence of members of other churches; *Berkeley* 11374–11377. 11409, 11410–11428. 11466, 11467–11479. 11641–11646. 11480–11482.

The Catholic members of, never acted in concert, probably owing to their being lawyers; Catholic objections to the appointments to chief administrative offices; *Kavanagh* 12360–12363.

A large representative Board expedient at first, but for the future a small paid Board would be preferable; *Lord Oranmore* 13473–13486.

Three paid Commissioners preferable to present Board; *M'Millen* 14454. Administration of National system is in the hands of the Resident Commissioner; *ib.* 14584.

If the Board were constituted of three paid Commissioners, they should be chosen irrespectively of religion from the most competent; *ib.* 14684, 14685. If the Board is denominational, Wesleyans should have a representative; *ib.* 14688.

No change in its constitution desired; confidence is placed in its impartiality; *O'Reilly* 14896, 14897.

Defective constitution of National Board; should contain some bishops and fewer politicians; suggestion of judges as members, with reasons for proposing them, contemplated rather as referees in difficult matters; *Warren* 15209–15219.

Present constitution preferable to that of three paid Commissioners as proposed; advantages of present and disadvantages of proposed constitution stated; *O'Reilly* 15057–15063.

Number of Commissioners decidedly too large; a paid body of two or three, directly responsible, preferable; denominational men cannot forget their creed when questions of creed arise; the present Commissioners spend the public money as they think fit; *Wilson* 16130–16134. 16144–16146.

A small Board of three paid Commissioners preferable to the present; to have administrative power only; present Board has too much discretionary power; *Petticrew* 16596–16606.

Was at first an experiment, but the time has come to make it more mainly executive; the alterations in its rules were not made solely to suit the Presbyterians as such; *ib.* 16795–16797.

Present, not approved of; the principle of having representatives of different religious bodies injurious; a small paid administrative Board—even if all Catholics—preferable, and would be more popular; *Ross* 17450, 17451. 17457–17461.

Disapproval of present; too many members; four or at most five sufficient; to devote all their time, and be well paid; *J. S. Porter* 18122–18125. The half-and-half religious denominations of, objectionable; asperities and self contradictions attending its present constitution; *J. S. Porter* 18126–18147. 18177–18179. 18183–18186. Suggested Board should be administrative, with its powers fixed by Act of Parliament, and non-sectarian; objectionable character of present Board; *ib.* 18148–18150. 18181.

Change in, desirable in any case; should be purely administrative; *Bp. of Down and Connor* 19614–19616. 19714.

The present, preferred; a small paid Board would not have the confidence the present Board possesses; *De Vere* 20472–20475.

Board should be lessened in numbers, with more fixity, and more determinate form; *Atkins* 20749, 20750.

Preference of a small Board, purely administrative, purely secular, and governed by settled rules, religion being altogether excluded from school teaching supported by the State; religion of members of no consequence; it would soon become acceptable to the people; *Tobias* 22755–22764. 22808–22822.

The theoretical religious representative character of, is a failure; *ib.* 22808–22812.

Originally a smaller Board, according to Lord Stanley's intention; the increase in numbers of late, like many of its other changes, has been for the worse; *ib.* 22870–22878.

The consultative and representative element in, was and is absolutely necessary; the number at first seven, now twenty, was increased to afford sufficient numbers for committees; *Macdonnell* 23572–23579. 23590. Number of members should not be reduced; *ib.* 23581, 23582.

Practically the committees are composed of Resident Commissioner and officers in Dublin; *ib.* 23591, 23592.

By having representative Commissioners the true feelings and interests of all sections can be known; *ib.* 23593.

A second paid Commissioner, a Roman Catholic, very desirable, and a third, a Presbyterian, if Treasury and people agree to it, which they would not do; Protestant and Catholic members act harmoniously; even with three paid Commissioners the present Board would be indispensable; *ib.* 23617–23628.

There might be a second paid Commissioner, and the number of Commissioners might be increased to twenty-two; *ib.* 23672–23674.

Two Protestant ecclesiastics on Board at present; the last Roman Catholic ecclesiastic was Dean Meyler, since whose death no other has been appointed, through unwillingness of Catholic clergy; desirability of having such on the Board; *ib.* 23732–23739.

Little danger of the management of, falling into the hands of a clique; *ib.* 23809–23811.

Its present constitution does not carry out the plan of Lord Stanley's letter; there is now no eminent dignitary of the Church of England, and no Roman Catholic ecclesiastic; *ib.* 23924–23928. 23976–23979. Presbyterian clergymen on the Board; *ib.* 23929–23947.

Finance Committee, explanation as to; *ib.* 23948–23951. 23956.

Sub-committee transacts all business of a routine nature; *ib.* 23952–23961.

Constitution of the Board at the time of recasting rules in 1854; preponderance of Roman Catholic lawyers on; reasons; *ib.* 23969–23973.

Appointment of Commissioners rests wholly with the Executive Government; *ib.* 23974.

Representative character of, necessary at the commencement; this should be continued; the equality of numbers of two great divisions of religion has been satisfactory out of doors; numbers of, advantageous; *Longfield* 24180–24185.

Business administered by; a single head or a

NATIONAL EDUCATION, BOARD OF—*continued.*

1. *Its Constitution, Machinery, Functions, &c.* —continued.

Board like the present the best; a second paid Commissioner would not improve the office; dual secretaries are required by the feeling of the country; *Longfield* 24186–24190.

Advantages of a representative Board; *ib.* 24272–24275. 24278.

There is no danger of a system of mutual concession in a large Board; in the Poor Law Board there is danger of it; the National Board do not rescind their decisions in obedience to a popular cry; *ib.* 24279–24287.

The Board being large, and unpaid, it is necessary to retain the Resident Commissioner as a connecting link between the Commissioners and their officers; *ib.* 24288.

Small paid body of Commissioners not desirable; *ib.* 24264.

Under the present system all the business is transacted by Resident Commissioner, the two Secretaries, and the two Chiefs of Inspection; these are responsible to the Board, and the Board to the public; the Commissioners are less in the hands of their officers than most Boards; *ib.* 24265–24269.

When the number of Commissioners was smaller the pressure brought to bear was greater; the larger the number the more the wants and feelings of the people are heard; *Newell* 24621–24623.

Constitution of, better than that of Poor Law Board; working might be improved; two paid Secretaries would conduct matters better than paid Commissioner; leading rules should be confirmed by Parliament; attendance of Commissioners; *Card. Cullen* 26592–26597. 26622–26629.

Explanation as to certain returns made by the Board; *Newell* 25070–25108.

Mr. M'Creedy's scheme for amalgamating the offices would have saved nearly half the time now taken up; other advantages depending upon it; was approved by heads of departments; no valid objection ever heard against it; *Craig* 26991–27019. Description of Mr. M'Creedy's proposed book; *ib.* 27036–27043. Unhealthy condition of premises; *ib.* 27021–27035.

2. *Officers.*

Resident Commissioner.—Great deal of the business of the office is administered by; Board has the power of over-ruling his decisions; *Longfield* 24186.

Resident Commissioner sits on every committee and attends every meeting of the Board; committees, and of whom they consist; through the Resident Commissioner the officers learn the feelings and opinions of the Board; *ib.* 24289–24298.

Resident Commissioner gives satisfaction, but is overworked; two paid Commissioners would combine all the advantages of a small paid Board; *ib.* 24330–24334.

The Resident Commissioner is superior in rank to all the other members of the Board except three; he signs the minutes as the organ of the Board; *ib.* 24443–24447.

Receives the same salary as assistant secretaries to the English Education Department; *Newell* 24992–24995.

See Evidence of Right Hon. ALEX. MACDONNELL, Resident Commissioner.

Chiefs of Inspection.—The Chiefs of Inspection reside in Dublin, but are expected to examine some schools in order to keep themselves acquainted with the state of education; *Macdonnell* 484.

Communications from Chiefs of Inspection must proceed through the Board's secretaries to the persons addressed; *ib.* 489.

Give the necessary directions grounded on Inspectors' reports; *ib.* 543, 544.

Examine the weekly "journal" of the Inspectors; their work is of very varied and extensive character; *Keenan* 788–805. 887, 888. Are directly responsible to the Secretaries as well as to the Board; *Keenan* 806, 807. Are heads of the Statistical Department; *ib.* 969–971.

NATIONAL EDUCATION, BOARD OF—*continued.*

2. *Officers*—continued.

Outline of relations between, and Head Inspectors; *ib.* 843.

Principal duties of Chiefs of Inspection described and commented on; *Newell* 2427–2448.

Duties of Chiefs of Inspection; they have to deal with all reports and letters from the District and Head Inspectors, and all letters from managers of schools; the duties of the two chiefs are fairly divided; no arrears of business now in the department; *Hunter* 3165–3170. 3557–3562.

About 600 reports and 150 letters on the average come weekly before the Chiefs of Inspection; *ib.* 3397–3399. How these are disposed of; *ib.* 3400, 3401.

Witness, as Chief of Inspection, visited in one month 101 schools; had no occasion to find fault with the character of the schools as represented by District Inspectors; *ib.* 3689–3693.

Overlook all below them; *ib.* 3740.

Routine business is done by; *Longfield* 24221.

Chiefs of Inspection are necessary to read over and make a *précis* of the numerous reports, and call the attention of the Board to material points; *ib.* 24421, 24422.

Look over reports in cases of application for aid to see that the conditions are complied with; *Newell* 25109. 25120.

Secretaries.—Reason for having two Secretaries is to give confidence to the various religious bodies; *Newell* 2305. 2468–2471.

Description of the duties of the Secretaries, with particulars relating to their attendance at the Board; *ib.* 2306–2321. 2365–2367. 2525–2529. 2601–2604. 2819–2830. 2836–2838. Matters not settled by secretary or Resident Commissioner are brought before the Board; notice is given to members of all matters coming before them; *ib.* 2329–2336. Means taken to prevent the work of the office getting into arrear; curtailment and simplification of some of the office work; *ib.* 2611–2614.

The system of two Secretaries is not inconvenient; one Secretary would require an assistant; *Kelly* 3056, 3057. 3084. Both are present at the preparation of the annual estimate sent to the Treasury; *ib.* 3058. 3085. Division of duties a matter of arrangement; Mr. Kelly attends chiefly to correspondence and the committees; Dr. Newell more particularly to the inspection department and to the Board meetings; *ib.* 3040–3042. 3082. Description of the management of the correspondence; protests are sometimes recorded on the minutes; a statement of occasions on which protests were made in cases of division of opinion of the Board supplied; *ib.* 3043–3052. 3083. 3092, 3093.

Secretary can refuse to sign, so preventing the action suggested taking place; *Hunter* 3402.

Routine business is transacted by the Secretaries; *Longfield* 24221.

One would do the work as well as two, but to get the confidence of the public it is necessary to have two; *ib.* 24335–24339.

Secretary has no power to fine or dismiss clerks; all cases come before the Commissioners, who inflict the punishment; no difference is made whether Catholics or Protestants; *Newell* 25121–25146. 25153–25163. 25203–25207. No objection has been made that the Secretaries misdescribe subjects in the programme; the description of joint letter of Head Inspectors was imperfect; *ib.* 25169–25188.

Secretary draws up programme for examination of teachers, after consultation with other officers; *ib.* 25262, 25263.

Present Secretary has never been accused of partiality to clerks on ground of their religion; *ib.* 26984, 26985.

NATIONAL EDUCATION, BOARD OF—*continued.*

2. *Officers*—continued.

Accountant.—Description of general nature of the arrangements of account and book keeping in the National Board; memorandum put in, giving a short history of the financial department of the National Board of Education, from its commencement in 1831 to the present time; *Claridge* 3750–3759. 3939.

The staff in the accountant's department consists of a book-keeper and seven clerks, a pay clerk, and a clerk whose business is confined to registering orders for books in the cash office. All orders for payments, after passing through the department, go to the Resident Commissioner; so that no money is paid on account of the Board without formal cognizance; *ib.* 3760–3762.

The expenditure in coin at the office is paid by witness, who is the cashier, although officially called accountant; since Mr. Kelly's appointment as financial secretary, the accountant's business has been done partly by him, partly by witness, and partly by the chiefs of inspection, all sitting in committee; *ib.* 3768–3771.

Mr. Kelly was made financial secretary by special order of the Board, which clearly defined his duties and the subjects of his cognizance; *ib.* 3782–3786. 3969.

There has never been a cashier distinct and separate; all money payments have been made by witness or the pay clerk; his accounts as cashier are balanced daily with the book-keeper; *ib.* 3772–3776. 3779–3781. 3787–3794.

Cheques are drawn in the book-keeper's office, initialed by him, signed by witness, and afterwards by the Resident Commissioner; every cheque requires these signatures; a registry of cheques is carefully kept; *ib.* 3800–3806. Practice with regard to the cheques; *ib.* 3807–3810.

A credit is opened to the Inspector in the local bank for total amount due to model school; the correct amount only is remitted; no money is left in the Inspector's hands; *ib.* 3932, 3933. The Inspectors receive the school-fees and remit them once a month; *ib.* 3934.

Inspectors' salaries are paid by bank post bills sent through the post; *ib.* 3935. So far as the accountant is concerned one document signed by the teacher is sufficient for the payment of his salary; *ib.* 3936–3938.

The proposition to pay salaries monthly instead of quarterly would be objected to; necessary alterations in details; the advance of the quarter's salaries to managers for them to dispense monthly would not be acceptable to the Audit Office; *ib.* 3929–3931. 3940, 3941. 3956, 3957.

The proposition that Head Inspectors should dispose of lump sums would not answer; the present system of checks and counter-checks is quite sufficient; *ib.* 3948–3952.

There have been several commissions of inquiry into the management of the office: Mr. Dean Wilson, first, in 1838; Mr. Bromley in 1849, with a view of checking the whole system, who reported in 1850; and the next was composed of Lord Monck, Mr. Stephenson, and Mr. Seaton of the Treasury. After that in 1866, Mr. Vine and Mr. Mills came and examined the accounts, reporting that there was nothing to be desired in regard to accuracy and the mode of keeping the books; *ib.* 3958–3969.

The accountant's office could not be amalgamated with others; *Newell* 2732–2738; *Hunter* 3378, 3379.

The only money payment by the Board is for the teacher's salary, and is sent by post office order if possible; *Macdonnell* 192–194.

Head Inspectors.—The duties of the six Head Inspectors consist in inspecting schools, holding inquiries and examinations, classifying teachers, and reporting on the work of the district Inspectors, &c.;

NATIONAL EDUCATION, BOARD OF—*continued.*

2. *Officers*—continued.

Macdonnell 469. Each Head Inspector sends up a weekly report; he examines on an average 300 schools in the year; *ib.* 471–475.

Have a great deal of office work; Inspectors' reports come directly to the office; Head Inspectors are informed of anything of importance through the office; *ib.* 476–481. Part of the duty of, to examine minutely into school accounts; *ib.* 482, 483.

Head Inspectors report weekly; *ib.* 512. Ordinarily in making investigations they act independent of district Inspectors; *ib.* 522–524. They and district Inspectors work harmoniously together; *ib.* 545, 546.

Duties of; *Keenan* 844, 845. 855.

Must concur in all cases of promotion of teachers, but need not in cases of depression; *ib.* 850. 854, 855. 857. 865.

Duties of, are of very onerous character; *ib.* 855. As to review of judgment of, passed upon a school; *ib.* 858–862.

Each is the immediate superior to the district Inspector, and is responsible for the inspection of the ten districts under his charge; *ib.* 912–914.

Inspection of schools by, is mainly to ascertain how the district Inspector has done his duty; *ib.* 950.

Head Inspectors make confidential reports to Chiefs of Inspection, concerning district Inspectors; little use is made of them, but it is important they should be furnished; *Hunter* 3542–3544.

Head Inspector's duty is to visit the schools and see how district Inspector performs his duty, and to assist in the examination and classification of the teachers; *ib.* 3688.

Head Inspectors draw up examination papers; same questions used in the different districts. Chiefs of Inspection seldom make any corrections in them; *Sheridan;* 4781–4785.

A Head Inspector should fully visit 200, and incidentally visit 200 more, every year. Incidental visits of Head Inspector not so valuable as those of district Inspector; *ib.* 4933–4938.

Authority of, over district Inspectors not well defined; *Newell* 2449–2453.

Make annual reports, which are sometimes published; they are revised by Chiefs of Inspection; *ib.* 2454–2460. 2658

Inspectors.—There are 60 Inspectors, 6 Head Inspectors, and 2 Chiefs of Inspection; division of Ireland into districts, and their apportionment among the Inspectors; the Chiefs are appointed by the Board, Head Inspectors are selected from Inspectors; undergo an examination on appointment, but none on promotion; *Macdonnell,* 431–444. 470. They learn the details of their duties after appointment; *ib.* 445–447. 533, 534.

Half are Protestants, half Roman Catholics, except in the third class, in which are six Roman Catholics to four Protestants; *ib.* 713, 714.

Nine Inspectors in all since 1839 have been dismissed for neglect of duty or improper conduct; one was afterwards restored; *ib.* 462–465. 541, 542.

The number of, not sufficient; the question of increase rests with the Board, who would have to consult the Treasury; *ib.* 515–517. Are important officers, as only through them the knowledge of things can be obtained; they should be increased in number to 93; *ib.* 600–606. Pay of the third class not sufficient for them to live upon respectably; *ib.* 607, 608.

As to filling up vacancies, and as to candidates for the office; no condition is imposed after passing examination but that of good character; *ib.* 449–461. No complaints as to the mode by which candidates for inspectorships come before the Board; *ib.* 533, 534.

Any Inspector can disapprove of his predecessor's plans; *ib.* 585.

NATIONAL EDUCATION, BOARD OF—*continued.*

2. *Officers*—continued.

About 600 reports are received from District Inspectors weekly; Head Inspectors report weekly; annual reports are also made; *Macdonnell* 518–520. Their reports bear favourable testimony to their diligence and labours; paucity of Inspectors; *ib.* 535–540. Directions are given by the Chiefs of Inspection grounded on Inspectors' reports; *ib.* 543, 544.

Head and District Inspectors work harmoniously together; *ib.* 545, 546. The constant communication of Head Inspector with District Inspectors conducive to a uniform standard of school examination; *ib.* 582.

A weekly "journal" is furnished by the Inspectors to the Chiefs of Inspection; *Keenan* 772.

Inspectors are directly responsible to the Board; supervision of, by the Office and Head Inspectors; *ib.* 819–824. Inspectors, as a body, are punctual and diligent; they receive their instructions direct from the Secretaries, or on local matters from the Head Inspectors; *ib.* 1191–1197.

Arrangement of the sixty school districts; *ib.* 836–842. Outline of relations between Chiefs of Inspection and Head Inspectors; *ib.* 843.

Three reports on a school are made by Inspectors every year; these enable Chiefs of Inspection to judge of fairness of Inspectors' decisions; *ib.* 863, 864. Inspectors' reports are minuted for the information of Chief of Inspection; *ib.* 885.

District Inspectors generally receive their instructions directly from the office; *ib.* 915, 916.

Are appointed by public competition on nominations made by the Commissioners; *ib.* 951–953. Roman Catholics compete for Catholic vacancies, and Protestants for Protestant vacancies; *ib.* 954–958.

Salaries of Inspectors; *ib.* 955.

Are in the first instance appointed to the third class; seniority generally determines promotion; *ib.* 956. Number in each class; they are located in their districts by Chiefs of Inspection; *ib.* 957–959. Travelling and other allowances; 960. 1109–1115.

Code of instructions to Inspectors; *ib.* 1104–1108. 1259–1265.

List showing the present distribution of Inspectors in school districts according to religious denomination; *ib.* 1266, 1267. Some Presbyterian Inspectors have been in Roman Catholic districts; *ib.* 1326–1328, 1353, 1354. Inspectors are not sent to districts by promotion; *ib.* 1348.

Protestant Inspectors should be placed over Catholic districts, and Catholic Inspectors in Protestant districts; *ib.* 1268, 1269.

Inspectors, whether Protestant or Catholic, generally have given satisfaction; *ib.* 1330. Imperfect representation of Catholic Inspectors in northern districts; *ib.* 1331–1337.

The efficiency or otherwise of an Inspector has a marked effect upon a district; *Newell* 2413–2415. Their duties are laborious, and require special aptness and ability. Teachers make good Inspectors; *ib.* 2416–2419. 2426.

As a body, are more efficient now than formerly; *ib.* 2423–2425. In promotion, denominational principle not so strictly observed as formerly; promotion should be wholly by merit and seniority; *ib.* 2664–2672.

Duties of Head Inspectors and District Inspectors, and their relative position to each other in respect of their duties; the subordination of District Inspectors to Head Inspectors not well defined; *ib.* 2449–2453.

Some Inspectors have been previously teachers of National schools; no essential difference in their mode of doing business. The limitation as to age at appointment might be altered with advantage; the present minimum of twenty-three prevents many from competing for Inspectorships; *Hunter* 3226–3233.

NATIONAL EDUCATION, BOARD OF—*continued.*

2. *Officers*—continued.

Are not unduly looked after by Head Inspectors and Secretaries; the forms they have to fill up are too numerous, there might be a reform in that respect; *Hunter* 3427–3436.

So long as an equal number of Roman Catholic and Protestant Inspectors is considered necessary, it would be difficult to alter the existing arrangement as to promotion. Efficiency is the chief guide, the religious element is no difficulty, but the numbers in each class being limited, a junior of one or other denomination may get promotion in advance; *ib.* 3547–3553. In nominating candidates for inspectorships, religious profession is still regarded by the Board; *ib.* 3661, 3662.

Have power of appeal from the judgment of Head Inspector or Chief of Inspection, but it is seldom exercised; *ib.* 3556.

No distinction is made in the religion of an Inspector employed in certain districts, or for certain classes of schools; there are Protestant Inspectors in the south and west, and Roman Catholic Inspectors in the north of Ireland; the indiscriminate inspection works satisfactorily; *ib.* 3716–3721.

No inconvenience has arisen from an Inspector being placed in a district with which he is connected; it is preferable not to have them so placed. As a rule, Inspectors are changed in their districts about every five years; *ib.* 3722–3725.

District Inspectors are under Head Inspectors, who are under Chiefs of Inspection; Inspectors send their returns and reports to the office. Chief of Inspection or Head Inspector may direct District Inspectors as to the arrangement of their visits; *O'Carroll* 4190–4200.

Inspectors suggest what is necessary as to repairs of school-houses, &c.; full statements made in all cases; *ib.* 4201–4202. 4211–4213.

No inconvenience has arisen from an Inspector being of a different religion from the schools he inspected; some wish that convent schools should have Catholic Inspectors; *ib.* 4047–4049.

Inspectors cannot of themselves depress masters; *ib.* 4123, 4124.

They keep books of the districts, which are to be shown to Head Inspector; *ib.* 4125–4127.

District Inspectors have not an unnecessary amount of writing to do; their chief writing is the reports they prepare; *Sheridan* 4944–4948.

Inspectors have never refused to carry out instructions; they have protested against a rule; Commissioners leave them full liberty to represent inexpediency of carrying out a rule, and are always ready to listen to their representations; *ib.* 5373–5380.

The great majority of present Inspectors are well able to estimate teachers' qualifications; *ib.* 5381–5383.

An efficient Inspector should examine 10,000 children a year; *ib.* 5851.

Inspectors' inquiries are not ordinarily public; *ib.* 5488–5490.

See also INSPECTORS.

Generally.—Its Secretaries are good officers; two are necessary; *Macdonnell* 11195–11204.

Officers are in no difficulty unless they break the rules of the Board; *Longfield* 24299–24301.

A great many Commissioners are acquainted with the system; Resident Commissioner most so *ib.*; 24237–24239.

Clerks are not generally appointed irrespective of religion; *ib.* 24191–24193.

Clerks do not fine teachers, they simply note their antecedents on the reports; *Newell* 25109–25118.

Officers do not conduct serious business without official correspondence; *ib.* 25147–25152.

3. *Meetings.*

Are weekly or fortnightly, as the case may be;

3. *Meetings*—continued.

Macdonnell 11103, 11104. Less discussion and more unanimity when the Board was less in number than now; *ib.* 11110. Less business, and less debating, now than twenty years ago; *ib.* 11119.

Practically consist of six or eight members; matters of importance bring together larger attendances; *ib.* 11133–11138.

No chairman at; occasion for casting vote has never arisen; practical advantage of having equal numbers of both parties on; *ib.* 11188–11194.

Meet now in winter once a week, in summer twice a month; no inconvenience from either arrangement; there would be no objection to have fortnightly meetings as a rule; great advantage of having fresh minds brought to bear on questions; *ib.* 23583–23589.

No chairman at meetings of Board; *ib.* 23690–23692.

Meetings of, less frequently than once a week would do; under present system there is no fear of the business falling into the hands of a few; *Longfield* 24208–24211.

4. *Books (School), their Character, Cost, Supply, and Provision.*

A portion only of the free stock required by schools supplied by the Board; localities must purchase a requisite proportion; teachers generally purchase the quantity required, getting a per-centage as a stimulus towards supplying a sufficiency; *Macdonnell*, 135–143. No complaints against teachers forcing sales; remarkable amount of honesty on their part in that respect; *ib.* 205–208; *Hunter* 3192. Books must be sold to children at the usual price; *ib.* 223, 224. In most parts children are well supplied with books at their own expense; *Keenan* 1756, 1757.

Free grants are made at time of taking on new schools; grants at reduced prices made whenever manager applies; no free grants are made after the first, except in certain cases; it is part of the Inspector's duty to see that the schools are properly supplied with books; *Macdonnell* 141; *Keenan* 1088–1095.

The plan by which teachers sell books to the children is not satisfactory; it has been in operation about four years; *Keenan* 1199–1210, 1213–1216. The allowance is 20 per cent.; it should be abolished; teachers should not be allowed to make a profit on the sale of books; *ib.* 1253. 1355–1360. 1446–1450. The system gives an interest to the teachers to sell; they should only be allowed to sell as agents of the Board; *ib.* 1555–1558. Amount of discount to teacher on sale of books varies from 8*s.* or 10*s.* to £6 or £8 during the year; *ib.* 1866, 1867.

Prior to 1849 the Board sold their books to everybody, but since then they sell them only for use in their schools; *ib.* 1217–1219, 1242. The difficulty of providing books for schools of mixed religious denominations is so great that practically none but the Commissioners' books are used; *ib.* 1220–1225. Reading books of Christian Brothers are prohibited by the Board; their arithmetic is used; *ib.* 1226.

Since 1849 the Board's copyright in their books has become public property; *ib.* 1242–1245. 1270, 1271.

Board contracts for printing of the books; the contract is practically something of a monopoly; *ib.* 1272. 1277. New editions of the first four books have appeared, and a new edition of the fifth is in the press; *ib.* 1276.

Means used to keep a school sufficiently supplied with books; *ib.* 1377.

Extract from report in 1855 in reference to the establishment of libraries in connexion with the schools read; no action on the subject has been taken by the Board; a list of books could be made

4. *Books (School)*—continued.

for such libraries that would not offend any sect; *Keenan* 1429–1433. 1488–1490. Action of the Kildare-place Society for this purpose; establishment of such libraries would attach children for a longer period to the schools; *ib.* 1434–1437.

Use of different kinds of books in different schools perfectly practicable; the only condition being that they should be suitable for use in the National schools; *ib.* 1451.

The rule as to communication with Lord Lieutenant prior to withdrawing or essentially altering a book does not apply to the revision of the old books; *ib.* 1454–1457.

Books identical with those of the Board are published by private persons in England, Ireland, and Scotland; the Board has no copyright; *ib.* 1242–1245.

Books are not so good as they should be; they are now under revision; revised books must be approved by the Board; *ib.* 1361–1363. 1367–1371. 1439–1441.

Teachers should enjoy the option of selecting the books for their pupils, and the pupils should have some variety in the books they use; with that object supplements of a literary character have been selected, but have not yet obtained approval; *ib.* 1364–1366. No substantial change has taken place in the greater portion of the books; *ib.* 1367.

All the old books require revision, especially those on arithmetic and natural philosophy; any officer of the Board may suggest a book for revision; the pending revision was the result of a recommendation of the Government in 1860; *ib.* 1369–1376.

The original revision was commenced in 1861 or 1862, by two of the Inspectors, and a literary assistant, who were directed to wait on the then Secretary to receive instructions; *ib.* 1458–1461. 1463–1473. This is the only general revision of the books; Archbishop Whately revised them at times and made various alterations; *ib.* 1462. 1542, 1543. 1935–1946. Scripture history lessons, an essential feature in the books, have been retained; *ib.* 1544, 1545. 1752.

Expression of nearly universal satisfaction with the revised books; some remonstrances have been made against them by Presbyterians and clergymen of the Established Church; *ib.* 1474–1480. The use of several editions of the same book in a school would be very confusing and embarrassing; *ib.* 1481–1485.

Books other than those on the sanctioned list are in use in National schools; duty of an Inspector on meeting with such cases; *ib.* 1529–1531.

There is a disposition to use Board's books in other primary schools; some have been introduced into the Church Education Society's schools; *ib.* 1532–1534.

The text-book on natural philosophy has not been revised for many years; *ib.* 1278, 1279. Students in training are taught from this, and candidates for Inspectorships are examined in it, so that they are behind the times; *ib.* 1693–1695.

Defective condition of Fourth and Fifth Books as to lessons in science; used in Clonmel National schools, when examined on Lord Kimberley's visit; errors in the "Epitome of Geographical Knowledge;" *ib.* 1696–1706. Disadvantageous to education to have books of these descriptions prepared by men unknown to literature or science; *ib.* 1713.

The National system could not have succeeded as it has done but for the production of books by the Board; a salutary modification of the arrangements as to the production of books is necessary; the more general the class of books used the better; suggestion by Mr. Thom of necessary corrections; his interest is to make them as correct as possible; the action of the Board with regard to its books has

NATIONAL EDUCATION, BOARD OF—*continued.*

4. *Books (School)*—continued.

destroyed the production of *school-books* throughout Ireland; *Keenan* 1705–1711.

Are more likely to be kept up to the condition in which they ought to be by private enterprise than by Boards of Commissioners; *ib.* 1710.

The use of books adopted by the Board is necessary to monitors and teachers preparing for examination, and so far their use is compulsory; *ib.* 1743–1749, 1750. 1753–1755. They are well suited for the purpose; *Newell* 2922–2931. The new editions do not contain lessons on special or technical subjects; the lessons on Scripture history are preserved; *ib.* 1751, 1752.

Chambers's set of school-books generally unsuited to National schools; *Keenan* 1443–1445. 1860–1862. Their books on geometry and algebra are used; *ib.* 1843, 1844.

The books have not been frequently revised; a committee was appointed in 1860 for the purpose of revision, who selected two Inspectors and an assistant to do the work; *Newell* 2839–2862.

The special compilation of the books for the revised edition was prepared chiefly by Mr. M'Creedy, two Inspectors, and a clerk; the revision of the scientific books has not yet taken place; *Kelly* 3086–3089.

The first series of books was admirable; this opinion is not in depreciation of the later series; deficiency of scientific teaching; *Newell* 2917–2921 2932–2935.

Reasons for the success of the Board's books; an author connected with the Board has a considerable advantage; the Board have now resolved not to adopt books written by any officers connected with the classification of teachers; *Keenan* 1718–1720. 1733–1735; *Hunter* 3414–3416.

No abuse arises from the allowance on the sale of books by teachers; it is an advantageous arrangement; *Hunter* 3188, 3189. The arrangement has caused an increase of labour to the office; there are no accounts kept, payment is made beforehand. The teachers' per-centage is not great; *ib.* 3190–3192. 3364–3369.

If the Board had the selection of all books published, the difficulty would be to get books suitable in every respect to be read all over Ireland by children of every denomination; *ib.* 3423, 3424.

One reason of the popularity of the system of National Education was the excellent books it introduced; *ib.* 3414–3416.

As to vouchers by Mr. Thom respecting the charges for certain woodcuts; *Claridge* 3879–3884. 3977.

A statement promised of the entire cost of the last revision of the books, including extra pay to parties so employed, salaries to their substitutes while so employed; cost and names of reference books to assist in revision, and cost of printing of proof; *ib.* 3970–3975.

Use of, not compulsory, but nearly so, as the Board will not sell any but its own books at reduced prices; *Bp. Dorrian* 8835–8837.

Time necessary, according to actual average attendance, for a pupil to pass from First to Fourth Book, 785 days, indicating 2252 days on the roll; *Kavanagh* 10325–10332. Per-centage of pupils in the different books, and time required for promotion from First to Fourth; *ib.* 10333–10336.

Books of the Board have been framed upon those of the Church Education Society; *ib.* 10882, 10883.

Relative proportions of pupils in each class-book in the four provinces and in all Ireland in 1867; *ib.* 10734. Average time necessary for a child in the richest district in Ireland to get into the Fifth Book, twenty-five years; *ib.* 10758.

Are on the whole good, but frequent changes objectionable; *Berkeley* 11623 *et seq.*

Nearly all written by a nephew of one of the Presbyterian Commissioners; *Kavanagh* 12363.

Errors in "Epitome of General Geography;"

NATIONAL EDUCATION, BOARD OF—*continued.*

4. *Books (School)*—continued.

in treatise on arithmetic; book on mensuration a failure; objection to tract on book-keeping; *Kavanagh* 12364–12391.

Failure to a great extent of Board's religious books; *ib.* 12373–12376.

Defects of book on physical science; its recent improvement; *ib.* 12392–12397.

Are much liked throughout the country; are good so far as they go; *M'Ivor* 13627–13631.

The Board should be very liberal in allowing use of books equivalent to its own; there would be no difficulty in inspecting schools using these books; *ib.* 13844–13852. It would not be fair to ask the Board to supply any books but its own; *ib.* 13852–13855.

The Board's books are kept out of many schools by the clergy erroneously supposing religion is excluded from them; *ib.* 13856, 13857.

Books of, contain moral truth, but are not largely permeated with religious truth; *Andrews* 14788, 14789.

Are colourless and flavourless, and have made Government unpopular; *O'Reilly* 15053–15055.

Are uninteresting and dry, and above the intellectual standing of children; *Toole* 21481–21490.

Are very valuable as far as the information in them goes; things in which the books are defective might be introduced; one great defect is that the history of Ireland is hardly mentioned; *Bp. Keane* 15571, 15572.

Roman Catholic bishops object that the National books have all been prepared by persons not of their own flock; *ib.* 15577.

The Board should have the power to exclude books, provided it is not on religious grounds; *ib.* 15578, 15579.

The exclusion of history of Ireland from the Board's books has not had the effect of keeping out of sight all reference to the past; *ib.* 15639, 15640.

The cardinal truths of Christianity are taught or implied in National school books; *Petticrew* 16751.

No complaint ever heard of the religious or moral teaching contained in the books of the Board; a conscientious master may teach moral subjects from them unobjectionably; *ib.* 16788–16791.

The books of the Board inculcate the general principles of Christian morality and Christianity, and would therefore probably be objected to by Jews; *ib.* 16868–16870.

Defective nature of Board's books for teaching children to read; should be formed of extracts, not compilations; *Mahony* 17070–17077.

Up to 1867 were satisfactory; alterations were made in consequence of witness's objections; *J. Porter* 18619–18683. 18688.

Not sufficiently graduated; are a fair set of lesson books; *Matthews* 18535–18539.

Teachers should be allowed to choose books for their teaching, care being taken that they were free from sectarian bias; *ib.* 18540. 18552–18555. 18561.

Objections taken to passages in; *J. Porter* 18570–18585. 18588. 18590–18592. 18630–18632. 18649–18657. Investigation into charges arising from objections; *ib.* 18589–18613. 18689–18691.

An objection to the books does not imply an objection to the system; *ib.* 18618. 18627.

Profit made by witness on sale of, in one year 10*s.*; *Gallagher* 19309.

The old books better graduated than the new ones; *O'Callaghan* 20116–20118.

The books of the Board are on the whole good; the agricultural class book is excellent; uniformity of books desirable, but with more variety of topic; truth without false colouring is what is wanted; the Board should have a comprehensive list from which managers might choose what books they want; *De Vere* 20194–20197. 20220. 20236. 20284. 20388. 20421–20423.

4. *Books (School)*—continued.

Fifth Book lessons should be introduced into Third and Fourth Books; *De Vere* 20220.

Exceptions taken to historical allusions in Fifth Book; *ib.* 20236.

Are uninteresting and dry, and above the intellectual standing of children; *Toole* 21485–21490.

Are as good as can be had; *Byrne* 21735–21737.

Objectionable; they exclude everything bearing on Catholicity or Catholic history, &c.; *M'Menamin* 21914.

Dissatisfaction with; should be more historical in character; Catholics should be allowed to use Catholic books; as to use of such books when Protestant minorities are present; *ib.* 22095–22109.

Are used, with certain exceptions, in witness's schools; *Forde* 23107, 23108.

Being sanctioned by the Board, no question can arise with Inspectors as to use of; *ib.* 23127.

Board does not require its own books to be bought; they would sanction any book, if not improper; as a rule it leans against books published by the professors and Inspectors; the parties who draw up the programme for teachers in training are responsible for the books recommended; printing of the books is put up to public contract; anyone may print and publish the Board's books, so that there is not practically a monopoly; the teachers are more likely to take books published by the Board than others; *Longfield* 24381. 24420. 24449–24453.

The Board's reading-books are so good and so cheap as to exclude all others; a religious tone pervades them, but the greatest pains have been taken not to allow anything in them that could offend anyone's susceptibility; *ib.* 24437–24442.

Professors often recommend their own books, but the Board is responsible for the selection; *Newell* 25265–25270.

Are replete with Scriptural and religious matters; afford opportunities for proselytism; *Card. Cullen* 26600.

Are forced on the people, which prevents compilation and sale of other books; compiled by strangers to Ireland; Catholics employed on Third Book only; value of, very trifling; if all were thrown into the sea no great loss would ensue; *ib.* 26619.

Are religious, but not so in a Catholic sense; no religious matters in, taken from Catholic authors; *ib.* 27045.

Scarcely a page of Irish history in all the books; saints and missionaries and distinguished men not mentioned; *ib.* 27048.

Compilation of; "Scripture Lessons" have been banished from Catholic schools; Whately's "Lessons on Christianity" have been condemned by the Holy See; contain matter totally unfit for children; objections to books generally; books should be Catholic for Catholic children, and denominational for others; *ib.* 27048–27050. 27076. 27106–27110.

Circular Memorandum to Inspectors of National schools as to inconveniences arising out of the use of different editions of the same book in the same class, dated March 20, 1868; with abstract of replies thereto, *App.* v., *pages* 1287, 1288.

Letter from Mr. R. W. Hely to the Right Hon. E. Cardwell, M.P., Chief Secretary for Ireland, dated July 25, 1861, complaining of treatment received from National Board in respect of remuneration claimed by him for revision of school books on their catalogue; together with correspondence between himself and Board on the same subject, from 1859 to 1861, *App.* xi., *pages* 1297–1300.

5. *Office Books, and Printing and Binding for the Board.*

Paper for official books and forms is supplied by the Stationery Office, and paper for school-books is supplied by the printer; *Keenan* 1342–1345.

Printing for the Board is done by Mr. Falconer, Mr. Thom, and Dr. Sullivan; the two former bind what they print, and the Stationery Office binds Dr. Sullivan's; *Newell* 2740–2744. Details regarding estimates and contracts for printing; *ib.* 2745–2762. The Board have no contract with any engraver; *ib.* 2673, 2674. As to cost of corrections and of illustrations of two books lately written specially for the Board; *ib.* 2765–2775. 2831. Further detail of matters relating to printing for the Board, and generally into the question of Mr. Thom's monopoly. The object of the Board is to produce a book at the cheapest rate; *ib.* 2776–2805.

As to a system of office books prepared and provided by Mr. M'Creedy; their expense and uselessness; a revision of the system of book-keeping was requisite at the time; *Hunter* 3384–3396.

For printing forms the Board pays the Stationery Office, who have the control of such matters; in printing school books the Board has a check; contracts are made after a book is fully corrected; *Claridge* 3862–3872. 3878.

6. *Rules.*

Rules of, hinder co-operation of Roman Catholics, by preventing religious instruction going on *pari passu* with other; *Bp. Dorrian* 8676–8678.

Rule of, in 1845, as to future vesting of schools aided by; alarm of Roman Catholic bishops at; *Kavanagh* 10817–10820. Want of confidence caused by change of vesting; return to original obligation; *ib.* 10833–10834.

Has resorted to its original rule as to religious instruction not being imparted to a child without express sanction of the parent; *Macdonnell* 11120–11123. 11126–11132.

Changes in rules of, at instance of Presbyterians, specified, *Kavanagh* 12313–12337.

Rule of, as to religious instruction, strictly carried out in Wesleyan schools; *M'Millen* 14543.

Its rule to prevent illicit religious teaching theoretically sufficient; alleged instance of its failure; *O'Reilly* 15077–15083.

Board's new rule with regard to religious instruction does not work satisfactorily; *Petticrew* 16634, 16635, 16765.

Changes in rules of, unacceptable to Protestants; *ib.* 16765, 16766.

Present rule a sufficient safeguard against proselytism; *Mahony* 17155–17157.

Any change in Board's rules should be first approved by Executive before being submitted to Parliament; *Ross* 17453–17456.

Rules of the Board are not interfered with in giving religious instruction; *Macdonough* 18042.

Imposition on National Board by Government, in 1840, of a change seriously affecting Roman Catholics, so opposed that the original rule was reverted to; *Kavanagh* 19506–19509. Change of rule of, at instance of "Anglican Protestants," in 1847; step retraced, from pressure of Government; *ib.* 19509–19516.

Board's rule, from its foundation to 1847, as to exclusion of children from adverse religious instruction; changes of rule between 1847 and 1866; *ib.* 19521–19532.

Controversy between the Board and Archdeacon Stopford as to discrepancy between trust deed and rules; *ib.* 19533–19539.

Any fundamental change in the rules of the Board should be by authority of Parliament; *De Vere* 20476–20478.

Every change in rules of the Board should be submitted to Parliament; the non-vested system would have been more successful had this been done; little meetings are held to induce the Commissioners to change rules; *Atkins* 20795–20798.

In his schools witness observes the rules, stretching them as far as possible; those governing model schools and ordinary schools are similar *Forde* 23014, 23015.

NATIONAL EDUCATION, BOARD OF—*continued.*

6. *Rules*—continued.

Explanation of rule as to religious instruction, quoted from report of National Education Commissioners for 1849; *Kavanagh* 23410. 23412.

Want of uniformity in their interpretation of their rules; *ib.* 23412–23415.

Board never acknowledges any evil result from change of rules; evil acknowledged by Lord Derby; *ib.* 23455.

Rules of, are printed and observed; a stereotyped set of rules would never be approved of; they should expand and improve according to the growing circumstances of the country; Parliament is not the proper place for discussing such changes; *Macdonnell* 23599–23601.

The Board has fixed, but not stereotyped rules, which have been and may be altered from time to time; *ib.* 23629.

No alteration has been made in the rules which has not been well considered, and in the end approved by the public; *ib.* 23709.

Reasons for the alteration in, in 1840, in favour of Presbyterians, and in 1860 in favour of Church of England children; the juxtaposition of schools often advantageous to both; *ib.* 23722–23725. 23728–23731.

Changes made in the rules by the Board should not be submitted to; *Longfield* 24196, 24197. 24201.

Submission of rules to Parliament would be of no great use, nor of great harm; it would make the Board safer; *ib.* 24359–24364.

The object of the Board in framing rules is so to frame them that they shall not require interpretation; the officers would not interpret them; if interpretation were needed, the Board would do it themselves. The rule of 1866 gave rise to a great deal of correspondence. The interpretation of Mr. Bole is the correct one—not that of Mr. Keenan; this rule was not so well framed as it should have been; *ib.* 24302–24329.

Objections to changes in rules made by the Board proceeded chiefly from Presbyterians; now Catholics offer the greatest objection; *ib.* 24354–24358.

Catholic Poor School Committee in England would not accept the rule as to religious instruction, because it would interfere with the general teaching of the schools; *Allies* 25397–25408.

Modified rule as to religious instruction objectionable; proper rule as to Catholics; *Card. Cullen* 27045.

Leading rules of the Board should be confirmed by; *ib.* 26596.

7. *Opinions and Miscellaneous.*

Its power of inflicting and enforcing fines on teachers, &c.; *Macdonnell* 578–581. 586–588. 609. 618.

Reasons influencing the Roman Catholic hierarchy to withdraw their confidence from; *Bp. Dorrian* 9191, 9192.

Returns of attendance, &c., issued by, fallacious; instances quoted; *Kavanagh* 10133–10136. 10137–10145. 10146–15151. Sources of the errors; *ib.* 10152–10158. 10166–10172.

The Board "cook" the accounts; *ib.* 10297–10304.

Mutilate reports of Inspectors; will only publish what is pleasant; *ib.* 10305–10309.

Fallacious nature of, as to attendance at school and numbers of children learning to read and write; *ib.* 10310–10324.

Principle originally to vest schools in; its impracticability; incorporation of, in consequence; opposition of Roman Catholic body to the measure; *ib.* 10350–10353.

Inaccuracy of reports of; *ib.* 10783–10787. 10796–10811.

Changes of principle of, with regard to vesting schools; disastrous effects of; want of confidence caused by such changes; *Kavanagh* 10812–10816. 10833, 10834.

Amount paid by, to Board of Works for repairs, &c., of school-houses; *ib.* 10862, 10863.

Only one Established Church school in Dublin connected with the Board; *ib.* 11018.

As an administrative body, the Board stands high in public estimation; *Macdonnell* 11118. Administration of, is carried on by its chief officers; *ib.* 11120, 11121. 11195. Its action generally uniform, 11124, 11125.

More time is occupied with educational questions than religious ones in its discussions; *ib.* 11122, 11123.

Wesleyan schools in connexion with; *M'Millen* 14421–14426.

Administration of, is drifting to denominationalism; *ib.* 14506. No practical mischief has resulted; *ib.* 14509.

Religious instruction in schools under, very good; *ib.* 14442.

Conditions under which Wesleyan schools were placed in connexion with; *ib.* 14557, 14558.

Two kinds of schools under, vested and non-vested; *ib.* 14607.

Has done its best in endeavouring to attract teachers to its model schools; *O'Reilly* 14945.

Too easily induced to give concessions to sufficient pressure; *Wilson* 15938, 15939. 15999. 16175. Have been unnecessarily indulgent in allowing establishment of small schools; *ib.* 15990–15992.

Contributes nothing to erection and repair of a school, unless vested in itself; *ib.* 15986–15989.

Grants made by, to new schools, to the effect of injuring existing schools; a Board desirous of promoting an efficient system of education should not act thus; *ib.* 16081–16095. 16127–16129.

Pressure on, has been strongest from Roman Catholic clergy; evidence of Mr. M'Creedy as to pressure exerted by Presbyterians, is doubtful; it is natural for the clergy of every Church to try to have the control of education; *ib.* 16269–16273. 16274–16277. 16285, 16286.

Some members of, not favourable to united education; *Petticrew* 16645–16647.

Objected to, for stopping the building of model schools; *ib.* 16766.

Central Board deal fairly with reports of Inspectors; *Mahony* 16987–16989.

The principle of, is sound, so far as secular education is concerned; and has been conducted successfully since 1831; *Ross* 17490–17493.

The Irish system, so far as it is recognised, inspected, and paid for by Government, is only secular; *ib.* 17497 *et seq.*

More commended to the Catholic body by the change conceded to the Presbyterians than by anything else; *ib.* 17516–17520.

Originally intended to embrace the common principles of Christianity in its teaching; now is liberal in the last degree in providing for secular education, which, if agreed to by all, would be by no means an evil change; *ib.* 17533–17546.

Have the power of dismissing teachers; it is seldom exercised, and is not considered a grievance by teachers; *Macdonough* 17900–17909.

Never acted on the rule that they were not authorized to pay salaries except in aid of local contributions; school-fees were always levied; sent assistance in the famine time; *ib.* 17951–17958.

Contingencies on supposed grant of pensions to teachers, as to power of Board over; *ib.* 17959–17965.

The system of, is drifting into denominationalism, therefore the Non-Subscribing Presbyterians are opposed to it; *J. S. Porter* 18057.

Reasons for the opinion that the Board is drifting into denominationalism; *ib.* 18087–18093.

NATIONAL EDUCATION, BOARD OF—*continued.*

7. *Opinions and Miscellaneous*—continued.

Want of uniformity in its action; instances; *J. S. Porter* 18126–18147.

Has not upheld model schools as it ought to have done; *ib.* 18162.

Some restraint should be put upon, as to the establishment of rival schools; *Matthews* 18359–18362.

Must be kept to their original principles, not to interfere with the creed of any party; *J. Porter* 18628. 18633.

Relations of Synod of Ulster with, prior to 1840; *Kavanagh* 19488–19496.

Administration of funds for primary education by a Board like the present should be controlled by Parliament; *ib.* 19517.

Encourages the tendency of present system to drift into denominationalism; *Bp. of Down and Connor* 19726.

Should be only administrative; *ib.* 19727.

Changes in rules and constitution of, have had no effect in conciliating the Roman Catholics; it should have kept rigidly to original principles; *ib.* 19728–19731.

The change to the non-vested system was the great point, it gained the Presbyterians and did not alienate the Catholics, who are dissatisfied only because they cannot teach their religion as they like; *Atkins* 20799–20801. 20813–20815.

Wesleyans are not represented on; *Tobias* 22829, 22830.

Does not grant such a fair allowance to schools in connexion with religious bodies as to others; uncertain action of, at times; *Forde* 23153.

Said to be more liberal to the north of Ireland than to other parts; *ib.* 23159.

Discussion as to alterations in the rules of, respecting attendance at time of giving religious instruction, and as to the time the Presbyterians joined; *Kavanagh* 23358 *et seq. passim.*

Continuous identity of views and rule of, as to expulsion of children from religious instruction, up to 1848; ambiguity of expression first discovered by Archdeacon Stopford; reluctant change of interpretation; rule was well understood by officials between 1840 and 1847; *ib.* 23396–23398. Further on same subject; *ib.* 23399 *et seq.*

Inattention of Commissioners to their proper business; *ib.* 23480.

No job has ever been proved against; *Macdonnell* 23597.

No proposal to do away with a representative Board was ever made till the Board removed Archbishop Whately's "Christian Evidences" from its list; the cry was revived in 1860, when it was decided the Board should consist of equal numbers of Protestants and Catholics; *ib.* 23606–23610. 23613–23616.

The Commissioners do not understand the working of the system so well as the Secretaries, Head Inspectors, &c.; seldom read the Inspectors' reports; but are better able to come to right decisions on questions submitted to their judgment; practically the system is administered by witness, the Secretaries, and Chiefs of Inspection; *ib.* 23602–23605. 23611, 23612.

It would not be advantageous to have the Commissioners all resident in Dublin; residing in different parts they learn the feelings and opinions of people; it would be sufficient to have enough resident Commissioners to carry on business; *ib.* 23632–23637. 23684–23689.

As to exercise of patronage by; no suspicion of a job against it during its existence; *ib.* 23644.

The dismissal of teachers is always settled by Board at large in case of doubt; the Board only dismiss clerks and Inspectors; the greatest care is taken in judging cases; *ib.* 23645–23653.

There might be an advantage in laying the minutes of the Board before Parliament previous to their coming into force; *Macdonnell* 23656–23662. 23710–23713.

Matters of detail, if involving anything of a novel nature, are brought before the Board; *ib.* 23669, 23670.

No responsibility is sought to be evaded by the sub-committee in bringing matters of detail before the Board; *ib.* 23671.

If a denominational system be established, the present Board must be abolished at once, and two or three denominational Boards created; *ib.* 23695.

The action of, should be confined very much to primary education; not to interfere with middle class education; its superintendence might be extended to endowments for primary education; *ib.* 23740–23745.

Appointments under, should be open to public competition; if the religious or denominational element were eliminated from the whole system it would be better for the administrators; it could not be eliminated from the governing body; *ib.* 23795–23798.

Cannot assist Kildare-place Training School, it being carried on upon denominational principles; *ib.* 23828.

Original intention of, to found separate middle schools in connexion with model schools; *ib.* 23906, 23907.

All important cases of reprimand or punishment are invariably issued by the Board; *ib.* 23962.

As to preparation of programme of business; *ib.* 23963–23968.

The Board insists on maintaining balance of religion with regard to Inspectors; *Longfield* 24193. 24351–24353.

Present system is preferable to a Parliamentary chief, with a council; *ib.* 24194, 24195.

General attendance of Commissioners fairly represents the different religions; the majority of those that attend are constant attendants; *ib.* 24222–24227.

All important matters, and every case not already settled by precedent, are brought before the Board; the Commissioners are not dependent on anyone for information as to administration; they are supplied with the reports, &c.; *ib.* 24240–24245.

Officers of the Board and teachers can only be appointed, dismissed, fined, &c., by a vote of the Commissioners. Sometimes the Board alters its decisions, not frequently; cases have occurred of officers being reinstated; *ib.* 24246–24250.

Contradictory action of, in objecting to Mr. Keenan's proposal as to model schools and then approving Mr. Fortescue's; *Newell* 24752–24754. Commissioners would not object to teachers with very small salary keeping a shop, &c.; *ib.* 24814, 24815.

Office expenses of, much less as compared with the English system; *ib.* 24968.

Number of letters received annually; objections to grouping correspondence by districts; county basis is a permanent one, and the only one on which business can be conducted; course at present pursued is more complicated in description than reality; *ib.* 25208–25251.

Amalgamation of registry, inspection, and correspondence offices would produce confusion; each clerk's work should be homogeneous. If the process could be shortened it would be a boon; the Board desire to simplify everything. Complaints of delay have been very few of late; in a large department some must be expected; *ib.* 25252–25261.

Programmes for examination of teachers, by whom and how drawn up; are to be looked upon as the official acts of the Board. Questions for answering are drawn up by Head Inspectors; *ib.* 25262–25274.

Catholic bishops cannot now sit on National Board; *Card. Cullen* 27056.

7. *Opinions and Miscellaneous*—continued.

Partial cause of improvement in Ireland; *Card. Cullen* 27272.

Memorandum for the Royal Commissioners, giving a short history of the Financial Department of the National Board of Education, from its commencement, in 1831, to May, 1868; *Claridge, pages* 176–179.

Circular letter of National Board, explanatory of the nature of school organization, and the duties of the organizers and Inspectors in relation to it; *App.* vi., *pages* 1288–1290.

Return, showing estimate of expenditure of National Board for year ended March 31, 1867, and gross expenditure as compared with it; *App.* viii., *page* 1291.

Improvements in, suggested by witness. There should be a more thorough recognition of simply aiding schools; parents should be responsible for education, not the State nor Church; the Bible to be the staple text-book for every school; no interference on the part of the State with any doctrinal views or critical opinions regarding Scriptures, and a uniform assessment or rate for the whole of the country; *Andrews* 14739–14741. 14751.

Proposition to levy a uniform rate (about 1*d.* in the £) for the whole of Ireland for educational purposes, on the members of the religious community for whom the school is required; *ib.* 14741–14744. 14762–14764. 14767, 14768. 14820–14825. 14850–14853. Under this proposed plan Inspectors would examine simply on the text of Scripture; *ib.* 14765. 14817–14819.

Reading the Bible as a text-book in school could not be objectionable to Roman Catholics, if Archbishop Murray can be taken as an authority; *ib.* 14752–14758.

Changes desirable in the system of National education; consideration of principles on which a system of National education ought to be founded; *O'Reilly* 14883.

Suggestion of a scheme of National education by witness, of which the objects are—first, to secure for all the poor children of Ireland uniform sound secular instruction; secondly, to provide religious instruction for every child; thirdly, to vindicate for every man liberty of religious teaching; and fourthly, to present no obstacle to a religious man, of whatever creed, from becoming the patron of a school; to have three paid and three unpaid Commissioners, training schools, catechists, inspection, authorized books and other requisites, grants by Commissioners, public notice as to religious instruction, &c.; *Warren,* 15118–15121.

What it should be; success of the National system; *Ross* 17346–17348.

Whatever system is considered best, let it be established and carried out all over the country, but the denominational system would add to the burdens of the State, and poor minorities would be neglected; *J. S. Porter* 18173–18176.

A plan of, with funds granted by Parliament, must be in accordance with wishes of majority; *ib.* 18223, 18224.

Memorial to Lord Lieutenant on, to allow religious instruction by reference to Scriptures while teaching, inasmuch as National schools give moral instruction based on revelation, and the Board's books contain extracts from Scripture; the request not granted; *Bp. of Down and Connor* 19667–19688.

As to prohibition by, of reading Scriptures during ordinary school hours; memorial to Lord Lieutenant for liberty to refer to Scriptures at such times; as to hanging of General Lesson and Ten Commandments on walls of schools; *Bp. of Ossory* 20600–20610.

In a system of National free education a line should be drawn between those able and those not able to pay, say 9*d.* a week; those who can pay so much can provide their own school; those not able should be assisted by a national rate; *Toole* 21474–21476. 21530–21535.

7. *Opinions and Miscellaneous*—continued.

NATIONAL SCHOOLS:

1. *Establishment, Buildings, Maintenance, Sites, &c.*
2. *Cost, Income, Accounts, &c.*
3. *Attendance at.*
4. *Model Schools.* *See* MODEL SCHOOLS.
5. *Ordinary Schools.*
6. *Managers.* *See* MANAGERS.
7. *Teachers.* *See* TEACHERS.
8. *Miscellaneous.*

1. *Establishment, Buildings, Maintenance, Sites, &c.*

When a new school is wanted, the local parties apply to the Board, who send an Inspector to examine; the Board originates only model schools; *Macdonnell* 6–8. 49. The person applying for the school generally becomes its manager, the owner of the property the patron, the manager being appointed in accordance with the owner's desire; *ib.* 9–11. Formerly it was desired that one of two patrons should be a Protestant, and the other a Roman Catholic; such a combination hardly exists now; there are but few cases of committees of management; *ib.* 13, 14.

The Board contributes two-thirds the cost of a new school, the locality or manager the remainder, the Board of Works seeing to the expenditure; *ib.* 58–62. Locality contributes towards keeping up the furniture, supply of books, and support of teachers, but the amount given is very small compared with that given by the State; *ib.* 63-66.

The basis of estimation as to number a school ought to hold is its contents in square feet, which is shown in primary reports; *ib.* 659, 660.

Voluntary contributions towards erection of vested schools about a third of the amount expended, the Board granting the other two-thirds; the average cost is about £160; *ib.* 201, 202. 234–238. Vested schools are on the whole better than non-vested; *ib.* 662–663.

The expense of providing non-vested schools is all supplied by the localities; *ib.* 203, 204. Non-vested schools are increasing; in 1866 there was an addition of 68; *ib.* 672, 673.

No local rate is levied on school-houses; *ib.* 699.

The Board renders aid to schools under four heads, viz., salaries of teachers, salaries of monitors, repairs, and books and apparatus; *ib.* 731–735.

Where schools are reported deficient as to repairs or ventilation, the manager is informed, and if the school become unsuitable, it is struck off the roll; *Keenan* 1378. In some parts bad schools and inefficient teaching have been tolerated because of poverty; *ib.* 1379. The duty of providing out-offices in schools vested in trustees devolves upon them, the Board paying two-thirds the expense; all repairs, &c. of schools vested in Commissioners fall upon the Board; *ib.* 1380. 44·6 per-cent. of schools have no out-offices, nearly the whole being non-vested schools; *ib.* 1584, 1585.

Modified grants for new schools by the Board; *ib.* 1598–1602. Report on the question of schools in thinly peopled districts in 1855 or 1856; summary of the results arrived at; *ib.* 1603–1605.

The space of eight superficial feet required by the Board for each child is ample; *ib.* 1606. In city schools there is at all times considerable crowding; in the country sometimes crowding takes place; the accommodation is equal to the wants of the system; *ib.* 1607–1609. 1884–1887.

Difficulty in fixing the amount to be contributed by localities. No compulsory arrangement can be made requiring any specific proportion of contribution by managers; *ib.* 1835–1842.

1. *Establishment, Buildings, &c.*—continued.

Frequent and serious complaints of delay in execution of repairs by Board of Works, in south-west of Ireland; *Keenan* 1868, 1869. The Commissioners of Works are informed through their own officers, and from the Board of Works, as to the condition of the schools; *ib.* 1870–1874. 1907, 1908.

Vested school-houses are better than the non-vested; *ib.* 1901, 1902. Provisions of the "Land Improvement Act" should be extended to school-houses; all school-houses would then be made suitable to their purpose; *ib.* 1903–1905.

Course to be pursued by persons seeking building grants; specification of Board of Works need not be strictly adhered to; supplemental grants; revised plans proposed by Board of Works have been submitted to the Commissioners, but have not yet been approved; *ib.* 1590–1597. 1897–1900.

The preliminary conditions required in newly admitting a school to aid from the Board are—a convenient house, a playground if possible, with suitable out-offices; *Hunter* 3680–3682. Defects are required to be remedied by writing to the manager; if not attended to, the grant would be withdrawn; *ib.* 3683.

School houses in Dublin are bad and crowded; *O'Carroll* 4011.

Inspection and report as to state of repairs of; payment of cost of repairs; *ib.* 4427–4431.

Schools were vested in trustees until Commissioners were incorporated; managers are disinclined to vest schools in Commissioners; *Sheridan* 4973–4977. Schools are built by contractors and repaired by Board of Works. Local parties sometimes pay part of their third in labour. Cases have occurred where contractor has agreed with local parties to do the work for the Board's two-thirds; *ib.* 4985–4991. 4997.

Buildings generally good, but expensive; some vested school-houses are damp; difficulty in making trustees keep them in repair; all should be repaired by public funds; *ib.* 4992–4996. Undue delay of Board of Works in effecting repairs; *ib.* 5542–5543. Rule as to whitewashing non-vested schools not always observed; *ib.* 4998, 4999.

Landlords should keep school-houses in repair; *ib.* 5611–5613.

Securities taken that State gets an equivalent for its contribution—proper school-houses well supplied, and qualified teachers; *ib.* 5134, 5135. Some localities are so poor that school-houses cannot be kept in repair; non-vested school-houses are fairly kept; State should repair properly vested ones. Those built with public money should be placed under county authorities; reasons; *ib.* 5136–5139.

Grants sometimes recommended in cases where school-houses do not quite meet requirements; *ib.* 5226–5234.

Difficulties in obtaining sites for National schools; *Kelly* 3070–3073. *Sheridan* 5140. 5253–5259. 5317, 5318. 5560–5563. 5602–5604. 5564. *De Vere* 20316, 20317. 20351.

2. *Cost, Income, Accounts, &c.*

The local funds amount to £52,000 a year, of which school pence furnish £40,000; the remainder comes from subscriptions, sermons, &c.; amount of local assistance is slowly increasing; *Macdonnell* 123–134.

The violating of rule laid down by Lord Stanley, as to school fees and local payments, has been the main element of success in establishing schools; *ib.* 172–177.

In 1866, Ulster contributed the largest share of school-fees, having about one-third of all the schools in Ireland; *ib.* 177–180.

School accounts are kept by teacher, certified by manager, and transmitted to the Board; rules as to receipts being signed by managers and teachers are strictly enforced; *ib.* 157–160. No loss in the transmission or appropriation of money

2. *Cost, Income, Accounts, &c.*—continued.

by managers or teachers; *Macdonnell* 161–164. Prescribed forms of accounts; if return is properly made, the disposal of any surplus fees would appear; *ib.* 189–191. School accounts are examined by inspectors; *ib.* 216–222.

Amount arising from and rates of payment of school pence; accounted for by manager; almost always goes to teacher; *ib.* 123–132.

Procedure and detail of arrangements in regard to building and repair of vested and non-vested schools explained; *ib.* 682–698. 708. 724–730. 737. 762–771.

Repairs are enforced by stoppage of grant; *ib.* 700, 791. 736.

The arrangement with Board of Works as to building and repairing schools has worked well in some parts; *Keenan* 985, 986.

Many classes of schools get their salaries on too easy terms; according to the Board's rule, the numbers of pupils vary with the classification of the teacher; *ib.* 1032, 1033. 1068.

The present plan of payment per head is defective; the maximum cost to the State should be a high one; *ib.* 1036–1038.

In a boys' school the daily attendance of 60 entitles the school to an assistant; 50 is sufficient in a girls' school; *ib.* 1039. First class masters are frequently found in schools where the average attendance is only thirty; number of scholars to entitle him to full salary; number of assistants and monitors, their salaries, &c.; *ib.* 1040–1046.

System of school-fees in, necessary; where any attempt is made to confine schools to a high class of pupils, the Inspector would report it; *ib.* 1133–1135.

No rule imposing a fixed rate of school-fee; *ib.* 1248, 1249.

For all Ireland the endowments and subscriptions together amount to only £12,000 a year; the teachers receive the endowment in addition to salary; *ib.* 1382–1384. 1387.

"Endowments" include subscriptions and all local sources of school revenue, except pupils' fees; 80·5 per cent. of 5,533 schools had no endowments of any kind; *ib.* 1385.

Relation between amount of school-fees paid and classification of teachers; *ib.* 1687, 1688. Higher class teachers look out for schools where high fees and subscriptions prevail, and get them; *ib.* 1689, 1690.

Average cost per head for education in ordinary schools in Ireland, 14*s.*; *Newell* 2940. It should be much more to be done well; *ib.* 2943–2946.

School accounts are merely accounts of receipts by teachers; the managers' accounts are as to the amount of fees paid to teachers; *Kelly* 3099–3103.

The annual report shows the total annual cost of a school, except repairs; *ib.* 3113–3120.

Schools having other sources of income than grants from the Board give a return of money locally contributed; they have to attend to repairs; *Hunter* 3178.

School accounts are, as a rule, regularly kept; the teachers' three books must correspond; and they keep an account of moneys received; *O'Carroll* 4161–4165.

Schools must be kept in repair by localities; if non-vested school falls into disrepair, the grant is withdrawn or salary suspended; the Board would object to repairs being done at master's expense; *Kelly* 3110–3112. 3215. Might also object to rent being paid out of teacher's salary; *ib.* 3107–3109.

Too late now to raise rates of payment in National schools; a greater number might be made to pay, which would improve attendance; manager should settle who should pay; *Fitzgerald* 8362–8365. Roman Catholic managers do not press parents to pay, as being dependent on their flocks it would be so much taken from them; *ib.* 8366–8367.

See also FEES.

NATIONAL SCHOOLS—*continued.*

3. *Attendance at.*

Correspondence between age and classification; about three-fourths are under twelve years, and nearly the same proportion classified below the Third Book; *Keenan* 1611–1613.

Children are withdrawn from school at a very early age, especially in manufacturing towns; the attendance in tillage districts is much better than in pasture districts; in the mountainous districts some of the best schools may be found; *ib.* 1614–1616. A remedy with reference to the early withdrawal of children from school suggested, by offering premiums to children who had spent five years in a National school; *ib.* 1621–1625.

The average attendance in the ordinary schools is 268,260, and in the convent schools, 31,017; *ib.* 1686. 2038–2040.

The fact that there are 300,000 holdings of less than fifteen acres each, and that every child has to work as soon as it is able, accounts for the irregularity of attendance; *ib.* 1788–1789.

7·1 per cent. of children attending the National schools reach the higher classes; *ib.* 1807. Pupils remaining in the school to an advanced age serves the interest of the junior pupils; *ib.* 1808–1810. A child should be sent to an infant school as soon as it can walk there; five years should be the minimum age; *ib.* 1811.

Payment according to numbers should be abolished; *ib.* 1813.

Every scholar should attend school before roll-call; any discrepancy between the number on the roll and the number actually present should be accounted for on the "absence slate;" *ib.* 1818–1822.

Attendance of Protestant children at Catholic schools; *ib.* 1966–1968.

Average number of children in attendance at school compared with the total number on the rolls; average attendance higher in town than in country schools; children remain longer in the latter than in town schools; *Hunter* 3155, 3156. 3161, 3162. And because of their irregular attendance are longer on the rolls before they reach a higher class; *ib.* 3157.

In taking the average attendance Saturdays are excluded, and any day when it is exceptionally small. In Catholic districts the holidays of the Roman Catholic Church are excluded; *ib.* 3279–3288.

A pupil must be present four hours in school to entitle him to credit for attendance; *ib.* 3477–3480. Undesirable to call the roll twice a day; *ib.* 3481.

A school with an average attendance of from thirty to fifty is more efficient generally than larger schools; *ib.* 3482–3486. 3603. 3668. 3670.

The state of ordinary National schools in the South Dublin district, as described in 1866, is changed a little for the better, but the children are late and irregular, and the parents too poor or indifferent to prevent it; of the average attendance of 6,500, more than half were in the First Book, and of them 1,600 were in the alphabet; *O'Carroll* 4086–4094. 4145.

Not much difference in the several counties between attendance and the numbers on the rolls; school-houses in Dublin are bad and crowded; *O'Carroll* 4010–4012. The attendance is better in well conducted schools; teachers have much to do with good or bad attendance, especially in the city and suburbs, but poverty is a great cause of irregularity; *ib.* 4012–4015. The causes of irregular attendance are distributed pretty evenly; *ib.* 4016–4019.

Average attendance of all the schools in the South Dublin District is 6,500, containing an average of about 200 or 300 Protestants; some schools are almost exclusively Protestant; *ib.* 4042–4046. Numbers on rolls of schools in South Dublin District, of Protestants and Roman Catholics; *ib.* 4255–4263.

NATIONAL SCHOOLS—*continued.*

3. *Attendance at*—continued.

The negligence and irregularity of attendance at school caused partly by poverty. There might be better attendance and more attention if the children paid school-fees; *O'Carroll* 4136–4138.

The children mentioned as being in the alphabet may be of any age up to nine or ten; irregularity of attendance; they stay away four or five months, forget all they have learned, and have to begin again; *ib.* 4139–4144.

Until lately only 18 or 19 per cent. of the National school children have reached the higher classes, giving an attendance of about two years; the number now may be 24 per cent.; *Sheridan* 4896–4900. Children are too long in passing from class to class; payment by results would correct this; *ib.* 4901–4903.

If average attendance at all National schools were restricted to 60, the present staff of teachers would not be required; *ib.* 5109.

In the Irish schools it would take a longer time to qualify for promotion than in the English schools; *ib.* 5188–5196.

Schools hours are generally from ten to 3.30 or four; Inspector's incidental visits are made any time between 9.30 and four; *ib.* 5204–5211. Number present must be marked on the rolls by twelve o'clock; *ib.* 5212–5214.

Children's names always struck off after thirteen weeks' absence; no large per-centage need be allowed for children who appear on the rolls but have left; *ib.* 5322–5339. By returns, 64 per cent. only appear to have reached the First and Second Book, but there is a larger proportion in the advanced classes now than in 1852; *ib.* 5339–5349.

In Irish National schools the daily average attendance is forty-nine; in 15 per cent. of schools in county Cork only thirty-five; *ib.* 5615, 5616. 5830. Mixed education somewhat neutralized by Protestant children not attending schools managed by Catholics, and *vice versâ*; *ib.* 5621–5625.

Great improvement in all schools in late years; *ib.* 5753–5763. Improvement in attendance at model schools; *ib.* 5764. Attendance most regular in model schools, next in convent schools, and least in ordinary National schools; improvement from 1858 to 1860; *ib.* 5773, 5774.

Attendance more regular in model than in ordinary or convent schools; *Fitzgerald* 8466–8470.

Length of attendance in school allowed to monitors; *ib.* 8484–8486.

Better class children attend, who pay 5*s.* per quarter; but not to any great extent; social advantages of the practice; *ib.* 8634–8640.

Return of attendance at model, ordinary, and convent schools, put in; *ib.* 12219. Statistics quoted from it, showing more regular attendance at model schools than in convent schools; *ib.* 12221, 12222. Some reasons for this; *ib.* 12244–12255. Surprise at Mr. Keenan's statement as to better attendance in convent schools than in model schools; *ib.* 12262, 12263.

Social intercourse arising from attendance at; *Petticrew* 16752.

Average attendance in five schools under witness's management; mixture of religions in; *J. S. Porter* 18055, 18056.

As to proportion of Roman Catholics attending primary schools, to Protestants; *Bp. of Ossory* 20660–20663.

Instance of compulsion in a National school, of Roman Catholic children receiving Protestant religious instruction from a Presbyterian teacher; *M'Menamin* 21935.

The Board has never discouraged the attendance of the poorer classes in schools of a higher grade; *Macdonnell* 23900–23902.

In Clonmel district about half the schools have a

NATIONAL SCHOOLS—*continued.*

3. *Attendance at*—continued.

mixed attendance of Catholics and Protestants; number of the latter very small; *O'Hara* 26684–26692.

National schools preferred to, and more frequented than, denominational schools, both by Protestants and lay Catholics; *ib.* 26693–26701. 26714 *et seq.* 26750.

Roman Catholics, if free to choose, prefer National schools; "free to choose" implies no penalty for so doing; instances named of denial of sacraments to both teachers and scholars for attending schools under Protestant management; *ib.* 26705–26713.

Many Protestants in Clonmel prefer National school to Protestant denominational school; *ib.* 26848–26857.

4. *Model Schools. See* MODEL SCHOOLS.

5. *Ordinary Schools.*

Return of number of attendances, and number and per-centage of pupils in attendance in National schools in 1866; *Keenan* 1631–1635.

In 1865 there were in round numbers 100,000 children above thirteen years of age in ordinary schools; *Macdonnell* 657.

The National schools are superior to the elementary schools of other countries, and this superiority may be maintained; *Keenan* 1962–1965. 2026, 2027.

Inferiority of, in South Dublin district; reasons; *O'Carroll* 4382–4392.

Catholic bishops have desired clergy to visit ordinary National schools more frequently; these are conducted on same system, and use same books, &c., as model schools; *Sheridan* 5798–5804.

Desirability of opportunity of teaching Latin and Greek in; *ib.* 5859–5864.

Bad condition of schools in Dublin; causes; *Fitzgerald* 8535–8538.

State of elementary secular education in; *Kavanagh* 10074–10078.

"Abstract of deductions made from the statistical records of the National schools;" *ib.* 10782.

Expenditure for buildings, repairs, and works of model schools and ordinary National schools; *ib.* 10813.

Unfairness of allowing religious services in, as Roman Catholics, from their tenets, cannot then avail themselves of the buildings; *ib.* 10907.

O'Reilly's returns respecting, of most interesting and grave character; their bulk and nature; *ib.* 10936, 10937.

Have become denominational, except in north of Ireland, where the people are mixed as to creeds; *ib.* 11007–11009.

Classics should be taught in; *Berkeley* 11429–11436.

Presbyterian schools on same footing as; *ib.* 11437.

Admixture of religious belief in, more technical than practical; *O'Reilly* 14866.

Points of difference between, and denominational schools; inadvisability of insisting on them, thereby estranging the sympathy of the people from the Government; *ib.* 15002–15004.

In the south of Ireland the schools are *de facto* denominational; *Bp. Keane* 15805–15807.

Religious and secular instruction in, might be improved; *ib.* 15537, 15538.

Number of, and average attendance at, in the diocese of Cloyne; there are not many schools with mixed religious attendance; *ib.* 15535, 15536.

Ordinary National schools are superior to convent schools in arithmetic, grammar, and geography; *Wilson* 16255–16263.

Average payment per head higher than in convent schools, but they are better schools than the latter; *ib.* 16061, 16062. Cost of, has increased since 1856, but not in same ratio as convent schools; *ib.* 16063–16080. 16264–16268.

NATIONAL SCHOOLS—*continued.*

5. *Ordinary Schools*—continued.

Education given in, as good as it could be; two chief defects in; *Mahony* 16985, 16986.

Denominational schools are deserted, if the National schools are better; *ib.* 17192 *et seq.*

Illiterateness of population in proportion to scarcity of; *ib.* 17126–17127.

Are generally attended by different denominations; cases cited, showing that National education has not failed as a united system; these successes are owing to efficiency of teachers and conduct; *ib.* 17128–17130.

Children in, can always be corrected in moral law without distinctive religious teaching; *Ross* 17586.

All belonging to the Non-Subscribing Presbyterians are in connexion with National Board; were built and are maintained by congregations to which attached; *J. S. Porter* 18051–18054.

Refusal of Protestant landlords to allow National schools to be built on their property; *ib.* 18091.

A notion among the people that education in, ought to be free; *Gallagher* 19258.

Number of, in neighbourhood of Drumkeeran is not increasing; *ib.* 19274.

Violent opposition of Presbyterians to; *Kavanagh* 19564–19569. 19571–19583.

Efficiency of; *Bp. of Down and Connor* 19613.

Extent to which religious instruction may be given in, by reference; *ib.* 19689–19695.

Amount of Scripture information elicited at examination of one; *ib.* 19710.

Under present system can suggest no improvement as to management of; *ib.* 19711.

Proposition to empower Boards of Guardians to set up; chaplain of workhouse to give religious instruction; *Atkins* 20755.

As a general rule it is wrong for parents to send their children to mixed National schools; *Forde* 23060–23066.

There is not a National school which is not strictly a non-sectarian school, yet with suitable religious instruction; *Macdonnell* 23716–23718.

Some have the appearance of being denominational, but in these the rules of the Board are complied with; *Newell* 24624–24628.

As a rule National schools are attended by children of all persuasions; in the south and west attendance of Protestants is small because the Protestant element is small; small Protestant minorities partake freely of education in Roman Catholic schools; *ib.* 25011–25020.

Might be conducted in accordance with Church Education Society's time-tables; *Mahony* 25685.

No ordinary schools in Clonmel town; in schools some miles distant children attended who had left Christian Brothers' schools to go there, the education given being better; *O'Hara* 26751–26759.

In Ballina district are small, badly supported, and too numerous; are often taken into connexion with the Board unnecessarily; *ib.* 26818–26833.

Number of Catholic children in, reading Protestant Bible; of schools with Catholics only attending; of schools under Catholic teachers with only few Protestants; of schools attended by Protestants only; of really mixed schools; schools in Dublin are practically denominational; *Card. Cullen* 27045–27048.

Requirements for teaching in, should not be too great; should be adapted to wants of the majority; *ib.* 27150–27152.

Number of, under Roman Catholic patrons; no opportunity to give religious instruction in; *ib.* 27284–27288.

Return of daily attendance of pupils in National schools, 1865; *Kavanagh, page* 409.

Table showing number of children on roll of National schools from 1860 to 1867, and number on roll for last quarter in each year, with the literary classification in per-centages, of the latter; *ib. page* 425.

NATIONAL SCHOOLS—*continued.*

5. *Ordinary Schools*—continued.

Table showing classification of pupils on roll of National schools in each province for last quarter of years 1860 to 1867; *Kavanagh, pages* 426, 427.

Table showing classification by teachers of pupils on roll of National schools at opening, of those admitted, and of those on roll at close of years 1861 to 1865; *ib. page* 427.

Summary results of examination of pupils of National schools by Inspectors, 1858 to 1865; *ib. pages* 428, 429.

Table showing total expenditure, from Parliamentary grant, on works and repairs of schools, ordinary and model, by the National Board, 1831 to 1868; *ib. pages* 436, 437.

Summaries of reports of Inspectors, showing condition of the National school-houses, premises, and playgrounds, 1865; *ib. page* 439.

Expenditure by Board of Works on National schools, &c., 1857 to 1869; *ib. pages* 440, 441.

Table showing average annual cost of National schools from State grant and from local funds, per school and per pupil, 1832 to 1868; *ib. page* 499.

List, according to counties, of National schools in charge of Board of Works for repairs; *Stack, page* 611.

List of National school-houses for which grants have been made, and which are either in course of construction, or the necessary plans not yet issued, but in preparation (by Board of Works); *ib. page* 611.

Schedule of extended grants for ordinary school-houses; *ib. page* 612.

Conditions on which National Board will make grants in aid of building school-houses in poor localities, at a total cost not to exceed £100; *ib. page* 612.

List of National school-houses for which grants were made by the National Board, and notified to Board of Works since July, 1857, and which have been built by or under the direction of the latter; *ib. pages* 612, 613.

Amounts voted by Parliament for building, repair, &c., of National schools, 1865–6 to 1868–9; *ib. page* 613.

Return of National schools in operation in 1862, classified according to creed of patrons, teachers, pupils, and religious instruction imparted; *Kavanagh, page* 839.

"Notice" system; number of notices sent to parents, distinguishing creed of latter; *ib. page* 840.

Analysis, by Provinces, of number of schools, pupils on roll, daily attendance, and amount of grants in salaries, gratuities, &c. from Report of National Board for 1866; *ib. page* 973.

Table of amount, per pupil, in daily average attendance in National schools during 1863, paid in salaries, gratuities, &c.; *ib. page* 974.

Summary, by provinces, showing classification of all the National schools, according to creed of patrons, 1854; *ib. page* 1039.

Similar, and more minute return for 1862, under four categories, viz., joint patrons, joint teachers, joint pupils, and joint religious instruction; *ib. pages* 1039, 1040.

Number, according to denominations, of mixed and unmixed National schools, and of pupils therein, 1867; *ib. page* 1040.

Statement of Rev. R. Beattie, Convoy, of the number of children on the rolls of certain National schools, and the number present on 22nd or 23rd February 1869, according to religious denominations, *App.* XV., *pages* 1303, 1304.

Extracts from Reports of Inspectors for 1866, on the state of the National school-houses in their respective districts, *App.* IX., *page* 1292.

Monks' schools in connexion with the Board. *See* MONASTIC SCHOOLS.

NATIONAL SCHOOLS—*continued.*

6. *Managers. See* MANAGERS AND PATRONS.

7. *Teachers. See* TEACHERS.

8. *Miscellaneous.*

The time-table is examined by Inspector, who may require any alteration; there is no standard; the arrangement of a time-table includes the time of religious instruction; *Macdonnell* 76–80. Not desirable to have an absolute time-table for all Ireland; *ib.* 102–104.

In many mixed schools the Roman Catholic clergy are anxious to have male and female schools exclusively; the sex of the head teacher is left to manager's discretion; the second teacher is expected to be female; *ib.* 326, 327. The Board has no fixed opinion for or against mixed schools; with a small population one good mixed school is preferable to two separate schools; probable reason for the disinclination of clergy in south and west to schools of mixed sexes; *ib.* 367, 368. Reason for the preference of mixed schools in the north; *ib.* 408, 409.

Managers' returns relate to payment of teachers' salaries; they go direct to the office, and are checked by Inspectors' returns as to number of children; *ib.* 567–571.

A report book, accessible to the public, is placed on the desk of the teacher, in which visitors make their observations; *ib.* 622, 623.

Generally throughout Ireland schools are not sufficiently numerous; in some parts there are too many, that is, the number of children might be accommodated in fewer schools; *ib.* 666–669.

Promotion of pupils from class to class in, is made by the schoolmaster; *Keenan* 909, 910.

Model schools are the only schools where Protestant and Roman Catholic clergymen attend to give religious instruction; *ib.* 997–999. Practically none is given to minority of adverse religion to the manager; *ib.* 1018, 1019.

The combination of Roman Catholic and Protestant pupils, and Roman Catholic and Protestant teachers, practically exists only in schools under direct management of the Board; *ib.* 1020–1023.

Schools liable to fluctuations of attendance are allowed a certain degree of grace. Explanation of the "grace" allowance; *ib.* 1075. The question of relative number of teachers and pupils would be brought under notice of the Board by the person who goes through the accounts in the office; *ib.* 1076–1078. 1227–1229.

Mixed schools are increasing, as shown in the report for 1866; *ib.* 1121–1123.

Number and distribution of holidays and vacations, and mode of computing average attendance; *ib.* 1165–1181. 1256–1258. Average attendance for 1866; attendance at inspection generally corresponds with the average; *ib.* 1183–1185.

Difference between the programmes of proficiency for male and female schools; *ib.* 1282. Course of instruction in an ordinary school; *ib.* 1283, 1284. Many managers and teachers consider grammar unnecessary for junior boys and girls; *ib.* 1285. But it would be a serious revolution to exclude so important a study as grammar; *ib.* 1287–1290. 1295. 1316. The Board is responsible for the retention or removal of this subject in teaching junior classes; *ib.* 1291, 1292.

Means adopted to keep a school sufficiently supplied with books; *ib.* 1377.

Considerable objection on the part of the Catholic clergy to vesting schools either in the Board or in trustees nominated by themselves; Presbyterian clergy do not desire grants towards erection of their schools; *ib.* 1405, 1406.

In some parts of Ireland, from hostility to the National system, it is utterly impossible to get sites; *ib.* 1407.

The statutes of the Synod of Thurles forbid the vesting of schools in the Board or in trustees; since

8. *Miscellaneous*—continued.

their passing, the Commissioners have modified the requirements as to vesting; *Keenan* 1420–1424.

Assistance given by Commissioners to new schools in localities where sufficient accommodation already exists, on the principle of modified grants; *ib.* 1511. 1515, 1516. 1546–1551.

Opening of additional schools in many localities has diminished attendance in previously existing schools; *ib.* 1513–1515.

Thirty-five per cent. of the schools have no playgrounds, or bad ones; *ib.* 1586–1589.

Course of instruction in, requires four hours a day five days a week for secular subjects; this is sometimes voluntarily exceeded; course consists of five books; period required to get through the course; *ib.* 1783–1792.

Relative number of schools having under thirty pupils in each school in each of the provinces; *ib.* 1909. Relative proportion between schools having less than thirty pupils each, and the total number of schools in each province; *ib.* 1910. Cause of small number in Munster as compared with Ulster; *ib.* 1911.

Relative proportion of schools under the control of the clergy to those under the laity of the different denominations; reasons and opinions on the subject; *Newell* 2878–2883. 2974–2980. The clergy have not done what was expected of them; the laity are more liberal; *ib.* 2884–2887. 2976.

Little has been done to induce localities to contribute; some parts are so poor that the Commissioners asked for a relaxation of Lord Stanley's circular; local aid could not be insisted on without checking the spread of education; *ib.* 2888–2898. 2971–2973.

A school is sometimes closed from inability of manager to get a master; *Hunter* 3208, 3209.

In some districts schools are unduly numerous; two schools exist where there might have been only one; schools with an average attendance of thirty-five likely to be more efficient than those with a very high attendance; *ib.* 3234, 3235.

As to the introduction of French and Latin into ordinary schools; *ib.* 3488, 3489. 3502–3505.

Mixed attendance does not depend upon a school being vested or non-vested; the people know little about the difference; *ib.* 3604–3607.

The Inspector always visits and reports on a school before it is admitted in connexion with the Board; defective schools are often admitted rather than aid refused altogether; they are kept on the roll in hope of improvement; *ib.* 3684, 3685.

The number of children receiving gratuitous instruction is left generally to managers; managers sometimes take the fees and pay the teachers, sometimes lay out the fees upon the schools; *O'Carroll*, 3997–4000.

School-pence do not form a large item in the South Dublin district; the largest schools are convent schools, where most of the children are admitted free; *ib.* 4001, 4002. About one-fourth of the children in the district attend convent schools; *ib.* 4006. 4023.

Great improvement in reading, writing, and arithmetic in; the improvement in writing largely owing to Mr. Vere Foster's copybooks; the deficiency in writing frequently noticed by the Inspectors; the Board took no active steps in the matter till constrained by Mr. Foster's zealous action; *ib.* 4166–4177.

In the ordinary schools in the South Dublin district there are no children in the Fifth Book, and a very small proportion in the Fourth; *ib* 4378–4381. Ordinary schools in this district are as a rule inferior to those in other districts; reasons; *ib.* 4382–4392.

Extreme poverty of parents makes them indifferent about education; *Sheridan* 4806, 4807.

8. *Miscellaneous*—continued.

Children generally like school, but quickly discover if a teacher be inefficient, and then become irregular; *Sheridan* 4813.

Schools are fully examined at least twice a year, and often visited casually; some few are visited ten or twenty times a year; *ib.* 4814–4822.

Serious defects in convent schools referred to in report; similar defects in other schools, but they were not in question. Defects referred to were chiefly impatience of competition, and inadequate accommodation and teaching power. Now, accommodation is increased, and teaching power is at least equal to other schools; *ib.* 4880–4886.

The great majority of children in all our schools, and in England and America, leave school too early; *ib.* 4887, 4888.

Schools should consist of not less than thirty-five or more than 140 scholars; *ib.* 4914–4916. 4970–4972. 5614.

Children who attend schools aided by State are mostly of the poorer classes; some attend whose parents could pay; any may attend. Poorer classes so predominate it would not be worth while to make a limit; *ib.* 5169–5174. Advantage of teaching children even what they are likely to forget: *ib.* 5180–5185. Danger to State in allowing talented children to remain uncultivated; *ib.* 5857, 5858.

Witness visited 280 some years, and 370 last year; some three times, but others not once; his function was to visit casually here and there; numbers and inspection of schools in southern district; accommodation in school buildings; the larger number are non-vested chiefly on account of the difficulty in procuring sites; *ib.* 5245–5259. Vested schools are usually built according to plans of Board of Works, which are often unsatisfactory, and can only be set aside by vigorous protest. Non-vested school buildings seldom as good as vested; *ib.* 5260–5266.

Boys and girls should have separate rooms, if more than forty; this would add to the expense; *ib.* 5267–5274.

There is no State provision higher than National schools for children of parents who can afford to pay well; the poorer children are benefited by such attending the schools; for advanced children of middle class there are Trinity Colleges, Queen's Colleges, and Maynooth; *ib.* 5567–5569.

Instruction to clever poor children should not be confined to reading, writing, and arithmetic. Several have risen to good positions through education received at National schools; *ib.* 5570–5576.

When Protestant minorities have not children enough to obtain a grant for a separate school they will use the National school; *ib.* 5635, 5636.

Handsome Presbyterian schools in Cork, the gift of a private gentleman; attended by all denominations of Protestants; many go who did not previously attend National schools; *ib.* 5641–5654.

Extra subjects in National schools are drawing, vocal music, and physical sciences; *ib.* 5898.

Training of model school teachers in science; character of books, &c. employed; desirability or otherwise of professing to teach young children science; *ib.* 5899–5923.

Teachers receive instruction in natural history, &c., at Marlborough-street, and in model schools where trained; natural and physical science taught; a bad text book is used, which does not agree with lectures given; *ib.* 5924–5937.

Unpublished portion of Mr. Keenan's report for 1858 [on inadequacy of training department, &c.], with minutes of Board, &c., relative to same; *App.* XVII., *pages* 1311, 1312.

Return of cost of building and repairs of ordinary National and model schools, training establishments, official establishments, &c., for 1856–7; *App.* II., *page* 1278.

NATIONAL SCHOOLS—*continued.*

8. *Miscellaneous*—continued.

Form of existing lease to trustees of National schools, with schedule of rules; *App.* III., *pages* 1278–1281.

See also MIXED SCHOOLS. NATIONAL SYSTEM. RELIGIOUS INSTRUCTION.

NATIONAL SYSTEM:

Has worked well; has spread a large number of schools over the country; and people are anxious to place their schools under the Board, provided its non-sectarian principles are approved; *Macdonnell* 26–32.

The number of children attending the schools is an indication of its success; *Keenan* 1814–1817.

The effect of the system has been to displace schools previously existing, and the want of such schools is now much felt; *ib.* 1850–1856.

The stimulus of, has improved the qualifications of teachers generally; *Hunter* 3220.

There are many checks in, but it is not altogether a system of checks; Chiefs of Inspection overlook all below them; District Inspectors report directly to the Office; *ib.* 3739–3742.

Any National system should give an education that would enable poor talented children to rise above their original condition; *Sheridan* 5187. 5499. 5570–5576. 5859.

Bigotry is perpetuated by the model schools; no advantage to the country in having education in common: the National system is not possible in this country; *Bp. Derrian* 9132–9148. 9198.

Formerly freely used by the Roman Catholic population, who are now opposed to it; *ib.* 9149–9153.

The advantage the country has derived from, is in spite of, not in consequence of, it being a mixed system; the training of the Christian Brothers is in every way more fruitful of better consequences to the country; *ib.* 9204, 9205.

Monitorial scheme of, lately developed; difficulty in procuring suitable persons as monitors; *Kavanagh* 10094–10096.

Insufficient provision for religious instruction under; *ib.* 10097. Catholic clergy are forbidden to visit training and model schools; salaried sectarian chaplains should not be attached to central schools; *ib.* 10097–10099.

The State should confine itself to assisting such religious bodies or voluntary associations as institute training schools; if such a system were adopted in Ireland the State should bear entire cost, but with guarantee that teacher remain in the service; *ib.* 10102–10108. Localities should bear portion of expense; mixed payment should follow mixed management; *ib.* 10109–10111.

A leading defect in present system is unskilfulness of teachers in dealing with lower classes; *ib.* 10112, 10113.

The "wisdom, justice, and impartiality" which formerly characterized it, do not now exist; *ib.* 10219, 10220.

Tolerated by Court of Rome, with conditions; *ib.* 10818. 12283.

Thoroughly denominational, except in Plantation of Ulster; *ib.* 10938, 10939.

Unobjectionable character of books of; *Macdonnell* 11183–11187. 11217–11219. 11224, 11225.

Goes to pieces if denominational schools are upheld; *ib.* 11175–11180. Character and advantages of the system and its books; *ib.* 11183–11187. 11217–11219. 11224, 11225.

By absorbing the education of the people extinguished a number of middle class schools that formerly existed, and more should be established giving a rough classical education; *ib.* 11229–11233. The expense of the system would not be increased thereby, the teachers' incomes would be increased, *ib.* 11136–11138.

To abandon the present and establish a denominational system would be ruinous to the welfare of the country; *Macdonnell* 11339–11341.

Is considered by Presbyterians to be doing good service to elementary education; *Berkeley* 11363–11373.

Approved by the General Assembly and people of the Presbyterians in preference to the denominational system; *ib.* 11528–11533. Effects of its success throughout Ulster; *ib.* 11703.

Catholics consider faith has been broken with them on the subject of; new rules made to meet objections of, but not at their request; Catholics under no circumstances propose to go back to or to accept the old system; Mr. Fortescue's restoration of original rule has not removed their chief practical objection; the Presbyterians disobey it; conversation with Mr. Berkeley on this point; *Kavanagh* 12091–12108.

Origin of, really in 1830; the Roman Catholic bishops were never consulted about it. Lord Stanley's proposition was favourably received by them, who were all willing to accept it as an experiment and improvement; *ib.* 12273–12282.

Opinions, letter, and rules and regulations for schools, of Dr. Doyle to his clergy, on first announcement of, in 1831; *ib.* 12290.

Changes in, at instance of Presbyterians, the cause of the present opposition of Roman Catholics to it; *ib.* 12355–12359.

Dr. Doyle tolerated it, and he and other bishops availed themselves of it as he and they individually thought fit; it was meant to be a combined system, but the Presbyterians frustrated the intention; *ib.* 12466–12501.

The visits of witness to so many schools lately was to see how they were working, with a view either to the complete overthrow of the system, or such a modification of it as Catholics can accept; *ib.* 12618, 12619. System will meet with approval when the work of educating the people is fairly entered on; *ib.* 12625–12627.

Favourable account of, in a paper read before British Association in 1857; public complaint of it by the Commissioners as an unauthorized proceeding; it was one of the things that led to his final disagreement and retirement from Board; *ib.* 12648–12651.

The National system is a decided success; of the total numbers attending model schools, there is 50 per cent. of teachers, and 38 per cent. of pupils Roman Catholics, showing that it is approved of by them; to change this to a denominational system, would be for the State to enforce the authority of the Roman Catholic bishops where they cannot do it themselves; *Lord Oranmore* 13409–13415.

It, or something like it, exists in France, Belgium, Prussia, Austria, Australia, Scotland, and all the colonies; it is called the Irish system, and is probably the only Irish thing ever adopted; *ib.* 13437.

Works well in its details; *ib.* 13471, 13472.

The defect of the National system is the want of books which would not be objected to by some section of the Irish people; books of National Board are much liked, and are good so far as they go; *M'Ivor* 13627–13631. The reason why children do not remain at school is that the National system leads to nothing; *ib.* 13632–13634.

The want of something intermediate between the present National and higher schools has been brought about by the action of the Board; the general education of the country has suffered in consequence; *ib.* 13637–13642. Proposed scheme for remedying the defects of the National system was not adopted; *ib.* 13643–13646. 13659–13661. If the proposed scheme were successful, every decent village in Ireland would have one of the higher schools, the lower schools being made into mixed schools under a female teacher, and organized on the infant system; *ib.* 13647–13658. 13729–13731. 13765, 13766.

NATIONAL SYSTEM—*continued.*

The present National system of non-sectarian education, if not pressed beyond its natural action, should be adhered to; has been remarkably successful; *M'Ivor* 13823–13826.

Wesleyan Methodists are in favour of; its mode of administration is objectionable; *M'Millen* 14452.

Is the best in the world, if administered as at first intended; *ib.* 14590. Is undenominational, but administered denominationally; *ib.* 14593. Mode of administration has a considerable influence on education; *ib.* 14720.

Consideration of principles on which a National system of education ought to be founded, and changes suggested in the present; *O'Reilly* 14883.

Had its rise from the community neglecting its duty with regard to educating the people; *Andrews* 14854, 14855.

Generally satisfactory; *O'Reilly* 14868. Does not possess the sympathy of Roman Catholic priests, though they prefer it to going without education altogether; *ib.* 14920, 14921. Roman Catholics were never consulted on introduction of; they accepted it for want of a better; *ib.* 14926–14929. General opinion of Roman Catholic clergy in favour of; many of the clergy are not opposed to the changes now advocated by the bishops; *ib.* 14952, 14953. Desire of the laity for changes in; *ib.* 14954. Causes of the change of opinion with regard to, of Roman Catholics; *ib.* 15001. Promises of election candidates to procure changes of; *ib.* 15015–15018.

Always opposed by witness; *Warren* 15118. Grounds for opinion that it is a failure; National schools not fair specimens of united education, Church Education schools more so; *ib.* 15177–15188.

Opposition to, somewhat lessening, and Church managers increasing; *ib.* 15205–15207.

The present system is as unsatisfactory as anything can be except to a small section; *ib.* 15364–15368.

No instance of proselytism on either side to be specified under the present system; *ib.* 15372.

Confidence in, disturbed; Lord Stanley's letter the charter of; *Bp. Keane* 15538.

Changes in, as to religious instruction; the system should be so administered as to be unobjectionable in any part of the country; *ib.* 15547. Is in a very unsatisfactory way; reasons for dissatisfaction; *ib.* 15547.

Accepted by Catholic bishops as an experiment; *ib.* 15594.

Has done good for the people, so far as its education goes; *ib.* 15744.

Non-vested plan is preferable to the vested; *ib.* 15793.

On the whole the system is dangerous to faith and morals; *ib.* 15863–15888.

If carried out according to Lord Stanley's letter, is the greatest boon ever conferred on the country; *Wilson* 15937. 15993. 16293. Departure from the system in admitting monks' and nuns' schools, which are essentially denominational; *ib.* 15940.

Parents in the country are generally satisfied with; it is only the extreme sections of both parties who are desirous to uproot it; no duty of the State to pay for a stubborn minority; *ib.* 15995–15998.

Has succeeded in mitigating those sectarian feelings which are the curse of Ireland; *ib.* 16032.

Roman Catholic laity are satisfied with it, and would deplore the introduction of denominational system; *ib.* 16036–16043. Never heard complaints against it from Roman Catholics, lay or clerical; the Catholic laity are still satisfied with it, as are also members of other denominations; *ib.* 16028. 16181–16187.

The present system of mixed education should be carried out, if properly managed; *ib.* 16154, 16155.

Present rules chiefly objectionable on the ground of the advantage they give to convent schools; *ib.* 16156–16165.

Parliament ought to be very slow in introducing

NATIONAL SYSTEM—*continued.*

essential changes into the present system of united education; *Wilson* 16290–16293.

Has had the effect of teaching people mutual forbearance; *Petticrew* 16466–16470. United education is essential to the unity of the people; laity strongly in favour of it; *ib.* 16476–16480.

Under a National system schools should be established within a reasonable distance of children's homes; *ib.* 16482–16485.

As a fundamental principle, secular education should be free and open to all; *ib.* 16485.

Is generally popular, and only opposed by the Roman Catholic bishops; *ib.* 16566 *et seq.* Is calculated to allay sectarian animosity and dissension; instances alleged in proof; *ib.* 16701–16705.

Propositions for modifying the National system submitted by Synod of Ulster, but withdrawn, and others substituted; *ib.* 16825–16827.

Presbyterians are not quite satisfied with the way it is carried out; *ib.* 16829.

Fairly fulfils all the conditions necessary to a system of united education, so that all may use it without sectarian teaching being forced upon anyone; *ib.* 16881–16886. Fundamental principles of, are not changed, though there is a change of details; *ib.* 16887–16904.

Model schools and vested schools originally an essential part of; plan of model schools departed from through pressure from without, and that of vested schools through force of circumstances; *ib.* 16893–16902.

Being now arrived at a state of security, and being better understood, fixed principles should be laid down, acted upon by responsible Commissioners, *ib.* 16903, 16904.

As to modifications of rule regarding time and place for religious instruction; these modifications were no departure from fundamental principle; *ib.* 16936–16950.

No reason to believe the people are dissatisfied with; *ib.* 16951, 16952.

Numbers of children of all denominations receiving instruction in mixed schools previous to establishment of; *Mahony* 17133–17136.

Provides for secular instruction only, leaving religious instruction in the discretion of the manager, but compelling the exclusion of children from adverse religious teaching; if the State took no notice whatever of religious instruction, the minority would lose the protection it at present possesses; *ib.* 17158–17165.

Opinions against, formerly expressed, indorsed; *ib.* 17221, 17222.

The system of National education now in Ireland better than any other; religion originally intended to be taught by; afterwards the non-vested system arose; secular and moral instruction should be given by the State, the patron to look after the religious teaching, which is the best solution of the difficulty; *Ross* 17415–17418. Prevalent feeling of the people is that every public school should be freely open to every child; *ib.* 17424.

The non-vested system gives all the liberty men can fairly demand in a system of State paid education; its advantages; *ib.* 17431–17433.

Religion is not ignored, but committed to special teachers; *ib.* 17434.

The non-vested system a valuable part of; so far as education of poorer classes is concerned the National system is a success; has been fairly carried out by the Commissioners; *ib.* 17436–17439.

Fenianism is not the result of; *ib.* 17446–17449.

In Ireland, might be practically used by Jews; *ib.* 17531, 17532.

The non-vested system is purely a secular system, and the State has no responsibility whatever for religion in the matter; *ib.* 17564.

Early existence of the non-vested system; *ib.* 17589 *et seq.*

As regards teaching religion is negative towards both majorities and minorities; *Ross* 17570–17572.

The system in use in England would not, it is alleged, be submitted to in Ireland, though nothing is asked from Catholic schools but to adopt a conscience clause; *ib.* 17577–17582.

Violent opposition of Presbyterians to; *Kavanagh* 19571–19584.

Though generally approving of, it should be made more secular in order to bring in more masses of the people; suggestions as to carrying out some such plan; *Bp. of Down and Connor* 19696–19706.

Former objection of Established Church clergy to; now it is the Roman Catholic clergy objecting; *ib.* 19652–19654. 19666.

On the whole eminently successful; progress of the country in great degree owing to; is popular with the people; *De Vere* 20154. 20263–20265. 20286–20292. 20296. 20298, 20299.

Has spread a knowledge of English without the Irish language being lost; *ib.* 20155–20160. 20260–20262.

Success of, in improving the education, manners, and morals of the people, and their material prosperity; *ib.* 20176–20182.

Hampered by the difficulty in procuring sites for schools; compulsory power should be given to take sites, with protection to landlords, as in analogous cases; *ib.* 20190–20193.

Should be open to all, and no child of supposed richer people excluded; *ib.* 20218.

Caused a diminution in the number of hedge schools; *ib.* 20285.

Evidence of interest in, shown by landlords visiting their schools, &c.; *ib.* 20352, 20353.

Confidence in, is increasing, and deservedly so; *ib.* 20472–20475.

Confidence in, was shaken on change of rule as to permission of all ministers to come into non-vested schools for the purpose of giving religious instruction; *ib.* 20482–20487.

Suggestion of a modification of, by which the Church Education Society might be enabled to join it; *Bp. of Ossory* 20536, 20537. 20547, 20548. 20556–20558. 20561.

Objection of Church Education people to, that they cannot carry out their religious instruction to the children as they feel bound in conscience to do; *ib.* 20589.

Excellent working of, in Ramelton; *Atkins* 20712, 20713. 20727.

A National system of secular education advocated; *ib.* 20743–20750. A denominational system would eventually work round to the National system; *ib.* 20751–20754.

Natural tendency in the public mind towards the National system, the conscience system; instances in proof; *ib.* 20751–20754.

Suggestions for modification of; Poor Law Guardians to be empowered to set up a National school, the chaplain of the workhouse to give religious instruction; and the grouping of small schools, with a circulating master; *ib.* 20755.

Opinion in favour of continuance of, the State concerning itself only with secular education; *ib.* 20757–20761.

Has not been dragging towards the denominational system; *ib.* 20762.

General dependence on fairness of; *ib.* 20763. Opinion in favour of, is increasing; *ib.* 20765–20767.

Proportion of clergy supporting the National system and Church Education system about equal; *ib.* 20783–20786.

If people were left free to act, education would all resolve itself into the National system; *ib.* 20823.

Witness was always friendly to; is perfectly satisfied with its working; inspection is excellent; produces a great number of well-educated young men; superior to the English system; *Warburton* 20839–20841.

Has never failed with twenty years' experience; cannot fail if carried out fairly and judiciously; *ib.* 20892–20901.

Best means adopted under, for ensuring correctness of returns of attendance; *ib.* 20953.

No direct religious teaching being given under, has produced among the Irish in England a great stratum of insincerity; *Toole* 21212, 21213.

The religious profession being suppressed under, must have an injurious effect upon the teachers; *ib.* 21236–21313.

The English system is as popular among Roman Catholics in England as the National system is in Ireland; *ib.* 21350.

Imperfection of results of, arises from default of attendance, not from defects in the system; *Byrne* 21569. Prevents disunion; *ib.* 21586.

Good effects resulting from, as to intercourse between Catholics and Protestants; *ib.* 21586. 21612–21614.

Mostly in favour in neighbourhood of Cappagh and Omagh; *ib.* 21626.

The present system is practicable and preferable to denominational, notwithstanding desire of Roman Catholics for the latter; *ib.* 21630. 21691–21696. 21707. Preferable to all the modifications that have been proposed; *ib.* 21733, 21734.

Disliked, in all its details and bearings; only favoured because without it there would have been almost no education; might work well if compulsory absence of minorities were enforced; *M'Menamin* 21899–21902.

Not approved of by the Wesleyans, who joined it as being the best extant, and with the hope it might be better; *Tobias* 22744–22747.

Is more denominational than formerly; does not impede free action in schools, but gives advantages to larger churches; the Wesleyans are not represented in; *ib.* 22823–22830.

Opposition of Roman Catholic clergy to; had original intention been carried out, it would have uprooted Catholic religion; was accepted not as an experiment, but as a necessity; *Forde* 23033–23041. 23046. 23160–23162.

At first was of great service to Catholics, being practically denominational; *ib.* 23042. Was unsound from the beginning; *ib.* 23051.

Extensive use of, with co-operation of Catholic hierarchy, for upwards of thirty years; great advance of religious knowledge during that time, the result of religious influences, not altogether the result of the system; *ib.* 23215–23219.

Letter from Roman Catholic Members of Parliament in 1860 showing change of rules, with grounds for assertion; *Kavanagh* 23482, 23483.

At establishment of, much importance was attached to the provision for religious instruction of minorities; the right was never much practised; *ib.* 23484–23487.

Majority of Sunday School Society opposed to; *Pilkington* 23525–23529.

The great majority of Protestants approve of it, and nine-tenths of the Catholic population, as being practically the best system they can obtain; *Macdonnell* 23593–23596. 23746.

Is administered with as great justice as is possible in any human affair; *ib.* 23597, 23598.

Practically the routine of the system is carried on by witness, the secretaries, and chiefs of inspection; *ib.* 23612.

Is in a state of development and growth; rules may be altered to suit circumstances, but not to change the fundamental principle; *ib.* 23629–23631. 23681–23683.

Is opposed by the Roman Catholic hierarchy; but the great majority of the people are satisfied with

NATIONAL SYSTEM—*continued.*

the present system, although they would not oppose their clergy in the matter; *Macdonnell* 23693.

The system of Great Britain not applicable to Ireland; *ib.* 23749, 23750.

Great movement in favour of engrafting classics and languages upon; this could be easily done; the standard of education has not been unduly raised; no partiality is shown to rich or poor; the number of wealthy children attending the schools is very small; *ib.* 23903–23905. 23908.

More favourable opinion of Roman Catholic bishops towards, at the beginning than now; *ib.* 24054, 24055. 24058, 24059.

Institution of, followed inquiry by Royal Commission in 1824; *ib.* 24056.

Remonstrance of Bishop Haly in 1850 against; *ib.* 24060, 24061.

The alterations in, said to be concessions to the Protestants of Ireland, Catholics would be sorry to see withdrawn: *ib.* 24062–24064.

The present, as administered by the Board, ought to be maintained; *ib.* 24069–24076.

Roman Catholic laity think it a great boon to the country, and it should be maintained in its integrity, if the priests could be conciliated to get rid of their unreasonable objections; *Whittle* 24079–24082.

The opposition to, comes from the Catholic bishops and clergy, and some public men identified with them; *ib.* 24083.

Advantage of having the assistance of the clergy in working; the people will take advantage of it, the clergy must therefore co-operate to a certain extent; clergy are not in a position to offer effective opposition; *ib.* 24087.

A great deal of, is practically denominational, but is advantageous in being even theoretically National and beyond the control of the bishops, and under that of the State, *ib.* 24088, 24089.

Better and enlightened tone of sentiment to be traced to; *ib.* 24107.

Was practically accepted by the Roman Catholic Church from about 1830 to 1852; it is more unpopular in being administered by a Government Board, than as a mixed system; *ib.* 24133, 24134.

In early days the National system could only have been carried out by a representative Board; *Longfield* 24180.

Fundamental changes in rules of, are not made without consent of Lord Lieutenant; they are sent to him through the Secretary; *ib.* 24202–24207.

Fundamental principle of, is non-interference with religion; this should be continued; *ib.* 24228–24231.

Fundamental principles of, are few in number, and in most cases easily understood, though not always easily applied; *ib.* 24276, 24277.

The laity on both sides are satisfied with the present system; *ib.* 24350. 24365–24367.

The presence of Archbishop Murray and of Archbishop Whately on the Board showed that the system was not incompatible with both churches; *ib.* 24459–24463.

Is one great conscience clause; in abstract and in practice it is best as it is now; *Newell* 24603. As a rule, managers, including parish priests, approve of it, not merely tolerate it; *ib.* 24856.

Advocacy of, by Mr. Brady, M.P.; *Richardson* 25747–25752. 25764.

Catholic bishops regarded it as an experiment; schools under, are not mixed to any extent; *Card. Cullen* 26598, 26599. 26620, 26621.

System as proposed in Lord Stanley's letter has been abandoned; opening for proselytism by explaining reading books; *ib.* 26600–26602.

There is no positive impediment to the extension of; many Roman Catholics think it a good one, though susceptible of improvement, *O'Hara* 26846, 26847.

Origin of; accepted by Catholic bishops as an experiment; changes in, brought about dissatisfaction; literary and religious instruction under, at beginning; clergy were allowed to give religious instruction, now managers of non-vested schools may exclude it; Christian Brothers' and nuns' schools received grants, now no one in holy orders allowed to teach; *Card. Cullen* 27044, 27045. Useless to return to original project; system might be reformed without difficulty by making schools denominational; *ib.* 27052. Very few Catholics adhere to the system; *ib.* 27078. Has been well tried, and failed, *ib.* 27105.

Hostile to Catholicity; *ib.* 27226.

Circular letter from Bishop Doyle to his clergy upon first announcement of National system, dated December 26, 1831; with rules and regulations for schools in his dioceses; *Kavanagh* 12290.

Memorandum, by Rev. W. Andrews, of suggestions for the improvement of National education; *Andrews* 14851.

Copy of "Scheme for National Education in Ireland," by the Right Hon. R. Warren, M.P.; *Warren* 15121.

See also MIXED EDUCATION. MIXED SCHOOLS. MIXED SYSTEM. NATIONAL SCHOOLS.

NAVIGATION SCHOOLS:

Navigation should be taught in the fishing districts; *Keenan* 1617. There are six regular navigation schools, but they have not been successful; some navigation classes have been conducted with success, especially at Glenariff, co. Antrim; the proper places are the small fishing villages along the coast; *ib.* 1618–1620. 1726–1732. 1739–1742. Those hitherto instituted have been merely branches of model schools; *ib.* 1876.

There is one at the central department in Dublin; *Newell* 24798, 24799.

NEEDLEWORK:

Commissioners require that in every girls' school needlework shall be taught, and all descriptions are taught in the convent schools; *Keenan* 1573–1578.

Rule as to teaching needlework to girls in National schools is now strictly enforced; *Newell* 2605.

Latterly the Board has set a high value on needlework; Inspectors get persons to assist in judging: much more attention paid to needlework than formerly; *O'Carroll* 4115–4122.

Needlework teaching has been improved, but great room for further amendment, especially in rural schools; *Sheridan* 4889–4893. In convent and city National schools needlework is well attended to, but not in rural schools; *ib.* 5544, 5545.

In Church Education schools; *Hamilton* 8123, 8124.

Fairly attended to in female schools; in some of the model schools unnecessarily so; *Fitzgerald* 8368–8371.

NEWCASTLE, DUKE OF:

Reference to his commission in England; *Mahony* 16969–16971.

Commissioners were not refused permission by witness to inspect his schools in Manchester; *Toole* 21403–21413.

NEWELL, WILLIAM HOMAN, Esq., LL.D., one of the Secretaries of the National Board, evidence of, *pages* 106–138. 1098–1126. 1212–1217.

NEWRY MODEL SCHOOL:

Number of pupils on roll and average attendance; cause of diminution; *Fitzgerald* 8305–8307.

NEWS ROOM:

A means of friendly intercourse in Ramelton; in Gorey unsuccessful in that respect; *Atkins* 20713.

NEW TESTAMENT. *See* SCRIPTURES.

NEWTOWN STACKPOOLE SCHOOL:

Was a vested school; is now in the hands of the Christian Brothers; *Newell* 26986–26990.

NIGHT SCHOOLS:

Not many night schools in Ireland; *Macdonnell* 674; *Sheridan* 5144. Number only increasing in large towns; the teacher is generally teacher of the National school; Inspectors are bound to visit night schools; no means of learning their efficiency but by reports of Inspectors; they are of the greatest possible advantage; *Macdonnell* 674–679. 740–742.

For adults, in connexion with Marlborough-street training school; *Joyce* 6479–6484.

In Belfast, conducted by nuns; success and good effects of; *Bp. Dorrian* 8736–8741. Commences about seven, and lasts about two hours; the necessity for night schools is not so great in the country as in Belfast; Presbyterians have girls' night schools, and others, which are taught by seculars; *ib.* 8777–8789.

Several secular night schools in Belfast; *ib.* 8743.

Attendance at, as little influencing the published returns of attendance, &c., at schools generally; *Kavanagh* 10287–10296.

Night schools are a valuable means of keeping up the knowledge obtained in primary school; National Board should give more encouragement to them; at present it only pays £5 a year to the teacher; superior kind of teachers required for them; females not adapted for teachers of night schools; *M'Ivor* 13692–13700. 13740. 13771, 13772. 13776–13780. 13789. 13809, 13810. Should be open five nights a week, and writing be taught; *ib.* 13774, 13775. There is hardly one night school in Ardstraw now; applications for aid refused on the ground of the schools being open for only a few months of the year; it is only in the winter months the big boys and girls come to the schools; *ib.* 13781–13786. Evening schools should form a separate classification; *ib.* 13787, 13788. Dr. Livingstone's experience of the advantages of night schools; *ib.* 13790.

NORTH DUBLIN DISTRICT:

Geographical description of; its head-quarters are at Dublin; except Newry and part of Dublin, is agricultural; schools incidentally visited in, last year; *Fitzgerald* 8290–8297.

NOTICE SYSTEM:

Introduced in 1855; opposed by the Presbyterians; modified on their representations; form of notice; *Kavanagh* 19352–19359.

Operation of rule in its modified form; view of it taken by Head Inspector Keenan; statement by Board of efforts to maintain rule; *ib.* 19360–19362.

Its operation, as shown in the O'Reilly Returns, contrasted with National Board's statements; *ib.* 19360–19364.

NUNS:

Excellent teaching of; night school in Belfast kept by; inadequacy of Government payments to; *Bp. Dorrian* 8736. 8753. 9206–9209.

Should be paid according to results; *ib.* 9180. 9213.

Objection of, to examination for classification; *ib.* 9211–9214.

Excellent conduct of, towards children in school; Presentation nuns educate the poor only, they would not conduct pay schools; have no advantage in respect to monitresses, and get but very small capitation grant; *Kavanagh* 10966–10982.

In English schools are exactly on the same footing as other teachers; *Toole* 21371–21374.

At Letterkenny, ill success of; *M'Menamin* 22157–22178. 22192–22195.

Unfair payment of, generally, by Board; objections of nuns to examination for classification; *ib.* 22179–22191. 22209–22212.

NUNS—*continued.*

If rules of National Board were carried out, nuns should not be allowed to enter schools, being strong "religious emblems;" *Forde* 23102.

Objection of, to oral examination as teachers; no difficulty in principle in the way of an arrangement; *ib.* 23240, 23241.

Have to pass the same examination in England as other teachers; they would go to Liverpool, and during the examination would reside with the Sisters of Notre Dame; if they wished to be examined elsewhere to save a long journey, they would be allowed to go to a Protestant training school; the Inspector in this case would be a Protestant, but that does not much matter, as all papers are sent up to London; nuns, as a principle, do not object to examination; but it cannot be agreeable to them to be examined by a secular; *Allies* 25547–25555. 25652–25660.

In England pass examination as teachers; *Card. Cullen* 27072.

No exception made by Board in favour of; if they teach well they should stand in same position as other teachers; *ib.* 27156–27160.

See also CONVENT SCHOOLS.

NUNS' EVENING SCHOOLS. *See* CONVENT SCHOOLS. NIGHT SCHOOLS.

NUNS' SCHOOLS:

Aided by Kildare-street Society; sparingly attended by non-Catholic children; no tampering with children in; not fit places for Protestant children; *Kavanagh* 10945–10950. As highly spoken of by Protestants as by Catholics; *ib.* 10954.

In every county; amount spent on; withdrawal of, from connexion with Board; best in Ireland for general comfort; no deficiency of requisites; *ib.* 10951–10959.

All sorts of children go to; there is no separation or classification in nuns' schools which are National schools; the children go earlier and remain later than in other schools; *ib.* 10963–10968. 10970–10975.

There are some of intermediate grade, for education of higher classes; *ib.* 10974, 10975.

Number of, in Dublin and Cork; some well, others fairly conducted; the nuns, as a general rule, are efficient teachers; they themselves teach, and they instruct the monitors, who sometimes become the best teachers under the Board; *Sheehy* 26443–26446.

See also CONVENT SCHOOLS.

OATH:

Formerly taken by clergymen to keep a school, referred to a school for teaching English, not a free school; *Bp. of Ossory* 20664, 20665.

OATH OF ALLEGIANCE:

For teachers discontinued in 1843; reason for the discontinuance; *O'Sullivan* 7810–7812.

OBLATES, schools kept by, at Inchicore; *O'Carroll* 4064.

O'CALLAGHAN, Mr. PATRICK, National school teacher, evidence of, *pages* 860–871.

O'CARROLL, FREDERICK, Esq., District Inspector under National Board, evidence of, *pages* 179–193.

OFFICES:

As to state of, at Larne Model School; *J. S. Porter* 18242 *et seq.*

Want of proper, at some schools, a great drawback; *Gallagher* 19197.

O'HARA, THOMAS, Esq., District Inspector under National Board, evidence of, *pages* 1204–1212.

OLDCASTLE MODEL FARM :

Is the only model farm in Ireland unconnected with the Board ; detail of the farming there, and comparison of the results of the small tillage farm, taking Oldcastle on one hand and a large grazing farm on the other ; *Baldwin* 4140–4144. 4678–4689. 4697–4704.

OLDCASTLE SCHOOL :

Satisfactory character of ; type of a perfect National school ; *Kavanagh* 10940–10943.

Report on Oldcastle Endowed schools, by J. W. Kavanagh, Esq., Head Inspector of National schools, dated December 13, 1853. *App.* X., *pages* 1293–1297.

OLD TESTAMENT. *See* SCRIPTURES.

OMAGH MODEL SCHOOL :

Roman Catholic children attending ; Catholic teachers in ; good effects of the National system in neighbourhood ; *Byrne* 21614–21616.

OMAGH TOWN :

Number and character of population ; as to the model school at, and a teacher in it ; *Byrne* 21713–21728. 21749–21753. 21759, 21760.

ORANMORE, RIGHT HON. LORD, patron of National Schools, evidence of, *pages* 564–572.

ORDINARY SCHOOLS. *See* NATIONAL SCHOOLS : 5. *Ordinary Schools.*

O'REILLY, MYLES, Esq., M.P., patron of National schools, evidence of, *pages* 632–653.

O'REILLY'S RETURNS :

References to ; *Hunter* 3316, &c., 3529 ; *Kavanagh* 19511–19514.

Bulk and interesting character of ; *Kavanagh* 10936, 10937.

Difficulty in procuring, and delay in printing and publishing ; mutilation of, but not of much consequence ; disclosures of, adverse to, and effect of them on, Commissioners ; the only complete return respecting the state and nature of religious instruction in Ireland for thirty-seven years ; *ib.* 12109–12112.

Show the complete disregard of Lord Stanley's principle ; *ib.* 12113, 12114.

Effect of publication of, on the practice of religious instruction of minorities ; *ib.* 19365 *et seq.*

Moved for by Major O'Reilly in reply to assertion that the National system afforded sufficient protection to religious minorities ; *ib.* 19548.

Proselytism in National schools proved by ; *ib.* 23457–23460.

ORGANIZATION :

The system of organizing schools by teachers throughout the country is still carried out, though not to a great extent ; it would, if carried out, supplement the work of the Inspectors ; *Macdonnell* 619–626. Organizing masters get £150 a year ; *ib.* 642, 643. Roman Catholic authorities have no objection to them ; *ib.* 644, 645. One object in the appointment of organizing teachers was, that they should give the benefit of *quasi* training to the teachers ; *ib.* 634, 635.

The principle of organizing schools was introduced in 1856, on suggestions made by Inspectors ; is still in operation, but not so extensively as at first ; *Keenan* 1640–1644. Nothing could be more successful than the system. The circular letter issued at the introduction of the system was drawn up by witness ; *ib.* 1645–1647.—[*See also* Appendix to Evidence, No. VI.]

The system of organizing teachers is not carried on to same extent as formerly ; has hardly answered expectations ; it might be made useful and supplement inspection ; *Newell* 2904–2910. Circular for appointment of organizers has not been strictly adhered to ; *ib.* 2912–2914.

OSSORY, LORD BISHOP OF, evidence of ; *pages* 892–906.

O'SULLIVAN, DANIEL, Esq., Assistant Professor at Marlborough-street Training Establishment, evidence of ; *pages* 311–321.

OUGHTERARD :

A convent school at, was taken into connexion with the Board, a vested school being already there, which was afterwards closed ; *Wilson* 16081–16084.

OVENS NATIONAL SCHOOLS :

Circumstances of ; *O'Callaghan* 19747–19752. Assistants and monitors in, difficulty of obtaining ; *ib.* 19777–19783. 20040.

Payment of school-fees in ; number and age of children attending ; no Protestants attending ; *ib.* 19785–19793. 19880–19889. 19912. 19951–19953.

OWEN, JAMES H., Esq., Architect to Board of Works, evidence of ; *pages* 1267–1273.

PADDOCK SCHOOL :

Anxiety of teacher at, to carry out the rule of the Board as to religious instruction ; *Wilson* 15942.

PARENTAL AUTHORITY :

Extent of, in matters of education, as recognised by the Catholic Church ; where the parent adopts a certain course of education, which necessarily implies religious instruction, the authority of the Church steps in ; *Bp. Keane* 15632–15634.

Parents have the right to get their children educated as they please ; if Catholics they must allow their children to be educated by those who alone have the commission from Heaven for that purpose ; *ib.* 15709–15720.

Substitution of parental for pastoral authority was a departure from the original principles of the system ; *ib.* 15777–15804.

Catholic bishops have all along recognised parental right, which is acknowledged by the law of the land ; a partial denominational system would not interfere with parental authority ; *Longfield* 24491. 24496.

As to religious instruction, depends upon the religious principles of parent ; *Card. Cullen* 27166–27168.

Admitted by Catholics to its fullest extent ; not sufficient of itself to protect children from proselytism ; authority of the Church must not be excluded ; may be easily set aside ; little protection for, from guarantees now given by the Board ; *ib.* 27045. 27446–27450.

PARISH PRIEST. *See* PRIESTS.

PARLIAMENT. As to confirmation of rules of National Board by. See NATIONAL EDUCATION, BOARD OF : 6 *Rules.*

PARLIAMENTARY ELECTIONS :

Candidates at, adapt their addresses on education to suit the constituencies ; they would be glad to obtain the approval of Roman Catholic bishops, as they and the priests rule elections in Ireland ; *Wilson* 16198–16204. 16298.

PARLIAMENTARY GRANTS :

Money for the education of upper and middle classes should be voted specially, and not taken out of that intended for the education of the poor ; *O'Reilly* 15041, 15042.

PARLIAMENTARY RETURNS. *See* O'REILLY'S RETURNS.

PAROCHIAL SCHOOLS :

Existed almost everywhere before the introduction of the National Board ; hence many of the National schools in Catholic dioceses are non-vested ; *Bp. Keane* 15638.

PASTORAL AUTHORITY :

Recognised by Lord Stanley and Mr. Cardwell ; *Card. Cullen* 27045.

PASTORAL LETTERS :

Witness declines giving any opinion on extracts from; the bishops must speak for themselves; *Forde* 23029–23032.

Of the Roman Catholic bishops are filled with all sorts of political topics; *Whittle* 24098–24100. 24105.

PATRONS :

Appoint and remove teachers in National schools; decide upon the books to be used; make arrangements for payment of teacher's salary, &c.; *Macdonnell* 23–25. 45. On non-repair of premises by, the teacher's salary is withdrawn; *ib.* 586–588.

The Commissioners or a Government agent should be patrons; *M'Millen* 14596.

Rights of patrons might be secured under a system of superannuation; *Bp. Keane* 15675.

In both vested and non-vested schools were bound to take care that no children were present at adverse religious instruction; *Kavanagh* 19481–19487.

Obligations as to religious instruction on lay patrons not equal to those of clerical patrons; the responsibility must rest on individual views of duty; *Bp. of Ossory* 20642, 20643.

See also MANAGERS.

PAUPERS :

Religious rights of, are well defined by Act of Parliament, a system that might be well adopted with regard to primary schools; *Kavanagh* 19517–19520.

PAYMENT :

Present plan of payment by the State for primary instruction is defective; *Keenan* 1036–1038.

By capitation existed wholly from 1831 to 1839. Payment by capitation in convent schools not grounded on fair principles; *Kavanagh* 12678–12687.

Of teachers by children approved of; allowance made to poorer people, but the children all equally attended to; *Petticrew* 16792–16794.

Payment of teachers' salaries. *See* SALARIES. TEACHERS.

See also ATTENDANCE AT SCHOOL. CONVENT SCHOOLS: 2. *Payments in and to.*

PAYMENT BY RESULTS :

The principle of, is partly acted on, but not to any great extent; *Macdonnell* 547.

Suggestion made in June, 1866, by Government, with respect to; inquiry whether the English rule could be applied to Ireland; *Keenan* 1629–1631.

Payment by results would bring about an improvement in the quality of the attendance; *ib.* 2057, 2058. Different scales for rural and civic schools would tend to embarrass the system; *ib.* 2059, 2076.

Payment by results would stimulate landed proprietors to help the schools more; *ib.* 2098, 2099. The English rate of payment for examinations would be too low for Ireland; *ib.* 2102, 2103.

System proposed would not interfere with model and training schools; *ib.* 2124, 2125.

The co-operation of the managers, combined with care on the part of the Inspectors, would prevent an infant grant being paid twice in respect of the same child; *ib.* 2126–2135. Scheme proposed would remedy many defects in the National system; *ib.* 2159–2169.

Effect of the plan suggested, with regard to classification of teachers; there will be stimulus enough to lead the teachers to continue their studies; *ib.* 2209–2218.

Under plan proposed, will raise the average salary for each pupil; grants for Inspectors' results to be made once a year; for managers' results four times a year; *ib.* 2219–2226. Payment in schools with from 70 to 300 pupils; *ib.* 2230–2240.

PAYMENT BY RESULTS—*continued.*

Under proposed scheme the Inspectors will examine individually about 331,000 children; the examination will be quite as satisfactory as at present; *Keenan* 2260–2268. Work of Inspectors will be largely increased; *ib.* 2276–2282.

The classification at present in force would remain; *ib.* 2272. Possibly a case might occur where a teacher in receipt of £52 a year would receive less under proposed plan, but the teacher now receiving that amount would most likely have charge of a large school, which would be a great advantage; *ib.* 2273–2275.

A paper written by witness in 1861, on, has not been printed; *Newell* 2832–2835.

A large portion of what is now paid is more or less a payment by results; every step of promotion, the supplemental or good service salary, special payments, are all payments by results; the system might be extended with advantage; *Hunter* 3437–3440. The various results should be consolidated, so that the present payments for results might be combined in some more efficient way; the disadvantages attending the capitation grants would be removed by the payment for results, and the teacher receive his classification in addition; *ib.* 3441–3448. The system of payments by results would improve the average attendance and the quality of instruction; *ib.* 3686, 3687.

Witness is in favour of payment by results; *O'Carroll* 4254. Teachers should get something for classification, and for the attendance and attainments of the children; very little deduction should be made from the teachers under the head of classification, because they, except the first-class teachers, are badly paid; *ib.* 4333–4337.

The cure for the deficiency now existing in all classes of learning; *ib.* 4277.

System of, would rectify the evil at present of many schools being attended by few pupils; *Sheridan* 4793. Would correct the too great length of time of children passing from class to class; *ib.* 4901–4903.

Payment by results desirable; it would cause improved teaching, and would get the children into the higher classes more quickly; the standard for England too strict for Ireland, but principle would do, with modifications; *ib.* 4754–4760.

Teachers should be paid partly according to proficiency of children; *ib.* 5121–5123. 5130–5133. Teachers should not be paid for mere regular attendance of children; *ib.* 5289–5291.

If adopted, a plan by which the monitorial system may be untouched should be devised; *ib.* 5124–5128.

Mr. Keenan's paper on, referred to; *ib.* 5129.

If payments by results be adopted, examinations more than once a year desirable; *ib.* 5541. Teachers only should be responsible for results, not monitors; *ib.* 5557.

In secular subjects would enable the Church Education Society's schools to receive aid from the National Board; plan of Bishop of Ossory and the Attorney-General; *Leeper* 6925–6927. 7069–7071; *Warren* 15118–15157.

Opinion in favour of; *Fitzgerald* 8630.

Nuns in convent schools should be paid by; *Bp. Dorrian* 9210–9214. 9180.

In secular schools should be combined with payment by classification; *ib.* 9215, 9216.

Not altogether favoured by Christian Brothers; *Grace* 9698 *et seq.*

Would check migration from school to school; *Kavanagh* 10998.

If established, no age can be fixed on as the maximum for leaving school, in present state of education; *ib.* 11069.

Would remedy the inadequacy of payments to convent schools; *Macdonnell* 11158.

PAYMENT BY RESULTS—*continued.*

Would prevent the undue prominence of classics, if introduced into National schools; *Macdonnell* 11330–11331.

Objectionable, as a general rule; not altogether so; *Berkeley* 11398–11401. 11604–11611. 11685–11697.

Principle of, a remedy for present deficiency of teachers; *Kavanagh* 12433.

Should be the rule, both in agriculture and in literature; *Baldwin* 12996–13010.

Not advocated; prizes should be given as inducements to activity; *Andrews* 14826, 14827.

Payments for results should be the only payments in training schools; *O'Reilly* 15045.

Difficulty in stating grounds for opinion that a system of payment by results, pure and simple, is inapplicable to Ireland; some objections to such system; *ib.* 15068–15075.

Only compatible with compulsory education; *ib.* 15075.

Something should be done for the teacher if on examination the results were satisfactory; results might be ascertained by an annual examination by Government Inspectors, and by occasional examinations by the patrons; *Bp. Keane* 15670–15673.

Has not been a success in England; would not be satisfactory in Ireland; *Wilson*, 16166–16169.

Disadvantages of ordinary system of; likely to fail in Ireland; *Petticrew* 16225–16228.

Some teachers of Church Education Society have received allowances by way of; *Blacker* 16350.

Some system of, might be adopted for primary education without reference to religious matters; *ib.* 16352.

Opinion in favour of; *Mahony* 17016.

Might be applied to convent schools; *ib.* 17116.

Partially advocated; the question does not affect in slightest degree the question of proselytism; *ib.* 17167–17170.

Would be more profitable to the Presentation Brothers; *Townsend* 17351, 17352.

Partially advocated; *Ross* 17444–17446.

Much discussed by teachers; in some respects they are already so paid; if applied to Ireland as it is understood in England it would close five-sixths of the schools; *Macdonough* 17805–17814. A modified system might work in Ireland; *ib.* 17819.

Teachers would not object to a small payment by results in addition to fixed salary now received; *ib.* 17831.

Objected to by teachers as likely to produce a rivalry much to be deprecated; *ib.* 18006.

Increase in teachers' salaries should be made dependent on results; *J. S. Porter* 18073–18075. 18082.

Opposed; it would lead to injurious effects on education by cramming; *Gallagher* 19192–19194.

Not always a fair criterion of the teachers' work; reasons for the opinion; *ib.* 19284–19294.

A modified system of, desirable; *Bp. of Down and Connor* 19619.

Not advisable on account of the necessarily irregular attendance of children; *De Vere* 20212.

Doubtful as to benefit of; *Warburton* 20842.

Would not lead to cramming; schoolmasters are satisfied with the system; *Toole* 21536–21539. 21549. 21560.

Objected to; would operate unequally on the different religious bodies; would not stimulate the masters; *Byrne* 21570, 21571.

So far as the teacher is concerned, desirable; *Forde* 22946.

No objection to, if confined to secular subjects; the schools would be practically denominational; *ib.* 23256–23259.

English system of, somewhat modified, might be beneficially applied in Ireland; cost of plan proposed; Board could administer this system; *Newell* 24584–24594. 24973–24975.

PAYMENT BY RESULTS—*continued.*

Payment by results, with partial salary, leaving religious teaching to the option of managers, would not be advantageous; *Newell* 24595–24598.

Would be useful; exceptions would have to be made; *Card. Cullen* 26616.

Is a matter of economy, and would be of good in most parts of the country; *ib.* 27436–27439.

A system of, modified from that of England desirable; *O'Hara* 26805–26809. 26883–26886.

Mr. Keenan's memorandum on a system of payment for results, drawn up at the request of the Royal Commissioners; *Keenan, pages* 89–96. 590–596.

Heads of a scheme for the future payment of National teachers, by Mr. Newell, one of the Secretaries of the National Board; *Newell, pages* 132–138.

PENAL LAWS:

Compelled Catholics to establish colleges elsewhere than in Ireland; *Bp. Keane* 15638.

Parliament is doing away with; *Card. Cullen* 27410.

Influence of, on education; *ib.* 27230.

PENSIONS:

A system of, better and more economical than the present payment of allowances on retirement; *Hunter* 3596–3601.

To teachers not admissible; teachers are not servants of the State; *O'Reilly* 15021.

Should be paid to teachers by the State as an act of simple justice; *Macdonough* 17790–17792. 17804.

Desired by teachers, but not at cost of rebate from present salaries; *ib.* 17696.

Grant of, an act of simple justice; *ib.* 17960.

For teachers; any plan in similar cases would be adopted by them; *ib.* 17822–17830.

Contingencies on the supposed grant of to teachers; *ib.* 17959–17965.

Should be paid to old teachers by the State; *Gallagher* 19152. 19172, 19173. 19222. 19295–19302.

Amount of retiring allowance for teachers suggested; time at which it should be granted; *O'Callaghan* 19901–19908.

Teachers of model schools entitled to, while ordinary teachers are not, which is a grievance; *ib.* 20069–20073.

PER-CENTAGE:

Relative, of pupils in each class-book in the four provinces and in all Ireland in 1867; *Kavanagh* 10734.

Of numbers on rolls examined in reading; poor results; *ib.* 10751–10755.

Of children attending National schools in the four provinces; *Wilson* 16188–16190. 16319.

Of children of all denominations attending mixed schools; *Mahony* 17129–17132.

Allowed to teachers on sale of books one means of keeping up supply in schools; *ib.* 17257.

See also NATIONAL BOARD. BOOKS. TEACHERS.

PETTICREW, Rev. FRANCIS, Presbyterian minister at Faughanvale, Londonderry, manager of National schools, evidence of; *pages* 719–741.

PHYSICAL SCIENCE:

The teaching of, should be established in connexion with the National Board; voluntary action of many teachers in this direction, with satisfactory results; need not interfere with primary education; *Hunter* 3506–3525.

Deficient state of apparatus used for teaching in Marlborough-street schools; *Butler* 5998 *et seq.* 6227–6229. 6312. Want of information as to supply or state of; *ib.* 6341–6351.

Teaching of natural philosophy and physical science at Marlborough-street, by Dr. Clarke and witness; *ib.* 6262–6286. Error in Parliamentary Return as

PHYSICAL SCIENCE—*continued.*

to revision of manuals of natural philosophy by witness; *Butler* 6296–6301. 6445–6449. Having seen that return he revised the arithmetics; nothing more was done with them; *ib.* 6450–6453.

Mr. M'Gauley's book on, does not represent the present condition of science; *ib.* 6358–6359.

Not necessary, and should not be taught as a *sine quâ non*, even for first-class teachers; *ib.* 6357.

Introduction of, into model schools, by witness and Dr. Clarke; defects of books used in teaching; *Kavanagh* 12392–12397.

Few lectures at Marlborough-street in connexion with; a collection of philosophical instruments there; projected museum to illustrate the lesson books came to nothing; *Sheehy* 26491–26500.

PILKINGTON, HENRY MULOCK, Esq., Q.C., Honorary Secretary of Sunday School Society for Ireland, evidence of; *pages* 1042–1046.

PIUS IX., POPE:

Evils of mixed system pointed out by; *Card. Cullen* 26633.

PLANS:

Used by Board of Works are thirty years old; better are made, but are not used; *Stack* 14154–14158. 14161–14164.

PLANTATION, NEW, OF ULSTER. *See* IRISH SOCIETY OF LONDON.

PLAYGROUNDS:

Deficiency of National schools with respect to; *Keenan* 1586–1589.

POOR LAW:

The only fair provision as regards religious instruction; every rate-payer's child should have at least the same protection as that afforded to paupers, &c.; *Kavanagh* 19376–19378.

As to meaning of enactment regarding children in workhouse schools; *ib.* 19419–19426.

Gives full security against any child being taught a religion differing from that of his parent, &c.; rules of the National Board are loosely worded in comparison with; *ib.* 23436–23446.

POOR LAW COMMISSIONERS:

Danger of a bureaucratic spirit prevailing among; are a very respectable body; steps retaken by; *Longfield* 24281–24284.

POOR LAW GUARDIANS:

Proposition to empower, to set up a National school; the chaplain of the workhouse to give religious instruction; *Atkins* 20755.

PORTADOWN:

Presence of witness in school at, during time of religious instruction; *Kavanagh* 22652–22658.

PORTER, Rev. JAMES, Presbyterian Minister (General Assembly), Kilkenny, evidence of; *pages* 812–818.

PORTER, Rev. JOHN SCOTT, Theological Professor, Non-Subscribing Presbyterian Church, evidence of; *pages* 789–800.

PREMIUMS:

Are only given to pupils in model schools; *Sheridan* 5389.

PRESBYTERIANS:

As a body, never had any vested schools in Ireland, and never came into communication with the Commissioners on the subject; *Kavanagh* 10360–10370.

Opposition of, to vested schools from the beginning; *ib.* 10826–10832.

As to use by, of non-vested schools, for religious worship; *ib.* 10912–10924.

PRESBYTERIANS—*continued.*

Consider the National system is doing good service to elementary education; *Berkeley* 11363–11373.

General Assembly and people have expressed approval of the National system, in preference to the denominational; *ib.* 11528–11533.

The Presbyterian Committee object to the Board's new rule, as interfering with the parent's right of directing his child's religious instruction; *ib.* 11448–11457. 11540–11556.

Satisfaction of Assembly at the non-carrying out of changes proposed in Mr. Fortescue's letter; *ib.* 11562–11573.

Assembly disapprove of establishment of local model schools; *ib.* 11574–11587.

Reasons of, for receiving aid from the National Board in 1840; *ib.* 11647–11656.

Reasons of, for declining to vest their schools; *ib.* 11667–11682.

In Scotland are in favour of united education; *ib.* 11683, 11684.

Anxious to reintroduce former facilities into National schools; *ib.* 11703–11714.

Object to the right of clergymen of other denominations visiting their schools to impart religious instruction; *ib.* 11756–11764.

Proportion of vested schools under, prior to 1840; *ib.* 11765–11768.

Proposed system of education by Synod of Ulster; *ib.* 11769.

Increase of Presbyterian schools of late; *ib.* 11773–11779.

Resolution of Assembly recommending faithful observance of rules of Board, quoted; *ib.* 13912 *et seq.*

Employed Roman Catholic teachers as decoy ducks, and for the purposes of proselytising; *Kavanagh* 12561–12574.

Explanation of conversation with Mr. Berkeley, as to practice of Presbyterians in regard to the exclusion of children during religious instruction; and the open violation of the notice system by; *ib.* 13918–13951.

Many congregations of, without schools under their own management; have no objection to good schools under any management; Roman Catholic teachers employed by; *Petticrew* 16557–16552.

Religious instruction of, by Roman Catholic schoolmaster; *ib.* 16679–16685.

As to attendance of four Presbyterian children in Roman Catholic school at Craigbrack; *ib.* 16733 *et seq.*

Alterations in Board's rules not made to suit, as such; non-vested schools of, in connexion with the Board previous to 1840; *ib.* 16795–16804.

Are satisfied with fundamental rules of National system; they receive no more advantages than others; no fundamental change was made to suit them; misapprehensions were cleared away in 1840; *ib.* 16816–16821. 16828.

Propositions submitted by Synod of Ulster and withdrawn; *ib.* 16825–16827.

Are not quite satisfied with the way the National system is carried out; *ib.* 16829.

Schools are used for prayer and preaching, but full religious worship is excluded; if the rule were violated, it would be soon found out and reported; *ib.* 16832–16840.

Generally build their own schools, which are non-vested, denomination desiring to have them under its own control and management; supply schools where needed as fast as they can; *ib.* 16847–16850.

Modifications of Board's rules said to be made at instance of; no real concession ever made to; *ib.* 16912 *et seq.* 16954.

Dr. Cooke not an exponent of the views of; *ib.* 16953.

Presbyterian children receiving religious instruction from Roman Catholic teachers without blame; *ib.* 16964.

PRESBYTERIANS—*continued.*

The concession made to, was made because it was right; the change commended the Board to the Catholic body more than anything else; *Ross* 17516–17520.

The National schools of the Non-Subscribing Presbyterians are in connexion with the National Board; were built and are maintained by congregations to which attached; *J. S. Porter* 18051–18054.

The Non-Subscribing Presbyterian Church contains forty-one congregations; *ib.* 18050. The body is favourable to united education, but the National system is drifting into denominationalism, therefore the body is opposed to it; *ib.* 18057.

Teachers in schools of Non-Subscribing Presbyterians are of various denominations; but, *cæteris paribus*, those of same way of thinking preferred; *ib.* 18061. Some teachers remain long in the service; difficulties occasionally in filling vacancies; *ib.* 18065–18067.

Presbyterians of different opinions attending a Non-Subscribing Presbyterian school; *ib.* 18105.

Were informed, when they joined the Board in 1840, that no change was made in the rule regarding religious instruction, and that observance of it was essential; *Kavanagh* 19414–19418.

Distinction drawn by, between active and passive toleration, is a distinction without a difference; *ib.* 19503, 19504.

Difference of opinion entertained as to signification of rules of National Board, by leaders of, and the framers of the rules; objections of, as a body, to rules; some points conceded to, in 1840, coupled with restrictions; *ib.* 19540–19549.

That a change was made in the rules to please the Presbyterians, is proved by their joining the Board after so much hostility; *ib.* 19549–19563.

Violent conduct of, in opposition to the National system and schools; *ib.* 19564–19569. 19571–19583.

If non-vested system was not introduced to please them, it was the occasion on which they joined the National Board; *Atkins* 20797. 20813–20817.

Are joining the Board more numerously than they did, and getting up schools under their own management, making the system more denominational; *M'Menamin* 21903. 21909. 21988. "Denunciation" of Roman Catholics by, for advocating denominational schools; *ib.* 21909. 22071–22078.

Schools and population of, in Stranorlar, Letterkenny, Raphoe, and Convoy; *ib.* 21986–22062.

Practice of, in giving religious instruction, described in suppressed portion of Mr. Keenan's report, now quoted; *Kavanagh* 12160.

In the north use the ordinary National school books in their schools, for imparting religious instruction, to the children, without regard to their denomination; *ib.* 12293–12302.

Condemnation by, in 1832, of the projected National system; first change of rules of National Board at instance of, in 1837; second change, as to use of school-house for preaching in; third change in 1840, by which the rule was withdrawn that patrons should provide a place for convenient religious instruction of children by their own pastors; the fourth in 1847, when the obligation was withdrawn of the exclusion by patrons of children from religious instruction not desired by parents; *ib.* 12313–12337.

An isolated and compact body, in the north of Ireland; have kept the education system completely in their hands; the changes wrought in the system at their instance are the cause of the present opposition of Roman Catholics to it; *ib.* 12355–12358.

Examination of Dr. Cooke by Committee of House of Commons, as to non-recognition of Roman Catholic priests otherwise than as members of the public in visiting their schools; *ib.* 12338–12346.

PRESBYTERIANS—*continued.*

Concessions made to at different times, to conciliate them; *Kavanagh* 12347–12349.

Predominance of, in the constitution of the Board; *ib.* 12360–12363.

Frustrated the intention of making the combined National Board a representative Board; *ib.* 12479, 12480.

Dissidence of, from the projected system of National Education; evidence of Dr. Cooke quoted; *ib.* 12496. 12522–12525.

Main seat of proselytising is the Presbyterian patch of Ireland; *ib.* 12671.

No changes in the rules of the Board appear to have been made to please the Synod of Ulster; *M'Millen* 14728–14737.

Applied to the National Board in 1840 to admit their schools; *Bp. Keane* 15538.

Changes in the National system do not appear to have been owing to application of the Presbyterians; *ib.* 15830.

Never had any special favour shown to them; the line of action of the Commissioners was always the same, as regards non-vested schools, to any body; *Wilson* 16096–16103.

Further discussion as to the time they joined the National Board, and their understanding of the rule as to withdrawal of children from religious instruction; *Kavanagh* 23358–23382 *et passim.*

Joined the National Board in 1840; reasons for the alteration of rule in respect to them; *Macdonnell* 23722, 23723. 23728–23731.

Increasing number of protests by Presbyterian Commissioners; *ib.* 23980, 23981.

The present representative of, on the National Board, is Dr. Morell; his expenses are paid; *ib.* 23945–23947.

Changes made by the Board have been distasteful to; the change objected to did not affect one Presbyterian child; *Longfield* 24198–24200. 24207.

PRESBYTERIAN SCHOOLS:

No exemption of Presbyterians from the Commissioners' rules; no practical difference in working of schools of both classes; Presbyterian schools may or may not open with prayer; it is a thing never considered necessary for inquiry; *Hunter* 3289–3297.

Many Catholic children at school under Presbyterian management, but very few partakers of the religious instruction; the superior character of master or mistress attracts children irrespective of denomination; *ib.* 3298–3303.

The "O'Reilly returns" state a considerable number of Catholic children to be receiving religious instruction in Presbyterian schools; but 1 in 900 is a very small per-centage, and the rule would not be broken if the parents of the children consented to the reading of the Scriptures; *ib.* 3315–3227.

Presbyterian managers and teachers feel themselves bound by the rule preventing any allusion to the Scriptures in the course of general instruction, but consider themselves at liberty to refer to the Ten Commandments and the General Lesson; *ib.* 3304–3309.

It is not possible that Roman Catholic children would go to a Presbyterian school with an average well-conducted Catholic school in the neighbourhood, and *vice versâ*. Catholics have been found in Presbyterian schools, and it is presumed they had some reason for the preference; *ib.* 3337–3346. 3529.

A few instances have been heard of the anxiety of landlords to bring children into their schools; *ib.* 3347.

Schools of Trinity Presbyterian Church, Cork; origin, &c., of; *Sheridan* 5641–5654.

Presbyterian schools are on same footing as other National schools; no concession of principle made by National Board to Synod of Ulster; *Berkeley* 11437–11447.

PRESBYTERIAN SCHOOLS—*continued.*

Children in, have full liberty of absence from religious instruction; *Berkeley* 11557–11561.

Establishment of Presbyterian model school; first vested school was probably Presbyterian; *Kavanagh* 12526–12539.

There are now only sixty-eight vested Presbyterian schools in Ireland, and Presbyterians are eleven per cent. of pupils in schools; *ib.* 12540–12560.

Alleged means of proselytism at King's Inns-street Presbyterian National schools; *ib.* 10889

As to Roman Catholic priests giving religious instruction in; *Petticrew* 16754–16756.

Roman Catholic teachers in; *ib.* 16773. As a rule Presbyterian teachers should be placed in; *ib.* 16775–16777.

Roman Catholic children in, get their religious instruction elsewhere; *ib.* 16778, 16779. Such are the schools that should be subsidized by the State; *ib.* 16782.

Infringement of rule at Nelson-street school; no religious certificate book there; one Catholic and three Protestant dissenters receive adverse religious instruction; *Kavanagh* 22470–22507.

Infringement of rule at Portadown, by two Catholic children being suffered to remain in school-room and move about while Protestant religious instruction was going on; *ib.* 22294–22317.

Violation of rule at Queen-street school, Lurgan, in that parents are "canvassed" to sign certificate-book; three Catholic children present during religious instruction; school formerly a ragged school; food, &c., given to Catholics to induce them to falsify their religion; *ib.* 22318–22407.

PRESENTATION NUNS. *See* CONVENT SCHOOLS. RELIGIOUS ORDERS.

PRESENTATION ORDER OF BROTHERS:

Associated for charitable instruction of poor boys, since 1803; always engaged in education; have five schools, three in Cork, two in Kerry; are subject to ordinary of diocese; fourteen of the brethren are engaged in teaching in these schools; are paid by capitation; use the Board's books, the new editions of which are much improved; there is no objection to the religious element in them; *Townsend* 17272–17281. 17286. 17304–17307.

Have no objection to the National Board, which has been of advantage in educating the poor by means of its cheap stationery; *ib.* 17308.

Monitors employed by, raised up in the Brothers' own schools; their after success; *ib.* 17309–17310.

Books used by, are the National Board's, which are well adapted for elementary instruction; the new editions are very much improved; the religious element contained in them is unobjectionable; *ib.* 17304–17307.

Schools of, in connexion with the Board, conform strictly to rules; distinction made in, between secular and religious instruction; the latter is too solemn to mix up with common things; new schools cannot be established under the Board's new rules against religious orders; *ib.* 17289-17303. Circumstances of schools of, in Cork; *ib.* 17312–17332.

Number of pupils of, in Cork; difference between the Brothers and National Board concerning capitation fee; *ib.* 17294. 17322, 17323. 17335–17346.

General harmonious relations with Inspectors; *ib.* 17311.

Charge no school-fees; cannot take any without bishop's sanction; all money taken must be applied to schools; *ib.* 17347, 17348.

Would object to examination for classification; *ib.* 17349.

If paid by results would receive three times as much as they now do; *ib.* 17352.

Schools of, at Killarney, under National Board; number of children in; Protestants in; rules as to religious instruction faithfully kept; cost, dimensions, and accommodation of schools at Killarney; *Gaynor* 17353–17367. 17404–17407.

PRESENTATION ORDER OF BROTHERS—*continued.*

Complaint of the grant made to, by National Board, and of rule excluding clergymen and members of religious orders from being teachers in National schools; *ib.* 17376–17379. 17392.

Brothers would not submit to examination for classification; ought to be paid by results, and be exceptionally and considerately treated; *ib.* 17381–17390.

No limit of age for pupils in schools of; after pursuits of pupils; *ib.* 17399–17402.

PRIESTS:

Should be educated as to school matters; *Toole* 21479, 21480.

As to veto of parish priest on appointment of school teacher; *O'Reilly* 15065–15067.

PRIMARY EDUCATION:

Aspect in which it should be regarded; advantages of educating rich and poor together; *Ross* 17462, 17463.

Should not be at the sole cost of the Consolidated Fund, but supported partly by local subscriptions and by school fees; *De Vere* 20355. 20357.

No fear of, in Ireland, falling into the hands of female teachers; *ib.* 20366, 20367.

See also NATIONAL SYSTEM.

PRIMITIVE METHODISTS:

Adhere to the Established Church; *M'Millen* 14482.

PRINTING:

Board contracts for printing books; the contract is practically something of a monopoly; *Keenan* 1272–1277.

See also NATIONAL EDUCATION, BOARD OF: 5. *Office Books, and Printing and Binding.* THOM, Mr.

PRIVATE SCHOOL:

Instance of effectual non-interference with religious opinions in; *Bp. Dorrian* 9128–9131.

PRIVATE ADVENTURE SCHOOLS:

Difficulty in obtaining statistics of private adventure schools; in many parts they are numerous; the school is generally that of a dismissed National teacher, or old man or woman; *Keenan* 1414, 1415.

Large number of adventure schools in Cork for children, which the National system does not reach; *Sheridan* 5148–5151.

See also HEDGE SCHOOLS.

PRIVY COUNCIL:
PRIVY COUNCIL SYSTEM:

The system efficient as far as it goes, but does not reach the lowest stratum; should extend means of providing schools in certain localities, and admit teachers of lower grade; *Toole* 21299–21302. Has not extended into many poor parishes; *ib.* 21352.

Teachers from training schools under, highly satisfactory; *ib.* 21303–21306.

Requirements of Privy Council as to age of children for examination, and cubical contents of school-rooms; *ib.* 21388–21390.

Conditions on which building grants are made by Privy Council; *ib.* 21464–21468.

Privy Council look only to managers; take no notice of teachers beyond requiring them to be certificated; *ib.* 21840–21844.

Arrangements made by Privy Council Committee of Education for admission of Catholic schools in England; does not make building grants to monastic or convent schools as such; *Allies* 25325, 25326. 25330–25332.

Examination questions in history for normal schools issued by Privy Council; *ib.* 25440–25447.

PRIVY COUNCIL :—
PRIVY COUNCIL SYSTEM :— } *continued.*

Rule restricting area within which contributions are to be raised to obtain building grants acts very unfairly on Catholics; small amount of building grants to Catholics; causes preventing applications for aid; amount now given to small schools is not worth applying for. Extent of annual aid given towards carrying on Catholic schools; *Allies* 25579–25591.

Grants earned by schools go to managers, who are responsible for the money received; *ib.* 25592–25597.

There are 645 aided Catholic schools and a considerable number unaided; reasons for so many unaided schools; *ib.* 25598, 25599.

The restriction of the Privy Council as to certificated teachers is essential; the Council treat religious teachers with perfect fairness; *ib.* 25600–25603.

Inspection under, is denominational, and is confined to secular subjects; *ib.* 25556–25559.

There is no Catholic at the Privy Council but the Inspectors who can give any information peculiarly relating to the Catholic body; *ib.* 25622–25624.

PRIZES :

Obtained by boys educated in Church Education schools; *Blacker* 16350–16356.

PROBATIONERS :

Are persons recently entered the service, and not classed; after appointment as teachers they are examined by the Inspectors, and receive pay and are classified according to fitness; the number is very large; *Macdonnell* 257–266. As a rule third-class teachers have come in as probationers; no person can enter the service until he is eighteen; very few are over thirty at entering; *ib.* 268–270.

Probationers, if found unfit for class at expiration of first year, must remove from the service; instances of them being kept on for two years or longer; out of 6,095 principal teachers on 31st December, 1867, 562 were probationers; they seldom fail more than once, the rule being generally applied; *Hunter* 3626–3630. There was always a reason, generally legitimate, assigned for the retention of probationers more than a year, contrary to rule; *ib.* 3696–3705.

No probationers in the status of principal teachers in the South Dublin district; some assistant probationers have been allowed to continue in their schools, although not succeeding in getting classed; *O'Carroll* 3991–3994.

Should only be employed as assistants; various descriptions of; some are equal to second-class teachers. They do not answer very well; are strictly dealt with; *Sheridan* 5021–5026. As soon as practicable after appointment are examined by District Inspector, and if certified efficient, receive payment from time of appointment; *ib.* 5027–5037. 5109. 5358–5363.

PROGRAMME :

As to preparation of programmes of business for meetings of National Board; *Macdonnell* 23963–23968.

Subjects are not misdescribed in programmes for the Board; as a rule Board takes the subjects in the order of the programme; *Newell* 25169–25188.

Programmes for examination of teachers, by whom and how drawn; *ib.* 25262–25273.

PROHIBITION OF ROMAN CATHOLIC BISHOPS :

In force at Cork Model school, and not at Dunmanway; *Sheridan* 5881–5890.

The prohibition of the bishops has been applied to all schools not under Catholic management, and to model schools particularly; it has taken effect only in proportion as schools have been opened to which Catholic children could go; *Bp. Dorrian* 8900–8903. A school is considered to be wanted if there is only one under Protestant management in the neighbourhood; *ib.* 8907.

See also ROMAN CATHOLIC BISHOPS AND CLERGY.

PROMOTION OF TEACHERS. *See* TEACHERS. PUPIL TEACHERS.

PROSELYTISM :

A few complaints of proselytising in schools have come before the Board, but the charges were not established; the complaints did not come exclusively from one religious body; *Kelly* 3074–3076. 3096–3098.

Case of proselytising, recently investigated, in which Board will probably refuse further aid to school; *Sheridan* 5164–5168.

By means of food and clothes in schools in South Dublin District; *O'Carroll* 4397–4400.

Belief of Roman Catholic bishops in the tendency of the National Board to a system of; *Bp. Dorrian* 9191, 9192.

The Board does not show any disposition to encourage proselytism, but from the constitution of the Board and the working of the system, it will prevail; if the present rules as to religious teaching were relaxed, and any school was detected in proselytising, it would be sufficiently punished by a stoppage of its pay; *ib.* 9261, 9262.

Care taken to prevent suspicion of, in Christian Brothers' schools; *Grace* 9305–9311.

No attempt at, by unfair means, in Church Education schools; *Kavanagh* 10889.

Gross attempt at, in King's Inns-street National Presbyterian school, under Dr. Hall, a National school Commissioner, the "active patron of an obnoxious scheme, of which that school was the public symbol and centre;" *ib.* 10889–10906.

Proselytising practices, that is, children attending instruction in a religion different from their own, carried on in thousands of instances; O'Reilly's return as to; exceptional cases where Roman Catholic parents permit their children to read Authorized Version; but the Church forbids it; *ib.* 11037 *et seq.*

Cases of change of creed known, but it is not known if produced by; *ib.* 12196–12204.

Protection of, by the change in the Board's rules in 1847, subverting the principle of Lord Stanley's letter; advantage taken of the change by the Presbyterians; *ib.* 12335–12337.

Explanation of evidence given in 1854 as to, and other matters; *ib.* 12435–12455.

Readiness of Presbyterians to employ Roman Catholic teachers was for purposes of proselytizing; both Episcopalians and Presbyterians used them for such, some of them unconsciously and some being very poor; *ib.* 12561–12574.

No instance known of, in model schools in the south; *ib.* 12669. Main seat of, is the Presbyterian patch, *ib.* 12671.

No case of, ever attempted in Erasmus Smith's schools; *Thorp* 12715–12719.

A general attempt to induce Roman Catholic children to change their convictions would be impossible; *O'Reilly* 15089. Mr. Kelly's evidence, and Judge O'Hagan's explanation, concerning; cases cited justifying the assertion that there is proselytism in schools; *ib.* 15090. 15108–15116.

What is meant by; *ib.* 15090. 15108–15116.

Not much going on in National schools; but it is because Catholics have schools and teachers of their own, which is the only complete surety; *ib.* 15093.

Duty of State to enforce prohibition of, on ground of securing the freedom of the individual; *ib.* 15106, 15107.

No instance of, on either side, under the present system, to be specified; *Warren* 15372.

No complaint as to laxity in enforcing rules of the Board in diocese of Ross or Cloyne; *Bp. Keane* 15560.

Mr. Keenan reported that thousands of Catholic children were receiving religious instruction from ministers not of their own faith; *ib.* 15886, 15887.

PROSELYTISM—*continued.*

No instance of direct attempts at proselytism known in Church Education schools; *Blacker* 16390, 16391.

No attempt at, and no indication of, in Church Education Society's schools; the Word of God is left to do its own work; *ib.* 16433–16437.

An inevitable consequence of State assisting in any way denominational schools; *Mahony* 17143–17147. 17155.

Cause of the breaking up of Kildare-place system; *ib.* 17146.

The main object of some schools; *ib.* 17148.

Present rule of National Board sufficient safeguard against; *ib.* 17156.

Is not affected in any degree by the question of payment by results, *ib.* 17167–17170.

Would be the inevitable result of a restricted denominational system; *ib.* 17171–17173. And of a strictly secular system; *ib.* 17174-17181.

No open case of, known in Roman Catholic or Church Education schools, in witness's experience; *ib.* 17186–17191.

Witness's definition of; *ib.* 17207–17209. 17215.

Effect of the O'Reilly returns in exposing the action of; *Kavanagh* 19365.

No attempt ever made at, in National schools under witness's management; instance to the contrary; *De Vere* 20147–20153.

Imputations of, in the North of Ireland; *ib.* 20471.

Rules of Board leave opening for; teachers would not interfere if left alone, they would rather be relieved from onus of religious instruction; *M'Menamin* 21907–21909.

Of the various means taken by the Board to prevent proselytizing, the last rule preferred; *Forde* 23202.

The O'Reilly returns prove the existence of, in National schools; *Kavanagh* 23456. The new rule passed in consequence of these returns frustrated by the addition of a proviso, at the instance of the Presbyterians; *ib.* 23457–23460.

No instance of, in any child from Bessbrook school; *Richardson* 25741.

Complaints of, at Belfast Academic Institute; *Card. Cullen* 26633.

No instance of, can be alleged in some schools, named, wherein sacraments have been refused to teachers and children, the schools being under Protestant management; *O'Hara* 26705–26713.

Mixed schools preferred, if sufficient safeguards against, be furnished; Board's rules, if fairly carried out, would be sufficient; *Sheehy* 26554–26568.

Irish Catholics have never been charged with; not to be dreaded, if exercised without violence, &c.; *Card. Cullen* 26653–26656.

Testimony of Protestant managers and clergy that there is no protection from; *ib.* 27045.

Mere parental authority not sufficient to protect children from; *ib.* 27045.

Different degrees of; *ib.* 27268.

Meaning of "unlawful means;" *ib.* 27135, 27136.

PROTESTANTS:

Small Protestant minorities partake freely of education in Roman Catholic schools; very little provision for education of humbler classes of, beyond the National schools; *Newell* 25013–25015.

In England not so bigoted as in Ireland; *Card. Cullen* 27265.

See also MINORITIES.

PROTESTANT SCHOOLS:

Roman Catholic children attending, in Manchester; *Toole* 21200. 21208. In opposition to wish and will of witness; *ib.* 21209–21212.

PROTESTANT CHARTER SCHOOLS:

Schools of Incorporated Society formerly so called; *Hackett* 25793. Disadvantages of, as compared with present boarding schools; *ib.* 25888–25894. Origin, constitution, working, effects, &c., of society; *Hackett* 25793.

See INCORPORATED SOCIETY.

PROTESTS OF MEMBERS OF NATIONAL BOARD, 1861–1868; *Kelly, pages* 139, 140.

Explanation of increasing number of protests by Presbyterian Commissioners; *Macdonnell* 23980, 23981.

PRUSSIA:
PRUSSIAN SYSTEM:

Opinion of Baron Von Holzendorff that education in Ireland is superior to that in Prussia; *Fitzgerald* 8573.

Might be applied in Ireland, but only to schools supported by rate; in Prussia the schoolmaster is a state officer, and may be pensioned; *O'Reilly* 15046–15048.

Prussian system is denominational; *Bp. Keane* 15604.

Appointment and dismissal of masters in Prussia rests with the lay body; *ib.* 15606.

The practice in Prussia, with respect to religious instruction to majorities and minorities; *Toole* 21428. 21477.

The Prussian system, viz., a small board, with the priest at its head, would not work well in Ireland; it would, as a rule, fall into the hands of the parish priest; *Forde* 23203–23206.

The results of a system similar to that of Prussia, would not be altogether beneficial, either to the school or to religion; *ib.* 23247.

Provision for protection of minorities in Prussia; *Card. Cullen* 26591.

Denominational system established and rigidly carried out in Prussia; *ib.* 26630. 26670–26672.

PUBLIC WORSHIP. *See* DIVINE WORSHIP. RELIGIOUS WORSHIP.

PUNISHMENT FOR MISCONDUCT:

In Marlborough-street training department, serious cases are reported to the Board; *Rintoul* 26057, 26058.

See also CORPORAL PUNISHMENT.

PUPIL TEACHERS:

Method of payments to, in model schools, through the Inspectors; losses in consequence of the system; *Claridge* 3856–3861.

No rule regulating the total attendance of; they are appointed by competition, and advance by seniority; *Joyce* 6471. A large proportion leave for more lucrative employments; some obtain places in the Civil Service; *ib.* 6472–6476.

It is not easy to get schools for Roman Catholic teachers round Dublin; *ib.* 6520–6524.

Lower-class teachers the same as formerly—the standard is the same; *Fitzgerald* 8342–8344.

Pupil teachers are well grounded; not easy to obtain classification if from other schools than National; very few offer themselves; no allowance made in examining such for their want of familiarity with Board's books; some pass, and make fair teachers; *ib.* 8347–8354.

Pupil teachers boarded and lodged in model schools are well treated and contented; district Inspectors visit frequently at meal times; never heard of a complaint; *ib.* 8356–8361.

Training of, in model schools; are of all denominations; a fixed proportion of Catholics to Protestants is always kept; *ib.* 8320–8330. 8448–8454. Inspectors never recommend a pupil teacher who is not likely to remain; they cannot compel them to remain. They are drawn from the humbler ranks, more from country than town; *ib.* 8331–8334. Are taken at sixteen for one year, and if they give satisfaction, for a second; *ib.* 8335–8339.

In model schools, as to religious instruction of; the state of things is not unsatisfactory; *ib.* 8564–8569.

PUPIL TEACHERS—*continued.*

Are selected from paid monitors; age and period of instruction; *Newell* 24511–24521. May leave the model schools when they please; no objection to apprenticing them as in England; *ib.* 24941–24943.

From model schools superior in attainments to monitors from ordinary schools; they have better opportunities of improvement; *Rintoul* 26170–26176. Utility of, in schools; rates of pay of, in central department; are selected exclusively from the monitors, but there is nothing to prevent monitors from ordinary schools competing; *ib.* 26177–26194. 26244. In Dublin, all reside at home; *ib.* 26243–26245. Advantage to, the having some experience in management of a school before finishing their training; *ib.* 26200–26204.

See also MARLBOROUGH-STREET TRAINING ESTABLISHMENT, MODEL SCHOOLS, &c. MONITORS. TEACHERS.

QUEEN PHILIPPA:

Statement regarding, objected to, as a reading lesson; *J. Porter* 18649.

QUEEN'S COLLEGES:

Official connexion between, and model schools never contemplated; attempted establishment of such, at Waterford; *Kavanagh* 12077, 12078.

Nothing in their principles requiring teachers to be of one denomination more than another; *M'Millen* 14717.

QUEEN'S COLLEGE, BELFAST:

Education at, is not separate; *M'Millen* 14623.

Governors and managers of, have nothing to do with religious instruction of Wesleyan students; *ib.* 14625.

RAGGED SCHOOL SYSTEM

Is an evasion of the conditions of the Committee of Privy Council; *Toole* 21301.

RAMELTON:

Friendly intercourse of shopkeepers of different denominations in; *Atkins* 20713.

RATE IN AID OF EDUCATION:

A voluntary rate for denominational schools might be admitted, but not for a stereotyped form of National school; *O'Reilly* 14976–14980.

Possibility of raising; money should be placed in hands of patron of school; *Warren* 15241–15244.

Should be applied according to wants of district, without reference to creed of parties paying; suggested plan of Rev. Mr. Andrews very desirable if something else was not done; *ib.* 15318–15324. Proposed mode of levying; *ib.* 15334–15338.

Might be divided among the different denominations, just as the taxes of the country go to Catholics and Protestants alike; *ib.* 15374–15381. 15384.

See also LOCAL RATE. LOCAL TAXATION.

RATING, UNIFORM:

Levying suggested for National education in Ireland; *Andrews* 14741–14744. 14762–14764. 14820–14825. 14850–14853.

READING:

Really intelligent reading is very rare in schools in Ireland; *Mahony* 16999, 17000.

The leading defect in children's reading is that they do not understand what they read; this arises from the nature of the books read; *ib.* 17070–17077.

The attendance of children at school is seldom long enough to enable them to read fluently; *O'Callaghan* 19956-19970. 20113–20115.

READING LESSONS:

Investigation on charges relating to reading lessons made by witness; *J. Porter* 18589–18613. 18689–18691.

REDINGTON, SIR T.:

His testimony quoted as to the true meaning of "mixed education;" *Lord Oranmore* 13448 *et seq.*

REFORMATORY AND INDUSTRIAL SCHOOLS (ENGLAND):

Are denominational, but the inspection is undenominational; reasons why Catholics have not asked for denominational inspection; it would be preferable if these schools were under the Privy Council instead of under the Home Office; *Allies* 25607–25614.

REGISTER OF ATTENDANCE AT DIVINE WORSHIP:

Rule as to, not carried into effect; could not be kept under mixed system; desirable under a denominational one; *Card. Cullen* 27067–27070.

REGISTER OF CREED. *See* RELIGIOUS REGISTER.

REGISTER OF TEACHERS

Wanting employment should be kept in Dublin; *Matthews* 18308, 18309.

REGISTERS (Accounts, Returns, &c. by teachers). *See* ACCOUNTS. RETURNS.

RELIGIOUS BELIEF:

Changes of, in consequence of the mixed education system, are not numerous, and where they have occurred have been in towns; country schools have protections not to be found in training schools; changes of religious belief are common among grown persons in the North of Ireland, both one way and the other; *Bp. Dorrian* 8772–8776.

RELIGIOUS DENOMINATIONS:

All are thoroughly represented in the Board's model schools; *J. S. Porter* 18151.

Numbers of, attending schools, first taken in 1824, before establishment of National system; *Mahony* 17134–17136.

Table showing numbers of the several religious denominations taught in Irish National schools, 1837, and 1852 to 1857; *ib. page* 763.

Table showing numbers of the different religious denominations, in schools of Church Education Society, 1839 to 1867; *ib. page* 763.

Table giving numbers of different religious denominations attending schools of Society for Discouraging Vice, of Erasmus Smith, of Education of Poor, of London Hibernian Society, and of Baptist Society; *ib. page* 763.

RELIGIOUS DIFFERENCES

Are the chief cause of the strife and enmity in the North of Ireland; only a mixed system of education can counteract this; *Petticrew* 16811–16814.

RELIGIOUS EMBLEMS. *See* CROSSES. EMBLEMS, RELIGIOUS. NUNS.

RELIGIOUS INSTRUCTION:

No instance known in vested schools of parents requiring separate religious instruction for their children; *Keenan* 995, 996.

Practically none is given to minority where majority is of same religion as manager; *ib.* 1018, 1019.

In a few cases may be supplied elsewhere than in the schools; *ib.* 1151.

Board would interfere in cases of hindrance of, by patron; such hindrance is against the rules; *ib.* 1250–1252. 1324, 1325.

Difference in rule as to, in vested and non-vested schools, little regarded by the people; in non-vested school determined by the patron, in vested school by the parent; *ib.* 1425–1427.

Explanation of certain circumstances under which religious instruction may be given; *Newell* 2606–2609. During last year circulars were issued, giving instructions to Inspectors, especially on the new rule as to religious instruction; *ib.* 2615, 2616. 2651–2653.

RELIGIOUS INSTRUCTION—*continued.*

National Board does not pay anything for; *Newell* 2949.

As to, of pupil teachers in model schools; *ib.* 2952–2954.

Reference to O'Reilly's return of 1,100 Roman Catholic children attending religious instruction of other denominations; supposed reason in explanation; *Hunter* 3316 *et seq.* 3706–3712. O'Reilly's return is for 1862; witness's statements, that very few Roman Catholics receive religious instruction from Protestant teachers, refer to the last six years; *ib.* 3529.

At beginning of National system parents of Roman Catholic children did not look upon reading the Authorized Version of the Bible as religious instruction; they permitted their children to remain during the reading of it; O'Reilly's return does not show a single instance where reading the Scriptures was not fixed as part of the business of the day; *ib.* 3530–3534.

How provided for Presbyterian children who attend schools under managers of a different profession; in the model school, Presbyterian pupil-teachers have no separate religious instruction; there is no rule on the subject enforced; *ib.* 3663–3667.

Is given in schools by curates who are managers and by nuns; *O'Carroll* 4229.

Few schools where children do not get efficient religious instruction in their own denomination. Generally for the minority it is provided elsewhere; *Sheridan* 5155–5160. Few complaints of disregard of Board's rules as to religious instruction; particulars of one, a very trivial case; *ib.* 5161–5163.

By present rules managers of non-vested schools can prevent religious instruction being given; under Lord Stanley's letter parish clergymen could enter any school; *ib.* 5309–5316.

Occasional instances of adverse religious instruction being given to minorities which are all remedied now; *ib.* 5581–5586. 5825–5827.

It is not true that religious instruction is given in training schools to both denominations by one person at the same time; *ib.* 5877–5879.

No action was ever taken by the Board with regard to religious instruction of the teachers; *Butler* 6242–6247.

No representation was made to the Board that the Roman Catholic religious instruction had ceased; it was well known; it was no part of the superintendent's duty to make such representation; *ib.* 6400–6406.

There is no provision in the training establishments for the religious superintendence of Catholic students; Protestants receive direct instruction from their own clergymen; *Keenan* 1152–1158; *Butler* 6407–6409.

Statements as to the religious instruction of teachers in training, whether Roman Catholics, Episcopalians, Presbyterians, Wesleyans, or Unitarians; *Butler* 5987, 5988. 60256038. 6060–6066. 6234–6247. No payment is made by the Board to any minister in attendance for religious exercises; *ib.* 5989–6032.

Teachers in training get no religious instruction but from some religious books put into their hands; *Joyce* 6677.

Of Roman Catholics in training devolves upon head master and such of his assistants as are Catholics; a paid chaplain should be appointed for the duty; *ib.* 6500–6502.

In giving religious instruction to the Catholic students in Marlborough-street training establishment, attention is mainly directed to the catechism; books expounding doctrine are occasionally used; the Douay version of the Bible is not used; every Catholic layman feels a difficulty in imparting religious instruction without authority; *ib.* 6551–6553.

RELIGIOUS INSTRUCTION—*continued.*

Teachers in many cases will have to give religious instruction in their schools after training, for which they are by no means prepared; one of the great wants of Marlborough-street institution is proper superintendence of religious instruction; *Joyce* 6619–6624.

Religious instruction is given to the Protestant teachers by their pastors; the Board does not pay for religious instruction; *ib.* 6642–6646.

No obstacle to the appointment of a Catholic chaplain; Dr. Power attended before his appointment to Clonliffe, but no one has been sent in his place; *ib.* 6647–6655.

Besides being given to the children in the model schools, religious instrucion should also be given to the masters in training, that they may know how to impart it to the schools of which they may have charge; *ib.* 6656–6658.

In ordinary National schools the priest has the responsibility of preparing children for reception of sacraments, commonly delegating much of the labour to the teacher; *ib.* 6557. 6681–6685.

Saturdays are generally set apart for religious instruction, but it is often given every day; *ib.* 6661, 6662.

It is very usual in Roman Catholic churches to collect the children together for religious instruction irrespective of the ordinary school instruction, but this is not sufficient, for many reasons; *ib.* 6659, 6660.

No restriction as to when or how given in Church Education schools; more or less mixed up with all branches of instruction; *Leeper* 6718; *Wilkinson* 7115–7120.

Protestant teachers are well looked after as to religious superintendence; Catholics have none; the Protestant clergymen are not paid for their services; *O'Sullivan* 7731–7742. 7907–7916.

Of pupil teachers in model schools is not on a satisfactory footing; *Fitzgerald* 8564–8569.

Board drew up and published a book on Scripture; this was not spending money on religious instruction; *ib.* 8594–8599.

Prevented, by the rules of the National Board hindering the co-operation of members of the Roman Catholic Church; *Bp. Dorrian* 8676–8678.

The religious instruction given in witness's school was given on Saturdays only, and by the teachers; the clergymen sometimes attended; *ib.* 8669–8673.

The rules of the Board as to, are defective, and in many cases nugatory; cases cited of infractions; *ib.* 8770–8778.

Religious teaching should be combined with secular; one day in the week for it is not sufficient; without religious teaching in school children deteriorate in morals and manners; the State should provide schools with religious instruction, each according to its denomination; *ib.* 8817–8829. 8960–8963. Books alone do not teach religion; the most important part is taught by the "surroundings" of education; *ib.* 8830–8834.

The system of education introduced by Lord Stanley, and undertaken by the Commissioners, for this country, was based on the Atheistical principle, but it turned out denominational; *ib.* 8962. 8960–8963.

Objection generally to teachers trained in connexion with the National system on the ground that their religious education is not attended to; *ib.* 8982–8992.

Religious emblems should be always before children; *ib.* 8973.

It is the business of the parents, and, by their selection, the pastors, to declare what religious education is; *ib.* 8978–8980.

As to the headship of a family, witness, in holding his religion to be the true one, holds that the parent professing the same religion is bound to see the child reared in it; *ib.* 9030–9034.

RELIGIOUS INSTRUCTION—*continued.*

A knowledge of natural things cannot be imparted without religion being mixed up with it; religion cannot be taught by a set process; children, to get it, must go to proper places; the clergy are not bound to follow them into the model schools; *Bp. Dorrian* 9113–9120.

Insufficient provision for; *Kavanagh* 10097. Objections to salaried chaplains, but if present system continue, clergy should be paid; *ib.* 10098–10101.

Obligation up to 1845 to exclude children from adverse; obligation withdrawn from 1847 to 1867; return to original obligation; *ib.* 10834.

Thousands of instances where children attend religious teaching different from their own persuasion; some Roman Catholic parents may permit it, but the Church forbids it. Probable that the practice modifies the opinions of the children in after-life; *ib.* 11037 *et seq.*

Principle of Church Education Society and Christian Brothers to give, at all times; *ib.* 11076.

The Board has resorted to its original rule as to; *Macdonnell* 11120–11123. 11126–11132.

The right to give, in vested schools, little used; *ib.* 11169.

No payment ever made at Marlborough-street model school for; it has been well done; *ib.* 11254–11261.

The Board's new rule objected to, as interfering with the parent's right of directing his child's religious instruction; *Berkeley* 11448–11457. 11540–11556.

Children in Presbyterian schools have full liberty of absence from; *ib.* 11557–11561.

The rule regarding, as explained in Mr. Kelly's letter on minute of 25th August, 1833, was never carried out; *ib.* 11647, &c. Application of rule in vested and non-vested schools; *ib.* 11658–11666.

Objection of Presbyterians to the right of clergymen of other denominations to visit their schools for the purpose of imparting; *ib.* 11756–11764.

Very prominent in schools of Irish Church Mission Society; *Cory* 11798.

O'Reilly's returns the only complete return respecting, for thirty-seven years; *Kavanagh* 12111, 12112.

Circumstances under which Board's rule as to, was changed in 1847, and extract from report announcing change and detailing new principle of action; *ib.* 12155–12159. Report by Mr. Keenan in 1855 upon its working, and showing abuses existing; part of this was suppressed; the omitted parts quoted; *ib.* 12160–12166.

The original rule as to, was for the protection of minorities; its alteration removed that protection, and it chiefly affected Catholics; as to conduct of Dean Murphy, of Cork, with regard to; *ib.* 12186–12193.

Statement as to Archdeacon Stopford's correspondence with witness on subject of rule relating to; *ib.* 12205–12210.

To children of different denominations unitedly, impossible; *ib.* 12211–12214.

Dr. Doyle's opinions, letter, &c., as to, on first announcement of National system; *ib.* 12284–12290. 12308, 12309.

Changes in rules of National Board, at instance of Presbyterians, with regard to; *ib.* 12321–12337.

In Ballindine and Crossboyne schools, consists of a prayer, a collect, the Lord's prayer, and a chapter of the Douay Bible read every day; *Lord Oranmore* 13338 *et seq.* Good feeling existing between different religious communities in the district owing to the children being taught together in a common school; no objections made by the priests as to religious teaching; *ib.* 13348–13357; or by the Board, *ib.* 13364. The hour for religious instruction is at the end of the day; no inquiries are made; no sort of compulsion imposed; *ib.* 13365–13369. 13374, 13375.

RELIGIOUS INSTRUCTION—*continued.*

The principle of interweaving religious instruction with secular pervades the Church Education and Christian Brothers' systems, and the National system to a greater extent in the comprehensive sense; *M'Ivor* 13839–13843.

Mistake of Mr. Kavanagh as to observance by Presbyterians of rule for exclusion of children from; *Berkeley* 13899–13911.

Explanation of conversation with Mr. Berkeley as to observance by Presbyterians of rule relating to exclusion of children at time of; *Kavanagh* 13918–13951.

It is presumed parents are aware of rule forbidding controversial subjects in religious teaching in Erasmus Smith's schools; if children object to questions in Scripture they would state it to the master; *Rudkin* 13972–13978.

To deaf and dumb pauper children at Cabra; *M'Donnell* 14252–14255.

Rule of Board as to, strictly carried out in Wesleyan schools; *M'Millen* 14543.

Quality of, in schools under National Board; *ib.* 14442.

Parents must be chargeable with; *ib.* 14505.

In vested and non-vested schools; *ib.* 14627.

In non-vested schools is under control of the patron; *ib.* 14702.

Provision made in model schools for, but not sufficient to counteract the time spent when religion is entirely ignored; *Andrews* 14782–14787. 14790–14800. 14837–14841.

Should be separated from secular, for protection of minorities; *O'Reilly* 14884, 14885.

In National schools mostly given by teachers; *ib.* 14869.

Not given in schools by Catholic clergy, but in church; *ib.* 14924.

Can be carried on *pari passu* with secular, even under a conscience clause; *ib.* 14933.

The State does not pay for religious instruction when it pays a schoolmaster who only incidentally imparts such instruction; *ib.* 14938.

A satisfactory line cannot be drawn between religious and secular teaching; *ib.* 14982.

Rule of the Board sufficient theoretically to prevent illicit religious teaching; alleged instance of its failure; *ib.* 15077–15083.

As to indiscriminate reading of the Authorized Version in schools; *ib.* 15084–15088.

Original rule of Board on, extremely imperfect; state of things remedied by change of rule, but new rule has been violated; *ib.* 15091, 15092.

In 1831, 300,000 Catholic children might be receiving religious instruction and reading the Authorized Version, but it was because there was no other education to be obtained; *ib.* 15094, 15095.

Clergy have not the fullest opportunity of giving, under the present system of National education; *Warren* 15232–15236.

The State should provide men trained as religious as well as secular teachers, and require patrons to provide religious instruction; *ib.* 15246–15252.

Neither books of National Board nor tables of Ten Commandments can be said to give religious instruction; *ib.* 15278, 15279.

Is no doubt given in all National schools, according to the will of the patron; *ib.* 15311.

Might be improved in National schools; *Bp. Keane* 15537.

In non-vested schools; *ib.* 15538.

Pastoral control over, allowed in National schools according to Lord Stanley's letter; *ib.* 15538.

Up to 1840 religious instruction was obligatory in every school; now ministers of different religion from the manager cannot go into a non-vested school to give religious instruction; *ib.* 15538. 15547.

Roman Catholic give, in schools of which they are patrons; *ib.* 15542.

RELIGIOUS INSTRUCTION—*continued.*

Roman Catholic clergy give religious instruction in their non-vested schools; *Bp. Keane* 15546.

Exclusion from, made optional on application of Archdeacon Stopford in 1847; *ib.* 15547.

As a rule, in National schools, is given by the Roman Catholic clergy; *ib.* 15629.

The right of the bishops to decide upon religious education is confined to them, without any interference on the part of the second order of clergy; *ib.* 15680–15683.

Line of demarcation between religious and secular education; *ib.* 15698.

Catholic clergy object to allow religious instruction different from their own faith to be given in their non-vested schools; *ib.* 15766.

Was obligatory in non-vested schools under Lord Stanley's letter; *ib.* 15776.

Catholic laity have no rights in religious instruction; *ib.* 15858.

Anxiety of teachers to carry out rules regarding; instance of this at Drimoleague, the Paddock male school; *Wilson* 15941–15944.

Ample opportunities for, under a system of united education; *ib.* 15994.

The Church Education Society cannot agree with the restrictions imposed by the National Board; it requires that everyone should have a knowledge of, and profit by, the Word of God, and that no one, not even a parent, shall require a child to be put out while it is read; *Blacker* 16407–16412.

The reading of Scripture in school by all the pupils is the fundamental rule and great difficulty of the Church Education Society; *ib.* 16367–16369. 16372. 16420–16422.

Attendance of clergy at schools to give religious instruction generally but slight; *Petticrew* 16592–16595.

Of Presbyterian children, by a Roman Catholic schoolmaster; *ib.* 16679–16685.

Nature of, in witness's school, to Presbyterians and Episcopalians; time of; no other given but what is contained in books of Board; no covert instruction would be given by teachers; *ib.* 16711–16724. None is given to Roman Catholic children in the school; *ib.* 16725–16729.

As to amount of responsibility resting on schoolmaster with regard to; primarily the obligation lies on the parent; *ib.* 16758–16763.

The parent's right over his child is recognised, even though he does not teach him religion; *ib.* 16805–16809.

Discussion as to the duty of the State in regard to, with reference to making good citizens, good Catholics, good Presbyterians, &c., and with reference to Jews; *ib.* 16855–16880.

Rule as to time of, in 1835; modification of, in 1837; was no departure from original system; *ib.* 16906–16908. Further statements as to original rules relating to, and to date of some alterations in the rules; *ib.* 16910 *et seq.*

A common religious education imparted to children of all denominations in same school, formerly in Ireland, and now in England; *Mahony* 17137,17138.

Power of parent to consent to his child receiving; *ib.* 17182–17184.

The religious difficulty is not a myth, as represented by Mr. Vere Foster; it depends on the action of the Roman Catholic and Church Education ecclesiastical authorities; it is not regarded much by the people; *Ross* 17421–17425.

Should not be given by teachers as a part of regular school business so long as their action depends on the State; *ib.* 17474–17478.

Undesirable, and productive of evil result, to remove all restrictions as to, from managers; *ib.* 17502–17506.

Children can be corrected in National schools in all things contrary to moral law without distinctive religious teaching; *ib.* 17586.

RELIGIOUS INSTRUCTION—*continued.*

The history of the Redemption, as set out in the books of the National Board, does not constitute religious teaching, being merely historical; *Ross* 17585. 17603. 17606.

Amount and character of, given in witness's school; parochial clergyman sometimes looks in; children are sent to chapel for; never interferes with secular education; the rules of the Board are never interfered with; teacher is qualified to give; *Macdonough* 18019–18046.

State not bound to provide; duty of parents and parents' Church to supply; *J. S. Porter* 18187. 18193.

Introduction of what is called religious instruction a great disadvantage; *ib.* 18196–18199.

Might be given in schools if it be so given as not to appear connected with National system; *ib.* 18200.

Secular teachers ought to be relieved from giving religious instruction; *Matthews* 18489. 18521. 18531. Clergymen, either as managers or their substitutes, should give; *ib.* 18499. 18517.

Secular teachers do not give, in America; *ib.* 18524. Given by teachers in England and Prussia; *ib.* 18525, 18526.

Peculiar position of Ireland in regard to the question of; *ib.* 18527–18530.

Given by witness once a week in Kilkenny model school; *J. Porter* 18565–18569.

In schools in Canada, information concerning; *Gordon* 18772–18785. 18950–18954. 18965–18967.

In Canada and the United States is supplied by Sunday-schools; other arrangements with regard to; *ib.* 18903–18907. 18927–18930. 18940–18945.

Tablet, "Religious Instruction," introduction of, in 1850, on complaint of Roman Catholics; *Kavanagh* 19346.

Old rule reverted to by Board in May, 1866, that no child be allowed to be present during adverse religious teaching; opposed by Presbyterian element on the Board; rider or proviso reluctantly added; ratepayer's child should have at least same protection as juvenile pauper; *ib.* 19366–19378.

Action of the Government towards National Board with regard to, on publication of the O'Reilly Returns, was opposed by the Presbyterian element on the Board; *ib.* 19365–19375. Opinion of witness, and his advice to Catholic bishops on the point; *ib.* 19376.

Minute explanatory of new rule as to, issued by National Board; *ib.* 19387. Between 1847 and 1866 it was understood that children need not be expelled during adverse religious teaching; previous to 1847 everyone understood the contrary, and acted accordingly; *ib.* 19388–19392. 19400, 19401.

Quotation from Report for 1847, on subject of compulsory absence of children during; the rule was purposely framed to prevent children being present during adverse religious teaching; *ib.* 19404. 19413.

In 1840 Presbyterians were informed no change would be made in rule regarding; and that observance of the rule was essential; *ib.* 19413–19418.

Interpretation of "non-compulsion" and "non-exclusion" in the case of, in opposition to rules of Board; *ib.* 19419–19434.

References to the Correen case and the Temple Meeting-house case, and to expressions in leases, as to children being "permitted" or "compelled" to be absent during times of; *ib.* 19435–19461.

Reference to Commissioners' Report for 1836 as to time set apart for; up to 1839 patrons were bound to exclude minorities; no distinction between vested and non-vested schools as to exclusion; *ib.* 19462–19479.

Evidence of Dr. Henry as to exclusion of children during adverse religious teaching, wholly inaccurate; the present system is loose and undefined, and leads to abuse; *ib.* 19497–19505.

RELIGIOUS INSTRUCTION—*continued.*

From foundation of National system to November, 1847, patrons were compelled to exclude children from religious instruction not approved by parents; *Kavanagh* 19521–19532.

Should not be recognised by the State, but left entirely to patrons and managers; *Bp. of Down and Connor* 19587–19590.

Should be intrusted to parents and pastors and managers, parental authority being superior; *ib.* 19650.

Memorial to Lord Lieutenant to allow, by occasional reference to Scriptures while teaching, not granted; *ib.* 19667–19678. National schools give moral instruction based on revelation, and their books contain extracts from Bible, it was therefore supposed the above desire would have been granted; *ib.* 19679–19688.

Extent to which permitted, by reference, in National schools; *ib.* 19689–19695.

Difficulty in excluding it from schools; would neither prohibit nor enjoin it; *ib.* 19712, 19713.

Nature of, in Ovens National school; *O'Callaghan* 20119–20126.

Given by manager in chapel on Sunday; *ib.* 20127, 20128.

No difficulties whatever connected with, from admixture of religions in school; *De Vere* 20146–20151. 20237–20248. 20340–20347.

A separate room for the purpose of, would do away with a great deal of objection to mixed schools; *ib.* 20507–20520.

Nature of, in Church Education schools; *Bp. of Ossory* 20525 *et passim.*

Recommendation of Commissioners in 1824 for separate, combined with ordinary instruction, in common schools; *ib.* 20572–20575.

As to claim of bishops and clergy of Established Church to control the education of the country; *ib.* 20578–20580.

None of peculiar denominational character is required by Church Education Society; Scripture instruction is as compulsory as any other part of the daily work, to children who come with a full knowledge of what the rules require; *ib.* 20611–20616.

Obligations as to, of patrons, must rest on individual views of duty; *ib.* 20642, 20643.

Correspondence between Catholic Poor School Committee and Lord John Russell as to; *ib.* 20673.

A parent sending his child to a school must be taken as acquiescing in the religious instruction he will receive there; *ib.* 20696.

How given in schools in witness's parish; *Atkins* 20707–20708.

Parents often send their children to schools where they will be best taught, irrespective of the religious teaching; *ib.* 20752–20754.

There is no fear of the want of, notwithstanding the growth of desire for secular instruction; *ib.* 20770–20776.

All rules affecting should be repealed; the model schools for training teachers remaining as they are; *ib.* 20819–20821.

No difficulty with regard to, in witness's (non-vested) school for twenty or twenty-five years; to be efficient must be distinct from secular; *Warburton* 20897–20900.

People will use the school where the best education is given, if their religion be not interfered with; *ib.* 20927, 20928.

Besides the general religious teaching that pervades the system, dogmatic instruction is given in witness's schools by himself and by nuns; the teachers give incidental explanations; *Toole* 21359–21370.

The bulk of common people in England are indifferent to the religious element in education; *ib.* 21393.

Parent, not the State, is responsible for; minorities must be protected; *ib.* 21397, 21398.

RELIGIOUS INSTRUCTION—*continued.*

Minorities should be exempted from adverse; *Toole* 21199.

Protestant children in witness's schools do not leave during; are not required to learn the catechism; *ib.* 21204.

No disputes have ever arisen as to interference with religious belief; *ib.* 21201.

The conscience clause does not interfere with the efficiency of; *ib.* 21203.

Not merely taught by direct words, but by the surroundings of the place; *ib.* 21213.

It is not the duty of the State to interfere with; but the exclusion of indirect religious teaching is impossible, without injury to the greater number; the minority must be excluded from the school during direct religious teaching, as in Prussia; but religion should not be shut out from the majority for the sake of the minority; *ib.* 21426–21429. 21477.

Necessity of constant inculcation of; *ib.* 21442.

May be the duty of the parent, but with the poor it is impossible; it can only be given in school, and half an hour's teaching in the day is not sufficient; dogmatic religious teaching cannot be separated from moral teaching; *ib.* 21469–21473.

Particulars of, as given to Protestant children in witness's schools at Cappagh; *Byrne* 21631–21640. And as to their instruction in a vested Roman Catholic school by a Protestant curate; *ib.* 21641–21650.

No definite religious instruction imparted during school-hours in witness's schools, but what is implied in the books used, and in reproofs of teacher; it is within the spirit of Board's rules to refer to Scriptures without quoting them; *ib.* 21655–21660.

To be efficient must be separate from secular; *ib.* 21684–21687.

Must be recognised by the State, the State being bound to protect minorities; *ib.* 21690.

No instance known of application by priest to give, in a Protestant non-vested school; Episcopalian teachers have been known to teach Catholics their catechism; witness refused permission for such a thing to be done; *ib.* 21701–21704. 21729–21732.

Desirability of teachers imparting; *ib.* 21705, 21706.

Duties of clergy as to giving; *ib.* 21754–21758.

Should be imparted early, otherwise probably useless; *Toole* 21823.

Protestants in witness's schools can be exempted only from the direct religious lesson; all other lessons they must take with the rest of the scholars; *ib.* 21824–21827.

Given by Roman Catholic teacher to Protestant children; *M'Menamin* 21893–21896. 21972, 21973.

Instance of Roman Catholic children receiving by compulsion Protestant religious instruction from a Presbyterian teacher; *ib.* 21935.

A religious tone should imbue teaching; secular education could be separated from the religious, and the minority put out; instance of adverse religious instruction to Catholic children in a Presbyterian school; *ib.* 21983–21985.

It is not the duty of the Government to provide religious instruction, it is the duty of the Church; difficulties in the way of so doing; *ib.* 22113–22136. 22142–22146.

Instances of Catholic children being suffered to remain in school-room during Protestant religious instruction; *Kavanagh*—at Portadown, 22294–22317; at Lurgan, 22318–22371; at Fountain street, Belfast, 22415–22421; at Nelson-street school, 22470–22507; at Ballymacarret, 22508–22523; at New-road School, 22524–22528; at Killaghey, 22529–22554; at Donaghadee No. 3 school, 22555–22562. 22570–22581; at Broughshane, 22585–22602.

Various times for imparting, in the schools in Ulster; *Kavanagh* 22433–22440..

Should be altogether excluded from State-supported schools; the different Churches would do their duty after regular school-hours; *Tobias* 22760–22767.

Should be kept completely separate from secular instruction, given outside school-hours, and controlled by parent; *ib.* 22798–22802.

Objection to teaching any religion in any schools; *ib.* 22857–22860.

Cases of alleged infraction of rule of Board in imparting, under head of "Certificate;" *Kavanagh*— at Charlotte-street school, Belfast, 22887–22895; at Eliza-street school, Belfast, 22896–22914; at Academy-street schools, 22915–22921; at St. Anne's schools, 22922–22928; at Ballybofey school, 22929–22931; at St. Patrick's school, 22932; at Bolton-street and Dorset-street schools, 22933.

Children receiving adverse, in Stillorgan school; *Forde* 22940.

Rules of Board as to, impede witness very little in general teaching, his schools being practically denominational; *ib.* 22941–22955.

Dissatisfaction of Roman Catholic authorities with restrictions on; schools should be recognised by Government as what they really are—denominational; *ib.* 22954.

Decided opposition to admitting a clergyman to give adverse religious instruction in his schools; *ib.* 23016.

Must be combined with secular instruction; *ib.* 23070, 23071.

Would not allow a female teacher in an infant school to attempt to give, unless of his own faith; *ib.* 23073, 23074.

Experience has taught how far Board allows religious observances in Catholic schools with Protestant minorities; practically, such schools are denominational; *ib.* 23079–23093.

Instance how far Board's rules have been stretched in regard to; *ib.* 23104–23106.

Should be the basis of all education; *ib.* 23194.

The last rule of the National Board as to, preferred; *ib.* 23202.

Should be entirely in the hands of ecclesiastical authorities, who should have power to remove anything—even in secular education—in opposition to the teaching of the Church: *ib.* 23220, 23221.

The "religious atmosphere" of a Catholic school will make a Protestant child a Catholic without direct teaching; *ib.* 23282–23286.

Action of Synod of Ulster on its four propositions with respect to withdrawal at time of; *Kavanagh* 23376–23382.

Further discussion as to alteration of rules of National Board respecting exclusion at time of, and the time the Presbyterians joined the Board; *ib.* 23383 *et seq.*

Further discussion as to understanding of Presbyterians of the rule regarding withdrawal of children from religious instruction, and the time of their joining the National Board; *ib.* 23358–23382.

No doubt, in official circles, as to the interpretation of the rule respecting exclusion at time of; *ib.* 23396–23398.

The Poor Law Act gives full security with regard to; the rules of National Board are loosely worded in comparison; *ib.* 23436–23446.

The distinction between vested and non-vested schools as to, was first distinctly stated in 1843; *ib.* 23449. Previous to 1840, it was obligatory on patrons of schools, vested and non-vested, to provide time and place for separate religious instruction; *ib.* 23454.

A second religious teaching is rarely found in schools of two denominations, except in official schools; *ib.* 23475–23479.

The privilege given to patrons of non-vested schools of providing religious instruction for minorities was one theoretically enjoyed beforehand, but not of any moment in point of practice, and should not have been taken away in deference to a third party; *Kavanagh* 23488–23491.

From 1832 to 1837 Catholic children could not attend Protestant religious instruction unless directed by parents to do so; rules of the Board the only authority on the point; Lord Stanley an absolute authority as to the principles of his letter, but not as to rules of Board; *ib.* 23492–23501.

Is given in a suitable yet denominational manner in every National School in Ireland; *Macdonnell* 23716–23718.

Alterations in rules of National Board relating to, in 1840, at instance of Presbyterians, and in 1860, to suit Church of England children; *ib.* 23722–23725. 23728–23731.

The religious instruction derived from religious surroundings has too much importance attributed to it; is apt to degenerate into formality, and to interfere with the proper work of a school; the importance attached to it shows how dangerous a body claims the control of education; *Whittle* 24090.

It is the clergy's duty specially to attend to; exertions lately made by Roman Catholic community in educating the people; special function of Christian Brothers; sufficient field for their talent and that of the nuns in the department of religious education; *ib.* 24138–24146.

State should make provision to some extent for religious instruction; ministers should teach it in schools; protection from proselytizing would be essential; *ib.* 24147–24151.

Rule of 1866, as to religious instruction, gave rise to a great deal of correspondence; under it teacher of a school under Protestant patron must expel Catholic children during reading of the Bible; and to expel children of another Protestant denomination; interpretation of this rule; *Longfield* 24319–24329.

Grievance as to want of, is very slight; *ib.* 24423.

Is practically given from the Board's books, but special religious instruction is not provided for by the State; *Newell* 24605.

System and time of, at Bessbrook school; anyone can absent himself from it; no pressure whatever on anyone to attend it; thorough impartiality in; *Richardson* 25697–25738.

In schools of Incorporated Society, nature of; other duties fulfilled by those who impart it; *Hackett* 25920–25923. 25998, 25999.

Catholic children receive religious instruction from teachers of another denomination; objection to such a course; *Card. Cullen* 26641–26643.

Importance of; necessity of inculcating it in early life; testimony of eminent men in favour of; *ib.* 26587.

In Ballina district is given entirely by school teachers, managers take scarcely any interest in the schools; *O'Hara* 26834–26838. In Clonmel district it is fairly met, the Catholic clergy attending from time to impart it; *ib.* 26839–26841.

State of, as given before and at commencement of National system; managers may now exclude it; *Card. Cullen* 27044, 27045.

Last rule of Board as to, unsatisfactory; *ib.* 27161.

Teaching fundamental truths of religion is of importance, but there are others which Catholics must believe; introduction of Scripture extracts was acquiesced in by Catholic bishops; but no formal approval was given; *ib.* 27240–27248.

Necessity for taking precautions as to faith and morals of rising generation; *ib.* 27271.

Minute of April 1832; was to be given by the clergy in the school; rule has been changed; it appears to have been altered to suit Presbyterians; views of Dr. Henry and others as to; *ib.* 27299. 27354.

RELIGIOUS INSTRUCTION—*continued.*

Letter from Archdeacon Stopford to J. W. Kavanagh, esq., dated June 1859, regarding rule as to religious instruction in National schools; *Kavanagh* 12210.

Copy of certificate book of religious instruction framed under proviso of rule of 1866; *ib. page* 841.

In the Royal Free Schools. *See* CLARE-STREET COMMISSIONERS.

See also CHURCH EDUCATION SOCIETY: 3. *Ordinary Schools, Instruction, &c.* CONVENT SCHOOLS. ERASMUS SMITH'S SCHOOLS.

RELIGIOUS ORDERS:

Two monastic orders of teachers in Manchester and neighbourhood; *Toole* 21527–21529.

Examinations of nuns and other members of religious bodies could be done very satisfactorily; the fact of having taught efficiently a certain time might serve instead of examination; *ib.* 21540–21548.

The Presentation Nuns are devoted expressly to the teaching of the poor; *ib.* 21540. 21551, 21552.

Desirability of the State being relieved from all responsibility of inquiring about; the freedom of, insures better teachers and more good effects; *ib.* 21845.

See also CHRISTIAN BROTHERS. CONVENT SCHOOLS. NUNS. OBLATES. PRESENTATION ORDER OF BROTHERS.

RELIGIOUS ORDERS, SCHOOLS OF. *See* CHRISTIAN BROTHERS' SCHOOLS. CONVENT SCHOOLS. MONASTIC SCHOOLS. NUNS' SCHOOLS.

RELIGIOUS REGISTER:

Register of creed of children was first introduced in April, 1856; objected to previously by Commissioners themselves; refusal of Commissioners to keep, or to supply a creed return; *Kavanagh* 19332–19338; objected to by Protestant Commissioners; founded on instructions sent by Government; *ib.* 19342, 19343.

Changes in form of; *ib.* 19344–19347.

RELIGIOUS WORSHIP:

Permission to use non-vested National schools for, on Sunday, did not exist before 1840; the rule was only made satisfactory in 1855, as appears by a vote of the General Assembly in Dublin in that year; *Kavanagh* 10907–10924.

See also SCHOOLS.

RENT:

Paid for school-houses by teachers a grievance; *Gallagher* 19153. 19195. Ordinary rent for rural schools about £2 a year; *Kavanagh* 19167.

REPAIRS:

Of schools vested in local parties fall on local trustees; *Kavanagh* 11020–11022. 12264–12269.

As to repairs of schools by Board of Education, by Board of Works, by Government, by trustees; *Macdonnell* 11159–11168. 11170–11174. 11208. 11326–11329.

Are executed by Board of Works on notice from National Board; *Stack* 14061, 14062. Detail of contracts for, made between January and October, 1868; number of applications for repairs about 200 annually; *ib.* 14091–14093.

No unavoidable delay by Board of Works in making; causes of delays sometimes occurring; *ib.* 14093–14099.

Complaints of delay in executing, chiefly from the south; cause of delay now remedied; *ib.* 14107, 14108. 14133–14135. Delays often unavoidable; *ib.* 14139–14144.

General practice of Board of Works with respect to repairs of school buildings; *ib.* 14100–14106. 14111–14127.

REPAIRS—*continued.*

Of model schools should be made by Board of Works; of smaller schools should be on local responsibility; in some cases are made on responsibility of head master; *Stack* 14168–14176.

Delay in making repairs; *O'Callaghan* 19946–19950.

Of non-vested schools, would be done cheaper by Board of Works than by local authority; but Board cannot undertake the duty without increase of staff; *Owen* 27521–27523.

Number of schools repaired by Board of Works annually; *ib.* 27524.

Allowance to teachers for, would be productive of economy; *ib,* 27542–27545.

Powers of clerks of works in getting repairs executed; *ib.* 27642–27644.

See also BOARD OF WORKS.

REPEAL OF THE UNION:

Neither that nor any other political subject forms part of the teaching in Christian Brothers' schools; *Grace* 13952–13967.

REPORTS:

By Inspectors on schools, as to; *Macdonnell* 494–504. 572–577.

Annual, of Head Inspector, are generally given without omission, and are remarkably candid; *ib.* 636–638.

Annual, by Head Inspectors, are revised by Chiefs of Inspection, and sometimes published; *Newell* 2454–2460. 2658.

The reports from Head Inspectors as to conduct of Inspectors are confidential merely that they do not pass the routine of the office; they would not be acted upon without communication with the party concerned; the Inspectors know of these reports, which are not necessarily of an injurious character; they are prepared according to a regular printed form, and are sent as part of the Head Inspector's regular business; *Hunter* 3713–3715. 3726–3738.

Of Inspectors often mutilated by the Board; *Kavanagh* 10305–10309.

Explanation as to report on convent schools, in 1860, referred to in answer to Q. 5818 *et seq.*; *Sheridan* 13898.

Complaint that suppressed portions of reports, &c. have been produced informally; *Kavanagh* 19328.

RESIDENCES:

The best way to improve the teachers' revenue is by giving them a house and garden; *Macdonnell* 329–333.

The rule of the Commissioners as to refusing grants for residences is self-imposed; the question as to the desirable policy of giving aid towards the erection of teachers' residences has never come before the Board; *ib.* 415–417.

Difficulty experienced by married teachers as to procuring suitable; more effort should be made by both Board and managers in that respect; frequent complaint of teachers of want of fitting residences; *Newell* 2983–2987.

Inconvenience to teachers from want of convenient; desirability of having, near the school; *O'Carroll* 4339–4344.

For teachers very desirable, near, but not adjoining school-houses; *Sheridan* 5011–5013.

Necessity of providing teachers with; *Fitzgerald* 8612–8615.

Position of rural schoolmasters would be greatly improved if they had residences and land; *O'Reilly* 14882.

A free house and garden would improve the position of teachers in agricultural districts more than anything else; an educational rate might be devoted to this purpose; backwardness of landowners in furnishing houses and gardens; *ib.* 15026, 15027.

RESIDENCES—*continued.*

For teachers desirable, but not too near schoolhouse; *Mahony* 17024–17027.

For teachers desirable; *Ross* 17442.

Teachers generally would prefer £10 cash to; witness individually would prefer the residence and land; *Macdonough* 17878–17879.

Desirability of, for teachers; *J. S. Porter* 18070. 18084–18086.

Desirability of, being provided for teachers; *Matthews* 18313, 18314.

Payment of rent for, a grievance to teachers; *Gallagher* 19153. 19210.

Desirability of attaching residences to schools; *ib.* 19197. 19202.

A house and piece of land would be preferable to an increase in money, it would allow of agriculture being taught; lodgings for teachers are often very bad; *O'Callaghan* 20087–20104.

The giving free residences means subscription, and there is no general habit of giving subscriptions; desirability and advantage of provision of fixed residences by the State as part of salary, which are inadequate; *De Vere* 20200–20204.

A house and garden for teachers desirable; *Warburton* 20876.

Desirability of, with land, as addition to teachers' salaries; *M'Menamin* 21948. But not as agricultural schools; *ib.* 21955–21959.

School residences would be of great service; *Card. Cullen* 26614.

RETIRING ALLOWANCES:

Are not sufficient; *Gallagher* 19237–19241.

RETIRING PENSIONS:

Better provision should be made for teachers in old age; the Board should accept the present status of the teachers for purposes of superannuation; *Bp. Keane* 15670. 15673–15677.

RETURNS:

A teacher returns all emoluments received by him from the school, which is transmitted to Board through manager; *Kelly* 3121–3124.

Of teachers, as to numbers of children in attendance, checks on; *Hunter* 3270, 3271.

There are some checks on teachers' accounts, but no direct proof of dishonesty; *O'Carroll* 4097–4100.

As a rule the books and returns of the teachers are accurately kept; *Sheridan* 4766–4769.

Returns quoted by examiners, showing an increase of Roman Catholics in the rolls of district model schools, disbelieved; *Bp. Dorrian* 9121–9124.

Returns of attendance by teachers accurate, by Board fallacious; *Kavanagh* 10133–10136. More children returned on the rolls than there are in the population; *ib.* 10137–10145. Neither inspectors, patrons, or teachers responsible for the misstatements; *ib.* 10159–10163. Sources of the errors in the published returns; *ib.* 10152–10158. 10164–10172.

Letter showing the fallacious nature of returns as to attendance at school, time spent in teaching, its efficiency, school arrangements, &c.; *ib.* 10781, 10782.

Do not show real average attendance; *ib.* 10783.

The new forms of, drawn up by witness, are in use, and are not surpassed in any schools in the world; *ib.* 10788–10795.

From teachers are reliable and correct; the published inaccuracies are the fault of those who draw up the reports of the Board; *ib.* 10796–10806.

Of children in attendance fallacious on account of migrations; *ib.* 10998.

Explanation as to certain returns moved for by Mr. Herbert, and demand that certain other returns, ordered on Mr. Maguire's motion, be prepared and forwarded forthwith; *ib.* 12435–12455.

See also ACCOUNTS.

RETURNS, TABLES, &c.:

Put in by Mr. Allies:

Account of income and expenditure of Liverpool Roman Catholic training school for 1867, showing amount actually received and disbursed during the year; 25376.

Amount of building grants received by Catholic schools in England from Privy Council, 1858–1867; 25584.

By Mr. Andrews:

Memorandum by Rev. W. Andrews of suggestions for the improvement of National education; 14851.

By Mr. Byrne:

Declaration by members of Church of England and Ireland in favour of united secular education; 21798.

By Mr. Claridge:

Memorandum explanatory of Resident Commissioner's views regarding division of duties of Secretaries of National Board; 3969.

Memorandum for the Royal Commissioners, giving a short history of the financial department of the National Board of Education, from its commencement in 1831 to May, 1868; *pages* 176–179.

By Mr. Cory:

Statement of parentage of children attending schools of Irish Church Missions; *page* 489.

Abstract of returns for 1867–8 of number of Irish Church Mission schools; number of pupils on roll; average attendance; and number present on a given day; *page* 494.

By Cardinal Cullen:

Tables showing increase of attendance, &c., in Westland-row schools since taught by Christian Brothers; *page* 1232.

By Mr. Hackett:

Origin, constitution, working, effects, &c., of Protestant Charter-schools Society; 25793.

By Mr. Hunter:

Area in square miles, and number of schools, in Castlewellan and four other districts; *page* 158.

By Mr. Kelly:

Protests of members of National Board, 1861–1868; *pages* 139, 140.

By Mr. Kavanagh:

Return of daily attendance of pupils in National schools, 1865; *page* 409.

Return, from Reports of Registrar-General for years 1845 to 1867, of persons who signed marriage registers with their mark; *page* 426.

Table showing classification of pupils on roll of National schools in each province for last quarter of years 1860 to 1867; *pages* 426, 427.

Table showing number of children on roll of National schools from 1860 to 1867, and number on roll for last quarter in each year, with the literary classification in per-centages of the latter; *page* 425.

Table showing classification by teachers of pupils on roll of National schools at opening, of those admitted, and of those on roll at close of years 1861 to 1865; *page* 427.

Summary results of examination of pupils of National schools by Inspectors, 1858 to 1865; *pages* 428, 429.

Table of highest and lowest periods of attendance in National schools in 1865 and part of 1866; *page* 430.

Summary, by provinces, of vested schools at end of 1867; *page* 435.

Table showing total expenditure, from Parliamentary grant, on works and repairs of schools, ordinary and model, by the National Board, 1831 to 1868; *pages* 436, 437.

Summary of model schools, of all classes, erected and supported exclusively by State, under direction of National Board; *page* 439.

RETURNS, TABLES, &c.—*continued.*

By Mr. Kavanagh—continued.

Summaries of reports of Inspectors, showing condition of the National school-houses, premises, and playgrounds, 1865 ; *page* 439.

Expenditure by Board of Works on National schools, &c., 1857 to 1869 ; *pages* 440, 441.

Joint letter from the Head-Inspectors to the Commissioners of National Education, dated June 6, 1856, and Order of Commissioners thereupon ; *pages* 453–457.

Return of attendance and creed of pupils in Model schools, 1849 to 1867 ; *pages* 496, 497.

Table showing average annual cost of National schools from State grant and from local funds, per school and per pupil, 1832 to 1868 ; *page* 499.

Table showing cost of erection and support, and number and creed of pupils in model schools, 1866–7 ; *page* 500.

Return of National schools in operation in 1862, classified according to creed of patrons, teachers, pupils, and religious instruction imparted ; *page* 839.

"Notice" system ; number of Notices sent to parents, distinguishing creed of latter ; *page* 840.

Copy of Certificate Book of Religious Instruction framed under proviso of rule of 1866 ; *page* 841.

Analysis, by provinces, of number of schools, pupils on roll, daily attendance, and amount of grants in salaries, gratuities, &c., from Report of National Board for 1866 ; *page* 973.

Attendance and grant per pupil in model, ordinary, and convent female schools, 1862 ; *page* 974.

Number of convent schools, average daily attendance, and detail of grants from National Board, 1860–1863 ; *page* 974.

Table of amount per pupil in daily average attendance in National schools during 1863 paid in salaries, gratuities, &c. ; *page* 974.

Summary, by provinces, showing classification of all the National schools, according to creed of patrons, 1854 ; *page* 1039.

Similar and more minute return for 1862, under four categories, viz., Joint Patrons, Joint Teachers, Joint Pupils, and Joint Religious Instruction ; *pages* 1039, 1040.

Number, according to denominations, of mixed and unmixed National schools, and of pupils therein, 1867 ; *page* 1040.

"Abstract of Deductions made from the Statistical Records of the National schools ;" 10782.

Expenditure for buildings, repairs, and works of model schools and ordinary National schools ; 10813.

Letter from Archdeacon Stopford to J. W. Kavanagh, esq., dated June, 1859, regarding rules as to religious instruction in National schools ; 12210.

Circular letter from Bishop Doyle to his clergy upon first announcement of National system, dated December 26th, 1831 ; with rules and regulations for schools in his dioceses ; 12290.

Letter from Mr. Kavanagh, dated Sept. 9, 1854, on defects in system of training, &c. ; 12412.

By Mr. Keenan :

Mr. Keenan's memorandum on a system of payment for results, drawn up at the request of the Royal Commissioners ; *pages* 89–96.

Name, religious denomination, and district of each of the sixty Inspectors of National schools, from report of 1866 ; 1266, 1267.

Return showing the names, &c., of first-class teachers who have not been trained in the normal establishment ; *page* 55.

Return showing distribution of P43 first-class monitors, 1866 ; *page* 55.

Return of ages of pupils in King's Inns-street National (convent) school, and in the central model school ; *page* 87.

Return of number of attendances and number and per-centage of pupils in attendance in National schools, in 1866 ; 1631–1635.

RETURNS, TABLES, &c.—*continued.*

By Mr. Kyle :

Tabular statement of income and expenditure of each school having funds under Clare-street Commissioners, for 1867 ; *page* 669.

Return of number of children at the primary schools on estates of Clare-street Commissioners, or under their patronage, showing numbers in attendance at each school separately, and religious persuasion of children ; *page* 670.

By Mr. Mahony :

Table showing numbers of the several religious denominations taught in Irish National schools, 1837, and 1852 to 1857 ; *page* 763.

Table showing numbers of the different religious denominations in schools of Church Education Society, 1839 to 1867 ; *page* 763.

Table giving numbers of different religious denominations attending schools of Society for Discouraging Vice, of Erasmus Smith, of Education of Poor, of London Hibernian Society, and of Baptist Society ; *page* 763.

By Mr. M'Millen :

Programme submitted in 1860 to National Board by Wesleyan Education Committee, for placing their schools under Board ; 14557.

By Mr. Newell :

Heads of a scheme for the future payment of National teachers, by Mr. Newell, one of the secretaries of the National Board ; *pages* 132–138.

By Mr. Petticrew :

Proposition for modifying the National system of education, submitted to the Government in London in May 1833, by a deputation from the Synod of Ulster ; 16825.

By Mr. Pilkington :

History, objects, income, &c., of Sunday School Society for Ireland ; attendance, &c., 1864–1868 ; number of schools, scholars, and gratuitous teachers at different periods ; numbers, according to provinces, in 1868 ; issue of books in 1868 ; 23503.

Table showing the number of children attending Sunday and week-day schools of Sunday School Society for Ireland ; number above fifteen years of age ; and number reading the Scriptures in each of the provinces, January 1869 ; *page* 1046.

By Mr. Robinson :

Return of young persons educated in union schools, and of employment obtained by them on leaving, &c. ; 10460.

Form of supplemental report on workhouse schools ; 10531.

By Mr. Sheridan :

Average daily attendance in convent schools in a certain district during 1858, 1859, and 1860 ; *page* 247.

Letter, dated May 1864, from Mr. Inspector Sheridan, on convent and monastic schools ; 5824.

By Mr. Stack :

List, according to counties, of National schools in charge of Board of Works for repairs ; *page* 611.

List of National school-houses for which grants have been made, and which are either in course of construction, or the necessary plans not yet issued, but in preparation (by Board of Works) ; *page* 611.

Schedule of extended grants for ordinary school-houses ; *page* 612.

Conditions on which National Board will make grants in aid of building school-houses in poor localities, at a total cost not to exceed £100 ; *page* 612.

List of National school-houses for which grants were made by the National Board and notified to Board of Works since July 1857, and which have been built by or under the direction of the latter ; *pages* 612, 613.

RETURNS, TABLES, &c.—*continued.*

By Mr. Stack—continued.

Amounts voted by Parliament for building, repair, &c., of National schools, 1865–6 to 1868–9; *page* 613.

By Mr. Thorpe:

Copy of the original indenture, made 1st December 1657, between Erasmus Smith, esq., on the one part, and Dr. Jones, Dr. Winter, and others, on the other part; 12754.

Return of teachers in Erasmus Smith schools, showing whether trained or untrained, and if trained, where; *page* 546.

By Mr. Toole:

Time-tables of boys', girls', and infants' Roman Catholic schools at St. Wilfrid's, Hulme, Manchester, under Committee of Privy Council; *pages* 946, 947.

By Right Hon. R. Warren:

Copy of "Scheme for National Education in Ireland," by the Right Hon. R. Warren, M.P.; 15121.

By Mr. Williamson:

General statement of moneys received on account of the Hon. Irish Society, being the produce of their estates, fisheries, &c., together with the expenditure of the same, for year ending February 4, 1868; *pages* 945, 946.

Appendices:

Qualifications of candidates, general conditions as to appointment, &c., of senior and junior paid monitors under National Board; *App.* i., *page* 1277.

Return of cost of building and repairs of ordinary National and model schools, training establishments, official establishments, &c., for 1856–7; *App.* ii., *page* 1278.

Form of existing lease to trustees of National schools, with schedule of rules; *App.* iii., *pages* 1278–1281.

Code of instructions for District and Sub-Inspectors of National schools; *App.* iv., *pages* 1281–1287.

Circular memorandum to Inspectors of National schools as to inconveniences arising out of the use of different editions of the same book in the same class, dated March 20, 1868; with abstract of replies thereto; *App.* v., *pages* 1287, 1288.

Circular letter of National Board, explanatory of the nature of school organization, and the duties of the organizers and Inspectors in relation to it; *App.* vi., *pages* 1288–1290.

Return by counties, showing the amount of gratuities awarded for training monitors beyond their usual period of service, 1861 to 1866; *App.* vii., *page* 1291.

Return showing estimate of expenditure of National Board for year ended March 31, 1867, and gross expenditure as compared with it; *App.* viii., *page* 1291.

Extracts from reports of Inspectors for 1866, on the state of the National school-houses in their respective districts; *App.* ix., *page* 1292.

Report on Oldcastle Endowed Schools, by J. W. Kavanagh, esq., (formerly) Head Inspector of National schools, dated December 13, 1853; *App.* x., *pages* 1293–1297.

Letter from Mr. R. W. Hely to the Right Hon. E. Cardwell, M.P., Chief Secretary for Ireland, dated July 25, 1861, complaining of treatment received from National Board in respect of remuneration claimed by him for revision of school-books on their catalogue; together with correspondence between himself and Board on the same subject, from 1859 to 1861; *App.* xi., *pages* 1297–1300.

Programme of preliminary examination for admission to the Albert Institution, Glasnevin, conducted by the District Inspectors, May 29, 1868; *App.* xii., *pages* 1300, 1301.

Extract from Letter of E. Hornsby, esq., Secretary of Public Works Board, dated December 10, 1868, respecting delay in preparing to erect Kilcoman National School, and in some other works in same district; *App.* xiii., *page* 1301.

RETURNS, TABLES, &c.—*continued.*

Appendices—continued.

Rules and Directions for the Regulation of the Grammar school in the town of Elphin, Roscommon, established in pursuance of trusts of Bishop Hodson's will, as settled and approved by order of Court of Chancery, dated February 18, 1867; *App.* xiv., *pages* 1301, 1302.

Letter from Rev. R. M'Morris to Rev. Dr. Wilson, dated February 22, 1869, respecting establishment of Glennaquin National school; *App.* xv., *page* 1303.

Letter from Rev. O. Leitch to Rev. Dr. Wilson, dated February 23, 1869, respecting establishment of school at Corryvady, near Donegal; *App.* xv., *page* 1303.

Statement of Rev. R. Beattie, Convoy, of the number of children on the rolls of certain National schools, and the number present on 22nd or 23rd February, 1869, according to religious denominations; *App.* xv., *pages* 1303, 1304.

Report of J. W. Kavanagh, esq. (formerly) Head Inspector of National schools, on Clonmel model school, for the year 1851; *App.* xvi., *pages* 1304–1311.

Unpublished portion of Mr. Keenan's report for 1858 (on inadequacy of Training Department, &c.), with minutes of Board, &c., relative to same; *App.* xvii., *pages* 1311, 1312.

Correspondence between Archdeacon Stopford and J. W. Kavanagh, esq., in the *Morning News*, in reference to pamphlet by the former on "The Catholic Case Stated;" *App.* xviii., *pages* 1312–1315.

REVISED CODE:

Superiority of, to the old code; its advantages; *Toole* 21218–21231.

Advantages of the system under the English revised code; *ib.* 21353–21358.

Power of every child to read under, according to the standard he is in, and the length of time he has been in school; *ib.* 21492–21496.

RIBBONISM:

Success of the "missioners" of St. Vincent de Paul in putting down Ribbonism in part of diocese of Armagh; maxims and teaching of Mr. Trench served to increase it; preaching and labours of "missioners" tended to put an end to it; *Card. Cullen* 27272–27275.

RICHARDSON, JOHN G., Esq., Member of the Society of Friends, patron of National schools, evidence of; *pages* 1142–1146.

RINTOUL, JOHN, Esq., M.A., Professor in Training Department, Marlborough-street, evidence of; *pages* 1155–1164.

ROBERTSON BEQUEST:

One school under, in Raphoe, an exclusively Protestant school; *Atkins* 20712; *M'Menamin* 22223–22225.

ROBINSON, HENRY, Esq., Inspector of Poor Law Unions, evidence of; *pages* 411–423.

ROBINSON, Rev. A.:

Patron of Broughshane school, indignantly denies that any interference was ever attempted with the religion of Roman Catholic pupils, with counter-statements; *Kavanagh* 22639–22645.

ROMAN CATHOLICS:

As to religious instruction of Roman Catholic children in schools by Protestant teachers, with reference to O'Reilly's return; *Hunter* 3316 *et seq.* 3529.

ROMAN CATHOLICS—*continued.*

Opposition of, to new form of vesting schools in National Board; *Kavanagh* 10352. Did not object to original principle; *ib.* 10354.

Number of Roman Catholic children attending Erasmus Smith's schools small and decreasing; *Thorp* 12881–12886. May be fairly treated in a school where compelled to read the Protestant version of the Bible; *ib.* 12907–12913.

Answer questions in Scripture better than Protestants; *Rudkin* 13536–13539. 13586–13588.

Not interfered with in Wesleyan schools; they leave school at the time of religious instruction; *M'Millen* 14541.

A few Roman Catholic children attend Wesleyan schools; *ib.* 14655.

Reason for attendance of Roman Catholic children at schools under the Kildare-place system; *Andrews* 14814–14816. Average attendance of, in schools under witness; *ib.* 14836.

Do not recognise the right of their bishops to control educational establishments generally, only as to faith and morals; *O'Reilly* 14950.

Much difference of opinion on many subjects connected with education between Catholic clergy and laity; *Warren* 15353–15356.

Are satisfied with National system, and would deplore the introduction of denominationalism; *Wilson* 16037. Have not publicly expressed their opinion, not wishing to put themselves in opposition to their clergy; *ib.* 16196, 16197. 16211–16216. 16306 *et seq.*

Roman Catholic children ordered away from witness's (Presbyterian) schools; *J. S. Porter* 18103, 18104.

Demand the denominational system only at the instance of their priests; *ib.* 18210–18219.

In Canada may establish separate schools for their own faith, but they generally avail themselves of the common schools; *Gordon* 18786–18794. 18806, 18807. 18968–18971. Separate Roman Catholic schools are supported entirely by those who withdraw from common schools, even though not used by them; everyone is taxed, whether they have children or not; *ib.* 19111–19113. Separate schools have been merged into common schools; *ib.* 19114–19118.

Are dissatisfied because they cannot teach their religion as they like; *Atkins* 20800, 20801.

The Irish Society gives no funds exclusively to, presumably from the terms of its charter; *Williamson* 21041, 21042. 21059. 21083. 21114. 21145. No Roman Catholic body has ever applied for subscriptions; *ib.* 21121. 21124. 21146. It is not likely they would do so, under any circumstances; *ib.* 21127–21129. 21141.

Preponderance of Roman Catholic lawyers among members of National Board; *Macdonnell* 23973.

Indisposition of middle-class laity to break with the bishops, with reasons; a large educated class anxious to co-operate with Protestants for the general good; *Whittle* 24120–24124.

In England not so bigoted as in Ireland; *Card. Cullen* 27265.

See also ROMAN CATHOLIC BISHOPS AND CLERGY. ROMAN CATHOLIC CHURCH.

ROMAN CATHOLIC BISHOPS AND CLERGY:

Decision of the bishops in 1826, against giving up school property for the sake of parliamentary support; alarm of, on publication of Board's rule in 1845, as to future schools being vested in it; *Kavanagh* 10817–10820.

Objection of bishops to both model schools and Queen's colleges; the fact of same parties holding appointments under the Board and in the colleges confirmed their apprehensions; *ib.* 12078–12080.

Increasing hostility of bishops to the mixed system attributable to their belief that the object of the State was to undermine their religion; *Kavanagh* 12084, 12085. Influence of Dr. Whately's published opinions on this subject; *ib.* 12087–12090.

Clergy do not give religious instruction in school, but in church, partly because they dislike the present National system; *O'Reilly* 14924.

Determined opposition of bishops to the Board's model schools; *ib.* 14947–14949.

Any steps taken by clergy to enforce their views admitted to be proper; *ib.* 14972–14975.

Bishops are considered by Catholics to have a right to control training schools, both as to teachers and books; *ib.* 14889–14891.

As to bishops' power of prohibition of teacher; *ib.* 15065–15067.

Bishops do not insist on decisive authority as to secular books; *Bp. Keane* 15570.

If objectionable books were used, bishops would claim the right to put them out of the school; *ib.* 15573–15576.

Bishops should have sole management of denominational training schools as far as religion is concerned; *ib.* 15597, 15598.

The bishops in Ireland have been ignored altogether; now that the State feels the importance of winning their confidence, they must assert their rights; *ib.* 15606.

Bishops have used their influence to prevent the spread of disaffection; *ib.* 15625.

Clergy, as a rule, give religious instruction in National schools; *ib.* 15629.

The right of the clergy to interfere in matters of education is derived by delegation from heaven; *ib.* 15634–15637.

Efforts of clergy to promote education in Ireland; *ib.* 15638.

Interference of clergy as to circulation of objectionable newspapers; the clergy would not interfere in politics if politics would let religion alone; *ib.* 15642–15644.

Meaning of the words "to teach," in the Divine commission to the bishops, as deduced from the original Greek; *ib.* 15721–15738.

Clergy having now a discretionary power in non-vested schools, they would object to allow religious instruction different from their own faith to be given in their schools; *ib.* 15765, 15766.

The minority of the bishops are bound by the majority in synodical matters; *ib.* 15841.

Clergy generally attend the schools to give religious instruction and to examine the children, but from their numerous duties they are not able to visit so often as desirable; *ib.* 15842–15849.

Catholic bishops do not demand any right in respect of education beyond what is actually allowed to them in England; *ib.* 15927.

Desire of Roman Catholic clergy that gentry should take an interest in schools in the way of annual donations; *Macdonough* 17884–17886.

Bishops have the supreme power of teaching, their subordinates being accountable to them for all matters of school discipline; *Toole* 21871–21885.

Number of schools under priests; no desire for the State to step in and take the children out of their hands; it is sufficient that he exercises his authority, knowing he does so under the control of the State; *Whittle* 22152–22154.

Clergy insulted while visiting Fountain-street schools, Belfast; *Kavanagh* 22417.

Opposition of clergy to National system; it was accepted by them not as an experiment, but as a necessity; *Forde* 23033–23041. 23046.

Their claims to supremacy extend to university and secondary as much as to primary education; *Macdonnell* 24065–24068.

Their policy everywhere is to grasp the whole control of education; they are strengthened in doing so by the anti-state feeling of the Irish; ground their claim on their duty of controlling faith and

ROMAN CATHOLIC BISHOPS AND CLERGY— *continued.*

morals, but some openly demand exclusive authority over all teaching; *Whittle* 24083, 24084. They do not possess such authority in any part of the world; *ib.* 24086.

The tendency of predominant party among the clergy being so mischievous to education, it is the duty of the community to resist putting education into their hands; *ib.* 24087.

Nomination of bishops lately direct from Rome; *ib.* 24091. 24103, 24104.

Present claims of the bishops are of recent introduction; the earlier opposition to the National system was from something of national feeling; latterly it has been more subject to the Papal Court; *ib.* 24091.

Their political influence is great, but it is likely to diminish; *ib.* 24094.

In their pastorals discuss all sorts of political questions; evident aim of, is to rid themselves of all State control, and to lead others to adopt the extreme views of the Continental ultramontane party; *ib.* 24098–24102. 24105, 24106.

Complaint of the bishops to Mr. Cardwell, that Government treated not with them but with the parents of the children; *ib.* 24113.

Priests do not enter into the designs of the extreme party; they have a genuine national spirit; *ib.* 24119.

In Naples, where the Catholic Church is "free" to educate, 80 per cent. of the people cannot read or write; *ib.* 24125, 24126.

First put forth their sole claim to educate the people about 1850; *ib.* 24127.

If the demand of the bishops be granted, freedom of education will be altogether ignored; the teaching power of the Church is a great mischief; the predominant party are anxious to keep Roman Catholics separate from Protestants; *ib.* 24135–24137.

Difference between England and Ireland with respect to State aid to schools, as bearing on pretensions of Irish clergy; incorrect popular view of power of, in Belgium, &c.; *ib.* 24171–24177.

Bishops have all along recognised parental authority; *Longfield* 24491.

In England the bishops claim the right of controlling education generally so far as religion and morals are concerned, and this the laity would universally admit; the laity, however, would claim the right of interfering in financial matters, and in education properly so called; there has never been anything like a difference in principle between them; *Allies* 25632–25640.

Bishops have always been in favour of denominational education, both at home and abroad; *Card. Cullen* 26598. 26630. Accepted National system as an experiment; *ib.* 27044. Mode of electing bishops in Ireland; *ib.* 27192. Divine commission of bishops as to education; *ib.* 27199 *et seq.*

ROMAN CATHOLIC CHURCH:

Doctrines on matters of faith and belief are collected, as in the Council of Trent, or the Catechism of Pope Pius; *Bp. Keane* 15681.

Does not recognise the Established Church, or any other section, as forming part of the Catholic Church; *ib.* 15889–15902.

Divine commission of bishops as to education; extent and whence derived; points to which control of Church extends; *Card. Cullen* 27199–27219.

Teaching of, does not prevent development of genius; its infallible teaching a protection against error, not an impediment to real progress; right of bishops has always been maintained, never been abandoned; reasons for assertion of right now; *ib.* 27220–27229.

ROMAN CATHOLIC LAWYERS:

Preponderance of, on the National Board; reasons for it; *Macdonnell* 23973.

ROMAN CATHOLIC SCHOOLS:

Number of, founded wholly or in part by subscriptions, receiving no aid from the State previous to 1824; *Mahony* 17211, 17212.

In England are constantly on the increase; *Toole* 21506, 21507. Are inspected by Roman Catholic Inspectors only; necessity of this; they are often more strict and show less mercy than others; *ib.* 21510–21516.

ROMAN CATHOLIC SCHOOLS IN MANCHESTER:

St. Wilfrid and St. Alphonsus; attendance, school fees, and condition of pupils, and character of teachers in; *Toole* 21171–21187. 21193–21196. The Catholic Poor School Committee exercise no control over; *ib.* 21192, 21193. Dimensions and teaching staff of St. Wilfrid's schools; *ib.* 21232–21236.

St. Wilfrid's school has been examined by two Inspectors; the girls' and infants' schools are taught by nuns; *ib.* 21246-21256.

Religious instruction imparted in; *ib.* 21272–21277, *and page* 946.

Books in use at, are superior to National Board's books; variety in books desirable; this would be no difficulty to Inspectors; *ib.* 21278–21284. Book grants not now allowed; *ib.* 21454.

Age at which children leave; religion pervades the whole teaching in; the presence of Protestants is ignored; *ib.* 21329–21341.

Inspection of, by Assistant Commissioners under Duke of Newcastle's Commission, was not refused by witness; *ib.* 21403–21413.

Religious practices in, same as in Catholic colleges; Protestant children from Ireland always found by witness to know how to make sign of the cross and say "Hail, Mary," when the clock strikes; English Protestants do not; *ib.* 21455–21457.

Further particulars respecting; class tests; age at which children leave; amount of information acquired; intellectual powers of children; subsequent literary ability; lending libraries; *ib.* 21799–21823.

Protestant pupils can be exempted only from the direct religious lesson; they must participate in all others with the rest of the children; *ib.* 21824–21827.

Are under no other control than that of Committee of Council; are in no way connected with the Jesuits; *ib.* 21829–21832. 21854–21858. Nor are the nuns who teach in the schools; *ib.* 21833–21838.

Time-tables of boys', girls', and infants' Roman Catholic schools at St. Wilfrid's, Hulme, Manchester, under Committee of Privy Council; *ib. pages* 946, 947.

ROSS, DAVID, Esq., Barrister-at-law:

Graduate of Queen's University, late Secretary to Queen's Colleges Commission, &c., evidence of; *pages* 764-776.

"ROUND ROBIN:"

Or joint letter of five Head Inspectors to the Commissioners on grievances to which they were subject; causes of its preparation; *Kavanagh* 10769–10780; *pages* 453–457.

ROYAL FREE SCHOOLS. *See* CLARE-STREET COMMISSIONERS: 2. *Royal Free Schools.*

ROYAL HIBERNIAN MILITARY SCHOOL, DUBLIN:

Was purely Protestant up to 1839; one-third Catholics are now allowed, who are entitled to a free profession of their religion; very few officers are Catholics; books used in, are grounds of grave complaint; *Card. Cullen* 26633–26639.

RUDKIN, WILLIAM HENRY, Esq., sole Inspector of the Erasmus Smith's schools, evidence of; *pages* 572–577. 593–596.

SACRAMENTS :

Sometimes denied to parents whose children attend the model schools contrary to ecclesiastical prohibition ; *Kavanagh* 12023–12025.

Refused to both teachers and scholars for attending schools under Protestant management ; instances named ; *O'Hara* 26705–26713. 26766. All, except marriage, are denied to teachers who attend the Clonmel model school ; *ib.* 26779, 26780.

SACRED CONGREGATION :

At Rome, opinion of, whilst favourable to National system, that school-houses should be vested in clergy ; *Kavanagh* 10818.

SACRED HEART :

School conducted by ladies of order of ; *Forde* 22979–22983.

SAINT ALPHONSUS' SCHOOLS. *See* ROMAN CATHOLIC SCHOOLS IN MANCHESTER.

SAINT FINBAR'S CONVENT NATIONAL SCHOOL :

In Cork, has 120 young persons in the highest classes whose ages average 19·9 ; it is better that these persons should be at school, there being little employment for females in Cork ; *Keenan* 1802–1805. 1824.

SAINT WILFRID'S SCHOOLS, HULME. *See* ROMAN CATHOLIC SCHOOLS IN MANCHESTER.

SALARIES OF TEACHERS :

The salaries of the teachers, about 8,100 in number, are paid entirely by the Board, local parties giving what they think right ; no difference is made by the Board as to vested or non-vested schools ; *Macdonnell* 82–86.

The scales of payment for teachers have considerably increased in the last twenty years ; *ib.* 328, 329. Present scale too low ; an increase is required ; the best way is to give them a house and garden ; *ib.* 331–335. Seven thousand teachers have been trained ; there now remain 3,320 ; falling off is attributed to insufficiency of salary ; *ib.* 336–338.

The salaries of principal teachers vary from £18 to £52 ; upwards of 1,300 receive only £18 a year ; *ib.* 340–347. The salary of a teacher of a first-class school with thirty-five children would be £52, and a monitor might be allowed, whose pay would range from £2 to £10 ; *ib.* 384–388.

It would be difficult to raise money in Ireland to augment teachers' salaries ; Parliamentary power to take land for teachers' houses and gardens would, in some cases, be desirable ; *ib.* 390–395.

Desirability of a teacher having three or four acres of land attached to residence ; he could then teach the Board's Agricultural Manual to the pupils ; *ib.* 419–421.

Teacher's salary is not awarded on results, but paid according to his efficiency ; *ib.* 505–508.

The total subscriptions received by teachers in 1866 amounted to £12,461 ; value of residences and children's pence not included in this amount ; *ib.* 743, 744. 746.

Though the salaries have been increased of late years, they still fall short of what they should be ; *ib.* 24002–24008.

Number of scholars to entitle a master to full salary ; number of assistants and monitors ; their salaries ; *Keenan* 1040–1046.

Payment of, annually is impossible ; monthly payments would cause confusion ; the latter point has been debated for years ; *ib.* 1085–1087. 1186–1190. 1246, 1247. No difficulty in getting money for the Post Office orders by which salaries are paid ; *ib.* 1412, 1413. The proposition for teachers to be paid by Inspectors was deemed impracticable ; *ib.* 1509, 1510.

Present and proposed, in schools with from 75 to 300 pupils ; *ib.* 2230–2240. Most desirable to accomplish the system of quarterly payments ; *ib.* 2256–2259.

SALARIES OF TEACHERS—*continued.*

Of head masters from £75 to £100 a year, and £20 for each pupil-teacher ; a good model school is worth from £180 to £200 a year ; *Newell* 2960, 2961.

Local contributions to, very small ; subscriptions are generally applied to teachers' salaries ; *ib.* 2988–2993.

Should never be less than £40 a year ; of good men from £60 to £70 ; *ib.* 2994, 2995.

Should be paid monthly ; *ib.* 2999. Plan suggested for more expeditious payment than at present ; *ib.* 3007 ; it would be of advantage to the teachers, and cheaper than that in use, Post Office orders costing £1,200 a year ; *ib.* 3032–3036.

No fixed mode of proceeding in cases where sums given for teachers' salaries are not applied for their benefit ; method of checking such abuse ; *Kelly* 3104–3106.

A few years ago the salaries of schoolmasters were much increased to meet the higher expense of living ; there should be further increase to keep pace with the improvement of the country ; *Hunter* 3198–3200.

Present mode of payment of, is attended with difficulty and delay ; an improved mode might be devised ; *ib.* 3591–3594. Teachers' salaries were at one time paid to the managers ; *ib.* 3595.

The supply of teachers is sufficient for the pay offered ; *ib.* 3210.

The salary of a first-class teacher is depressed unless he has an average attendance of 35 ; a first-class salary once enjoyed is not reduced unless the attendance falls to 30 ; *ib.* 3589, 3590.

The salaries of teachers are remitted quarterly by means of Post Office orders ; they will be paid ordinarily within three or four weeks after they are due ; the remittances scarcely ever miss in the ordinary delivery ; the order is drawn in favour of the teacher, and sent to the manager ; *Claridge* 3813–3824. The manager has to fill up an elaborate account before payment is made to the teacher ; if manager delays, payment is delayed ; *ib.* 3829, 3830. General routine of business described as to the obtaining, transmission, and payment of the orders ; *ib.* 3831–3838. 3890–3898. 3903–3924. The whole question of teachers' salaries is in a state of transition ; *ib.* 3898, 3899.

A Post Office order in favour of the teacher is sent through the manager ; in most cases the receipt is signed by teacher and countersigned by manager before the Board pays the money ; if teacher goes away before receiving his salary, the manager returns the order ; *Kelly* 3126–3132.

Low salaries a cause of the scarcity of assistant teachers ; *O'Carroll* 4410, 4411.

Quarterly payments are satisfactory ; monthly payments unnecessary and impracticable, they could not be made through the Inspectors ; *Sheridan* 4770, 4771. 5405–5412 ; of teachers are very poor ; an efficient teacher of lowest class should be able to earn mechanics' wages ; *ib.* 4786–4794. 5197–5201.

Increase of, in higher classes, an inducement to endeavour to rise ; *ib.* 4799.

The increase of salary resulting from classification compensates for loss of salary during training ; *Butler* 6394.

Should be fixed partly by results and partly by classification ; *Fitzgerald* 8630, 8631.

Of the different classes of masters and mistresses not sufficient ; if the results were satisfactory after three or five years' practice a teacher ought to look for an increase ; *Bp. Dorrian* 8762–8769.

Desirability of recasting ; *Kavanagh* 12434.

In female lay schools have trebled since 1839 ; there has been no improvement in convent schools ; *ib.* 12686, 12687.

Should be increased by payments by results ; a superannuation fund formed by deductions from salaries would not be popular ; *O'Reilly* 15020. 15024.

SALARIES OF TEACHERS—*continued.*

Local contributions towards, what might be expected; *Warren* 15240.

Are insufficient; some inducement should be held out in the shape of a reward for continued exertion; *Bp. Keane* 15670.

Are too low; should be increased, chiefly in the direction of first of third, and more especially in the case of the older teachers received into connexion with the Board several years ago; *Mahony* 17019–17021. 17029.

Of teachers insufficient; complaints of teachers thereupon; might be increased by a local rate; statement of various amounts of; rate depends on classification, and on average attendance of scholars, &c.; *Macdonough* 17616–17674. What the rates should be; *ib.* 17708–17717. 17724–17732. 17779–17784.

Are already too low, and would not endure a rebate for pensions; *ib.* 17696. Of female teachers less than of male teachers; *ib.* 17733. Some teachers have extra allowances for teaching extra subjects; *ib.* 17740–17743.

Increase in, should be provided for by local rates; *ib.* 17779–17784.

Originally granted in augmentation of local contributions; proportion of one to the other; a large increase ought to come from locality; *ib.* 17856–17861.

Not sufficient; *J. S. Porter* 18071. Increase in, should be made dependent on results; *ib.* 18073–18075. Should be aided by residences; *ib.* 18084.

Complaint as to, from teachers of Ulster; payment should be made by Post Office order direct to the teacher, or by Inspector; increase of, from local sources very precarious; *Matthews* 18268. 18283, 18284. 18387, 18388.

Of Irish teachers about one-third those of English teachers; grounds for the assertion; *ib.* 18269–18274. Have been augmented, but not in sufficient proportion to other professions; *ib.* 18277.

Payment of teachers' salaries often delayed on account of nonadjustment of accounts or absence of manager; *ib.* 18279–18284. 18414, 18415.

Should not depend on average attendance; low attendance is not the fault of the teacher; *ib.* 18326–18329. 18407, 18408.

Present rate and desired augmentations and alterations of salaries; the lowest class teacher ought to have as much as a common labourer earns; *ib.* 18330–18343. 18453–18455. 18541–18543. Comparison of teachers' salaries with those of policemen and excise officers; *ib.* 18402–18406.

Insufficiency of; *Gallagher* 19153. 19191. Suggested alterations of; *ib.* 19211–19219.

Complaint of inadequacy of, by teachers of Munster; *O'Callaghan* 19757. 19806. Increase of, desired; *ib.* 19784. 19810–19821. No objection to present system of payment of, through managers; *ib.* 19919–19924. 20060, 20061.

Are inadequate; should be supplemented by the State with fixed residences; *De Vere* 20204. Better increased by a residence and kitchen garden than by money; by teaching cooking; and by non-vested training schools, so as to improve the teachers' classification; *ib.* 20211–20214. 20374–20377. 20382–20387. Salaries being regulated on a fixed system, the clergy and gentry have not thought it their office to interfere; *ib.* 20315.

Should be augmented by local contributions, &c.; residence and garden desirable; *Warburton* 20874–20876.

In Roman Catholic schools in Manchester; mode of payment of; *Toole* 21443–21448.

Should be increased by addition of residence and land; *M'Menamin* 21948–21954.

Being dependent on their classification, become unequal to teacher's merits; supposed case exemplifying this view; *O'Hara* 26806–26811.

See also CHURCH EDUCATION SOCIETY: 4. *Teachers and their Salaries.* ERASMUS SMITH'S SCHOOLS. NATIONAL SCHOOLS. TEACHERS.

SANTRY SCHOOL:

The training institution of the Incorporated Society; good education given there; *Hackett* 25788–25793.

Was instituted for the purpose of training Protestant schoolmasters; although the number trained there is small, it is doubtful if a Parliamentary grant would increase its efficiency; young men trained at, readily find situations; success of pupils with Science and Art Department; large grant from the latter; master does not neglect his specified work in consequence; *ib.* 25934–25943. Training staff of; *ib.* 26000–26005.

"SCHOOL:"

Meaning of, in Board's reports; *Fitzgerald* 8559–8563.

SCHOOL ACCOUNTS. *See* ACCOUNTS.

SCHOOL FARMS:

Desirability of attaching small farms of two or three acres to schools; *De Vere* 20221–20226. 20369–20373. 20448–20452.

See AGRICULTURAL SCHOOLS AND MODEL FARMS.

SCHOOL FEES. *See* FEES.

SCHOOL GARDENS:

Importance of; *Card. Cullen* 26613.

See also AGRICULTURAL SCHOOLS AND MODEL FARMS.

SCHOOL-HOUSES:

Payment of rent for, by teachers is very general; *Newell* 24816–24831.

SCHOOL LIBRARIES:

Extract from report of 1855 referring to, recommending their establishment; action of Kildare-place Society on this subject; no action has been taken by the Board in furtherance of; desirability of; *Keenan* 1429–1437. 1488–1490.

See also LENDING LIBRARIES.

SCHOOL REGISTER:

No particular form of, required by Privy Council; *Toole* 21285–21288.

SCHOOL REQUISITES:

Sometimes supplied by teachers to their loss; *Matthews* 18466–18475.

Board does not now supply free stock of books; they supply school apparatus, of a more permanent character; model schools are supplied with free stock as required; *Newell* 24844–24846.

SCHOOL RESIDENCES. *See* RESIDENCES.

SCHOOL SITES. *See* SITES FOR SCHOOLS.

SCHOOL STATISTICS:

Much simplified of late, to the relief of the teachers; *O'Callaghan* 20133–20140.

SCHOOLS IN CANADA:

Information concerning; *Gordon* 18723 *et passim.*

SCHOOLS:

1. *Generally.*
2. *Vested and Non-vested.*

1. *Generally.*

A few well-endowed schools to which teachers could be promoted as to a prize would give life to the system; *Keenan* 1493.

In one sense town schools are better than country schools, as having a greater attendance, and therefore more fees; *Hunter* 3158–3160.

SCHOOLS—*continued.*

1. *Generally*—continued.

Rate in aid towards support of, (not school-houses,) would not succeed in Ireland; education should be provided for, out of Consolidated Fund; *Sheridan* 5140–5145. A few instances of undue multiplication of; probability of increase of small schools; *ib.* 5338–5540.

Schools are generally more comfortable than children's homes, even where fuel is deficient; should be made as comfortable as possible; *ib.* 5390–5394.

Great want of middle schools throughout Ireland; *ib.* 5497, 5498.

Under trained teachers better than those under untrained; *Butler* 6012; *O'Sullivan* 7880–7886.

Common schools in the country are practically denominational schools; objection to one clergyman becoming manager of twelve or eighteen schools when two or three would be sufficient; *Bp. Dorrian* 8756, 8757.

Objections to the rule that a site be procured before a grant be made; instances of its inapplicability, and of exceptions made; *ib.* 8790–8802. 8804–8817.

Inability of bulk of Catholic population to maintain schools; contributions by Catholics for the support of; *ib.* 9167. 9171, 9172.

Catholics saw that the Board intended, by means of its vested schools, to secure the system of schools all over Ireland to itself, therefore they resolved to keep the sites of schools in their own hands; *ib.* 9167–9170.

The selection of a school rests in the parent, guided by the teachers of his Church; if the parent opposes, he acts in violation of his principles; *ib.* 9218–9220.

Schools for a higher class of education very desirable; the only want is to make the present model schools good training schools; Christian Brothers teach the elements of mechanics, and National Board schools should as far as possible teach such things; *ib.* 9221–9233.

Multiplication of, a cause of deteriorated instruction and lessened attendance; are more numerous, not where there is most population, but where there are most religious parties; number of, should be reduced; *Kavanagh* 10173–10185.

Irish people are not universally in favour of denominational schools; *Macdonnell* 11212–11216. 11226–11228.

A school to be useful must be of reasonable size; but from religious difficulties small schools must be aided; *Kavanagh* 12062, 12063. Evil of multiplication of small schools; in large schools teachers are not properly paid; *ib.* 12677.

In remote districts depend mostly on the clergy; *O'Reilly* 14870.

Mixed for boys and girls desirable; some small rural schools of this sort among the best known, generally with female teachers; *ib.* 14903–14906.

Complaint of multiplication of, not known to be well-founded; *ib.* 14917–14919.

Supported by the State, if intended for Catholics, should be under Catholic control; are not made available for all by being made objectionable to some; *ib.* 14959–14961. The State abstractedly has no right to control; the people forming the State have the right; *ib.* 14966–14969. A voluntary rate for support of denominational schools would be adopted in most districts, but not for a stereotyped form of National school; *ib.* 14976–14980.

Too much time taken up in common rural schools with details of grammar and geography; *ib.* 15076.

Patron, on applying for aid, should state his rules of religious instruction, as a security to the State and the public, which should not be changed; *Warren* 15284–15286. 15289.

Only one school belonging to Clare-street Commissioners in connexion with National Board; *Kyle* 15403 *et seq.*

SCHOOLS—*continued.*

1. *Generally*—continued.

Supported by the State should be open to all, the religious scruples of minorities being protected; *Wilson* 16033–16035. If clergy be excluded from management of, Inspectors should become managers, and their numbers increased; the Board should take more of the local management into its own hands; *ib.* 16278–16280. A committee of management of parents would answer in some places; *ib.* 16281.

No reason to disapprove of mixed schools for boys and girls; *Petticrew* 16692–16697. Female teachers well able to manage such; *ib.* 16698.

If schools were all under denominational management, the attendance would not be denominational; as in England (proved by the Duke of Newcastle's Commission) children of all denominations attend the same schools and receive a common religious education; *Mahony* 17137, 17138.

Difference in payments to ordinary, and convent, and monastic schools; payments should be by results; *Gaynor* 17392–17398.

The attention shown to children, and their improvement in learning, attract parents more than the church of the teacher; *J. S. Porter* 18106.

All private managers and local patrons should be swept away, and the schools placed under paid or unpaid Commissioners of Education, under local inspection but not local authority, as in the present state of things, which it is not desirable to alter; *ib.* 18113–18119.

Cleanliness, order, and habits of decorum of vital importance in schools, *ib.* 18237, 18238.

Local tax in aid of, desirable; *ib.* 18255–18257.

Few ordinary schools wherein foreign languages are taught; desirability of teaching Latin and French; pupils would like it; *Matthews* 18297, 18302.

Many cases where teachers have to pay rent for their school-houses; *ib.* 18310–18325.

Some restraint should be put upon the establishment of rival schools; *ib.* 18359–18362.

Teaching primary schools not a suitable career for ambitious men; it is sufficient exercise for powers of an energetic man; *ib.* 18559, 18660.

Children generally go to the school nearest to them; those with a higher character for instruction generally attract the more advanced children; *De Vere* 20198, 20199.

Schools for primary education should be supported partly by Consolidated Fund, and partly by local contributions and school-fees; *ib.* 20355–20357.

Claim of small schools for aid; *Bp. of Ossory* 20622–20626.

Small schools necessary in some localities; *ib.* 20683, 20684. Church Education Society might assist such, when Government would not; *ib.* 20686, 20687.

Description of, in witness's parish, at Ramelton; in Gorey; *Atkins* 20697–20714.

Children are often sent where they will be best taught, irrespective of religious instruction; *ib.* 20752–20754.

Suggestion of the grouping of small schools, under a circulating master; *ib.* 20755.

Schools of the Irish Society are in connexion with the National Board; high opinion of the secular knowledge taught in; are mixed in attendance, but the great majority are Presbyterians or Episcopalian Protestants; *Williamson* 20959. 21098–21105.

In the parish of Cappagh, Tyrone; about ten or twelve Roman Catholic children in each of the four; some Protestant children attend the Catholic schools in the parish; *Byrne* 21558–21566. No inconvenience or indifference to religion arises from the mixture; *ib.* 21587–21590.

No evil apprehended from rival schools; *ib.* 21675, 21676.

As to Roman Catholic teachers and children in Protestant schools, and *vice versâ*; separate schools would be preferable; *ib.* 21677–21679.

SCHOOLS—*continued.*

1. *Generally*—continued.

Can be established by second order of Roman Catholic clergy without previous permission of bishop; in teaching, the bishops have the supreme power, the subordinates being accountable to them; *Toole* 21871–21885.

In many places are gradually acquiring a denominational character; *M'Menamin* 21903, 21904.

Time occupied by witness in visiting schools in Ulster; *Kavanagh* 22422–22469.

Between 1831 and 1840 joint applications for aid to, were regarded with favour; the practice was broken through in 1839 in deference to the Presbyterians; schools under joint management more difficult to manage; *ib.* 23461–23469.

Wesleyan schools are non-vested chiefly, and are all under Wesleyan management; *Tobias* 22848–22851.

Prevalent idea that if Government pay for, the people ought not to pay anything; *Forde* 22986.

Schools built by Protestant landlord, even with Roman Catholic teachers appointed by him, can only be tolerated; witness would not allow the mixed system under any circumstances; *ib.* 23094, 23095.

In schools under a denominational system any books could be used; people will go where they get the best article; *ib.* 23128–23130. Inspection of such schools by Protestant Inspectors would be but superficial; *ib.* 23131.

As to title by which witness holds his schools, and as to the general question of the legal holding of Roman Catholic schools; *ib.* 23132–23147.

Desirability of laity wholly or partly supporting, and taking a greater interest in the administration of; *ib.* 23242–23246. General backwardness of laity regarding schools; *ib.* 23247, 23248.

A really Catholic school cannot be carried on to which a Protestant parent would have no objection; *ib.* 23278. The minor religious observances of Catholics are carried on more or less in schools of secular teachers; *ib.* 23283.

Reasons for non-attendance of Sunday-school scholars at day schools in north of Ireland; *Pilkington* 23507–23509. 23512.

Reasons for the alterations in rules of National Board in 1840 and 1860 in favour of Presbyterians and Church of England children; juxtaposition of schools often advantageous to both; *Macdonnell* 23722–23725.

Three-fourths of, in Ireland, being in the hands of priests, are so far denominational; but the State control, through inspection, is beneficial; the clerical party hope it will be lost; *Whittle* 24162, 24163.

Inferiority of, in Dublin, and of teachers; *Sheehy* 26369. 26385–26387. The schools in Dublin are not neglected in order to drive children to central schools in Marlborough-street; reasons for the low character of schools and teachers in Dublin; *ib.* 26512.

Mixed schools preferred, with sufficient safeguards against proselytism; Board's rules, if carried out, are sufficient; *ib.* 26554–26568.

The obligation of beneficed clergymen to maintain schools would not meet the case of Clonmel district; there cannot be a school without scholars; the Protestant minorities there are very small and scattered, except in the towns; *O'Hara* 26871–26882.

2. *Vested and Non-vested.*

Summary, by provinces, of vested schools, at end of 1867; *Kavanagh, page* 435.

Little practical difference between vested and non-vested schools; a vested school is partly built by the State, and different religious denominations can instruct in it according to their views; in a non-vested school the manager can confine the religious instruction according to his views; *Macdonnell* 670. A vested school cannot cease to be vested unless there is a clause in the deeds allowing the

SCHOOLS—*continued.*

2. *Vested and Non-vested*—continued.

trustees to redeem; *ib.* 671. Distinction between vested and non-vested schools commented on; *Macdonnell* 758–761.

Distinction as to rules between vested and non-vested schools came into operation about 1840; *Keenan* 972, 973. 1116, 1117. Admission of clergymen to give religious instruction to children in vested schools; *ib.* 974–976. Managers frequently ignorant whether their schools are vested or non-vested; *ib.* 975.

Vested schools proportionately less mixed than non-vested; *ib.* 976.

Condition of recently vested schools satisfactory; some erected many years since have fallen into bad repair, and others have been diverted from school purposes; vested school-houses are better than the non-vested; *ib.* 1008–1011. 1901, 1902.

About three-fourths of the vested schools are under Catholic management; number of vested and non-vested schools under clerical managers and under lay managers; *ib.* 1024–1030.

If patron of vested school prevented religious instruction by pastors not of same religion Board would interfere; *ib.* 1250–1252.

Difference in the rule respecting religious instruction in vested and non-vested schools has little influence on people in making their choice; the patron of the non-vested school declares what religious instruction is to be given, in the vested school he must admit whatever teacher the parents provide; *ib.* 1425–1427.

Board makes grants for enlarging vested schools only; non-vested schools are three times as numerous as the others; *ib.* 1770–1772.

Mixed attendance does not depend upon a school being vested or non-vested; the people do not know the difference; *Hunter* 3604–3607. In attendance at mixed schools, the religious question does not enter into computation so much as the qualifications of the teacher; *ib.* 3608.

Early distinction between vested and non-vested schools in the history of the National Board; reference to Lord Stanley's letter contemplating that the Board should build or possess all the school-houses that would be required; *ib.* 3609–3618.

Number of vested schools in Kerry has increased greatly since 1860; *Sheridan* 5002, 5003.

Vested schools are usually built according to plans of Board of Works, which are often unsatisfactory; non-vested school buildings seldom so good as the vested; *ib.* 5260, 5266.

Patrons vest now more freely than formerly; chief obstacle to vesting is difficulty of obtaining sites; one whole district without schools because two proprietors will not grant sites; other causes besides difficulties as to sites operate against vesting schools; vested schools in ruins; one denounced by Catholic archbishop is now in ruins; *ib.* 5515–5517. The majority are now vested in trustees; when schools were vested in Board extension was greatly prevented; proprietors were more ready to give sites when schools were vested in Commissioners; *ib.* 5518–5530.

The Commissioners, before making a grant for building, must be informed as to trustees and security for the site; the trust being that no other than the National system will be taught in the school; the trust is no security to Roman Catholics; *Bp. Dorrian* 9189, 9190.

Original principle as to trust deeds being vested in Board; its impracticability; incorporation of Board in consequence; opposition of Roman Catholic body to the new form of vesting deed; *Kavanagh* 10350–10353. They did not object to the original principle; *ib.* 10354.

Objection of Episcopalians and Presbyterians to original principle of vesting in trustees; *ib.* 10354, &c. Of the Church Education Society; *ib.* 10358,

SCHOOLS—*continued.*

2. *Vested and Non-vested*—continued.

10359. Presbyterians never had any vested schools; *Kavanagh* 10360. &c.

Return of the Board in 1864 to the principle of local vesting; three phases of previous system; disastrous effect of Board's attempt in 1845 to get possession of all the school property in the kingdom; proportion of expenditure on model schools and ordinary schools during twenty-five years; cessation of applications to build in consequence of the changes; statistics of schools built, repaired, &c., during the periods of *local*, *corporate*, and *optional* vesting; *ib.* 10812–10816.

Decision of Roman Catholic bishops against giving up school property; abandonment of Lord Stanley's project of vesting aided schools in Board; opinion at Rome in favour of vesting school-houses in clergy; alarm of Roman Catholic bishops on publication of Board's rule in 1845; means taken by the Board to enforce their rule; change of rules in 1837 necessitated change in trust deed; *ib.* 10817–10825.

Opposition of Presbyterians to vested schools; *ib.* 10826–10832.

Want of confidence caused by change of Board's rule as to; return of Board to original obligation; *ib.* 10833, 10834.

Number of vested schools in 1867; some of these are suspended, some are the Board's model schools; amounts contributed to, by the state and by local parties; title defective of many; *ib.* 10836–10846. Proportions expended on ordinary vested schools and model schools; *ib.* 10845–10856. One-third of non-vested schools, worth perhaps £100 each, erected and maintained solely by localities; *ib.* 10845.

As to use of non-vested schools for religious worship; *ib.* 10907–10924.

Objection of Roman Catholics to vested schools, not liking to bind themselves to an experimental system; *ib.* 12535.

No difference between, as to obligation to exclude children from adverse religious instruction; *ib.* 19479. 19481–19487.

Distinction between, first distinctly stated in 1843; prior to 1840 it was obligatory on patrons of both to provide time and place for separate religious instruction; *ib.* 23449. 23454.

The right to give religious instruction in vested schools little used; *Macdonnell* 11169.

Ordinary repairs of non-vested schools might be made by Government; much trouble about repairs of vested schools; *ib.* 11170–11174. 11208. 11326–11329.

Desks, &c., might be furnished by State at little expense; *ib.* 11208–11211.

Proportion of vested schools under Presbyterian managers, prior to 1840; *Berkeley* 11765–11768.

As to building of, by or under Board of Works; estimates for four classes quoted; *Stack* 14066–14081. None for less than 60 scholars built by Board of Works; *ib.* 14153. Old plans still used; better made but not adopted; *ib.* 14154–14158.

Some are under local management, some are managed by the Board; *M'Millen* 14607. In vested schools religious instruction is given to Roman Catholics and Protestants alike; in non-vested schools, where there are Catholic children under a Protestant master, the teacher is prohibited from giving religious instruction; *ib.* 14627.

Distinction between vested and non-vested schools; non-vested are objectionable; *ib.* 14702.

Difficulty in getting joint managers for non-vested schools; *Kyle* 15411.

Not many vested schools under Protestants or Catholics in Cloyne diocese; Roman Catholic clergy give religious instruction in vested schools of which they are patrons; *Bp. Keane* 15539–15544.

There are many non-vested under Roman Catholic patrons in Cloyne diocese; *ib.* 15545.

Those vested in the Board are frequently in bad repair, from the never-ending round of letter-writing and confusion; non-vested schools are repaired by the managers; all schools should be kept in repair by the State; *Bp. Keane* 15651, 15652.

Repairs by teachers much to be regretted; some means should be taken to relieve the teachers of this; there would be no occasion for a local Board to effect it; it might be done between the Inspector and manager; *ib.* 15654–15660.

Religious education of the minority in non-vested schools was obligatory by Lord Stanley's letter; *ib.* 15776.

As a rule, the ministers of the three principal religious bodies do not go into schools under different management; *ib.* 15808.

State-paid schools must be open to all; many non-vested schools connected with the Board are attended by children of only one denomination, but the school is not denominational for that reason; the conscience clause protecting the smallest minority is the essence of the system; *Petticrew* 16505–16510. 16514–16516.

Schools of which witness is manager are non-vested; having Church and Roman Catholic schools near at hand; the attendance in all is mixed; no objection to Presbyterians attending the Catholic school, the rules are honourably observed; children mix cordially together; *ib.* 16518–16539.

As to provision for religious instruction to minorities in non-vested schools, under Presbyterian managers; *ib.* 16650–16656. 16657–16674.

Teaching of Presbyterian children by a Roman Catholic master; *ib.* 16675–16685.

Existence of non-vested schools previous to junction of Presbyterians with Board; *ib.* 16798, 16799. Number of Presbyterian non-vested schools in connexion with the Board previous to 1840; *ib.* 16802–16804.

Presbyterian schools are non-vested, the denomination desiring to keep them in its own control and management; non-vested schools are best for Ireland; as to schools vested in the Board and vested in trustees; only the pecuniary advantage to schools being vested in the Board; the subject of vested or non-vested schools, as such, has not been before the Presbyterian body; *ib.* 16842–16854.

Vested schools were originally an essential part of National system, which was departed from through force of circumstances; *ib.* 16895–16902.

The establishment of non-vested schools no departure from the fundamental principles of National Board; admission of those lately built only an extension of the system; *ib.* 16896–16902.

Statements as to time for religious instruction in non-vested schools, and as to modifications of rule relating to it; *ib.* 16912–16935.

Non-vested schools originated in recognition of existing denominational schools; *ib.* 16957–16961.

Non-vested school in Naas, with 3 Protestants to 150 Catholics; *Macdonough* 17966–17969. Not regarded as a mixed school; *ib.* 18008. Pupils in, provide for incidental expenses; manager repairs; as to teachers and monitors in; could not be worked to better advantage; *ib.* 17996–18003.

The encouragement by the Board of great numbers of non-vested schools built in close connexion with churches or chapels, and managed by the ministers, is a proof of the Board's drifting into denominationalism; *J. S. Porter* 18087.

Witness's schools are non-vested, and are in connexion with the Board, notwithstanding the latter's inclination to denominationalism; *ib.* 18094–18099.

Patrons have always claimed the right to use non-vested schools for Sunday teaching; *ib.* 18100.

Utter disapproval of distinction between; Board's aid should be withdrawn immediately from non-vested and all Church or conventual schools; *ib.* 18225–18229.

SCHOOLS—*continued.*

2. *Vested and Non-vested*—continued.

Difference between non-vested schools and Canadian schools; *Gordon* 19078–19082.

In vested schools all the clergy have a right to come in and teach religion; in non-vested schools the religion is given according to the will of the manager; in the secular department the teaching, the books, and inspection are the same; *De Vere* 20302–20309.

Complaints of delay by Board of Works in building, repairing, &c.; *ib.* 20460–20470. 20479–20481.

Distinction between; *ib.* 20488–20506.

No difficulty in Elphin parochial school (non-vested) with regard to religious instruction for twenty or twenty-five years; *Warburton* 20897–20900.

Religious instruction of Protestant children in a vested Roman Catholic school, by a Protestant curate; *Byrne* 21641–21650.

Instance of non-vested school under a Church clergyman with a Roman Catholic master, who reads the Authorized Version to Protestant children; *ib.* 21651–21654.

No instance known of application by priest to give religious instruction in Protestant non-vested school; *ib.* 21701–21702.

Facilities afforded by Government in regard to religious instruction in vested schools, but no provision or compulsion; *M'Menamin* 22149–22155.

The rules of the Board as to religious teaching by their own ministers, &c., to minorities in a vested school would be carried out in nuns' schools; *ib.* 22201–22205.

Decided opposition to the system of vested schools; the strength of the Roman Catholic position is to keep schools under their own control; *Forde* 23017.

Very few in the hands of Catholic clergy and laity; *ib.* 23018.

Members of denominations should be managers of their own schools; *ib.* 23019, 23020.

Managers may exclude religious teaching in non-vested schools; *Card. Cullen* 27044, 27045.

Objections to vested schools; no difficulty in obtaining security that schools built by Government grant should fulfil their purpose; *ib.* 27073–27075.

Proportion of cost of vested schools paid by National Board or Board of Works; *Owen* 27486–27494. As to estimates for; *ib.* 27497–27507.

Repair of non-vested schools might be undertaken by Board of Works with increase of staff; *ib.* 27521–27523. 27556. Building of, usually carried on by local parties, whose proportion is invariably paid by them before Board of Works commences building; *ib.* 27564–27571. If local parties build, the grant is not paid till the school is complete; *ib.* 27572–27575. Often aided in building by the lodgment of payments in kind, which answers very well; *ib.* 27576.

Vote annually taken by Board of Works for building vested schools; number built; *ib.* 27577–27581.

See also CHRISTIAN BROTHERS' SCHOOLS. DUBLIN. HEDGE SCHOOLS. MODEL SCHOOLS. NATIONAL SCHOOLS. NIGHT SCHOOLS. PRIVATE ADVENTURE SCHOOLS. TRAINING SCHOOLS. WESLEYAN SCHOOLS.

SCIENCE AND ART DEPARTMENT:

No official recognition of classes in connexion with the National Board formed under the Science and Art Department; *Macdonnell* 756, 757.

Art and science schools should be established in connexion with the National Board; teachers in many places take advantage of the system voluntarily; the result has been satisfactory; some teachers in model schools were doing nearly as much in teaching physical science; and many teachers have obtained first-class certificates from the Science and Art Department in London; *Hunter* 3506–3515.

SCIENCE AND ART DEPARTMENT—*continued.*

The system of payments for teaching physical science should be done through the instrumentality of the National Board; the temptation to neglect the regular business of schools is great, the payments by the Science and Art Department being high; *Hunter* 3516–3522. The teaching of physical science, if done judiciously, would not interfere with primary education; *ib.* 3423–3525.

Connexion of Christian Brothers' schools with; *Grace* 9668–9670.

Assistance rendered by, to some teachers in Ireland; *Macdonnell* 23994–23999.

The classes carried on in model schools in connexion with, are for the improvement of the pupils; *ib.* 24000, 24001.

Model schools are in connexion with; payments by, depend upon results; National Board has nothing to do with the Department; relations of Department with model schools and Marlborough-street; *Newell* 24543–24561. Examinations in connexion with, are faulty and dishonest; dishonesty chiefly in Belfast; *ib.* 24752–24797. 24800–24813.

SCOTLAND:

Mixed system should be extended to; non-compulsion as to religious teaching has been the practice there from time immemorial; *Newell* 24595.

SCRIPTURAL SCHOOLS:

Definition of the term, according to witness; *Irwin* 9972–9978. National schools are not entitled to the designation; *ib.* 9978–9980.

SCRIPTURE EDUCATION:

Observations as to, by Roman Catholics and by the State; *Andrews* 14842–14849.

"SCRIPTURE EXTRACTS:"

Non-introduction of, into Clonmel model school, led to secession of Dr. Whately and two others from the Board; passages from Whately's letters referring to; in one sense approved by Dr. Murray; they now form part of special religious instruction; *Kavanagh* 12086–12088. 12182–12184. Information in, should be widely disseminated, but through safe and authorized parties; *ib.* 12115–12117.

Not fit to be used by Catholics in schools where they would be taught by Protestants; though used for instruction of his own children, witness cannot urge their use in some of the model schools (in 1852); *ib.* 12456–12465.

Dr. Whately thought that "Scripture Extracts" would be a means of undermining Romanism; *Card. Cullen* 27255.

Scripture Lessons an essential feature of the Board's books; they have not been touched; *Keenan* 1544, 1545. 1752.

SCRIPTURES:

Resolutions of Synod of Ulster in 1833 as to reading of; *Hunter* 3619.

Reading the, in the Authorized Version by Roman Catholics an act of abandonment of faith; *Kavanagh* 12115. As to reading of, in Authorized Version by Roman Catholics, either at parents' desire or under pressure; cases put forward of pressure exercised; *ib.* 12115–12152.

Must be read in Erasmus Smith's schools; not used for teaching reading; *Thorp* 12759; *Rudkin* 13512 *et seq.*

Use of, as a reading book, in the Church Education schools, an advantage over the National system; *M'Ivor* 13791–13794.

The rule requiring every child of every denomination to read the Authorized Version uncatholic and unprotestant; as a principle, untenable; *ib.* 13795.

Principal objection formerly held by Wesleyans to National Board was the exclusion of, as a class book; *M'Millen* 14492, 14493. 14561.

SCRIPTURES—*continued.*

Opinion of Archbishop Murray, as to reading the New Testament by teachers in National schools; *Andrews* 14752–14758.

Douay Version allowed to be read by the Kildare-place Society; Authorized Version only permitted by Church Education Society; *ib.* 14809–14813.

The use of the Protestant or the Douay Version in the two classes of schools will cause a system to become denominational; *ib.* 14828.

If the State allows Roman Catholics to use their own version, and to interpret it as they please, it ought to require its Authorized Version to be read and used; *ib.* 14844.

Reading the New Testament only might be accepted as a compromise, but teachers would introduce the Old to support their own views; *ib.* 14856-14863.

As to indiscriminate reading of Authorized Version in schools; *O'Reilly* 15084–15088.

Use of Authorized Version by Rev. D. Curoe in a Catholic school; *ib.* 15101 *et seq.*

Authorized Version of, read by a Roman Catholic master to Protestant children, under a Church clergyman, in a non-vested school; *Byrne* 21651–21654.

Every child who goes to Church Education schools must read the Bible; it is the fundamental rule; *Blacker* 16444, 16445.

It is within the spirit of Board's rules to refer to, in reproof of faults, without quoting them; *Byrne* 21658–21660.

The Church Education Society's rule, as to reading, in school, will not be relaxed, either with a view of including Roman Catholics or of receiving State aid; *Bp. of Ossory* 20539.

Reading of, in their schools, is regarded by Church Education Society as essential; *ib.* 20582.

A restriction on the use of the Bible would be regarded as a grievance by the clergy, and would not be submitted to; *ib.* 20586.

Number of children in Sunday-school Society's schools able to read and not able to read, meaning probably not able to read at all; *Pilkington* 23560. 23565, *note.*

Objections to reading the Bible in Church Education schools; it is in violation of the discipline of the Church, and poor children cannot make a religion out of it; *Card. Cullen* 26650.

Number of children reading Protestant Version in Protestant schools; *ib.* 27045.

See also CHURCH EDUCATION SOCIETY: 2, 3, 5. ERASMUS SMITH'S SCHOOLS.

SCRIPTURE TEXTS:

As to use of, for writing copies; *Bp. of Down and Connor* 19707, 19708.

SECRETARIES OF NATIONAL BOARD:

Memorandum explanatory of Resident Commissioner's views regarding division of duties of Secretaries of National Board; *Claridge* 3969.

See NATIONAL EDUCATION, BOARD OF: 2. *Officers.*

SECRETARY OF STATE FOR EDUCATION:

In case of appointment of, there should be a permanent resident Under-Secretary for Ireland; and if a fit man be appointed, a second paid Commissioner would not be necessary; the maintenance of the present Board would still be desirable; *Macdonnell* 23638–23643.

SECULAR EDUCATION AND INSTRUCTION:

Is preferable to denominationalism; *M'Millen* 14587. Parents would look to religious instruction; *ib.* 14591, 14592.

Is preferable for both England and Ireland, in consequence of the variety of religious opinions; *ib.* 14692–14701.

SECULAR EDUCATION AND INSTRUCTION—*continued.*

Instituted and paid for by the State would not adapt itself to the wants of the country; would be practically atheistical; would drift into denominationalism; a line cannot be drawn between secular and religious teaching; if paid for by the State simply, it might answer; *O'Reilly* 14981–14984.

Should be controlled by State, and not be trusted to either Protestant or Roman Catholic bishops and clergy; *Warren* 15348–15352.

Might be improved in National schools; *Bp. Keane* 15537.

A system of strictly secular teaching not desirable; *Petticrew* 16557. State should pay for only secular and moral instruction, leaving denominations to teach their own peculiar views; *ib.* 16622.

If aided by the State solely, schools under such a system would soon become proselytizing; *Mahony* 17164–17166.

Disadvantages attending the State's aiding a mere secular system; *ib.* 17214–17216.

Former evidence [Q. 17214, &c.] corrected as to system of; more objectionable than that of Church Education Society; under it, teachers might introduce religious instruction at any time, Inspector examining only as to secular teaching; *ib.* 25685.

The Irish system is only secular; *Ross* 17497.

State bound to provide and pay for secular education only; *J. S. Porter* 18191.

Only should be recognised by the State; *Bp. of Down and Connor* 19586–19590. 19601, 19602. 19607. Outlines of a system of, as proposed by witness; *ib.* 19586 *et seq.* In which any books could be used, as none could be considered objectionable *ib.* 19617.

Secular education would not exclude moral instruction; *ib.* 19624.

Under a system of, there would be no need for protection of minorities; *ib.* 19646–19649.

Religious instruction, with a system of, could be given at any time not interfering with the secular teaching; *ib.* 19655–19658.

Teachers are bound by the Board to give, four hours for five days a week; *O'Callaghan* 20023–20035.

In vested and non-vested schools is the same, so also the books and inspection; *De Vere* 20303–20308.

Plan for State aid according to results in secular teaching, without interfering with religious education; *Bp. of Ossory* 20536 *et seq.*

A system of State secular education advocated; *Atkins* 20743–20750.

Opinion in favour of the State concerning itself only with; *ib.* 20757–20761.

The desire for, is growing in Ireland; at same time there is no fear of the want of religious instruction; *ib.* 20770–20776.

The State cannot recognise secular education only, being bound to protect minorities; *Byrne* 21688–21690. The suggested system of State attending exclusively to, leaving religious instruction to patrons, would not meet with general approval; declaration signed by witness among 2,754 signatures, in favour of united secular education; *ib.* 21788–21798.

State should confine its action and support entirely to; *Tobias* 22760–22764. If adopted, no matter who has charge of the school; *ib.* 22793. Clergy should not be bound to give, and books should be free from all religious bias; *ib.* 22794–22797.

Not efficient, because too ambitious; *Forde* 22942. Inspection should be limited to, even with Inspectors of same denomination; *ib.* 22955. 22962–22965. Catholics do not recognise the possibility of giving, without religious instruction combined; *ib.* 23070, 23071.

A system of secular education only, supported by the State, would get rid of some present difficulties, but induce others; *Macdonnell* 23714.

SECULAR EDUCATION AND INSTRUCTION—*continued.*

A scheme for the State to concern itself with secular education only, leaving the patron to give or withhold religious instruction, would not be suited to Ireland, because there would be no provision for the minority; the clergy would like it, but the laity on both sides are satisfied with the present system; *Longfield* 24347–24350.

See also STATE, THE.

SEPARATE SCHOOLS:

In Canada, as to establishment and character of, *Gordon* 18809–18833. 18955–18964. Correspond to non-vested schools in Ireland; *ib.* 18962.

Principles on which public or separate schools are allowed by the State in Canada; *ib.* 18975–18982.

Some points of difference in, in Upper and Lower Canada; *ib.* 18838–18849. Number of, with Roman Catholic teachers, and of common schools, in Upper Canada; *ib.* 18869–18876. 18894–18898. Persons supporting, were exempt from the ordinary school-rate; *ib.* 18931.

"SERMONS FOR SUNDAYS AND FESTIVALS," &c.:

Passages quoted from; *Mahony* 17221–17230.

Explanation as to change of initial of author in title page of second edition; *Duffy* 23320–23340.

SHANKILL:

Fictitious nature of returns of attendance at school at; *Kavanagh* 10700–10719.

SHEEHY, EDWARD, Esq., first-class District Inspector under National Board, evidence of; *pages* 1164–1176.

SHERIDAN, JOHN EDWARD, Esq., Head Inspector under National Board, evidence of; *pages* 205–253. 587, 588.

SINGING:

Taught in the schools in South Dublin District; it is liked by the children; *O'Carroll* 4360. 4369–4371.

SISTERS OF CHARITY:

Two schools established by, in connexion with National Board in 1867; efficient lay teacher in, untrained; the sisters attend to the religious instruction; excellence of secular teaching in; *Sheehy* 26418–26422.

See also CONVENT SCHOOLS. NUNS.

SISTERS OF MERCY. *See* CONVENT SCHOOLS. NUNS.

SITES FOR SCHOOLS:

Difficulty in procuring; *Keenan* 1407; *Bp. Dorrian* 8649; *M'Menamin* 21929; *Allies* 25664; *Card. Cullen* 27277.

Keogh's Act enables a landlord to grant a site for a school, however limited his interest, on condition that he gets a market price for the land; *Bp. Dorrian* 8649–8652.

Objections to rule of Board as to requirement of eligible site before grant; instance cited of its inapplicability; objection as to allowance for assistant teachers; *ib.* 8790–8802. 8804–8817.

The law should enable any persons to force a site for a school upon proof of the necessity for it being shown; the clergyman should naturally be one of the trustees; *ib.* 9237–9241.

Difficulties in procuring sites for schools are of frequent occurrence, even when the full market value is offered; *ib.* 9252–9257.

May be conveyed by founders either to Board or to trustees: *Kavanagh* 11020.

National system hampered by the difficulty in procuring; powers should be given to take land for schools, with protection to the landlord as in analogous cases; *De Vere* 20190–20193.

If taken compulsorily, the schools would become

SITES FOR SCHOOLS—*continued*

vested in the Board, and built and repaired as now, and subject to same rules; *De Vere* 20359–20363.

For schools formerly granted in fee, now neglected, ought to be made available before further compulsory powers given; *ib.* 20364, 20365.

No difficulty in obtaining sites for schools under Roman Catholic management in Omagh; *Byrne* 21713–21719.

Difficulties in obtaining sites for schools; in some cases to the possible deprivation of all education to the population; Government should look to scattered populations first; *M'Menamin* 21929–21933. As to the question of patronage connected with; *ib.* 21938–21944.

Non-provision of, by landlords, one cause of so many children not being able to read; *Pilkington* 23568, 23569.

No difficulty in obtaining, in Dublin diocese; no objection to grants from Protestant landlords who honestly intend not to interfere with faith of children; there is in case of those who are members of proselytizing societies; *Card. Cullen* 27277–27283.

SLIGO MODEL SCHOOL:

Opposition to the erection of, as to; *Kavanagh* 12652–12665.

SMALL FARMS:

Prejudice in Ireland against; *Baldwin* 4662–4673.

SOCIAL INTERCOURSE:

Arising from the National system; *Petticrew* 16752, 16753.

Not much between Catholics and Protestants in higher ranks of life in north of Ireland; *Ross* 17428.

SOCIETY FOR DIFFUSION OF USEFUL KNOWLEDGE:

Books and prints of, though unobjectionable in themselves, not sufficient for Roman Catholics; *Bp. Dorrian* 8686, 8687.

SOUTH DUBLIN DISTRICT:

The district extends about seven miles from Dublin up to the mountains; schools in it described; *O'Carroll* 3982–3984. 3995, 3996. 4010–4019. 4372–4377. 4403–4406.

Eleven or twelve infant schools in, chiefly under the management of clergymen; most of the teachers in them trained as monitors, and then appointed as teachers; *ib.* 4146–4152. Lowest age of children beginning school; *ib.* 4159, 4160. Frightful overcrowding in infant schools; schools so overcrowded not clean; some are not warmed in winter time; *ib.* 4325–4332.

Singing taught in some schools in the district; *ib.* 4252, 4253. The best singing is in Baggot-street schools; boys like it, and it is useful in the girls' schools, they being taught to sing in the choir; *ib.* 4360. 4369. 4371.

Drawing is not usually taught in schools in Dublin; in some of the convent schools it is, and in Harold's-cross and John-street schools; some drawings are sent in for competition under the Science and Art Department; *ib.* 4360–4370.

The number of children for whom capitation fees are paid in, cannot be limited to area of school; the poor would go to the proselytizing schools, disregarding everything but food and clothes; population is sufficient for many schools; 600 children going last February to the Irish Church Mission schools who would go to Roman Catholic schools if they had not food and clothes given to them; *ib.* 4397–4402.

One workhouse school in the district on the denominational principle; average attendance and teachers at; *ib.* 4423–4425.

SOUTH DUBLIN UNION SCHOOL:

Sectarian character of; its withdrawal from connexion with the Board; *Kavanagh* 12585.

SPADE HUSBANDRY:

Teaching of, advocated; *De Vere* 20221–20226. 20231–20234. 20369–20373. 20448–20452.

SPADE LABOUR FARM. *See* AGRICULTURAL SCHOOLS AND MODEL FARMS.

STACK, WILLIAM, Esq., Chief Clerk of Board of Works, evidence of; *pages* 596–603. 611–613.

STANLEY, LORD, LETTER OF:

Regulation as to local subscriptions contained in, never carried out; *Keenan* 1159.

System of education set out in, trampled on and ignored; *Kavanagh* 12113, 12114.

The charter of the National system; under it pastoral control was allowed over religious instruction; *Bp. Keane* 15538.

Departures from principles of; *ib.* 15767–15776.

References to; *Macdonnell* 174, 175; *Newell* 2969; *Hunter* 3575, 3576; *Sheridan* 5313; *Butler* 6134; *O'Sullivan* 7873. 7897; *Kavanagh* 10813. 10818. 11035. 12092–12095. 23499; *Berkeley* 11410–11428; *O'Reilly* 15090; *Bp. Keane* 15551, 15552. 15684; *Wilson* 15937. 16000. 16004; *Petticrew* 16923–16925; *J. S. Porter* 18178; *Tobias* 22812. 22874; *Card. Cullen* 27052, *et passim.*

STATE, THE:

Should contribute in every way to the amelioration of the people, not excluding religion; *Bp. Dorrian* 9226.

Abstractedly not entitled to control schools built by any Church; considered as the people who form it, has a right to control its schools; *O'Reilly* 14966–14969.

No line can be drawn between those for whose education the State should pay and those who should pay for themselves; pauper schools cannot be established; no absolute objection to State contributions to particular classes of schools; the objection is, that they destroy to a great extent voluntary charitable effort, and monopolize in State's hands the control of education; money for education of upper and middle classes should be voted specially; *ib.* 15033–15043.

Should control secular education; *Warren* 15348. 15352.

Interference of, should be confined to finance, inspection, and administration; *Bp. Keane* 15859–15862.

The duty of, is to make good citizens irrespective of creed; should not attempt religious instruction; *Petticrew* 16552–16554.

Discussion as to the duty of, in regard to religious instruction with reference to making good citizens, good Catholics, good Presbyterians, &c., and with reference to Jews; *ib.* 16855–16880.

Its duty is to protect individuals in their rights, and to interfere as little as possible; *Forde* 23059.

Duty of the State to provide education for the people of Ireland, they being too poor to procure it for themselves; otherwise State should interfere as little as possible; might make existing endowments available for the purpose; *ib.* 23163–23177.

Should have the power an individual has who builds and endows a school for a specific purpose, placing the ecclesiastical management in the hands of ecclesiastical authorities; its action is only transitory; for the State to found and control all schools would be bad politically, socially, and religiously; *ib.* 23222–23224.

Necessity for aid of, to education; the question is, upon what terms; *Whittle* 24087.

The Legislature cannot abdicate its functions merely on the demand of the Roman Catholic bishops, who ground it in the name of the Irish people, a proposition not admitted; *ib.* 24092. The fear is it will grant what is asked for in the name of the Irish people, who do not ask for it, to their detriment; *ib.* 24094.

STATE, THE—*continued.*

Its means of ascertaining the wishes of the Irish people on the question of education; want by the Roman Catholics of a middle and upper class; the masses fall into the hands of the clergy, who lead them; *Whittle* 24095. Difference between duty of Church and State; *ib.* 24096, 24097.

The State paying largely for education, ought to judge for itself as to the fitting system; *ib.* 24114.

If the State maintains its position the people will follow it, and the clergy will be compelled to follow, sooner or later; *ib.* 24160, 24161.

State has no authority to interfere with the rights of conscience because it gives a grant of money; *Allies* 25570.

See also SECULAR EDUCATION AND INSTRUCTION.

STATISTICS:

Of education in Ireland, paper on, read by witness at Social Science Congress in 1857, disowned by Board; one of the causes of his retirement; *Kavanagh* 12647–12651.

Not to be depended upon unless closely analyzed; *Card. Cullen* 27362–27365.

STEWART, Dr.:

Patron of Correen School, his application for aid taken as the "model application;" *Kavanagh* 23365. 23389. 23392. 23422–23434.

Placard announcing a sermon by him; *Kavanagh* 22667, 22668.

STILLORGAN SCHOOLS:

Children receiving adverse religious instruction in; *Forde* 22940.

STONEMASONS:

Position of school teachers contrasted with that of; *O'Callaghan* 20008–20022.

STOPFORD, ARCHDEACON:

Statement of, that witness was instrumental in getting rule altered to suit the Archdeacon's views, is wholly false. Explanation of the circumstances, and public correspondence between them on the subject; *Kavanagh*, 12205–12210.

Controversy between, and National Board, as to discrepancy between trust deed and rules; alteration of rules in consequence; *ib.* 19533–19539.

His request for interpretation of words relating to compulsory attendance of children at time of receiving religious instruction; his exposition of the revised rule; *ib.* 23390, 23391. First detected the ambiguous interpretation; *ib.* 23395. Quotation from evidence of; *ib.* 23401, 23402.

"STOPFORD RULE:"

One of the causes for change of opinion of Roman Catholics as to the National system; *O'Reilly* 15001.

STRABANE:

Parochial National school, mixture of denominations in; *Matthews* 18265.

National schools of, fair specimens of mixed education; *ib.* 18395–18401.

Strabane school, non-vested, circumstances of; *ib.* 18456–18463. 18479–18490. 18532–18534.

Strabane Institute for the Deaf and Dumb supported by voluntary contributions; the pupils are brought up in tenets of Established Church; *M'Donnell* 14256 *et seq.*

STRANORLAR:

Schools in, in connexion with National Board, chiefly Roman Catholic, with some Protestants; *M'Menamin* 21886–21892. 21970–21979.

Schools and population in; *ib.* 22051–22062.

SULLIVAN, Dr.:

Arrangement of business at Marlborough-street during his illness and after his death; *Rintoul* 26068–26078.

SUNDAY SCHOOL SOCIETY FOR IRELAND:

Table showing the number of children attending Sunday and week-day schools of Society; number above fifteen years of age; and number reading the Scriptures in each of the provinces, January 1869; *Pilkington, page* 1046.

Its object; its means of assistance; its income; number of schools and scholars; beneficial effects of the system; *ib.* 23502, 23503.

Committee of, appointed from subscribers; generally unfavourable to National system, so that a member of the National Board was not re-elected on committee; *ib.* 23517–23529.

Publish a report annually; *ib.* 23539, 23540.

Books published by; *ib.* 23550–23555.

SUNDAY SCHOOLS:

None in connexion with Erasmus Smith's schools; *Rudkin* 14029.

Sunday school teaching not sufficient to counteract the evil effect of the model schools; *Andrews* 14775.

Patrons have always claimed the right to use non-vested schools for Sunday teaching; *J. S. Porter* 18099–18101.

As to Sunday schools in Canada; *Gordon* 18899–18902. 18904–18907.

Contributed to, by Irish Society; *Williamson* 21116.

Nearly 50,000 Protestant children have no means of instruction but through Sunday schools; teach only reading, as a means of receiving religious instruction; *Pilkington* 23502–23506. 23535–23537. 23542, 23543. 23558.

Greater number in Ulster; are only intended for Protestants, of any denomination; *ib.* 23513–23516. 23544–23546.

Number of, in existence before foundation of Sunday School Society; *ib.* 23530, 23531.

Are assisted by the Society without regard to denomination; are intended only for Protestants; *ib.* 23532–23534. 23544–23546. 23559.

Many, in Ireland, not supported by Sunday School Society; *ib.* 23541. Buildings in which held; many are held in Church Education schools; *ib.* 23547–23549. A large proportion of scholars in, cannot read; *ib.* 23555–23557. 23560–23563.

SUPPLEMENTAL CHARTER:

Debated at Queen's University; *Wilson* 16206.

Issued to obtain popular support; *ib.* 16297.

SYNOD OF THURLES. *See* THURLES, SYNOD OF.

SYNOD OF ULSTER. *See* ULSTER, SYNOD OF.

"TEACH," the right to. *See* ROMAN CATHOLIC BISHOPS AND CLERGY.

TEACHERS:

1. *In National Schools, Ordinary and Model.*
2. *In Church Education Schools.*
3. *In Erasmus Smith's Schools.*
4. *In Wesleyan Schools.*
5. *Generally.*

1. *In National Schools, Ordinary and Model.*

Teachers in National schools, about 8,100 in number, receive about £250,000 a year from the State, and about £52,000 from localities; *Macdonnell* 81–86. Are appointed and removed by patrons; *ib.* 20.

Salaries of, are paid through patrons or managers; *ib.* 24.

Many teachers are dismissed every year by the Board; manager fills the vacancy; every teacher is examined after appointment by Inspector; if report be unfavourable, salary is withdrawn; on second report of incompetency teacher is dismissed; *ib.* 41–44.

In ordinary schools the teacher is responsible both to manager and to Board; the latter dismisses, in

TEACHERS—*continued.*

1. *In National Schools, Ordinary and Model*—continued.

case of unfitness, by withdrawing the salary; *Macdonnell* 68–70.

No loss has arisen from the transmission or appropriation of money by; *ib.* 161–164.

In regard to discipline, a teacher in any difficulty would go to the manager, or if teacher were in fault manager would act; very few cases of cruelty on the part of teachers; *ib.* 195–200. If a teacher wishes to expel a pupil, he must have manager's permission; *ib.* 231–233.

In the differences that arise between Board and manager as to dismissal of teachers, the Board is always open to statements of managers; it would be unwise to make any essential alteration in the existing system; *ib.* 165–168. Many cases have occurred of teachers being removed for incompetency; *ib.* 562, 563.

Number of teachers receiving good service salary; some teachers may be eligible, yet not receive it; *ib.* 425–430. 530–532.

Salaries of, are withdrawn, for non-repair of premises, being thus punished for fault of managers; *ib.* 586–588.

No difference in functions of teachers of different classes; a teacher may be rated first class, but without an average attendance of thirty-five children he would not get first-class pay; *ib.* 252–254.

No limit of time in which a teacher is required to pass from one class to another; *ib.* 271–275. Intellectual attainments and power of management are the elements to be considered in a teacher with reference to his promotion; with few complaints, on the whole schoolmasters consider themselves justly treated; *ib.* 273, 274. 276–286.

The arrangement of teachers in classes depends on report of Inspector and Head Inspector; in cases of complaint reference would be made to the Chief of Inspection; *ib.* 357–359.

Many remain teachers all their lives, many find more profitable employment; *ib.* 307–309. Supply of teachers should be increased; *ib.* 310–312.

Untrained teachers can rise to first and second class if they deserve it; *ib.* 313. The rule permitting untrained teachers to be admitted as first class, was adopted on the objection of the Roman Catholic Church to teachers trained at the model schools of the Board; *ib.* 405, 406.

Trained teachers are preferred by Protestant patrons; they are not so demanded by Roman Catholic patrons as formerly; *ib.* 330. If the objection of Catholic patrons to the training under the Board continues, it would be desirable to extend the system of school organization; *ib.* 639–641.

Female teachers predominate, and are increasing; full supply of female candidates for the training schools, and but for the Roman Catholic interdict numbers would be trained in the Central Model School; *ib.* 319–322. Female teachers continue longer in their schools than males, even after marriage; many remain long unmarried; *ib.* 326, 327. Female teachers are easier to be found than male; a large proportion have been educated in convent schools, where they receive admirable training; *ib.* 410, 411.

Seven thousand have been trained, of which number 3,320 remain; the falling off is attributed to insufficiency of salary; *ib.* 336–338.

The diminution in the number of trained teachers less than in England; *ib.* 362–364. No retiring pensions granted, but gratuities allowed in certain cases; *ib.* 365, 366.

The examination of teachers is partly oral, partly by written papers; there is no suspicion of favouritism; *ib.* 378–381. Ability, knowledge, and usefulness are the chief elements required; no one of an immoral character would be classed; *ib.* 382, 383. It would be desirable, but difficult, for a teacher to

TEACHERS—*continued.*

1. *In National Schools, Ordinary and Model*—continued.

be examined before appointment; *Macdonnell* 398, 399. Annual examination of teachers by Head and District Inspectors; a teacher appointed by a manager may teach for a year before examination, and receive a higher salary than he merits, but when examined he gets his class salary from time of appointment; *ib.* 558–561. 564.

Examination of teachers' accounts by Inspectors forms the ground on which the Government grant is made; these accounts are, on the whole, accurately kept; *ib.* 422–424. No case of dishonesty on the part of religious bodies in reference to exaggerated returns of school attendance; the grant is made on the daily average attendance; *ib.* 527–529. How dishonesty of teacher in return of number of pupils in attendance may be discovered; *ib.* 548, 549.

Fines on teachers inflicted for misconduct are analogous to payments by results; checks against the infliction of fines; as to withdrawal of salary for non-repairs; *ib.* 578–581. 586–588. 609–618.

Many poor teachers under the Board are expected to pay the rents of their school-houses; *ib.* 709.

Total receipts from subscriptions received by National school teachers in 1866 amounted to £12,441; value of teachers' residences and children's pence are not included in this amount; *ib.* 743, 744. 746.

Should be trained in common; they might have separate lodging houses, for propriety of which security should be taken; *ib.* 11243–11253. In Dublin should be allowed to have separate lodging houses; *ib.* 11317, 11318. If they cannot be trained together must be trained separately; *ib.* 11306–11311.

Have well attended to the religious education of their respective churches, and lived in perfect harmony; *ib.* 11312–11314. Trained in denominational establishment may be brought up impartially, but not so certainly as under the National system: *ib.* 11346–11352.

Would gain accession to their incomes by establishment of National schools of higher order giving a rough classical education; *ib.* 11336–11338.

There is no rule as to appointment of, in model schools; vacancies are filled by Board on recommendation of Inspector; are drawn too much from particular districts; *ib.* 23759–23763. 23787–23792.

If the number of trained teachers were increased, the difficulties of teaching would be diminished one half; *ib.* 23826.

Roman Catholic, in model schools, an exemplary and religious body of people; no change in them has been effected through connexion with the National system; *ib.* 23837–23843.

In model schools are civil servants; the Government is not bound to take cognizance of religious penalties imposed for civil duties; *ib.* 23844–23847.

As to training of pupil teachers in the denominational boarding houses suggested by Mr. Fortescue's letter; *ib.* 23856–23858.

Female pupil-teachers, in the existing model schools, are lodged outside, with an allowance of £20 a year; this, under the proposed plan (of denominational boarding houses) would not be acceptable to Roman Catholics; they might have their option; *ib.* 23875–23879. 23893–23896.

The training of female pupil-teachers is satisfactory; greater tendency of females to follow the trade of teaching; *ib.* 23880, 23881.

Average numbers of Roman Catholic teachers who came up for training during two periods of five years each, showing a great decrease; *ib.* 23909–23915.

Strong probability that nearly all the pupils in training will become teachers; many Catholic teachers can yet get schools under Protestant or Catholic lay management; *ib.* 23916–23923.

Salaries of, have been increased of late years, but still fall short of what they should be; *Macdonnell* 24002–24008.

Proportion of Roman Catholic teachers in model schools; *ib.* 24041–24049. Desirability of a Roman Catholic teacher in each department of a model school; *ib.* 24050–24053.

Return showing the names, &c., of first class teachers who have not been trained in the normal establishment; *Keenan, page* 55.

Modus operandi of promotion of teachers from third to second class, and from second and third classes to first; *ib.* 866–884.

In case of depression of a teacher Head Inspector invariably consults District Inspector; *ib.* 892, 893. Depression of class involves diminution of salary; *ib.* 894–898. 906, 907. Depression is the direct act of the Board on the Inspector's report; *ib.* 900–902. Teacher's salary may be diminished through the attendance falling of, but he suffers no depression of rank; *ib.* 908. No actual record, in terms, is kept of a teacher's depression, but the fact can be ascertained; *ib.* 919.

The same written examination of male teachers takes place at the same day and hour throughout Ireland; the oral examination is held at a subsequent and varying part of the year; *ib.* 921, 922–926. 948, 949. 1160. From an understanding between the Head Inspectors some uniformity in the oral examinations has been reached; *ib.* 1161. The examinations are made in the books published by the Commissioners, and are held at the head-quarters of each district; *ib.* 928–930. 1162–1164. Teachers who have once been classed need not present themselves again for examination; *ib.* 931, 932. Examination has existed since 1848; the mark system was introduced in 1856; *ib.* 936, 937. Records of the examinations are preserved in the office; *ib.* 941, 942. Questions on the science of teaching form part of oral examination; the question of "schoolmastership" is determined by inspection of the school; *ib.* 944–947. The standard of examination for teachers has been considerably raised since the origin of the Board; the only recent change of consequence was the introduction of agriculture; *ib.* 1863–1865.

Degradation of teacher is communicated to managers; *ib.* 961. Penalties on masters—fines, depression, dismissal, admonition, reprimand, suspension of salary—recommended by Inspectors after inspection of school; *ib.* 1100–1103.

Managers are improving in their supervision of; they generally protect teachers; *ib.* 1000–1004.

Payments to, in model schools; *ib.* 1062. 1136. 1186–1190.

Rules for guidance of, in keeping the register; *ib.* 1082–1084.

Payment of, under the "grace" allowance; practice in connexion with it; *ib.* 1075–1078. 1227–1229. Payment of teachers annually is impossible; payment monthly would cause confusion; *ib.* 1085–1087. 1186–1190. Monthly payment of, has been a moot point for years; *ib.* 1246, 1247. No difficulty in getting money for the post-office orders by which salaries are paid; *ib.* 1412, 1413. A proposition that Inspectors should pay teachers was considered, but deemed impracticable; *ib.* 1509, 1510.

Teachers, trained or untrained, are eligible for first class, the rule which prevented this having been rescinded, owing to representations of Catholic bishops and others; *ib.* 918. 1012–1016. Inspectors can now promote untrained teachers to first class; no reason why a man who has passed through the school as a monitor should not be quite as useful as one trained at Dublin; number trained at Dublin has fallen off; *ib.* 1231–1235.

To the interest of, that the attendance equals the number required for class salary; *ib.* 1182.

TEACHERS—*continued.*

1. *In National Schools, Ordinary and Model*—continued.

Not desirable that intermediate education, such as classics, modern languages, &c., should be introduced, but opportunities for classical instruction should be afforded to those who would be debarred from getting it in an intermediate school; *Keenan* 1236, 1237. A few teachers so qualified would be found in the sixty districts, and teachers possessing such qualifications would no doubt abandon primary education; *ib.* 1238–1241.

Desirable that a statement of the religion of the teachers should be made from time to time; *ib.* 1138–1144.

Teachers are not bound to give notice of their intention to leave; at least a month's notice desirable; *ib.* 1338–1341. 1347. Proneness of teachers to move about on the slightest temptation; *ib.* 1394. Both of the higher and lower classes frequently leave the schools; *ib.* 1535–1537. A great number have emigrated to America; *ib.* 1538. High-class teachers receiving low remuneration would undoubtedly soon leave; the salaries attached to the higher ranks in the classification are sufficient to induce a large proportion to remain; *ib.* 1540, 1541.

Considerations in deciding the class of a teacher; *ib.* 1409.

It is regarded as a distinction to be in receipt of the good-service allowance; *ib.* 1397, 1398. The fund out of which it is paid is voted by Parliament annually, but the good-service salaries have not in any year amounted to the sum voted by Parliament; *ib.* 1416–1419.

Hardships of teachers in all parts of the country from being driven to execute repairs; *ib.* 1491, 1492.

The Commissioners have considered the propriety of granting pensions instead of, as at present, retiring gratuities, but no decision has been come to; *ib.* 1758–1764. 1766. Teachers' salaries are too small to contribute to a benevolent society, or to deposit in savings banks; *ib.* 1765. 1849. Doubtful whether compelling teachers to subscribe to a fund for pensions would be wise in Ireland; *ib.* 1767–1769.

No absolute check on attendance of; *O'Carroll* 1050, 1051.

Mischiefs that might arise from the resolution of the Roman Catholic bishops not to receive trained teachers foreseen; removal of the impediment recommended; part of the objection has been removed; still there is no place for training male Catholic teachers; female teachers may be got from the convents; *ib.* 4081–4085. 4133, 4134.

As to gratuities given to teachers for instruction in extra hours; *ib.* 4097–4100.

Teachers are adequate, but do not exert themselves as they ought; they are to blame in not setting a good example of attendance to the scholars; if the teachers were paid by results the effect would be different; *ib.* 4272–4277.

Being first class is only a proof of a teacher having passed a good examination; a low-classed teacher or probationer may be a better teacher than a man of high literary attainments; *ib.* 4292.

Third-class teachers are better than they were, but do not pay the attention they ought; *ib.* 4409.

Difficulty in schools getting assistants, who will not engage without £10 or £15 additional to the Board's salary; the scarcity arises from the low pay, and from an objection to the training establishment in Marlborough-street; *ib.* 4410, 4411.

Few teachers reside on the school premises, except in conventual cases; *ib.* 4338. Inconveniences to teachers from the want of proper residences; a residence near the school, not communicating with it, would be a great boon; *ib.* 4339–4344.

TEACHERS—*continued.*

1. *In National Schools, Ordinary and Model*—continued.

Pupil-teachers are boarded with the masters; no complaints of their conduct; *Newell* 2628–2631.

Pupil-teachers sometimes reside with masters of a different religion; there is generally a Protestant teacher to take charge of Protestant pupils; headmaster must see that children attend their respective places of worship, and look after the pupil-teachers of his own denomination; *ib.* 2950–2955. Eligible lads are usually selected for pupil-teachers without much competition; £20 a year is paid to the master with each; *ib.* 2956–2959.

Pupil-teachers are received in model schools in order of application; *ib.* 2641, 2642. Pupils cost the country £1 a head; those who can afford to pay better ought not to be excluded, if the poor are equally well provided for; *ib.* 2673, 2674.

Teachers must be examined by an Inspector before Board recognises their appointment; practice in this respect and in their promotion; *ib.* 2530–2535. 2654–2657. In some districts where good teachers could not be found the Commissioners have carried out their rules leniently; *ib.* 2679–2683.

A teacher occasionally passes from third to first grade without going through the second; but he must remain one year in each; a certain number of pupils required in each class to entitle teacher to his salary; *ib.* 2659–2663.

Teachers should be allowed to teach Latin and French to boys of a certain proficiency, but not to the hindrance of ordinary work; the Commissioners have drawn up a scheme on the subject; *ib.* 2684–2687.

Fines upon teachers are decided on by Resident Commissioner, after investigation, and are usually from 10*s.* to £2; they number about four or five a month; *ib.* 2692–2703.

Head masters in model schools receive from £75 to £100 a year, and £20 for each pupil-teacher; a good model school is worth from £180 to £200 a year; nothing is paid for religious instruction; *ib.* 2960–2966.

Local contributions to teachers' salaries are very small; the total subscriptions of £12,000 includes the local endowments; *ib.* 2988, 2989. Subscriptions are generally applied to teachers' salaries, but occasionally for books or repairs; *ib.* 2990–2993. Teachers should never have less than £40 a year; good men from £60 to £70; *ib.* 2994, 2995.

Difficulty experienced by married teachers as to residences; more efforts in that direction should be made both by Board and manager; frequent complaint of teachers with regard to this matter; *ib.* 2983–2987. About 43 per cent. of male teachers, and 24 per cent. of female, are married; *ib.* 2984.

Teachers should be paid monthly, or more expeditiously than at present; the payments are mostly within a month of the quarter; *ib.* 2998–3008. 3020, 3021. 3024, 3025. Pupil-teachers and monitors are paid monthly; *ib.* 3024. The plan suggested would be an advantage to the teachers, and simpler and cheaper; post-office orders cost £1,200 a year; *ib.* 3032–3036.

Untrained masters still enter the service because of the opposition to training schools; most of them have been educated in National schools, and therefore superior to the untrained masters of twenty years ago; *ib.* 3010–3012.

Teachers who come from convent schools for training are generally well prepared; *ib.* 3016–3019.

Of model schools often selected from ordinary schools; appointment and qualification of teachers in model schools; age at which female teachers are appointed; *ib.* 24564–24583. 24862–24878. Number of trained teachers required annually; *ib.* 24666. National teachers with small salary may keep shops; *ib.* 24814, 24815.

Payment of rent for school-houses by, is very

TEACHERS—*continued.*

1. *In National Schools, Ordinary and Model*—continued.

general; it is a great hardship; Board should have a rule to prevent it; *Newell* 24816–24831. Minimum salary proposed for, exclusive of residence, &c.; position of teachers should be above those they are in daily intercourse with; *ib.* 24832–24838.

Average amount per teacher received from local sources; teachers do not find books; they are allowed 25 per cent. discount off their purchases; if children do not purchase copy-books, the penalty falls on the teacher through the badness of the writing; teachers labour under many hardships; *ib.* 24839–24849.

Are not brought to central establishment till they have a school; *ib.* 24892–24895. In model schools may leave when they please; *ib.* 24933–24943. Teachers seldom quit the service until they have raised their qualifications; this shows the pay is too small; occupations teachers seek; *ib.* 24896–24910. 24944–24946.

No National teacher has been convicted of Fenianism; *ib.* 24911–24913.

Very few cases where teachers have been dismissed from whim or caprice; managers do not expect them to perform menial services; some have complained of having to go to church and teach catechism on Sundays; some have been dismissed for coming up for training; *ib.* 24922–24927.

Rule requiring teachers to be trained has lapsed into disuse; difficulty of providing trained teachers has increased. It is desirable teachers should attend the model school; as a rule they are acquainted with the working of them; *ib.* 24952–24965.

Teachers do not find books for the children; they are allowed a discount of 25 per cent. off their purchases; *ib.* 24842. Board does not supply free stock of books; *ib.* 24844.

A teacher accused of Fenianism who had been permitted to resume his duties, dismissed by Board at instance of Government; *Kelly* 3053–3055.

The Board has no fixed mode of proceeding in cases where the sums given for teachers are not applied for their benefit; method of checking such abuse; *ib.* 3104–3106.

Teacher is bound to give an account of all emoluments received from the school, which account is returned to the Board by the manager; *ib.* 3121–3124.

Country schoolmasters not inferior in ability to town schoolmasters; many country schools having a private endowment or a liberal landlord attract first-class masters; *Hunter* 3158–3160.

Few cases of irregularity in accounts of; *ib.* 3176, 3177.

Checks as to regularity or otherwise of, at school; *ib.* 3180–3184. 3275–3277. Checks on returns of, as to numbers of children in attendance; *ib.* 3270, 3271.

Teachers who have been in the service eight or ten years are likely to remain; younger teachers leave as they find more lucrative or more pleasant employment; *ib.* 3193–3195. 3236, 3237. The proportion of those who continue in the service is a fair one, considering the remuneration offered; *ib.* 3196, 3197. Reason leading so many teachers to leave the service; *ib.* 3370–3372.

Generally no difficulty in teachers finding situations; at present good teachers even, through the objection of Roman Catholic managers to those who have been trained at the model schools since 1864, find a difficulty in getting places; *ib.* 3201–3205.

The supply of teachers, qualified and paid for as they are, is equal to the demand; but if emoluments and scale of qualifications were raised to what they ought to be, demand would exceed supply; *ib.* 3207–3210.

Schoolmistresses continue to act as teachers after they are married; unmarried are the most efficient; female teachers are best for infant schools; no infant model school but that in Marlborough-street is taught by a master, and there all the assistants are females; *Hunter* 3215–3218.

The qualifications of National school teachers have much improved, partly from their having passed through the schools, partly from the stimulus of the system upon teachers generally; *ib.* 3219–3221.

All principal teachers of National schools should be trained; *ib.* 3240–3242.

Objection of Roman Catholic managers to trained teachers since 1864; *ib.* 3243–3245.

Managers have the right to dismiss teachers; Board does not interfere; many cases of dismissal; the reasons for some known, in others unknown; some attempts at appeal to the Board have been made, but have not been entertained; *ib.* 3249–3255.

No cases of pressure on the teacher to give up a portion of his salary have been formally investigated; a more satisfactory system of paying the teachers directly through the Board might be struck out, but under the present system the manager's power over the teacher can hardly be interfered with; *ib.* 3256–3266.

It was never heard of a National schoolmaster borrowing children from another school to swell his numbers on the day of inspection; *ib.* 3272, 3273. The Board would take serious action in a fraud of that or any other nature; *ib.* 3490–3494.

Since 1864, when the Roman Catholic prelates expressed their disapprobation of the system, the numbers of Roman Catholic teachers in training have been reduced; *ib.* 3466, 3467.

Teachers should be examined before appointment, instead of, as now, being appointed before examination, and so liable to rejection; *ib.* 3470–3474. Advantage in testing capacity as a teacher, but literary qualifications should be certified before a teacher is put in charge; *ib.* 3495–3501.

Complaints against teachers may be addressed to the managers or immediately to the Board; *ib.* 3475, 3476.

In the north of Ireland Roman Catholic teachers have been chosen by the Protestant or Presbyterian management, the majority of the children being Protestant or Presbyterian also; *ib.* 3535.

As to classification of teachers; *ib.* 3563–3571. 3574. 3694, 3695. An untrained teacher is not obliged to remain two years in the third class; he may be placed in either division of his class at his first examination; *ib.* 3572, 3573.

The rescinding of the rule that "no teacher shall be raised to any division of first class, unless he has been trained at the normal school of the Commissioners," will prevent some teachers attending the training establishment who would otherwise wish to do so; *ib.* 3574.

The principle embodied in Lord Stanley's letter, as to the training of teachers as soon as the Board can be in a position to give it, is no longer applicable; *ib.* 3575, 3576.

As to teachers attending training on pain of expulsion; summons for training; *ib.* 3577–3581.

All the male teachers in Ireland are examined in Easter week on the same set of printed questions; the oral examination is held later; the examination of female teachers is conducted at such time as suits convenience of the Head Inspector who visits their district; they have different sets of questions, and their oral examination is held on the day following their written papers; *ib.* 3582–3588.

A first-class teacher is depressed in salary unless he has an average attendance of 35; once enjoyed, a first-class salary is not reduced unless the average attendance falls to 30; *ib.* 3589–3590.

Allowances are paid to every teacher when permitted to retire, on certificate that he is unfit longer to discharge his duty; he must have been ten years

TEACHERS :—*continued.*

1. *In National Schools, Ordinary and Model*—continued.

in the service; a system of pensions would be better and more economical; *Hunter* 3596–3601.

Efficient, more likely to be produced in model schools than convent schools; *ib.* 3644–3648.

Moral conduct and character of, should be regarded as a leading consideration; local managers are best judges in such cases; *ib.* 3672–3675.

Receive their salaries quarterly; they are remitted by post-office order, and are paid within three or four weeks after being due; *Claridge* 3813–3824. Teachers are anxious for monthly payments; *ib.* 3900–3902.

In agricultural school-farms seem more intelligent than ordinary school teachers; *Baldwin* 4504. In rural districts are generally underpaid; *ib.* 13011 *et seq.*

Great improvement in acquirements of those who come for training; *Butler* 5959, 5960. 5970. 5990.

Teachers who come from convent schools for training are generally well prepared; *ib.* 5968, 5969.

A few (especially female) educated in schools other than National come for training; they are deficient compared with those who have passed through a National school; *ib.* 5961–5967.

Division of, into classes, general and special, while training; advantages of the special class; its numbers limited; *ib.* 5945. 5948. 5973. 6093–6099.

Numbers and denominations of, in training at Marlborough-street in spring course 1868; *ib.* 5976–5978. Applications for, at Marlborough-street have lately much decreased; *ib.* 5984–5986.

Numbers of, in employment of Board who have passed through training establishment; *ib.* 6009–6011.

Every teacher should possess some evidence of qualification; *ib.* 6013–6015.

The number of Catholic teachers who come for training is diminished; *ib.* 6020, 6021.

No inconvenience has arisen from teachers of various religious denominations residing together, nor has any indifference to religious duties been observed; *ib.* 6044–6048. Catholic clergymen always visit in case of sickness, and at any other time when called; *ib.* 6049–6051.

Model schools do not train teachers, only pupil-teachers; *ib.* 6077, 6078. If a teacher be classed at the end of his training he is considered competent; *ib.* 6091, 6092.

Number of teachers trained in several years from 1858, showing a decrease of Roman Catholic teachers and an increase of Protestants; *ib.* 6106–6117.

Many Catholic teachers are not under priests as managers, which accounts for the number who still come up for training; *ib.* 6119. Some Catholic teachers are appointed by Protestant managers; *ib.* 6120, 6121–6259.

Pupil-teachers in model schools are examined at close of each year; those who have completed their training of one or two years are recommended for further training in the Central Training Establishment at Dublin; *ib.* 6130–6133. It was the intention that all teachers should receive instruction and training in the model school, Dublin, before appointment as teachers, but this intention has not been carried out; *ib.* 6134–6139. Pupil-teachers and monitors who come up for training are well prepared; *ib.* 6140, 6141.

All teachers in training receive practical instruction in teaching; they teach a class in presence of the head masters of the model schools, who point out defects and suggest improvements; *ib.* 6142–6144.

It is desirable that teachers should not be appointed until after training; *ib.* 6145–6147. 6162, 6163.

Out of 7,532 teachers trained by the Board, only about 3,000 remain; in ten years, from 1856 to 1866, 2,225 trained teachers left the service of the Board; *ib.* 6148–6153.

TEACHERS—*continued.*

1. *In National Schools, Ordinary and Model*—continued.

Comparatively very few teachers come up badly prepared for the Professors' lectures; *Butler* 6163.

Young men without schools should be examined for a certificate allowing them to act as assistants only, after two years' service as pupil-teachers; *ib.* 6164–6166.

Limit of age of, in training; *ib.* 6183, 6184.

Excellent general conduct of, in Marlborough-street training establishment; *ib.* 6186.

The teachers make some advance in mathematics during the course of training, but the main object is to give them the best mode of teaching arithmetic; *ib.* 6188–6197.

The majority only stay one course; this is better than nothing, as it gives them an insight into modes of teaching, of which they would otherwise know nothing; *ib.* 6200–6202.

Many who come for training have been for a long time in their schools; *ib.* 6230, 6231.

Per-centage of Roman Catholic teachers at Marlborough-street before and after 1863; *ib.* 6250–6253.

Increase in number of Protestant teachers attributable to increase of schools under Protestant management; *ib.* 6256.

Students at Marlborough-street attend at Glasnevin for instruction in agriculture; *ib.* 6319–6322.

In training were and are expected to produce certificates from officiating clergyman, but not indispensably so; *ib.* 6387–6392. Are not compelled to come for training; *ib.* 6394.

Cognizance of superintendents as to attendance of, at public worship; *ib.* 6410–6421.

Female, superintendence of, in Marlborough-street training establishment; *ib.* 6422–6444.

Do not get sufficient training in school management; *Joyce* 6491–6498.

Teachers should not receive payment for boys over fifteen in lower standards, except in exceptional circumstances; *Sheridan* 4761–4764.

Teachers' travelling expenses are paid on the spot; amount allowed; *ib.* 4772–4780.

Teachers are badly paid and discontented, especially the lower class; any efficient teacher of the lowest class should be able to earn mechanics' wages, at least £1 a week; *ib.* 4786–4792. 4794. 5197–5201. There has been some improvement latterly; *ib.* 5009, 5010. Most National schoolmasters get some payment from pupils; amount varies from £5 to £30 a year; town schools are the worst paying; *ib.* 5302–5308. Payment of school-pence throughout the country is slightly increasing; *ib.* 5531, 5532.

Many efficient teachers in the third class; *ib.* 4795. Supply of male teachers deficient; conditions of promotion of teachers; increase of salary in higher classes a fair inducement to endeavour to rise; *ib.* 4796–4799.

Effects of recent rule of Board as to promotion to first class of teachers who have not been trained; *Sheridan* 4910–4913.

Many imperfectly qualified teachers have been admitted latterly; *ib.* 5008. Too many grades of, at present; *ib.* 5014.

A teacher single-handed cannot efficiently instruct more than thirty-five to forty pupils; none should be admitted who cannot do this; some Inspectors consider they should be able to teach seventy; *ib.* 5015–5020.

Difficulty of getting properly qualified, causes of; *ib.* 5076–5080.

Present staff would not be required if average attendance of children at all National schools were restricted to sixty; *ib.* 5109.

Position of a teacher compared with that of a skilled mechanic; *ib.* 5197–5203.

Very few trained teachers leave the service; *ib.* 5350–5353. Some, but not so many as might be

TEACHERS—*continued.*

1. *In National Schools, Ordinary and Model*—continued.

expected, of paid monitors follow up the occupation of teaching; *Sheridan* 5354–5357.

The obstacles to teachers, such as irregular attendance and imperfect acquaintance of children with English, the little encouragement given to them, &c., are very great, and not sufficiently felt by Inspectors or public; *ib.* 5384–5388.

Disapproval of the principle of fining and depressing teachers, which is not done so much as formerly; practice of Board in the matter is in accordance with Lord Stanley's letter; *ib.* 5395–5404.

Catholic ecclesiastics will not admit any teacher trained since 1862; this must have the effect of diminishing efficiency of Catholic teachers; *ib.* 5875, 5876. It is not true that religious instruction to both denominations is given in training schools by one person and at the same time; *ib.* 5877–5879.

Number of, at Dunmanway Model School; *ib.* 5882–5884.

Second-class teachers at present equal to first-class teachers in 1848, when system of examination was introduced; *ib.* 5587.

As to attendance of teachers in training at public worship; *Butler* 6410–6421.

The refusal of Catholic managers to take teachers trained in Marlborough-street schools dates from the pastoral issued in 1863; *Joyce* 6692, 6693.

Pupil teachers are chosen by the professors on competitive examination, and are appointed by the Commissioners; none but Catholics are allowed to compete for Catholic vacancies, so also in case of Protestants; *ib.* 6694–6697.

Religious instruction for Roman Catholics, so far as it goes, in Marlborough-street establishment; they are sent to mass on Sunday, but there is no supervision over them; *ib.* 6698–6700.

Method of instruction of, in Marlborough-street; *O'Sullivan* 7709–7717. Excellent general conduct of teachers; *ib.* 7721–7724. 7764.

Average ages of, in 1837, 1847, 1857, and 1867. Good teachers may be made even after thirty years of age; *ib.* 7725–7730. 7904–7906.

Protestant teachers are well looked after as regards religious superintendence; Catholics have not been supervised by a clergyman of their own Church since the time of Dr. Power; *ib.* 7731–7742. 7757. 7917, 7918. The Protestant clergymen attend voluntarily, and are not paid for their services; *ib.* 7907–7916.

Teachers who come up at an advanced age are not so well grounded as pupil-teachers and monitors; *ib.* 7747–7749. Teachers should be more subdivided into classes for instruction; *ib.* 7750. As to number of sessions, and the attendance at; *ib.* 7754–7757. 7877.

Diminution in number of Catholic teachers and increase of Protestants; more non-teachers (persons who at the time of training are not in charge of schools as principals or assistants) are in consequence taken on; *ib.* 7758–7763. 7777–7783. 7895, 7896. 7900–7903. Out of 8,172 teachers under the Board only 3,320 have been trained; *ib.* 7766. 7893. Teachers are benefited by the training, though it is imperfect; *ib.* 7769–7771. Many of the non-teachers do not become schoolmasters; a great number of them, such as pupil-teachers, monitors, &c., come up on the recommendation of the Inspectors; *ib.* 7772–7776. 7784. 7855–7863.

Number of Catholic and Protestant teachers summoned to the training institution, and who declined to come; *ib.* 7785–7787. No reasons can be given why the Protestant teachers decline; *ib.* 7963–7967. The reason of Catholics refusing is chiefly the unpopularity of the department with the managers; *ib.* 7778–7790. 7794. 7992–8014.

In training between 1834 and 1838 lived out in the city; present cost per head of; great advantages of young persons of different denominations living together, but none should be coerced into boarding houses; allowing teachers to board out of the establishment would afford facilities for instructing a greater number; *O'Sullivan* 7791–7793. 7826–7854. 7864–7866.

Taking oath of allegiance by, discontinued in 1843; reasons for its discontinuance; *ib.* 7810–7812.

The case of a teacher of forty-two years of age coming for training is very exceptional; *ib.* 7931–7935.

The time students are in training is not long enough; *ib.* 7743–7745. 7802. 7941. Theoretically, candidates when discharged are looked upon as efficient teachers; practically they require improvement as scholars as well as teachers; *ib.* 7941.

An incompetent master would be discovered within three months, as Inspector must visit him within that period; in practice, managers generally consult Inspectors beforehand; *Fitzgerald* 8396–8402. Annual examination for classification is more severe than on appointment; a teacher might pass the latter and fail in the former; in this case he could continue another year. An incompetent teacher would seldom remain so long; *ib.* 8403–8411.

Duty of, in marking the rolls as to attendance of children, generally well fulfilled; *ib.* 8412, 8413.

Many who offer themselves are imperfectly qualified; *ib.* 8507.

On appointment take charge of school, but may not be examined for some time; should be examined before commencing work; *ib.* 8508–8511. As to recommendation, classification, and promotion of, by Inspectors; *ib.* 8513–8518.

Teachers and monitors coming to be trained should have some practical experience; teachers frequently come for training in opposition to clerical managers, at risk of losing their schools; no instance known of Catholic teachers refusing to be trained; as a rule they are anxious for it; *ib.* 8519–8534.

Must be acquainted with substance of all Board's books to pass successfully; the probationary examination is too low; the programme of third class the lowest that should be accepted; *ib.* 8585–8594.

Necessity of providing residences for; *ib.* 8612–8615.

Upper grade teachers are fairly paid, but not lower. None should be retained who cannot get above second division of third class in about two years; in 1866 there were 1,317 of these; they receive as much as they are worth. None should be allowed to remain in this division more than three years if salaries were raised; *ib.* 8623–8629. Salaries should be fixed partly by results and partly by classification; *ib.* 8630, 8631.

Trained in training schools disapproved of by Roman Catholic clergy; *Bp. Dorrian, passim.*

Teachers trained in Marlborough-street are efficiently trained, and there are many such in schools in Belfast under Catholic management; no Roman Catholic teacher is now allowed to go to Marlborough-street for training; any Catholics there are there in opposition to their pastor's wish; *ib.* 8688–8691.

Appointment of, by Protestant landlords or independent Catholic gentlemen would not be approved of by the Catholic bishops; the veto should be in the parish priest, who would be responsible to his bishop; *ib.* 8893–8899. 9091, 9092. Appointment of, by the Board without reference to the Catholic clergy decidedly objected to; *ib.* 8905–8908.

Efficiency of elementary teaching in National schools depends on the teacher; amount of education imparted does not depend entirely on the teacher's classification; those of a low classification, with in-

TEACHERS—*continued.*

1. *In National Schools, Ordinary and Model*—continued.

dustry and application, are often the most efficient teachers: *Bp. Dorrian* 8662–8667. 8957–8959.

Objection in general by Catholics to teachers trained in connexion with the National system on the ground that their religious education is not attended to; *ib.* 8982–8992.

Roman Catholic managers do not appoint Protestant teachers; *ib.* 9093.

Unskilfulness of, in dealing with lower classes; *Kavanagh* 10112, 10113. To encourage teachers liberal salaries should be given; *ib.* 10120. Or agreement for years made with them; *ib.* 10121–10126.

Change in character of, of late years; general unsettledness of, and paucity of candidates; *ib.* 10128–10132.

Accuracy of returns of attendance, &c., made by; returns are reliable and correct; teachers not responsible for misstatements of the published returns; *ib.* 10133–10135. 10159–10163. 10795–10797.

Teachers in Mr. Conwell's district, the richest in Ireland, receive no local support, the schools are therefore inefficient; *ib.* 10759.

Roman Catholic teachers up to 1862 fairly represented their proportion of population; *ib.* 12424.

Inferior supply of, of late years, both in number and quality; causes for the falling off; *ib.* 12430–12432. Their grades and classification should be revised; *ib.* 12433.

Salaries of, are too low; *Berkeley* 11378, 11379. 11458. 11613. Ill effects resulting therefrom; *ib.* 11380. 11612–11622.

In model schools quite competent to give religious instruction; *ib.* 11590–11603.

Trained teachers much more up to their work than untrained, and better educated, through being brought up on system. The state of training in the model schools under the Board is excellent; *Lord Oranmore* 13346, 13347.

Classification of, in witness's schools, is second rate; a good teacher would be taken away; *ib.* 13462–13468.

Too many, with too little payment, in the better class of schools; *M'Ivor* 13737. A female assistant should be added where young children attend; *ib.* 13738.

Inadequacy of payment of; *O'Reilly* 14870.

Complaints of, as to dismissal at will of patrons, how to be met; *ib.* 14991.

Incomes should be increased by payments by results; pensions cannot be granted to; deductions from salaries for a superannuation fund would not be popular; *ib.* 15019–15025.

A free house and garden would improve position of, (especially rural masters,) in agricultural districts, more than anything else; an educational rate might be devoted to this purpose; desirableness of giving teachers a piece of land, even at a rent; instance of success attending such a course; *ib.* 14882. 15028–15032.

Many untrained Catholic teachers are as efficient as those who have been trained; mistresses and monitresses get their training in the convent schools; male teachers, as a rule, in the National schools; *Bp. Keane* 15555–15559.

Catholic Bishops are willing to accept the present state of things as to appointment of; *ib.* 15563–15569.

Are a laborious, hard-working, and, on the whole, well-conducted body; *ib.* 15670.

The position of, under the National system ought to be greatly improved; local managers can dismiss them without communication with the Board, of which teachers greatly complain; *Wilson* 16104–16107. 16220, 16221.

Case of a teacher who had been made to break

TEACHERS—*continued.*

1. *In National Schools, Ordinary and Model*—continued.

the rules of the Board by his manager; *Wilson* 16108–16119.

Parents care little about denomination of teachers in comparison with efficiency and convenience of school; *Petticrew* 16517.

As a body are meritorious and deserving men, badly paid; the provision of residences for, very desirable; *ib.* 16629–16633. Their liability to instant dismissal a grievance; *ib.* 16637–16641.

Should be paid by scholars; no objection to payments according to circumstances of parents; all are equally attended to; *ib.* 16792–16794.

A better taste should be developed by commencing with the teachers; classification of, in much need of amendment, it regards all intellects alike; there should be minimum of science and maximum of literature, or *vice versâ;* a certain course up to a certain point, afterwards either science or literature; *Mahony* 16993–16996. 17080–17084.

Female teachers are competent to manage mixed schools of boys and girls; are not much more permanent than male teachers, they have the same ambition; *ib.* 16998–16700.

Object of State in examining female teachers; examination of, defective; much mathematical knowledge not required; weakness in mathematics should be supplemented by enlarged course of literature; *ib.* 17004–17009.

Teachers are paid by State for knowledge and for communicating it; objection to their being paid more according to attainments than to numbers taught; those teaching greatest number get most school fees; third class often more efficient than first class; neither often not sufficiently remunerated; *ib.* 17010–17023.

Advantages to State of having teachers of superior qualifications; *ib.* 17021–17023.

Should have residences, but not too near schoolhouses; also pensions; *ib.* 17024–17028.

Salaries of, are too small; this often causes inferior teachers to be retained; *ib.* 17029.

Sometimes have to pay rent, repairs, &c.; *ib.* 17030.

In first class not always efficient teachers; present system of examination a fair one; all should pass in essentials, with opportunity of supplementing defects: *ib.* 17042–17044.

Generally the possession of land leads teachers to neglect school; *ib.* 17055. 17066, 17067.

Advantage to, of a knowledge of good agriculture, in rural districts; *ib.* 17056–17069.

Unskilful in teaching reading; do not give intelligible definitions; *ib.* 17078, 17079.

Power of managers to dismiss, is not practical though objectionable in principle; *ib.* 17085–17091.

Teachers of National schools not so well paid as they should be; desirability of providing house and garden for; a partial payment by results should be made to; *Ross* 17442–17446.

Insufficiency of remuneration of; sources of remuneration; highest pay a first-class teacher can receive; additions made from time to time by State to payments of; classification of; power of rising, and restrictions thereon; *Macdonough* 17616–17674.

Would prefer monthly payments; do not complain of power of dismissal possessed by managers, or of want of right of appeal; think their labour is worth to the State at least as much as a good carpenter or bricklayer; *ib.* 17697–17708. 17873–17876. Comparison of pay of, with earnings of day labourers; *ib.* 17832–17844.

Every teacher discharging his duties faithfully should receive good service pay: which is now restricted in number and time; *ib.* 17736–17739.

TEACHERS—*continued.*

1. *In National Schools, Ordinary and Model*—continued.

Extra allowances to, for teaching extra branches; *Macdonough* 17740–17743.

Managers generally endeavour to get the best teachers, irrespective of class; *ib.* 17785–17789.

Unable out of their salaries to make any provision for old age; pensions should be paid to, by the State, as an act of simple justice; *ib.* 17790–17792. Hold on their schools too long, having a natural repugnance to relinquish salary; *ib.* 17795–17797.

Have as much right to pensions as constables or soldiers; are willing to adopt any plan in use in similar cases; *ib.* 17798–17804. 17822–17830.

Practically are servants of the managers; this, in connexion with pensions from the State, is a difficulty that might be easily overcome; *ib.* 17862–17872. 17894–17899.

Would have no objection to a small payment by results in addition to fixed salary; *ib.* 17831.

A first class teacher not thrown away in a small school; *ib.* 17849.

Except in reducing salary for smallness of attendance, Board has fairly done its duty towards teachers; *ib.* 17854, 17855.

Generally would prefer £10 in cash to a residence and land; witness would prefer the residence; *ib.* 17878, 17879.

Could not get on at all without the managers; *ib.* 17887, 17888.

Teachers are appointed by managers, who also certify as to their conduct, which is the Board's authority for payment of teacher's salary through the manager; *ib.* 17989–17995.

Power of Board to dismiss; seldom exercised; not considered a grievance; *ib.* 17900–17909.

Hardship on, living at a distance from schools; *ib.* 17910–17913.

Find no difficulty in arranging the relief of pupils from school-fees; *ib.* 17914–17918.

Say it is impossible to enforce payment of school-fees; *ib.* 17928, 17929.

Average of school-fees to all teachers in Ireland; *ib.* 17919–17927.

Teachers are qualified to give religious instruction; *ib.* 18026. 18046.

Present salaries of, not sufficient, as proved by numbers leaving for other employments; *J. S. Porter* 18070–18072.

Memorial from teachers of Belfast for increase of pay refused; *Matthews* 18275–18277. Many leave the service because of the inadequate remuneration; *ib.* 18268. 18276. Their present salaries, and desired augmentation and alterations; teachers of lowest class ought to have as much as a common labourer earns; *ib.* 18330–18343. 18453–18455. 18541–18543.

Use the profession as a stepping-stone to other employments; *ib.* 18285–18289. 18393, 18394.

Should be examined before being placed in charge of schools; *ib.* 18290–18293. Degradation of, if found incompetent; no probationers should be allowed; *ib.* 18294–18296.

Should enforce payment of school-fees; many do; good effect of it; *ib.* 18375–18378.

Cases where they have to pay rent for school-houses; *ib.* 18310–18325.

Of ordinary schools may be advanced to model schools, but practically the advance is never made; *ib.* 18344–18352.

Would not leave the service if their situations were worth keeping; are generally attached to their profession; *ib.* 18353–18358.

Comparative importance of duties of, and of policemen and excise officers; *ib.* 18402–18406.

Opinion of, that power of managers should be curtailed; *ib.* 18421–18425. 18430. Called upon to do things beyond their proper duty; *ib.* 18426–18433.

TEACHERS—*continued.*

1. *In National Schools, Ordinary and Model*—continued.

Employment of incompetent, by the Board; *Matthews* 18437.

Means of elevating the tone and status of; *ib.* 18438.

A uniform standard of examination necessary for promotion of teachers; *ib.* 18445.

Have sometimes to supply school requisites, to their loss; *ib.* 18466–18475.

Secular teachers ought not to be called on to give religious instruction; *ib.* 18489. 18509. 18521. 18531. They do not in America; *ib.* 18524. In England and Prussia the clergyman makes use of the teachers; *ib.* 18525, 18526.

National school teachers emigrating to Canada are not so popular as those born or brought up there; *Gordon* 19134–19140.

Of higher class requisite for towns; *Bp. of Down and Connor* 19622.

Status of, should be improved; *ib.* 19718.

Are servants of managers so far as education is concerned, but they are paid by the State, and from the State they expect pensions; *Gallagher* 19172, 19173.

Qualified, are reluctant to undertake new schools; *ib.* 19275.

Duty of, to keep up a tone of morality in their schools; could not do so without support of managers; *ib.* 19276, 19277.

Good teachers not always able to show results proportionate to their work; *ib.* 19284. 19292–19294.

Are not in the habit of changing from school to school; *ib.* 19295–19304.

Partly in the service of the manager; remotely in the employment of the Board; *O'Callaghan* 19998–20004.

Are to a certain extent now paid by results; *ib.* 20007.

Contrast of position of, with stonemasons; *ib.* 20008–20022.

Present deficiency of, owing to the system of non-vested schools; *De Vere* 20162. Non-vested training schools should be instituted for, to teach non-vested schools; *ib.* 20163–20169.

Being remunerated on a fixed system, the clergy and gentry have not thought it their office to interfere; *ib.* 20315.

Schoolmasters have many difficulties to contend with; as a rule are very anxious to discharge their duties efficiently; want a stimulus; *Warburton* 20843, 20844.

In want of training; there should be a training institution for Catholic teachers, and time for training should be extended; *M'Menamin* 21912, 21913.

Inadequately remunerated; complain of manager's power of dismissal; are never dismissed without good cause; *ib.* 21919–21928.

Desirability of providing, with residences and gardens, as increments to their salaries; but not to serve as agricultural schools; *ib.* 21948. 21955–21958.

Witness's teachers are all efficient, with high classification; *ceteris paribus*, always endeavours to get the best article; low class teachers sometimes more efficient than high class; *Forde* 22966–22974.

False position of Catholic teachers who attend model schools; those who do so, act in opposition to their own conscience, because a Roman Catholic's conscience is subject to the direction of his religious superiors; *ib.* 23148–23151. 23289–23295.

Power of fining teachers is in the hands of the Board; *Longfield* 24248.

Great difference in literary attainments of, in Marlborough-street; some deficient in ability of reading; many no higher than in third class; supervision of moral behaviour of; *Rintoul* 26036–26042. 26052, 26053. Division of, into classes; *ib.* 26046–26053.

TEACHERS—*continued.*

1. *In National Schools, Ordinary and Model*—continued.

Those who come for training should have some previous practice in a school; great disparity in powers of those who come for training; *Rintoul* 26100–26107.

Few are able thoroughly to master the Third Book; defective powers of, in grammar; *ib.* 26062–26067.

The number required to supply the annual waste from old age, mortality, &c., would not be much above 300; most of those who come for training intend to be teachers; of about 8,000 now employed in National schools in Ireland, not one-half have passed through the training establishment; of all those who have been trained, many have emigrated, many have gone to other more remunerative employments; *ib.* 26108–26123.

Assistant teachers have been appointed direct from Marlborough-street; their position and classification; *ib.* 26197–26199. 26205–26211.

Did not seem to acquire much good from their residence in Marlborough-street; complaints by witness of inefficiency and incompetency of trained teachers; *Sheehy* 26288–26292. 26356–26365.

Should be examined by Inspectors, not Professors, with a view to classification, the meritorious receiving a certificate entitling them to a step in promotion; *ib.* 26293–26301.

The questions for the annual examinations of, are drawn up by Head Inspectors; teachers use Board's Book on Natural Philosophy; a correct answer given outside the book would be taken; *ib.* 26501–26511.

Reasons for the low character of, in ordinary schools in Dublin; *ib.* 26512.

Desirability of training teachers in schools similar to those they will be hereafter appointed to; monitors may be trained in ordinary schools quite competent for central training establishment; *ib.* 26523–26527.

The majority of young men who come up for training should be better prepared; ought not to require lectures on grammar, geography, &c.; their chief attention should be to the practice of teaching; if necessary should be kept in training more than six months; *ib.* 26276–26278. 26383.

Advantage of being schoolmasters before training; no danger of their schools falling away in their absence; substitutes are efficient; *ib.* 26279–26283.

Sometimes neglect schoolwork while studying for their own advancement; want of punctuality in morning attendance by teachers one defect in the schools; *ib.* 26329–26334.

Teachers self-taught in the country make greater progress in their subsequent studies; *ib.* 26335–26340.

Who study in the country should not be classified on examination in Dublin, but after examination in their schools by Inspectors, who have a sufficient check among themselves for arriving at a right result; *ib.* 26335–26343.

The majority of them attentive, and many zealous and efficient, but the instances of inefficiency among trained teachers raises doubt whether training establishment has not done more harm than good; *ib.* 26367–26370.

Poverty of, in Dublin; *ib.* 26369.

Of those in witness's district there is a greater proportion of trained teachers bad than of untrained; *ib.* 26374–26378.

The practice of classifying candidates only is injurious; the training institution is not to blame for the inferiority of the students in Dublin district; *ib.* 26383–26386.

Facility of, in getting situations in Dublin, a cause of the inferiority of the schools there; *ib.* 26387.

Classification of, should be made by Inspectors, who are generally well qualified to judge; not by professors, who cannot know anything of teacher's efficiency; *ib.* 26390–26398.

TEACHERS—*continued.*

1. *In National Schools, Ordinary and Model*—continued.

Salaries of, insufficient; *Card. Cullen* 26615.

In Catholic schools generally they teach catechism; should be specially instructed in religion; cannot be trained properly except in denominational schools; *ib.* 27451–27453.

In Clonmel model school are denied all sacraments except in case of marriage; are refused employment, simply because the bishop prohibits them, and from no other cause; the prohibition is looked on as a grievance even by Catholic clergymen; *O'Hara* 26779–26792.

The system of boarding pupil-teachers should be given up, it is not conducive to the interests of the Board; many come for the education, not intending to become teachers; a greater proportion of monitresses than of pupil-teachers, both trained by the Board, remain in its service; *ib.* 26793–26798.

Unequal powers of teaching of; should be paid partly by results; *ib.* 26805–26811.

Low qualifications of, in Ballina district; falsify school accounts to obtain their salaries; underbid each other for pupils, and multiply schools unnecessarily; *ib.* 26818–26833.

2. *In Church Education Schools.*

Some from the National Board have come to Church Education training school; their deficiency in both religious and secular subjects; *Leeper* 6919. 7028, 7029.

Practice of teaching teachers, as carried on in Church Education schools; *Wilkinson* 7115–7126. 7280.

Effect of training school on, decided and remarkable; *ib.* 7281–7284. 7288.

Are boarded on the premises; they have four hours for dinner and recreation daily; *ib.* 7285–7287.

Are badly paid; in some instances are competent, but of late years inferior to those of National Board; *Blacker* 16341–16345. Some have lately received allowances from Science and Art Department as payments by results; *ib.* 16350.

3. *In Erasmus Smith's Schools.*

Must be members of Established Church; *Thorp* 12706.

Difficulty of late years in obtaining; *ib.* 12819.

Return of, trained by the Church Education Society, by the National Board, in other places, and of those not trained; *ib.* 12914–12917, *and footnote*, and *Rudkin* 13507.

Emoluments of; *Rudkin* 13553–13560.

Difficulty of procuring efficient; *ib.* 13608–13610.

Average salaries of, are good, but many are underpaid; *ib.* 14040–14042. 14052. As a body are satisfied with their condition; *ib.* 14053.

4. *In Wesleyan Schools.*

Are all Wesleyans, reared by the body; *Tobias* 22862–22869.

Are appointed by the pastor or manager; *M'Millen* 14577. Are insufficiently paid; *ib.* 14578–14581.

No Roman Catholic teacher ever appointed to a Wesleyan school, before existence of National Board; *ib.* 14466–14475.

No Roman Catholic teachers in the fifty-one Wesleyan Methodist schools in connexion with the Board; *ib.* 14512.

5. *Generally.*

Very few come from monks' schools; *Newell* 3014, 3015; *Butler* 5965.

Effect of training schools on, decided and remarkable; *Leeper* 6788–6791; *Wilkinson* 7281–7284. 7288.

Must be under the control of the Catholic bishops,

TEACHERS—*continued.*

5. *Generally*—continued.

who cannot give up their right of appointment; *Bp. Dorrian* 8727.

In training schools should be appointed by ecclesiastical authorities of any sect; *ib.* 8731–8733.

Objection of nuns to classification as teachers; *ib.* 9211.

Classification of, is necessary; *ib.* 9217.

Competent lay teachers are always to be found by those who wish for them; *ib.* 9228.

Special provision should be made for training; *ib.* 9234, 9235.

In workhouse schools; their position; their work incessant; particulars of their salaries, rations, &c.; *Kavanagh* 10930–10935.

One teacher cannot efficiently manage more than forty children; even with that number a monitor is required; *ib.* 12676.

Wesleyans would be satisfied with a system of Government appointment of; *M'Millen* 14506.

Theoretical right but practical difficulty of parish priest in dismissal of; *O'Reilly* 14888.

Female, not always procurable where most wanted, therefore not always cheaper than male teachers; *ib.* 14903–14907.

Advantage of giving a piece of land to, even at a rent; attention to a farm of twenty acres need not interfere with school business; *ib.* 15030–15032.

As to veto of parish priest or bishop with regard to appointment or dismissal of teacher; *ib.* 15064–15067.

The important thing is to have them properly trained as secular teachers; it is essential that the State should have control of the secular education of the country, not trusting it either to Protestant or Roman Catholic bishops or clergy; *Warren* 15348–15352.

Ought not to impart religious instruction as a portion of regular school business so long as their action depends on the State; *Ross* 17474–17478.

A competent teacher might exercise some influence on the attendance; he would attract children from greater distances; *Macdonough* 18004, 18005.

Object to payment by results as productive of rivalry, a thing much to be deprecated; *ib.* 18006.

Trained teachers are, beyond comparison, more efficient than untrained; *J. S. Porter* 18063, 18064.

In Non-subscribing Presbyterian schools teachers sometimes remain long in the service; difficulty occasionally in filling vacancies; *ib.* 18065–18067. Payment of, in witness's schools; *ib.* 18068.

Should be allowed to select their books for teaching, care being taken that such books be free from sectarian bias; *Matthews* 18540. 18552–18555. 18561.

Thirty or thirty-five children sufficient for one teacher; *ib.* 18544.

Should teach practically in schools more generally than is done; *ib.* 18546–18551.

Should not be encouraged by Government till after training and examination; *Bp. of Down and Connor*; 19734–19737.

No matter how trained, denominational or otherwise, teachers would be eligible for examination and appointment in a secular system of education; *ib.* 19635–19639.

As to objections by Roman Catholic ecclesiastical authorities to appointments of, by laymen; no instance known of such; *De Vere* 20340–20349.

No probability of primary education in Ireland falling into the hands of female teachers; *ib.* 20366, 20367.

Pupils trained for, must not be compelled to continue so if not suited; if they go into other occupations the money is not wasted; *ib.* 20404–20408.

Advisability of teachers being of the same religion as the majority, care being taken that no injustice be done to the minority; *ib.* 20429–20431.

TEACHERS—*continued.*

5. *Generally*—continued.

Teachers at St. Wilfrid's and St. Alphonsus' schools, Manchester; their character; are certificated; *Toole* 21182–21187.

If they fulfil the conditions required for efficiency the State has nothing to do with their religious profession; but if the State pays, it has a right to a guarantee of fitness in the person whom it pays; *ib.* 21264–21271.

Teachers from English training schools are highly satisfactory; *ib.* 21303–21306.

In Manchester Roman Catholic schools do not give direct dogmatic instruction; they give incidental explanations; *ib.* 21359, 21360. 21369, 21370. Their salaries, and the mode of payment; staff required; nuns the same as others; *ib.* 21443–21453.

Direct payment to, instead of through managers would lead to bad results; mischiefs arising from the teacher's independence of the manager; *ib.* 21846. 21852, 21853.

Should, as a matter of course, be tested before appointment; if State pays a contribution to salary it is its business to fix the guarantee; difficulties in the way of applying tests to nuns in the way of oral examination; no difficulty in principle to an arrangement; *Forde* 22328–22341.

Might be examined and admitted to certificate without reference to their place of training; it is partially done under the present system; *Macdonnell* 23829–23836.

Desirability of teachers being practised in the art of teaching; witness's method of procedure in Marlborough-street training institution to that end; *Sheehy* 26254–26265. Supervision of, after lecture hours; *ib.* 26266–26272.

Nuns are very efficient; some of the best teachers under the Board are monitors who have been taught by nuns; *ib.* 26443–26446.

Superiority of teachers trained in convent schools; they remain under the Board as long as others; summary of examinations of some of these; *ib.* 26486–26490.

In France must hold a certificate of capacity; *Card. Cullen* 26667.

Certificates of competency of, could be granted by training colleges; should be tried and judged by results; those who pass best examination often the worst teachers; *ib.* 27142–27147.

Teachers of Incorporated Society, their appointment, examination, and salaries; *Hackett* 25924–25927.

Teachers in Canada.—Information concerning, in schools in Canada; *Gordon* 18740–18752. 18983–18990. Pay of; *ib.* 18916.

Of Connaught.—Their grievances; insufficiency of salaries; want of retiring pensions; payment of rent for school-houses and residences; *Gallagher* 19152–19155. Have no cause of complaint as to the mode of payment; *ib.* 19246–19249.

Of Leinster.—Statement of Association of Teachers for Leinster read; complaint of low average pay; desire of, for pensions; impossibility of securing average attendance of thirty-five children; the rule of training establishment an impediment to rising; desire of monthly payments; "good service pay" should be extended; are opposed to payment by results as the system is applied in England; *Macdonough* 17616. 17620. 17622. 17661. 17696 *et seq.* 17733. 17736. 17764. 17805, &c.

Of Munster.—Their grievances: inadequate remuneration; payment by results; payment of rent for school and house; want of pensions; and, partially, arbitrary power of dismissal by managers; *O'Callaghan* 19757. 19766–19772. 19806–19809. 19854–19857. 19877–19879.

Of Ulster.—Statement of grievances of; disproportionate salaries; withholding of salaries for low

TEACHERS—*continued.*

5. *Generally*—continued.

average attendance; unjust distribution of good-service allowance; want of superannuation allowance; precarious income from local sources; unpopularity of service; suggestions for various alterations; *Matthews* 18268 *et seq.*

TEACHING:

Teachers in training are not sufficiently exercised in teaching; *Joyce* 6507–6519. 6528–6530. 6542. 6636–6640.

Method of, for teachers, in Marlborough-street; *O'Sullivan* 7709–7717.

Teaching power in the normal school proper is neither adequate nor efficient; letter on defects in training read; *Kavanagh* 12407–12412.

Method of teaching the practice of teaching in Marlborough-street training institution; *Rintoul* 26021–26024.

Practical instruction in teaching requires rather to be increased than diminished; *ib.* 26035.

Desirability of teachers being practised in the art of; witness's mode of procedure in Marlborough-street training institution to that end; *Sheehy* 26254–26265.

Efficiency in, should be the chief test for classification; means of detecting neglect in; *ib.* 26314–26331.

See also TRAINING.

TEMPLE MEETING-HOUSE SCHOOL:

Quotations from case of, as to time and place for religious instruction; *Petticrew* 16913–16920.

Reference to case of, as to compulsion or permission to be absent of children at time of religious instruction; *Kavanagh* 19444–19449. 23386, 23387. 23390.

TEN COMMANDMENTS:

In National schools' placards the verses of the Bible have been so divided as to appear seventeen commandments; the Roman Catholics unite what Protestants call the first and second, and divide the tenth into two; *Blacker* 16423–16425.

TESTAMENT. *See* SCRIPTURES.

THIERS, MONS.:

Opinion of, that education in France must be made more religious; *Bp. Keane* 15601.

THIRTEEN WEEKS' RULE:

A cause of error in returns of attendance, &c., of children at school; *Kavanagh* 10164.

Is necessary, but is abused in making up accounts by those who draw up the reports of the Board; *ib.* 10796–10806.

Cannot well be shortened; may be differently treated in totting up, so as to show fairer numbers; *ib.* 10966–10998.

Not observed in workhouse schools; *ib.* 10926.

THOM, MR.:

Draws attention of National Board to necessary and important corrections in the books; *Keenan* 1706, 1707.

Vouchers by, for expenses of woodcuts for Board's books; *Claridge* 3878–3883. 3977.

Prints and binds for the Board; *Newell* 2740.

Charges of, and prices paid to, for National school books; *ib.* 2776–2783.

THORP, EUSTACE, Esq., Registrar of the Erasmus Smith's schools, evidence of; *pages* 538–547.

THURLES, SYNOD OF:

Vesting of schools in National Board or in trustees forbidden by; *Keenan* 1420, 1421.

Statutes of, inoperative at first, but have produced serious effects since; *Kavanagh* 12586–12588.

Statutes of, prescribe a rule as to the clergy giving religious instruction in National schools; *Bp. Keane* 15629.

Decree of Council of Thurles tolerating but not approving mixed education; *Kavanagh* 19348–19351.

Condemned mixed education; *Card. Cullen* 26599. Objected to National system; proposed certain safeguards; *ib.* 27253, 27254.

TITLE, LEGAL:

As to the general question of legal holding of Roman Catholic schools; *Forde* 23132–23147.

TOBIAS, Rev. JAMES, Secretary of Wesleyan Conference and chaplain of Dublin garrison, evidence of, *pages* 991–996.

TOLERATION:

Distinction drawn by Presbyterians between active and passive—a distinction without a difference; *Kavanagh* 19503, 19504.

TOOLE, Very Rev. LAURENCE Canon, evidence of *pages* 927–944. 946–947. 956–960.

TOWNSEND Brother PAUL, Superior of a House of, Presentation Brothers for the education of poor boys, evidence of, *pages* 758–760.

TRAINING:

Of managers, no facilities for, in Ireland; *Keenan* 1552–1558.

No proper place for training Roman Catholic teachers; *O'Carroll* 4084.

A teacher cannot be trained in six months, or in two seasons, in scientific subjects, unless previously instructed; *Sheridan* 5928, 5929.

Some few teachers (especially females) educated in schools other than National schools have from time to time come up for training; those who have not passed through a National school are rather deficient as compared with those who have; *Butler* 5961–5969.

Number of teachers in employment of Board who have passed through the training establishment; *ib.* 6009–6011. Diminution in the number of Catholic masters who come up for training; *ib.* 6020, 6021.

All teachers in training receive practical instruction in teaching; *ib.* 6142–6144.

Teachers should not be appointed till after training; teaching is like all other professions, it requires special training; *ib.* 6145–6147. 6162.

Doubtful whether earlier training would induce teachers to remain in service of the Board; *ib.* 6154–6158.

Classification depends greatly on method of training; *ib.* 6167–6172.

During course of, teachers make some advance in mathematics, but the main object is to give them the best mode of teaching arithmetic; *ib.* 6188–6197.

All teachers in training at Marlborough-street are kept at the public expense; *ib.* 6226. Many who come for, have been for some time in their schools; *ib.* 6230, 6231.

Training is not necessary in order to acquire high qualifications and good pay; *ib.* 6232, 6233.

As to attendance at public worship of teachers in training; *ib.* 6418–6421.

The period of training is not sufficient; *ib.* 6454–6456.

Pupil-teachers who come for, to Marlborough-

TRAINING—*continued.*

street, are good scholars and intelligent; those who most require training come in very small proportions; *Joyce* 6461–6463. 6503, 6504.

Attendance of teachers at Marlborough-street for practising teaching; *ib.* 6469, 6470.

Religious instruction of Roman Catholics in training devolves on the head master and such of his assistants as are Catholics; a paid chaplain should be appointed for this duty; *ib.* 6500–6502.

Teachers should begin young; after serving as pupil-teachers, and before coming to the training establishment, they should have charge of a school for a year or two, so as to experience the difficulties teachers have to contend with; *ib.* 6507, 6508. 6544. The practice pupil-teachers get in teaching is very different from real practice; *ib.* 6509–6541.

Teachers are really not trained in the business of school keeping and school management; *ib.* 6510–6514. 6528–6530. 6542.

Teachers in the ordinary class attend for one hour on four days a week, for giving instruction; that is the whole amount of their teaching in the schools; they may derive benefit from it; *ib.* 6515–6519. 6636–6640.

Opinions of the Inspectors as a body are worthy of high respect; probably their opinions on training may differ; *ib.* 6545–6547.

The catechism is not taught to teachers in training; they get no religious instruction except from the religious books which are put into their hands; *ib.* 6677–6686.

The time for training students not long enough; number of subjects too large for the time; time devoted to practice of teaching insufficient; *O'Sullivan* 7743–7746. 7941.

Although defective, is of benefit to the teachers; *ib.* 7769.

Proposed change in programme of, by Commissioners, in 1835, ineffective; much good effected in the face of difficulties to be contended with; *ib.* 7803, 7804. A yearly course should be substituted for the half-yearly, with four professors, each being responsible for his own set of duties; *ib.* 7805–7809.

According to a paragraph in Lord Stanley's letter, it was intended to train teachers before appointment, which has not been carried out from its impracticability; the Commissioners in 1835 expressed their intention to take special steps for training young persons who had not been in charge of schools; *ib.* 7867–7873. 7959–7962. Monitors were instituted at an early period of the system, the object being to lay the foundation for an efficient staff of teachers; *ib.* 7874–7876.

The rule is that teachers must be in charge of a school to be eligible for training; *ib.* 7878–7879.

The success of united education, as exhibited in the training department, has not been so conspicuous as previously; *ib.* 7887–7890.

The training institution continues to be efficiently conducted, and the inmates to be correct in their conduct; *ib.* 7891, 7892.

The decision of the Commissioners that teachers who proved qualified could enter the first class without training is a direct departure from the fundamental rule laid down in Lord Stanley's letter; *ib.* 7897–7899.

Per-centage of non-teachers in training for ten years ending December 1867; *ib.* 7919–7926.

Inferiority of non-teachers is not attributable to Cardinal Cullen's prohibition; the non-attendance of *bonâ fide* Catholic teachers is; *ib.* 7927–7930.

Cases where teachers of forty-two years of age come up for training are very exceptional; *ib.* 7931–7935.

The training department in Merrion-street was opened on 10th February 1834, and the first boarding establishment in 1838; the present cost to the Commissioners is about 10*d.* to 1*s.* per head per day, exclusive of rent, taxes, expenses

TRAINING—*continued.*

of staff, &c.; *O'Sullivan* 7791–7793. 7826–7839. 7850–7854. Great advantages of young persons of different denominations living together, but no one should be coerced into boarding houses; *ib.* 7840–7849. If teachers were allowed to board out of the establishment it would afford facilities for instructing a larger number of teachers; *ib.* 7864–7866.

Five meat dinners a week were allowed in the boarding houses, which have been reduced to four, a rice dinner being substituted on one day; the alteration was made against the wish of the superintendent; *ib.* 7795–7801.

Per-centage of Catholic teachers who come up for training is not large, considering the prohibition; some managers appear disposed to relax the rule; *ib.* 7968–7972. 8017. The prohibition prevents clerical managers from employing teachers trained in Marlborough-street, and directs them not to allow untrained teachers to go there for training; *ib.* 8015.

Objection to boarding-houses on the part of numerous managers; *ib.* 7990.

Facilities exist for clerical supervision of Catholic teachers, but are not used; *ib.* 7991. Probable cost of boarding and lodging teachers as compared with some English towns; *ib.* 8021–8029.

Objects of many non-teachers in coming to Dublin; *ib.* 8030–8033.

Of pupil-teachers at model schools; *Fitzgerald* 8320–8339. 8448–8454.

Teachers, pupil-teachers, and monitors coming to be trained, should have some practical experience; *ib.* 8519–8523. Teachers frequently come for training in opposition to clerical managers, with certainty of losing their schools; no instance is known of Roman Catholic teachers refusing to be trained; as a rule, they are most anxious for it; *ib.* 8524–8534.

One system of training cannot turn out teachers qualified to enter any school indiscriminately; tone of school, style of literature, and religious training must be left in the hands of the clergy; *Bp. Dorrian* 8728, 8729.

Girls trained by nuns are the most moral of the population; *ib.* 8741.

System of training desirable; no one system could make provision for all denominations; the central Board should attend only to financial arrangements, and see that a fair value was had for money expended; *ib.* 8940–8945.

The more united, of pupil-teachers, the better, but if a large section desire separate, it should be granted them; *Macdonnell* 11156, 11157.

Plan established by Government for united training of teachers of Ireland has failed; plan to overcome the difficulty; *ib.* 11296–11301.

Clerical certificate not enforced, but not dispensed with; others would suffice; *ib.* 11302–11305.

Mixed training perfectly safe; *ib.* 11323–11325.

Training in model schools under the Board is excellent; *Lord Oranmore* 13347.

Religious, of teachers, by State objected to; *Bp. of Down and Connor* 19612.

Suggestions as to, *à propos* of the falling off of teachers from country model schools in consequence of opposition of Roman Catholic clergy; *De Vere* 20161–20175. 20318, 20319.

Training schools satisfactory to Catholics would produce teachers suitable chiefly for non-vested schools; *ib.* 20160–20170.

Two systems of training teachers in existence; both deserve support; denominational training schools would be more satisfactory to both parties; *Bp. of Ossory* 20652, 20653.

Teachers require training; there should be a training school for Catholic teachers, and time for training extended; *M'Menamin* 21912, 21913.

Too little time devoted to instruction in practice of teaching; few teachers can read intelligibly in

TRAINING—*continued*

Third Book, are deficient in collateral information, points of grammar, &c.; *Rintoul* 26062.

Instruction imparted by familiar lectures, explanation, &c.; *ib.* 26063.

Time that should be devoted to instruction in practice of teaching; *ib.* 26064, 26065.

In model schools is very effective; *Newell* 24524. Irregularity of training of National school teachers at Dublin or at model schools; *ib.* 24646 *et seq.*

Witness's mode of procedure with teachers in training as to their practice; *Sheehy* 26254–26265. Present time of, should be extended in some cases if necessary; desirability of a museum accessible to the teachers while training, with lectures, &c.; *ib.* 26278, 26285. No danger of schools falling away while teacher in training; *ib.* 26279–26283.

The training of Inspectors should be looked after before the training of the teachers, so that there should be one standard; Inspectors should undergo a course of practical schoolmastership in model schools; many have done so; *ib.* 26344–26351.

At time of witness's connexion with Marlborough-street about three-fourths of teachers in training were Roman Catholics; as to recommendation of teachers for second training; *ib.* 26472–26477.

Teachers summoned directly to, by Inspectors, lest managers might not transmit the summons; Inspectors asked to recommend pupil-teachers to fill vacancies in training class; *ib.* 26478–26484.

Suggestion of the elements by which classification should be determined; time now allowed for training not sufficient; maximum and minimum of marks to be allotted to supposed curriculum; *O'Hara* 26812–26817.

TRAINING INSTITUTIONS:

Religious instruction is not given to both denominations in, at same time and by one person; *Sheridan* 5877–5879.

Objection to, on account of the abuses allowed to exist in them; instances cited; *Bp. Dorrian* 8692–8704. 8838–8852. 9009–9029.

To be assisted by Government, but the teachers to be appointed or approved by ecclesiastical authorities; *ib.* 8730–8733.

Number of need not be increased; *ib.* 8945.

Each denomination must have its own training establishment; the approval of teachers must rest with the ecclesiastical authorities, not the selection; *ib.* 9160–9163.

With a system of separate training schools, Catholic prelates would receive any reasonable assistance, and do their utmost to complete the arrangement; what is done for England should be done for Ireland; a more moderate contribution would be accepted rather than the continuation of the present system; *ib.* 9173–9179. 9233.

Should be established according to geographical distribution of religious bodies; *Kavanagh* 10115–10119.

The religious training is the difficulty of the system; often talked of but never reported on; such report would have been cut out; *ib.* 10239–10247.

The teaching power in, is neither adequate nor efficient; *ib.* 12407–12409. The training establishment is a mere common school; *ib.* 12413. Unsatisfactory position of male teachers in; *ib.* 12416–12420.

Denominational training establishments advocated; separate lodging-houses if required must be yielded; *Macdonnell* 11243–11249.

Attendance at, notwithstanding the interdict; *ib.* 11261 *et seq.* Roman Catholic clergymen object to their teachers being together with those of other denominations; those who do come being anxious to obtain a training; *ib.* 11273–11278.

TRAINING INSTITUTIONS—*continued.*

Separate, compatible with united education; *Macdonnell* 11306. 11312–11319.

A modification of Board's rules regarding, might be made; *ib.* 11339.

The English system of, would hardly be applicable to Ireland; *ib.* 23773.

Wesleyans have one for male teachers; *M'Millen* 14427.

If made denominational, should be in the provinces; *O'Reilly* 14887.

Recognition by Catholics of the right of their bishops to control, both as to teachers and books; *ib.* 14889–14891. The English training system should be followed; *ib.* 14892. 15045.

Reasons against the maintenance of, in Dublin; *ib.* 14893–14895.

Specific objections of Roman Catholic bishops to any that are not religious, that is, denominational; *ib.* 14956.

Should be strictly denominational, and the religious instruction placed under the control of the bishops, the parents being allowed all the control to which they are entitled as to financial matters and the like; *Bp. Keane* 15596–15598.

Teaching in, must be in common, otherwise how could the teachers teach in common; desirability of separate boarding-houses, which need not necessarily be governmental; *Ross* 17466–17471.

Model schools valuable as training schools for teachers; *J. S. Porter* 18152. Quotations from official documents showing that they were so intended; *ib.* 18155–18160.

In Upper and Lower Canada; *Gordon* 19049–19053.

Denominational, objected to, so far as the State is concerned; *Bp. of Down and Connor* 19732.

Institution of non-vested training schools suggested and advocated for teachers for non-vested schools; *De Vere* 20163–20175. 20389. 20310–20314. 20318, 20319. 20393. Would improve the classification of teachers; *ib.* 20211.

Non-vested training schools as proposed are not denominational; the difference important; the religious instruction in them to be in the hands of the patron; non-vested schools may be separate or not separate, mixed or not mixed; in them a teacher can be trained in everything except the separate religious instruction given in the school; *ib.* 20253–20259.

As suggested, would not necessarily become denominational; the Board would have the same control as over ordinary non-vested schools; *De Vere* 20395–20403. Would not necessarily fall into the hands of "brothers" or nuns; *ib.* 20409–20412. Further arguments in favour of; *ib.* 20432–20439.

Non-vested training schools would obviate any difficulty in getting teachers; *ib.* 20367.

Teachers from English training schools are highly satisfactory; *Toole* 21303–21306.

Desirability of continuing, but also of improving; *Sheehy* 26380–26382.

Not to be condemned because incompetent candidates get classed as teachers; *ib.* 26383–26386.

English system desirable for Ireland; schools similar to Hammersmith and Liverpool should be established; no difficulty as to female teachers, as convents already train them; *Card. Cullen* 26605, 26606. Must be denominational; *ib.* 26609.

Mr. Fortescue's proposal as to separate boarding-houses unsatisfactory; model schools founded by private persons are of importance and utility; *ib.* 26610.

TRAINING SYSTEM:

Letter read setting forth the defects of, with suggestions, &c.; *Kavanagh* 12412.

The failure in, led to the organizing system; *ib.* 12415.

TRAVESTIE

Of a rite of the Roman Catholic Church in model school of Belfast one of the grounds of objection to the training schools; *Rp. Dorrian* 8692–8694. 9009–9018.

TRIGONOMETRY:

Taught in Marlborough-street training establishment; *Butler* 6205. About 30 or 40 per cent. of the masters who come up are in a position to commence trigonometry; *ib.* 6352–6356. Trigonometry and the physical sciences are not necessary, nor should they be a *sine qua non* even for a first-class teacher; *ib.* 6357.

TRIM:

Effect of opening convent schools at, on attendance of children at model school; *Fitzgerald* 8311–8314. 8384–8388; *Kavanagh* 12030.

As to National school and convent school at; model school, attendance at, and rate of pay; free pupils; model school at, one of the earliest; *Fitzgerald* 8310, 8311. 8315–8319. 8381–8383. 8389–8395.

The model school an excellent and well managed school in 1856; now two of its three departments are closed; *Kavanagh* 12645–12646.

TRIM DISTRICT:

Principally grazing; 32th. in population, and the poorer classes inferior and more ignorant than in other districts; *Hunter* 3149. 3163. 3164. State of schools unsatisfactory; Trim district includes nearly the whole of Meath, which is a pastoral county, and the poorer classes are very poor; more absolute destitution in some parts of Meath than in any other district of Ireland; *ib.* 3401–3408. 3520.

TRUST DEEDS

Refer only to building grants and legal property; they do not affect the continuance of the school, payment of salaries, &c.; *Kavanagh* 11029.

TRUSTEES FOR SCHOOLS:

The system of, should be abolished; alternative proposals; *Kavanagh* 11023–11031.

TULLYVIN ROYAL SCHOOL:

Under Chief-street Commissioners; as to manager and teachers in; *Kyle* 15446–15448.

ULSTER:

Success of National system throughout; *Berkeley* 11703–11714. Large number of Roman Catholics in, who wish their children to read the Authorized Version; *ib.* 11719–11739.

As to mixed education in; *Warren* 15204.

National Education, Association of, represents all Protestant denominations; decidedly opposed to denominational system; *J. S. Porter* 18169–18172.

National School Teachers of, statement of grievances of; *Matthews* 18268.

Time occupied by witness in visiting schools in Ulster; *Kavanagh* 22422–22469.

ULSTER, SYNOD OF:

Resolutions of, contained in the Report of 1833 as to reading of Scriptures in school without compulsory attendance, recognise a distinction as to two classes of schools, and do not contain anything inconsistent with the system of education committed to the Commissioners; no important difference between the rules now referred to and those after 1840; *Hunter* 3619–3625.

Propositions for modifying system of National education submitted by, withdrawn, and others substituted; *Petticrew* 16823–16827. Propositions of, in 1833, for altering rules of National Board not agreed to; *ib.* 16906.

Resolutions of, in 1833, not objected to by Lord Grey; *Kavanagh* 19564.

ULSTER, SYNOD OF—*continued.*

Its relation with National Board prior to 1840; *Kavanagh* 19488–19496. Discussion as to action of, on its four propositions relating to withdrawal at time of religious instruction; *ib.* 23376–23382 *et seq.*

ULTRAMONTANISM:

Definition of; *Card. Cullen* 27077, 27078. 27184–27191.

UNITARIANS

Are not suspicious as a body; they would not object to instruction in the Bible and catechetical instruction by a Presbyterian; *Longfield* 24324.

UNITED EDUCATION:

Meaning of; *Warren* 15176, 15177. In many parts materials exist for it, though it is not to be found; as to mixed education in Ulster; *ib.* 15189–15204.

A system of united education excludes no one, and gives ample opportunities for teaching peculiar tenets; *Wilson* 15994.

Should be a system mainly supported by the State, so conducted that all may use it without sectarian teaching being forced upon any; National system fairly fulfils these conditions; *Petticrew* 16881–16886.

Great importance to be attached to, with reasons; the only principle to be regarded fair in a country like Ireland; the benefits it affords must not be withheld from all, to suit the peculiar feelings of a few; *Ross* 17556–17575.

Not the slightest objection to system of, in any class or denomination of the poor; *J. S. Porter* 18102.

Advantages of, over denominational system; *ib.* 18163–18165. Well spoken of in society; growing conviction of its importance and reality; *ib.* 18166–18168.

Desirability of, and the largest possible amount of; *Bp. of Down and Connor:* 19640, 19641.

UNITED STATES:

Difference of system of education in, from that of Canada; *Gordon* 18834–18837. Sunday schools considered of importance in supplying religious instruction; *ib.* 18903.

Mixed system of education in; evils of; *Card. Cullen* 26630–26633.

URSULINE NUNS. *See* CONVENT SCHOOLS. RELIGIOUS ORDERS.

VACANCIES:

As to filling up, of Inspectors and Clerks; *Macdonnell;* 23675–23680.

WARBURTON, VERY REV. WILLIAM, D.D., Dean of Elphin, [illegible] of, pages 512–514.

WARREN, Right Hon. ROBERT R., Attorney-General for Ireland, and Vice President of Church Education Society, evidence of; *pages* 653–663.

WESLEYAN CONFERENCE:

Reports made to, by General Inspector of Wesleyan schools; *M'Millen* 14520.

WESLEYAN METHODISTS:

1. *Wesleyan Schools.*
2. *Opinions of, as to Education, &c.*

1. *Wesleyan Schools.*

About half the schools of, are under the Board; *M'Millen* 14421–14426.

Have one small training establishment for male teachers only; boys' and infants' schools in connexion with it; *ib.* 14427–14440.

No Roman Catholic teachers in; *ib.* 14466–14475. 14512.

WESLEYAN METHODISTS—*continued.*

1. *Wesleyan Schools*—continued.

General Inspector of; *M'Millen* 14519.

General Inspector visits all in turn; *ib.* 14519.

Reports on, made to Conference and committee; *ib.* 14520.

Very few held under chapels; *ib.* 14723–14727.

Number of scholars on the roll in schools under the Board; average attendance of; *ib.* 14534.

Managers of, mostly clerical; *ib.* 14537.

Roman Catholic children in, not interfered with; *ib.* 14541.

Are mixed; not two-thirds of the children are Methodists. Protestants do not object to religious teaching in; *ib.* 14553–14556.

Conditions under which they were placed in connexion with the Board; *ib.* 14557, 14558. Many previously were opposed to the principles of the Board on religious grounds; *ib.* 14559–14561.

Great many of the poorer class attend; *ib.* 14569. There are six middle class schools; *ib.* 14570. Are only partly supported by children's payments; *ib.* 14571. School fees are asked but not enforced; *ib.* 14576.

Wesleyan children are not under the care of Roman Catholic masters, except in model schools; *ib.* 14650.

A few Roman Catholic children attend, especially in the west of Ireland; *ib.* 14655–14662.

Are non-vested chiefly, and are all under their own government; must be regarded as denominational; *Tobias* 22848–22856.

Teachers are of their own body, and reared by them; *ib.* 22862–22869.

Mission schools are not under the Board; catechism is taught in them; would be given up if good secular schools were established by the State; *ib.* 22803–22807.

The schools under National Board contain a certain mixture of creeds; growing desire among Wesleyans for united secular education; they joined the Board in the belief that the system was likely to be maintained; schools of, are conducted so as not to interfere with the religious faith of anyone; *ib.* 22776–22781.

See also INSPECTORS. SCHOOLS: 1. *Generally.* TEACHERS.

2. *Opinions of, as to Education, &c.*

Joined National Board in 1860; *M'Millen* 14444. 14663.

Are favourable to the National system, but not to its administration; *ib.* 14452.

Would prefer that all schools receiving State aid should be purely secular schools; *ib.* 14460.

A purely secular system preferable to denominationalism; *ib.* 14587. National system the best, if admitted and honestly worked; *ib.* 14606. In a secular system priests and ministers could take care of religious instruction; *ib.* 14501.

Exclusion of the Bible as a class-book was the principal objection of, to National Board; *ib.* 14492, 14493.

Would be satisfied with a system of Government appointment of teachers without religious teaching; *ib.* 14506.

Children of, do not receive instruction from Roman Catholic teachers, except in the model schools; *ib.* 14515–14517.

Number of, in 1861; *ib.* 14527. They took an important part in educational matters before the Board was established; as a rule they contribute liberally in support of education; a general education collection is made annually; *ib.* 14531–14578.

Programme submitted in 1860 to National Board by Wesleyan Education Committee, for placing their schools under Board; *ib.* 14557.

Joined the Board on the understanding that united secular and separate religious teaching should be maintained; to fall back on denominationalism would be a breach of faith; *M'Millen* 14566.

Are in favour of mixed education; *ib.* 14594.

Object to their children attending vested schools where the patron is Roman Catholic; *ib.* 14609. Seldom make any distinction as to denomination of Protestant teachers; *ib.* 14611.

Have erected a college at Belfast; *ib.* 14614, 14615.

Do not object to pupil-teachers in the model schools being under Roman Catholics; *ib.* 14616.

Do not object to Roman Catholic Inspectors being patrons of model schools; *ib.* 14690. Are opposed to State aid for denominational schools; *ib.* 14693.

Have adopted the denominational system in England; *ib.* 14704.

Have schools in connexion with the National Board; joined the Board, not as approving it in all its parts, but as considering the system the best extant and hoping it would be better; *Tobias* 22738–22747.

Correspondence between former chairman of Education Committee of, and National Board, showing the arrangements made between them; will be adhered to so long as the Board is true to them; *ib.* 22782–22787.

Hope that English Wesleyans will give up denominationalism; reason for the difference of opinion between them and Irish Wesleyans; *ib.* 22788–22792.

Are not represented on National Board; number of, in Ireland; are mostly poor; predominate in Belfast and Portadown; *ib.* 22829–22837.

Cannot pretend to say how other churches should be treated; would treat others as they wish to be treated; *ib.* 22838–22844.

Have not been refused by the Board, because they have not asked; *ib.* 22845–22847.

Letter in explanation of some points of evidence given regarding conduct and rules of National Board in connexion with; *ib. page* 936.

WEST DUBLIN MODEL SCHOOL:

Number of pupils on roll and average attendance; cause of diminution; *Fitzgerald* 8302–8304.

Teachers trained in, since 1862, also in Cork Model School, cannot get employment as National school teachers, the schools being opposed by the Catholic bishops; *Shesby* 26470, 26471.

WHATELY, ARCHBISHOP:

Influence of his published opinions, as to the effect of the National system in un-Romanising Ireland, on the conduct of the Roman Catholic bishops; several passages quoted; *Keeaney* 12084–12088. 12107–12176.

Condemnation of opinions of, by Bishop Murray in Australia, and Sir John Gray in Parliament; *ib.* 12090.

Letter to, from witness, on "Scripture Extracts;" *ib.* 12402.

Words attributed to Dr. Whately implied that he had a design to subvert the faith of the people; *Bp. Keane* 15739–15750.

As to the cause of his retirement from the National Board; *J. S. Porter* 18185–18186.

The life and founder of the Board. His opinion that the National system was a great engine for undermining the Catholic Church in Ireland; *Card. Cullen* 27045.

Thought the "Scripture Extracts" would be a means of undermining Romanism; Dr. Murray tolerated these Extracts; *ib.* 27255–27264. If he wished to introduce the religious element he should have declared for denominational schools. If he knew the doctrines of the Catholic Church, he was acting treacherously; *ib.* 27265–27270.

WHATELY'S CORRESPONDENCE:

Chief cause of the change of opinion of Roman Catholics, as to the National system; *O'Reilly* 15001.

WHITTLE, J. LOWRY, Esq., barrister, evidence of; *pages* 1077–1085.

WILKINSON, WILLIAM THOMAS, Esq., Training Master, and occasional Inspector under Church Education Society, evidence of; *pages* 294–310.

WILLIAMSON, RICHARD, Esq., Surveyor and Architect to Irish Society, and County Surveyor of Londonderry, evidence of; *pages* 919–927. 945, 946.

WILSON, JAMES, Esq., practising barrister, graduate of the Queen's University, formerly an Inspector under National Board, evidence of; *pages* 621–712.

WOODCUTS:

Expenses of, vouched for by Mr. Thom; *Claridge* 3879–3883. 3977.

WORKHOUSE SCHOOLS:

One in South Dublin District is conducted on the denominational principle; teachers and average attendance at; *O'Carroll* 4423–4435.

Average attendance and number on rolls at; numbers on the rolls represent the children passing through in a year; *ib.* 4426.

Many are insufficiently supplied with teaching power. Those in large towns generally have trained teachers; *Sheridan* 5546–5549.

Are inspected by Poor Law Inspectors, insufficiently; Board's Inspectors find guardians backward in adopting suggestions; *ib.* 5550–5556.

Great fluctuation of attendance; printed tables do not give fair idea of attendance: names are kept thirteen weeks on rolls after children have left; *ib.* 5592–5601.

The education in, is fair; in Belfast the teacher is appointed with the sanction of the chaplain; the education is much the same as in common schools in the country; the educational staff is probably sufficient; *Bp. Dorrian* 8754–8756. 8952.

Education in workhouse schools tolerably good, there is no mixture in them; there are Catholic teachers for Catholics, and Protestant teachers for Protestants; the fact of Poor Law Boards being composed of almost every religious party is a security against interference with the discipline by the chaplains; *ib.* 8948–8956.

Salaries of masters and mistresses in; *Robinson* 10388–10390. Power of guardians and Board over masters; guardians are generally ready to appoint new teachers and sufficient school assistants; *ib.* 10395–10398. 10413–10427.

Few teachers now leave or are dismissed; great care is exercised before appointment; National Board classification is taken as evidence of literary knowledge; *ib.* 10620–10627.

Schoolmasters often remain a long time; some are made masters of workhouses; salaries. Married teachers not usually allowed to have them families in the workhouse; no extra allowance in consequence. Many very efficient unmarried teachers; some instances of immorality among this class; *ib.* 10657–10668.

District of witness, an Inspector of Poor Law Unions, comprises seventeen unions, and all contain workhouse schools. Boys and girls' schools separate, except in smaller unions. Largest and smallest in daily attendance; schools are inspected every six months, and reports made to Poor Law Commissioners; *Robinson* 10372–10387. 10526–10531. Causes of disparity between rolls and average attendance; *ib.* 10428. 10429. 10476–10479. 10560–10580.

Secular, industrial, and religious instruction of pauper children is sufficient; *ib.* 10532–10537. As to religious instruction, children are brought up as registered; *ib.* 10399–10405. Difficulties often arise where religion of deceased parent cannot be ascertained; *ib.* 10441–10443.

One Inspector could not examine all the workhouse schools in Ireland in six months. Children come in grossly ignorant; most are under ten years of age, and have never been to school; *ib.* 10417–10427.

Children are taught trades or work in nearly all the schools; *ib.* 10430, 10431.

No prejudice against girls or boys from workhouses, they obtain places freely; only fourteen per cent. of those hired out from Dublin unions return; tabular return and statistics on this subject; *ib.* 10454–10463. 10545–10549. Children go out at from twelve to fourteen; guardians satisfy themselves as to character of employers; *ib.* 10489–10498.

Return of young persons educated in union schools and of employment obtained by them, on leaving, &c.; *ib.* 10460.

Farms varying from twenty-five to two acres are attached to all the unions, and in some a special agricultural officer is kept; *ib.* 10472–10475. Children are taught from Agricultural Class Book in school; where no agriculturist, schoolmaster teaches on land as well as in school; *ib.* 10550–10559.

Any competent person may be agriculturist; sometimes office is combined with that of schoolmaster, as at Tullamore, where master receives £50 a year for the two duties; *ib.* 10679–10684.

Form of supplemental report on workhouse schools; *ib.* 10531.

Advantages and disadvantages of separating inspection of schools from ordinary Poor Law inspection, as in England. Each school should be inspected at least twice a year; *ib.* 10697–10699.

More reliance on returns of, and better attendance at; thirteen weeks rule not regarded in; in some the education given is excellent; have improved of late; *Kavanagh* 10925–10929.

Teachers in, are better off pecuniarily than National school teachers, but worse socially; their work incessant; particulars of their salaries, rations, &c.; *ib.* 10930–10935.

WORKS AND REPAIRS:

Return of total expenditure from Parliamentary grant on works and repairs of ordinary and model schools by the National Board, from 1831 to 1868; *Kavanagh* 10835.

See also BOARD OF WORKS.

WRITING COPIES:

As to use of Scripture texts for; *Bp. of Down and Connor* 19707, 19708.

YOUNG MEN'S ASSOCIATION, BELFAST:

Detail of proceedings taken in connexion with the Young Men's Association—the Catholic Institute—of Belfast; *Bp. Dorrian* 8929–8933.

ZOOLOGY:

No means of teaching in training establishment at Marlborough-street; *Butler* 6317, 6318.

DUBLIN: PRINTED BY ALEXANDER THOM, 87 & 88, ABBEY-STREET,
FOR HER MAJESTY'S STATIONERY OFFICE.
